Georgia Southern University is listed among the top four “Most Affordable Colleges in Georgia” by College Affordability Guide.

Georgia Southern is ranked among the top 100 “2017 Best Online Bachelor’s Programs” by U.S. News & World Report.

The College of Business Administration was named among the “12 Top Business Schools” by Newsweek.

The Allen E. Paulson College of Engineering and Information Technology is home to the first undergraduate Manufacturing Engineering program in the state of Georgia.

Georgia Southern has been named a “Military Friendly” school for the sixth year in a row by Victory Media, publisher of G.I. Jobs, STEM Jobs and Military Spouse magazines.

The online Master of Science in Computer Science program was ranked 21st on the list of “2017 Best Online Graduate Computer Information Technology Programs” by U.S. News & World Report.

Both the online Master’s of Business Administration (MBA) and online graduate business programs were ranked in the top 50 of their respective lists of online business programs by U.S. News & World Report.

Georgia Southern’s Jiann-Ping Hsu College of Public Health was the first such facility in the University System of Georgia and is one of only 48 in the country to be accredited by the Council on Education for Public Health.

The University Strategic Plan Themes

Georgia Southern University’s strategic vision is to be recognized as one of the best public doctoral-research universities in the country within the next 10 years. Our journey is guided by four essential strategic themes:

1. Promote Academic Excellence
2. Enhance Student Success
3. Increase Research, Scholarship, and Creative Achievement
4. Maintain Fiscal Sustainability

College Structure

The academic credit programs of the University are administered by eight colleges: the College of Arts and Humanities, the College of Behavioral and Social Sciences, the College of Business, the College of Education, the Waters College of Health Professions, the Allen E. Paulson College of Engineering and Computing, the Jiann-Ping Hsu College of Public Health, the College of Science and Mathematics, and the Jack N. Averitt College of Graduate Studies. Except for the College of Graduate Studies, each of these is subdivided into schools or departments. A dean directs each college, a director or chair each school, and a chair in each department. The following organizational structure provides for the degrees, fields of study, and courses set out in this catalog.

I. College of Arts and Humanities
   Dr. Curtis Eugene Ricker, Dean
   Betty Foy Sanders Department of Art
      Mr. Jeff Garland, Chair
   Department of Communication Arts
      Dr. Pamela Bourland-Davis, Chair
   Department of Foreign Languages
      Dr. Eric J. Kartchner, Chair
   Department of History
      Dr. Lisa Denmark, Interim Chair
   Department of Literature
      Dr. Beth Howells, Chair
   Department of Music
      Dr. Steven Harper, Chair
   Department of Philosophy and Religious Studies
      Dr. Karin Fry, Chair
   Department of Writing and Linguistics
      Dr. Russell Willerton, Chair

II. College of Behavioral Health and Social Sciences
   Dr. John Kraft, Interim Dean
   Department of Criminal Justice and Criminology
      Dr. Laura Agnich, Interim Chair
   Department of Human Ecology
      Dr. Beth Myers, Chair
   Department of Psychology
      Dr. Michael Nielson, Chair
   Department of Public and Nonprofit Studies
      Dr. Trent Davis, Chair
   Department of Sociology and Anthropology
      Dr. Marielle Van Willigen, Chair

III. College of Business
    Dr. Allen C. Amason, Dean
    School of Accountancy
      Dr. Timothy A. Pearson, Director
    Department of Economics
      Dr. Yassaman Saadatmand, Chair
    Department of Finance
      Dr. Joseph Ruhland, Interim Chair
    Department of Information Systems
      Dr. Yoris Au, Chair
    Department of Logistics and Supply Chain Management
      Dr. Gerard Burke, Chair
    Department of Management
      Dr. Robert Hoell, Chair
    Department of Marketing
      Dr. Michael L. Thomas, Chair

IV. College of Education
    Dr. Thomas R. Koballa, Jr., Dean
    Department of Curriculum, Foundations, and Reading
      Dr. Kent Rittschof, Chair
    Department of Elementary and Special Education
      Dr. John Hobe, Chair
    Department of Leadership, Technology, and Human Development
      Dr. Beth Durodoye, Chair
    Department of Middle Grades and Secondary Education
      Dr. Amelia Adkins, Chair

V. Allen E. Paulson College of Engineering and Computing
    Dr. Mohammad Davoud, Dean
    Department of Civil Engineering and Construction Management
      Dr. Roger Purcell, Interim Chair
    Department of Computer Sciences
      Dr. Muralidhar Medidi, Chair
    Department of Electrical and Computer Engineering
      Dr. Youakim Kalaani, Chair
    Department of Information Technology
      Dr. Hong Zhang, Interim Chair
    Department of Manufacturing Engineering
      Dr. Daniel J. Cox, Chair
    Department of Mechanical Engineering
      Dr. Brian Vlcek, Chair

VI. Waters College of Health Professions
    Dr. Barry Joyner, Dean
    Department of Diagnostic and Therapeutic Sciences
      Dr. Douglas Masini, Chair
    Department of Rehabilitation Sciences
      Dr. Maya Clark, Interim Chair
    Department of Health Sciences and Kinesiology
      Dr. Sara Plaspohl, Interim Chair
    School of Nursing
      Dr. Catherine Gilbert, Chair

VII. Jiann-Ping Hsu College of Public Health
    Dr. Greg Evans, Dean
    Department of Biostatistics, Epidemiology and Environmental Health Sciences
      Dr. Robert Vogel, Chair
    Department of Health Policy and Community Health
      Dr. Gulzar Shah, Chair

VIII. College of Science and Mathematics
      Dr. Delana Nivens, Dean
      Department of Biology
         Dr. Stephen P. Vives, Chair
      Department of Chemistry and Biochemistry
         Dr. Will Lynch, Chair
      Department of Geology and Geography
         Dr. James Reichard, Chair
      Department of Mathematical Sciences
         Dr. Sharon E. Taylor, Chair
      Department of Military Science and Astronautics
         Lt Col Curtis Perkins, Chair

IX. Jack N. Averitt College of Graduate Studies
    Dr. Clayton Heller, Chair
Directory Information

Georgia Southern has defined Directory Information to include the student’s name, affirmation of whether the student is currently enrolled, post office box, local telephone number, classification (freshman, sophomore, junior, senior, or graduate student), employment title and contact information, major, participation in activities, weight and height of members of athletic teams, dates of attendance, degrees and awards received, thesis/dissertation title and faculty mentor, photograph, and most recent educational institution attended. This information is considered public information and will be released to those requesting such information unless the student has specifically requested that the information in this category be restricted. Students who wish to prohibit the release of Directory Information may present a written request to the Registrar and such information will not be released. However, requests that Directory Information be withheld from a written publication must be received in sufficient time to prevent delay in processing that publication.

Annual Notice of Privacy Rights

Georgia Southern is subject to the Family Educational Rights and Privacy Act of 1974 (FERPA) which is designed to protect the student’s rights with regard to educational records maintained by the institution. Under this Act, a student has the following rights:

1. The right to inspect and review education records maintained by this institution that pertain to the student within 45 days after the day the institution receives a request for access. A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect.;

2. The right to request the amendment of the student’s education records that the student believes are inaccurate, misleading or a violation of privacy or other rights. A student who wishes to ask the institution to amend a record should write to the Office of the Registrar, clearly identifying the part(s) of the record the student wants changed, and specifying why the information should be changed.;

3. The right to provide written consent before the institution discloses personally identifiable information (PII) from the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

Georgia Southern University discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official typically includes a person employed by the institution in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); or a student serving on an official committee, such as a disciplinary or grievance committee. A school official also may include a volunteer or contractor outside of the institution who performs an institutional service or function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student volunteering to assist another school official in performing his or her tasks. Clinical preceptors/ supervisors will be considered school officials when they are supervising a student’s clinical education. A school official typically has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the institution. Upon request, the school also discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the institution to comply with the requirements of FERPA. The name and address of the office that administers FERPA are:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202
General and Academic Information

The University is organized on the semester system with each of the two semesters (Fall and Spring) in the regular session extending over a period of approximately 15 weeks. The Summer semester extends over a period of approximately 9 weeks. Critical dates associated with the annual academic cycle are specified in the university academic calendar (http://em.georgiasouthern.edu/registrar/resources/calendars.html). Consecutive fall and spring semesters constitute an academic year.

  - Correspondence Study (p. 277)
  - Degree Requirements (p. 277)
  - Degree Time Limit (p. 277)
  - Enrollment in Dual Programs (p. 277)
History of Georgia Southern University

When First District Agricultural & Mechanical School’s inaugural academic year began in 1908, few could have foreseen a major American university growing out of four faculty members and 15 students in just a little more than one lifetime.

Now in its second century of service, Georgia Southern boasts 27,000-plus students, more than 2,000 faculty and staff, 141 programs of study at the bachelor’s, master’s and doctoral levels, and three vibrant campuses in Statesboro, Savannah and Hinesville.

Statesboro Campus

The Statesboro Campus was founded in 1906 as a school for teaching modern agricultural production techniques and homemaking skills to rural school children. The First District A&M School began within two decades to shift its emphasis to meet the growing need for teachers within the state. Its name and mission were changed in 1924 to Georgia Normal School as a training ground for educators, though it continued to accept “preparatory” or high school students. Five years later in 1928, full-fledged senior college status was granted as South Georgia Teachers College.

Ensuing decades saw additional name and mission changes: to Georgia Teachers College in 1939 and Georgia Southern College in 1959. Continued program and physical expansion, including one seven-year stretch, 1984-91 in which enrollment doubled from just over 6,000 to more than 12,000 students, led to a final transformation in 1990 – to Georgia Southern University.

Armstrong Campus and Liberty Campus

In 1935, Savannah Mayor Thomas Gamble founded the Armstrong Campus — then known as Armstrong Junior College — in order to help stimulate Savannah’s economy and advance opportunities for local youth who could not afford to attend college away from home. The school began with 175 students, and was located in the historic Armstrong House on Bull Street at the northern end of Forsyth Park. In 1966, after receiving four-year status and a 250-acre donation from The Mills B. Lane Foundation and Donald Livingston, Armstrong State College moved to its current location on Abercorn Extension in Savannah's southside.

Throughout the next 30 years of growth, Armstrong added graduate programs in business and education, and became a Regional Health Professions Education Center. The institution’s growth culminated in 1996 with university status and a new name: Armstrong Atlantic State University. Just two years later, Armstrong collaborated with Georgia Southern and other USG institutions to create the Liberty Center in Hinesville in order to offer degree programs to the active duty and veteran military and their families in the area. Liberty County is the home of Fort Stewart, the largest military base east of the Mississippi.

Georgia Southern University Now

In 2018, Armstrong State University and Georgia Southern University consolidated, creating a an institution that retained the Georgia Southern University name comprised of nine colleges on three campuses: the Statesboro Campus, the Armstrong Campus in Savannah and the Liberty Campus in Hinesville.

Just as in the days of First District A&M and Armstrong Junior College, Georgia Southern University eagerly pursues new avenues to meet the challenges of a changing world.

The growing demand for online learning has brought online bachelor’s degrees in business, nursing, and information technology. Master’s programs are offered online in nursing, business, accounting, economics, computer science, coaching, kinesiology, and a broad choice of education fields. A doctoral program in nursing is also available.

Athletic Excellence

Georgia Southern’s athletics programs have a long and storied history, rich with tradition born of success. The University has not only produced conference and national champions, but has parlayed private support into significantly enhanced facilities — crucial to the recruitment and retention of top athletes.

Intercollegiate athletic success — including six FCS (I-AA) National Championships in football — has had a powerfully positive effect on the University’s public persona and pride of faculty, staff and students. All sports compete at the NCAA’s highest level with football, formerly FCS, joining the FBS ranks in fall 2014.

A Regional Powerhouse

Georgia Southern is now the state’s largest and most comprehensive university south of Atlanta and is classified as a Doctoral/Research University by the Carnegie Foundation for the Advancement of Teaching. Emphasis on serving returning veterans has earned the University a “military-friendly” designation for the seventh year in a row by Victory Media, publisher of G.I. Jobs, STEM Jobs and Military Spouse magazines. Kiplinger has named Georgia Southern a “Top 100 Best Value,” and Forbes magazine named the University among America’s Best Midsize Employers for 2018.

It is an exciting time to be a part of Eagle Nation! We are forging our institution on the foundation of two dynamic, historic schools of higher learning. We are focused on student success. We are focused on hands-on learning. We are focused on close connections with faculty and students, and we are here because we want to make an impact on our communities, our region and our state.
How to Use This Catalog

The Georgia Southern University General Catalog is an information book and reference guide dealing with different aspects of the University - its policies, facilities, degree programs, course offerings, services, and faculty.

The statements set forth in this Catalog are for information purposes only and should not be construed as the basis of a contract between the students and this institution.

While the provisions of this Catalog will ordinarily be applied as stated, Georgia Southern University reserves the right to change any provision listed herein, including but not limited to academic requirements for graduation, without actual notice to individual students. Every effort will be made to keep students advised of such changes. Information on changes will be available in the Office of the Registrar. Ultimately, each student is responsible for keeping himself or herself apprised of current graduation requirements in his or her particular degree program. While academic advisors should be consulted regularly, students are responsible for the completion of their chosen degree programs.

If you have suggestions for improving this Catalog, please contact us at (912) 478-8043.
Intercollegiate Athletics

Intercollegiate athletics provide an opportunity for highly-skilled student-athletes to compete regionally and nationally at the NCAA Division I level. These activities are conducted under the control of the Georgia Southern University Athletics Committee and within the rules and regulations of the National Collegiate Athletic Association and the Sun Belt Conference. Intercollegiate athletics are an integral part of the total college experience and, as such, Georgia Southern sponsors programs for men in football, baseball, basketball, golf, soccer and tennis, and for women in basketball, volleyball, swimming and diving, softball, soccer, tennis, rifle, golf, cross-country, and indoor/outdoor track.

Georgia Southern student-athletes and teams have enjoyed national success as evidenced by six NCAA Football Championship Subdivision titles in addition to NCAA Tournament and NCAA Championship participation in men’s and women’s basketball, baseball, men’s golf, women’s soccer, softball, women’s tennis, outdoor track and volleyball. Georgia Southern University moved to the Football Bowl Subdivision (FBS) in 2014, captured the Sun Belt Conference championship in 2014 and won the GoDaddy Bowl, the first bowl game in program history, in 2015. Georgia Southern joined the Sun Belt Conference prior to the 2014-15 season and all 17 varsity programs compete in the league with the exception of women’s swimming and diving (Coastal Collegiate Sports Association) and women’s rifle (Southern Conference).
Outreach Facilities on the Georgia Southern Campus

• Garden of the Coastal Plain
  Centered on an early 20th century farmstead, the Garden offers visitors a unique view of the cultural and natural heritage of the Southeastern Coastal Plain, an area rich in unique and endangered plants. The Garden’s nearly 11 acre site, located in the middle of the growing city of Statesboro, includes walking woodland trails, Bland Cottage, Heritage Garden, Rose Arbor, Children's Learning Garden, Camellia Garden, Native Plant Landscape Garden, Native Azalea Collection, and Bog Garden. The Garden is a research and educational resource for faculty and students and provides educational and cultural programs for the public. The Garden is also available for rentals such as photography sessions, weddings and receptions. The Garden's grounds are open 9:30 a.m. to 7 p.m. Monday through Friday and 1 p.m. until 4 p.m. on Sunday. Buildings are open Monday through Friday, 9:30 a.m. to 5:30 p.m., and Sunday, 1 p.m. to 4 p.m. For more information, call the Garden office at (912) 871-1149, or visit the website at http://academics.georgiasouthern.edu/garden/.

• The Georgia Southern University Museum
  Since 1982, the Georgia Southern University Museum has sought to preserve, exhibit, and interpret objects pertaining to the unique cultural heritage and natural history of this region. A world-class mosasaur specimen and *Georgiacetus vogtlensis*, the oldest fossil whale ever discovered in North America, are among the many exhibits reflecting Georgia’s prehistoric past. The museum also hosts a variety of changing exhibits and programs relevant to the University’s academic departments—often curated by faculty and students. The museum also presents several offsite exhibits on local and University history. The museum’s outreach program, Project SENSE, partners with the Institute for Interdisciplinary STEM Education to offer resources to teachers across south Georgia to teach hands-on science. The museum serves as a research and educational resource for faculty, staff, students, the general public, and schools in south Georgia. Opportunities exist for undergraduate and graduate student involvement in all aspects of the museum’s programs. The museum is open Tuesday through Friday from 9 a.m. to 5 p.m., and on Saturdays and Sundays from 2 p.m. to 5 p.m. The Museum’s exhibits in the Rosenwald Building will be closed for renovations during the 2018-19 academic year. Inquiries may be directed to the museum at (912) 478-5444. Visit the website at georgiasouthern.edu/museum.

• The Center for Wildlife Education and The Lamar Q Ball, Jr. Raptor Center
  Since its opening in 1997, the Center for Wildlife Education & Lamar Q Ball Jr. Raptor Center has grown into one of the leading environmental education facilities in Georgia. At over 17 acres in size, the Center supports Georgia Southern University’s environmental education programs with a mission to provide wildlife encounters for school children and citizens of the region. The Center displays numerous species of eagles, hawks, falcons, owls, and vultures showcased in their natural habitats. Flighted raptor demonstrations and reptile programs are offered to the public on weekends and to scheduled groups on weekdays. The Center includes exhibits dedicated to Georgia’s wildlife, as well as a new exhibit, Under Attack, which brings attention to invasive species impacting Georgia. Built through private donations, the $3 million Center is supported operationally through state, private and public partnerships. The 12-acre expansion, the Wetland Preserve, opened in 2009 to educate visitors on wetland ecosystems and waterfowl and wading birds that are native to Georgia. Inquiries may be directed to the Center at (912) 478-0831. Visit the website at http://academics.georgiasouthern.edu/wildlife/.

• The Center for the Performing Arts
  The Georgia Southern University Performing Arts Center is located in the Nessmith-Lane Conference Center. The 34,000 square foot facility houses an 825-seat theatre with state-of-the-art lighting and sound systems. Programming is booked to reflect the Center’s mission: “To present diverse, quality cultural experiences to the Georgia Southern University and regional communities through the performing arts. To support and enhance the University’s performing art departments. To promote the discovery, appreciation, and enrichment of the performing arts to all with accessibility to perform and train in a professional, state-of-the-art performing arts center.” The Main Stage Season includes national and international touring performing artists representing diverse genres such as music concerts, theatre, and dance, while the School Matinee Series brings quality theatrical and music performances to enhance local and regional school curriculums. Inquiries may be directed to the Box Office at (912) 478-7999 or to the Center’s administrative offices at (912) 478-0830. Visit the website at georgiasouthern.edu/pac.
Strategic Values and Priorities

The Latin phrase, *e pluribus unum* (from many, one), formed part of the design of the Great Seal of the United States in recognition of the difficult compromises that representatives of the thirteen states had to make “in Order to form a more perfect Union.” *E pluribus unum* also evokes a distinctive purpose of university life, turning differences into shared commitments and engagements that enable the achievement of educational goals. At this critical time in its history, in the post-consolidation transition that has brought together three campuses in southeast Georgia, Georgia Southern University commits itself to answering the challenge of making *e pluribus unum* a vibrant reality.

Following are the values we strive to embody and the priorities we strive to pursue.

1. **Academic Excellence**: Georgia Southern academically challenges students, providing them with the knowledge, experiences, and support they need to develop into productive and responsible citizens of the 21st century.
   a. Ensure students acquire important perspectives, approaches, and information from the majors or minors, certificate or graduate programs in which they are enrolled
   b. Develop widely-applicable skills, including critical thinking, situational analysis, and problem solving, that enable students to adapt to a changing world
   c. Employ effective strategies and technologies of learning adjusted to the needs of our students and meeting the demands of existing workplaces and future careers
   d. Support student engagement with diverse cultures at home and abroad

2. **Personalized Attention**: A large university with a small town feel, Georgia Southern offers a student-centered culture that enhances learning, promotes student scholarship and creative activity, and supports career development.
   a. Augment faculty mentor programs and staff-based support systems that make a positive difference for student learning outcomes
   b. Expand service learning, research, and career development partnerships with local, regional, national, and international organizations, both private and public
   c. Develop networks and resources to facilitate career progression after students graduate
   d. Promote the multidimensional wellness of all members of the Georgia Southern community while also maintaining safe campuses

3. **Openness and Inclusion**: Georgia Southern values the diversity of its people, communities, and disciplines as an important basis for its vitality as an institution of higher education.
   a. Recruit and retain a diverse student body, faculty, staff and administration
   b. Enhance accessibility and embrace the diverse abilities and experiences that members of our communities bring to the university
   c. Support the community engagement activities and programs of our students, faculty, staff and administrators
   d. Uphold shared governance structures and practices and ensure timely and clear communication of administrative decisions to students, faculty and staff

4. **Stewardship**: Citizens of Georgia Southern strive to be conscientious custodians of the resources at their disposal and committed practitioners of their vocations who care about and understand the connections between the well-being of our students, our communities, and our environment.
   a. Focus resources on developing student capabilities and adopt and maintain lean and effective administrative structures
   b. Build on our record of national distinction as an institution dedicated to the principles of sustainability
   c. Invest in programs and activities that enhance university life, promote student engagement, and foster the vitality of all of our campuses
   d. Promote excellence in all areas of operation and service

5. **Inventiveness/Innovation**: Georgia Southern maintains environments and employs technologies that encourage and facilitate creative problem-solving by students, faculty, staff, and administration.
   a. Support student partnerships with faculty in research, creative scholarship, and service learning
   b. Adopt best teaching, research, operational and administrative practices
   c. Employ our intellectual capital for regional economic development
   d. Leverage “State-of-the-Art” technological solutions with best in class business processes
The Georgia Southern University Libraries

The GS Libraries support the University’s academic programs and the scholarly needs of students, faculty, and staff by providing information resources and high quality research services. The GS Libraries are a gateway to the Internet, electronic information resources, books, government documents, periodical articles, electronic books, audio-visual materials, and educational software.

The Libraries are also excellent locations for quiet or group study. For contact information, access to online resources and services, and full descriptions of the support we offer to faculty and students, visit library.georgiasouthern.edu, whether you are on the Statesboro, Armstrong, or Liberty campus.

Henderson Library, Statesboro Campus

The Henderson Library opened in 1975 after outgrowing the Rosenwald building. A $22.75 million expansion/renovation project began in summer 2004 and was completed in August 2008. This expansion added 101,000-square feet to the original building and included the first Automated Storage and Retrieval System in any library in the southeast. The total square footage of the building is 245,888.

The Library houses over 400 Internet-accessible personal computers, both Windows-compatible and Macintosh. Wireless access to the Internet and the campus network are offered if you wish to bring your own laptop or portable device. You can also borrow laptops, iPads and small portable whiteboards for use within the building at the checkout desk on second floor. We support a variety of standard and advanced software programs. Workshops on word processing, spreadsheets, HTML basics, and more are offered each semester.

Lane Library, Armstrong Campus

Named for Mills B. Lane, prominent Savannah-Atlanta Banker, philanthropist, and an early patron of the university, Lane Library was built in 1966 and substantially enlarged in 1975. The building was completely renovated in 2005-2006. The total square footage of the building is 50,000 and seats about 500. The space devoted to library services grew by 25% with the 2013 opening of the Learning Commons in an adjacent building. The size of the Learning Commons is 13,500 sq. ft. and it provides an additional 250 seats for learning activities. Both the Library and the Learning Commons feature group study rooms, Macs (21) and PCs (100), Wi-Fi access, and a variety of furniture ideal for group and individual study.

Collections

The GS Libraries are a major academic resource for three campuses, with their extensive collections of scholarly books and journals, government publications, special book and manuscript collections, AV materials, and links to networked information resources in various electronic formats.

Currently, the Libraries’ collections contain over 898,300 volumes of printed books and bound periodicals, and 91,000 physical media. In addition to the extensive physical collections, the Libraries also provide access to a growing number of electronic resources which includes over 656,500 electronic books, 104,700 electronic journals and related resources, 110,400 digital media, and 320 databases that contain indexes, abstracts, full-text articles, and digital images. These electronic resources are easily accessible both on and off campus 24/7.

Both libraries house special collections that contain rare books, manuscript collections, and artifacts relating to the history of local areas and the University. The Lane Library’s special collections include the University Archives and the Florence Powell Minis Collection, which contains published materials on local history and culture and first editions by Conrad Aiken and other Savannah writers.

The Zach S. Henderson Library’s Special Collections division houses rare books, manuscript collections, and artifacts relating to the history of the Statesboro region and Georgia Southern University. Special Collections has materials documenting the Civil War, World War II, southern railroads, early businesses, and local genealogy. Popular collections include: the Okefenokee Swamp Collection, the Bulloch County Historical Society Collection, and the Lucile Hodges Collection. Also available for research are the Marvin S. Pittman Collection and the Charles Holmes Herty Collection, to name only a few.

Services

Books and other materials held at Henderson Library in Statesboro and Lane Library at the Armstrong campus may be requested for delivery to patrons at the other campuses within one or two business days. In addition, books from other University System of Georgia Libraries can be requested free-of-charge through the GIL Express service. Through the state-sponsored GALILEO system and through locally selected resources, library users have online access to hundreds of databases, five million book titles, thousands of academic journals, and many forms of media. Most journal articles and books that are not otherwise available can be requested from other libraries in the United States and around the world via an interlibrary loan service.

A notable and unique resource is Digital Commons@Georgia Southern, an open access digital collection whose purpose is to collect and disseminate the intellectual and creative output of the University’s faculty, staff, and students. Contributions come from all over the University and include theses/dissertations, conference proceedings, research publications, brochures, and newsletters.

The Library Liaison Program was created to provide better engagement with academic departments and their faculty and students across campuses. Liaison Librarians are available for one-on-one consultations, hold special seminars, teach library/Internet-use workshops, create subject guides for disciplines and courses, offer individualized research assistance, locate resources, and collaborate with researchers on data management plans (DMP’s) for grant proposals.

The Libraries offer extensive service hours during academic semesters, with some variation between facilities. The schedules vary for holidays and between terms, so check the Libraries web site for details: library.georgiasouthern.edu. The web page also gives you the connections to our electronic resources, online catalog of library holdings, interactive reference service, and useful tips on finding the information you need.

Off-campus library services are supported through the online services described above and by local libraries. Off-campus faculty and students have access to online library resources via the Libraries’ web page using their MyGeorgiaSouthern credentials. Off-campus students may also request materials that are not available in full text online by using the Libraries’ online fulfillment service.

The Libraries’ administration actively seeks comments and suggestions concerning any aspect of its operations and collections. The Dean of the Libraries is available to meet with any member of the academic community to discuss the resources of the Libraries or its connections to other information networks and services throughout the world.

To contact the Libraries, please visit the Libraries’ website at http://library.georgiasouthern.edu/about/contact/.
The University System of Georgia

The Board of Regents of the University System of Georgia was created in 1931 as part of a reorganization of Georgia's state government. With this act, public higher education in Georgia was unified for the first time under a single governing and management authority. The Board oversees 26 institutions including: 4 research universities, 4 comprehensive universities, 9 state universities, and 9 state colleges. The University System of Georgia also has oversight of the Georgia Archives and the Georgia Public Library System.

The governor appoints members to the Board, who each serves seven years. Today the Board of Regents is composed of 19 members, five of whom are appointed from the state-at-large, and one from each of the 14 congressional districts. The Board elects a chancellor who serves as its chief executive officer and the chief administrative officer of the University System, but is not a member of the Board. The Chair, the Vice Chair, and other officers of the Board are elected by the members of the Board.

The Board of Regents of the University System of Georgia was created in 1931 as part of a reorganization of Georgia’s state government. With this act, public higher education in Georgia was unified for the first time under a single governing and management authority. The Board oversees 28 institutions including: 4 research universities, 4 comprehensive universities, 10 state universities, and 10 state colleges. The University System of Georgia also has oversight of the Georgia Archives and the Georgia Public Library System.

The governor appoints members to the Board, who each serves seven years. Today the Board of Regents is composed of 19 members, five of whom are appointed from the state-at-large, and one from each of the 14 congressional districts. The Board elects a chancellor who serves as its chief executive officer and the chief administrative officer of the University System, but is not a member of the Board. The Chair, the Vice Chair, and other officers of the Board are elected by the members of the Board.

The Office of the Registrar will maintain updates to the calendar and any updates may be viewed on our web site, http://em.georgiasouthern.edu/registrar/resources/calendars.

Fall 2018 Full Term

August 2     Academic Standards Committee meeting, 1:00 p.m.
August 2     Statesboro Campus - New Faculty Orientation
August 3     Armstrong Campus - New Faculty Orientation
August 6     Academic Year Begins
August 8     Employee Tuition Assistance Program (TAP) registration for Fall 2018, via the web beginning at 8:30 a.m.
August 8     University Fall Convocation (for Faculty and Staff)
August 8     Academic Standards Committee meeting, 2:00 p.m.
August 9     Armstrong Campus – Residence Hall Move in for First Year Students, 8:00 a.m. – 5:00 p.m.
August 10    Armstrong Campus – Residence Hall Move in for Returning and Transfer Students, 8:00 a.m. – 5:00 p.m.
August 10    Statesboro Campus – Operation Move-In at the RAC, 8:30 a.m. - 5:00 p.m. and 5:30 p.m. - 10:00 p.m. in the residence halls
August 11    New Student Orientation and Registration for Undergraduate Students – NOTE: Enrolled and former students should refer to WINGS (http://em.georgiasouthern.edu/registrar/resources/registrationtimes/) for specific registration times.
August 13    Fee payment deadline for Fall 2018, (First Day of University Classes)
August 13    Full Term, Classes Begin, Attendance Verification must be completed on the first class meeting day
August 13-16 Full Term, Drop/Add
August 17    $100 Late Registration Fee begins
September 3  Labor Day Holiday – Administrative offices closed – No classes
September 28 Full Term, Last day to submit required academic alerts in core areas A-E and other courses for which departments have opted to require them
October 6    Homecoming, Classes canceled beginning at 2:00 p.m. on Friday, October 5th
October 8    Full Term, Last day to withdraw without academic penalty; See the Policy for Limiting Individual Course Withdrawals for additional information (http://em.georgiasouthern.edu/registrar/students/withdrawal/)
October 22   SARC (Student Accessibility Resource Center) Early Registration for Spring 2019 and Summer 2019 begins
October 26    Final date for undergraduate students to apply for Fall 2018 graduation
October 29    Early Registration for Spring 2019 and Summer 2019 begins (Students should view WINGS for individual date and time)
November 9   Final date to hold terminal or comprehensive examination, theses and dissertation defenses

November 15 Final deadline for University System of Georgia full-time employees to apply for the Employee Tuition Assistance Program (TAP) for Spring 2019
November 15 Employee Tuition Assistance Program (TAP) registration for Spring 2019, via the web beginning at 8:30 a.m.
November 16 Deadline to submit electronic theses and dissertations to College of Graduate Studies for final format review
November 19-23 Thanksgiving Holidays for students, Residence halls open – Administrative offices open November 19-21, closed November 22-23 for Thanksgiving Holidays
November 30   Full Term, Last Day of Classes
December 1-6  Full Term, Final Exams
December 7    Deadline to submit final verified (approved) electronic theses or dissertations to College of Graduate Studies
December 7    Commencement for Statesboro Campus Undergraduate and Graduate students at Paulson Stadium, Statesboro, 1:00 p.m.
December 7    Residence halls close at 12:00 noon for students not participating in Graduation (Centennial Place, Freedom’s Landing, University Villas residents and Armstrong Campus open for students who sign up)
December 8    Commencement for Armstrong and Liberty Campus Undergraduate and Graduate students at Armstrong Sports Center, Savannah, 10:00 a.m. and 1:30 p.m.
December 8    Statesboro Campus - Residence halls close at 12:00 noon for students participating in Commencement activities (permission required)
December 9    Armstrong Campus - Residence halls close at 12:00 noon for students participating in Commencement activities (permission required)
December 10   Winter Break for students begins
Dec 24-Jan 1  Winter Break – Administrative offices closed

Fall 2018 Term A Minimester

August 13    Term A Minimester, Classes Begin, Attendance Verification must be completed on the first class meeting day
August 13-15 Term A Minimester, Drop/Add
September 4  Term A Minimester, Last day to submit required academic alerts in core areas A-E and other courses for which departments have opted to require them
September 7  Term A Minimester, Last day to withdraw without academic penalty; See the Policy for Limiting Individual Course Withdrawals for additional information (http://em.georgiasouthern.edu/registrar/students/withdrawal/)
October 1    Term A Minimester, Last Day of Classes
October 3-4   Term A Minimester, Final Exams

Fall 2018 Term B Minimester

October 8    Term B Minimester, Classes Begin, Attendance Verification must be completed on the first class meeting day
October 8-10 Term B Minimester, Drop/Add
October 29    Term B Minimester, Last day to submit required academic alerts in core areas A-E and other courses for which departments have opted to require them

University Housing

University Housing at Georgia Southern University operates twelve housing units providing a living-learning environment for approximately 6,400 students and offering a variety of facilities, services, and programs on the Statesboro and Armstrong campuses. Georgia Southern University strives to provide a positive environment conducive to the development and academic pursuits of its residents. Residence hall living provides social interaction and events to heighten a student's sense of belonging, understanding of others, and how to live with others in a common space. Included in learning experiences are floor meetings, social events, programs on life skills, communication and conflict management, wellness topics that support academic success and understanding others, leadership positions in hall government, and a completion of a roommate agreement. These experiences provide students the opportunity to grow, achieve, find autonomy, and practice decision-making. With a staff of more than 250 full-time and student employees, University Housing is committed to assisting students in making a smooth transition to college life.

Applying for Campus Housing

Only students accepted for admission to Georgia Southern University may apply for campus housing. Housing information will be emailed to students using the email address on file with the Office of Admissions after notification of admission acceptance. The housing application is available online at http://auxiliary.georgiasouthern.edu/housing/apply/.

Rates

Housing rates vary based on the type of facility. Once rates have been approved by the Board of Regents, a complete listing of housing fees will be provided to applicants or may be viewed at http://auxiliary.georgiasouthern.edu/housing/rates-2/.

Questions pertaining to student housing should be directed to:

University Housing
Post Office Box 8102
Georgia Southern University
Statesboro, GA 30460-8102
(912) 478-5406
FAX: (912) 478-1148
housing@georgiasouthern.edu
http://auxiliary.georgiasouthern.edu/housing/

First Year Live in On-Campus Housing

Requirements/Eligibility

To be eligible to live in University Housing, one must be enrolled at Georgia Southern University and maintain a minimum of nine credit hours per semester as an undergraduate student. First year students, with some exceptions, are required to live in On-Campus housing. For detailed information about this policy, go to http://auxiliary.georgiasouthern.edu/housing/prospective/ for guidelines and exceptions.

Graduate Student On-Campus Housing

Graduate students are eligible to apply for any upper-class space available. Currently we have no housing that is restricted to just graduate students. Graduate students who are seeking on-campus housing should contact the Housing Office or visit the Housing Office web site at http://auxiliary.georgiasouthern.edu/housing/.

Communities in the Residence Halls

Living in a residence hall means being part of a residential community focused on your academic success at Georgia Southern University. Each of the twelve residence halls offer different communities based upon the students living there, the nature of the building and sometimes the specialized programs or floors that are based around themes, academic programs or other learning initiatives. Each year, University Housing, in partnership with other campus offices, colleges, and faculty members, provides support to the students living in our residential communities in different ways. On campus housing is available on the Statesboro Campus and Armstrong Campus. Housing is not available on the Liberty Campus.

More information about the different community options each year is available on the housing website at http://auxiliary.georgiasouthern.edu/housing/.

Questions pertaining to student housing should be directed to:

University Housing
Post Office Box 8102
Georgia Southern University
Statesboro, GA 30460-8102
(912) 478-5406
FAX: (912) 478-1148
housing@georgiasouthern.edu
http://auxiliary.georgiasouthern.edu/housing/

Occupancy Periods

Students may occupy their assigned space from the date designated as the official opening of campus housing to the date designated as the end of the semester. Campus housing is closed between academic sessions. Some housing units provide housing during the Winter Break as part of the housing fees. Please refer to the housing website for additional information.

Removal from Housing

Students can be removed from Housing for the following reasons: conduct and behavioral reasons, non-enrollment, nonpayment of tuition, University fees, housing, or contract meal charges.
Georgia Southern University is a public comprehensive and Carnegie Doctoral/Research university offering associate, bachelors, masters, and doctoral degrees in nationally accredited programs in the liberal arts, sciences, and professional disciplines.

The University provides transformative learning opportunities to meet the needs of a diverse student population through its legacy of commitment to academic excellence and personal attention. Through the shared resources of its multiple locations, the University creates vibrant learning environments that foster an inclusive, student-centered culture of engagement designed to prepare students for lifelong service as scholars, leaders, and responsible stewards of their communities. The University enhances the quality of life and drives economic development in the Coastal Georgia region, the State of Georgia, and beyond by supporting collaborative efforts in technological innovation, scientific advancement, education, health services, artistic creativity, and cultural enrichment. Faculty, staff, and students embrace the values of integrity, civility, kindness, respect, sustainability, citizenship, and social responsibility in every facet of the University.

• Writing B.A. (p. 92)
• Writing Minor (p. 93)

Liberty Campus Programs
• Associate of Arts A.A. (p. 95)
• Associate of Science A.S. (p. 95)
• Interdisciplinary Studies B.I.S. (p. 97)
• Naval Science Minor (p. 234)

Online Programs
• Clinical Specialist in Advanced Imaging Certificate (p. 191)
• Information Technology B.S.I.T. (WebBSIT) (p. 184)
• Instructional Design and Technology Minor (p. 156)
• Interdisciplinary Studies B.I.S. (Online) (p. 98)
• Medical Laboratory Science B.S.M.L.S. (Online) (p. 192)
• Public Administration Minor (p. 121)
• Radiologic Sciences B.S.R.S. (Concentration in Radiography) (p. 196)
• Respiratory Therapy B.S. (Online) (p. 198)
Arts and Humanities

Mission
The College of Arts and Humanities strives to serve students, the university, and communities throughout Southeast Georgia through instruction, research, and performance in the Arts and Humanities.

Visit us at our web site at http://cah.georgiasouthern.edu/

College Structure
- Betty Foy Sanders Department of Art (p. 47)
- Department of Communication Arts (p. 58)
- Department of Foreign Languages (p. 64)
- Department of History (p. 73)
- Department of Literature (p. 76)
- Department of Music (p. 79)
- Department of Philosophy and Religious Studies (p. 86)
- Department of Writing and Linguistics (p. 90)
- Interdisciplinary Studies (p. 93)
- Secondary P-12 Education Programs (p. 101)

Programs

Majors
- Art B.A. (Concentration in Art History) (p. 49)
- Art B.A. (Concentration in Studio Art) (p. 50)
- Art B.A. (Concentration in Visual Arts) (p. 51)
- Art B.F.A. (Concentration in 2D Studio: Drawing, Painting, Print/Paper/Book Arts) (p. 52)
- Art B.F.A. (Concentration in 3D Studio: Ceramics, Small Metals Design, Sculpture) (p. 52)
- Art Education B.S. (p. 53)
- Associate of Arts A.A. (p. 95)
- Associate of Science A.S. (p. 95)
- Communication Studies B.S. (p. 58)
- English B.A. (p. 78)
- Graphic Design B.F.A. (p. 54)
- History B.A. (p. 74)
- Interdisciplinary Studies B.I.S. (p. 97)
- Interdisciplinary Studies B.I.S. (Online) (p. 98)
- Modern Languages B.A. (Concentration in Arabic) (p. 66)
- Modern Languages B.A. (Concentration in Chinese) (p. 67)
- Modern Languages B.A. (Concentration in French) (p. 68)
- Modern Languages B.A. (Concentration in German) (p. 69)
- Modern Languages B.A. (Concentration in Japanese) (p. 70)
- Modern Languages B.A. (Concentration in Latin) (p. 70)
- Modern Languages B.A. (Concentration in Spanish) (p. 71)
- Multimedia Film and Production B.S. (p. 60)
- Multimedia Journalism B.S. (p. 61)
- Music B.A. (p. 81)
- Music B.M. (Concentration in Composition) (p. 82)
- Music B.M. (Concentration in Instrumental Performance) (p. 82)
- Music B.M. (Concentration in Piano Performance) (p. 83)
- Music B.M. (Concentration in Voice Performance) (p. 84)
- Music Education B.M. (Concentration in Choral) (p. 84)
- Music Education B.M. (Instrumental) (p. 85)
- Philosophy B.A. (p. 87)
- Philosophy B.A. (Concentration in Religious Studies) (p. 88)
- Public Relations B.S. (p. 62)
- Theatre B.A. (p. 63)
- Visual Arts B.F.A. (p. 56)
- Women’s Gender, and Sexuality Studies B.A. (p. 99)
- Writing B.A. (p. 92)
- Writing Minor (p. 93)

Minors
- Africana Studies Interdisciplinary Minor (p. 94)
- Animation & New Media Minor (p. 49)
- Applied Linguistics Minor (p. 91)
- Arabic Minor (p. 65)
- Art (History) Minor (p. 49)
- Art (Studio/Graphic Design) Minor (p. 49)
- Art Minor (p. 54)
- Chinese Minor (p. 65)
- Classical and Medieval Studies Interdisciplinary Minor (p. 95)
- Communication Studies Minor (p. 59)
- Comparative Literature Interdisciplinary Minor (p. 77)
- Comparative Literature Interdisciplinary Minor (p. 95)
- Digital Humanities Interdisciplinary Minor (p. 77)
- Digital Humanities Interdisciplinary Minor (p. 96)
- English Minor (p. 79)
- Environmental Studies Interdisciplinary Minor (p. 96)
- European Union Studies Interdisciplinary Minor (p. 97)
- Film Studies Interdisciplinary Minor (p. 97)
- Foreign Language Minor (p. 65)
- French Minor (p. 65)
- German Minor (p. 65)
- Graphic Communications Minor (p. 54)
- Graphic Design Minor (p. 56)
- History Minor (p. 76)
- Irish Studies Interdisciplinary Minor (p. 98)
- Japanese Minor (p. 66)
- Japanese Studies Interdisciplinary Minor (p. 99)
- Latin American Studies Interdisciplinary Minor (p. 99)
- Latin Minor (p. 66)
- Linguistics Interdisciplinary Minor (p. 91)
- Multimedia Film and Production Minor (p. 61)
- Multimedia Journalism Minor (p. 62)
- Music - Applied Minor (p. 81)
- Music - History and Literature Minor (p. 81)
- Music - Music Technology Minor (p. 81)
- Music Minor (p. 86)
- Philosophy Minor (p. 89)
- Photography/Digital Imaging Minor (p. 56)
- Professional and Technical Writing Minor (p. 91)
- Public Relations Minor (p. 62)
- Religious Studies Interdisciplinary Minor (p. 89)
- Spanish Minor (p. 73)
- Studio Art Minor (p. 56)
- Theatre Minor (p. 64)
- Women’s, Gender, and Sexuality Studies Interdisciplinary Minor (p. 101)
Certificates

- European Union Studies Certificate (p. 74)
- Latin American Studies Certificate (p. 66)
- Spanish for the Professions Certificate (p. 73)

Advising

Undergraduate students are advised by College of Arts and Humanities advisors. Visit the College of Arts and Humanities Advisement website at http://cah.georgiasouthern.edu/advisement/.

