PUBH 2131 Introduction to Community and Public Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to the core functions of public health with an emphasis on community health programs and current trends of population health. Exposes the student to the role of community health practice in maximizing the health status of all populations. Course will include an overview of the organizational structure of federal, state, and local health-related agencies and examine the interrelationship of political, social, cultural and economic dimensions of community based population health activities.

PUBH 3130 Substance Use and Abuse
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores legal and illegal drug use in modern society. Issues related to the social, cultural, political and economic impact of drug use will be discussed. The emphasis in the course will be on prevention, treatment and effective education techniques for various practice settings and target populations.

PUBH 3131 Chronic Diseases: A Modern Epidemic
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Chronic conditions (e.g., diabetes, cardiovascular disease, renal disease, obesity) are currently responsible for sixty percent of the global burden of disease and the World Health Organization predicts this to rise to eighty percent by the year 2020. This is one of the greatest challenges facing health care systems throughout the world and it places long-term health and economic demands on health care systems as the population ages. This course will provide students with the opportunity to study specific issues related to chronic disease epidemiology and management and their links to practice.

PUBH 3132 Health Care Systems and Advocacy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the background and development of administrative settings for health care delivery in the United States by exploring trends and issues based on current health and medical care programs and practices and analyzing the current organizational structure of medical care services in the United States. Topics to be examined include the medical care process, factors affecting supply and distribution of health professionals and health facilities, health care costs, and financing of care through health insurance and governmental programs. Students will also learn health advocacy skills to plan community based interventions.

PUBH 3134 Principles of Environmental Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines health issues, scientific understanding of causes, and possible future approaches to control the major environmental health problems in industrialized and developing countries. Topics include how the body reacts to environmental pollutants; physical, chemical, and biological agents of environmental contamination; vectors for dissemination (air, water, soil); solid and hazardous waste; susceptible populations; biomarkers and risk analysis; the scientific basis for policy decisions; and emerging global environmental health problems.

PUBH 3136 Multicultural and Social Determinants of Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the characteristics, causes, and effects of health disparities in the U.S. Health Care System. It also provides students with a foundation to develop the knowledge, attitudes, and skills to become culturally competent health educators. The course explores how health education and promotion is shaped by the cultural, social and economic contexts in which individuals function.

PUBH 3231 Epidemiology and Biostatistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the student to the principles and practice of epidemiology and biostatistics. Students will be exposed to the historical development of epidemiology, concepts of causality, definitions of health and disease, and sources of community health data. Current principles and practices in the cause, prevention and control of diseases in various community settings will be emphasized.

PUBH 3330 Modifying Health Behaviors
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the major theoretical models used in public health practice for modifying health behavior. The efficacy of interventions in relation to current practices in public health, best practices and applications of theory-driven health behavior change are studied within the context of community-based settings. The focus of the class is to identify the critical factors necessary to create health behavior change in order to address the current Healthy People goals and objectives.

PUBH 3431 Introduction to Global Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the broad and growing field of global health. The course will discuss how health and illness is defined and explore the biological, cultural, social, and political forces that influence health at the global level. This is a survey course that will explore such topics as: comparative health systems, social determinants of health, health services and quality, healthcare policy, key stakeholders, and major global health initiatives. Throughout the course, an emphasis is placed on global health ethics and issues of social justice.

PUBH 3432 Introduction to Global Health Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the range of cultural and policy approaches different countries take to health, healthcare access, and related population-level health interventions. As part of this course, students will compare different healthcare systems from selected countries.

Prerequisite(s): A minimum grade of "C" in PUBH 2131.

Prerequisite(s): A minimum grade of "C" in PUBH 2131.

Prerequisite(s): Sophomore standing.

Prerequisite(s): Sophomore standing and a minimum grade of "C" in PUBH 3431.
PUBH 3531 Consumer Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course prepares individuals to make intelligent decisions regarding the purchasing and use of health products and services that will have a direct effect on their health. Allows students to explore the relationships among consumerism, health and education. Students will investigate consumerism, marketing and advertising as foundational aspects of consumer health. In addition, students will survey a variety of health related products and services to determine the implications and consequences of their use.
Prerequisite(s): A minimum grade of "C" in HLTH 1520.

PUBH 3611 Health Honors Thesis Seminar I
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This is a seminar course that prepares students to complete a senior honors thesis proposal.

PUBH 3612 Health Honors Thesis Seminar II
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This is a seminar course that prepares students to complete a senior honors thesis proposal.

