3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Delivering care to meet the needs of the population of the communities, a health organization service requires a strategic approach and an organizational culture that attends to those healthcare needs. This course is designed to familiarize students with the current applications of social and behavioral sciences. It is an overview of healthcare and public health management and administration, managerial decision making and the practical knowledge, tools, processes and strategies required to operate successfully with a population health focus by the healthcare organization.

HSPM 7333 Healthcare Governance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the macro-organizational concepts of managing complex health care organizations. Health care organizations are complex systems transforming inputs (professional, supplies, etc.) into outputs (health services) for customers (patients). To perform well, these systems require appropriate environmental assessments, strategy, governance, organizational structure, work processes, distribution of power, innovation and change. These requirements for effective organizational performance form the core content of the course.

HSPM 7334 Human Resources Healthcare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on functions and concepts required for managing human resources in organizations. It combines traditional human resource management (HRM) functions with concepts from organization behavior. Course content includes selection, training and development, compensation, performance appraisal, motivation, organizational development, union activity, and modes of conflict resolution.

HSPM 7335 Healthcare Operations Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines operational issues in health care management. Topics include systems analysis, continuous quality improvement and re-engineering, demand forecasting, facility location and design models, decision analysis techniques, linear programming, queuing and waiting models, inventory control models, and statistical quality control. The goal is to instill an understanding of the language, applications, and limitations of quantitative models with regard to decision making and problem solving in health care organizations.

HSPM 7336 Healthcare Supply Chain Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The healthcare supply chain is a vital core business component of the health organization with the mission of delivering the technological elements of the patient care process to the providers of care. From strategic sourcing and purchasing, acquisition, logistics, inventory management, to point of use applications, this course provides understanding, knowledge and evaluation models to operate and manage an organization’s enterprise resource planning and management system, specifically with regard to the supply chain system and the management of that system as evaluated from strategic operations management and financial perspective.

HSPM 7337 Integrative Health Enterprise Analytics and Decision Making
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Given the integration of data, community needs and regulation and policy, this course incorporates the elements of healthcare, public health, health information technology and the health insurance sub-industries to develop a framework and analytic methods to improve efficiency, effectiveness and efficacy of the health industry as a whole. The course will establish an analytic framework, based on data from patients, populations, processes and profitability (4 P’s of Health Analytics) utilizing industry, healthcare enterprise and community health data with appropriate tools, methods and approaches to answer community health needs and status, operational, financial and healthcare delivery outcomes questions to support leadership decisions. The course will also include an integrated platform of appropriate analytical and predictive/estimation methods, tools and techniques for enhanced decision making at the strategic and operational levels of the health enterprise for enhanced health status and improved health outcomes of communities served.

HSPM 7338 Contemporary Issues in Healthcare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines operational issues in health care management. Topics include systems analysis, continuous quality improvement and re-engineering, demand forecasting, facility location and design models, decision analysis techniques, linear programming, queuing and waiting models, inventory control models, and statistical quality control. The goal is to instill an understanding of the language, applications, and limitations of quantitative models with regard to decision making and problem solving in health care organizations.

HSPM 7710 Administrative Internship
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Field experience for graduate students which consist of a three part experience of 300 contact hours which will include the following: 1. Students are to complete rotation rounds of all administrative and clinical departments. 2. Students are to attend major management and governance meetings, and 3. Students are to be assigned special projects for completion at the end of the administrative internship. The student must present a written presentation to Master of Healthcare Administration (MHA) faculty for assessment.

HSPM 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.