Statesboro Campus

Art, On-Campus Interdisciplinary Studies, Communication Studies, Multimedia Film & Production, Multimedia Journalism, Public Relations, History, and Modern Language majors are advised in the College of Arts and Humanities Advisement Center, located in Interdisciplinary Academic Building (IAB) 1040.

English, Philosophy, Religious Studies, Women, Gender, & Sexuality Studies, and Writing & Linguistics majors are advised in Newton 3308D.

Music and Theatre majors are advised in Foy 3002.

Armstrong Campus

All Arts & Humanities Advisors are advised in the Student Success Center.

Online Interdisciplinary Studies advisors are located in the Interdisciplinary Academic Building (IAB) 2011.

Betty Foy Sanders Department of Art

The Betty Foy Sanders Department of Art (BFSDoArt) is committed to building and extending the intellectual community in visual arts and graphic communications by educating the next generation of artists, designers, art educators, and industry professionals. To prepare students for successful careers, the Department provides an enriching environment of rigorous course material, state-of-the-art facilities, relevant technology and equipment, professionally active faculty, and community engagement.

It is the BFSDoArt's goal to provide students with the ability to think critically, communicate effectively, work cooperatively, be comfortable and knowledgeable with relevant technology, and be committed to sharing their many talents with an increasingly global community.

The Department offers a robust selection of minors in Animation and New Media, Art, Art History, Graphic Communications, Graphic Design, Photography and Digital Imaging, and Studio Art.

The Betty Foy Sanders Department of Art is an accredited member of the National Association of Schools of Art and Design (NASAD).

Statesboro Campus

Students earning the B.A. degree in Art (concentration in Art History) will demonstrate competency in the following outcomes:

1. ability to recall and utilize accurate art historical terminology and to identify major monuments of art, recognize productions of individual artists, and distinguish artistic productions of various eras and cultures through familiarity with key formal and contextual components.
2. assessment of art historical issues including the following: making connections between different time periods and/or cultures; contextualizing works within their political, social, economic, and religious situations; recognizing frequent biases toward art work based on cultural misunderstandings or ethnocentrism.
3. preparation of effective written and oral communications in art history composed of the following: historical research and critical analyses of works of art from historical, cultural, and aesthetic perspectives, synthesized into an original, organized work.

Graduates of the B.A. degree in Art (concentration in Studio Art) program will:

1. demonstrate competency in multiple mediums through the creation of original works of art that are technically sound and exploits the characteristics of the specific art materials used.
2. demonstrate a comprehensive understanding of the elements and principles of visual organization and sufficient to achieve successful communication through visual art and design.
3. demonstrate their ability to analyze and evaluate their own artwork as well as that of their peers in the form of Written and Verbal Critique.
4. demonstrate a familiarity with the major achievements in the history of art and will be able to make valid assessments of quality in master works of art and their relationship to their own art work.
5. demonstrate the ability to combine the media skills, application of art and design principles, verbal analysis, and art historical knowledge in order to develop and apply transferable skills to professional direction.

Upon completion of the B.F.A. degree (concentration in 2D Studio) program, students will:

1. demonstrate competency in the media of each relative studio discipline through studio practice, appropriate equipment usage and demonstration of safety requirements during studio practice. Students will prove their skill competency in specific art media by creating original works of art that exploit the characteristics of the specific art materials used.
2. demonstrate a comprehensive understanding of the elements and principles of visual organization. This understanding will be evidenced by choices that may include compositional devices, use of color and manipulation of dominance/unity. Students will successfully apply these principles to communicate their aesthetic as well as conceptual intentions.
3. have a comprehensive overview of art history, with particular emphasis on issues of contemporary art, art theory and criticism. Students will conduct research relevant to their own creative work.
through the investigation of contemporary artists, critical theories and aesthetic issues, demonstrating their research and analysis
5. abilities through the creation of original artworks, master studies, artist statements, presentation in oral critiques and essays.
6. complete written documentation as well as participate in verbal discussion that will demonstrate their ability to analyze, synthesize, validate, and evaluate their own artwork as well as that of their peers. Students' ability to articulate personal work will be further evidenced by writing an artist's statement that identifies historical references, contextualization and discussion of conceptual origins within their own body of work as well as for individual works.
7. demonstrate their ability to conceive and produce a body of work (multiple artworks reflecting a single concept) in two-dimensional media (Print-making, Drawing, and Painting). This body of work will reflect technical competency, effective use of art/design principles, self-expression, conceptual development, a comprehension of cultural and art historical references, aesthetics, critical theory, and is representative of contemporary art.

Students earning the B.F.A. degree (concentration in 3D Studio) will:

1. demonstrate their technical skill mastery.
2. demonstrate their competency in the use of art elements and principles of visual organization with an emphasis on 3D materials and space.
3. demonstrate their ability to analyze, synthesize, validate, and evaluate their own artwork, as well as, that of their peers during course critiques and discussions throughout their degree program. Students' ability to articulate personal work will be further evidenced by writing an artist's statement included with critique presentations and submissions of artworks for review by others.
4. demonstrate their ability to conceive and produce a body of work (multiple artworks reflecting one concept) in three-dimensional media that reflect technical competency, effective use of art/design principles, self-expression, conceptual development, a comprehension of cultural and art historical references, aesthetics, and cohesive body of contemporary arts.

B.F.A. Graphic Design degree program students will:

1. develop professional studio practices and demonstrate these practices to execute successful, repeatable, problem solving strategies to communicate content to an audience in areas of application such as identity, brand positioning, publication design, editorial design, web and multimedia design, packaging, way-finding and information architecture.
2. have a comprehensive understanding of the elements and principles of visual organization. Students will demonstrate knowledge of, and skills in, two- and three-dimensional spatial organization, color theory and application, typography, hierarchical organization, contrast and concord.
3. develop a breadth of understanding that provides them with the skills to identify and assess art and design historical issues including the following: connections between different time periods and/or cultures; contexts of art work including political, social, economic, and religious aspects; frequent biases toward art work based on cultural misunderstandings or ethnocentrism.
4. analyze, synthesize, validate, and evaluate their own artwork as well as that of their peers during course critiques and discussions throughout their degree program. Students' ability to articulate personal work will be further evidenced by writing an artist's statement included with critique presentations and submissions of artworks for review by others.
5. develop a professional portfolio that exemplifies their competency in graphic design and create a professional portfolio of work that demonstrates their skills to potential employers and assists in securing entry-level employment as a professional graphic designer. Through development of their portfolio, students will demonstrate autonomy in executing real-world project skills in planning, research, sales, marketing and presentation.

Armstrong Courses

Students earning the B.A. degree in Art (concentration in Visual Arts) will:

1. demonstrate competency in multiple mediums through the creation of original works of art that are technically sound and exploits the characteristics of the specific art materials used.
2. demonstrate a comprehensive understanding of the elements and principles of visual organization and sufficient to achieve successful communication through visual art and design.
3. demonstrate their ability to analyze and evaluate their own artwork as well as that of their peers in the form of Written and Verbal Critique.
4. demonstrate a familiarity with the major achievements in the history of art and will be able to make valid assessments of quality in master works of art and their relationship to their own art work.
5. demonstrate the ability to combine the media skills, application of art and design principles, verbal analysis, and art historical knowledge in order to develop and apply transferable skills to professional direction.

B.F.A. in Visual Arts students will:

1. demonstrate competency in the media of each relative studio discipline through studio practice, appropriate equipment usage and demonstration of safety requirements during studio practice. Students will prove their skill competency in specific art media by creating original works of art that exploit the characteristics of the specific art materials used.
2. demonstrate a comprehensive understanding of the elements and principles of visual organization. This understanding will be evidenced by choices that may include compositional devices, use of color and manipulation of dominance/unity. Students will successfully apply these principles to communicate their aesthetic as well as conceptual intentions.
3. have a comprehensive overview of art history, with particular emphasis on issues of contemporary art, art theory and criticism. Students will conduct research relevant to their own creative work through the investigation of contemporary artists, critical theories and aesthetic issues, demonstrating their research and analysis
5. abilities through the creation of original artworks, master studies, artist statements, presentation in oral critiques and essays.
6. complete written documentation as well as participate in verbal discussion that will demonstrate their ability to analyze, synthesize, validate, and evaluate their own artwork as well as that of their peers. Students' ability to articulate personal work will be further evidenced by writing an artist's statement that identifies historical references, contextualization and discussion of conceptual origins within their own body of work as well as for individual works.
7. demonstrate their ability to conceive and produce a body of work (multiple artworks reflecting a single concept). This body of work will reflect technical competency, effective use of art/design principles, self-expression, conceptual development, a comprehension of cultural and art historical references, aesthetics, critical theory, and is representative of contemporary art.

Upon completion of the B.S. degree in Art Education, students will:

1. distinguish principal themes, subjects, artists and iconography of major monuments of global art in their historical, cultural and stylistic context.
2. will demonstrate an ability to apply principles of design and color and competency to work in a variety of materials and media used in art.
3. effectively engage in critical analysis and demonstrate general research skills.
4. demonstrate an ability to plan meaningful art lessons, based on national and state standards for a variety of age/grade levels.
5. demonstrate ability to deliver effective instruction to meet standards-based art objectives for a variety of age/grade levels.

Optional Summer: Animation UK Summer Abroad in Sheffield UK

The study abroad program includes a studio course in animation with projects exploring character development, storytelling, and virtual lights/cameras with an introduction to software and concepts in 2D animation, sound, and web streaming. At the end of the course there will be a collaborative exhibition of the students’ animations in a gallery in Sheffield.

Art B.A. (Concentration in Visual Arts)

Degree Requirements: 124 Credit Hours

Students enrolled in the B.A. - ART (Concentration in Visual Arts) degree program explore a variety of art media and art history courses to assist in realization of personal ideas, art making skills and creation of imagery. The degree is oriented toward broad experiences in the visual arts in conjunction with studies in other areas of the humanities, natural and physical sciences, and social sciences. The Art B.A. - (Concentration in Visual Arts) is appropriate for students planning further studies, certifications and/or advanced degrees, including but not limited to programs in art history, architectural history, museum studies, art education, and art therapy.

The campus is located within the city limits of Savannah, Georgia, which inherently provides ample opportunities for art students to broaden their studies by visiting museums, galleries, and numerous businesses that exhibit artwork or historical artifacts. Locally, art receptions and art events take place regularly, providing occasions to extend classroom experiences into the culturally diverse community.

See Core Curriculum for required courses in Area A1 through Area E.

1 Other exploratory studio ART courses available with advisor consent.
to the BA-ART (Concentration in Visual Art) degree, students explore a variety of art media and art history courses to assist the student in realization of personal ideas, art making skills, and imagery. In addition, students take a series of education and art method courses to build a knowledge base connecting educational processes and interdisciplinary understanding of relationships among the arts, sciences, and humanities. In order to apply art competencies in teaching situations, students integrate art and design instruction toward curriculum building. Students acquire the ability to prepare appropriate lessons to teach students from grades P12. The program fosters an environment of academic, cultural (artistic), and leadership in Art Education by exploring avenues to reach different learners and settings, incorporate critical thinking, and reflect on educational theory.

The campus is located within the city limits of Savannah, Georgia, which inherently provides ample opportunities for art students to partner with local art educators, work within museums, and connect with gallery programming in and around the city. Numerous art and art education resources are within a half-day driving distance from the campus.

See Core Curriculum for required courses in Area A1 through Area E.

<td></td>
</tr>
</tbody>
</table>

Alternating Electives:

- ART 3731: Graphic Design Internship
- ART 4335: Web Page Design

- **Portfolio Review for admission into upper division courses in Graphic Design:**
  When students have completed Visual Thinking in Graphic Design (ART 2331) (3) and Typography I (ART 2330) (3), they submit a portfolio of their design work completed to date, and a require independent project assigned by faculty, for review by the design faculty. Based upon criteria outlined in the B.F.A. Graphic Design Program of Study Handbook, faculty will evaluate and admit students into the Graphic Design concentration based upon their demonstrated creative abilities and professional demeanor deemed necessary for success in the design field. A 3.0 GPA in Visual Thinking in Graphic Design (ART 2331) (3) and Typography I (ART 2330) (3) is only one requirement in passing the portfolio review.

- **Students who do not pass the graphic design portfolio review are encouraged to enter other concentrations in the ART major more suitable to their talents. In this case, graphic design courses with an earned grade of “C” or above will be designated as exploratory studio courses in another BA/BFA art degree program.**

- **Students who do not pass the portfolio review may choose to resubmit their portfolio the following year after they further develop the quality of their work and remedy deficient professional practices.**
• All students will participate in a public presentation of their portfolio completed in Graphic Design Portfolio for review by faculty, invited members of the profession, and peers.

Visual Arts B.F.A.

Degree Requirements: 124 Credit Hours
Students enrolled in the Bachelor of Fine Arts Visual Arts degree program develop the knowledge, skills, concepts, and sensitivities essential to the professional artist. The BFA is often the degree preferred by colleges and universities when applying to a Master of Fine Arts graduate program. Although studio practice is of prime importance while BFA students prepare for professional careers, they must also develop a broad knowledge of art history, art materials, and techniques in order to advance their skills by choosing an emphasis in either ceramics and ceramic sculpture, drawing and painting, fibers, graphic design, photography or studio studies. Students must demonstrate the ability to apply knowledge and technical skill to professional practices such as exhibition, oral presentation, promotion, and critique of their artwork.
The campus is located within the city limits of Savannah, Georgia, which inherently provides ample opportunities for art students to broaden their studies by visiting museums, galleries, and numerous businesses that exhibit artwork or historical artifacts. Locally, art receptions and art events take place regularly, providing occasions to extend classroom experiences into the culturally diverse community.

See Core Curriculum for required courses in Area A1 through Area E.

ART/ARTS 3000+ Studio Art Courses
ART 3731 Graphic Design Internship
ART 4590 Selected Topics in Art

Required Capstone Courses 6
ARTS 4700 Senior Portfolio
ARTS 4710 Senior Seminar
ARTS 4740 Senior Exhibition

Total Credit Hours 124

Progression Requirements

To earn a bachelor's degree in fine art students must complete with a grade of "C" or better all ARTS/ART/ARTH courses required in the program of study. To fulfill the prerequisites for any ARTS/ART/ARTH course students must obtain a grade of C or better in each prerequisite course.

Other Program Requirements

Departmental Exit Exam

Advisement

Every student enrolled in a degree program in the Betty Foy Sanders Department of Art is advised by an advisor located in the Carroll Building, Room 2244, (912) 478-7740.

Department of Communication Arts

The Department of Communication Arts provides a forum through which students can develop life skills such as confidence in oral and written presentations, communication skills, and critical analysis and problem solving skills. Students in the Department represent a broad spectrum of majors, interests, and career possibilities in Communication Studies, Multimedia Film & Production, Multimedia Journalism, Public Relations, and Theatre. Students work together and with faculty on research projects, state-of-the-art productions, events, online news outlets, and broadcasts.

Students graduating with a B.A. degree in Theatre will be able to:

1. critically analyze play texts and pieces of theatre (productions, performance events, etc.), using the vocabulary of the field, and will ascribe meaning to the usages and applications of production elements.
2. develop and defend informed judgments of play texts and pieces of theatre, and will effectively articulate complex ideas in both written and oral communication. Students will create and articulate a personal aesthetic that applies the vocabulary of the focus area (acting, directing, design/technology, stage management).
3. recognize historical styles, and the cultural forces that shaped them: students will be conversant with the major theatrical periods, personages, and technological innovations that have shaped the development of theatre, and will be able to differentiate the defining characteristics of distinct periods and styles.
4. conduct research by selecting appropriate resources to inform artistic decisions; students will analyze and synthesize information from multiple sources in the construction of a production, design, or acting concept. Students will assess scholarship in the field and connect that scholarship to their understanding of historical practice.
5. demonstrate the ability to collaborate effectively with both peers and professionals in a production setting, consistently demonstrating a disciplined usage of professional working standards. Students will produce a body of work built on sound professional practices, which is presented in a portfolio appropriate to the focus area; students will identify career opportunities within the focus area.

Students earning the B.S. in Communication Studies will:

1. develop a research prospectus employing appropriate methodologies to study their stated communication research question and/or hypothesis regarding human communication behavior.
2. develop an analysis of a communication artifact utilizing an appropriate rhetorical criticism model.
3. develop a research report that applies Dewey's Reflective Thinking Method to a contemporary communication problem to reach a rational solution to the problem.
4. demonstrate knowledge of various rhetorical criticism models used to analyze speeches and/or rhetorical movements.
5. demonstrate knowledge pertaining to the historical underpinnings of the field of Communication Studies and how historical developments have influenced the current study of communication.
6. utilize current events as data for analysis of arguments in persuasive communication.
7. demonstrate an awareness of ethical standards as related to original research.
8. demonstrate an awareness of ethical standards as they relate to persuasive communication.
9. recognize the importance of culture and its impact on the reception of communication messages.

1. Should be taken concurrently with MMFP 2331 and MMFP 2336 and a "C" or higher grade must be earned in each before a student will be permitted to register for higher numbered MMFP courses.

### Other Program Requirements

- Students must make a minimum grade of “C” in each Communication Arts class to receive credit for that course.
- A total institution GPA of 2.75 is required to register for internship credit. A maximum of 3 credit hours of internship credit can be applied to major requirements. The deadlines for applying for internships are October 1 for Spring semester, February 1 for Summer semester, and March 1 for the following Fall semester placement. Secure forms and submit the appropriate materials to the Internship Coordinator.

### Honors in Multimedia Film and Production

To graduate with Honors in Multimedia Film and Production, a student must:

- be admitted to the University Honors Program;
- successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

### Advisement

All Multimedia Film and Production majors are advised in the Department of Communication Arts, Sanford Hall, (912) 478-5138. Students in the University Honors Program (UHP) are also advised in the Department.

1 These classes serve as prerequisites for upper division THEA courses. You may need to take more than one as part of your general electives, depending on the courses you select to fulfill your minor. THEA 2300 is a prerequisite for THEA 3337, THEA 4330, THEA 4331, THEA 4335, THEA 4336, and THEA 4337. THEA 2332 is a prerequisite for THEA 3200, THEA 4335, THEA 4336, and THEA 4337. THEA 2333 is a prerequisite THEA 3234, THEA 3330, THEA 4333, and THEA 4505 Pre-Req Acting II, Acting III, and Acting IV.

Department of Foreign Languages

The program mission of the Department of Foreign Languages (DFL) is to prepare students to use their linguistic proficiency and cultural knowledge to function successfully in a global environment. The program serves not only students who major in Modern Languages or minor in a foreign language but also students who major in other disciplines and study a foreign language. By creating an environment in which students master both linguistic competence and cultural sensitivity, the program supports the University’s broader institutional vision of graduating students who embrace core values expressed through integrity, civility, kindness, collaboration, and a commitment to lifelong learning, wellness, and social responsibility. The program, including study abroad components, consists of a variety of courses that teach the linguistic skills of speaking, listening, writing, and reading, and engage the student in discussions of intercultural and intellectual traditions, perspectives, and artifacts. Faculty expect students to learn to analyze, understand, and appreciate—in a thoughtful and critical manner—literary, philosophical, social, and political texts and contexts, both historical and contemporary, of the regions where the target language is used. Foreign Languages faculty apply the framework and guidelines set forth by the American Council on the Teaching of Foreign Languages (ACTFL) as the standard for facilitating student progress towards ACTFL Advanced-Level proficiency. Successful students are prepared to be highly competent both linguistically and culturally in a variety of professions (business, education, government, NGOs, hospitality, etc.) and can also use their skills and knowledge as a springboard to graduate study (law, medicine, education, social work, etc.).

Students graduating with a B.A. in Modern Languages will:

1. demonstrate Advanced-Low Proficiency in speaking as defined by ACTFL. The student who has reached the Advanced-Low proficiency level demonstrates the ability to narrate and describe in the past, present, and future in paragraph-length discourse, and to handle a variety of communicative tasks.
2. demonstrate Advanced-Low Proficiency in writing as defined by ACTFL. The student who has reached the Advanced-Low proficiency level demonstrates the ability to meet basic work and/or academic writing needs.
3. demonstrate proficiency in reading by demonstrating the ability to understand conventional narrative and descriptive texts, such as magazine and newspaper articles, short stories, and non-fiction texts.
4. demonstrate the ability to think critically by analyzing the intercultural and cultural traditions and artifacts of the regions where the target language is used.

Programs

Majors

• Modern Languages B.A. (Concentration in Arabic) (p. 66)
• Modern Languages B.A. (Concentration in Chinese) (p. 67)
• Modern Languages B.A. (Concentration in French) (p. 68)
• Modern Languages B.A. (Concentration in German) (p. 69)
• Modern Languages B.A. (Concentration in Japanese) (p. 70)
• Modern Languages B.A. (Concentration in Latin) (p. 70)
• Modern Languages B.A. (Concentration in Spanish) (p. 71)

Minors

• Arabic Minor (p. 65)
• Chinese Minor (p. 65)
• Foreign Language Minor (p. 65)
• French Minor (p. 65)
• German Minor (p. 65)
• Japanese Minor (p. 66)

Japanese Minor

Certificate Requirements: 12 Credit Hours

As a collaborative program of the University System of Georgia and the Americas Council, the undergraduate Certificate in Latin American Studies provides an in-depth study of Latin America and its relationship with the United States and other nations. The program promotes knowledge and understanding of a region of growing importance, both economically and culturally. The course of study is designed to be interdisciplinary and complementary to existing undergraduate programs. Students who satisfy the requirements in their undergraduate degree will be awarded a certificate in Latin American Studies, which will be noted in students’ placement materials and on their transcript.

Any lower-division course in any field in which knowledge of a foreign language will benefit the student is acceptable for Area F. Students should consult their advisor on appropriate courses for Area F. Additional language courses are encouraged:

- ARAB 1001 Elementary Arabic I
- ARAB 1002 Elementary Arabic II
- ARAB 2001 Intermediate Arabic I
- ARAB 2002 Intermediate Arabic II
- CHIN 1001 Elementary Chinese I
- CHIN 1002 Elementary Chinese II
- CHIN 2001 Intermediate Chinese I
- CHIN 2002 Intermediate Chinese II
- FORL 1090 Selected Topics in Foreign Languages
- FORL 2090 Intermediate Foreign Language

Other Program Requirements

- Students must earn a minimum grade of "C" in each course in German.
- Students must complete the Modern Languages Exit Exam.
- Students must complete a minimum of 39 upper-division hours.

Honors in German

To graduate with Honors in Modern Languages with a concentration in German, a student must:

- be admitted to the University Honors Program;
- successfully complete an additional six credit hours in GRMN at the 4000-level (for a total of 30 hours of upper-division GRMN), three of which must be GRMN 4890 (Honors);
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Advisement

All Modern Languages majors, including students in the UHP, are advised by an advisor located in the Interdisciplinary Academic Building on the Statesboro Campus, (912 478-7740) and in the Student Success Center on the Armstrong Campus (912-344-2570).

Total Credit Hours 124

**Other Program Requirements**

- Students must earn a minimum grade of “C” in each course in Spanish.
- Students must complete the Modern Languages Exit Exam.
- Students must complete a minimum of 39 upper-division hours.

**Honors in Spanish**

To graduate with Honors in Modern Languages with a concentration in Spanish, a student must:

- be admitted to the University Honors Program;
- successfully complete an additional six credit hours in SPAN at the 4000- or 5000-level (for a total of 30 hours of upper-division SPAN), three of which must be SPAN 4890 (Honors);
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

**Advisement**

All Modern Languages majors, including students in the UHP, are advised by an advisor located in the Interdisciplinary Academic Building on the Statesboro Campus, (912 478-7740) and in the Student Success Center on the Armstrong Campus (912-344-2570).

**Modern Languages Suggested Chronology**

For the Modern Languages major, specific courses are not required; rather, courses at specific levels are required. To complete the major, students must take or place out of the basic language sequence (1001, 1002, 2001, 2002) and complete eight upper-division courses in the language (“FL” represents any of ARAB, CHIN, FREN, GRMN, JAPN, LATN, OR SPAN). This suggested chronology is designed as a guide for students planning their course selections. Actual course selections should be made with the advice of an academic advisor.

Study Abroad is strongly encouraged for Modern Languages majors and for all Georgia Southern students. For information, visit the Department of Foreign Languages or the Office of International Programs and Services.

Spanish for the Professions
Certificate

Contact
Chair, Department of Foreign Languages
Forest Drive Building
Room 1302
(912) 478-8081

Certificate Requirements: 12 Credit Hours
The Certificate in Spanish for the Professions provides students with precise language skills for designated professional purposes, such as business, healthcare, and translation, and increases their intercultural competencies to be prepared for success in a global economy. Upon completion of the certificate, students will be able to identify essential similarities and differences among Hispanic cultures in their respective fields; understand and produce intermediate to advanced conversation using vocabulary related to professional fields; interpret complex texts in Spanish; and present information related to their fields in Spanish in both written and oral formats.

Department of History

The Department of History educates students about the past by blending traditional and contemporary approaches to the study and teaching of history and by emphasizing global perspectives, while recognizing the value of local and regional history. Students will learn to analyze and interpret complex information, and to present coherent arguments about its meaning and significance. Upon graduation, students will have the critical thinking and communication skills necessary to succeed in a variety of careers or in further professional education. Consistent with the mission of the University, the department fosters a culture of engagement that bridges theory with practice, extends the learning environment beyond the classroom, and promotes student growth and life success.

Students earning the B.A. in History will be able to:

1. Display knowledge of fundamental themes and narratives in history.
2. Conduct original historical research.
3. Communicate historical knowledge and explanations to others.

History majors will analyze and interpret information, write and share ideas about why events happened, and develop the knowledge and skills that help them to succeed in today's workplace.

Total Credit Hours 18

1 An additional 15 hours of Asian courses in at least three disciplines from the following approved list for a total of 18 semester hours. Although not required, course work in an Asian language is strongly recommended.

European Union Studies Certificate

Certificate Requirements: 15 Credit Hours

The European Union Studies Certificate provides an in-depth study of the European Union (EU) and its relationship with the United States and other nations. It is a collaborative program of Georgia Southern University and the European Union Studies Program of the University System of Georgia. The program offers a common curriculum open to all university system institutions.

Note: A 3.0 GPA in certificate courses is required.

Select one of the following:
EURO 3234 or POLS 3234 Introduction to the European Union 3

Select nine credit hours from the following multidisciplinary list:
Each course must have at least a 25% EU component. One course must have the European Union (EURO) prefix.
BIOL 3100 People and the Environment 3
ECON 3100 Multinational Econ Enterprises 3
ECON 3132 International Trade 3
ECON 4337 Environmental Economics 3
HIST 3338 Contemporary Europe 3
HIST 3431 Modern Britain: 1485 to the Present 3
HIST 3432 Modern Germany 3
HIST 3434 Modern European Thought 3
HIST 3533 Modern East Central Europe 3
HIST 4335 Women and Gender in Europe 3
HIST 5339 Britain and the World 3
HIST 5430 Modern France and French Society in Global Context 3
HIST 5533 Economic Rivals: US-UK-Japan 3
POLS 3340 Pol & Ideol/Contemporary Euro 3
EURO 3990 Topics In European Union Studies 3
EURO 4130 European Law and Legal Systems 3
EURO 4160 Federalism and Multilevel Governance in the EU 3
EURO 4230 Doing Business in the European Union and United States 3
EURO 4260 European Monetary Union 3
EURO 4330 Science and Technology Policy 3
EURO 4430 EU Environmental Policy 3
EURO 4530 European Social Policy 3
EURO 4630 EU Communications and Media 3

EURO 4760 US-EU Relations 3

Capstone Seminar:
EURO 4500 Seminar in Euro Union Studies 3
or EURO 4830 EU Studies Capstone Course 3

| Total Credit Hours 15 |

Admission Requirements

A certificate in EU Studies can be taken in tandem with a formal degree program. Students from all academic majors are eligible to participate as long as they possess a minimum 2.75 cumulative GPA. A student may formally apply to enroll in the program after successful completion of the following:
- EURO 3234 or POLS 3234 with a grade of C or better
- 30 semester hours of academic credit
- HIST 1111 or HIST 1112

Minor - Required
Select 15 credit hours of Minor (must be approved by advisor)  15

Electives
Select 21 credit hours of Electives  21

Total Credit Hours  124

1 History majors should take HIST 1111 in Area B and HIST 1112 in Area F. If not taken to satisfy these CORE requirements, students must take these courses in Area F.
2 History majors should take HIST 2110 in Area E. If HIST 2111 or HIST 2112 is taken to satisfy Area E, the remaining course must be taken in Area F.
3 At least nine (9) credit hours must include one course from three of the following four categories:
   • U.S. History
   • European History
   • “Non-Western” History [African, Asian, Latin American, or Middle Eastern]
   • Public History

Other Program Requirements
• Must have a minimum grade of “C” in every History course beyond the core surveys.
• Students must be in good standing to change major to History

• No more than 30 hours of upper division course work in the major may count toward the minimum of 124 hours required for graduation.
• Student Portfolio Requirements: In the semester of graduation, students must submit a copy of the major assignment from HIST 2630; submit a copy of a research/writing sample from an upper-division history course; submit a copy of a written or blue book exam from an upper-division history course; submit a copy of the major assignment from HIST 4635; and submit the Senior Exit Survey administered in HIST 4635.

Honors in History
To graduate with History, a student must:
• Be admitted to the University Honors Program;
• Successfully complete:
   • HIST 2630 Historical Methods with a minimum grade of “B” or higher
   • HIST 3630 History Seminar with a minimum grade of “B” or higher
   • HONS 4999 Honors Research for one credit hour
   • HONS 4999 Honors Research for two credit hours in separate semester with the same faculty member as the first semester of HONS 4999 Honors Research;
• Successfully complete and present an Honors Thesis or Capstone Project;
• Be in good standing in the University Honors Program at the time of graduation.
• (Taking the entire three-credit-hour sequence of HONS 4999 Honors Research with a faculty member substitutes for the HIST 4635 Senior Seminar - required for History Majors.)

Advisement
All History majors on the Armstrong campus are advised by an advisor located in the Academic Advisement Center, Room 125.
(912) 344-2673
All History majors on the Statesboro campus are advised by an advisor located in the Interdisciplinary Academic Building, Room 1048.

Department of Literature

A strong Department of English is central to a liberal arts education because it helps students to become incisive in their critical thinking, effective as communicators, aware of cultural diversity, and skillful...
as interpreters of the written and spoken word in all areas of life. We are committed to academic excellence, innovative instruction, and collaborative service to the community.

The study of literature produces people who can build communities and lead those around them with empathy and wisdom because they have seen the goals and regrets of those who have set into record the dreams of what it is to be human. Literature is the story of us. What better way to engage with those big things in the world around you than to know how those different from you see the same things.

Studying literature provides excellent preparation for professional employment in any area where the close examination of written texts and the ability to communicate well are important. The Department takes pride in working with students to connect their immediate studies with their long-term goals. The Department’s goal is to promote critical thinking, effective communication, and intellectual engagement with the key ideas in our fields.

A student graduating with a B.A. degree in English will be able to demonstrate the following:

1. Produce prose that meets the standards of academic writing.
2. Create an organized, well-developed, and effectively argued paper.
3. Recognize, analyze, and evaluate literary techniques.
4. Apply and incorporate/integrate literary criticism and theory appropriately.
5. Situate and interpret a text(s) in its historical, cultural, or literary context.
6. Create and deliver an effectively oral presentation directed to an audience conversant with the discipline.

</table>

1 If additional hours are needed to reach 18 hours (based upon entering Foreign Language proficiency levels), students may choose from a select group of courses approved by the Department Chair.
May be taken only after successfully completing eighteen (18) credit hours of upper division coursework.

Prerequisite(s)

- One of the following --ENGL 2100, ENGL 2111, ENGL 2112 -- must be taken prior to or concurrent with ENGL 2121, ENGL 2122, ENGL 2131, or ENGL 2132, as well as any 3000-level ENGL course.
- Each upper-division course has one other prerequisite ENGL class, which varies depending on the subject matter. Please see course descriptions or your advisor for the exact prerequisite for each upper-division course.

Other Program Requirements

- Students must earn a minimum grade of "C" in all major courses.
- Majors must acquire from their advisors a copy of "Requirements for the Major in English".

Honors in English

To graduate with Honors in English, a student must:

- be admitted to the University Honors Program;
- successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.
- Students completing the Honors Requirements in English will count the three credit hours of the Honors Research Seminar (HONS 4610) toward their general electives, which means that they will have a total of 15 hours for other general elective courses rather than 18 hours.

Program:

A strong Department of English is central to a liberal arts education because it helps students to become incisive in their critical thinking, effective as communicators, aware of cultural diversity, and skillful as interpreters of the written and spoken word in all areas of life. We are committed to academic excellence, innovative instruction, and collaborative service to the community.

The discipline of English – a traditional core of the humanities – asks the big questions: What does it mean to be human? How do we make meaning in this world? What is the relationship of individuals to society? Today these questions are complicated by topics such as class, race, ethnicity, and gender – all of which are addressed by classes in the Department. From Shakespeare to Postcolonial Studies, the Department of English has something for everyone.

Studying literature provides excellent preparation for professional employment in any area where the close examination of written texts and the ability to communicate well are important. The Department of English takes pride in working with students to connect their immediate studies with their long-term goals.

A student graduating with a B.A. degree in English will be able to demonstrate the following:

- Employ clear and precise prose.
- Recognize and analyze the significance of literary techniques.
- Use literary criticism and theory appropriately.
- Situate and interpret a text in its historical, cultural, or literary context.
- Give a clear and poised presentation directed to an audience conversant with literary concepts.

Advisement

All English majors, including students in the UHP, are advised by an advisor located in the Newton Building, (912) 478-7740.

Department of Music

Mission Statement

The Department of Music’s mission is to provide opportunities for studying, performing, and creating music within the context of a liberal arts education; to prepare students for careers in music-related fields; to enhance the cultural life of the campus and surrounding region; and to contribute to the preservation and expansion of our rich musical tradition through performance, composition, education, and research.

Requirements for All Music Degree Programs

Admission Requirements

All prospective music majors must pass an entrance audition in the appropriate applied area.

Performance Requirements

Each candidate for a music degree must complete applied music proficiency level requirements appropriate to the candidate’s specific degree plan, as well as fulfill other performance requirements consistent with the degree plan or individual course objectives.

Enrollment in any applied music course, including Junior Recital and Senior Recital, is by permission of the instructor and/or the Chair of the Department of Music.

A jury examination in the appropriate applied area will be taken during the examination week or shortly before the end of each semester. Students not majoring in music who take applied music lessons may take a jury examination upon the recommendation of the applied instructor.
Recital requirements: Prior to performing a graduation, junior, or senior recital, the candidate must pass a recital approval examination no fewer than three weeks before the recital date.

Group Piano Placement Examinations
A placement examination in piano is required of all transfer students. Freshman music majors with prior keyboard experience should also take the placement examination. A maximum of four credit hours of group piano is allowed toward graduation requirements.

Music Theory Placement Examinations
All students entering the music program will take the theory placement exam. Placement exam results are for advisement purposes only.

Music Major Progression Requirements
Music majors must earn a minimum grade of "C" for each music class that applies toward graduation in order to progress in the music program. Students earning less than a "C" grade in a sequential course offering may not take the next course in the sequence until the course is repeated and a grade of "C" or higher is earned. In addition, students must earn a minimum grade of "C" in a prerequisite course before taking an advanced course in the same subject area.

Music majors will be expelled from the degree program if they fail any individual required music course twice.

Additional Policies
See the Department of Music Handbook for additional policies governing degree programs in music.

The Department of Music is a member of the National Association of Schools of Music.

- Music B.A. (p. 81)
- Music B.M. (Concentration in Composition) (p. 82)
- Music B.M. (Concentration in Instrumental Performance) (p. 82)
- Music B.M. (Concentration in Piano Performance) (p. 83)
- Music B.M. (Concentration in Voice Performance) (p. 84)
- Music Education B.M. (Concentration in Choral) (p. 84)
- Music Education B.M. (Instrumental) (p. 85)

Minors

- Music - Applied Minor (p. 81)
- Music - History and Literature Minor (p. 81)
- Music - Music Technology Minor (p. 81)
- Music Minor (p. 86)

Humanities Interdisciplinary Concentration

Concentration Program
Select six (3 credit hours) courses, with at least three different prefixes, from the following list. At least five of these courses (15 credit hours) for the concentration must be upper division (3000 or above). Courses may be selected from the list of courses below approved for the concentration.

Other courses may be approved by the student's advisor in consultation with the Associate Dean of CAH.

Select 18 credit hours from the following:

</table>

**Music Theory**  
Choose one option:  

1. **Option 1:**  
   - MUSC 1333 Music Fundamentals I (3)  
   - MUSC 1334 Music Fundamentals II (3)  

2. **Option 2:**  
   - MUSC 1331 Music Theory I (3)  

Three (3) elective credits in Music  
MUSC 1511 Recital Attendance (2 semesters) | 0  
MUSC 3xxx Ensembles (3 semesters) | 3  
**Total Credit Hours** | 15

**Additional Minor Requirements/Recommendations**

Music - Applied Minors must be admitted by passing an audition in applied music. All credits earned in Principal Applied must be on a single instrument or in voice only. Students pursuing the music minor must enroll in the specified ensemble(s) appropriate to their Principal-Applied area. All minors must achieve equivalent of Level I proficiency in their applied area prior to completion of the minor.

Department of Philosophy and Religious Studies

The Department of Philosophy and Religious Studies helps students to learn how to think, not what to think. Philosophy majors develop critical thinking skills, appreciate cultural diversity, become careful readers, and write clearly and accurately. The philosophy major is for students who are passionate about ideas and curious about the world.

The disciplines of Philosophy and Religious Studies ask the pressing questions: What does it mean to be human? How do people make meaning in this world? What is the relationship of individuals to society? These questions are complicated by topics such as class, race, ethnicity, and gender - all of which are addressed by classes in the Department. From Existentialism to Epistemology, and raging across time and place from Ancient Israel to Contemporary Tibet, the Department of Philosophy and Religious Studies has something for everyone.

Studying Philosophy or Religious Studies provides excellent preparation for professional employment in any area where critical thinking, problem solving, careful reading, and the ability to communicate well are important.

The Department takes pride in working with students to connect their immediate studies with their long-term goals.

A student graduating with a B.A. degree in Philosophy will be able to demonstrate the following:

1. Present and explain the thought of a philosopher or philosophical theory accurately and clearly, demonstrating a strong background in discipline-specific knowledge, including the history and major periods of Philosophy, major thinkers, and major fields of study and theories of Philosophy.
2. Critically evaluate philosophical positions, identifying central arguments and their support, demonstrating an ability to think through complex issues with clarity.
3. Present an independent evaluation of or response to the material. Support one’s own philosophical positions with well-reasoned argumentation, providing a thesis that is properly stated, focused, and clear, and defending this thesis in a way that is well-organized and well-supported.

A student graduating with a B.A. degree in Philosophy (Concentration in Religious Studies) will be able to demonstrate the following:

1. Analyze philosophical arguments and religious data by critically assessing relevant primary and secondary texts.
2. Utilize theories and methods from different disciplinary approaches within Philosophy and Religious Studies.
3. Analyze religious data by critically assessing relevant primary and secondary texts.
4. Synthesize relevant data to support an argument that explains some aspect of religion, providing a thesis that is properly stated, focused, clear, and defending this thesis in a way that is well-organized and well-supported.

Electives

Select 18 credit hours of Electives

Minor - Required

Select 15 credit hours of Minor (Must be approved by advisor)

Total Credit Hours

124

1 Three credit hours of an appropriate upper division course in another field may be substituted to count toward the major with permission of the Chair.
2 At least 12 credit hours of the elective or minor credits must be at the 3000 level or higher, so that the student will graduate with 39 upper division credits.

Program Admission Criteria

• Majors must acquire from their advisors a copy of “Requirements for the Major in Philosophy.”

Other Program Requirements

• Must have earned a minimum grade of “C” in each of the required courses in Philosophy upper division.

Honors in Philosophy

To graduate with Honors in Philosophy, a student must:

• be admitted to the University Honors Program;
• successfully complete at least three credit hours of () over three semesters;
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Students completing the Honors Requirements in Philosophy will count the three credit hours of the Honors 4610 (Honors Research Seminar) toward their general electives, which means that they will have a total of 15 credit hours for other general elective courses rather than 18 credit hours.

Advisement

All Philosophy majors, including students in the UHP, are advised by an advisor in the Newton Building. (912) 478-0233.

Our department provides a range of professional development opportunities and activities for students, including internships, résumé and application letter workshops, discussions with visiting writers, readings from the Georgia Poetry Circuit, and student-led readings. Students may also join the Creative Writing Club, the Linguistics Club, or the Writers Guild, which are all advised by department faculty.

Graduates from the Department of Writing and Linguistics will demonstrate their knowledge and skills in these ways:

1. Discuss fundamental concepts in the study of writing and linguistics:
   a. Identify current issues, trends, and organizations in writing and linguistics.
   b. Define terms, themes, and genres common to the study of writing and languages.
   c. Identify and analyze writing and language in examples from different genres.

2. Critically select and apply appropriate theoretical, methodological, and technical tools and skills:
   a. Produce successful written, creative, or visual documents that apply relevant theories, knowledge, and skills in writing and linguistics.
   b. Explain the relationships among audience, purpose, and rhetorical strategy in writing specific texts. Use design principles and tools to heighten a document’s impact.

3. Examine the processes common to the study of writing and linguistics:
   a. Employ techniques for generating ideas, writing, researching, and revising.
   b. Synthesize information from multiple sources.
   c. Interact with cognitive, social, and affective factors that shape writing tasks and language processes.

4. Practice the assessment of writing:
   a. Critically and constructively evaluate one’s own writing.
   b. Critically and constructively evaluate the writing of others.