PUBH 4090 Selected Topics in Public Health
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Allows the student the opportunity to receive specialized and/or focused instruction in a public health topic not generally offered by the College.

PUBH 4099 Selected Topics in Public Health
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course provides the student with in-depth study of selected topics in public health.

PUBH 4132 Health Education and Promotion Program Planning I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the theory and application of community-based program planning and evaluation. The first of a two-course sequence, the focus will be on the development of a health promotion program plan designed to apply course content to a real-life health issue. Concepts in community assessment, organization, and mobilization for the purpose of addressing identified public health concerns will serve as the foundation for the planning process.
Prerequisite(s): A minimum grade of "C" in PUBH 2131.
Corequisite(s): PUBH 4134.

PUBH 4133 Health Education and Promotion Program Planning II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to additional theory and application of community-based program planning and evaluation. The second of a two-course sequence, the focus will be on program implementation, evaluation, and reporting of the health promotion plan developed during the prior semester. Students will gain first-hand experience in conducting an evaluation of community health education program.
Prerequisite(s): A minimum grade of "C" in PUBH 4132.

PUBH 4134 Research Methods and Evaluation in Health Education and Promotion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the student to research methods used in health education and promotion. Examines the rationale and procedure to evaluate health education/promotion programs. Focuses on several topics including: research design, methods of program evaluation, planning research and evaluation, the politics and ethics of evaluation, measurement, sampling logistics, data analysis and the development of a student project.
Prerequisite(s): A minimum grade of "C" in PUBH 2131.
Corequisite(s): PUBH 4132.

PUBH 4195 International Studies Abroad in Public Health
3-9 Credit Hours. 3-9 Lecture Hours. 0 Lab Hours.
This course offers students the opportunity to examine public health practices in a foreign country through travel abroad. Classroom instruction will be combined with on-site experiences to provide a realistic learning experience.

PUBH 4230 Global Maternal and Child Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore promotion and education efforts designed to improve the health, well-being, and quality of life for women and children globally. A review of the historical and contemporary maternal and child health trends and issues in the United States and throughout the world will be examined. Identifying the determinants of health and illness including the biological, behavioral, socio-economic, demographic, cultural and health care systems influences on maternal and child health will be central to the course.
Prerequisite(s): Sophomore standing and a minimum grade of "C" in PUBH 2131 or PUBH 3431.

PUBH 4231 Health Aspects of Aging
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the aging process from a health education perspective. Students will become acquainted with the process of and problems associated with aging in order to effectively manage this important public health issue. Knowledge and understanding of biological, psychological, and sociological aspects of aging as related to health and wellness will also be addressed.

PUBH 4232 Global Environmental Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with an overview of global environmental health challenges in 21st century. Regional and global impact of environmental health hazards will be compared at the systems level. Current topics in global environmental health will target new challenges faced under the changing climate and emerging diseases. International environmental health policies will be compared with local practices.
Prerequisite(s): Sophomore standing and a minimum grade of "C" in PUBH 3431.

PUBH 4233 Topics in Global Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the field of epidemiology as applied in a global context. Students will be introduced to basic concepts of epidemiology as well as an overview of topics across the discipline. Special emphasis will be made on health issues in the low and middle income countries, and case studies will be used as examples to illustrate concepts and topics of epidemiology.
Prerequisite(s): Sophomore standing and a minimum grade of "C" in PUBH 3431.

PUBH 4234 International Development in Health (Poverty, Social Justice and Global Health)
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will describe key cultural, social, and economic issues and methods in global health, and thus provide essential background for other core courses. The course is interdisciplinary, emphasizing the fields of anthropology, sociology, public health, global health, and critical global health studies. This course explores aspects of health inequalities and demonstrates how the sources of health inequalities (including globalization, the impact of social, economic, and political systems, the local and global economy, transnational organizations, culture, race, class, gender, and sexuality) are rooted in injustices that create and sustain the conditions that lead to disparities in health status and health care both domestically and globally.
Prerequisite(s): Sophomore standing and a minimum grade of "C" in PUBH 3431.
PUBH 4330  Promotional Strategies for Health Programs  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course explores the application of social marketing and 
communication theory to the development of strategies to enhance health 
education and promotion programs.  
Prerequisite(s): A minimum grade of "C" in PUBH 2131.  

