This class focuses on determining the fair values of individual tangible
and intangible assets, as well as the overall value of a business and
includes calculating fair values for financial reporting. The three valuation
approaches (Market Approach, Income Approach, and Asset Approach)
are covered in depth along with the professional standards, developing
the cost of capital, and applying valuation adjustments (discounts and
premiums).
Prerequisite(s): A minimum grade of "C" in ACCT 4133.

ACCT 7639 Cyber Forensics and Data Analytics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses the scientific aspects of classic computer forensic
tools and technologies used to recover data and conduct appropriate
analysis to improve individual computer, networks and mobile technology
performance. In cyber forensics these tools and technology are used
to facilitate: 1 – Collection of data while preserving the integrity of the
data; 2 – Examination of data using manual and automated methods to
assess and extract data of interest; 3 - Employ data analytics methods and
techniques to derive useful information from relevant data; 4 – Reporting
the actions used, how tools and procedures were selected, determine
what other actions need to be performed, securing identified vulnerabilities
and improving existing security controls. In cyber forensics and data
analytics digital evidence is married to the practical side of financial
forensic investigations and includes the use of digital evidence in legal
settings.