Area F - Courses Appropriate to Major

- Foreign Language - through 2002 or its equivalent: 0-6 Credit Hours
- Select 9-18 credit hours from the following: 9-18 Credit Hours
  - LING 2090 Selected Topics in Writing and Linguistics
  - WRIT 2090 Selected Topics in Writing and Linguistics
  - WRIT 2130 Technical Communication
  - WRIT 2131 Everyday Creative Writing
  - WRIT 2133 Forms in Writing
  - WRIT 2135 Reading as a Writer
  - WRIT 2230 Careers in Writing and Linguistics
  - WRIT 2350 Freelance Writing
  - WRIT/LING 2430 Essential Grammar for Successful Writing
  - WRIT 2450 Writing for Social Media
  - WRIT 2533 Writers on Writing
  - ENGL 2100 Literature And Humanities (unless taken for Area C) 1
    - or ENGL 2111 World Literature I
    - or ENGL 2112 World Literature II
    - or ENGL 2121 British Literature I
    - or ENGL 2122 British Literature II
    - or ENGL 2131 American Literature I
    - or ENGL 2132 American Literature II

Major Requirements

Students must take a minimum of 30 upper-division hours in the major.

Common Body of Knowledge Courses

Students must complete four of the following five courses, and must complete at least two of these courses with a minimum grade of "C" before enrolling in any course at the 4000-level or above.

- LING 3630 Language and Linguistic Theory
- WRIT 3130 Creative Writing
- WRIT 3220 Foundations in Professional and Technical Writing
- WRIT 3234 Research Methods for Writers
- WRIT 3531 Introduction to Writing Studies

Upper Division Requirements

Select one of the following: 3

- LING 4333 Semantics: Introduction to Linguistic Meaning
- LING/WRIT 5130 Modern English Grammar
- LING/WRIT 5340 History of English Language
- WRIT 3233 Professional Editing
- WRIT 3234 Research Methods for Writers
- WRIT 5330 Rhetoric

Select one (3-6 credit hours) from the following Capstone Experience courses: 3-6

- LING/WRIT 4790 Internship in Writing and Linguistics
- WRIT 5231 Advanced Screenwriting
- WRIT 5250 Technical Writing
- WRIT 5330 Rhetoric
- WRIT 5430 Advanced Poetry Writing
- WRIT 5530 Sociolinguistics
  - or LING 5530 Sociolinguistics
- WRIT 5531 Advanced Creative Nonfiction Writing
- WRIT 5540 Advanced Technical Editing
- WRIT 5560 Advanced Fiction Writing

Select 9-12 credit hours from the following upper-division courses in the major as approved by advisor: 9-12

Creative Writing

- WRIT 3030 Selected Topics in Writing
- WRIT 3140 Writing for Young Readers
- WRIT 3310 Digital Storytelling
- WRIT 3433 Comic Book Writing in American Culture
- WRIT 3490 Writing the Southern Experience
- WRIT 4130 Creative Nonfiction Writing
- WRIT 4231 Screenwriting
- WRIT 5231 Advanced Screenwriting
- WRIT 4430 Poetry Writing
- WRIT 4530 Fiction Writing
- WRIT 4790 Internship in Writing and Linguistics
- WRIT 5030 Selected Topics in Writing
- WRIT 5430 Advanced Poetry Writing
- WRIT 5531 Advanced Creative Nonfiction Writing
- WRIT 5532 Writing Flash Prose
- WRIT 5560 Advanced Fiction Writing

Professional and Technical Writing

- WRIT 3030 Selected Topics in Writing
- WRIT 3230 Writing in the Workplace
- WRIT 3232 Writing Visual Information
- WRIT 3233 Professional Editing
- WRIT 3234 Research Methods for Writers
- WRIT 3310 Digital Storytelling
- WRIT 3320 Introduction to Usability and user Experience
- WRIT 3460 Travel and Tourism Writing
- WRIT 4300 Applied Rhetoric of Science and Technology
- WRIT 4380 Writing Grants and Proposals
- WRIT 4535 Intellectual Property
- WRIT 4790 Internship in Writing and Linguistics
- WRIT 5030 Selected Topics in Writing
- WRIT 5100 Writing for New Media
- WRIT 5250 Technical Writing
Program Admission Criteria
Students must have an institutional GPA of 2.0 or higher to become a major in Writing.

Other Program Requirements
Writing majors must earn a grade of "C" or better in all courses in the major.

Honors in Writing
To graduate with Honors in Writing, a student must:
  • be admitted to the University Honors Program;
  • successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
  • successfully complete and present an Honors Thesis or Capstone Project;
  • be in good standing in the University Honors Program at the time of graduation.

Advisement
All Writing majors, including students in the UHP, are advised by an advisor located in the Newton Building, (912) 478-7740.

Writing Minor

Interdisciplinary Studies

Center for Africana Studies
The mission of the Africana Studies program is to serve as a centralized instructional, service, and research program for students, faculty, and the community to explore the history, culture, and ideas of peoples of African descent. The program broadens students’ understanding of the global community through transcultural opportunities and foster students’ talents for leadership, scholarship, and personal development. The program allows students to explore the vast and complex cultures of the African Diaspora by visiting civilizations of the past and examining the contributions of African people in world affairs. The program also allows students to capitalize on the unparalleled opportunities that exist in the southern region of Georgia to study African and African-American connections, as observed in the Gullah/Geechee cultures and the African influences on the culture of the southern United States.

Center for Irish Research and Teaching
An tIonad um Thaighde agus Theagasc Éireannacha
The Center for Irish Research and Teaching (CIRT) increases international literacy among our diverse student body through rigorous, relevant study of Ireland and the worldwide Irish diaspora. CIRT places special emphasis on undergraduate research into Irish and Scots-Irish legacies in Georgia and the American South.

Through full-credit courses offered on the Armstrong and Statesboro campuses — and also on study-in-Ireland programs — CIRT provides students with opportunities to explore Irish and Irish-diaspora history and politics; literature and theater; culture and art; society and business; and science and technology. A student can obtain an interdisciplinary Minor in Irish Studies by successfully completing 15 credit hours of approved courses. Irish Studies courses equip students with tools to think, analyze, and problem-solve in ways that cross academic disciplines and national borders. Among other outcomes, the courses enhance participants’ knowledge of universal human phenomena that resonate very particularly with the Irish experience, not least: colonization; emigration; food security; ethno-religious identity; and the tech economy. CIRT instills within students an ethos of civility, collaboration, and integrity; and it also fosters a commitment to lifelong learning.

Students are advised to consult the webpage of the Center for Irish Research and Teaching (georgiasouthern.edu/irish) for information about additional, semester-specific courses that have significant Irish content and, thus, have been pre-approved for the interdisciplinary Minor in Irish Studies. Those courses may be offered either on a Georgia campus or through a study-in-Ireland program.

Women's, Gender, and Sexuality Studies

The mission of the Women's and Gender Studies Program at Georgia Southern University is to introduce students to the definitions, theories, and methodologies of the study of gender as intersecting with identities of race, class, and sexuality. The Women's and Gender Studies Program at Georgia Southern University offers an interdisciplinary minor available to all undergraduate students, regardless of major.

As an interdisciplinary minor, the Women's and Gender Studies Program promotes collaboration across diverse disciplines and among students, faculty, and the community who work together to understand the ways in which ideologies of gender and sexuality permeate the entire fabric of society.

Through course offerings in the undergraduate minor in Women's and Gender Studies (WGST), the program promotes academic study and dialogue on a broad range of topics related to interdisciplinary studies of women, feminisms, masculinities, sexes, genders, and sexualities, including LGBT+ or gender and sexual minorities (GSM).

The Women's and Gender Studies Program supports research, teaching, and outreach activities that analyze gender through the framework of "intersectionality," which theorizes identity categories as multiple. Identities that are always intersecting influence experiences and complicate marginalization.

Guided by disciplinary standards, the Women's and Gender Studies Program supports the University's mission by fostering research, teaching, and outreach activities that promote integrity, civility, kindness, and collaboration.

Programs

Majors
- Associate of Arts A.A. (p. 95)

Additional Minor Requirement

A minimum of 15 hours will be necessary for an interdisciplinary minor in Classical and Medieval Studies, including 3 hours of upper division Latin. No student may apply any course in the department of his major towards the interdisciplinary minor in Classical and Medieval Studies.

HIST 1111 World History I: Development of World Civilization (3) will be a requirement for all students minoring in Classical and Medieval Studies and counts toward the necessary 15 hours for all students except History majors. A History major who minors in Classical and Medieval Studies may not count World History I towards fulfilling the necessary 15 hours since history majors are already required to take HIST 1111 as part of their major requirements. All students minoring in Classical and Medieval Studies may take up to one lower division and one upper division course cross listed with their majors.

Selected topics courses (3030s), study abroad programs and independent study courses with a specifically classical or medieval focus may be used as credit towards the minor upon approval of the director of the program and provided they are accepted for credit by the University. Their suitability for the minor will be decided by the director of the program.

Interdisciplinary Studies B.I.S.

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses in Area A1 through Area E.

The Bachelor of Interdisciplinary Studies (B.I.S.) degree provides opportunities for non-traditional college students who are interested in combining a liberal arts background with some degree of specialization. It offers a solid core curriculum program along with the freedom to choose from a wide range of concentrations.

While the Interdisciplinary Studies degree allows for study in several areas, it is organized to provide an academically sound program with carefully planned concentrations. The student who earns this degree will have achieved a broad-based education in a fully accredited program.

General Requirements (Core Areas A - E) | 42

Area F - Courses Appropriate to Major | 18

Major Requirements | 51-54

For the major, students may choose one of the following two options: 1

- Three (3) concentrations of 18 credit hours each from the list of approved concentrations below.
- Two (2) concentrations of 18 credit hours each from the list of approved concentrations below and one (1) 15-credit hour minor (refer to minors and interdisciplinary minors in Catalog).

Approved Concentrations: 2

Capstone Seminar: 3

Elective

Select 5-8 credit hours of Electives | 5-8

Total Credit Hours | 124
Of the total number of credit hours for the major, 42 of the credit hours must be at the upper division level.

Note: Please check with B.I.S. advisor for detailed information on Approved Concentrations.

Other Program Requirements

• Students must have a 2.0 total institutional GPA overall and a total GPA of 2.0 in each concentration (or minor).

• Students must choose concentrations and minors from different disciplines.

Other Program Information

• Foreign Language - Although foreign language is optional in the Bachelor of Interdisciplinary Studies Degree, students who wish may include Foreign Language in Area F, as well as choose a minor or concentration in Foreign Language.

Advisement

The program is administered by the College of Arts and Humanities.

Interdisciplinary Studies B.I.S. (Online)

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses in Area A1 through Area E.

The Bachelor of Interdisciplinary Studies (B.I.S.) Online provides opportunities for students who are interested in combining a liberal arts background with some degree of specialization. The degree offers a solid core curriculum program along with the freedom to choose several areas of study.

An online interdisciplinary degree that allows for study in several areas, the B.I.S. is organized to provide an academically sound program with carefully planned core and area concentrations. The student who earns this degree will have achieved a broad-based education in a fully accredited program.

| Credit Hours | General Requirements (Core Areas A - E) | 42 |

2 Note: Please check with B.I.S. advisor for detailed information on Approved Concentrations.

3 Please check with B.I.S. advisor for detailed information on Approved Minors.

Other Program Requirements

• Students must have a 2.0 total institution GPA overall and a total GPA of 2.0 in each concentration (or minor).

Advisement

The program is administered by the College of Arts and Humanities.

Irish Studies Interdisciplinary Minor

Minor Program

The interdisciplinary Minor in Irish Studies requires fifteen credit hours of courses with full or significant Irish and/or Irish-diaspora content. Twelve hours must derive from upper-division courses - this is, courses at the 3000 level or above. Three hours may, but do not have to, derive from a lower-division course or courses.

Courses may be selected from the list of courses below. Other courses with significant Irish content may also be applied to the Minor; however, any such course must be approved by the Director of the Center for Irish Research and Teaching, who may be contacted by sending an email to irish@georgiasouthern.edu.

Students are advised to consult the webpage of the Center for Irish Research and Teaching (georgiasouthern.edu/irish) for information about additional, semester-specific courses that have significant Irish content and, thus, have been pre-approved for the Minor. Those courses may be offered either on campus or through a study-in-Ireland program.

Select 15 credit hours from the following: 15

| Credit Hours | ANTH 3332 European Cultures |
| Credit Hours | ENGL 5235 Irish Literature to 1850 |

Public Health:

Choose from the following:

- GEPH 6134 Human Sexuality
- GEPH 6133 Women and Minority Health Issues

Science and Mathematics:

- GEOG 5530 Cultural Geography

Total Credit Hours 15

Secondary P-12 Education Programs

Students who plan to seek teacher certification after completion of their undergraduate degree may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. Students interested in a Secondary Education (grades 6-12) certification in English, History, Political Science, and Writing and Linguistics or in P-12 (grades preschool-12) certification in Spanish should contact their departmental advisors or the College of Education Student Success Center for information related to content and certification requirements.

NOTE: GACE Program Admission Assessment and GACE Content Assessment examination and 2.5 cumulative GPA requirements must be met for certification program admission and should be considered during enrollment in the bachelor’s program.
Behavioral and Social Sciences

Mission
The College of Behavioral and Social Sciences prepares students to achieve academic excellence, develop their analytical skills, enhance their creativity, and embrace their responsibilities as citizens of their communities, their nations, and the world.

Department of Criminal Justice and Criminology

The Department of Criminal Justice and Criminology provides a comprehensive examination of justice, crime, and the law. Our classes foster a broad understanding of the nature of justice, crime, and the law, in addition to the social, political, legal, philosophic, and historical context in which questions of justice are addressed, both in the United States and around the world. Students are expected to develop not only knowledge but a commitment to public service, ethical consciousness, and leadership abilities. Through the course work in Criminal Justice and Criminology, students are equipped to become proficient writers, critical and independent thinkers, and effective communicators. Graduates of the Department are prepared for graduate school, law school, and professions within the criminal justice system.

The Department recognizes that the issues of crime and justice are complex, controversial topics that are open to different interpretations.
As such, we are committed to an open intellectual environment that encourages teaching, scholarship, and discussion from a diversity of theoretical perspectives and research methodologies. The curriculum of the Department reflects these values by offering a broad foundation of courses drawing on criminal justice, criminology, political science, sociology, public administration, and the law. The curriculum integrates these approaches to provide an understanding of the challenges of achieving justice in a complex society.

Students completing the B.S. degree in Criminal Justice & Criminology will be able to demonstrate the following abilities:

1. Evaluate the merits of competing theoretical perspectives used to explain the nature of crime and demonstrate an ability to apply criminological theories to specific types of crime;
2. Demonstrate an ability to apply ethical principles to criminal justice issues, policies, and practices, and evaluate their implications;
3. Explain the criminal justice process, the role of discretion among criminal justice actors, and evaluate best practices;
4. Compare and contrast the United States criminal justice system with that of other nations with an understanding of historical and cultural contexts;
5. Evaluate the historical, political, and social contexts and empirical support for a particular criminal justice policy area;
6. Demonstrate an understanding of the research process by both conducting original research and analyzing existing data.

Programs

Majors

- Criminal Justice and Criminology B.S. (Emphasis in Criminal Justice and Criminology) (p. 103)
- Criminal Justice and Criminology B.S. (Emphasis in Cybercrime) (p. 104)

CRJU 5361 Cybercrimes against Persons and Society
Social Science Multidisciplinary Electives
Select six credit hours of upper division (3000 and above) social science and related courses 4
Electives
Select 15 credit hours of free electives 15
Total Credit Hours 124

1 Select an additional course if CRJU 2010 was taken and utilized to satisfy Area B.
2 Students may take STAT 2231 as a substitute for this course.
3 Not all electives are offered on each campus.
4 Upper division social science and related courses may include courses from Sociology, Anthropology, Political Science, Public Administration, International Studies, and Legal Studies. History and philosophy courses and other courses also may be included, with permission of the student’s major advisor.

Other Program Requirements
A minimum grade of “C” is required for each Area F, CRJU, and multidisciplinary requirements course taken in the major. This applies to all courses (lower and upper division). If advisor recommends, one “D” allowed if matched by “B” or higher in another course in the major.

Internship
Students may take three, six, or nine credit hours of Internship. For internships over three credit hours, students may utilize up to six credit hours to count towards fulfilling the Upper Division Criminal Justice and Criminology Electives requirement, while three credit hours may be counted towards the Free Electives requirement. Students must work with their advisor to determine the placement of these hours.

Honors in Criminal Justice and Criminology
To graduate with Honors in Criminal Justice and Criminology, a student must:
• be admitted to the University Honors Program;
• successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Advisement
All Criminal Justice and Criminology majors, including students in the UHP, are advised by an advisor assigned to the major.

Criminal Justice and Criminology B.S. (Emphasis in Cybercrime)

Degree Requirements: 124 Credit Hours

Area F - Courses Appropriate to Major
CRJU 1100 Introduction to Criminal Justice

Selected by an advisor assigned to the major.

General Requirements (Core Areas A - E) 42
Additional Requirements 4
Area F - Courses Appropriate to Major 18
### Georgia Southern University

#### CRJU 3831 Popular Culture and Justice

#### CRJU 3931 Issues in Homeland Security

#### CRJU 4031 Community-Based Supervision and Treatment

#### CRJU 4092 Special Topics in Criminology

#### CRJU 4093 Special Topics in Criminal Justice

#### CRJU 4135 Directed Study in Criminal Justice and Criminology

#### CRJU 4137 Law, Justice, and Society

#### CRJU 4531 Comparative Justice Systems

#### CRJU 4532 Organized Crime in a Global Society

#### CRJU 4639 Inside-Out

#### CRJU 4792 Internship in Justice Studies

### Technology and Social Science Multidisciplinary Electives

Select six credit hours of upper division technology and/or social science/related courses

| Credit Hours | 6 |

### Electives

Select 12 credit hours of free Electives

| Credit Hours | 12 |

Total Credit Hours: 124

---

1. Select an additional course if CRJU 2010 was taken and utilized to satisfy Area B.
2. Students may take STAT 2231 as a substitute for this course.
3. The Criminal Justice and Criminology Track is offered on both the Armstrong and Statesboro campuses. However, the Cybercrime Track currently is available only on the Armstrong campus (while some courses may be taken on the Statesboro campus).
4. Not all electives are offered on each campus.
5. Students are strongly encouraged to take Corporate Crime (CRJU 3160), Comparative Justice Systems (CRJU 4531), and Issues in Homeland Security (CRJU 3931) when possible.
6. Students enrolled in the Cybercrime Track are encouraged to take upper division technology courses from IT, computer science, and LSTD. Social science and related courses may include courses from Sociology, Anthropology, Political Science, Public Administration, International Studies, and Legal Studies. History and philosophy courses and other courses also may be included. Course selection should be done in consultation with the student’s major advisor.

### Other Program Requirements

A minimum grade of “C” is required for each Area F, CRJU, and multidisciplinary requirements course taken in the major. This applies to all courses (lower and upper division). If advisor recommends, one “D” allowed if matched by “B” or higher in another course in the major.

### Internship

Students may take three, six, or nine credit hours of Internship. For internships over three credit hours, students may utilize up to six credit hours to count towards fulfilling the Upper Division Criminal Justice and Criminology Electives requirement, while three credit hours may be counted towards the Free Electives requirement. Students must work with their advisor to determine the placement of these hours.

### Honors in Criminal Justice and Criminology

To graduate with Honors in Criminal Justice and Criminology, a student must:

- be admitted to the University Honors Program;
- successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

### Advisement

All Criminal Justice and Criminology majors, including students in the UHP, are advised by an advisor assigned to the major.

The Department of Political Science and International Studies fosters the development of civically-engaged students who will become productive citizens dedicated to serving their communities, their nations, and the world. Classes in the department focus on inculcating in students a core understanding of politics, intellectual curiosity, a global consciousness, and a spirit for community activism. Students are provided with research and community service opportunities, public service internships, as well as study abroad experiences.

The degree programs in Political Science and International Studies (B.A. International Studies, B.A. Political Science, B.S. International Trade) prepare students for active citizenship by preparing them for professional careers in government, inter-governmental and non-governmental organizations, business, studies in law, political science, and public policy. Graduates of the degree programs in Political Science and International Studies will become life-long learners as they become cognizant of the institutions and processes of governance and the policies and historical and current events that shape their lives.

Upon completion of the B.A. in Political Science, graduates will be able to:

1. Delineate the theoretical and methodological differences between the subfields of political science, i.e., American Politics, Comparative Politics, International Relations, Political Theory, and Public Policy.
2. Utilize appropriate nomenclature of the various subfields in Political Science when discussing and writing.
3. Demonstrate an ability to distinguish between the political processes of different forms of government in both the international and domestic realm.
4. Recognize the underlying cultural, societal, philosophical, and political factors which have led to the policies found in the United States and different countries around the world.
5. Demonstrate an ability to think critically by utilizing appropriate theoretical constructs in both qualitative and quantitative research projects.
6. Incorporate appropriate methodologies into narratives which add to the ability to both analyze and explain political events and public policies.
7. Demonstrate an ability to write with both clarity and precision by utilizing key phrasing relevant to the study of political science.
8. Participate in discipline-specific activities which will further career goals in the graduate’s field of study.

The B.A. in International Studies is a challenging major designed to provide an undergraduate, interdisciplinary social science background for careers both inside and outside the United States. Students majoring in International Studies become highly proficient in understanding global affairs through a variety of means:

1. The study of the culture, history, and political economy of regions outside the United States;
2. The acquisition of a high level of proficiency in a second language; and
3. Direct experience of another culture by studying or working abroad

The B.S. International Trade is a professional degree designed to provide an interdisciplinary business background for careers outside the United States or in international businesses and agencies within the U.S. The degree requires completion of a prescribed course of study and an internship overseas or with a business or institution having an international component in the United States. The purpose of this internship is to immerse the student in the professional practices within the culture and in the language which has been studied for the required foreign language minor.

Minor Program

All courses in the minor also require a C or better.

INTS 2130 Introduction to International Studies 3

Additional Credits

Must include 12 additional credits from the following, and may not include more than six credits numbered 3000 or above from a single discipline

Three courses selected from:

- ENGL XXXX Literature of the Non-Western World
- HIST 3200 Traditional China
- HIST 3532 The Modern Middle East
- HIST 3534 Modern Southeast Asia
- HIST 5243 Topics in Asian History
- HIST 5532 Modern China
- POLS 3132 Asian Politics
- POLS 4240 Asian Regional Security
- POLS 4410 Asia and the United States
- POLS 4460 Politics of East Asia
- POLS 4560 Comparative Foreign Policy
- POLS 4570 Politics and Security in Southwest Asia

One course selected from:

- ECON 1150 Global Economic Problems
- ENGL 5200 Postcolonial Literature
- WGSS 2200 Gender In Global Contexts

Total Credit Hours 15

Program Requirements

All department majors must earn a C or better in all courses required in the program, including courses used to complete Area F in the core and Related Field Courses. All majors are required to take an exit examination (the Major Field Test for their respective field) prior to graduation.

International Studies B.A.

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses (p. 248) in Area A1 through Area E.

The Bachelor of Arts program in International Studies is designed to provide students with a basic knowledge of world affairs and how they affect U.S. foreign and domestic policies. One of the main objectives of this program is to prepare students to cope realistically and intelligently with the changing world, a world which is becoming increasingly interdependent and in which vast new multiplications of cultural forces are emerging.

Major Requirements 1

International Studies Core:

- INTS 3130 Contemporary World Cultures 3
- INTS 3230 Global Issues 3
- INTS 4630 Seminar in International Studies 3

Twenty-seven (27) credit hours within the major will be used to fulfill the emphasis requirements. Students will choose five courses from one of the three topical emphases, and one course each from two of the four regional emphases, and one course from the theory emphasis. 2

Topical Emphasis - Select one area 15

1. Development, Aid, and Sustainability
2. Security, Conflict, and Diplomacy
3. Societies, Cultures, and Traditions

Regional Emphasis - Select two areas 9

1. Asia
2. Africa
3. Latin America
4. Europe

Theory Emphasis 3

Minor

Select 15 credit hours of foreign language 15

Electives or Internship

Select 9 credit hours of Electives or Internship 9

Total Credit Hours 124

1 Note: Students must earn a minimum grade of “C” in all INTS designated courses and all courses within the major requirements.
2 The list for Topical, Regional, and Theory Emphases are available in the Center for International Studies in the Forest Drive Building.

Note: Students must earn a minimum grade of “C” in all INTS designated courses and all courses within the major requirements.

Honors in International Studies

To graduate with Honors in International Studies, a student must:

- be admitted to the University Honors Program;
- successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Political Science Minor

Political Science Electives:
- POLS 4134 International Law and Diplomacy
- POLS 4135 International Organizations
- POLS 4138 International Terrorism
- POLS 4238 International Conflict
- POLS 4239 Politics and the Military
- POLS 4240 Asian Regional Security
- POLS 4510 National Security of the Developing South
- POLS 4550 Insurgency and Civil War
- POLS 4570 Politics and Security in Southwest Asia
- POLS 4580 Violent Non-State Actors

Political Theory:
- POLS 3230 Modern Political Thought
- POLS 3336 Ancient Political Thought
- POLS 3340 Pol & Ideol/Contemporary Euro
- POLS 3350 Classics Of Political Thought
- POLS 4130 American Political Thought
- POLS 4139 Contemporary Political Thought
- POLS 4300 Religion & Political Thought
- POLS 4330 Liberalism and the Modern State
- POLS 4530 Marxism, Socialism, and Democracy
- POLS 4534 Feminist Political Thought

Students may select one of the following two options (12 credit hours):

Option 1: Students may elect an emphasis by taking four (4) additional courses (12 credit hours) from any one area of study above, plus a senior seminar in the corresponding emphasis area, or students interested in legal studies may select four courses (12 credit hours) from the list of classes below for an emphasis in Legal Studies.

Legal Studies:
- POLS 3101 Moot Court I
- POLS 3102 Moot Court II
- POLS 3137 Judicial Politics
- POLS 3138 Constitutional Law: Government Powers
- POLS 3139 Constitutional Law: Civil Liberties and Civil Rights
- POLS 3150 The Supreme Court
- POLS 3232 Philosophy of Law
- POLS 3239 Human Rights in International Relations
- POLS 3338 Language and Law
- POLS 3438 Gender and the Law
- POLS 3551 Introduction to United Nations
- POLS 4134 International Law and Diplomacy
- POLS 4135 International Organizations
- POLS 4190 Environmental Laws and Regulations
- POLS 4438 Legal Reasoning and Writing
- POLS 4440 Immigration Law and Policy
- POLS 4583 Theories Of Justice

Option 2: Students may select (4) courses (12 credit hours) of Upper Division Political Science Electives from any of the above listed classes or the courses listed below:

Political Science Electives:
- POLS 3231 Environmental Politics
- POLS 3237 African American Politics
- POLS 3334 Film and Politics
- POLS 3338 Language and Law

Other Program Requirements
- Majors must earn a minimum grade of “C” in Introduction to Political Science (POLS 2101), Introduction to Political Analysis (POLS 2130), and all upper level POLS courses.

Honors in Political Science
To graduate with Honors in Political Science, a student must:
- be admitted to the University Honors Program;
- successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Advisement
All Political Science majors, including students in the UHP, are advised by an advisor in the Carroll Building, Room 2244.

Department of Psychology
The Department of Psychology is dedicated to student instruction, serving the community, and the discovery of knowledge through empirical research. The department houses classrooms, laboratories, and equipment for study and research in the areas of sensation...
and perception, cognition, physiological psychology, developmental psychology, social psychology, psychology of religion, and clinical psychology.

The mission of the Psychology B.S. degree program is 1) to provide students with a course of study that reflects both the breadth and depth of the various fields of psychology and, consistent with Georgia Southern University's mission, and 2) to inspire students to be sensitive to cultural issues and individual differences, bridge scientific theory to practice, and promote personal and professional growth. This mission will be accomplished by providing students with a high-quality education about psychology, opportunities for experiential learning, and mentorship.

Students earning the B.S. in Psychology will:

1. recognize and respect the complexity of sociocultural diversity and individual differences;
2. recognize, compare, and apply information from the core domains of psychology (i.e., developmental, physiological, cognitive, social, learning, and abnormal psychology);
3. recognize, apply, and evaluate the fundamental methods and statistics of psychological science;
4. recognize the value of psychology in professional and personal domains.

**Program Progression Requirements**  
- Students must earn a minimum grade of "C" in all required PSYC courses.  
- Students must earn a minimum grade of "C" in all Related Field courses.  
- Students must earn a minimum grade of "C" in all prerequisite courses before enrolling in the advanced course.

**Honors in Psychology**  
To graduate with honors in Psychology, a student must:  
- be admitted to the University Honors Program;  
- successfully complete the honors courses sequence (see advisor for details);  
- complete and present an Honors Thesis;  
- be in good standing in the University Honors Program at the time of graduation.

**Advisement**  
All Psychology majors, including students in the UHP, are advised by advisors in Brannen Hall (Statesboro Campus students) or in the Student Success Center (Armstrong Campus students).

**Psychology B.S.**  
**Degree Requirements: 124 Credit Hours**

The Psychology Minor is open to any non-Psychology major. Coursework may not be counted towards the Applied Behavior Analysis, Mental Health, Organizational Psychology, or Neuroscience Minor.

Department of Sociology and Anthropology

In the Department of Sociology and Anthropology, students will gain the knowledge and skills to make a difference in their community and in the world. An education grounded in sociology or anthropology empowers students to explore the world - it gives them the vision to know the questions to ask, the research tools to find the answers to those questions, and the skills to turn the findings into social solutions.

Students in the department gain real-life, job-related experience while they earn their degree.

A student graduating with a B.A. degree in Anthropology will be able to:

1. identify and analyze appropriate research literature from scholarly sources in anthropology;
2. cite sources according to the American Anthropological Association’s guidelines;
3. identify, describe, and apply a reasonable subset of theoretical paradigms from within anthropology’s four fields;
4. describe and explain key research methods of each subfield of anthropology, relate comparative values of various methods within each subfield, and be able to determine which methods should be practiced in a given research project;
5. construct a meaningful anthropological research question, taking into account time frame, region, cultural group, and an element of change or development;
6. explain and analyze examples of ethical and legal issues in anthropology;
7. design and write up an original, theoretically informed research proposal and/or project;
8. demonstrate the ability to write up work in an organized and coherent fashion;
9. connect elements of all four fields of anthropology into a holistic, comparative, culturally relevant framework;
10. demonstrate the ability to orally present work in an organized and coherent fashion; and
11. assess career avenues and/or educational opportunities grounded in an anthropological background.

A student graduating with a B.S. degree in Sociology will be able to:

1. define sociological perspectives, apply them in their analysis of concrete situations, and apply them in their empirical data collection and data analysis;
2. understand the role of theory in sociology; and
3. understand the role of evidence and qualitative and quantitative methods in sociology.

Major Requirements

**REQUIRED: ALL Students must take the following courses:**

- ANTH 3431 Linguistic Anthropology
- ANTH 3532 Frameworks for Anthropology
- ANTH 4630 Capstone Seminar in Anthropology

Then the student can choose from one of the three following tracks:

**Option 1: Archaeology field experience**

Students in the Archaeology field experience Track must take:

- ANTH 4131 Archaeological Methods and Theory

Then the student should choose 12 hours from the following upper division courses and 6 hours from the Internship Experience track:

- ANTH 3130 Fire, Stone, Hide and Bone
- ANTH 3133 Southeastern Prehistory
- ANTH 3134 Material Culture
- ANTH 3136 Historical Archaeology
- ANTH 3137 Foraging to Farming
- ANTH 3138 Contact: Worlds Collide
- ANTH 3150 Public Archaeology
- ANTH 3250 Forensic Anthropology
- ANTH 3280 Primate Social Behavior and Ecology
- ANTH 4134 Archaeological Curation
- ANTH 4135 Advanced Archaeo Analysis
- ANTH 4136 Potsherds to Pixels: Digital and Spatial Technologies for Archaeologists
- ANTH 4137 Archaeologies of Conflict
- ANTH 4138 Zooarchaeology
- ANTH 4150 Environmental Archaeology
- ANTH 4230 Paleoanthropology
- ARCH 3092 Selected Topics in Archaeology

AND a total of 9 hours field experience:

- ARCH 4732 Archaeology Field Session

**Option 2: Internship experience**

Students in the Internship experience track must take:

- ANTH 4334 Ethnographic Methods

Then the student should choose 12 hours from the courses listed below, and 6 hours from the archaeology track:

- ANTH 3091 Selected Topics Anthropology
- ANTH 3332 European Cultures
- ANTH 3333 Native Peoples of North America
- ANTH 3334 Native Peoples of the Southeast
- ANTH 3335 Caribbean Cultures
- ANTH 3350 Anthropology of Adornment
- ANTH 4331 Anthropology and Human Problems
- ANTH 4332 Anthropology of Sex and Gender
- ANTH 4336 Medical Anthropology
- ANTH 4338 Reading Culture
- ANTH 4340 Anthropology of Foodways
- ANTH 4350 Sorcery, Demons and Gods
- ANTH 4432 Language and Culture
- ANTH 4433 Anthropology of Language and Gender
- ANTH 4434 Life Cycle of Language
- APAN 3093 Selected Topics in Applied Anthropology

AND a total of 9 hours of internship experience:

- APAN 4790 Internship in Anthropology

**Option 3: Four field anthropology**

Students in the Four field anthropology track must take:

- ANTH 3091 Selected Topics Anthropology
- ANTH 3332 European Cultures
- ANTH 3333 Native Peoples of North America
- ANTH 3334 Native Peoples of the Southeast
- ANTH 3335 Caribbean Cultures
- ANTH 3350 Anthropology of Adornment
- ANTH 4331 Anthropology and Human Problems
- ANTH 4332 Anthropology of Sex and Gender
- ANTH 4336 Medical Anthropology
- ANTH 4338 Reading Culture
- ANTH 4340 Anthropology of Foodways
- ANTH 4350 Sorcery, Demons and Gods
- ANTH 4432 Language and Culture
- ANTH 4433 Anthropology of Language and Gender
- ANTH 4434 Life Cycle of Language
- APAN 3093 Selected Topics in Applied Anthropology

AND a total of 9 hours field experience:

- APAN 4790 Internship in Anthropology
In the four field option, the student must take one of the methods courses (Archaeological Methods and Theory OR Ethnographic Methods) and then choose 9 hours from each of the two tracks.

**Electives**

For Options 1 & 2 students should choose 6 hours of free electives. For Option 3 students should choose 15 hours of free elective, which can include up to six hours of field session or internship.

**Minor - Required**

Select 15 credit hours of Minor courses

Total Credit Hours: 15

**Other Program Requirements**

- A minimum grade of “C” in required Anthropology courses; “C” average for all Anthropology courses with maximum of one “D” included; a maximum of 9 hours can be taken either for the Archaeology Field Session or for the Internship in Anthropology; or for a combination of the Archaeology Field Session and the Internship in Anthropology.

**Honors in Anthropology**

To graduate with Honors in Anthropology, a student must:

- be admitted to the University Honors Program;
- successfully complete one credit hour of HONS 4610 during their first semester in the departmental honors program, and at least two credit hours of HONS 4999 after HONS 4610 and before graduation (normally one during each of the last semesters enrolled);
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Three UHON hours can be applied toward the required hours in either track of the major. The three hours of UHON credit can be substituted in the major for the capstone course, if the student is in good standing with their thesis mentor during the spring semester of their senior year.

**Advisement**

Sociology and Anthropology majors, including students in the UHP, are advised by an advisor located in the Carroll Building, Room 1087. If you have questions about advisement, don’t hesitate to contact the anthropology advisor at (912) 478-7740.

Minor Program

Department of Public and Nonprofit Studies

The Department of Public and Nonprofit Studies serves as the focal point for scholarship, teaching, and service in the fields of Public Administration and Public Policy. The department was founded with the mission to advance excellence in public and nonprofit management education.

The minor in Public Administration is designed for undergraduate students who are interested in the study and practice of public and nonprofit management. The minor is comprised of courses focusing on issues related to the delivery and management of public programs, public policy analysis, leadership and innovation management, budgeting and financial management, administrative law, and civic engagement and responsibility. Students from all majors are welcomed and encouraged to boost their
career options within government, nonprofit, and corporate institutions with this applied and strategic minor.

Students completing the minor in Public Administration will be able to:

1. define major theories underlying the field of public administration and public administrators' role in American democracy.
2. identify the core mechanisms of public administration, including the organization and management of human and financial resources.
3. describe and explain the structure and components of the public and nonprofit sectors.
4. recognize and focus on ethical problems, develop and refine appropriate methods of moral reasoning, and be sensitive to the nuances and ambiguities of ethical situations.
5. formulate a public policy response to a "real world" social or economic problem.
6. discuss the political, economic, legal, and social environments of public policy and administration.
7. discuss various leadership styles and explain how differing styles impact organizational outcomes.

School of Human Ecology

The School of Human Ecology has a long history of serving a diverse cross-section of the public through its programs, centers, laboratories, and community involvement. The faculty share in a network of responsibility that provides students with a basis for reinterpreting the traditions of Human Ecology to meet the current and future challenges in their families, communities, and the marketplace. At the core of instruction is the faculty's concern for the student's professional growth, leadership development, ethical awareness, and well being as productive citizens.

Applied learning is the hallmark of all majors in Human Ecology. The strength of the curriculum is the multi-disciplinary foundation of each of the specialties that come together with a coordinated and integrated focus. Students will develop as professionals, providing leadership in a diverse, global marketplace which emphasizes technical, interpersonal, and people management skills. The integration of the disciplines within Human Ecology will empower students to enhance the well-being of individuals, families, and communities.

Program Admission Criteria in Interior Design

Minimum Program Admission Criteria

In order to be considered for admission into the Interior Design Program, the applicants must meet the following minimum requirements:

1. Attain admission to Georgia Southern University.
2. If a student is a declared major in an area other than interior design, he/she must complete the change of major form online. This form will initiate the process for getting student's current advisement records and folder sent to the CBSS advising center.
3. Have a minimum of first semester sophomore status (30 credit hours completed) upon applying for the program.
4. Achieve a minimum total overall institution GPA of 2.25 or better on all course work attempted (transfer course work and work completed at Georgia Southern University are considered).
5. Complete the following Area F courses with a minimum grade of "C":

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>TCM 3333</td>
<td>Building Codes</td>
<td>3</td>
</tr>
</tbody>
</table>

6. By the end of the first year students shall have:
   a. Submitted copies of college transcripts for all work completed to date
   b. Attended an orientation session with Interior Design Faculty (either Fall or Spring Semester of the first year).

7. Students transferring in with an Interior Design Major from other schools are required to have their portfolio and transcript(s) evaluated by the Interior Design Program Coordinator who is responsible for determining which design courses remain to be taken and which design courses are eligible to receive transfer credit hour. Adequate
time must be allowed for scheduling, review and notification. Please contact the program coordinator to schedule an appointment.

**Honors in Interior Design**

To graduate with Honors in Interior Design, a student must:

- be admitted to the University Honors Program;
- successfully complete at least three credits of HONS 4610 over three semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

**Application for Admission to the Interior Design Program**

The following completed Admission Package must be turned in by the application deadline in order for the candidate to be considered:

1. Official Application
2. Letter of Intent
3. Verification of grades with official transcripts of all schools attended including this university (WINGS accepted); mid-term verification of grades for all required courses in process. (Students may be in the process of taking Drawing I (ART 1010) or 2D Art and Design Foundations (ART 1020) and will be required to submit a mid-term grade from the professor. Final acceptance is contingent upon the final grade received in the course.)
4. Mid-term verification card: contains mid-term grade verification and signature of professor for all Area F courses where student is enrolled in the same semester as application (final acceptance into the program is based on final grade in all currently enrolled course). Midterm grade cards can be obtained from the secretary in building 211.

**Application Deadlines**

**Fall**

- All applications are due by 4:30pm the Friday following the last day to withdraw (October)
- Students applying during the fall semester will begin the program and the first studio course the next consecutive semester (spring)

**Spring**

- All applications are due by 4:30pm the Friday following the last day to withdraw (March)
- Students applying during the spring semester will begin the program and the first studio course the next consecutive semester (fall)

**Program Progression Requirements**

Students must earn a minimum grade of “C” in all courses within the major requirements including remaining Area F courses.

1. Students must complete the courses in sequence and complete all prerequisites. If a course is dropped or failed, then the student will be out of sequence and graduation will be delayed. These students may have to reapply to the major depending on circumstances, availability of space, and time elapsed between classes.
2. Majors that drop from the program due to personal reasons and wish to reapply at a later date must have courses and skills reevaluated to determine eligibility for the current curriculum and program.

**NOTE:** Students transferring into the Interior Design major from other majors or from other institutions may not be able to graduate necessarily within the traditional four-year period.

**Advisement**

For additional information, contact the College of Social and Behavioral Sciences Student Services Center.

The Interior Design Program is accredited by the Council for Interior Design Accreditation (CIDA) and the National Association of Schools of Art and Design (NASAD).

**Recreation and Tourism Management Minor**

**School of Human Ecology**

Chair, School of Human Ecology

Business

The College of Business at Georgia Southern University is part of a comprehensive, regional university. At the undergraduate level, we provide the Bachelor of Business Administration degree with majors in accounting, economics, finance, information systems, logistics and intermodal transportation, management, and marketing. At the graduate level, we provide the Master of Business Administration, online MBA, Master of Accounting, WebMACC, and online Master of Science in Applied Economics degrees to prepare students for accounting and management positions of significant responsibility. Our degree programs are accredited by the AACSB, an affiliation that underscores the College’s dedication to continuous improvement and commitment to excellence. Our accounting programs hold separate AACSB accreditation.

Mission

The College of Business seeks to produce career-ready professionals by offering a broad array of high quality undergraduate and select graduate programs within a learning environment characterized by inspired teaching, relevant research, and meaningful service. We search for new knowledge, both theoretical and practical, and insightful learning opportunities for our students, guided by common values of continuous improvement, excellence, integrity, accountability, respect, and sustainability.

Teaching in the College of Business:

We endeavor to prepare career-ready professionals. This motivates our teaching. We equip students with the knowledge, critical thinking skills, and relevant tools for professional success. Our curriculum is driven by and evolves with informed theory and best practices. The learning environment, created within the classroom and beyond attracts students to the College and inspires them to learn. This rich learning environment creates demand for our graduates.

Research in the College of Business:

Our desire to produce career-ready professional motivates the growth of our intellectual capital through rigorous and meaningful inquiry. Our scholarship supports our distinctiveness and represents the source of our expertise in the classroom and in the academic and business communities. We value scholarship that informs theory, practice and teaching. Our inquiry is validated through a diverse portfolio of scholarly and professional activities.

Service in the College of Business:

Service is a professional activity and is an important way by which we renew ourselves. We value service activities that leverage our position and expertise as teacher-scholars and researchers. Service provides benefits for our students, the professions they will enter, and the brand, the College or University. Because not all service activities are equal, we assess and recognize our service in terms of its overall impact.