PUBH 4331  Occupational Health in Public Health Practice  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course provides an overview of the key issues and practices related to 
workplace hazards in public health practice. Students will be introduced 
key concepts of environmental epidemiology, toxicology, preparedness, 
disease management, prevention, and health promotion in occupational 
settings that both workers and the public are impacted. The course covers 
primary methods of pollutant exposure assessment, basic understanding 
of environmental toxicology, health effects of chemical, biological, and 
physical agents in a variety of facilities from agricultural, to service 
industry, private sector to healthcare settings. Students will also be 
introduced to safety regulations in these settings.  

PUBH 4332  Environmental Health Practice  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course introduces students to applied environmental health sciences. 
Emphasis is placed on hands-on, practical experiences provided by 
experts/practitioners in the field. This course is expected to prepare 
students for employment opportunities related to food safety and hygiene; 
emerging vector-borne diseases; industrial hygiene; and environmental 
health inspections including restaurants, hotels, and healthcare facilities, 
recreational environments, and waste management.  

PUBH 4333  Public Health Aspects of Vector-borne Diseases: 
Control and Prevention  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course provides an overview of common vector-borne diseases, 
discusses public health preventive practices, and introduces students to 
the concepts of the planning, design, implementation and management of 
control of vector-borne infectious diseases.  

PUBH 4334  Food Safety and Health  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course provides a comprehensive overview of food safety and its 
implications to public health. Specific areas of emphasis include the 
historical perspectives and current trends pertinent to food safety issues, 
etiology and assessment of food-borne illness, food contamination and 
related public health concerns, and strategies for the prevention of food-
borne illness. This course will also provide students the opportunity to get 
certified in ServSafe, a nationally recognized food safety training program. 
Students will also be required to prepare food under the supervision of the 
instructor.  

PUBH 4611  Hlth Honors Thesis Seminar III  
1 Credit Hour.  1 Lecture Hour.  0 Lab Hours.  
In a seminar setting, students will continue writing and revising their 
thesis. This course provides the student with the opportunity to revise 
manuscript proposal based upon previous work in Honors Thesis Seminar 
I and II. Students will be guided through primary data collection and 
analysis. Students will also complete writing the first draft of the Research 
Manuscript adhering to current APA style manual.  

PUBH 4612  Hlth Honors Thesis Seminar IV  
1 Credit Hour.  1 Lecture Hour.  0 Lab Hours.  
Students will complete an Honors Research thesis and successfully 
defend their original research project to their Research Director and 
Research Committee. Revisions to the Honors thesis will be based 
upon feedback from the oral defense. To demonstrate proficiency in oral 
research presentation, students will present their original research at the 
Honor's Research Symposium and Phi Kappa Phi Research Symposium. 
Finally, students will be required to submit the final Research Manuscript 
for publication in a professional format.  

PUBH 4798  Internship in Public Health  
12 Credit Hours.  0 Lecture Hours.  0 Lab Hours.  
This course provides the senior level Public Health majors with a practical 
experience in an appropriate practice setting. Students must complete all 
course work in the Public Health major prior to enrolling in this course.  

PUBH 4890  Directed Individual Study  
1-3 Credit Hours.  1-3 Lecture Hours.  0 Lab Hours.  
Provides the student with an opportunity to investigate an area of interest 
under the direction of a faculty mentor.  

PUBH 5520  Introduction to Public Health  
2 Credit Hours.  2 Lecture Hours.  0 Lab Hours.  
This course is designed to give students a foundation in the core functions of 
information-based public health (assessment, policy development and 
assurance). In addition, this course will examine the 10 essential services 
of public health within these core functions. Defining public health practice 
and providing knowledge about the technical, social, and political 
parameters related to public health research and practice are goals for 
this class. Students will gain an understanding of public health as a broad 
area of work that applies the benefits of current biomedical, environmental, 
social, and behavioral knowledge in ways that maximize the health status of 
all populations.  

Cross Listing(s): PUBH 5520G.  

PUBH 5520G  Introduction to Public Health  
2 Credit Hours.  2 Lecture Hours.  0 Lab Hours.  
This course is designed to give students a foundation in the core functions of 
the population-based public health (assessment, policy development and 
assurance). In addition, this course will examine the 10 essential services 
of public health within these core functions. Defining effective public health 
practice and providing knowledge about the technical, social, 
and political parameters related to public health research and practice are 
goals for this class. Students will gain an understanding of public health as 
a broad area of work that applies the benefits of current biomedical, 
environmental, social, and behavioral knowledge in ways that maximize 
the health status of all populations.  

Cross Listing(s): PUBH 5520.  