College Structure

- Department of Economics (p. 131)
- Department of Finance (p. 133)
- Department of Information Systems (p. 135)
- Department of Logistics and Supply Chain Management (p. 139)
- Department of Management (p. 141)
- Department of Marketing (p. 145)
- School of Accountancy (p. 148)

Student Learning Outcomes

The faculty and staff of the College of Business are committed to providing academic programs that will enable our graduates to:

1. Solve problems using concepts across the disciplines within the College of Business.
2. Interpret the business implications of global and cultural diversity.
3. Recognize the importance of ethical business practices.
4. Be effective communicators.
5. Use data to support informed business decisions.

Experiential Learning Opportunities

Internships

Internship opportunities are available through the Office of Experiential Learning and Student Engagement, located in the College of Business on the Statesboro campus. Internships are supervised work-study programs, designed to allow upper division students an opportunity to receive practical experience in their chosen field of study. Prerequisites include junior standing, a review of academic qualifications, and approval of the director. Students should contact Director Danielle Smith for further information.

Location: Room 1101A, College of Business, Statesboro campus
Telephone: (912) 478-6047
Email: daniellesmith@georgiasouthern.edu

Cooperative Education

Co-ops allow students the opportunity to gain work experience related to their academic major while earning a salary. To participate in a cooperative education opportunity, a student must have completed at least 30 credit hours of instruction, have a grade point average of at least 2.5, and be willing to participate in a minimum of two alternating co-op work semesters. Work responsibilities and salaries are determined by the employer. Co-op students register for the designated Cooperative Education section. This is a non-credit course.

B.B.A. Specific Requirements

- BBA majors enrolling in upper division business courses for the first time must have completed or be concurrently enrolled in Principles of Accounting II (ACCT 2102) and Principles of Microeconomics (ECON 2106).
- BBA degrees require 24 credit hours of coursework under the heading “Specific Requirements Beyond Areas A1-F” and another 24 under the heading “Major Requirements” for a total of 48 credit hours of courses related to the major. In addition to University graduation requirements, at least half of this 48 credit hour total (i.e., 24 credit hours) must be taken at Georgia Southern for a BBA student to qualify for graduation.
- To qualify for graduation, BBA students must:
  a. make a minimum grade of “C” in all courses used to satisfy their “Major Requirements” and
  b. make a minimum grade of “C” in all courses in Area F as well as in the business core courses:

Department of Economics

Economics

This major is designed to give the student in business a broad knowledge of economic tools to provide a foundation for careers in business, economics, finance, or law.

Economics Major Without an Area of Emphasis

An economics major exposes the student to the different areas of economics. Because of the breadth of this degree, it allows maximum flexibility and prepares graduates to enter a wide variety of occupations or attend professional or graduate school in business, economics, finance, government, or law. Economics majors also have the option of receiving either the Bachelor of Arts or the Bachelor of Business Administration degree.

Emphasis in International Business

This curriculum prepares the student to access and respond to opportunities and problems of international trade, international finance, multinational markets, and multinational organizations.

Honors in Economics

To graduate with Honors in Economics, a student must:

- be admitted to the University Honors Program;
- successfully complete Research Seminar (BUSA 3610) and Business Seminar (BUSA 3620);¹
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Honors students in the College of Business are strongly encouraged to take Honors classes where appropriate.

¹ Note: Research Seminar (BUSA 3610) and Business Seminar (BUSA 3620) together count toward a business degree program as 3 hours of free elective credit, meaning that business honors students have 3 hours less of free elective credit towards their degree than non-honors business students.

Department of Finance

Finance

Study in this area develops familiarity with the institutions and instruments within our financial system and an understanding of the problems of financing business activity. The finance major includes the study of the techniques and tools for solving financial problems. The curriculum
is flexible, exposing students to general areas of applied financial management.

Survey of Accounting (ACCT 2030) or Financial Accounting (ACCT 2101) should be satisfied before any upper-division course is taken. Course selections should be approved by a faculty advisor.

Department of Information Systems

Information Systems
The Information Systems (IS) degree program combines knowledge of leading edge information technologies with an understanding of the ever changing needs of today’s dynamic business environment. As such, it attracts students who are interested in working with technology to find solutions to business problems. While a fundamental understanding of information technology is a cornerstone of the degree, an equally important and distinguishing element of the IS degree is a solid foundation in basic business functions. Students may major in IS without an area of emphasis or may select one of the following three emphasis areas.

Business Intelligence
The BI emphasis focuses on the use of information technology to identify trends and hidden patterns in an organization’s data and external environment, and then predicts how these trends and patterns will impact the organization’s activities and ultimate success. Students pursuing this emphasis will be prepared to assist companies in the identification and development of competitive strategies, as well as in the management of corporate knowledge. Potential employers include a wide array of medium and large businesses across all types of industries.

Enterprise Resource Planning Systems
The ERP emphasis focuses on large, complex information systems that integrate business processes across an entire organization. Because the number of IS professionals with these skills is low, this is a high-demand area. Students pursuing this emphasis will be prepared to assist companies in the selection, implementation, and support of such systems. Potential employers include consulting companies, ERP developers, as well as thousands of companies that adopt or wish to adopt ERP systems.

Students who pursue an emphasis in the area of Business Intelligence or Enterprise Resource Planning Systems may receive an SAP Student Recognition Award certificate and be eligible for SAP’s TERP-10 Certification program.

Enterprise Security
The ES emphasis focuses on the development and administration of security policies as they pertain to the management of information systems. Students pursuing this emphasis will be prepared to assist companies in the design, implementation, and management of secure information systems and networks. In today’s security-conscious world, virtually every organization is a potential employer of students who pursue this option.

Department of Logistics & Supply Chain Management
(912) 478-1498, or
College of Business Student Services Center

The Business Analytics minor is an ideal course of study for business and non-business students seeking a comprehensive introduction to the emerging field of business analytics.

Prerequisite(s)
For business students:

ACCT 2101  Financial Accounting  3
ACCT 2102  Managerial Accounting  3
BUSA 3131  Business Statistics  3
CISM 2530  Advanced Business Applications  3
ECON 2106  Principles of Microeconomics  3
Total Credit Hours 15

For students with declared majors in other colleges:

BUSA 3131  Business Statistics  3
or STAT 2231  Introduction to Statistics I  3
MATH 2130  Discrete Mathematics  3
Total Credit Hours 6

Minor Program

BUSA 3132  Applied Statistics and Optimization  3
BUSA 4133  Modeling and Analytics  3
CISM 3133  Database Management  3
or CSCI 3432  Database Systems  3
or IT 3233  Database Design and Implementation  3
CISM 4237  Business Intelligence  3
or IT 4136  Knowledge Discovery and Data Mining Knowledge Discovery and Data Mining  3
or CISM 4437  Data Mining for Business Analytics  3

Select one of the following:

BUSA 4134  Advanced Decision Analysis and Optimization  3
Enterprise Resources Planning (ERP) Systems Minor

The ERP Systems minor is an ideal course of study for business and non-business students seeking a comprehensive introduction to enterprise systems. It provides a course of study leading to the SAP University Alliances Student Recognition Award and satisfies eligibility requirements for participating in the SAP TERP10 Student Certification Academy.

Two upper-division CISM courses (6) OR one upper division CISM course (3) and one upper division (3) course in a closely-related discipline as approved by the Information Systems Department Chair

Electives

Select 6 credit hours of Electives (should be chosen in consultation with the student’s advisor) unless ECON 2105 and/or MATH 1232 used to meet requirements in Area A-E, in which case students will take up to 12 credit hours of electives

Honors in Information Systems

To graduate with Honors in Information Systems, a student must:

- be admitted to the University Honors Program;
- successfully complete Research Seminar (BUSA 3610) and Business Seminar (BUSA 3620);
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Honors students in the College of Business are strongly encouraged to take Introduction to Business (BUSA 1105), Principles of Macroeconomics (ECON 2105), Financial Accounting (ACCT 2101), Managerial Accounting (ACCT 2102), Legal Environment of Business (LSTD 2106), and Advanced Business Applications (CISM 2530).

1 Note: BUSA 3610 and BUSA 3620 together count toward a business degree program as 3 hours of free elective credit, meaning that business honors students have 3 hours less of free elective credit towards their degree than non-honors business students.

Electives

Select 3 credit hours of Electives (should be chosen in consultation with the student’s advisor) unless ECON 2105 and/or MATH 1232 used to meet requirements in Area A-E, in which case students will take up to 9 credit hours of electives.

Honors in Information Systems

To graduate with Honors in Information Systems, a student must:
• be admitted to the University Honors Program;
• successfully complete Research Seminar (BUSA 3610) and Business Seminar (BUSA 3620);¹
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Honors students in the College of Business are strongly encouraged to take Introduction to Business (BUSA 1105), Principles of Macroeconomics (ECON 2105), Financial Accounting (ACCT 2101), Managerial Accounting (ACCT 2102), Legal Environment of Business (LSTD 2106), and Advanced Business Applications (CISM 2530).

1 Note: BUSA 3610 and BUSA 3620 together count toward a business degree program as 3 hours of free elective credit, meaning that business honors students have 3 hours less of free elective credit towards their degree than non-honors business students.

CISM - Three 3000-level (or higher) electives for which the prerequisites are met 9
Total Credit Hours 15-18

Department of Logistics and Supply Chain Management

Logistics and Intermodal Transportation
Logistics and Intermodal Transportation (LIT) is a degree program that leverages the University’s proximity to the Port of Savannah and Hartsfield Jackson International Airport. LIT serves the needs of dynamic industry sectors. A degree in Logistics and Intermodal Transportation prepares students for the many jobs available in this challenging and rapidly expanding field. Basic LIT courses focus on logistics and transportation concepts and principles. Advanced courses focus on logistics operations, international logistics, and intermodal distribution issues. Internships are typically available and strongly recommended for qualified students.

Operations Management
Operations Management (OM) is an emphasis area in the Management major. The OM emphasis prepares students for a variety of positions in both manufacturing and service supply chains. Courses are designed to prepare not only for a first job after graduation but also for one’s whole career. The program seeks to develop critical thinking skills and opportunities to apply these skills in operations strategy, demand and supply planning, service operations, six sigma and continuous improvement, strategic sourcing and negotiations, inventory management, global supply networks, and supply chain analytics. Students are also encouraged to pursue internships as part of their studies.

LOGT 4234 Analytical Tools in Logistics
Management Major Without an Area of Emphasis

This major is intended to expose students to entrepreneurship, hospitality management, human resources, and operations management, as well as general management principles and practices.

Emphasis in Entrepreneurship and Innovation

This Hospitality Program is designed to prepare students for careers in Restaurant or Hotel Management. Upon the completion of course work a semester long paid internship is required. This is intended to give students hands-on experience to complement their studies and to serve as a bridge to help start their careers.

Emphasis in Hospitality Management

This Hospitality Program is designed to prepare students for careers in Restaurant or Hotel Management. Upon the completion of course work a semester long paid internship is required. This is intended to give students hands-on experience to complement their studies and to serve as a bridge to help start their careers.

Emphasis in Human Resource Management (HRM)

The human resource management emphasis allows a student to specialize in the study of personnel administration and human resource management. While this emphasis is especially appealing to individuals whose career aspirations are focused on working in the human resources management areas, the collection of courses included in this emphasis are relevant to managers in all areas of today’s organizations.

Electives

non-MGNT elective courses in COBA may be substituted upon approval by Chair of Department of Management
Select 6 credit hours of Electives (should be chosen in consultation with the student’s advisor) unless ECON 2105 and/or MATH 1232 are used to meet requirements in Areas A-E in which case students will take up to 12 credit hours of Electives.

Honors in Management

To graduate with Honors in Management a student must:

• be admitted to the University Honors Program;
• successfully complete Research Seminar (BUSA 3610) and Business Seminar (BUSA 3620);¹
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Honors students in the College of Business are strongly encouraged to take Introduction to Business (BUSA 1105), Principles of Macroeconomics (ECON 2105), Financial Accounting (ACCT 2101), Managerial Accounting (ACCT 2102), Legal Environment of Business (LSTD 2106), and Advanced Business Applications (CISM 2530).

¹ Note: BUSA 3610 and BUSA 3620 together count toward a business degree program as 3 hours of free elective credit, meaning that business honors students have 3 hours less of free elective credit towards their degree than non-honors business students.

¹ May be satisfied by ACCT 2101 Financial Accounting (3) and ACCT 2102 Managerial Accounting (3)

Department of Marketing

Marketing
Preparation in this area will provide the student with an awareness of the marketing problems confronting today’s business firms, some knowledge and experience in application of the tools and techniques of marketing problem solving and a more detailed acquaintance with one or more specific areas of the marketing discipline. Students may choose to major in general marketing or in one of the three emphasis areas under marketing.

The Marketing Major Without an Area of Emphasis
The general marketing track is the most flexible and supports the largest number of career opportunities in the field of marketing.

Emphasis in Fashion Merchandising
The fashion merchandising emphasis is designed to provide the student with a broad knowledge of business and marketing while stressing the areas of retailing and fashion.

Emphasis in Retailing Management
The retailing management emphasis is for students interested in retail careers or in marketing positions where knowledge of retailing is important.

Emphasis in Sales and Sales Management
The sales and sales management emphasis is for the student interested in sales as an entry-level marketing position or in sales as a career.

Programs

Majors

### School of Accountancy

#### Accounting

According to the Association of International Certified Professional Accountants and the American Accounting Association “Accounting is the art of recording, classifying and summarizing in a significant manner and in terms of money, transactions and events, which are, in part at least, of a financial character and interpreting the result thereof.”. The accounting profession offers almost infinite opportunities for men and women to build exciting and rewarding careers. Technology is driving changes in the way business is done, which means more new opportunities for accounting professionals who are prepared to support organizations of all sizes and structures to harness the enormous potential of transactional information and the technologies used to capture and report that information. Accountants and auditors are the most trusted financial information professionals.

The accounting program at Georgia Southern University is one of only 189 accredited by the AACSB, the international business, and accounting accrediting organization.

Students are offered the following curriculum options:

#### 4-Year Track - BBA

The four-year program, BBA, prepares students for a wide range of professional careers in industry, finance, government, and non-profit organizations. This program includes accounting coursework that prepares students for work in areas such as fraud examination, financial management, financial reporting and analysis, internal auditing, data analytics and management consulting. Upon completion of the 4-year track, students receive the Bachelor of Business Administration degree. Students may want to also minor in another area of business to enhance their business skill sets. Many Accounting students find that Information
Systems is a very valuable added area of emphasis. Students should also consider completing the highly regarded Certificate in Fraud Examination.

5- Year Track – BBA & MAcc

The five-year professional accounting program, BBA plus MAcc, prepares students for careers in public accounting as certified public accountants (CPA). In order to become certified in the State of Georgia, candidates must have 150 credit hours of college education. During the last year of BBA coursework, highly qualified students apply for and are competitively admitted to the Master of Accounting program. During the fifth year, students complete 30 additional credit hours of accounting and graduate electives to complete their Masters’ level education. This curriculum is designed to prepare them for work as objective advisors for their clients, providing such services as auditing and assurance services, data analytics, sustainability and environmental accounting, forensic accounting, information technology services, international accounting, consulting services, government and not-for-profit financial services, personal financial planning, and tax advisory services. Graduate students in the MAcc also have the opportunity to earn a Certificate in Taxation and a Certificate in Forensic Accounting. Please refer to the graduate portion of the catalog for a detailed description of the Master of Accounting degree (p. 324) and Certificates.

WebMAcc

We also offer a highly ranked online Masters of Accounting called the WebMAcc as an alternative to the MAcc. The online program is taught by the same high-quality faculty who teach in our traditional on-campus Master of Accounting. More information is available in the Graduate catalog.

Electives

Select 6 credit hours of Electives (should be chosen in consultation with the student’s advisor) unless ECON 2105 and/or MATH 1232 are used to meet requirements in Areas A-E in which case students will take up to 12 credit hours of Electives

Total Credit Hours 124

Honors in Accounting

To graduate with Honors in Accounting, a student must:

• be admitted to the University Honors Program;
• successfully complete Research Seminar (BUSA 3610) and Business Seminar (BUSA 3620); ¹
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Honors students in the College of Business are strongly encouraged to take Introduction to Business (BUSA 1105), Principles of Macroeconomics (ECON 2105), Financial Accounting (ACCT 2101), Managerial Accounting (ACCT 2102), Legal Environment of Business (LSTD 2106), and Advanced Business Applications (CISM 2530).

¹ Note: BUSA 3610 and BUSA 3620 together count toward a business degree program as 3 hours of free elective credit, meaning that business honors students have 3 hours less of free elective credit towards their degree than non-honors business students.

School of Accountancy (SOA) Progression Requirements

1. Accounting majors must earn a minimum grade of “C” in all required accounting courses in order to progress in the accounting program.
2. A student may repeat a maximum of two required accounting courses.
3. Students will not be allowed to repeat an accounting course more than twice.
4. A student who earns a grade of “D”, “F”, or “W” in a required accounting course and wishes to continue in the major must write a letter directed to the SOA Director requesting permission to continue in the accounting major. Students should submit the letter a minimum of three weeks prior to the anticipated date of reentry into an accounting course. Requests to repeat a course are considered by the School of Accountancy Undergraduate Student Affairs Committee on an individual basis and the student is notified in writing of the decision of the Committee. The committee will consider input from the student’s
instructor(s) in making its decision and the submission of a letter requesting permission to retake the course constitutes permission for the committee to consult the instructor(s) for relevant information regarding the student’s performance in the course. If the approval is granted, the student may repeat the course at its next offering pending space availability.

5. Students given permission to repeat a required accounting course may be advised and/or required to complete a remedial study program to alleviate any areas of deficit identified by the student’s prior performance in the course. Denial of a request to repeat a required accounting course or a third failure to successfully complete a course (grade of “D”, “F”, or “W”) will result in the dismissal of the student from the accounting program/major.

6. Dismissal from the accounting program does not affect the ability of the student to progress in the College or the University in another major.

7. Students who are dismissed from the accounting program because they cannot enroll in a required accounting course (due to #2, #3 or #5) may appeal the program dismissal to the Dean of the College of Business or his/her delegate (Appeals Officer). Students who wish to appeal their dismissal should write a letter to the Appeals Officer requesting permission to continue in the accounting major.

8. Credit from Other Sources - A student is to obtain written permission from the SOA Director prior to registration for academic credit at other institutions or by independent study and will not be allowed to complete academic credit at other institutions for a course previously attempted at Georgia Southern University except in rare and exceptional circumstances.

9. Strict adherence to the American Institute of Certified Public Accountant’s Code of Professional Conduct is required of all accounting students. Failure to comply with these professional standards will result in review and action by the School of Accountancy faculty and could result in the student’s dismissal from the accounting program.

Requirements: 12 Credit Hours

This certificate program consists of 12 semester hours (4 courses) of undergraduate education designed to prepare future fraud investigators. The curriculum encompasses fraud examination, white-collar crime, the criminal justice system, fraud-related legal issues, and forensic interviewing and interrogation. Graduates pursue careers as federal, state and local law enforcement officers, internal auditors, loss prevention specialists, corporate security specialists, private investigators, and fraud control specialists.

Certificate Admission Criteria

Admission to the undergraduate Fraud Examination certificate program is open to all students of any major or discipline enrolled at Georgia Southern University. Students who wish to complete the certificate must declare their intentions to their Academic Advising Center.

Prerequisites

The prerequisites for enrolling in the undergraduate fraud examination course includes:

- Junior status (60 semester hours of credit), and
- Completion of Financial Accounting (ACCT 2101) for business majors, or Survey of Accounting (ACCT 2030) for non-business majors.
Education

Vision
We envision a College of Education that continues to grow in its national recognition for excellence and innovation in teaching, scholarship, and outreach; and becomes the choice for novice and experienced professionals desiring a high quality, flexible education to help them meet their individual intellectual and career goals.

Mission
The mission of the College of Education is to prepare students to teach, lead, counsel, and model life-long learning; engage in scholarship that provides new pathways to meet the needs of a dynamic, diverse society; and facilitate access to learning opportunities that are authentic, student-centered, and technology-rich.

College Structure
- Department of Curriculum, Foundations and Reading (p. 152)
- Department of Elementary and Special Education (p. 152)
- Department of Leadership, Technology and Human Development (p. 156)

Advising
Education majors are assigned to a professional advisor for program planning and course scheduling. On the Statesboro Campus advisors are located in the Student Success Center in the College of Education Building Room 1107. On the Armstrong Campus COE advisors are located in the Student Success Center. Since the College’s programs are developed to enable students to meet the certification requirements of the Georgia Professional Standards Commission, it is critical that students meet with their advisor to plan their program of study. All students must complete the core curriculum; however, in order to meet the requirements of the teaching field, professional education, and certification, it is advisable for students to declare an intent to major in education before the second semester of the sophomore year. Prior to admission into the Teacher Education Program, students are designated as non-certification education majors. For additional information or questions, contact Christina Thompson on the Statesboro Campus at (912) 478-0698 or cjthomp@georgiasouthern.edu, or Angela Mills-Fleming on the Armstrong Campus at (912) 344-2552 or amills@georgiasouthern.edu.

Department of Curriculum, Foundations and Reading

The Department of Curriculum, Foundations, and Reading provides a service function to all other programs in the College. Undergraduate and graduate level courses are offered in the areas of educational foundations, educational psychology, curriculum theory and development, reading education, and educational research. The Department also offers several graduate degree programs: a master’s degree program in reading education and in evaluation, assessment, research, and learning; an education specialist degree program in reading education; and a doctoral degree program in curriculum studies. In addition to degree programs, the department offers the reading endorsement and graduate certificates in applied research and evaluation and in curriculum and pedagogy for social justice.

Department of Elementary and Special Education

The Department of Elementary and Special Education at Georgia Southern University offers undergraduate degree programs that lead to initial teacher certification in the areas of elementary education (P-5), special education (P-12), and elementary education and special education combined (P-5). All three areas also offer non-certification tracks that provide students interested in education the opportunity to take coursework with planned minors and concentration. At the graduate level, the department offers initial certification Master of Arts in Teaching (M.A.T.) degrees in elementary education (P-5) and special education (P-12), Master of Education (M.Ed.) degrees in elementary education (P-5) and special education (P-12), with concentrations in either general or adaptive curriculum, Education Specialist (Ed.S) degrees in elementary education (P-5) and special education (P-12), and a Special Education Transition Specialist Endorsement. The department also offers an M.Ed. in Curriculum and Instruction that is part of a USG collaborative with Valdosta State and Columbus State Universities. Many graduate programs offered by the department are 100% online. All programs are based upon the concept of developmentally appropriate practices and value diverse, intensive field experiences in a range of grade levels and school settings.

Elementary Education B.S.Ed. (Certification Track)

Degree Requirements: 133 Credit Hours

Additional admission requirements must be met to enter the Elementary Education B.S.Ed. Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Elementary Education B.S.Ed. Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards Commission certification requirements will prepare an individual to gain teacher certification in Georgia.

**Program Admission Criteria**

See B.S.Ed. Teacher Education Admission Requirements

- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate

**Other Program Requirements**

- Must meet all requirements for retention in the Teacher Education Program and qualify for a Georgia Preservice Certificate
- Must earn a minimum grade of "C" on all courses in Area F of the Core, the teaching field, and professional education; earn an adjusted GPA of 2.75 or higher in the teaching field; and maintain overall cumulative GPA of 2.50 or higher
- Must successfully complete all field experiences
- Must take courses sequentially according to Area
- Courses in Area F must be taken prior to admission into the Teacher Education Program
- Take only one practicum course per semester
- Must meet requirements for admission to Student Teaching/Internship II, (See catalog section, Admission to Student Teaching)
- Must successfully complete assessments identified at each program transition point

**Honors in Elementary Education**

To graduate with Honors in Elementary Education, a student must:

- Be admitted to the University Honors Program;
- Successfully complete at least four credit hours of Honors Research Seminar Education (COED 3610) over four semesters;
- Successfully complete and present an Honors Thesis or Capstone Project;
- Be in good standing in the University Honors Program at the time of graduation.

**Advisement**

Each student in Elementary Education is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.
Special Education B.S.Ed. Professional Studies (Non-Certification Track)

Degree Requirements: 124 Credit Hours

The BSED degree with a major in Special Education-Professional Studies (Non-Certification Track) provides students who are interested in education the opportunity to take coursework with planned minors and concentrations. The degree allows for choice in several areas leading to a broad background. When accepted to the University all Special Education majors are placed in the Professional Studies (Non-Certification) track. This track does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification in Special Education will move into the BSED Special Education Certification Track.

See Core Curriculum for required courses in Area A1 through Area E.

Program Admission Criteria

- Must meet all University Admission Requirements.

Other Program Requirements

- Must choose Option 1, 2, or 3;
- Must identify a career path with their academic advisor.

To graduate with B.S.Ed. Professional Studies Elementary Education/Non-Certification, a student must:

- successfully complete the program of study as outlined in the catalog;
- be in good standing with a GPA of 2.0 or higher.

1 This program does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification will move into the B.S.Ed. Elementary Education, certification track.

Advisement

Each student in Elementary Education-Professional Studies (Non-Certification Track) is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.

Program Admission Criteria 1

Must meet all University Admission Requirements.

Other Program Requirements

- Must choose Option 1, 2, or 3;
- Must identify a career path with their academic advisor.

To graduate with B.S.Ed. Professional Studies Elementary Education/Non-Certification, a student must:

- successfully complete the program of study as outlined in the catalog;
- be in good standing with a GPA of 2.0 or higher.

1 This program does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification will move into the B.S.Ed. Elementary Education, certification track.

Advisement

Each student in Elementary Education-Professional Studies (Non-Certification Track) is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.
Other Program Requirements

- Must choose Option 1, 2, or 3;
- Must identify a career path with their academic advisor.

To graduate with B.S.Ed. Professional Studies Elementary Education/Non-Certification, a student must:

- successfully complete the program of study as outlined in the catalog;
- be in good standing with a GPA of 2.0 or higher.

1 This program does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification will move into the B.S.Ed. Elementary Education, certification track.

Advisement

Each student in Special Education-Professional Studies is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.

Special Education B.S.Ed. (Certification Track)

Degree Requirements: 124 Credit Hours

Additional admission requirements must be met to enter the Special Education B.S.Ed. Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Special Education B.S.Ed. Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards Commission certification requirements will prepare an individual to gain teacher certification in Georgia.

Department of Leadership, Technology and Human Development
The Department of Leadership, Technology, and Human Development offers a broad range of programs that provide school/system-wide and student-oriented support services for traditional and alternative settings. A diverse selection of graduate programs prepare school and community agency personnel in the areas of school and clinical mental health counseling, educational leadership, adult education, higher education administration, instructional technology, and school psychology. A doctoral degree program in educational leadership is also offered by this department. In addition to degree programs, the department offers the adult education certificate program, certificate programs in educational leadership, instructional technology and school library media, and the teacher leader and the online teaching and learning endorsements.

Department of Middle Grades and Secondary Education

The Department of Middle Grades and Secondary Education at Georgia Southern University offers a variety of programs to prepare teachers and provide advanced professional development. Programs at the undergraduate level include middle grades education (4-8); secondary education (6-12) with specializations in biology, chemistry, English, history, mathematics and physics; and health and physical education (P-12). The Master of Arts in Teaching (MAT) program offers initial teacher preparation in middle grades, health and physical education, and Spanish education, as well as secondary areas of business, biology, chemistry, economics, English, history, geography, mathematics, physics, and political science. The department offers Master of Education (M.Ed.) and Education Specialist (Ed.S.) degrees in middle grades and secondary education and an M.Ed. in Teaching Culturally and Linguistically Diverse Students. In addition to these degree programs, the department also offers an endorsement in English for Speakers of Other Languages (ESOL) and a certificate in Teaching Culturally and Linguistically Diverse Students.

Health and Physical Education
B.S.Ed. (Certification Track)

Degree Requirements: 124 Credit Hours

Additional admission requirements must be met to enter the Health and Physical Education B.S.Ed. Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Health and Physical Education B.S.Ed. Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards Commission certification requirements will prepare an individual to gain teacher certification in Georgia.

See Core Curriculum for required courses in Area A1 through Area E.

Program Admission Criteria

See B.S.Ed. Teacher Education Admission Requirements

- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program
- Must earn a minimum grade of “C” in all courses in Area F of the Core, the teaching field, and professional education; earn an adjusted GPA of 2.75 or higher in the teaching field, and maintain an overall cumulative GPA of 2.50 or higher
- Must successfully complete all field experiences
- Must take courses in proper sequence
- Must meet requirements for admission to Student Teaching (See catalog section, Admission to Student Teaching)
- Must successfully complete assessments identified at each program transition point

Honors in Health and Physical Education

To graduate with Honors in Health and Physical Education, a student must:

- be admitted to the University Honors Program;
- successfully complete at least four credit hours of Honors Research Seminar Education (COED 3610) over four semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Advisement

Each student in Health and Physical Education is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.
Middle Grades Education B.S.Ed. (Certification Track)

Degree Requirements: 133 Credit Hours

Additional admission requirements must be met to enter the Middle Grades Education B.S.Ed. Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Middle Grades Education B.S.Ed. Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards Commission certification requirements will prepare an individual to gain teacher certification in Georgia.

Health and Physical Education
B.S.Ed. Professional Studies (Non-Certification Track)

Degree Requirements: 124 Credit Hours

The BSED degree with a major in Health & Physical-Professional Studies (Non-Certification Track) provides students who are interested in education the opportunity to take coursework with planned minors and concentrations. The degree allows for choice in several areas leading to a broad background. When accepted to the University all Health and Physical Education majors are placed in the Professional Studies, (Non-Certification Track). This track does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification in Health and Physical Education will move into the BSED Health & Physical Education Certification Track.

See Core Curriculum for required courses in Area A1 through Area E.

**Major Requirements**

| Guided Electives | In consultation with the advisor student will select courses, minors and/or concentrations appropriate for the major at the 3000-4000 level | 44 |

**Total Credit Hours**

| 124 |

Program Admission Criteria

Must meet all University Admission Requirements

Other Program Requirements

- Must choose guided electives at the 3000-4000 level.
- Must identify a career path with their academic advisor

To graduate with B.S.Ed. Professional Studies Health & Physical Education/Non-Certification, a student must:

Program Admission Criteria

Must be admitted to the University Honors Program

Other Program Requirements

- Must successfully complete and present an Honors Thesis or Capstone Project
- Must be in good standing in the University Honors Program at the time of graduation.

Advisement

Each student in Middle Grades Education is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.

Honors in Middle Grades Education

To graduate with Honors in Middle Grades Education, a student must:

- be admitted to the University Honors Program;
- successfully complete at least four credit hours of Honors Research Seminar Education (COED 3610) over four semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Program Admission Criteria

See B.S.Ed. Teacher Education Admission Requirements.

Other Program Requirements

- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program and qualify for a Georgia Preservice Certificate
- Must earn a minimum grade of “C” in all courses in Area F of the Core, the teaching field, and professional education; earn an adjusted GPA of 2.75 or higher in the teaching field; and maintain an overall cumulative GPA of 2.50 or higher
- Must successfully complete all field experiences
- Must take courses in proper sequence
- Must meet requirements for admission to Student Teaching (See catalog section, Admission to Student Teaching)
- Must successfully complete assessments identified at each program transition point

Program Admission Criteria

See B.S.Ed. Teacher Education Admission Requirements.

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program and qualify for a Georgia Preservice Certificate
- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate
- Must successfully complete assessments identified at each program transition point

Program Admission Criteria

Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program and qualify for a Georgia Preservice Certificate
- Must successfully complete assessments identified at each program transition point
• successfully complete the program of study as outlined in the catalog;
• be in good standing with a GPA of 2.0 or higher

This program does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification will move into the B.S.Ed. Health & Physical Education certification track.

Advisement

Each student in Health and Physical Education-Professional Studies is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.

Middle Grades Education B.S.Ed. Professional Studies (Non-Certification Track)

Degree Requirements: 124 Credit Hours

The BSED degree with a major in Middle Grades Education-Professional Studies (Non-Certification Track) provides students who are interested in education the opportunity to take coursework with planned minors and concentrations. The degree allows for choice in several areas leading to a broad background. When accepted to the University all Middle Grades Education majors are placed in the Professional Studies, Non-Certification Track. This track does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification in Middle Grades Education will move into the BSED Middle Grades Education Certification Track.

Certification Track

Degree Requirements: 125 Credit Hours

Additional admission requirements must be met to enter the Secondary Education B.S.Ed. Concentration in History Education, Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Secondary Education B.S.Ed. Concentration in History Education, Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards Commission certification requirements will prepare an individual to gain teacher certification in Georgia.

See Core Curriculum for required courses in Area A1 through Area E.

Program Admission Criteria

See B.S.Ed. Teacher Education Admission Requirements

- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate.

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program;
- Must earn a minimum grade of "C" on all courses in Area F of the Core, the teaching field, and professional education; earn an adjusted GPA of 2.75 or higher in the teaching field; and maintain overall cumulative GPA of 2.50 or higher.
- Must successfully complete all field experiences.
- Must take courses in the proper sequence.
- Courses in Area F must be taken prior to admission into the Teacher Education Program.
SCED 3121 Planning and Instruction for Secondary Educators 2

HIST 3130 African American History to 1865 3
HIST 3131 African American History since 1865 3
HIST 3134 American Economic History 3
HIST 3135 US Foreign Relations to World War I 3
HIST 3139 History of Religion in the U.S. 3
HIST 3230 American Military History 3
HIST 3236 History of Latinos/as in the United States 3
HIST 3740 Women & Gender in Amer Hist 3
HIST 5130 American Indian History 3
HIST 5232 Working Class History in the United States 3
HIST 5233 The American City 3

Select one European History course from the following:
HIST 3338 Contemporary Europe 3
HIST 3431 Modern Britain: 1485 to the Present 3
HIST 3432 Modern Germany 3
HIST 3434 Modern European Thought 3
HIST 3435 The Scientific Revolution 3
HIST 3436 The Holocaust 3
HIST 3533 Modern East Central Europe 3
HIST 5236 Age of Revolutions in Europe and the Atlantic World 3

Select one Non-European History course from the following:
HIST 3200 Traditional China 3
HIST 3225 History of Ancient Near East 3
HIST 3234 The History of Islam in Southeast Asia 3
HIST 3251 The Muslim World Since Genghis Khan 3
HIST 3531 History of Africa since 1800 3
HIST 3532 The Modern Middle East 3
HIST 3534 Modern Southeast Asia 3
HIST 3538 Latin America since Independence 3

Total Credit Hours 125

Program Admission Criteria
See B.S.Ed. Teacher Education Admission Requirements

- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate.

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program.
- Must earn a minimum grade of "C" on all courses in Area F of the Core, the teaching field, and professional education; earn an adjusted GPA of 2.75 or higher in the teaching field; and maintain overall cumulative GPA of 2.50 or higher.
- Must successfully complete all field experiences.
- Must take courses in the proper sequence.
- Courses in Area F must be taken prior to admission into the Teacher Education Program.
- Take only one practicum course per semester.
- Must meet requirements for admission to Student Teaching, (see catalog section, Admission to Student Teaching).
- Must successfully complete assessments identified at each program transition point.

Honors in Secondary Education
To graduate with Honors in Secondary Education, a student must:

- be admitted to the University Honors Program;
- successfully complete at least four credit hours of COED 3610 Honors Research Seminar Education over four semesters;
- successfully complete and present an Honors Thesis or Capstone Project;
- be in good standing in the University Honors Program at the time of graduation.

Advisement
Each student in Secondary Education is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. E-Mail: cjthomp@georgiasouthern.edu.

Secondary Education B.S.Ed. (Emphasis in Mathematics Education - Certification Track)

Certification Track

Degree Requirements: 125 Credit Hours

Additional admission requirements must be met to enter the Secondary Education B.S.Ed. Concentration in Mathematics Education, Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Secondary Education B.S.Ed. Concentration in Mathematics Education, Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards
Program Admission Criteria

See B.S.Ed. Teacher Education Admission Requirements

- Must be admitted into the Teacher Education Program and qualify for a Georgia Preservice Certificate

Other Program Requirements

- Must meet all requirements for retention in the Teacher Education Program.

Honors in Secondary Education

To graduate with Honors in Secondary Education, a student must:

- Be admitted to the University Honors Program;
- Successfully complete at least four credit hours of COED 3610 Honors Research Seminar Education over four semesters;
- Successfully complete and present an Honors Thesis or Capstone Project;
- Be in good standing in the University Honors Program at the time of graduation.

Advisement

Each student in Secondary Education is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling. Telephone: (912) 478-0698. EMail: cjthomp@georgiasouthern.edu

Secondary Education B.S.Ed. (Emphasis Physics - Certification Track)

Degree Requirements: 125 Credit Hours

Additional admission requirements must be met to enter the Secondary Education B.S.Ed. Concentration in Physics Education, Certification Track (See B.S.Ed. Teacher Education Admission Requirements). Students seeking teacher certification are first admitted to the Professional Studies Secondary Education B.S.Ed. Concentration in Physics Education, Non-Certification Track. Upon meeting B.S.Ed. teacher education admission requirements at the completion of Area F, students will be admitted to the certification track. Successful completion of all program requirements and all Georgia Professional Standards Commission certification requirements will prepare an individual to gain teacher certification in Georgia.

Secondary Education B.S.Ed. - Professional Studies (Emphasis in Biology - Non-Certification Track)

Non-Certification Track

Degree Requirements: 124 Credit Hours

The BSED degree with a major in Secondary Education, Concentration in Biology Education-Professional Studies (Non-Certification Track) provides students who are interested in education the opportunity to take coursework with planned minors and concentrations. The degree allows for choice in several areas leading to a broad background. When accepted to the University all Secondary Education majors are placed in the Professional Studies, Non-Certification Track. This track does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification in Secondary Biology Education will move into the BSEd Secondary Education, Concentration in Biology Education Certification Track.

See Core Curriculum for required courses in Area A1 through Area E.

Guided Electives
See Option 1, 2, and 3 below to determine credit hours of guided electives 3-9

Major Requirements
Select one of the following options: 1

Option 1
Complete 9 credit hours of guided electives under professional education and two 15 credit hour minors related to Biology 39

Option 2
Complete 6 credit hours of guided electives under professional education and two 18 credit hours concentrations from the list below 39

Option 3
Complete 9 credit hours of guided electives under professional education and a combination of additional approved courses, a 15 credit hour minor, or an 18 credit hour concentration from the list below 39

Approved Concentrations

Total Credit Hours 124

1 The selected option must include at least 21 credit hours of upper division courses in Biology.

Program Admission Criteria
- Must meet all University Admission Requirements
- This program does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification will move into the B.S.Ed. Secondary Education, Concentration in Biology Education certification track.

Additional Program Requirements
- Must choose Option 1, 2, or 3
- Must identify a career path with their academic advisor

To graduate with B.S.Ed. Professional Studies Secondary Biology Education/Non-Certification, a student must:

- Successfully complete the program of study as outlined in the catalog;
- Be in good standing with a GPA of 2.0 or higher

Advisement
Each student is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling.

Guided Electives

See 1, 2, and 3 below to determine credit hours of guided electives

3-9

Major Requirements

Select one of the following options:

Option 1

Complete 9 credit hours of guided electives under professional education and two 15 credit hour minors related to Physics

30

Option 2

Complete 3 credit hours of guided electives under professional education and 36 credit hours of Physics related content

36

Option 3

The selected option must include at least 21 hours of upper division courses.

Program Admission Criteria

- Must meet all University Admission Requirements
- This program does NOT lead to teacher certification. Upon meeting teacher education program admission requirements, those seeking teacher certification will move into the B.S.Ed. Secondary Education, Concentration in Physics Education certification track.

Additional Program Requirements

- Must choose Option 1, 2, or 3
- Must identify a career path with their academic advisor

To graduate with B.S.Ed. Professional Studies Secondary Physics Education/Non-Certification, a student must:

- successfully complete the program of study as outlined in the catalog;
- be in good standing with a GPA of 2.0 or higher

Advisement

Each student in Professional Studies Secondary Physics Education is assigned to an advisor in the College of Education Student Success Center for program planning and course scheduling.

(912) 478-0698

cjthomp@georgiasouthern.edu

Undergraduate Program Approval and Unit Accreditation

The College of Education offers undergraduate teacher certification and non-certification programs. Programs are developed in collaboration with departments across the university and with professionals in the field of education. Each certification program has been approved by the Georgia Professional Standards Commission and accredited by the National Council for Accreditation of Teacher Education, and all programs are accredited by the Southern Association of Colleges and Schools.

Programs - Undergraduate

Certification Programs:

Art Education – B.S. Teacher preparation program offered by the Department of Art with certification through the College of Education (Armstrong Campus)

Elementary Education - B.S.Ed. with study concentrations in:

- Elementary Education (Armstrong and Statesboro Campuses)
- Elementary Education/Special Education Dual Certification (Statesboro Campus)
- Health and Physical Education - B.S.Ed. (Armstrong and Statesboro Campuses)
Music Education - B.M. Teacher preparation program offered by the Department of Music with certification through the College of Education (Armstrong and Statesboro Campuses)

Middle Grades Education - B.S.Ed. (Statesboro Campus)

Secondary Education - B.S.Ed. with study concentrations in:
- Biology Education (Statesboro and Armstrong Campuses)
- Chemistry Education (Statesboro and Armstrong Campuses)
- English Education (Armstrong Campus)
- History Education (Armstrong Campus)
- Mathematics Education (Statesboro and Armstrong Campuses)
- Physics Education (Statesboro Campus)

Special Education (Interrelated/Mild) - B.S.Ed. (Armstrong and Statesboro Campuses)

Non-Certification Programs:
- Elementary Education, Professional Studies (Statesboro and Armstrong Campuses)
- Health and Physical Education, Professional Studies (Statesboro and Armstrong Campuses)
- Middle Grades Education, Professional Studies (Statesboro and Armstrong Campuses)

Secondary Education, Professional Studies with study concentrations in:
- Biology Education (Statesboro and Armstrong Campuses)
- Chemistry Education (Statesboro and Armstrong Campuses)
- English Education (Armstrong Campus)
- History Education (Armstrong Campus)
- Mathematics Education (Statesboro and Armstrong Campuses)
- Physics Education (Statesboro Campus)

B.S.Ed. Degree Requirements

General requirements for the B.S.Ed. degree include fulfillment of the Core Curriculum, completion of all junior/senior level required courses in the teaching field and professional education coursework, and 4 credit hours in orientation and health and physical education. At least half of the courses required in the teaching field must be taken at this institution. Correspondence and extension credit hours may not be used to satisfy professional education and content requirements. In addition to these requirements, students pursuing a teacher certification program are required to be admitted to the Teacher Education Program.