PUBH 6532  Environmental Health  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course is a survey of specific environmental conditions and factors 
that contribute to the development of health problems in communities. 
Health effects, policy issues, intervention strategies and control programs 
for community environmental health protection are discussed.  

PUBH 6533  Epidemiology  
3 Credit Hours.  3 Lecture Hours.  0 Lab Hours.  
This course provides an introduction to many important topics in 
epidemiology for public health practice, including but not limited to the 
evolution of the discipline, causal concepts in the natural history of 
disease, critical features of infectious and chronic diseases, elements of 
public health screening, basic measures used in epidemiology, design of 
epidemiologic investigations, consideration of random error and systematic 
bias, calculation and interpretation of confidence intervals and p values, 
discussion of confounding and interaction, criteria for evaluation of cause 
and effect relationships and the implications for ethical public health 
practice. Students are expected to gain a foundation for the application of 
epidemiologic methods for exploration of the causes and conditions that 
influence the origin, propagation, mitigation, and prevention of diseases in 
population health.
PUBH 6534 Health Policy and Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides a comprehensive introduction and overview to public health management and administration. The course context is based on managerial decision making and the practical knowledge, tools, processes and strategies required by organizational management. This course overview the basics of administration, including public health law, human resources management, budgeting and financing, health information management, performance measurement and improvement, ethics, leadership, communication, media relations, and legislative relations in public health; introduced as processes are strategic planning, program development and evaluation, budget preparation, and constituency building for collaboration. Emerging areas of public health policy and management are also discussed as contexts to apply practical knowledge, tools and strategies.

PUBH 6535 Social and Behavioral Sciences and Public Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to familiarize students with the history and current applications of social and behavioral sciences as they are applied to public health practice and research. It explores social and behavioral science models, theories, and approaches that inform public health, and their philosophical roots. The course also examines social and behavioral determinants of health equity across the ecological spectrum. Emphasis is placed on critical thinking skills to help students synthesize and utilize information in research and practice. An important contribution of this course is the emphasis on recognizing the contributions of social and behavioral science research and practice to enhanced public health.

PUBH 6541 Biostatistics
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
This course examines statistics in public health and related health sciences, including sampling, probability, basic discrete and continuous distributions, descriptive statistics, hypotheses testing, confidence intervals, categorical data analysis, regression, and correlation. Emphasis will be on the development of critical thinking skills and health data analysis applications with computer software.
Cross Listing(s): BIOS 6541.

PUBH 7090 Selected Topics in Public Health
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Allows the student the opportunity to receive specialized and/or focused instruction in a public health topic not generally offered by the department.

PUBH 7131 Continuous Quality Improvement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will use Statistical Process Control and Quality Improvement (QI) techniques to address the pressing need for the adoption of quality improvement methods and techniques in public health today. The course also includes an overview of health quality initiatives in general and the progress of QI in public health systems.

PUBH 7132 Scientific Basis of Public Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the scientific basis of 21st century disease processes including a survey of the origins, natural history, factors influencing individual and community risk. Clinical symptoms of diseases impacting humans, both acute and chronic, as well as epidemiologic trends will be also be discussed. Students will obtain an understanding of scientific mechanisms associated with the disease processes with particular focus on using this information in health-related professions and public health decision-making. As such, emphasis will be placed on the understanding and application of proposing community-based solutions designed to break the cycle of disease.

PUBH 7530 Integrated Capstone Experience
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course serves as a culminating experience designed to promote refinement of the hard and soft skills necessary for the public health workforce. Throughout the semester, students acquire skills in the integration of basic public health concepts and refine the application of discipline specific knowledge. This course relies on a case-based format that promotes problem solving and critical thinking in the context of real world public health problems.

PUBH 7790 Practicum in Public Health
1-4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Permits the student to receive practical experience in a selected public health-related setting.
Prerequisite(s): Permission of instructor.

PUBH 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.

PUBH 7991 Public Health Capstone Research Project
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Requires the completion of an independent research project in the preferred field requiring the defense of the design, methods, analysis, and interpretation of the data. MPH Students may register for more than 3 credits of PUBH 7991 while working on their Capstone Research Project, but only 3 credits of PUBH 7991 may be applied toward the degree requirements. Excess PUBH 7991 credits cannot be used for electives or required coursework. Extra (greater than 3) credits of PUBH 7991 will simply increase the number of credits the student earns to more than 45.

PUBH 7999 Thesis
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Requires the completion of an independent research project in the preferred field requiring the defense of the design, methods, analysis and interpretation of the data.