Teacher Education Program

Admission and Retention in the Teacher Education Program

Admission to the Teacher Education Program (TEP) is required for those students wishing to pursue a degree in any of the education undergraduate programs or in the M.A.T. degree or related non-degree program that leads to initial teacher certification. (See Graduate Catalog for M.A.T. requirements (p. 390).) Undergraduate students pursuing a certification program must be admitted into the Teacher Education Program as a prerequisite for enrollment in junior/senior level education courses. Students must apply for and be issued a Pre-Service Certificate from the Georgia Professional Standards Commission. This certification serves as formal admission into the Teacher Education Program. The Pre-Service Certificate application process occurs during enrollment in the Pre-Professional Block (PPB), a set of three, three-credit hour courses, which include a field experience totaling 51 clock hours taken concurrently during the second semester of the sophomore year. Transfer undergraduate students who completed PPB courses and field experiences at another institution will complete the Pre-Service Certificate application at SOAR. During the PPB semester, undergraduate students begin using a data management system. This system supports the monitoring and assessment of students’ progress through the TEP.

In order to be admitted into the Teacher Education Program (TEP), an undergraduate student must have:

1. Earned a cumulative GPA of 2.50 or better on all Georgia Southern coursework, as well as any transfer and transient credit hours which have been accepted by Georgia Southern.
2. Earned a minimum of 50 credit hours in Core Curriculum courses including Area F Professional Education Block courses.
3. Completed Area A1, Area A2, and Area F coursework (including the Pre-Professional Block) with a minimum grade of “C”.
4. Completed a MyPSC account with the Georgia Professional Standards Commission and claimed Georgia Southern University as the program provider.
5. Successfully completed the GACE Program Admission Assessment examination or be exempted by SAT/ACT/GRE scores.
6. Completed the Georgia Educator Ethics – Program Entry (350).
7. Successfully completed the Pre-Professional Block TEP Admissions Folio Review.
8. Earned a passing evaluation on Area F field experience rubrics. Any student who does not successfully complete the field component of the Area F courses may apply through the Office of Initial Educator Preparation and Assessment to attempt this field experience again. This field experience will be repeatable as field placements are available and must be completed successfully within three attempts, including the original attempt.
9. Submitted proof of liability insurance.
11. Maintain an active account with the College of Education’s electronic assessment and data management system.

All of the following requirements must be met for retention in the Teacher Education Program:

1. Students must maintain an overall cumulative GPA of 2.50 or better.
2. Students must maintain a total adjusted GPA of 2.75 or better on all professional education and all teaching field coursework.
3. Students must earn a minimum grade of “C” in all professional education and all teaching field coursework.
4. Students must successfully complete all field experiences.
5. Students must not have been found in violation of the Georgia Southern Student Conduct Code. Reviews will be made on a case-by-case basis based on the seriousness of the violation and with regard to consistency.
6. Students must not have violated the Georgia Professional Standards Commission’s Code of Ethics for Professional Educators. Students must abide by this Code of Ethics and report any violations to the Georgia Professional Standards Commission.
7. Students must be making satisfactory progress toward meeting program objectives. Program faculty will be responsible for monitoring student progress and providing guidance to students who may be having difficulty meeting retention requirements.
8. Students must maintain liability insurance.
9. Students must maintain an active account with the College of Education’s electronic assessment and data management system.

Policies and Procedures for Field Experiences, Internships and Clinical Experience - Initial Teacher Preparation

Field Experience Placement Policies

Field placements are very important to candidates in the teacher preparation program. Georgia Southern University and its Partner Schools place great importance on field experiences.

- All field experiences are coordinated between the Office of Initial Educator Preparation and Assessment, academic programs, and Partner Schools.
- An attempt will be made to place two or more teacher candidates in a school. An exception to this clustering policy could be rendered by a program or department. This exception would be a result of specialization required of the clinical supervisor. (This does not apply to candidates in an online Master of Arts in Teaching program.)
- One geographical area will serve Georgia Southern’s teacher candidate population. The primary area is approximately 70 miles from each Georgia Southern campus (this includes Teachers of Record). Candidates can expect the maximum one-way travel of 70 miles or less from Georgia Southern to a school placement. (This policy does not apply to candidates in a fully online Master of Arts in Teaching program.)
- All field placements and clinical practice assignments are identified and assigned by the program director/coordinator. Placements are non-negotiable.
- Teacher candidates seldom receive a field placement at a school site where they have had a previous field experience placement. This policy provides candidates with diversity in placements and teaching experiences. The exception to this policy is year-long placements during the senior year.
- Teacher candidates are not placed in schools where relatives are employed, where they have been enrolled as a student, or where relatives are enrolled as students.
- Teacher candidates that have an identified disability requiring accommodations during a field experience or clinical practice must consult with the Student Accessibility Resource Center the semester prior to the field experience to discuss accommodations. All teacher candidates must successfully demonstrate their ability to meet, with or without accommodations, the standards and expectations of the teaching profession.
- Teacher candidates are limited to enrolling in a maximum of 12 semester hours during the clinical practice semester. The exception to this is when a candidate is enrolled in ESED 5235 and/or COED 3160.
- Candidates enrolled in a Master of Arts in Teaching program can only accept employment in a Georgia school that meets the GaPSC requirements; see PSC Rule 505-3-.01, section 4 (iv).
- Candidates enrolled in a Master of Arts in Teaching program and are hired by a school system as a Teacher of Record must be teaching in the content area of the certification they are seeking.
- Candidates enrolled in a Master of Arts in Teaching program and are hired by a school system as a Teacher of Record must be teaching full-time in the content area of the certification they are seeking during their semester of clinical practice/internship.

Intervention Policies for Field Experiences and Clinical Practice

- Candidates are allowed a maximum of two (2) Professional Support plans (A/B) (each for different areas of difficulty) per field experience or clinical practice.
- Candidates are allowed a maximum of one (1) Probationary Status per field experience or clinical practice.
- Candidates may repeat each field experience or clinical practice one (1) time.
- Withdrawing without academic penalty, withdrawing failing, or withdrawing at the recommendation of the program faculty from a field experience or clinical practice will be considered one (1) attempt at that field experience.
- When a school personnel request that candidates be removed from the school for performance or professional reasons the placement will end immediately. A new field placement will rarely be identified until the following semester.

Requirements for Admission to Clinical Practice

Clinical practice is required in all teacher preparation programs at the initial preparation level. In order to participate in clinical practice, a teacher candidate must:
1. Meet all admission requirement for the Teacher Education Program.
2. Have earned an overall cumulative GPA of 2.50 or higher on all college coursework attempted.
3. Complete all professional education program courses in the teaching field with a grade of “C” or better and an adjusted GPA of 2.75 or better.
4. Prior to clinical practice complete all coursework in the program of study. Exceptions are ESED 5235 and COED 3610.
5. Meet admission requirements for clinical practice no later than one semester prior to enrollment for the course.
6. Attempt the GACE Content Assessment appropriate to the field.
7. Possess valid liability insurance.
8. Pass the Georgia Educators Ethics – Program Exit (360) Assessment.
10. Apply for clinical practice by the established deadline one academic semester prior to registration for the course.

Note: School districts may have additional requirements for student teachers/interns placed in their schools. Student teachers/interns must meet these additional requirements.

International Study Opportunity

Under the auspices of the International study opportunity, student teaching exchanges within the United Kingdom may be available. Information regarding this exchange can be obtained from the Office of Initial Educator Preparation and Assessment.

Certification

The programs offered by the College of Education at the undergraduate level are designed to prepare teachers for Level Four Induction teacher...
certification in the state of Georgia. For individuals who already hold a bachelor’s degree and are interested in Early Childhood or Health and Physical Education, another certification option is to complete program requirements at the undergraduate level. For Music Education (grades P-12), initial teaching certification is only available at the undergraduate level. For more information on Georgia teacher certification see the Georgia Professional Standards website, http://www.gapsc.com.

Upon program completion candidates will be ready to apply for certification. Please note a certificate of eligibility will be issued and once hired an induction certificate will be issued by the Georgia Professional Standards Commission. Please see the Student Success Center website for further information and instructions http://coe.georgiasouthern.edu/ssc/certification/

All college of Education graduates who have completed an initial, advanced, add-on or endorsement program must file an application for a certificate. This will include opening a myPSC account with the Georgia Professional Standards Commission (GAPSC) and claiming Georgia Southern University as the program provider. Students enrolled in a Teacher Education program (undergraduate and MAT) are given an opportunity to make an application at a prescribed time. All candidates for a teaching certificate must earn passing scores on the three required Georgia Assessments for the Certification of Educators (GACE): content assessment, edTPA and the Educators Ethics Exit 360. The Director of the SSC/Certification Officer will verify that all requirements, including claiming, course work and GACE requirements are complete, and program completion will be submitted to the GAPSC. Contact information for the certification process is Christina Thompson, 912-478-0698 or cjthomp@georgiasouthern.edu. http://coe.georgiasouthern.edu/ssc/certification.

**Post Baccalaureate and M.A.T. Teacher Certification Process and Procedures**

The College of Education offers the Master of Arts in Teaching (M.A.T.) degree or a similar graduate non-degree program option for those who hold bachelor’s degrees in a related teaching field. (See the Graduate Catalog for M.A.T. procedures (p. 390).) Those who hold a bachelor’s degree and are interested in Music Education certification must complete program requirements at the undergraduate level. For each of these options, students must have their transcripts evaluated by Georgia Southern University’s Certification Officer and they must meet all Teacher Education Program (TEP) admission and retention requirements, including an overall GPA of 2.50 or higher on all college course work attempted.

Engineering and Computing

The Allen E. Paulson College of Engineering and Computing at Georgia Southern University offers both undergraduate and graduate degree programs. At the undergraduate level, the college offers the Bachelor of Science degree programs in Civil Engineering, Computer Science, Construction Management, Electrical Engineering, Computer Engineering, Information Technology, Manufacturing Engineering and Mechanical Engineering. Computer Science and Information Technology are offered on both the Statesboro and Armstrong campuses. The first two years of the Mechanical Engineering program is offered on the Armstrong campus and students must transition to the Statesboro campus to complete the ME degree. The Regents' Engineering Pathway (REP) Program, available on both the Armstrong and Statesboro campuses, is offered as an option for students to complete the first two years of their engineering curriculum at designated Georgia colleges and then transfer to Georgia Southern (or another engineering school in Georgia) based on the availability of a particular major, to complete their BS degree in engineering. The WebBSIT is offered entirely online. At the graduate level, the college offers Master of Science degree programs in Engineering and Computer Science on the Statesboro campus. The Master of Science in Computer Science (MSCS) is offered as a hybrid program with a combination of both online and face to face courses. The College also offers two graduate certificates in Engineering & Manufacturing Management, and Occupational Safety & Environmental Compliance on the Statesboro campus as well.

Vision

The College of Engineering and Computing will be a nationally recognized leader in engineering, computer science, and information technology in the areas of student-centric and application-based teaching, research, and service.

Mission

The College of Engineering and Computing will maintain a dynamic and evolutionary environment of excellence in teaching, research, and service in which students, faculty and staff can achieve their professional goals. In these endeavors, the College will foster student-centric professional learning experiences utilizing advanced technologies that are applied with state-of-the-art equipment, inspire innovation and invention, encourage sustainability, and technically and economically enrich our communities and societies.

College Structure

- Department of Manufacturing Engineering (p. 185)
- Department of Mechanical Engineering (p. 187)
- REPP - Regents’ Engineering Pathway Program (p. 188)

Experiential Learning Opportunities

Internships

Internship opportunities are available for all undergraduate programs in the Allen E. Paulson College of Engineering and Computing and are required for students majoring in Construction Management and Information Technology. Internships are supervised experiential learning programs, designed to allow students an opportunity to receive practical experience in their chosen field of study. Students should contact the Associate Dean for Students & Curriculum for further information.

Cooperative Education

Co-ops allow students the opportunity to gain work experience related to their academic major while earning a salary. To participate in a cooperative education opportunity, a student must have completed at least 30 semester hours of instruction, have a grade point average of at least 2.5, and be willing to participate in a minimum of two alternating co-op work semesters. Work responsibilities and salaries are determined by the employer. Students should contact the Associate Dean for Students & Curriculum for further information.

Undergraduate Research

Involving undergraduate students in applied, hands-on research activities and projects is a primary focus of the College. College administration and faculty work diligently to provide students with abundant opportunities to engage in research under faculty supervision. Examples of each department's current areas of research are included in the department brochures and web pages. The Dean's Office and corporate sponsors funds student-led research projects which are showcased in the annual Student Research Symposium.

Contacts

Dean: Mohammad Davoud
Department of Civil Engineering and Construction Management

The departmental goals are designed to give students state-of-the-art knowledge for professional career and life-long development skills needed to enter the fields of civil engineering and construction management while meeting all the requirements to earn a Bachelor of Science degree. The department engages in the best practices of teaching, scholarship, and service to ensure that graduates serve as ethical and highly qualified leaders of civil engineering and construction management. Students will find open doors to a dedicated and diverse faculty who are well-educated yet grounded in the practical aspects of “real world” civil engineering design and construction. The CE program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org. The Construction Management program is accredited by the American Council on Construction Education (ACCE), http://acce-hq.org.

**Free Elective**

Select 3 credit hours of Free Electives

| Total Credit Hours | 130 |

1. While Calculus I (MATH 1441) is 4 credit hours, only 3 credit hours will count toward fulfilling Area A2. The remaining credit hour will be applied toward Specific Requirements.

2. The listed courses are recommended in the Core Areas noted and may be prerequisites for major courses.

3. The 6 hours listed for technical electives must be upper division courses in order to meet the 39 upper division hours requirement.

### Other Program Requirements

- A minimum grade of "C" is required for all CENG courses.
- A minimum grade of "C" is required for all prerequisite courses.
- A minimum grade of "C" is required for all Technical Elective courses.
- At least 33 credit hours of approved upper division Engineering credit hours must be earned at Georgia Southern.
- At least 100 hours of Departmental pre-approved community service must be completed prior to graduation clearance.
- Students must take the Fundamentals of Engineering (FE) Exam prior to Graduation.

### Honors in Civil Engineering

To graduate with Honors in Civil Engineering a student must:

- Be admitted in the University Honors Program
- Complete a Honors thesis (in a minimum of two regular semesters) for a total of 3-credit hours in Honors Research (HONS 4999)
- Maintain a 3.3 institution grade point average, including a 3.5 minimum GPA in all major courses applied towards graduation

### Advisement

CEC Office of Student Services, Room 1208, Allen E. Paulson College of Engineering and Computing, Telephone: (912) 478-4877.

Upon graduation, students with a BS majoring in Computer Science will have:

- an ability to apply knowledge of computing and mathematics appropriate to the discipline;
- an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;
- an ability to design, implement and evaluate a computer-based system, process, component, or program to meet desired needs;
- an ability to function effectively on teams to accomplish a common goal;
- an understanding of professional, ethical, legal, security, and social issues and responsibilities;
- an ability to communicate effectively with a range of audiences;
- an ability to analyze the local and global impact of computing on individuals, organizations, and society;
- recognition of the need for, and an ability to engage in, continuing professional development;
- an ability to use current techniques, skills, and tools necessary for computing practices;
- an ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices;
- an ability to apply design and development principles in the construction of software systems of varying complexity.

1 The listed courses are recommended in the Core Areas noted. Several of these are prerequisites of other courses required for the major.
CSCI 5436 Distributed Web Systems Design 3
CSCI 5530 Software Engineering 3
Select three of the following elective courses: 9

CSCI 3231 Logic Circuits and Microprocessors (OR other approved 3000-level electives)
or ENGR 2332 Introduction to Computer Engineering
CSCI 3330 Comparative Languages
CSCI 4132 Data Warehouse Design
CSCI 4210 High Performance Computing
CSCI 4439 Game Programming
CSCI 4520 Machine Learning
CSCI 4610 Numerical Analysis
CSCI 4534 Software Testing and Quality Assurance
CSCI 4537 Broadband Networks
CSCI 4539 Optical Networks
CSCI 5090 Selected Topics in Computer Science
CSCI 5230 Discrete Simulation
CSCI 5430 Artificial Intelligence
CSCI 5437 Computer Graphics
CSCI 5438 Animation
CSCI 5531 Systems and Software Assurance
CSCI 5532 Network Management Systems

Electives
Carryover from Area A2 and Area F 1
Select 6-9 credit hours of Electives 6-9
Total Credit Hours 124

1 While Calculus II (MATH 2242) is 4 credit hours, only 3 credit hours will count toward fulfilling Area F. The remaining credit hour will be applied toward Electives.

2 Students enrolled at the Armstrong Campus are required to take CSCI 2490 (3) and CSCI 3341 (3).

Certificates
Students can earn certificates in one or more of the following areas by completing the course requirements shown below:

Broadband and Mobile Systems Certificate
Select three of the following: 9

CSCI 4537 Broadband Networks
CSCI 4539 Optical Networks
CSCI 5090 Selected Topics in Computer Science (Requires approval by the CS Chair)
CSCI 5532 Network Management Systems
CSCI 5538 Wireless and Mobile Systems

Total Credit Hours 16-19

1 Students enrolled at the Armstrong Campus are required to take CSCI 2490 and CSCI 3341.

CHEM 1310 Comprehensive General Chemistry 4
CSCI 1301 Programming Principles I 4
ENGR 1731 Computing for Engineers 3
ENGR 1732 Program Design for Engineers 3
PHYS 2212K Principles of Physics II 4
Carryover from Area A2 1

Specific Requirements

Carryover from Area D 1
CSCI 1302 Programming Principles II 3
ENGR 2341 Introduction to Signal Processing w/Lab 4
MATH 2130 Discrete Mathematics 3
MATH 3230 Ordinary Differential Equations 3
WRIT 2130 Technical Communication 3

Major Requirements

CSCI 3230 Data Structures 3
CSCI 3232 Systems Software 3
CSCI 3432 Database Systems 3
EENG 3345 Circuit Analysis II w/Lab 4
EENG 3340 Microcontrollers with Lab 4
EENG 3341 Microelectronics with Lab 4
EENG 4620 Senior Project I 2
EENG 4621 Senior Project II 2
EENG 5342 Computer Systems Design with Lab 4
ENGR 2323 Digital Design Lab 2
ENGR 2332 Introduction to Computer Engineering 3
ENGR 2334 Circuit Analysis 3
Select at least 6 credit hours from 5000+ level technical electives from EENG, CSCI, or IT 6

Other Program Requirements

- At least 33 credit hours of approved upper division Engineering credits must be earned at Georgia Southern.
- A grade of “C” or better is required on all ENGR, CSCI, and EENG courses and their corresponding co-requisites and pre-requisites.

Honors in Computer Engineering

To graduate with Honors in Computer Engineering a student should:

- Be admitted to the University Honors Program
- Complete a capstone project in EENG 4620 or EENG 4621.
- Maintain a 3.3 institutional grade point average, including a 3.5 minimum GPA in all major courses applied towards graduation.

Advisement

Carryover from Area A2 1
Carryover from Area D 1
ENGR 2341 Introduction to Signal Processing w/Lab 4
MATH 3230  Ordinary Differential Equations  3
WRIT 2130  Technical Communication  3

Major Requirements
EENG 3230  Electromagnetic Fields  3
EENG 3241  Electric Machines w/Lab  4
EENG 3337  Power Systems Fundamentals  3
EENG 3345  Circuit Analysis II w/Lab  4
EENG 3340  Microcontrollers with Lab  4
EENG 3341  Microelectronics with Lab  4
EENG 3420  Linear Systems  2
EENG 3421  Advanced Engineering Analysis  2
EENG 4620  Senior Project I  2
EENG 4621  Senior Project II  2
EENG 5431  Control Systems with Lab  3
EENG 5540  Communication Systems with Lab  4
ENGR 2323  Digital Design Lab  2
ENGR 2332  Introduction to Computer Engineering  3
ENGR 2334  Circuit Analysis  3

Select at least 6 credit hours from the following Electrical Engineering courses:
EENG 4890  Directed Study in Electrical and Computer Engineering  
EENG 5090  Selected Topics in Electrical and Computer Engineering  
EENG 5234  Nuclear Power System Fundamentals  
EENG 5235  Converters Control Techniques  
EENG 5242  Power Systems Protection with Lab  
EENG 5243  Power Electronics with Lab  
EENG 5244  Smart Grids Technology Fundamentals with Lab  
EENG 5330  Network Science  
EENG 5341  Robotic Systems Design with Lab  
EENG 5342  Computer Systems Design with Lab  
EENG 5432  Programmable Logic Controllers with Lab  
EENG 5433  Machine Learning and Adaptive Control  
EENG 5434  Engineering Optimization Methods  
EENG 5532  Wireless Communications  
EENG 5533  Optical Fiber Communications  
EENG 5535  Electronic Warfare  
EENG 5538  Cybersecurity for Networked Electrical and Electronics Systems  
EENG 5541  Digital Communications with Lab  
EENG 5543  Antennas with Lab  
EENG 5891  Special Problems in Electrical and Computer Engineering

Free Elective
Select 3 credit hours of Free Electives  3

Other Program Requirements
- At least 33 credit hours of approved upper division Engineering credits must be earned at Georgia Southern.
- A grade of “C” or better is required for all ENGR and EENG courses and their corresponding co-requisites and pre-requisites.

Honors in Electrical Engineering
To graduate with Honors in Electrical Engineering a student must:
- Be admitted to the University Honors Program
- Complete a capstone project in Senior Project I (EENG 4620) and Senior Project II (EENG 4621)
- Maintain a 3.3 institution grade point average, including a 3.5 minimum GPA in all major courses applied towards graduation

Advisement

Department of Information Technology

Information Technology - BSIT
The department promotes Information Technology as a profession and as an academic discipline. In pursuit of the program mission, world-class educational programs prepare students for a range of careers or graduate study. IT professionals focus on meeting the needs of users within an organizational and societal context through the selection, creation, application, integration and administration of computing technologies. They must, therefore, have a good understanding of the various information technologies and the type of activity in which the organization is involved. Our students are required to complete a series of major core courses, an internship experience, an IT specialization area. Students and faculty also conduct innovative research in all aspects of IT and its applications and participate in consulting and economic development activities that support the mission of Georgia Southern University.

Outcomes
Upon graduation, students with a BS in Information Technology will be able to:
- identify and define the requirements that must be satisfied to address user needs;
- analyze user requirements to design IT-based solutions;
- identify and evaluate current technologies and assess their applicability to address individual and organizational needs;
- work in project teams to develop and/or implement IT-based solutions;
- use current computing techniques, skills, and/or technologies.

The IT program is accredited by the Computing Accreditation Commission of ABET, http://www.abet.org.

Information Technology - WebBSIT
The Georgia WebBSIT program has two primary purposes. The first purpose is to produce IT graduates with the knowledge, skills and abilities to meet the needs of Georgia employers. The second purpose is to provide access to a BSIT education for Georgia citizens whose lifestyles make it difficult to attend face-to-face classes on campus. People who are currently working in IT, have family commitments, travel frequently, serve in the military, or simply prefer online learning have the opportunity to earn
a degree from Georgia Southern, one of the six institutions offering the WebBSIT program in Georgia.

**Outcomes**

Upon graduation, students with a BS in the Georgia WebBSIT will be able to accomplish the same tasks as the traditional BS in Information Technology. These outcomes are in keeping with emerging program and curricular standards for IT education, as well as with the goals and outcomes of the traditional BSIT programs of the collaborating institutions.

**Minor Program**

The impact of ubiquitous computing and the internet calls for rapid changes in computer systems and the criminal justice system at all levels. From threats to national security to national security to banking fraud to simple fraudulent schemes for the unassuming, the “cybersphere” has become the place where crime is committed and must, therefore, be detected and handled accordingly.

Department of Manufacturing Engineering

The Department of Manufacturing Engineering offers students an applied laboratory-focused education in Manufacturing Engineering. Georgia Southern’s B.S. in Manufacturing Engineering program is the first one in Georgia and the only one within a 500-mile radius of Statesboro. The Manufacturing Engineering curriculum is theoretical, yet hands-on and career oriented. Students gain expertise and practical knowledge in Manufacturing Engineering (MfgE) in the major areas of Manufacturing Processes and Materials, Design for Manufacturability, Lean Manufacturing, Quality and Process Control, and Automation and Robotics. Students have the opportunity to individually select a technical track in Lean and Six Sigma Green Belt, Manufacturing Automation, Materials Processing, SAP, or Occupational Health and Safety.

Students have a wide range of co-op and internship opportunities that provide real-world, practical, and hands-on industrial experience. Faculty members mentor students in research projects, providing personalized opportunities for professional development. Areas of research include Materials Processing, Composites, Nano-materials, Productivity and Quality, Additive Manufacturing, Automation and Robotics, and Sustainability in Manufacturing.

Programs

### General Manufacturing Engineering

Choose any combination of three courses (9 credits) from the following:

- **Lean and Six Sigma**
  - MFGE 5131: Lean and Six Sigma 1
  - MFGE 5132: Lean and Six Sigma 2
  - TMAE 5134: Lean World Class Manufacturing

- **Manufacturing Automation**
  - MENG 5331: Automation and Computer Integrated Manufacturing Systems
  - MFGE 5238: Facilities Maintenance
  - MFGE 5331: Advanced Robotics for Manufacturing
  - MFGE 5332: Manufacturing Floor Control
  - MFGE 5333: Additive Manufacturing Studio

- **SAP**
  - CISM 3333: ERP Systems Using SAP
  - CISM 4237: Business Intelligence
  - CISM 4333: Human Resource Information Systems
  - CISM 4335: Advanced Business Applications Programming (ABAP) for the SAP/ERP System
  - CISM 4336: ERP and Enterprise Performance
  - CISM 4434: Enterprise System Configuration
  - CISM 4435: ERP Web Portal Customization and Collaboration using SAP NetWeaver

- **Occupational Health and Safety**
  - TSEC 5331: Occupational Safety
  - TSEC 5333: Industrial Hygiene and Ergonomics
  - TSEC 5334: Hazardous Waste Management
  - TSEC 5335: Systems Safety in Manufacturing
  - TSEC 5336: Environmental Law

### Free Elective

Select 3 credit hours of Free Electives

1. **General Requirements**: Choose one of the following courses in Area D:
   - Calculus II (MATH 2242) and Calculus III (MATH 2243)
   - Calculus II (MATH 2242) and Calculus IV (MATH 2244)
   - Calculus II (MATH 2242) and Calculus IV (MATH 2244)

2. **Additional Requirements**: Choose one of the following courses in Area F:
   - General Manufacturing Engineering
   - Lean Six Sigma
   - Manufacturing Automation

3. **Materials Process**: Choose one of the following courses in Area G:
   - Composite Materials: Manufacturing, Analysis, and Design
   - Advanced CNC Machining and Programming
   - Introduction to MEMS
   - Packaging
   - NanoManufacturing
   - Characterization of Advanced Manufacturing Materials
   - Design for Environment and Green Manufacturing

4. **SAP**: Choose one of the following courses in Area H:
   - ERP Systems Using SAP
   - Business Intelligence
   - Human Resource Information Systems
   - Advanced Business Applications Programming (ABAP) for the SAP/ERP System
   - ERP and Enterprise Performance
   - Enterprise System Configuration
   - ERP Web Portal Customization and Collaboration using SAP NetWeaver

5. **Occupational Health and Safety**: Choose one of the following courses in Area I:
   - Occupational Safety
   - Industrial Hygiene and Ergonomics
   - Hazardous Waste Management
   - Systems Safety in Manufacturing
   - Environmental Law

6. **General Manufacturing Engineering**: Choose any combination of three courses (9 credits) from the following:
   - Lean and Six Sigma
   - Manufacturing Automation
   - Materials Process
   - SAP

### Other Program Requirements

At least 33 semester hours of approved Engineering courses must be taken at Georgia Southern.
Department of Mechanical Engineering

Faculty members mentor students in research projects, providing personalized opportunities for professional development. Active areas of research include Biofuels Development; Combustion; Engine Design and Testing; Robotics Automation; Tribology; and Sustainable Design.

Total Credit Hours: 130

---

1. MATH 2242 Calculus II and PHYS 2211 Principles of Physics I are recommended in Area D.
2. While Calculus I (MATH 1441) is 4 credit hours, only 3 credit hours will count toward fulfilling Area A2. The remaining credit hour will be applied toward Specific Requirements.
College credits can be given for high school pre-engineering program Project Lead The Way’s (PLTW’s) Introduction to Engineering Design (IED) course as a possible substitution for Engineering Graphics (ENGR 1133), if the following three conditions are satisfied:

- student scores 80% or above overall in the course and
- an approval of the PLTW affiliate director faculty member at Georgia Southern.
- student scores 70% or above on a Georgia Southern administered competency exam.

Other Program Requirements

- At least 30 credit hours of approved Engineering courses must be taken at Georgia Southern.
- The listed courses are recommended in Area D
- Proficiency examinations will not be accepted in the substitution for any upper-division or laboratory-based courses.

Honors In Mechanical Engineering

To graduate with Honors in Mechanical Engineering a student should:

- Be admitted to the University Honors Program.
- Complete at least 6 credit hours of honors credit in 2000+ ENGR or MENG courses beyond the honors core requirements.
- Complete Mechanical Engineering Research (MENG 4811) and Research Project in Mechanical Engineering (MENG 4822) (taking both Mechanical Engineering Research (MENG 4811) and Research Project in Mechanical Engineering (MENG 4822) substitutes for one Mechanical Engineering Technical Elective).
- Successfully complete and present an Honors Thesis or Capstone Project.
- Be in good standing in the University Honors Program at the time of graduation.

</table>

1 Students completing Honors in Mechanical Engineering are strongly encouraged to select honors courses such as ENGR 1133, ENGR 1731, ENGR 2112, ENGR 2231, ENGR 3233, ENGR 3431, MATH 1441, Calculus II (MATH 2242), Principles of Physics I (PHYS 2211K), and Principles of Physics II (PHYS 2212K).

2 For students entering the University Honors Program as a freshman and seeking to complete the Departmental Honors in Mechanical Engineering, it is highly recommended that these freshmen complete MATH 1441.

REPP - Regents' Engineering Pathway Program

The Regents' Engineering Pathway (REP) Program provides a seamless pathway for students across Georgia to pursue degrees in a variety of engineering fields. Georgia Southern participates in the REP Program in two ways.

- First, Georgia Southern is a destination for students who have successfully completed approximately the first two years of the engineering curriculum at any other partnering REP Program institutions across the state, including completion of the required courses for their preferred engineering program offered at Georgia Southern’s Statesboro and Armstrong campuses. In addition, students must complete all of the REP Program required courses at their initial institution to be eligible for transfer under REP. (Note: Most of the partnering institutions do not offer engineering degrees.)
- Second, Georgia Southern is an REP Program institution where students may begin their engineering education as entering freshmen with the objective of transferring to one of the four (4) other engineering degree granting institutions in Georgia (Georgia Tech, Kennesaw State University, Mercer University, and the University of Georgia) mainly to pursue an engineering degree not offered at Georgia Southern. This is especially important for students who may choose programs such as Biomolecular, Chemical, or Nuclear Engineering.

REP Program admission requirements for any USG institutions that offer engineering degrees differ by institution and program. Admissions requirements are determined individually by each institution and change frequently. Students enrolled in Georgia Southern’s REP Program who wish to transfer to one of the other REP institutions to complete their engineering degree should check with the Associate Dean for Students and the REP Program academic advisor regularly to ensure they are aware of the current admission requirements for their destination institution. A formal recommendation from the Associate Dean for Students is required to transfer to another partner REP Program institution. Enrollment in the REP Program does not guarantee acceptance at another REP partnering institution.

Regents' Engineering Pathway Program

The Regents' Engineering Pathway Program (REP Program) - allows prospective engineering students to take approximately the first two years of the engineering curriculum at a designated "first" institution and, upon successful completion of all required course work, transfer to one of 5 engineering institutions (Georgia Southern University, Georgia Tech, Kennesaw State University, Mercer University, University of Georgia) in the state to complete the last two years of the engineering degree. Also, non-resident students and Georgia residents who are interested in the engineering programs at other universities may take the same course of study as the REP Program students and then transfer to the school of their choice.

Students may attend Georgia Southern University as a "first" institution for approximately two years of course work and then transfer to one of four "second" institutions in the state that offer engineering degrees (Georgia Tech, Kennesaw State University, Mercer University, University of Georgia). This is most often the case when students intend to major in programs such as Biomolecular, Chemical, or Nuclear Engineering which are not available at Georgia Southern. Students may attend any of the REPP partnering "first" institutions in the state and then transfer to Georgia Southern University "second" institution to complete their engineering degree.

Admission and Completion Requirements for REP Program

Current Georgia Southern Students Who Wish to Enter the REP Program

Current Georgia Southern students are defined as those who are currently enrolled at Georgia Southern in another academic major. Transfer students are those who have taken a college or university course after graduating from high school from a college or university other than Georgia Southern. In either case, such a student cannot be considered for freshman admission. To be accepted into the REP Program, current Georgia Southern students and transfer students must complete the following requirements:

1. A minimum of 30 semester hours of college course work with a cumulative grade point average (GPA) of 3.00,
2. Calculus I (MATH 1441) and Calculus II (MATH 2242) with grades of at least “B” (3.00 GPA),
3. Comprehensive General Chemistry (CHEM 1310) or Principles of Chemistry I (CHEM 1211K) and Principles of Physics I (PHYS 2211K) with grades of at least “B” (3.00 GPA).

Transfer Admission from an REP Program Institution to Georgia Southern University

Students who wish to enter Georgia Southern's REP Program must satisfy their first (sending) institution's requirements and the CEC REP Program admission requirements, apply for admission to Georgia Southern University, and request a recommendation from the first institution's REP Program Coordinator.

Transfer Admission from Georgia Southern University to Another REP Program Institution

Georgia Southern students who wish to apply to a second (receiving) institution that offers engineering degrees as a REP Program student must first satisfy the second institution's requirements, apply for admission to the receiving institution, and request a recommendation from the CEC REP Program Coordinator.
Health Professions

Vision
The vision of the Waters College of Health Professions is to become the leader in the preparation of health professionals who are engaged in transformational thinking and evidence-based practices that impact the health and quality of life for individuals, families, and communities. We will accomplish this vision through a focus on: high academic expectations, individual responsibility for academic achievement, student-centered teaching and learning, impacting regional and global communities, interdisciplinary collaboration, innovative healthcare technology, experiential learning, community-engaged service and scholarship.

Mission
The mission of the Waters College of Health Professions is to prepare future health professionals through academic excellence and interdisciplinary collaboration while advancing knowledge through scholarship and serving culturally diverse communities.

• Respiratory Therapy B.S. (Online) (p. 198)
• Sport Management B.S. (p. 211)

Minors
• Athletic Training Minor (p. 202)
• Exercise Science Minor (p. 203)
• Nutrition and Food Science Minor (p. 210)

Certificates
• Clinical Specialist in Advanced Imaging Certificate (p. 191)
• Gerontology Certificate (p. 204)
• Nuclear Medicine Certificate (p. 192)
• Radiation Therapy Certificate (p. 193)

Advisement
Undergraduate students in the Waters College of Health Professions are advised on their home campus by assigned academic advisors.

Armstrong Campus: Students are advised in the Office of Academic Advising and Support located in the Student Success Center. Students can contact the office at (912) 344-2570.

Liberty Campus: Students are advised in the Advising Office, room 139. Students can contact the Advising Office at (912) 877-1906.

Statesboro Campus: Students are advised in the WCHP Student Services Center located in the Hollis Building – Room 0101 and Room 2105. Students can contact the Student Services Center at (912) 478-1931.

Contacts
Dean: Dr. A. Barry Joyner
Statesboro Campus:
Room 2127 Hollis Building

Department of Diagnostic and Therapeutic Sciences

The Department of Diagnostic and Therapeutic Sciences at Georgia Southern University offers bachelor and degree completion programs in the high tech fields of medical laboratory science (https://chp.georgiasouthern.edu/diagnostic/undergraduate-majors/medical-laboratory-science), radiologic sciences (https://chp.georgiasouthern.edu/diagnostic/undergraduate-majors/radiologic-sciences) and respiratory therapy (https://chp.georgiasouthern.edu/diagnostic/undergraduate-majors/respiratory-therapy). All programs offer options for completing the coursework either fully or substantially online.

Mission Statement

The Department of Diagnostic and Therapeutic Sciences, as part of the Waters College of Health Professions at Georgia Southern University, exists to educate students, and to provide our culturally diverse communities with competent, team-oriented and compassionate healthcare professionals.

Core Values

Core Value 1: The Department of Diagnostic and Therapeutic Sciences faculty is dedicated to providing excellence in health professions education through an interdisciplinary approach.

Core Value 2: The Department of Diagnostic and Therapeutic Sciences faculty participate in a team-oriented approach to learning and instruction for the advancement of integrated healthcare education.

Core Value 3: The Department of Diagnostic and Therapeutic Sciences faculty provide a student-learning environment committed to fostering culturally sensitive and compassionate professional community service.

Progression Requirements

Students must earn a C or better in each Medical Laboratory Science course. A student may repeat a single medical laboratory science course only one time (at the next offering, provided space is available). Students who fail to earn a C or better in a repeated medical laboratory science course, or who fail to earn a C in a subsequent medical laboratory science course, will be dismissed from the program with no possibility of readmission.

Students must maintain an overall adjusted grade point average of 2.0 or higher. A student who falls below this will be placed on suspension from the program for one semester. If the student’s grade point average is not raised by the end of the next semester, the student will be dismissed from the program. Students must complete the professional course work within three consecutive years from the date of initial admission to the Medical Laboratory Science program.

Advisement

For questions regarding specific undergraduate requirements, please contact the Waters College of Health Professions Student Success Center.

Radiologic Sciences B.S.R.S. (Bridge Program)

Degree Requirements: 130 Credit Hours

Radiologic Sciences offers a degree completion program for radiographers, radiation therapists, and nuclear medicine technologists. If you are certified by the ARRT or NMTCB, then you may qualify to complete a Bachelor of Science in Radiologic Sciences degree through Georgia Southern University. We offer a wide variety of mechanisms for technologists, therapists, and sonographers to advance professionally. Refer to the Department of Diagnostic and Therapeutic Sciences page for detailed information on admissions and standards of progression.

Total Credit Hours 130

1 Nuclear Medicine students who have not completed a Chemistry sequence in the Core must complete one chemistry course with lab as the guided elective.
Radiation Therapy students who have not completed a Pre-Calculus course in the Core must complete a Pre-Calculus course as the guided elective.
Sonography students who have not completed a Speech Communication course in the Core must complete a speech communication course as the guided elective.

Program Admission Criteria

In order to be eligible for admission to the Respiratory Therapy program, a student must earn a minimum grade of 'C' in all science courses. No more than two science courses from Area D and/ or Area F may be repeated more than twice. Transcript grades of 'D', 'F', or 'WF' are considered failing grades in the Respiratory Therapy program. Admission to Georgia Southern University does not guarantee admission to the respiratory therapy program. The department has a separate formal admissions process. Students are normally admitted to the professional component of the program in the Fall. The application deadline is March 1. Applications received after that date will be considered on a space available basis.

Admission to the major is made on a space available basis and is limited to the best qualified students as determined by the admissions committee. Meeting admission criteria does not constitute acceptance into the program. The maximum enrollment ceiling in the Respiratory Therapy Program is 22 students. Minimum admission criteria include completion of all core requirements for the major, an adjusted grade point average of 2.5, no grade less than C in courses related to area D or F of the core.

Special Requirements

Criminal Background Checks and Drug Testing. Clinical agencies utilized by the Respiratory Therapy program may require criminal background checks and/or drug testing prior to acceptance of the student into clinical facilities. Students who do not pass the criminal background check and/or drug test may be unable to attend clinical courses and therefore may be unable to complete their program of study. Any fees or cost associated with background checks and/or drug testing are the responsibility of the student.

Legal. The Composite State Board of Medical Examiners of Georgia has the authority to refuse to grant a license to an applicant upon a finding by the board that the applicant has been convicted of any felony, a crime involving moral turpitude, or a crime violating a federal or state law relating to controlled substances or dangerous drugs. Unlicensed students may be employed as long as they work under direct supervision. Students must apply for a temporary permit in order to work following graduation. In order to obtain a full license the applicant must be employed under medical direction and have earned a CRT credential. It is a misdemeanor to practice respiratory care or falsely represent oneself as a respiratory care professional unless licensed by the board.

Health and Insurance. Students are required to submit a complete health history form and evidence of health insurance, immunizations, and liability (malpractice) insurance prior to participation in clinical practicum.

Progression Requirements

Students must complete the respiratory therapy program within three consecutive academic years from the date of initial entry. Students who do not complete the program within this time limit must reapply for admission, meet current criteria for admission, and have their previous credits evaluated at the time of their subsequent admission. Students who are readmitted must meet course requirements in effect at the time of readmission.

A grade of C or better is required for each course in the major field of study. A student who earns a grade of less than C must repeat the course the next semester it is offered. Students may repeat a course in the major field of study only once. Students who must repeat more than one course in the major field of study will be dismissed from the program with no option for readmission. Students placed on academic warning who do not raise their grade point average to the minimum criteria for academic good standing the following semester will be suspended from the program.

Courses used to raise the grade point average must be approved by the academic advisor. Students suspended from the program are eligible for readmission.

Students must complete readmission applications for Georgia Southern University and the respiratory therapy major. Students will be required to meet admission and curriculum requirements in effect at the time of readmission, and must complete a comprehensive clinical evaluation prior to readmission. Students are responsible for scheduling such evaluations by the mid-term date of the semester prior to readmission. Readmission to the respiratory therapy major is a faculty decision and will be based on space availability and faculty recommendation.

Advisement

course substitutions, or achieve a C or better in all classes required in 
Career Ladder applicants will have official transcripts or transfer credit, 
and professional portfolio). Applicants who graduated more than three 
years before admission will need to validate current practice.

Respiratory Therapy RRT Online Career-Ladder Program

The Department of Respiratory Therapy has adopted the career-ladder 
model as the basis for accepting RRTs into the baccalaureate program. Registered respiratory therapists may advance their education while 
minimizing duplication of knowledge and skills. Other goals of the career- 
ladder program are to educate individuals who will be able to contribute to 
the growth and development of respiratory care as a profession; educate 
respiratory care providers in a scientific approach to problem-solving and 
and patient care; provide the interpersonal and communication skills needed to 
work effectively as a member of the interdisciplinary health care team; and 
foster respect, critical thinking, and a genuine desire for knowledge. RRTs 
may receive advanced placement via equivalency credit. (Equivalent credit 
will be awarded individually based on the candidate’s academic transcript 
and professional portfolio). Applicants who graduated more than three 
years before admission will need to validate current practice.