PUBH 8132 Environmental and Occupational Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to reinforce basic concepts of environmental and occupational health. Students will be exposed to the current impact of potential environmental and occupational health and safety hazards. Students will also be exposed to current concepts associated with environmental and occupational regulatory standards, assessment protocols, sampling and monitoring techniques, and remediation strategies.

PUBH 8133 Advanced Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth integration of advanced epidemiology concepts designed to reinforce epidemiological principles, as well as build a foundation for epidemiologic research in public health practice. Specific course content includes theory, methods, and applications for epidemiologic studies including random and systematic error, confounding, counterfactuals, causal inference, effect modification, internal and external validity and advanced study design. Emphasis will also be placed on choosing and performing appropriate analytic techniques necessary for biostatistical inference, including estimability and interpretation of effect measures.

PUBH 8134 Health Economics, Policy and the Political Process
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Foundational economic and specific health economic theory, trends, market issues, and applications are presented to include health insurance and payment theory, processes, and applications. Comparison between rational and irrational theory is explored. Evolution of health policy, considering past, current and future major legislation and executive directives, are explored within the political process.
PUBH 8136 Theoretical Perspectives of the Social and Behavioral Sciences in Public Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore social and behavioral science theories, models, and approaches that inform public health research and practice, as well as their philosophical foundations. With emphasis on an ecological perspective, students will apply relevant theories to understanding community health issues and to developing interventions. The course also examines social and behavioral determinants of health equity across the ecological spectrum. In this course students will gain an enhanced understanding of the contributions of the social and behavioral sciences to Public Health.

PUBH 9130 Sampling Methodology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on study design and sampling methods as well as data analysis of small and large, national and local health surveys and vital statistics in order to gain experience describing data using effective graphical and numerical methods. Students will use statistical software (SAS) to analyze data originating from various national surveys such as the National Crime Victimization Survey, National Survey of Drug Use and Health, National Assessment of Educational Progress, Behavioral Risk Factor Surveillance System, an NHANES. Students will be introduced to sampling design, methods of data collection, nonresponse, writing and evaluating questions and answers in surveys, survey interviews, processing survey data and principles and practices related to ethical research.
Prerequisite(s): A minimum grade of "B" in PUBH 6541 or equivalent.

PUBH 9132 Public Health Perspectives in Community-Based and Translational Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will familiarize students with concepts, issues, and skills relevant to translational research approaches in public health, particularly as it relates to how research is applied across all public health concentrations (epidemiology, behavioral health sciences, management and policy, biostatistics, and environmental health). Emphasis will be placed on utilizing qualitative, quantitative, and mixed methods approaches within an ecological theoretical framework. Students will gain an understanding of the Community-Based Participatory Research (CBPR) approach, as well as issues related to the ethics of community-based research. Students will learn advocacy skills to catalyze community-level intervention and structural change based on research findings.

PUBH 9134 Professionalism and Ethics in Public Health Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores critical issues related to the professional development of public health practitioners and ethical responsibilities necessary to assume leadership roles in the field. Leadership roles include, but are not limited to, recognizing the ecological complexities of factors influencing quality of life for individuals and health status of communities. Students will focus on professional attributes, skills, styles, and strategies required to advance public health goals. In addition, students will examine ethics associated with professionalism, research and public health practice.

PUBH 9135 Public Health, Funding and Grantsmanship
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will review the major sources of funding for public health programs, including public and private sources, and the components of successful funding proposals. Students will gain experience in writing funding proposals and creating program budgets. Students will learn appropriate techniques to planning and writing research grants for large-scale and small-scale community projects. As a part of this process, students will learn effective means of locating and soliciting funding agencies responsible for financing public health activity.

PUBH 9630 Public Health Doctoral Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to give doctoral candidates the opportunity to determine and refine their dissertation research topics including identifying potential dissertation committee members particularly the chair.

PUBH 9790 Doctoral Preceptorship in Public Health
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The doctoral preceptorship/field experience consists of 300 hours of field experience under the joint direction of a public health faculty member and a qualified specialist working in selected areas of public health. A written report specifying activities, products, and outcomes of the experience is required upon completion of the preceptorship.

PUBH 9999 Dissertation
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The doctoral dissertation is a culminating experience that requires the student to synthesize and integrate knowledge and apply theory and principles learned to an area of public health practice within the area of concentration. A written product must be submitted and must take the form of a manuscript that is suitable for publication in a national-level public health journal, a grant proposal, a technical report, a case analysis, or other similar document. The dissertation must also be presented and successfully defended before the faculty.