RRT Career-Ladder

Program Admission Criteria

Students who have achieved the associate degree and the registered 
respiratory therapist (RRT) credential will be eligible to interview for the 
Georgia Southern Career Ladder program. Military respiratory therapists 
will receive special consideration. Candidates should have an earned 
associate degree in respiratory therapy, RRT credentials, completion of all 
baccalaureate core courses, a cumulative grade point average of at least 
2.5, and have completed a professional portfolio. Each portfolio should 
contain verification of RRT credentials, a notarized copy of the associate 
degree, a resume with complete work history, a current job description, a 
letter of recommendation from an immediate supervisor, verification of a 
current valid state license, and documentation of specialty credentials and 
in-house certifications.

Career Ladder applicants will have official transcripts or transfer credit, 
course substitutions, or achieve a C or better in all classes required in 
Area A-E.

Special Requirements

Criminal Background Checks and Drug Testing. Clinical agencies 
utilized by the Respiratory Therapy program may require criminal 
background checks and/or drug testing prior to acceptance of the student 
into clinical facilities. Students who do not pass the criminal background 
and/ or drug test may be unable to attend clinical courses and 
therefore may be unable to complete their program of study. Any fees 
or cost associated with background checks and/or drug testing are the 
responsibility of the student.

Legal. The Composite State Board of Medical Examiners of Georgia has 
the authority to refuse to grant a license to an applicant upon a finding 
by the board that the applicant has been convicted of any felony, a crime 
involving moral turpitude, or a crime violating a federal or state law relating to 
controlled substances or dangerous drugs. Unlicensed students may

be employed as long as they work under direct supervision. Students 
must apply for a temporary permit in order to work following graduation. 
In order to attain a full license the applicant must be employed under 
medical direction and have earned a CRT credential. It is a misdemeanor 
to practice respiratory care or falsely represent oneself as a respiratory 
care professional unless licensed by the board.

Health and Insurance. Students are required to submit a complete health 
history form and evidence of health insurance, immunizations, and liability 
(malpractice) insurance prior to participation in clinical practicum.

Progression Requirements

Students must complete the respiratory therapy program within three 
consecutive academic years from the date of initial entry. Students 
who do not complete the program within this time limit must reapply for 
 admission, meet current criteria for admission, and have their previous 
credits evaluated at the time of their subsequent admission. Students who 
are readmitted must meet course requirements in effect at the time of 
readmission.

A grade of C or better is required for each course in the major field of 
study. A student who earns a grade of less than C must repeat the course 
the next semester it is offered. Students may repeat a course in the major 
field of study only once. Students who must repeat more than one course 
in the major field of study will be dismissed from the program with no 
option for readmission. Students placed on academic warning who do 
not raise their grade point average to the minimum criteria for academic 
good standing the following semester will be suspended from the program.

| Credit Hours | KINS 4721 | Clinical Practicum in Athletic Training I |
| Credit Hours | KINS 4722 | Clinical Practicum in Athletic Training II |

Elective
Select 3 credit hours of Electives

Total Credit Hours 124

1 If taken in Area A2 or D, then use Fundamentals or Guided Electives to complete Area F.
2 If Physics 1111K taken in Area D, then CHEM 1211K or CHEM 1212K or Guided Electives required in Area F.

Note: Athletic Training Majors must complete Fundamentals to include:

| Credit Hours | MATH 1112 | College Trigonometry |
| Credit Hours | CHEM 1211K | Principles of Chemistry I |
| Credit Hours | CHEM 1212K | Principles of Chemistry II |
| Credit Hours | PHYS 1111K | Introductory Physics I |

Students not able to complete Fundamentals in Areas A2, D, and F will take these courses as part of their Guided Major Electives and/or as course substitutions in the major program requirements. Students may substitute Calculus I (MATH 1441) and Principles of Physics I (PHYS 2211K)/Principles of Physics II (PHYS 2212K) for Fundamentals with advisor approval.

Program Admission Criteria
Athletic Training major applicants must meet the University entrance requirements as described in the University General Catalog. All applicants must apply for admission to both the University and the Athletic Training Major. Once admitted to the University, students should contact the Student Services Center for advisement. In order to be considered for admission into the Athletic Training major, applicants must meet the following minimum requirements by the application deadline (See the department for application dates):
1. Attained admission to Georgia Southern University.
2. Possess a total institution GPA of 2.75 or better on all course work attempted (both transfer course work and work completed at Georgia Southern University are considered).
3. Completed a minimum of 15 credit hours, and enrolled in at least 12 credit hours during the time of application. Total credit hours must reflect at least 4 credit hours completed from Area D and/or F.
4. Completed Human Anatomy and Physiology I (KINS 2531)/Human Anatomy and Physiology I Laboratory (KINS 2511) and Human Anatomy and Physiology II (KINS 2532)/Human Anatomy and Physiology II Laboratory (KINS 2512) with a “C” or better (Completed no later than Summer B term of the application year).
5. Attained a minimum grade of “C” in all Area D and Area F course work attempted.
6. Students must show proof of the following documents:
   a. Official / final transcripts for all work completed to date.
   b. Blood-borne pathogen training. Contact athletic training faculty for information regarding the training session.
   c. Documented observation credit hours in an approved athletic training environment. These credit hours must be documented and recorded by a certified athletic trainer. These credit hours must have been accrued within the last year.
   d. A one-page, double-spaced, typed writing sample addressing the following: the single most important attribute for an effective allied health care provider; personal traits or attributes you possess which will allow you to become an effective allied health care provider.
   e. Three letters of recommendation.
   f. Completed a personal interview with the Athletic Training Admission Committee.

Upon Formal Acceptance Into the Program
Students must show proof of the following documents:
1. Proof of CPR/AED for the Professional Rescuer and First Aid Responding to Emergencies Certification.
2. Record of annual physical.
3. Record of immunizations.
4. Technical standards signed.
5. Student liability insurance.
6. Health insurance.
7. Background check.

All of the Following Requirements Must Be Met for Student Progression in the Program
1. Students must maintain a total institution GPA of 2.50 or better on all course work.
2. Students must successfully complete all clinical field experiences related to course content and objectives.
3. Students must adhere to the ATEP dress code.
4. Students must provide their own transportation for off campus experiences.
5. Students must not have been found in violation of the Georgia Southern Student Conduct Code. Students found in violation of the Student Conduct code, may, depending upon the seriousness of the violation, be placed on program probation or dismissed from the program.
6. Students must not violate the NATA Code of Ethics for practicing athletic trainers. Students found in violation of the Code of Ethics will be dismissed from the program.

Honors in Athletic Training
To graduate with a Honors in Athletic Training, a student must:
1. be admitted to the University Honors Program;
2. successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters
3. successfully complete and present an Honors Thesis or Capstone Project at the time of graduation;
4. be in good standing in the University Honors Program at the time of graduation

Other Program Requirements
Students are responsible for:
1. Transportation for off-campus clinical sites.
2. The purchase of their uniforms.
3. The cost of a background check.
4. Maintaining personal health and liability insurance.
5. Additional expenses may include the cost of professional dues and the Board of Certification Examination.

Transfer Student Admission Into the Athletic Training Major
Prospective students who wish to transfer to Georgia Southern University and pursue a degree in Athletic Training must apply for the program and submit to the same selection process as other candidates. Please refer to application for prerequisites. Acceptance of transfer prerequisite or regular course work is subject to the approval of the Registrar’s Office and the Program Director pending review of content (syllabus, course description, etc.). Other courses may be counted toward the degree requirements for Athletic Training; however, every student must take the following courses at Georgia Southern University in order to receive a degree in Athletic Training:

<table>
<thead>
<tr>
<th>Credit Hours</th>

</table>
Clinical experiences obtained outside of Georgia Southern University Athletic Training Education Program will not be accepted.

An athletic trainer is a qualified allied health care professional educated and experienced in the management of health care problems associated with physical activity. In cooperation with physicians and other allied health care personnel, the athletic trainer functions as an integral member of the health care team in secondary schools, colleges and universities, professional sports programs, sports medicine clinics, and/or other health care settings. The athletic trainer functions in cooperation with medical personnel, athletic personnel, individuals involved in physical activity, parents, and guardians in the development and coordination of efficient and responsive athletic health care delivery systems. The athletic trainer’s professional preparation is directed toward the development of specified competencies in the following domains: risk management and injury prevention, pathology of injuries and illnesses, assessment and evaluation, acute care of injury and illness, pharmacology, therapeutic modalities, therapeutic exercise, general medical conditions and disabilities, nutritional aspects of injury and illness, psychosocial intervention and referral, health care administration, professional development and responsibilities. Through a combination of formal classroom instruction and clinical experience, the athletic trainer is prepared to apply a wide variety of specific health care skills and knowledge within each of the domains. For additional information, contact the Department of Health Sciences & Kinesiology, College of Health Professions, 2115 Hollis Building, (912) 478-0200.

SMGT 4337  Legal Aspects of Sport
HONS 4610  Honors Research Seminar
Elective
Select 3 credit hours of Electives

Total Credit Hours 124

1 If taken in Area A2 or D, use Fundamentals or Guided Electives to complete Area F.
2 If Introductory Physics I (PHYS 1111K) taken in Area D, then Principles of Chemistry I (CHEM 1211K) or Principles of Chemistry II (CHEM 1212K) or Guided Electives required in Area F.
3 Students can substitute courses for the internship with adviser approval.
4 To graduate with a Honors in Exercise Science, a student must:
   • be admitted to the University Honors Program;
   • successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters
   • successfully complete and present an Honors Program at the time of graduation
   • be in good standing in the University Honors Program at the time of graduation

Program Admission Criteria
• Admission to Georgia Southern University
• A total institution GPA of 2.0 or better on all course work attempted (transfer course work and work completed at Georgia Southern University are considered)
• Completed a minimum of 30 credit hours
• A minimum grade of “C” in all Area D and F course work attempted

Program Progression Requirements
• Students must earn a minimum grade of “C” in all courses in Area F and within the major requirements, including guided major electives.
• Students must also earn a minimum grade of “C” in a prerequisite course prior to registering for an advanced course.

Note: Exercise Science Majors must complete Fundamentals to include:

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1112</td>
</tr>
<tr>
<td>CHEM 1211K</td>
</tr>
<tr>
<td>CHEM 1212K</td>
</tr>
<tr>
<td>PHYS 1111K</td>
</tr>
</tbody>
</table>

Students not able to complete Fundamentals in Areas A2, D, and F will take these courses as part of their Guided Major Electives. Students may elect to substitute Calculus I (MATH 1441) and Principles of Physics I (PHYS 2211K) for Fundamentals with adviser approval. Students should take Introduction to Psychology (PSYC 1101) as one of their courses to complete Area E requirements.

Advisement

Policies, Requirements and Standards - Gerontology

Students who complete the application for admission to the certificate program and return it to the Department of Health Science and Kinesiology will be invited to meet with an assigned faculty member to discuss the proposed program of study. A minimum grade of C or better must be earned in each course for the certificate to be awarded on the undergraduate level. The gerontology certificate program consists of six courses (18 semester hours), and all courses listed are pre- or co-requisites to GER 5520.

*If STAT 2231 is taken in Area D, select 6 credit hours from the list of courses.*

**Admission Requirements**

In addition to a completed health sciences program application made to the department, students must seek regular admission to Georgia Southern University. Students must be eligible for Quantitative Reasoning (MATH 1001) or Composition I (ENGL 1101), and must undergo a formal interview conducted by a health sciences faculty member.

**Progress Requirements**

All students are required to submit evidence of liability insurance and a health assessment prior to beginning their practicum.

Students must complete the degree program within six consecutive years from the date of their initial admission to the major. Students who do not complete the program within this time limit must apply for readmission, meet current criteria for admission, and have their previous credits calculated. Students who are granted readmission must meet course requirements in effect at the time of readmission. A minimum grade of C or better must be earned in each course in the major.

It is recommended that all bachelor of health science students have current CPR certification at the time of graduation.

Total Credit Hours 124

Admission Requirements

In addition to a completed health sciences program application made to the department, students must seek regular admission to Georgia Southern University. Students must be eligible for College Algebra (MATH 1111) or Composition I (ENGL 1101), and must undergo a formal interview conducted by a health sciences faculty member.

Progression Requirements

All students are required to submit evidence of liability insurance and a health assessment prior to beginning their practicum.

Students must complete the degree program within six consecutive years from the date of their initial admission to the major. Students who do not complete the program within this time limit must apply for readmission, meet current criteria for admission, and have their previous credits calculated. Students who are granted readmission must meet course requirements in effect at the time of readmission. A minimum grade of C or better must be earned in each course in the major.

Senior students must successfully complete the bachelor of health science exit exam, as well as the university's general education exit exam, during the last semester before graduation. It is recommended that all bachelor of health science students have current CPR certification at the time of graduation.

Admission Requirements

In addition to a completed health sciences program application made to the department, students must seek regular admission to Georgia Southern University. Students must be eligible for Quantitative Reasoning (MATH 1001) or Composition I (ENGL 1101), and must undergo a formal interview conducted by a health sciences faculty member.

Progression Requirements

All students are required to submit evidence of liability insurance and a health assessment prior to beginning their practicum.
Students must complete the degree program within six consecutive years from the date of their initial admission to the major. Students who do not complete the program within this time limit must apply for readmission, meet current criteria for admission, and have their previous credits calculated. Students who are granted readmission must meet course requirements in effect at the time of readmission. A minimum grade of C or better must be earned in each course in the major.

It is recommended that all bachelor of health science students have current CPR certification at the time of graduation.

Advisement
For questions regarding specific undergraduate program requirements, please contact the Waters College of Health Professions Student Success Center.

Dietetics Emphasis (Didactic Program in Dietetics) Admission Criteria

Initially accredited Didactic Program in Dietetics (DPD), Accreditation Council for Education in Nutrition and Dietetics (ACEND), Academy of Nutrition and Dietetics (AN&D).

Application Process for Admission to the Dietetics Emphasis (Didactic Program in Dietetics)

Admission to the program is made for the Fall semester. The following completed Admission Package must be turned in to the DPD Director in order for the candidate to be considered:

1. Official Application
2. Letter of Intent
3. Verification of grades with official transcripts of all schools attended including this university (WINGS accepted); mid-term verification of grades for all required courses in process. (Students in the process of taking any of the prerequisite courses for the emphasis will be required to submit a mid-term grade from the professor. Final acceptance into the program is contingent upon the final grade received in the courses.)
4. Completion of an interview with Didactic Program in Dietetics faculty, basic nutritional math skills examination, and nutrition-related language skills writing assessment.

Application deadline: February 15th (If this date falls on a weekend or holiday then the application is due on the next working day.)

Program Progression Requirements

1. Students must earn a minimum grade of "C" in all courses within the major including non-major requirements.
2. Students must maintain a 2.8 overall GPA. An admitted student whose overall GPA falls below 2.8 will be on probation for one semester. If the student's GPA remains below 2.8 after the probation semester, the student will be dropped from the program. The student may be re-admitted to the program only by the application process outlined above.
3. Students must complete the courses in sequence and complete all prerequisites. If a course is dropped or failed, then the student will be out of sequence and graduation will be delayed. These students may have to reapply to the dietetics emphasis depending on circumstances, availability of space, and time elapsed between classes.

Honors in Nutrition and Food Science

To graduate with Honors in Nutrition and Food Science a student must:

- Be admitted to the University Honors Program;
- Successfully complete at least three credit hours of Honors Research Seminar (HONS 4610) over three semesters;
- Successfully complete and present an Honors Thesis or Capstone Project;
- Be in good standing in the University Honors Program at the time of graduation.

Program Admission Criteria

- 2.0 GPA for Community Nutrition and Food Science/Food Service Administration Emphases.
- See below for admission criteria for the Dietetics Emphasis.

Program Progression Requirements

- Students must earn a minimum grade of "C" in all courses in Area F and within the major including non-major requirements.
- Students must maintain a 2.8 overall GPA. An admitted student whose overall GPA falls below 2.8 will be on probation for one semester. If the student's GPA remains below 2.8 after the probation semester, the student will be dropped from the program. The student may be re-admitted to the program only by the application process outlined above.
- Students must also earn a minimum grade of "C" in a prerequisite course prior to registering for an advanced course.
- Students must earn a minimum grade of "C" in all courses within the major including non-major requirements.
- Students must complete the following courses with a minimum grade of "C":

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 2030</td>
<td>Survey of Accounting</td>

</tr>
<tr>
<td>STAT 2231</td>
<td>Introduction to Statistics I</td>
</tr>
</tbody>
</table>

- Students transferring in from an ACEND-accredited Didactic Program in Dietetics from another school are required to have their transcript(s) evaluated by the Didactic Program in Dietetics (DPD) Director who is responsible for determining which dietetics courses remain to be taken and which dietetics courses receive transfer credit hour. Adequate time must be allowed for scheduling, review and notification. Students from other institutions are bound by admission and progression requirements of the Dietetics program at Georgia Southern University.
4. Majors that drop from the program due to personal reasons and wish to reapply at a later date must have courses and skills reevaluated to determine eligibility for the current curriculum and program.

Note: Students transferring into the Nutrition and Food Science: Dietetics Emphasis from other majors or NTFS emphases may not be able to graduate necessarily within the traditional four-year period. In addition, students who transfer in with less than a "C" grade will be required to repeat courses to meet prerequisite and major requirements.

Program Admission Criteria

• Students must have completed all Area F requirements with a minimum grade of "C" before admission to the program.
• Students must have an overall 2.25 GPA to enroll in the internship.

Program Progression Requirements

• Students must earn minimum grade of "C" in all Area F courses and within the major requirements, including guided electives.

Honors in Exercise Science

To graduate with a Honors in Exercise Science, a student must:

• be admitted to the University Honors Program;
• successfully complete at least three credit hours of Honors Research Seminar (HONS 4610);
• successfully complete and present an Honors Thesis or Capstone Project at the time of graduation;
• be in good standing in the University Honors Program at the time of graduation.

Advisement

Contact the College of Health Professions Student Services Center, Hollis Building, Room 0101, (912) 478-1931 for more information regarding admission and advising requirements.

Department of Rehabilitation Sciences

Welcome to the Department of Rehabilitation Sciences located on Georgia Southern University Armstrong Campus in Savannah.

The department offers undergraduate (http://chp.georgiasouthern.edu/rehabilitation/undergraduate-majors) and accredited graduate programs (http://chp.georgiasouthern.edu/rehabilitation/graduate-programs) in rehabilitation sciences and communication sciences and a doctoral degree in physical therapy.

Our facilities include the RiteCare Center for Communication Disorders (http://chp.georgiasouthern.edu/rehabilitation/centers-and-labs/ritecare-center-for-communication-disorders), located in the Armstrong Center on the Armstrong Campus, and the 3200-square-foot, state-of-the-art Biodynamics and Human Performance Center (https://chp.georgiasouthern.edu/about/centers-and-outreach/biodynamics-and-human-performance-center) operated in collaboration with the Department of Health Sciences and Kinesiology. The Biodynamics and Human Performance Center comprises three specialized laboratories: the Biomechanics Laboratory, the Muscle Performance Laboratory and the Exercise Physiology Laboratory. Other facilities include an anatomy lab, a pulmonary function lab and a clinical athletic training facility. We have also recently acquired an Anatomage Medical Table, a state-of-the-art anatomy visualization system.

Admissions

Admission to either Bachelor of Science degree requires regular admission to Georgia Southern University. Students must be eligible for College Algebra (MATH 1111) and Composition I (ENGL 1101).

Progression Requirements

- Students must attain a grade of C or better in all required courses in Area D, Area F, and the major area of study, and must maintain an overall minimum grade point average (GPA) of 2.0. However, students who are earning a GPA less than 2.5 should strongly consider another major, as most graduate programs will require a minimum GPA of 2.5 or higher.
- Students who receive a D or F in courses in Area D, Area F or the major area of study are allowed to repeat these courses only once.

Advisement

For questions regarding specific undergraduate program requirements, please contact the Waters College of Health Professions Student Success Center.
Receiving a D or F in any of these courses more than once will result in dismissal from the program.

- Students presently enrolled at Georgia Southern who are seeking admission to the Rehabilitation Science Bachelor's Degree program or students who are wishing to transfer into the Rehabilitation Science Bachelor's Degree program should have both an overall and science GPA of 2.5 or higher.

Advisement

For questions regarding specific undergraduate program requirements, please contact the Waters College of Health Professions Student Success Center.

School of Nursing

The School of Nursing is nationally recognized as a top 100 nursing program and is committed to helping meet the needs of the multicultural rural populations of the region by providing high quality nursing education programs. The nursing program incorporates high academic and ethical standards and a caring, learning environment for students consistent with the mission and objectives of the university. We are dedicated to graduating nursing professionals who are leaders and capable of meeting the health care challenges of the 21st century. Both the undergraduate and graduate curricula have innovative classroom, clinical, and community experiences to prepare students to promote the health of populations. The School of Nursing represents a strong and extraordinary community of excellent students, well-prepared faculty, dedicated staff, and supportive alumni and friends who promote and advance the quality, accessibility, and availability of nursing care for the people of southeast Georgia and beyond.

The baccalaureate degree in nursing, master's degree in nursing, Doctor of Nursing Practice and post-graduate APRN certificate at Georgia Southern University are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation). All prelicensure programs are fully approved by the Georgia Board of Nursing. Georgia Southern University is accredited with the Southern Association of Colleges and Schools Commission on Colleges.

Mission & Vision

School of Nursing Mission Statement

The Mission of the Georgia Southern School of Nursing is to prepare a diverse student population to become professional nurses through academic excellence to promote health and enhance the quality of life for citizens in the rural and urban communities they serve.

School of Nursing Vision Statement

The School of Nursing aspires to be the premier center for academic excellence in professional nursing education for the Southeastern United States through transformative learning opportunities that promote a culture of caring and a legacy of lifelong scholarship, leadership and responsible community service and stewardship.

Accreditation

The Georgia Southern University School of Nursing is fully accredited by all appropriate national, state, and specialized/professional nursing accrediting agencies. Accrediting agencies assure that programs in nursing education engage in effective educational practices in the preparation of nurses. A determination of accreditation by an accrediting agency is an indication of confidence in the educational institution to offer a program of quality, deserving of public approbation. (NOTE: Universities and colleges in the United States must hold appropriate regional accreditation in order to be recognized to award higher education degrees. All nursing programs must hold approval from their State Board of Nursing. Voluntary program accreditation by one specialized/professional nursing accreditation body is highly desirable, particularly to assure graduates of continued educational and employment mobility.) The Georgia Southern University holds the following accreditation and approvals:

1. Southern Association of Colleges and Schools Commission on Colleges of the (SACSCOC). This regional accreditation grants Georgia Southern University the right to award Associate, Bachelor, Master, Specialist, and Doctorate degrees.

2. Georgia Board of Nursing. (Required Approval). The Georgia Board of Nursing grants Full Approval to nursing programs who maintain compliance with the Georgia Board of Nursing Rules and Regulations as evidenced by: annual reports submitted by the program, site visit reports, and appropriate passing percentages of first-time writers on the NCLEX-RN examination. Inquiries regarding the accreditation status of the program can be directed to: Georgia Board of Nursing, 237 Coliseum Drive, Macon, GA 31217-3858. Phone: 912-207-1640. Active Current Approval Period.

3. Commission on Collegiate Nursing Education (CCNE). (Voluntary Specialized/Professional Accreditation). The Commission on Collegiate Nursing Education is the premier accrediting agency recognizing professional baccalaureate and graduate programs in nursing in the United States. Georgia Southern University School of Nursing is approved for its baccalaureate and graduate programs by the Commission on Collegiate Nursing Education. To be accredited, the following are required:

a) The nursing program is viable and appears, based upon the review of submitted materials, to be conducted in a manner that will enable compliance with CCNE accreditation standards.

b) The institution has a history of seeking and ensuring continuing accreditation and program recognition by appropriate accrediting and regulatory agencies.

c) The institution has ensured the continuing viability of the nursing education program by being responsive to the concerns of accrediting and regulatory agencies.

For further information about the status of the program, please contact the Commission on Collegiate Nursing Education at the following address: Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036-1120. Phone: (202) 887-6791. Current Accreditation Period: 2020 for BSN, RN-BSN, and MSN; 2025 for the BSN-DNP.

Admission Requirements

Admission Criteria to the School of Nursing (SON) Accelerated BSN Major

1. A bachelor’s degree from an accredited university
2. Admission to Georgia Southern University

3. A grade point average of 3.2 on grades earned in Statistics, Anatomy and Physiology I and II, Microbiology, Pathophysiology, and Lifespan Development without repetition of failed science courses to achieve a passing grade.

4. Must achieve a score of at least 75% on the HESI Admission Assessment (A2) Exam in each of the following subject areas: Anatomy & Physiology, Grammar, Reading Comprehension, Vocabulary and Knowledge, and Math.

5. Completion of a pre-admission interview

6. Verification through signature that the student will not be employed at any time while enrolled in the accelerated program

7. Ability to meet all legal requirements for licensure

8. Post-baccalaureate students must complete Statistics and all of Area F courses with a grade of C or higher

9. Post-baccalaureate students will be given credit for completion of Areas A, B, C, D, E, and Healthful Living and FYE, with the exception of Statistics in Area D and US and Georgia History and Government

10. Sciences in Area F must have been completed within the past 5 years with a grade of C or higher

11. If Anatomy and Physiology I and II are not taken at the same educational institution, syllabi must be provided for review.

12. All core courses, including US and Georgia History and Government, must be completed prior to starting the ABSN curriculum

13. Students with outstanding admission requirements must provide proof of meeting the requirements before the beginning of the admitted semester. Failure to do so will result in removal from the admitted list.

14. Must be able to meet the Core Performance Standards

15. Clinical agencies utilized by the School of Nursing require criminal background checks and/or drug testing prior to acceptance of the student into clinical facilities. Students who do not pass the criminal background check and/or drug test will be unable to attend clinical courses and therefore will be unable to complete their program of study resulting in course failure. Any fees or cost associated with background checks and/or drug testing are the responsibility of the student

16. Students who fail out of any nursing program may be considered for readmission to Georgia Southern University’s nursing program after a period of 5 years. Only one reappptiment in the nursing program is permitted. The student must meet all current entry requirements. Upon acceptance, the student will be required to complete all nursing courses from the beginning.

17. If a student withdraws from the ABSN program, they are eligible to apply to the next fall admission cycle of the traditional BSN program.

18. A student who fails one ABSN course will need to meet with the ABSN Program Director to review their program of study. The student may be given the opportunity to join the traditional BSN program on a space available basis. A student who fails more than one ABSN course will be dismissed from the program.

**Total Credit Hours**: 126

1. Environmental Biology is not an option.

**Admission Requirements**

**Admission Criteria to the School of Nursing (SON) Traditional BSN Major**

Admission to Georgia Southern University. All transfer credits must be evaluated by the Registrar’s office and posted on the Georgia Southern transcript upon official acceptance to the University.

1. Must be able to meet the Core Performance Standards (See website for details)
2. A minimum overall GPA of 3.0 on all attempted courses on the Program of Study for the SON
3. Must achieve a score of at least 75% on the HESI Admission Assessment (A2) Exam in each of the following subject areas: Anatomy & Physiology, Grammar, Reading Comprehension, Vocabulary, General Knowledge and Math
4. Completed 12 hours of the 20 hours of required lab science course work with a minimum grade of “C” in both the lab and didactic portions of each course
5. Successful completion of 54 semester hours in appropriate core courses prior to admission
6. Sciences in Area F must have been completed within the past 5
7. A grade of C or higher is required for Core Areas A, D, and F courses
8. Repeating more than one course or repeating one course more than once in Areas A, D, or F to earn a passing grade of C or better, makes the student ineligible for admission
9. Post Baccalaureate students must have a minimum grade point average of 3.0 on grades earned in Statistics, Anatomy and Physiology I & II with labs, Microbiology, Pathophysiology and Lifespan Development to be eligible to apply to the program
10. All core courses and graduation requirements must be completed before beginning senior II semester of nursing
11. Students admitted to the nursing major must maintain a minimum overall 3.0 GPA and a minimum grade of “C” in all area A, D and F courses prior to beginning the first nursing course
12. Students with outstanding admission requirements must provide proof of meeting the requirements to the Department Secretary before the beginning of the admitted semester. Failure to do so will result in removal from the admitted list
13. Clinical agencies utilized by the School of Nursing require criminal background checks and/or drug testing prior to acceptance of the student into clinical facilities. Students who do not pass the criminal background check and/or drug test will be unable to attend clinical courses and therefore will be unable to complete their program of study resulting in course failure. Any fees or cost associated with background checks and/or drug testing are the responsibility of the student.
14. Students who fail out of any nursing program may be considered for readmission to Georgia Southern's nursing program after a period of 5 years.

Program Duration Limits
All courses for the nursing program must be completed within a total of three consecutive calendar years.

Progression Requirements

1. Precandidate students must earn a grade of “C” in all required nursing courses in the major to progress in the nursing program.
2. Precandidate students earning a grade lower than “C” in a nursing course or withdrawing from a nursing course, must meet with the course coordinator to review the student’s program of study. Before progressing, the student must repeat the course at the next offering on a space available basis. After withdrawal from or earning a grade less than a C in a nursing course, a student’s ability to continue or to progress in the nursing program will be contingent on a review of the student’s record and approval of the Undergraduate Student Affairs Committee.
3. Students who earn an unsatisfactory in a clinical practicum rotation may not continue in any clinical practicum rotation during the same semester until their academic and clinical performance is individually reviewed. An unsatisfactory performance in a clinical practicum rotation represents failure of the course.
4. If approved, a nursing student may repeat a required nursing course only one time. After two required nursing course failures, the student will be dismissed from the nursing program.
5. Dismissal from the nursing major does not affect the ability of the student to progress in the University in another major.
6. Strict adherence to the American Nurses’ Association Nursing: Scope & Standards of Practice is required of all nursing students.

Readmission
Application for re-entry after an absence of more than one year will be evaluated on an individual basis. Re-entry is not guaranteed and may include retaking nursing courses completed at a prior time.

Admission by Transfer
The School of Nursing at Georgia Southern University welcomes transfer students who meet the admission requirements and the following nursing transfer credit hour conditions. Credit hours for courses taken at schools other than Georgia Southern University will be considered on an individual basis using the following guidelines:

1. Transfer students must apply using the same admission criteria for application as all nursing applicants.
2. Transfer credit hours for non-nursing courses will be evaluated by the Admissions Department of the University.
3. Transfer credit hours for nursing courses will be evaluated by the BSN Program Director.
4. Students having failures (D or less) in previous nursing courses may be considered for admission to Georgia Southern’s nursing program after a period of 5 years.

Other Program Requirements
Students are responsible for:
- Transportation for off-campus practicums and field trips.
- The purchase of uniforms, white shoes, stethoscope, and sphygmomanometer.
- Maintaining personal health and accident insurance coverage and health professions student liability insurance.
- Fees for selected achievement tests during junior and senior years.
- Additional expenses which may include the cost of a nursing pin, academic regalia rental, and state board licensing examination fees.

| Total Credit Hours | 120 |

1. Environmental Biology is not an option.
2. Following admission to the nursing major, students have the opportunity to challenge by examination a total of 25 hours of course credit.

Admission Criteria to the School of Nursing (SON) Advanced Placement Track (APT) for LPN/LVN to B.S.N.

Program Information
The School of Nursing offers an innovative program, the Advanced Placement Track, whereby the Licensed Practical Nurse (LPN) is eligible to earn college credit for educational advancement. The faculty recognizes
that Licensed Practical Nurses have knowledge and skills which support the opportunity for advanced placement.

Eligibility for advanced placement is based on academic transcripts, licensure verification, basic nursing skills verification, and achieve a score of at least 75% on the HESI Admission Assessment (A2) Exam. Students have the opportunity to challenge by examination a total of 25 hours of nursing course credit.

The LPN accepted to Georgia Southern University’s School of Nursing is seen by the LPN Advisor for a description of the APT program, consultation, and curriculum planning. Advisement is critical for the LPN to best be prepared to apply for admission to the Baccalaureate Nursing Program (BSN) when core curriculum requirements have been met.

Admission to the BSN program is competitive. The LPN seeking advanced placement must meet the same admission requirements as others. The following is a guide for the LPN planning to earn a BSN at Georgia Southern University. See the School of Nursing website for more detailed information.

After admission to Georgia Southern University, the student will make an appointment with the LPN Advisor. The student will need to bring any previous higher education transcripts to the advisement appointment.

1. The LPN’s transcript will be evaluated and must meet the following requirements to be eligible for admission to the BSN program:
   - Complete 54 semester hours of core curriculum with grades of “C” or better in areas A, D, and F.
   - All applicants must achieve a score of at least 75% on the HESI Admission Assessment (A2) Exam in each of the following areas: Anatomy and Physiology, Grammar, Reading Comprehension, Vocabulary and Knowledge, and Math. Further information is available in the School of Nursing or on our website. An overall GPA of 2.7 in all prerequisite courses.

2. The student will have the opportunity to challenge up to 4 nursing courses (Skills, Adult Health I, Mental Health, Women’s and children’s) for a total of 25 credit hours. Upon acceptance into the nursing program, the student must meet with the LPN Advisor to review challenge options. Students must meet all of the legal requirements for licensure. See Baccalaureate Degree Nursing section in the Georgia Southern University Catalog: Georgia Board of Nursing Legal Requirements.

3. Be aware that science course credits in Core Area F may not have been earned longer than 5 years before the time of admission.

4. A grade of C or higher is required for areas A, D, and F courses. Repeating any course in areas A, D, and F in order to achieve a passing grade of at least C reduces the student’s chance for admission to the School of Nursing. Repeating more than one course in each (area A, D, and F) to earn a passing grade of at least C makes the student ineligible for admission to nursing.

Advisement

For questions regarding specific undergraduate program requirements, please contact the Waters College of Health Professions Student Success Center.

Minors - Optional

Total Credit Hours 120

1 The RN-BSN Program is a participant in the Georgia RN-BSN Articulation Model for registered nurses returning for the Bachelor of Science in Nursing (BSN) degree. After successful completion of 6 credit hours (grade of C or higher) of junior level RN-BSN nursing courses, RN students will be awarded 29 hours of proficiency credit.

Program Admission Criteria

RN-BSN Program applicants must meet the University entrance requirements as described in the University Undergraduate Catalog. All applicants must apply for admission to both the University and the School of Nursing RN-BSN Program. Once admitted to the University, students should contact the School of Nursing RN-BSN Program for advisement. Requirements for admission into the School of Nursing RN-BSN Program are based on requirements in place at the time of application to the Program. In order to be considered for admission to the RN-BSN Program, applicants must meet the following requirements:

1. Attained admission to Georgia Southern University and requested official transcript(s) for all college work attempted, assuring that the transcripts have been received in the Admissions Office by the announced deadline.

2. Achieved a minimum cumulative grade point average of 3.0 or better on all attempted course work or a minimum of 2.7 for provisional
admission (full admission granted after earning a "B" or better in 6 credit hours of nursing courses).
3. Completed all Area D and Area F courses with a minimum grade of "C" and have no more than 10 credit hours of core courses left to complete. All core courses must be satisfied before or during the last semester of the RN-BSN Nursing Program.
4. Hold current Georgia RN licensure in good standing (proof of licensure will be validated by the RN-BSN Program).
5. Submitted the online RN-BSN application.
6. RN applicants must have met the following requirements after admission to the RN-BSN Program and before enrollment in the first nursing course:
   a. Participated in the RN-BSN Program orientation session. This orientation replaces the required University SOAR Orientation
   b. Meet RN-BSN Program Clinical Course requirements of:
      i. current American Heart Association CPR for Health Care Providers’ certification;
      ii. health professions student liability insurance

Progression Requirements
1. RN-BSN students must earn a minimum grade of "C" in all required nursing courses in the major in order to progress in the nursing program. For students admitted under provisional acceptance, a minimum grade of "B" must be earned in the first 6 credit hours of coursework or the student will be unable to progress and will be dismissed from the RN-BSN Program.
2. After withdrawal from a nursing course for any reason, a student’s ability to continue or to progress in the nursing program will be contingent on a review of the student’s record and approval of the Undergraduate Student Affairs Committee.
3. If approved, a nursing student may repeat a required nursing course only one time.
   a. A student who earns a "D" or an "F" in a required nursing course and wishes to continue in the major must write a letter directed to the RN-BSN Director requesting permission to continue in the nursing major. Students should submit the letter a minimum of one week prior to the anticipated date of reentry to the program. Requests to repeat a course are considered by the School of Nursing Undergraduate Student Affairs Committee on an individual basis and the student is notified in writing of the decision of the Committee. If approval is granted, the student may repeat the course at its next offering pending space availability.
   b. Students given permission to repeat a required nursing course will be expected to complete a supplemental study program to remediate any areas of deficit identified by the student’s prior performance in the course. Approval for repeating a required nursing course and for progression in the nursing program is dependent on the reasons for unsuccessful performance in the course. Denial of a request to repeat a required nursing course will result in the dismissal of the student from the nursing program. The student will be notified in writing of the Undergraduate Student Affairs Committee’s decision.
   c. After failure of two required nursing courses, the student will be dismissed from the nursing program.
4. Dismissal from the nursing major does not affect the ability of the student to progress in the University in another major.
5. Strict adherence to the American Nurses’ Association Nursing: Scope & Standards of Practice is required of all nursing students. Nursing students who are Registered Nurses are held accountable to the Georgia Nurse Practice Act for Registered Nurses. Failure to comply with these professional standards will result in review and action by the School of Nursing faculty and could result in the student’s dismissal from the nursing program.
6. Throughout the program, students are responsible for maintaining a current Georgia nursing license and professional liability insurance.
7. Students are responsible for paying a graduation fee in the final semester of the program, and any optional graduation expenses such as a nursing pin or academic regalia.

Advisement and Other Information
For advisement or additional information, contact the RN-BSN Program Director at scarey@georgiasouthern.edu
Science and Mathematics

In the College of Science and Mathematics, Bachelor of Science or Bachelor of Arts degrees can be pursued in the following majors: Biochemistry, Biology, Chemistry, Geography, Geology, Mathematics, and Physics. Minors are available in Biochemistry, Biology, Geographic Information Science, Geography, Geology, Mathematics, Military Science, and Physics. For students in any major, the Department of Military Science administers the Army ROTC program which leads to a commission as a second lieutenant at the time of graduation. The College also offers a certificate in Actuarial Science and numerous Master of Science programs.

Vision

Within this decade, the College of Science and Mathematics will be recognized as a national leader in the development of innovative curricula and for its dedicated faculty who integrate distinguished scholarship with superior undergraduate and graduate education.

Mission

The College of Science and Mathematics strives for excellence and innovation in undergraduate and graduate research, teaching practices, and service to our community. With an emphasis on high-impact educational practices, our highly-respected faculty foster learning in the classroom and beyond by promoting student engagement and offering cutting-edge research opportunities to students. Our degree programs prepare students to apply scientific discoveries which inform education, health, natural resource protection, and economic development. By combining state-of-the-art research labs and teaching spaces with numerous regional, national, and global collaborations, the College of Science and Mathematics is a leader in producing graduates to meet tomorrow's challenges.

Visit us at our web site at cosm.georgiasouthern.edu.

Advising

Science and mathematics majors are assisted by professional advisors specifically-trained on the progression requirements for College of Science and Mathematics programs. Students must meet with their academic advisor at least once each semester to discuss major requirements, course selection, registration, personal goals and other student concerns. The College also provides specialized advisors who will guide and assist students who seek to pursue a medical professions program of study such as Pre-Medicine, Pre-Dental Medicine, Pre-Veterinary Medicine, Pre-Pharmacy, Pre-Physician Assistant (PA), or Pre-Optometry. While advisors provide information and guidance, final responsibility for completion of all degree requirements, including those for pre-professional programs, rests with the student.

Students with questions regarding advisement may contact the College of Science and Mathematics advising using the information provided below:

Department of Biology
The Department of Biology, through the shared resources of multiple campuses, offers study in the field of biological sciences to provide students with a broad, foundational education through authentic learning experiences. The Department offers two undergraduate degree programs, a Bachelor of Science with a Major in Biology (BS) and a Bachelor of Arts with a Major in Biology (BA).

The goal of both programs is to provide students with the knowledge and skills necessary to pursue professional careers in the biological sciences, health sciences, and science education, or to obtain an advanced degree in science. Undergraduate students in both the BS and BA programs practice up-to-date research and/or laboratory techniques, critical thinking, and independent learning. Additionally, students in the BA gain interdisciplinary experiences acquired through minor and language requirements. In establishing these goals and activities, the faculty follow the recommendations for standards established by the National Association of Biology Teachers and the American Association for the Advancement of Science.

The faculty is dedicated to providing students a challenging education that provides a foundation for life-long learning and an appreciation of biological processes and biological diversity. Southeast Georgia is a biologically rich and ecologically diverse area that encompasses coastline, wetlands, woodlands, and cities. Our student-centered programs support the University's mission to develop a vibrant learning environment that promotes the learning of biological processes and biological diversity. The Department of Biology supports the University's mission in promoting scientific expectations, and individual responsibility for academic achievement. Our student-centered programs further support the University's mission to develop a vibrant learning environment for majors exemplified by a free exchange of ideas, high academic support, and technological advancement, health services, sustainability, citizenship and social responsibility.

Programs

Majors
- Biology B.A. (p. 221)
- Biology B.S. (p. 222)

Minors
- Biology Minor (p. 223)
Electives
Must include at least 2 hours of upper-division (3000-level and above) coursework

Total Credit Hours 124

1 May be satisfied by a secondary school background showing four (4) years or more of preparation in a single language

Other Program Requirements

- Students must have a combined average of "C" or better for all biology courses.
- Students must earn a "C" or better for the pre-requisite biology courses BIOL 1107, BIOL 1107L, BIOL 1108, BIOL 1108L, BIOL 3131, BIOL 3133, BIOL 3134.
- Students must successfully complete the Major Field Test as a departmental exit exam.
- Students who wish to change their major to Biology must have a grade of "A" in both courses, or an "A" and a "B".
- Transfer students from other institutions who wish to major in Biology must have a GPA of 2.0 or better on all credit hours attempted at other institutions as well as those hours attempted at Georgia Southern.

Honors in Biology

For students entering the University Honors Program as a freshman and seeking to complete the Departmental Honors in Biology, it is highly recommended that these freshmen complete:

Freshman/Sophomore Level Courses

</tbody>
</table>

A student who does not enter the Departmental Honors in Biology Program as a freshman will be considered for admittance based on the following criteria:

- Freshman Year - Overall GPA of 3.3 or higher, if completed BIOL 1107 and BIOL 1108 must have a grade of "A" in both courses, or an "A" and a "B".
- Sophomore Year - Overall GPA of 3.3 or higher, including completion of BIOL 1107, BIOL 1108, and one intermediate prerequisite (BIOL 3131, BIOL 3133, or BIOL 3134) with a GPA of at least 3.3 in these classes.

Typically, students with 3 semesters or less to complete their degree are not eligible to enter the Departmental Honors in Biology Program.

After entering the Departmental Honors in Biology Program, students are required to complete the required biology honors courses and the capstone experience to earn Departmental Honors in Biology. Students also would be required to maintain a 3.3 overall GPA, including a GPA of 3.3 in courses supportive of the major.

Biology B.S.

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses in Area A1 through Area E.

General Requirements (Core A - E)

Area A2 -- Must take MATH 1112, MATH 1113 or MATH 1441
Area DII -- Must take MATH 1441 if not taken in Area A2 above

A student who does not enter the Departmental Honors in Biology Program as a freshman will be considered for admittance based on the following criteria:

- Freshman Year: Overall GPA of 3.3 or higher, if completed BIOL 1107 and BIOL 1108 must have a grade of "A" in both courses, or an "A" and a "B."
- Sophomore Year: Overall GPA of 3.3 or higher, including completion of BIOL 1107, BIOL 1108, and one intermediate prerequisite (BIOL 3131, BIOL 3133, or BIOL 3134) with a GPA of at least 3.3 in these classes.

Typically, students with 3 semesters or less to complete their degree are not eligible to enter the Departmental Honors in Biology Program.

After entering the Departmental Honors in Biology Program, students are required to complete the required biology honors courses and the capstone experience to earn Departmental Honors in Biology. Students also would be required to maintain a 3.3 overall GPA, including a GPA of 3.3 in courses supportive of the major.

Additional Minor Requirements/Recommendations

A Departmental Advisor must approve all coursework. BCHM 3200 and BCHM 5201 cannot count towards the Biology Minor Students must have a grade of "C" or better in all courses used towards the Minor in Biology.

Environmental Sustainability Interdisciplinary Concentration

Contact

Department of Biology
Dr. Lissa Leege
(912) 478-0800
leege@georgiasouthern.edu

Concentration Requirements: 18 Credit Hours

A total of 18 credit hours are required for the concentration (Global Sustainability and Innovation (TCGT 1530) course and 15 upper division credit hours). Note that students must complete both Global Sustainability and Innovation (TCGT 1530) and their D2 Environmental Science requirement prior to taking upper division courses in the concentration.

TCM 5330 Green Building and Sustainable Construction
TSEC 5333 Industrial Hygiene and Ergonomics 3
TSEC 5334 Hazardous Waste Management
TSEC 5336 Environmental Law 3
Additional Requirement 4
SUST 4730 Practicum in Environmental Sustainability 3

Total Credit Hours 18

1 An additional 12 credit hours of courses with significant sustainability dimension in at least two disciplines other than the major must be completed. Courses may be selected from the list of courses below approved for the concentration. Other courses must be approved by the Director of the Center for Sustainability.
2 Permission of instructor
3 Courses with no prerequisites
4 Practicum in Environmental Sustainability (SUST 4730) is a capstone project in sustainability, conducted with a faculty mentor (generally in the home department) and coordinated by the Director of the Center for Sustainability.

Department of Chemistry and Biochemistry

The Department of Chemistry and Biochemistry offers a well-balanced program for the education of its students. To prepare students for their professional careers, the Department is committed to providing quality teaching and research experiences emphasizing critical and independent thought. The curriculum provides strong innovative instruction in the theory and practice of the chemical sciences. The programs are designed to introduce students to modern laboratory methods and technology using state-of-the-art scientific equipment. The faculty is committed to providing an environment that addresses the individual needs of each student and encourages them to develop their potential through lifelong learning and to be responsible members of their profession and community.

Programs

Majors
- Biochemistry B.S. (p. 224)
- Chemistry B.A. (p. 225)
- Chemistry B.S. (p. 226)

Minors
- Biochemistry Minor (p. 225)
- Chemistry Minor (p. 227)

Biochemistry B.S.

Degree Requirements: 124 Credit Hours

General Requirements (Core A - E) 42

Area A2 -- Must take MATH 1112, MATH 1113 or MATH 1441
Area DII -- Must take MATH 1441 if not taken in Area A2 above

Additional Requirements 4

Area F - Courses Appropriate to Major
CHEM 1211 Principles of Chemistry I
& 1211L
CHEM 1212 Principles of Chemistry II
& 1212L
CHEM 1211K Principles of Chemistry I Laboratory
CHEM 1212K Principles of Chemistry II Laboratory

Additional hours of chemistry, biology, or computer science (if needed)

Major Specific Requirements
Carry over from MATH 1441 Calculus I in Area A or Area D
Carry over from CHEM 2211K/CHEM 2212K Principles of Chemistry I/II in Area F

BIOL 1107 Principles of Biology I
\& 1107L and Principles of Biology I Laboratory
(may count in Area F, if needed) 4

BIOL 1108 Principles of Biology II
\& 1108L and Principles of Biology II Laboratory II
(may count in Area F, if needed) 4

Major Requirements

BIOL 3134 Cell and Molecular Biology 3
CHEM 2100 Analytical Chemistry 4
BCHM 2910 Introduction to Biochemical Research 1-3
CHEM 3401 Organic Chemistry I 4
CHEM 3402 Organic Chemistry II 4
BCHM 3100 Bioinstrumental Chemistry 4
BCHM 3310 Bioinorganic Chemistry 3
BCHM 3510 Biophysical Chemistry 3
BCHM 5201 Biochemistry I 4
BCHM 5202 Biochemistry II 4

Select two credit hours from the list below:

BCHM 3310L Bioinorganic Laboratory
BCHM 3511L Biophysical Laboratory
BCHM 4991 Advanced Biochemical Research

Students must complete 3 additional hours of upper level (BCHM 3000 and above) biochemistry coursework 3

Students must complete 3 additional hours of advisor-approved upper level (BIOL 3000 and above) biology coursework 3

Elective

Select additional elective courses
Must include at least 2 hours of upper-division (3000-level and above) coursework

Total Credit Hours 124

1 While CHEM 1211K/1212K Principles of Chemistry I/II are 4 credit hours, only 3 credit hours will be counted toward Area F. The remaining credit hour of each will be applied toward Major Specific Requirements.

2 May not include BCHM 3200 Principles of Biochemistry

Program Admission Criteria

- Students who wish to change their major to Biochemistry must have a total institution GPA of 2.0 or better in all coursework completed at Georgia Southern.
- Transfer students from other institutions who wish to major in Biochemistry must have a GPA of 2.0 or better on all credit hours attempted at other institutions as well as those hours attempted at Georgia Southern.

Other Program Requirements

- Biochemistry majors must maintain a "C" average in all major coursework which applies toward graduation.

Honors in Biochemistry

To graduate with Honors in Biochemistry, a student must:

- be admitted to the University Honors Program
- complete a capstone project equivalent to three credit hours with a measurable outcome approved by the Department of Chemistry & Biochemistry

- maintain a 3.3 overall GPA, including a minimum GPA of 3.5 in all major courses applied toward graduation.

This degree is certified by the American Chemical Society (ACS).

Biochemistry Minor

Prerequisite(s)

CHEM 1211 Principles of Chemistry I
\& 1211L and Principles of Chemistry I Laboratory
CHEM 1212 Principles of Chemistry II
\& 1212L and Principles of Chemistry II Laboratory

Total Credit Hours 8

Minor Program

CHEM 3401 Organic Chemistry I 4
CHEM 3402 Organic Chemistry II 4
BCHM 5201 Biochemistry I 4
BCHM 5202 Biochemistry II 4

Upper Division Electives

3 additional hours of BCHM courses at the 3000 or 4000 level 3

Total Credit Hours 19

Chemistry B.A.

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses in Area A1 through Area E.

General Requirements (Core A - E) 42

Area A2 -- Must take MATH 1112, MATH 1113 or MATH 1441
Area DII -- Must take MATH 1441 if not taken in Area A2 above

Additional Requirements 4

Area F - Courses Appropriate to Major

CHEM 1211K Principles of Chemistry I
\& 1211L and Principles of Chemistry I Laboratory
CHEM 1212K Principles of Chemistry II
\& 1212L and Principles of Chemistry II Laboratory
MATH 2242 Calculus II 4

PHYS 2211K Principles of Physics I 4
PHYS 2212K Principles of Physics II 4

Additional hours of chemistry, biology, or computer science (if needed).

Major Specific Requirements

Carry over from MATH 1441 Calculus I in Area A or Area D
This degree is certified by the American Chemical Society (ACS).

Chemistry B.S.

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses in Area A1 through Area E.

General Requirements (Core A - E) 42
Area A2 -- Must take MATH 1112, MATH 1113 or MATH 1441
Area DII -- Must take MATH 1441 if not taken in Area A2 above

Additional Requirements 4
Area F - Courses Appropriate to Major
CHEM 1211K Principles of Chemistry I
or CHEM 1211 L Principles of Chemistry I
CHEM 1212K Principles of Chemistry II
or CHEM 1212 L Principles of Chemistry II
CHEM 1211K Principles of Chemistry I Laboratory
CHEM 1212K Principles of Chemistry II Laboratory

Additional hours of chemistry, biology, or computer science (if needed).

Major Specific Requirements
Carry over from MATH 1441 Calculus I in Area A or Area D2 1
Carry over from CHEM 1211K/1212K in Area F 2
CHEM 2900 Principals of Chemistry Research 3
CHEM 2100 Analytical Chemistry 4

Major Requirements
CHEM 3100 Instrumental Analysis 4
CHEM 3300 Inorganic Chemistry 4
CHEM 3401 Organic Chemistry I 4
CHEM 3402 Organic ChemistryII 4
CHEM 3501 Chemical Kinetics and Thermodynamics 4
CHEM 3502 Introduction to Quantum Chemistry 4
CHEM 4900 Chemical Research Experience 4

Major Specific Requirements
Carry over from MATH 1441 Calculus I in Area A or Area D2 1
Carry over from CHEM 1211K/1212K in Area F 2
CHEM 2900 Principals of Chemistry Research 3
CHEM 2100 Analytical Chemistry 4

Major Requirements
CHEM 3100 Instrumental Analysis 4
CHEM 3300 Inorganic Chemistry 4
CHEM 3401 Organic Chemistry I 4
CHEM 3402 Organic ChemistryII 4
CHEM 3501 Chemical Kinetics and Thermodynamics 4
CHEM 3502 Introduction to Quantum Chemistry 4
CHEM 4900 Chemical Research Experience 4

Electives
Select 13-21 credit hours of Electives 13-21
Must include at least 2 hours of upper-division (3000-level and above) coursework

Total Credit Hours 124

Program Admission Criteria

- Students who wish to change their major to Chemistry must have a total institution GPA of 2.0 or better in all coursework completed at Georgia Southern.
- Transfer students from other institutions who wish to major in Chemistry must have a GPA of 2.0 or better on all credit hours attempted at other institutions as well as those hours attempted at Georgia Southern.

Other Program Requirements

- Chemistry majors must maintain a "C" average in all major coursework which applies toward graduation.

Honors in Chemistry

To graduate with Honors in Chemistry, a student must:
- be admitted to the University Honors Program
- complete a capstone project equivalent to three credit hours with a measurable outcome approved by the Department of Chemistry & Biochemistry
- maintain a 3.3 overall GPA, including a minimum GPA of 3.5 in all major courses applied toward graduation

This degree is certified by the American Chemical Society (ACS).

Minor Program

The Chemistry Minor requires 15 credit hours above the 2100 level of which 9 credit hours must be upper division courses. The following courses may NOT be counted in the 15 credit hours for the minor:

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 3700</td>
</tr>
<tr>
<td>CHEM 4790</td>
</tr>
</tbody>
</table>

For individuals seeking teacher certification through MAT, the following courses are strongly recommended as part of the 15 credit hours requirement:

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 2100</td>
</tr>
<tr>
<td>CHEM 3401</td>
</tr>
</tbody>
</table>

For further information regarding Certification, please refer to the College of Education (p. 151) section.

Department of Geology and Geography

The Department of Geology and Geography offers a balance of teaching, research, and service to the region served by the University, and beyond. Areas of focus among geology faculty include igneous and metamorphic petrology, paleontology, sedimentology, structural geology, hydrogeology, geochemistry, coastal geology, environmental geology, and natural history of the Coastal Plain. Geography faculty interests include geomorphology, geospatial analysis, economic geography, health geography, cultural geography, urban geography, coastal wetlands, ecohydrology, hazards, and biogeography. Both programs emphasize the application of Geographic Information Science.

Programs

### Major Electives:
Select 15 hours of Upper Division Geography courses (GEOG 3000-level and above). May include no more than 2 hours of GEOG 3790 - Teaching Internship in Geography and 6 hours of GEOG 5890 - Directed Study.

### Electives
Must include at least 8 hours of upper-division (3000-level and above) coursework

### Minor (Approved by advisor)
Select 15 credit hours of Minor (Strongly recommend minor in GIS)

Total Credit Hours 124

### Program Requirements

- Geography majors must maintain an overall 2.0 GPA across all Geography coursework (any course with GEOG prefix).

### Honors in Geography

Students majoring in Geography (BS or BA) may pursue an Honors in Geography program. Students are required to have a minimum GPA of 3.2 after 45 credit hours of coursework and approval of Geology and Geography faculty to commence the Honors program.

To graduate with Honors in Geography, a student must:

- Be admitted to the University Honors Program;
- Complete GEOG 4831 with a grade of B or higher;
- Complete GEOG 4120 (with a grade of B or higher), GEOG 4830, and GEOG 4831 for a total of 8 credit hours;
- Successfully complete and present an Honors Thesis or Capstone Project;
- Be in good standing in the University Honors Program at the time of graduation.

### Geography B.S.

**Degree Requirements: 124 Credit Hours**

### Major Electives
Select 24 hours of Upper Division Geography courses (GEOG 3000-level and above). May include no more than 2 hours of GEOG 3790 - Teaching Internship in Geography and 6 hours of GEOG 5890 - Directed Study

### Electives
Select 13-19 credit hours of Electives (must include at least 1 hour of upper-division (3000-level and above) coursework)

### Foreign Language (2001 Level)
Completion through 2001-level Foreign Language

Total Credit Hours 124

*Students pursuing Senior Thesis Research must earn a minimum grade of B in Introduction to Research (GEOG 4120), have a minimum overall GPA of 3.0 upon completion of Introduction to Research (GEOG 4120), and complete Senior Thesis Research I (GEOG 4830) and Senior Thesis Research II (GEOG 4831).*

*May be satisfied by a secondary school background showing three (3) years or more of preparation in a single language.

### Program Requirements

- Geography majors must maintain an overall 2.0 GPA across all Geography coursework (any course with GEOG prefix).

### Honors in Geography

Students majoring in Geography (BS or BA) may pursue an Honors in Geography program. Students are required to have a minimum GPA of 3.2 after 45 credit hours of coursework and approval of Geology and Geography faculty to commence the Honors program.

To graduate with Honors in Geography, a student must:

- Be admitted to the University Honors Program;
- Complete Senior Thesis Research II (GEOG 4831) with a grade of B or higher;
- Complete Introduction to Research (GEOG 4120) (with a grade of B or higher), Senior Thesis Research I (GEOG 4830) and Senior Thesis Research II (GEOG 4831) for a total of 8 credit hours;
• Successfully complete and present an Honors Thesis or Capstone Project;
• Be in good standing in the University Honors Program at the time of graduation.

1. While General Historical Geology (GEOL 1122) is 4 credit hours, only 3 credit hours will count toward fulfilling Area F. The remaining credit hour will be applied toward Major Specific Requirements.
2. Guided elective must be a 6 credit hour Geology field course - permission of advisor required.
3. Students pursuing Option 1 must have a minimum grade of B in Introduction to Research (GEOL 4120) and an overall GPA of 3.0 or higher upon completion of Introduction to Research (GEOL 4120), or permission of the Department Chair.
4. May be satisfied by a secondary school background showing three (3) years or more of preparation in a single language.

## Program Requirements

- Geology majors must maintain an overall 2.0 GPA across all Geology coursework (any course with GEOL prefix).

## Honors in Geology

Students majoring in Geology (BS or BA) may pursue Honors in Geology. Students are required to have a minimum GPA of 3.2 after 45 credit hours of coursework and approval of Geology and Geography faculty to commence the Honors program.

To graduate with Honors in Geology, a student must:

- Be admitted to the University Honors Program;
- Complete Senior Thesis Research II (GEOL 4831) with a grade of “B” or higher;
- Complete Introduction to Research (GEOL 4120) with a grade of B or higher, Senior Thesis Research I (GEOL 4830), and Senior Thesis Research II (GEOL 4831) for a total of 8 credit hours;
- Successfully complete and present an Honors Thesis or Capstone Project;
- Be in good standing in the University Honors Program at the time of graduation.

## Geology Minor

### Prerequisite(s)

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 1121 Introduction to the Earth</td>
</tr>
<tr>
<td>GEOL 1122 General Historical Geology</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
</tr>
</tbody>
</table>

## Minor Program

Students must complete 15 additional hours of upper level geology coursework (3000-level and above, not to include GEOL 5230 or GEOL 5231).

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Total Credit Hours</strong></td>
</tr>
</tbody>
</table>
Additional Minor Requirements/Recommendations

A student seeking a minor in Geology will select at least 15 hours of upper-level GEOL courses (excluding GEOL 5230 and GEOL 5231) that best fit the student’s interest or best complement the student’s major.

For individuals seeking teacher certification through MAT, the following list of courses is recommended.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOL 3541 Mineralogy</td>
<td>4</td>
</tr>
<tr>
<td>GEOL 5442 Petrology and Petrography</td>
<td>4</td>
</tr>
<tr>
<td>GEOL 3541 Stratigraphy and Sedimentation</td>
<td>4</td>
</tr>
<tr>
<td>GEOL 5440 Structural Geology</td>
<td>4</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>16</strong></td>
</tr>
</tbody>
</table>

For further information regarding Certification, please refer to the College of Education (p. 151) section.

Department of Mathematical Sciences

The Department of Mathematical Sciences offers programs of study for students interested in mathematics, mathematics education or statistics. The department is dedicated to providing students with excellent instruction that incorporates innovative instructional techniques and technologies, and with opportunities to participate with faculty in research. In their roles as teacher-scholars, the faculty maintains consistent and significant productivity, recognized at regional, national, and international levels, in basic research, applications, and pedagogy. The department is strengthened by the extensive service activities of the faculty on campus and in the community as well as through high-profile service to the profession. In addition, the department provides many areas for student involvement, including an active student organization and student competition teams.

Actuarial Sciences Certificates

Policies Requirements and Standards Actuarial Sciences

This program offers students the opportunity to prepare for a career as an actuary. In order to become an actuary, one must pass a number of competency exams in certain disciplines and obtain a number of educational experiences that pertain to the field of actuarial sciences. These requirements are determined by the Society of Actuaries (SOA) and the Casualty Actuarial Society (CAS).

The purpose of this program is to prepare students for the Probability (Exam P or Exam 1) and Financial Mathematics (Exam FM or Exam 2) exams and to provide all the educational experiences listed by the Validation of Educational Experience (VEE) Requirements to become an actuary. The certificate will only be offered to students who are earning a degree while completing the requirements for the certificate; the certificate will be awarded at the time of completion of the degree. An official certificate and transcript annotation will be made upon completion of the program. In order to receive the Certificate of Actuarial Sciences, students must earn a grade of B or better in the following courses.

Progress Requirements

To earn the bachelor’s degree in the mathematical sciences, students must complete all mathematics courses and all courses in their chosen minor or area of concentration required in the program of study with a grade of C or better. In order to complete the prerequisites for a mathematics course other than MATH 1401 or Foundations of Numbers and Operations (MATH 2008), the prerequisite courses must be completed with a grade of C or better. A grade of C or better is required in each course used toward a minor in Mathematics or Statistics.

Certificate Requirements: 21 Credit Hours

For more information about the certificate or for a career as an actuary, please contact the Department of Mathematics.

Department of Military Science

The Georgia Southern University Military Science Department is charged with managing the Army’s Reserve Officer Training Corps (ROTC) program on all campuses. Army ROTC provides college-trained officers for the U.S. Army, the Army National Guard, and the U.S. Army Reserve. College-trained Army Officers are produced through a combination of college courses in military science and summer training sessions. The Professor of Military Science at Georgia Southern University administers the programs at the Statesboro and Armstrong campuses, as well as at Savannah State University and East Georgia State College - Statesboro. Students at the Georgia Southern Liberty campus wishing to enroll in Army ROTC must take their military science courses at either the Statesboro or Armstrong campus.

Additional Free Electives

Select 15-27 credit hours of additional free Electives

Carryover from Area A2 (1) if MATH 1113 is taken in Area A2

Total Credit Hours 124

1. While Calculus I (MATH 1441) is 4 credit hours, only 3 credit hours will count toward fulfilling Area A2. The remaining credit hour will be applied toward Area F.
2. Calculus I (MATH 1441) if not taken in Area A2, otherwise Calculus II (MATH 2242) is recommended.
3. Students must complete at least 39 credit hours of upper division course work overall.

Other Program Requirements

A minimum grade of "C" is required for each CSCI, MATH, and STAT course taken in the major. This applies to all courses (lower and upper division). The mathematics major may not subsequently take for credit toward graduation a lower level MATH or STAT course after earning credit hour for a course that has the lower level course as a prerequisite (except by advisor’s permission).

Honors in Mathematical Sciences

To graduate with Honors in Mathematical Sciences, a student must:

- be admitted to the University Honors Program at least three semesters prior to graduation;
- successfully complete Honors Research (MATH 4825) for two semesters and Honors Thesis (MATH 4929) for a total of six credit hours;
- be in good standing in the University Honors Program at the time of graduation.

Note: Students earning the B.S. with a major in Mathematical Sciences and “Honors in Mathematical Sciences” may use the six credit hours earned through Honors Research (MATH 4825) and Honors Thesis (MATH 4929) as part of the Mathematics Electives. Therefore, these students will select four courses instead of six courses from the Mathematics Electives.
Additional Minor Requirements

All students participating in the minor program for Military Science must participate in all weekly physical fitness activities, successfully pass the Army Physical Fitness Test (APFT) in accordance with FM 21-20 standards, meet all height and weight requirements in accordance with AR 600-9, participate fully in weekly labs, and successfully complete two weekend field training exercises each semester.

Military Science Non-Degree

Non-Degree Requirements: 15-32 Credit Hours

U. S. Army Reserve Officer Training Program Overview

The Department of Military Science is a Senior Division Reserve Officer Training Corps (ROTC) Instructor Group staffed by Army personnel. The department provides a curriculum that qualifies the college graduate for a commission as an officer in the U. S. Army, U. S. Army Reserve or the Army National Guard. Enrollment is open to all students. The ROTC program is designed to provide students with the knowledge and practical experience in leadership and management that will be useful in any facet of society. Additionally, each student is provided a working knowledge of the organization and function of the Department of Defense and the role of the U. S. Army in national security and world affairs. The ROTC program is divided into two main phases: the Basic Course, which is normally pursued during the freshman and sophomore years, and the Advanced Course, which is taken during the junior, senior or graduate years.

Basic Course Description

The Military Science Basic Course teaches the organization and roles of the U. S. Army and introduces essential background knowledge of customs and traditions, leadership, map reading, small unit organization, and marksmanship. These courses have the objective of developing the student’s leadership, confidence, self-discipline, integrity, and sense of responsibility. There is no obligation to continue in ROTC as a result of taking any Basic Course classes. Additionally, all students in the Basic Course are required to participate in physical training. Physical training is conducted Mondays, Wednesdays and Fridays from 0600 - 0700 hours.

Advanced Course Description

The Military Science Advanced Course is taken during the junior/senior or graduate years. Students learn land navigation, communications, small unit tactics, patrolling, military management, staff operations, logistics, army administration, military law, ethics, and the Army system and culture. Additionally, students must satisfy Professional Military Education (PME) requirements with an approved Military History course. Students must meet eligibility requirements and sign a contract for commissioning with the U. S. Army. The general objective of these courses is to produce junior officers who will be the future officer leadership of the U. S. Army, U. S. Army Reserve, or the Army National Guard. Contracted Advanced Course students are required to attend the Advanced Camp, normally between their junior and senior academic years. This course is mandatory for all students seeking a commission in the U. S. Army but registration for university credit hour is optional. Students attending this camp are paid and given travel allowance from their home to camp and back. Students may earn three credit hours for attending this course through registration at the Registrar’s Office upon completion of the course and coordination through the Military Science Department.

Advanced Course

MSCI 3131 Advanced Tactics and Applied Leadership I 3
MSCI 3132 Advanced Tactics and Applied Leadership II 3
MSCI 4131 Military Leadership and Management Seminar 3
MSCI 4132 Transition to Lieutenant 3

Advanced Military Skills Practicum

MSCI 3731 Advanced Military Skills Practicum (Advanced Camp) (registration optional) - This course is mandatory for all students seeking a commission in the U. S. Army but registration for university credit hour is optional. 3

Additional Minor Requirements

Additional Minor Requirements are required to participate in physical training. Physical training is conducted Mondays, Wednesdays and Fridays from 0600 - 0700 hours. All students participating in the minor program for Military Science must participate in all weekly physical fitness activities, successfully pass the Army Physical Fitness Test (APFT) in accordance with FM 21-20 standards, meet all height and weight requirements in accordance with AR 600-9, participate fully in weekly labs, and successfully complete two weekend field training exercises each semester.

MSCI 2731 Advanced Military Skills Practicum (Basic Camp) (registration optional) 3

Credit Hours

MSCI 1111 Introduction to Military Science 1
MSCI 1122 Basic Military Leadership 2
MSCI 2121 Basic Military Skills 2
MSCI 2122 Basic Military Tactics 2
MSCI 2731 Basic Military Skills Practicum (Basic Camp) 3

Advanced Camp

Advanced Camp is the most important training event for an Army ROTC Cadet. The 32-day training event incorporates a wide range of subjects designed to develop and evaluate leadership ability. The challenges are rigorous and demanding, both mentally and physically. Advanced Camp tests intelligence, common sense, ingenuity and stamina. These challenges provide a new perspective on an individual’s ability to perform exacting tasks and to make difficult decisions in demanding situations. This course is mandatory for all students wishing to seek a commission in the U.S. Army but registration is not required. Students may earn three credit hours for attending this course through registration at the Registrar’s Office upon completion of the course and coordination through the Military Science Department. Students attending this camp are paid and given travel allowance from their home to camp and back.
Program Admission Criteria

All students entering the GSU Military Science courses must have a statement from a physician attesting that the student is capable of participating in physical activities. This statement must be no more than one-year old from time of entry. Students in the Basic Course can obtain this medical statement from Health Services on campus. Students interested in earning a commission in the U.S. Army and enrolling in the Advanced Course require a Department of Defense Medical Evaluation Review Board physical, must be an academic junior or higher, have a GPA of 2.0 or better, be a U.S. citizen, have no moral obligations or personal conviction preventing service, satisfactorily explain any record of arrest and/or civil conviction, be a high school graduate or possess an equivalent certificate, pass the Army Physical Fitness Test and must demonstrate a potential for further leadership development. Additionally, Veterans, JROTC graduates (with at least four years of high school JROTC), and students who have completed military science courses in the military preparatory schools and junior colleges are eligible for advanced placement and are not required to participate in the Basic Course.

Other Program Requirements

(9 credit hours)

Professional Military Education (PME) requires students seeking a commission in the U.S. Army to complete 3 credit hours in military history coursework, with a preference in American Military History (HIST 3230) for a Minor.

Program Options, Obligation, Financial Assistance, Scholarships and Books, Uniforms and Supplies

Two Year Program Versus The Four Year Program

The ROTC program is designed as a 4-year course of study. However, students who are not eligible for advanced placement and who have not completed the Basic Course program may still become qualified for the advanced program. They must satisfactorily complete Basic Camp, four weeks duration, during the summer between their sophomore and junior years. Students attending this Basic Camp at a regular army post are paid and given a travel allowance from their home to camp and return. Basic Camp Course can count for 3 general credit hours. Students who have participated in four years of JROTC or are an Eagle Scout meet the requirements of the Basic Course.

- **Obligation**: Once a student is contracted, he or she will incur an eight year Military Service Obligation (MSO). The Cadet may elect to serve his/her MSO either on Active Duty, the National Guard or the Army Reserves. Active duty requires a minimum of four years active duty and four years Inactive Ready Reserve (IRR). The National Guard and Reserves requires eight years drill status (one weekend a month/ two weeks a year) for the entire MSO. All Cadets will incur an eight-year military service obligation whether they elect to go active duty, Reserve duty or National Guard.

- **Financial Assistance**: All contracted Cadets are paid a subsistence allowance (Stipend) of $300- $500 per month based on college standing for up to 10 months per year. This is subject to change yearly.

- **Scholarship Program**: Each year the U.S. Army awards two, three, and four year scholarships to outstanding young men and women contracted in the ROTC program. In most cases, the Army pays either Room & Board or Tuition & Fees. Those students electing Room & Board will receive $5,000 per semester paid directly to the student, while those electing Tuition & Fees will have their money paid directly to the University. Scholarship winners also receive an allowance for books of $1200 per year. Individuals desiring to compete for two and three year scholarships should apply to the Military Science Department (Army ROTC) at Georgia Southern University. Some students who are enrolled in highly technical academic discipline programs and who qualify for Reserve Officers Training Corps scholarship benefits may be required to take an academic course load that will necessitate more than four academic years of study prior to graduation. It is possible to extend the Army Scholarships benefits to cover this additional period. Contact the Georgia Southern University Department of Military Science at (912) 478-0040 for further information.

- **Army Reserve Officer Training Corps Uniform, Books, And Supplies**: Students enrolling in the Army ROTC program will be issued U.S. Army uniforms, most ROTC required books, and supplies by the Military Science Department. Uniforms and equipment must be returned before commissioning or upon disenrollment from the Reserve Officers Training Corps program.

Advisement

Department of Military Science, Military Science Building, (912) 478-5320. Students will complete a CC 104R that will map out their college courses until graduation.

Naval Science Minor

Policies Requirements and Standards

Naval Science General Information

Naval Reserve Officer Training Corps (NROTC) prepares students for commissioned service as regular or reserve officers in the Navy and Marine Corps. Students enrolled in the NROTC program take additional course work which grants them specialized knowledge and skills in a very specific area covering all aspects of Naval operations. Students with successful completion of 15 hours of specified coursework should be granted a Minor in Naval Science.

Advanced Program (Navy Option): 12 Credit Hours

- One year of calculus-based physics (completed before senior year): 6 credit hours
- Computer science: 3 credit hours
- Military history and political science: 6 credit hours

**Department of Physics and Astronomy**

The mission of the Department of Physics at Georgia Southern University is four-fold. First, to provide its majors with a strong, basic undergraduate physics/astronomy education that will serve them whether they pursue an advanced degree in physics, a professional career in medicine or dentistry, a career in industry or in science education. Second, to provide excellent instruction in introductory physics and astronomy to non-majors. Third, to conduct original research in physics and astronomy that is recognized at regional, national, and international levels. Fourth, to foster an interest in science in the community and the region.

Select one of the following Teaching Internship Courses:

- ASTR 3790 Teaching Internship in Astronomy
- PHYS 3790 Teaching Internship in Physics

Students must complete 12 credit hours of Advisor approved upper level Astronomy or Physics courses.

**Foreign Language (2002 Level)**

Completion through 2002-level Foreign Language 3

**Minor**

- Select 15 credit hours of Minor

**Electives** 3

Select 15-24 credit hours of Electives

Students interested in seeking Teacher Certification through the Masters of Arts in Teaching program should take introductory courses from the College of Education aimed to explore careers in teaching including:

- EDUC 2090 PPB Practicum
- EDUC 2110 Investigating Critical and Contemporary Issues in Education
- EDUC 2120 Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts
While Calculus I (MATH 1441) is 4 credit hours, only 3 credit hours will count toward fulfilling Area A2. The remaining credit hour will be applied toward Electives.

2 Students must complete Calculus I (MATH 1441) and Calculus II (MATH 2242)

3 May be satisfied by a secondary school background showing four (4) years or more of preparation in a single language

4 Students must complete at least 39 credit hours of upper division course work overall.

Honors in Physics

To graduate with Honors in Physics, a student must:

• be admitted to the University Honors Program;
• complete 3-credit hours in honors PHYS 5890 or ASTR 5890 (in a minimum of two regular semesters);
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Physics B.S.

Degree Requirements: 124 Credit Hours

See Core Curriculum for required courses in Area A1 through Area E.

General Requirements (Core A – E) 42
Area A2 -- Must take MATH 1112, MATH 1113 or MATH 1441
Area DII -- Must take MATH 1441 if not taken in Area A2 above

Additional Requirements 4
Area F - Courses Appropriate to Major 2
MATH 2242 Calculus II
MATH 2243 Calculus III
PHYS 2211K Principles of Physics I (if not taken in Area D)
PHYS 2212K Principles of Physics II (if not taken in Area D)

Additional hours in physics, astronomy, math, computer science or chemistry

PHYS 3537 Modern Physics II
PHYS 4421 Advanced Physics Lab I
PHYS 4422 Advanced Physics Lab II
PHYS 5151 Classical Mechanics
PHYS 5152 Classical E and M Theory
PHYS 5530 Thermal Physics
PHYS 5557 Quantum Mechanics

Students must complete 5 credit hours of Advisor approved upper level Physics or Astronomy courses.

Electives
Select 24 credit hours of Electives 3

Credit Hours
Total Credit Hours 124

Other Program Requirements

• No more than 40 credit hours of upper division course work in Physics may count toward the 126 credit hour minimum for graduation.

Honors in Physics

To graduate with Honors in Physics, a student must:

• be admitted to the University Honors Program;
• complete 3-credit hours in honors PHYS 5890 or ASTR 5890 (in a minimum of two regular semesters);
• successfully complete and present an Honors Thesis or Capstone Project;
• be in good standing in the University Honors Program at the time of graduation.

Physics Minor

Prerequisite(s)

Select one 8-credit hour sequence from the following:

PHYS 1111K & PHYS 1112K Introductory Physics I and Introductory Physics II 4
PHYS 2211K & PHYS 2212K Principles of Physics I and Principles of Physics II 4

Total Credit Hours 8

Minor Program

Select 15 credit hours of Upper Division (3000-level and above) ASTR or PHYS coursework:

For individuals seeking teacher certification through MAT, the following list of courses is strongly recommended as part of the 15 credit hours requirement. 1

PHYS 3536 Modern Physics I
PHYS 3537 Modern Physics II

Total Credit Hours 15

1 For further information regarding Certification, please refer to the College of Education (p. 151) section.

Medical Professions Advising

Programs Supported

Pre-Medicine
Pre-Dentistry
Pre-Pharmacy
Pre-Physician Assistant
Pre-Veterinary Medicine
**Pre-Optometry**

The Office of Medical Professions Advising provides supplemental advice, coaching, and guidance for students navigating future careers in the following health professions: medicine, dentistry, pharmacy, physician assistant, veterinary medicine, and optometry.

Two full-time advisors are dedicated to providing exceptional services to medical pre-professional students, inspiring them to become informed decision makers and successful, competitive applicants for health professional school. The mission of the office reflects the University’s: to cultivate a culture of engagement that bridges theory with practice, extends the learning environments beyond the classroom, and promotes student growth and life success.

In addition to providing advisement and coaching services, Medical Professions Advising coordinates an exciting schedule of events, including information meetings, development workshops, and information sessions with representatives from health professional schools. These sessions complement and reinforce information students gain through advisement appointments, and assist students in broadening their perspectives of the medical professions.

**Eligibility**

A competitive GPA is essential when considering a career in a professional medical field. Students must maintain a minimum overall undergraduate GPA of 3.0 in order to remain in any of the pre-professional advising programs supported by Medical Professions Advising. Incoming freshmen are given two semesters of enrollment to keep and maintain the minimum GPA of 3.0. All medical pre-professional students are also required to meet with their medical professions advisor each semester (in addition to meeting with their academic advisor) in order to remain in their program. Additionally, attendance at one pre-professional programming event and submission of an annual writing prompt are required to remain in the medical advising program. Eligibility checks are conducted after each semester.

**Medical Professions Review Board**

Medical and dental schools require students to obtain letters of recommendation for admission, with most schools requesting a composite letter from the student’s undergraduate institution. The Medical Professions Review Board (a committee of faculty and staff members appointed by the dean of the College of Science and Mathematics) assists eligible students with this process by writing a letter of recommendation on behalf of Georgia Southern University. There are several steps involved in obtaining the Review Board letter, and the process begins as early as freshman year. Interested students are encouraged to meet with their medical professions advisor to discuss the process and requirements as early as possible. Pharmacy, physician assistant, veterinary medicine, and optometry programs do not typically require board letters for application. However, students pursuing these programs who do wish to have a board letter are encouraged to speak with their medical professions advisor to discuss the process.

**Contact Information**

For more information on Medical Professions Advising services, programs, or events at the Statesboro, Armstrong, or Liberty campuses, please call or email our staff.

Phone: (912) 478-7472

---

### Secondary or P-12 Education Certification

**For Those Interested in Secondary Education (Grades 6-12) Certification with a BIOLOGY Degree**

Students who plan to seek teacher certification after completion of the B.A. or B.S. Biology program may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. If all B.A. or B.S. Biology requirements are met, no other biology content courses are required. However, students are strongly encouraged to pursue “broad fields” Science certification which includes the areas of biology, chemistry, earth science, and physics. To meet broad fields content requirements, in addition to the biology degree, 15 credit hours in each of TWO additional content areas (Chemistry, Physics, or Earth-Space Science) are required.

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>

Education Area F “Preprofessional Block” (PPB) courses may also be taken; however, the PPB courses will not count toward meeting certification requirements or MAT degree requirements. These courses can provide undergraduate students information and experiences in school settings that will help them make more informed decisions about becoming a teacher. Since the three PPB courses have USG-mandated field requirements, the following guidance should be followed:

- **BA/BS/BBA majors can take the complete 9 credit hour PPB block of courses with the required 50 credit hour field experience:** OR
- **BA/BS/BBA majors can take Exploring Learning and Teaching (EDUC 2130) concurrently with PPB Practicum (EDUC 2090) (50 contact credit hours in a school) – total of 3 credit hours. After taking Exploring Learning and Teaching (EDUC 2130), those students can take one or both of the other PPB courses with approximately 10 credit hours of field experience with each course. These courses are:**
  - Investigating Critical and Contemporary Issues in Education (EDUC 2110) (3)
  - Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts (EDUC 2120) (3)

**NOTE:** GACE Program Admission Assessment and GACE Content Assessment examination and 2.5 cumulative GPA requirements must be met for certification program admission and should be considered during enrollment in the bachelor’s program.
For Those Interested in Secondary Education (Grades 6-12) Certification with a CHEMISTRY Degree

Students who plan to seek teacher certification after completion of the B.A. or B.S. Chemistry program may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. If all B.A. or B.S. Chemistry requirements are met, no other chemistry content courses are required. However, students are strongly encouraged to pursue “broad fields” Science certification which includes the areas of biology, chemistry, earth science, and physics. To meet broad fields content requirements, in addition to the chemistry degree, 15 credit hours in each of TWO additional content areas (Biology, Physics, or Earth-Space Science) are required.

Courses that a student can take as an undergraduate that will count toward certification requirements but will not count toward MAT degree requirements are:

• BIOL - advisor recommended
• PHYS - advisor recommended:
  PHYS 2211
  PHYS 2212
  PHYS 3536 Modern Physics I

Earth-Space Science - advisor recommended

The following education courses may also be taken as electives while enrolled in your bachelor’s program:

• ITEC 3430 Instructional Technology for P-12 Teaching Fields
• READ 3330 Content Literacy
• SPED 3333 Introduction to Special Education

Education Area F “Preprofessional Block” (PPB) courses may also be taken; however the PPB courses will not count toward meeting certification requirements or MAT degree requirements. These courses can provide undergraduate students information and experiences in school settings that will help them make more informed decisions about becoming a teacher. Since the three PPB courses have USG-mandated field requirements, the following guidance should be followed:

- BA/BS/BBA majors can take the complete 9 credit hour PPB block of courses with the required 50 credit hour field experience; OR
- BA/BS/BBA majors can take Exploring Learning and Teaching (EDUC 2130) concurrently with PPB Practicum (EDUC 2090) (50 contact credit hours in a school) – total of 3 credit hours. After taking Exploring Learning and Teaching (EDUC 2130), those students can take one or both of the other PPB courses with approximately 10 credit hours of field experience with each course. These courses are:
  - Investigating Critical and Contemporary Issues in Education (EDUC 2110) (3)
  - Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts (EDUC 2120) (3)

Note: GACE Program Admission Assessment and GACE Content Assessment examination and 2.5 cumulative GPA requirements must be met for certification program admission and should be considered during enrollment in the bachelor’s program.

For Those Interested in Secondary Education (Grades 6-12) Certification with a GEOGRAPHY Degree

Students who plan to seek teacher certification after completion of the B.A. or B.S. Geography program may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. If all B.A. or B.S. Geography requirements are met, no other geography content courses are required. However, students are strongly encouraged to pursue certification in more than one social science field to enhance employment opportunity. Plan to complete at least 12 credit hours in one or more of the following fields: Economics, History, and/or Political Science, with advisor guidance in selection. These courses should be completed as part of the minor or electives.

Courses that a student can take as an undergraduate that will count toward certification requirements but will not count toward MAT degree requirements are:

- ITED 3430 Instructional Technology for P-12 Teaching Fields
- READ 3330 Content Literacy
- SPED 3333 Introduction to Special Education

Education Area F “Preprofessional Block” (PPB) courses may also be taken; however the PPB courses will not count toward meeting certification requirements or MAT degree requirements. These courses can provide undergraduate students information and experiences in school settings that will help them make more informed decisions about becoming a teacher. Since the three PPB courses have USG-mandated field requirements, the following guidance should be followed:

- BA/BS/BBA majors can take the complete 9 credit hour PPB block of courses with the required 50 credit hour field experience; OR
- BA/BS/BBA majors can take Exploring Learning and Teaching (EDUC 2130) concurrently with PPB Practicum (EDUC 2090) (50 contact credit hours in a school) – total of 3 credit hours. After taking Exploring Learning and Teaching (EDUC 2130), those students can take one or both of the other PPB courses with approximately 10 credit hours of field experience with each course. These courses are:
  - Investigating Critical and Contemporary Issues in Education (EDUC 2110) (3)
  - Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts (EDUC 2120) (3)

Note: GACE Program Admission Assessment and GACE Content Assessment examination and 2.5 cumulative GPA requirements must be met for certification program admission and should be considered during enrollment in the bachelor’s program.

For Those Interested in Secondary Education (Grades 6-12) Certification with a GEOLOGY Degree

Students who plan to seek teacher certification after completion of the B.A. or B.S. Geology program may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. This may be achieved as part of “broad fields” Science certification which includes the areas of biology, chemistry, earth science, or physics. To meet broad fields content requirements, in addition to the geology degree, 15 credit
hours in each of TWO additional content areas (Biology, Chemistry, or Physics) are required.

The following education courses may also be taken as electives while enrolled in your bachelor’s program:

Structure

Department of Biology

In today’s world, studies in Biology are becoming increasingly important. Georgia Southern University’s Biology program prepares students for careers as professional biologists in a wide variety of fields. Southeast Georgia is a biologically rich and ecologically diverse area that encompasses coastline, wetlands, woodlands, and cities. Consistent with the mission of the University, the Biology Department seeks to expand horizons through outreach, preserve distinctive cultural and natural legacies, and maintain the integrity of South Georgia’s environment.

Department of Chemistry and Biochemistry

The Department of Chemistry offers a well-rounded program for the education of its students. To prepare them for their professional careers, the Department is committed to providing quality teaching and research experiences emphasizing critical and independent thought. The curriculum provides strong innovative instruction in the theory and practice of the chemical sciences. It is designed to introduce students to modern laboratory methods and technology using state-of-the-art scientific equipment. The faculty is committed to providing an environment that addresses the individual needs of each student and encourages them to develop their potential through life-long learning and to be responsible members of their profession and community.

Department of Geology and Geography

The Department of Geology and Geography offers a balance of teaching, research, and service to the region served by the University, and beyond. Areas of focus among geology faculty include igneous and metamorphic petrology, paleontology, sedimentology, structural geology, hydrogeology, coastal geology, environmental geology, geoscience education, and natural history of the Coastal Plain. Geography faculty interests include climatology, geomorphology, geospatial analysis, economic geography, health geography, cultural geography, ecohydrology, hazards, and biogeography. Both programs emphasize the application of Geographic Information Science.

James H. Oliver, Jr., Institute for Coastal Plain Science

The Institute for Coastal Plain Science (ICPS) is an interdepartmental organization that provides an identity to an area of exceptional research and teaching strength on campus. Members of the ICPS include faculty and students from several departments including biology, chemistry, geology and geography, civil engineering, and environmental health sciences. It also has three full-time scientists and two support personnel. The mission of the ICPS is to promote, in coordination with public and private partnerships, interdisciplinary research and education directed toward understanding the physical and biological resources occurring below the Fall Line and their sustainable use and management. Membership in the ICPS is open to any researchers with a focus on this geographic region. The ICPS also assists with management of the several natural history collections on campus and is the primary home of the U.S. National Tick Collection.

Department of Mathematical Sciences

The Department of Mathematical Sciences offers programs of study for students interested in mathematics, mathematics education or statistics. The department is dedicated to providing students with excellent instruction that incorporates innovative instructional techniques and technologies. In their roles as teacher-scholars, the faculty maintains consistent and significant productivity, recognized at regional, national, and international levels, in basic research, applications, and pedagogy. The department is strengthened by the extensive service activities of the faculty on campus and in the community as well as through high-profile service to the profession. In addition, the department provides many areas for student involvement, including an active student organization and student competition teams.

Department of Military Science

The Georgia Southern University Military Science Department is charged with managing the Army’s Reserve Officer Training Corps (ROTC) program on campus. Army ROTC provides college-trained officers for the U.S. Army, the Army National Guard, and the U.S. Army Reserve. It does this through a combination of college courses in military science and summer training sessions. The Professor of Military Science at Georgia Southern also administers the programs at Armstrong Atlantic State University, Savannah State University and Savannah College of Art and Design.

Department of Physics

The mission of the Department of Physics at Georgia Southern University is four-fold. First, to provide its majors with a strong, basic undergraduate physics/astronomy education that will serve them whether they pursue an advanced degree in physics, a professional career in medicine or dentistry, a career in industry or in science education. Second, to provide excellent instruction in introductory physics and astronomy to non-majors. Third, to conduct original research in physics and astronomy that is...
recognized at regional, national, and international levels. Fourth, to foster an interest in science in the community and the region.
Public Health

The Jiann-Ping Hsu College of Public Health (JPHCOPH) was created January 2006 and is accredited by the Council on Education for Public Health (CEPH). The College exists to provide public health education, research, and community service that will positively impact the quality of life and health disparities of rural and underserved populations. The establishment of the College was made possible by a generous gift from Dr. Karl E. Peace, in memory and honor of his wife, Dr. Jiann-Ping Hsu.

Vision

The Jiann-Ping Hsu College of Public Health will be the nationally recognized leader in the empowerment of rural communities and underserved populations to address public health issues, eliminate health disparities, and improve health outcomes.

Mission

The mission of the Jiann-Ping Hsu College of Public Health is to improve health, eliminate health disparities and health inequities of rural communities and underserved populations globally through excellence in teaching, public health workforce development, research, scholarship, professional service, and community engagement.

College Structure

- Dean's Office (p. 243)
- Department of Biostatistics, Epidemiology and Environmental Health Sciences (p. 246)
- Department of Health Policy, Management and Behavior (p. 246)

About Public Health

The Institute of Medicine (IOM) has defined the role of public health as "...the fulfillment of society's interest in assuring the conditions in which people can be healthy (IOM, 1988)." Public health activities focus on improving the health of communities.

Public health is also defined as the art and science of promoting health, preventing disease, and prolonging life among human populations; the broad mission of public health is to enhance human health through organized community efforts (Council on Education for Public Health, 1978).

A diverse and ever-expanding field of practice, public health embraces an ecological approach that recognizes the interactions and relationships among multiple determinants of health. It involves the dissemination of reliable information for policy decisions; identifying systemic inequalities and problems; protecting the public's health and safety through education and research; and fostering partnerships with individuals, communities, and organizations to promote health.

Though public health involves the knowledge and application of many disciplines in its research, teaching, service, and practice activities, the following have been identified as fundamental, core areas to the practice of public health (CEPH Accreditation Criteria, 2011):

- Biostatistics - collection, storage, retrieval, analysis and interpretation of health data; design and analysis of health-related surveys and experiments; and concepts and practice of statistical data analysis;
- Environmental Health Sciences - environmental factors including biological, physical, and chemical factors that affect the health of a community;
- Epidemiology - distributions and determinants of disease, disabilities, and death in human populations; the characteristics and dynamics of human populations; and the natural history of disease and the biologic basis of health;
- Health Services Administration - planning, organization, administration, management, evaluation, and policy analysis of health and public health programs; and
- Community Health Education/Social and Behavioral Sciences - concepts and methods of social and behavioral sciences relevant to the identification and solution of public health problems.

The teaching, research, and service activities of the Jiann-Ping Hsu College of Public Health are grounded in these core public health knowledge areas. Our goals for workforce development, community-based research, and community-based service help us focus our efforts on cross disciplinary projects that build on the synergistic effects of these core knowledge areas.

Public health is concerned with protecting the health of communities, both small and large. Public health professionals focus on building on assets and preventing problems from happening or re-occurring through implementing educational programs, developing policies, administering services, and conducting research in concert with, but in contrast to, clinical health professionals (e.g., physicians and nurses) who focus primarily on treating individuals after they become sick or injured. No matter what form public health assumes, its goal is always the same: to improve the quality of life of individuals, families, and communities by focusing on prevention, promotion, and protection.

This preventive model encompasses three core functions:

1. assessing and monitoring the health of communities and at-risk populations to identify health problems and establish priorities;
2. formulating public policies in collaboration with community and government leaders designed to prioritize and solve local and national health problems; and
3. assuring that all populations have access to appropriate and cost-effective health care, including health promotion and disease prevention services, and evaluating the effectiveness of the care.

Our Shared Values

The Jiann-Ping Hsu College of Public Health is endowed by Dr. Karl E. Peace as a tribute to his wife and an enduring celebration of her life characterized by “a zeal for excellence, consideration of others, intelligence and scholarship, honesty, kindness and humility.” In honor of Dr. Hsu, the faculty, students, and staff of the JPHCOPH commit to demonstrate these values in our behavior toward one another and to those whom we serve.

In 2007, the JPHCOPH students, faculty, and staff worked together to clarify the following list of shared core values. These values serve to guide decision- making for our workforce development, research, professional service, and community engagement activities. We will also use these values to help us make choices about how to move forward when the path is not clear.

- Excellence in research, service, and instruction.
- Passion for improving the health of rural communities and underserved populations.
- Responsibility for promoting health equity and eliminating health disparities in rural communities and underserved populations.
- Commitment to community involvement.
- Collaboration for problem solving.
- Commitment to developing as a “learning organization”.

Epidemiology - distributions and determinants of disease, disabilities, and death in human populations; the characteristics and dynamics of
Experiential Learning Opportunities

All students are required to complete an internship experience. The internship is competency-based and provides the student the opportunity to further develop and integrate skills learned in the classroom.

Program Admission Criteria

- Admission to Georgia Southern University
- A total institution GPA of 2.0 or better on all course work attempted (transfer coursework and work completed at Georgia Southern University are considered)
- Completed a minimum of 60 credit hours
- A minimum grade of “C” in all Area F coursework attempted
- The student must have completed or be registered in PUBH 2131

Program Progression Requirements

- Students must also earn a minimum grade of “C” in a prerequisite course(s) prior to registering for an advanced course.
- Students must earn a minimum grade of “C” in all major courses, Directed Major Electives, and Area F courses; and have a GPA of 2.5 AND above to enroll in PUBH 4798.

Advisement

Undergraduate students are advised by the Undergraduate Advisor in the College of Public Health. The advisor is located in Room 1016 in Hendricks Hall, (912) 478-2674.

To make an advising appointment, send an email to: jphcoph-ugradadvisor@georgiasouthern.edu.

Must be Biology or Chemistry Laboratory Science, excluding Environmental Laboratory Science Courses.

Students not meeting the prerequisite requirements for the internship must complete a minor.
PUBH 4195  International Studies Abroad in Public Health
PUBH 4230  Global Maternal and Child Health
PUBH 4231  Health Aspects of Aging
PUBH 4330  Promotional Strategies for Health Programs
PUBH 4890  Directed Individual Study

Biostatistics

Are you looking for biostatistics graduate programs that prepare you for a career that excels? Our programs prepare you to develop and apply statistical reasoning and methods. Topics include addressing, analyzing and solving problems in public health, health care, biomedical, clinical and population-based research. The department offers two degrees: a Dr.P.H. in Biostatistics and an M.P.H. in Biostatistics.

Epidemiology

Do you want to become an applied epidemiologist in public health? In our programs you will study diseases of the human body in order to explain occurrence, distribution and causative factors of diseases in human populations. The department offers two degrees: a Dr.P.H. in Epidemiology and an M.P.H. in Epidemiology.

Environmental Health Sciences

Are you interested in the environmental and occupational factors that impact our public’s health? Students in this program will find a dedication to rigorous evidence-based science, collaboration and a strong commitment of a service learning approach to instruction. Students work very closely with the faculty and engage in multiple service and research projects bridging theory and practice. The department offers an M.P.H. in Environmental Health Sciences.

Department of Health Policy and Community Health

Health Policy & Management

Do you want to learn the theory and practical skills you need for advanced health leadership and management? At our Department of Health Policy, Management and Behavior, you will learn dynamic leadership of people, policy initiatives and improvements to health status of communities, wise management of resources and systems of health and healthcare. The department offers two degrees: a Dr.P.H. in Public Health Leadership and an M.P.H. in Health Policy & Management.

Community Health Education & Behavior

Do you want to learn the skills needed to help educate and improve the public’s health? Our programs are designed to prepare you for community-based public health interventions. You will learn to solve problems in the field of public health and prepare for a variety of leadership positions, especially those in community health programs.

The department offers three degrees in community health to match your current level of education and experience – a Dr.P.H. in Community Health Behavior & Education, an M.P.H. in Community Health, and a B.S.P.H. in Health Education and Promotion. Our community health programs also include the opportunity for students to obtain a minor in Health Education and Promotion.

Academic Advisement

Philosophy

Georgia Southern University accepts the premise that ultimately a student’s program is his/her own responsibility. Any system of advisement must reflect students’ freedom of choice and their right to make their own decisions. It is required that students see their advisors prior to registration each semester to have their classes approved and to receive their Registration Access Number (RAN). More important and separate from having registration needs, students should meet with their advisors to plan programs carefully and ensure that all program requirements are being met.

It is the institution’s responsibility to provide guidance, information, and assistance to the student whenever possible. It is the institution’s responsibility to see that advisors have accurate information, are concerned about students, and are accessible to students on a reasonable basis. The institution also has responsibility to provide the necessary support to those faculty members who choose advisement as an area of service and to see that good advisement is appropriately included in merit considerations.

Definition of the Role of Advisors

Advisors should fill three roles. They should serve as a resource, providing information about university programs and institutional requirements to assist students in developing the most coherent plan for their college years. Second, they should serve as a link between students and the university community, referring them to areas of assistance and familiarizing them with the resources provided by the institution to meet their needs and goals. Finally, advisors should assist students in understanding the nature and purpose of higher education and help them develop self-direction in decision making.

Responsibility for Advisement

Advisement for students is generally provided by professional advisors and professors in advisement centers. Advisement for Undeclared students who have 45 or less hours and Have On When Ready (MOWR) students will be advised in First-Year Experience Office. On-campus Interdisciplinary Studies majors are advised in the College of Arts and Humanities Advisement Center. All online Interdisciplinary Studies students are advised by the Online Interdisciplinary Studies program personnel. Transients and post baccalaureate non-degree students are advised in the Office of the Registrar.

Co-op and Internship Program

The Co-op and Internship Program at Georgia Southern University encompasses both internship and cooperative education opportunities for students in all majors. Co-ops and internships provide an opportunity for students to evaluate whether their chosen career path or field of study is a good fit for them, develop their professional skills, and apply their academic knowledge while obtaining valuable real world experience in their field. The Office of Career and Professional Development at Georgia Southern University is committed to actively recruiting and promoting co-
op and internship opportunities for all students and provides a centralized contact for both academic and non-academic related issues associated with experiential learning for all colleges and majors.

In order to participate in the Co-op and Internship Program, students must be in good academic standing with the University. In addition, students must complete the experiential learning application in Eagle Career Net, agree to sign the Code of Conduct and Waiver of Liability forms, and provide the Office of Career and Professional Development with an offer letter from their employer. The compensation package offered to the student is determined by the employer, and board and lodging are the responsibility of the student. While participating in the Co-op and Internship Program, students will be enrolled in non-academic, tuition-free COOP hours that will denote their experience on their student transcript. Students will be registered for the course through the Office of Career and Professional Development. Students and employers are required to submit evaluations at three identified points during their work term. Successful completion of the requirements will result in a pass or fail grade awarded to the student.

For more information about our Internship and Co-op Program, please refer to the Student Internship & Co-op Guide, visit the Career and Professional Development website, or call (912) 478-5197.

### Core Curriculum Course Requirements

#### AREA A1 - 6 Hours Required

A minimum grade of “C” is required in each of the following courses:

<table>
<thead>
<tr>
<th>Credit Hours</th>
<th>Course</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>ENGL 1101</td>
<td>Composition I (Prerequisite ENGL 1101)</td>
</tr>
<tr>
<td>3</td>
<td>ENGL 1102</td>
<td>Composition II (Prerequisite ENGL 1101)</td>
</tr>
</tbody>
</table>

#### AREA A2 - 3 Hours Required

A minimum grade of “C” is required

Select one of the following:

<table>
<thead>
<tr>
<th>Credit Hours</th>
<th>Course</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>3-4</td>
<td>MATH 1001</td>
<td>Quantitative Reasoning</td>
</tr>
<tr>
<td></td>
<td>MATH 1101</td>
<td>Introduction to Mathematical Modeling (Not a prerequisite for MATH 1112 or MATH 1113)</td>
</tr>
<tr>

The SSS program offers the following services:

- **Developmental education and academic advising.** Participants are paired with a SSS Advisor to assist with their academic, career, and personal growth throughout their college career.
- **Priority Tutoring.** Participants have access to Mathematics and English tutoring facilitated by the SSS program. In addition, tutorial arrangements are made for students who need individualized or group help in various subjects taught on campus.
- **Financial aid assistance.** Our SSS staff works with participants to research and apply for financial aid and scholarship opportunities.
- **Financial literacy counseling.** Through workshops, participants learn how to understand debt, budget their fiscal resources, and make informed financial decisions.
- **Career exploration opportunities.** Working with the partnering programs on campus, participants are provided with opportunities to better position themselves for a career after graduation.
- **Graduate and professional school admission assistance.** Participants are provided resources to prepare them for graduate school admission examinations, campus visits, interviews, etc.

**Educational Opportunity Programs**

**TRiO Student Support Services (SSS)**

The SSS program provides comprehensive services to first-generation students, low-income students, and students with disabilities. The primary goal of SSS is to help transition, retain, and graduate students at Georgia Southern. Through our services, we provide opportunities for academic development, assist with college requirements, and serve to motivate students toward the successful completion of their undergraduate degree program.

The SSS program offers the following services:

- **Individualized academic advising.** Participants are paired with a SSS Advisor to assist with their academic, career, and personal growth throughout their college career.
- **Priority tutoring.** Participants have access to Mathematics and English tutoring facilitated by the SSS program. In addition, tutoring arrangements are made for students who need individualized or group help in various subjects taught on campus.
- **Financial aid assistance.** Our SSS staff works with participants to research and apply for financial aid and scholarship opportunities.
- **Financial literacy counseling.** Through workshops, participants learn how to understand debt, budget their fiscal resources, and make informed financial decisions.
- **Career exploration opportunities.** Working with the partnering programs on campus, participants are provided with opportunities to better position themselves for a career after graduation.
- **Graduate and professional school admission assistance.** Participants are provided resources to prepare them for graduate school admission examinations, campus visits, interviews, etc.

- **Cultural enrichment experiences.** SSS sponsors one cultural event each semester. These events are designed to give students the opportunity to be exposed to, engage in, and/or embrace other cultures or culturally enriching experiences.
- **Mentoring.** Participants cultivate a one-on-one relationship with their assigned staff members. This aids in the facilitation of academic and personal support throughout their academic career.

**Apply**

A student is eligible to participate in Georgia Southern University’s SSS programs if he or she meets criteria for TRIO eligibility. Students enrolled at or accepted to the Armstrong Campus may only apply to the Armstrong program. Students enrolled at or accepted to the Statesboro campus may only apply to the Statesboro program.

The following students are considered to be TRIO eligible:

- First-generation college students,
- Low income students, and
- Students with a disability

Please note:

- First-generation college student’s parents or guardians did not graduate from a four-year institution.
- Low income is based on Federal Income Guidelines ([https://www2.ed.gov/about/offices/list/ope/trio/incomelevels.html](https://www2.ed.gov/about/offices/list/ope/trio/incomelevels.html)) (Pell Grant recipients generally qualify).
- Students with disabilities have to be registered with the Student Disability Resource Center.

For More Information:

TRiO Student Support Services Armstrong Campus, Solms Hall Suite 212; 912-344-3023
TRiO Student Support Services Statesboro Campus, Rosenwald Building Suite 1051; 912-478-2000

**America Reads/America Counts**

The America Reads/America Counts Program is a Federal Work-Study Program designed to provide outreach services to grade school students that promote academic success and post-secondary educational opportunities. More specifically, America Reads promotes literacy for elementary school age children and America Counts is an effort to improve student achievement in mathematics and aims to help students succeed in the foundations of algebra and geometry by the completion of 9th grade. The America Reads/America Counts Program works with surrounding elementary, middle, and high schools, as well as community organizations to ensure that students are prepared for the challenges of higher level courses. Georgia Southern students who are eligible for the Federal Work-Study Program may use their award by tutoring up to 10 hours per week at a participating school or organization.

**First Year Seminar**

First-Year Seminar (FYE 1220) is a thematic seminar designed to develop foundational information literacy skills which students apply to the seminar...
Graduation Requirements

Subject to the limitations and qualifications stated elsewhere in this catalog, the requirements for the baccalaureate degree are as follows:

- Undergraduate students should have their programs of study checked with their advisors at least three semesters before anticipated completion of degree and submit an “Application for Graduation.” All degree seeking undergraduate students expecting to graduate must apply for graduation no later than the semester before degree requirements are expected to be completed.
- To have a degree awarded, the graduation fee should be paid and all other financial obligations or “holds” must be satisfied or removed before the end of the semester that the student is planning to graduate.
- Students must earn at least 25 percent (30-34 credit hours) of their degree requirements in residence at Georgia Southern University. The last 25 percent (30-34 credit hours) of credit must be earned at Georgia Southern University, unless an exception is made for the student to be a transient student at another institution. A student cannot complete requirements immediately following the term he/she is in attendance as a transient student at another institution unless an official transcript of transient credit is received by the Registrar prior to the end of the semester at Georgia Southern University.
- At least half of the courses required in the major must be taken at Georgia Southern University.
- At least nine credit hours of the 15 required in the minor must be taken at Georgia Southern University.
- At least 12 credit hours of the 18 required in the concentration must be taken at Georgia Southern University. This requirement does not apply to the concentrations in the BIS degree.
- A maximum of three credit hours may be taken under the S/U grading system within any minor.
- The total institution cumulative GPA of all courses (at least 120 credit hours) applying to the degree must be 2.0.
- A student must fulfill all major, minor and specific requirements prescribed for the degree and satisfy the legal requirements with regard to evidence of an understanding of the History and Constitutions of Georgia and of the United States.
- A student must satisfy the Regents’ Test requirement for the University System of Georgia. Exemptions will be evidence of competence and shall satisfy the requirement. All students completing Composition I (ENGL 1101) and Composition II (ENGL 1102) or their equivalents with a minimum grade of “C” have satisfied this requirement.
- All students will be required to complete any current requirements beyond the catalog, such as legislative, certification and Board of Regents requirements.
- Advisors may recommend course substitutions in the major when deemed necessary by submitting the request for approval to their Associate Dean. The substitution is then submitted to the Registrar who will review each request in accordance with the Board of Regents and institutional policies.
- For students whose initial enrollment is Fall 1998 and after, Strategies for Success (GSU 1120) will not apply to the degree.
- A minimum grade of “C” is required in all Area A1 and A2 courses.
- A maximum of five physical activity credit hours may be applied to the 124-135 hours required for a degree.
- Students typically satisfy the requirements for graduation listed in the catalog when they initially enroll at Georgia Southern University. However, with the approval of their advisor, students enrolled Fall 2018 and after may elect to satisfy the graduation requirements specified in any of the catalogs in effect while they are enrolled. A change of major does not constitute a change of catalog for these students. If a major is changed after Fall 2018, students must satisfy semester major requirements. However, if a student has been out of school for 10 or more calendar years and re-enters, the current catalog requirements (at time of re-entry) will apply. Any exceptions require the approval of the advisor, department chair, and dean.
- All outstanding “I” or “IP” grades must be cleared and all transcripts from other institutions must be received before the end of the term the student plans to graduate.
- Courses earned with a “C” or higher grade to satisfy the Required High School Curriculum can also count toward graduation.

Degree Completion/Degree Awarding Policy

In compliance with Federal Guidelines effective Fall 2017, a student's academic degree in their declared program of study will be awarded at the end of the term in which all degree requirements are successfully completed by the student, even if the student has not filed a degree application. Student degree will be awarded but the academic transcript will not be released until the graduation fee has been paid by the student.

Transcript/Holds/Graduation Fee

If a student has a non-academic hold on their record (i.e. Parking), the hold prevents releasing the transcript and the student will not be eligible to receive financial aid after the degree is awarded. The graduation fee will be placed on the student's account and the student will not be eligible to receive financial aid after the degree is awarded.

Double Majors

If a second major is not completed at the time of the first major, the student will not be eligible for financial aid after completion of degree award, and the second major will not be listed on the transcript.

Second Degree with Additional Courses Needed after Primary Degree is Completed

If a second degree is not completed at the time of the first degree, the student will not be eligible for some types of financial aid after completion of the degree awarded for the first degree. The second degree will be noted on the transcript when awarded.

Minor(s) Sought for Completion after Primary Degree is Completed

No minor designation will be posted on the transcript in this scenario; only courses taken for the minor will appear on the transcript.

Second Majors

To earn two majors, both have to be under the same degree.

For example: B.A. Spanish/B.A. Biology or B.S. Psychology/B.S. Mathematics. Students seeking a second major within the same degree program must complete the specific requirements for both majors. An application for the second major must be submitted to the Office of the Registrar. Both majors will be noted on the transcript.
**Dual Degrees**

A student who has been awarded a baccalaureate degree from Georgia Southern or another accredited institution may be granted a second baccalaureate degree provided the following conditions have been fulfilled:

1. If the first degree is earned at Georgia Southern, a student may seek a second undergraduate degree only if the degree is different from the first degree.
2. The student must satisfy all major requirements listed for the chosen program of study.
3. The student must complete the history and constitution requirements.
4. The student must earn a minimum of 30-34 additional credits at Georgia Southern.
5. The student must earn at least 50% of the credit hours toward the major at Georgia Southern.
6. The requirement of a minor for the B.A. degrees will be waived, if the first degree content area is among the recognized minors at Georgia Southern as listed in the “Minors” section of the Georgia Southern catalog. If the student seeks a B.A. and has not already completed a major or minor recognized by Georgia Southern, the student would be required to complete a minor from the list of approved minors. The minor requirement is also waived for students who hold a B.G.S. from Georgia Southern and are seeking a B.A. degree.
7. The student may work on two degrees at the same time.

**Graduation With Honors**

Honors are computed in the Office of the Registrar and all questions concerning honors should be directed to that office. There are three sets of criteria in effect, and the set that applies is determined by the student’s first date of attendance at Georgia Southern. Only baccalaureate degree candidates are eligible to graduate with honors. Students seeking graduate degrees are not eligible for graduation with honors. The following requirements must be met:

1. At least 60 hours of credit must be earned at Georgia Southern University. Hours enrolled in Spring for May candidates will be computed to reach the 60 hours. Spring and Summer hours enrolled for Summer candidates who elect to participate in the May graduation will be computed to reach the 60 hours. Hours enrolled in Fall for December candidates will be computed to reach the 60 hours. Attaining the required 60 hours will ensure that the candidate will be recognized as graduating with honors at the respective commencement ceremony.
2. To determine eligibility for recognition of graduation with honors at the ceremony, the student’s grade point average at the end of the term prior to the commencement ceremony will be used. After graduation and all final grades are recorded and all degree requirements are complete, honors are re-calculated and will be added to diplomas and transcripts, if honors are achieved.
3. The first GPA criterion is that the minimum average for a particular level of honors must be earned on all undergraduate course work taken at Georgia Southern University.
4. The second GPA criterion is that the minimum average for a particular level of honors must be earned on all undergraduate course work attempted at all institutions attended.
5. If applying the two GPA criteria, the lower GPA will be used to assess the level of honors, if any.
6. The honors assigned and the scholastic records are:
   - Cum Laude: 3.5 - 3.69
   - Magna Cum Laude: 3.7 - 3.89
   - Summa Cum Laude: 3.9 - 4.0
7. **HONORS FOR SUBSEQUENT BACCALAUREATE DEGREES:** In addition to the preceding, a third GPA criterion applies to students earning subsequent undergraduate degrees. The student must earn the minimum average for a particular level of honors on all course work taken between the most recent undergraduate degree and the current degree. The lowest of the three GPA calculations will be applied to assess the level of honors, if any.

8. **HONORS FOR STUDENTS WHO SELECT ACADEMIC RENEWAL:** Please refer to the policy regarding Academic Renewal.

**Learning Support Program**

According to Board of Regents policy 4.2.1.4 Non-Traditional Students, “All non-traditional freshmen must be evaluated for Learning Support status in English (reading/writing) and Mathematics using USG placement criteria (see Academic and Student Affairs 2.9.1). As an alternative, an institution may allow non-traditional freshmen who have within the past seven (7) years posted SAT scores of at least 500 in both Critical Reading and Mathematics on the old SAT (administered prior to March 2016), or equivalent on the new SAT, or ACT scores of at least 21 on both English and Mathematics to exempt the placement test.”

The purpose of the Learning Support Program is to provide students who have been admitted with inadequate skills in reading, composition, and/or mathematics the support needed to be successful in entry-level college courses. If results of the placement tests reflect a need for assistance in developing academic skills of those who qualify for admission, students will be enrolled in a portion or in the entire Learning Support curriculum.

Learning Support courses carry institutional credit but not credit toward a degree. If the diagnostic tests so indicate, a student may be allowed to enroll in one or more college-level courses for degree credit concurrently with Learning Support courses. The student’s first obligation, however, is to satisfy Learning Support requirements.

Students’ progress will be assessed periodically, and they may move out of Learning Support courses at the end of any semester, provided satisfactory levels of proficiency have been reached. A Learning Support student who enrolls at another institution before completing Learning Support requirements at Georgia Southern may apply for readmission as a transfer student after satisfying Learning Support requirements and completing 30 hours of college-level work with a minimum GPA of 2.0.

Additional requirements for students enrolled in Learning Support courses:

- Learning Support students will be assigned a Learning Support advisor in the Academic Success Center and must see this advisor for drop/add and registration (even if the student has declared a major).
- Students are not allowed to drop any required Learning Support classes. Students may withdraw from the Learning Support corequisite class and corresponding collegiate-level course if they are failing the collegiate-level course at the time of the withdrawal deadline.
- Students who have earned 30-credit hours of college-level credit at Georgia Southern University and have not completed the Learning Support course requirements may enroll in only Learning Support courses and the corresponding collegiate-level course until requirements are completed.
- Students who apply for or receive financial aid and who are enrolled as Learning Support students will receive the same consideration and awards as any other student.
- Students who are not required to enroll in a Learning Support course may voluntarily enroll by submitting the request in writing to the Academic Success Center. They will be expected to participate in the course and take the tests, but they will not be subject to the Learning Support exit requirements.

See Course Descriptions (p. 488) for:
Office of International Programs and Services

Director: Dr. Dorothée Mertz-Weigel

Statesboro Campus:
Forest Drive Bldg. 1313

Armstrong Campus:
Gamble Hall 110
Phone: (912)344-3128

www.georgiasouthern.edu/international

The Office of International Programs & Services (OIPS) is responsible for the strategic execution of Georgia Southern’s internationalization process and provides oversight for the international activities of the campus. The OIPS aims to create a global awareness on campus and within the community. To prepare students with the global knowledge, attitudes and skills that will enable them to function as citizens of the world. We aim to infuse a global dimension throughout the University’s teaching, research, and service activities, and improve the breadth and depth of Georgia Southern’s global reach and engagement. These aspirations are achieved by managing international strategic partnerships; providing study abroad & exchange programming for students; offering professional development and service activities for faculty; maintaining high-quality, federally compliant international student and scholar services; and hosting programs and events to promote international awareness and an appreciation of global cultures. This infusion of internationalized educational activities extends beyond the scope of the University to support global learning, business, and economic development in Southeast Georgia.

Study Abroad and Exchange Programs

Studying abroad provides students with a trans-cultural experience that has many major benefits: discovering the culture and institutions of other lands, facilitating the development of relevant career skills, making important connections with overseas professionals, and enhancing language skills. In addition, studying abroad contributes to personal maturity, a sense of independence, self-knowledge, and self-confidence. Semester, and year-long exchange, summer, language immersion, and alternative break programs are available. All disciplines are eligible to participate, and programs are offered in more than 30 locations worldwide. For more information, visit www.georgiasouthern.edu/studyabroad or email studyabroad@georgiasouthern.edu.

International Student and Scholar Services

There are nearly 500 international students and scholars in F-1 (student) and J-1 (exchange visitor) visa status from about 90 countries at the university. The Office of International Programs & Services helps international students acclimate to their new environment at Georgia Southern, provides support services, processes visa-related documents, educates students and scholars on the visa laws to help them maintain their status with U.S. Homeland Security, and maintains the university’s compliance with the visa laws. Services provided include: orientation (including academic advisement and registration), English proficiency testing/placement, assistance with health insurance coverage, and visa and cultural advisement.

Intercultural Educational Programs

The OIPS plans and coordinates programs which foster international understanding and cultural exchange, both on our campuses and within our surrounding communities. Some of the programs offered are: the Global Partner Zone program, yearly symposiums on different countries, weekly International Conversation Hours, the International Club, International Education Week, the International Festival, the Global Ambassadors Program, the Cross-Cultural Friendships Program, and the International Extended Families Program. Participation in these programs and events are open to both international and U.S. students, as well as the local community.

Other Degree Requirements

Foreign Language Requirements

1. Requirements for Students Subject to RHSC (Required High School Curriculum) formally CPC (College Preparatory Curriculum)-High School Graduation less than five years ago:
   - Students graduating from high school are subject to RHSC. These students are required to complete two years of the same foreign language in high school to satisfy RHSC requirements. If the RHSC requirement in foreign language is not met at the time of enrollment, the student must enroll in a first foreign language course (1001) which will count toward college graduation.

2. Requirements for Students Not Subject to RHSC-High School Graduation more than five years ago: Students graduating from high school more than five years ago are not subject to RHSC. These students may count the foreign language toward graduation even though they may have completed these levels of the same language in high school.

Students who graduate from high schools outside the United States are not subject to the RHSC requirements. Students whose native language is not English and have graduated from a high school in the U. S. and who have not satisfied RHSC in high school may take a proficiency exam in their native language and satisfy their RHSC requirement, if they are proficient at the Elementary II (1002) level of their language.

B.A. Degree Requirements in Foreign Languages/Computer Science

B.A. degree students must complete either

1. foreign language through the Intermediate II level (or equivalent) OR
2. two computer science courses that emphasize coding and programming (or equivalent).

Equivalence may be demonstrated by one of the following:

1. High School transcripts showing a minimum of four (4) years preparation in a single language (per USG policy, courses taken in Middle School can count but must be documented in the HS transcript);
2. Taking and passing a placement test which grants credit through the Intermediate II course in a foreign language;
3. Transcripts showing four computer science units

Students transferring to Georgia Southern without sufficient course work to meet a program’s foreign language/computer science requirement will be required to fulfill the necessary courses for graduation.
B.S. Degree Requirements in Foreign Languages

B.S. degree students whose program specifies a foreign language or allows for the option of a foreign language must complete through the Intermediate I level (or equivalent).

Equivalence may be demonstrated by one of the following:

1. High School transcripts showing a minimum of four (4) years preparation in a single language (per USG policy, courses taken in Middle School can count but must be documented in the HS transcript);
2. Taking and passing a placement test which grants credit through the Intermediate II course in a foreign language

B.S. degree programs may require a course with significant international content in lieu of a foreign language requirement.

The total credit hour requirement for the RN-BSN program is 120 credit hours and excludes the Additional Requirements. Some programs require more than 124 credit hours.

Definition of a Major

A major program must include 21 credit hours or more of upper division (junior-senior level) courses in a field of study.

Regents’ Exemption Policy

Students enrolled in Composition I (ENGL 1101/WRIT 1101 or in Composition II (ENGL 1102) who earn an unsuccessful grade ("D" or "F") will be required to take the course again in the following semester in which the student is enrolled to ensure that they can build on the necessary skills needed for demonstrating competence in written communication. The student and faculty will determine the particular practices necessary for successfully completing the course with a least a "C" grade.

History and Constitution (U.S. and Georgia) Requirements

Georgia law requires that each candidate for a degree or certificate demonstrate knowledge of the history and constitution of the United States and Georgia. These requirements may be met by passing examinations offered by the Testing Office (912) 478-5415, http://studentsupport.georgiasouthern.edu/asc/testing/legislative-exemption-exams/or by receiving a passing grade (D grade or higher) in certain courses at Georgia Southern University. The courses and the requirement(s) each course satisfies are as follows:

- POLS 1101 satisfies Georgia Constitution and United States Constitution;
- HIST 3133 United States Constitutional History satisfies United States Constitution;
- HIST 2110 satisfies Georgia History and United States History;
- HIST 2111 U.S. History to 1877 satisfies Georgia History and United States History;
- HIST 2112 History of the United States since 1877 satisfies Georgia History and United States History
- POLS 3330 State and Local Government satisfies Georgia Constitution;
- HIST 4130 Georgia History satisfies Georgia Constitution and Georgia History.

Equivalent courses taken at an out-of-state institution will not satisfy the Georgia History or the Georgia Constitution requirements.

If the student has transfer courses from colleges in the State of Georgia or has questions about his/her History or Constitution requirements, the student may contact his/her advisement center or academic advisor to determine how to satisfy the remaining requirements.

These requirements may be met if the student has already received credit for the College Level Examination Program (CLEP) and/or the Advanced Placement Program (AP) and/or the International Baccalaureate Organization (IBO). Credit is awarded as follows:

- CLEP for POLS 1101 American Government satisfies United States Constitution
- CLEP for HIST 2110 U.S. A Comprehensive Survey satisfies United States History
- AP for POLS 1101 American Government satisfies United States Constitution (Georgia Constitution requirement will be satisfied only if the student has completed the AP course at a Georgia high school)
- AP for HIST 2110 U.S. A Comprehensive Survey satisfies United States History (Georgia History requirement will be satisfied only if the student has completed the AP course at a Georgia high school)
- IBO for HIST 2110 U.S. A Comprehensive Survey satisfies United States History (Georgia History requirement will be satisfied only if the student has completed the IBO course at a Georgia high school)

Equivalent courses or tests listed above taken at an out of state high school, will not satisfy the Georgia History or the Georgia Constitution requirement.

Information concerning preparation classes that will prepare students for the examinations offered by the Testing Office can be accessed at studentsupport.georgiasouthern.edu/asc/testing/legislative-exemption-exams or call (912) 478-5415.

The University Honors Program

The University Honors Program provides a small college atmosphere in the context of a large comprehensive university. Serving students on both the Statesboro and Armstrong campuses, the program is designed to foster the development of a critical sense of inquiry, a spirit of creativity, a global perspective, and an ethic of civic responsibility. A hallmark of the program is the emphasis on bringing ideas to life through undergraduate research, experiential learning, and service-learning opportunities. Honors students have the opportunity to enroll in honors sections of courses which are smaller and more dynamic than the typical class. During the junior and senior years, students develop an honors thesis or capstone project to further deepen their knowledge of their major field. In addition, honors students apply themselves outside of the classroom in at least one experiential learning project each year. Honors courses involve
innovative approaches and pedagogies and are open to talented non-honors students where space is available.

Admission to the University Honors Program is competitive. Students may apply to the program as incoming freshmen, incoming transfer students, and as current Georgia Southern students. Full details about the University Honors Program, its requirements, and the application process are found at the website: http://www.georgiasouthern.edu/honors or call the Statesboro Campus Honors office at (912) 478-7926 or the Armstrong Campus Honors office at (912) 344-3242.

Below are the requirements expected of honors students, whether they enter as traditional first-year students or join the program as a current student or transfer student.

**Traditional First-Year Students**

Traditional first-year students entering the program with fewer than 15 credit hours of earned college credit have the following requirements:

1. FYE: Honors FYE 1220, Honors First-Year Seminar (fall)
2. Core: Four Honors Core Courses
3. Experiential Learning: One Experiential Learning Activity per year (four total)
4. College Departmental Honors: Completion of College and/or Departmental Honors Courses
5. Honors Thesis: includes proposal submitted one year before graduation and presentation at the Honors Research Symposium prior to graduation

**Current and Transfer Students**

Currently enrolled Georgia Southern students and transfer students who join the program will have the following requirements based on their credit hours:

1. FYE: Students who join the program as current or transfer students do not have to take Honors FYE 1220.
2. Core: Students entering with 15-29 hours need three honors core courses; Students entering with 30-44 hours need two honors core courses; Students entering with 45-59 hours need one honors core course; Students entering with 60+ hours are not required to take honors core courses. (The number of credits earned will be determined based on the calculation of hours earned prior to matriculation at Georgia Southern as they appear in a student’s DegreeWorks audit.)
3. Experiential Learning: One Experiential Learning Activity per year: three for those entering as sophomores, two for those entering as juniors, one for those entering as seniors
4. College Departmental Honors: Completion of College and/or Departmental Honors Courses
5. Honors Thesis: Includes proposal submitted one year before graduation and presentation at the Honors Research Symposium prior to graduation

---

1. Incoming first-year students with 15 or more credit hours have the following requirements:
   - Students entering with 15-29 hours need three honors core courses.
   - Students entering with 30-44 hours need two honors core courses.
   - Students entering with 45-59 hours need one honors core course.
   - Students entering with 60+ hours are not required to take honors core courses.

The number of credits earned will be determined based on the calculation of hours earned prior to matriculation at Georgia Southern as they appear in a student’s DegreeWorks audit.

**Undergraduate Policies and Procedures**

- Scholarship Programs (p. 262)
- Transient Students (p. 263)

**Academic Alerts**

Georgia Southern faculty submit academic alerts for all students in areas A-E of the core curriculum and in other courses designated by their departments. Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Academic alerts pop-up in students’ MyGeorgiaSouthern portal shortly after faculty submit them, which generally occurs during the first half of the semester. For classes in which faculty submit academic alerts, they will assign “no alert/satisfactory” to students who have not merited an academic alert at the end of the seventh week of classes during the fall and spring semesters. Students can view a record of the last academic alert at the end of the seventh week of classes during the fall and spring semesters. Students can view a record of the last academic alert at the end of the seventh week of classes during the fall and spring semesters. Students can view a record of the last academic alert at the end of the seventh week of classes during the fall and spring semesters. Students can view a record of the last academic alert at the end of the seventh week of classes during the fall and spring semesters. Students can view a record of the last academic alert at the end of the seventh week of classes during the fall and spring semesters.

Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Academic alerts are initial indications that students are not doing satisfactory work in one of several categories (grades, attendance, participation, missed assignments, or some combination of categories).

Students who receive academic alerts are advised to seek the counsel of their instructor and academic advisor to develop a plan for success. For more specific recommendations, see http://academics.georgiasouthern.edu/fye/students/alert-tips/.

**Academic Intervention Policy**

An undergraduate student with a total institutional GPA less than 2.0 will be placed on academic intervention until the total institutional GPA is 2.0 or higher. The student must complete an Academic Improvement Plan (AIP) under guidance of an assigned university official. The AIP is developed by the student and university official and may include, but is not limited to, participation in workshops, assessments, and progress meetings. If a student appeals academic suspension, failure to complete the AIP will weigh negatively toward the decision made by the Academic Standing Committee.

A student on academic intervention is limited to taking no more than 15 credit hours per semester.

Questions regarding requirements for the AIP or limit on credit hours should be directed to the Academic Success Center (http://academics.georgiasouthern.edu/success).
Academic Renewal Policy

The Academic Renewal Policy allows students who are enrolled in a University System of Georgia (USG) institution to have a fresh start if they have had academic difficulties in the past.

Requirements for Eligibility

- Current or former students must apply for Academic Renewal by contacting the Office of the Registrar. New students must contact the Office of Undergraduate Admissions. The granting of Academic Renewal is not automatic.
- Students must apply for Academic Renewal, if they choose this option, by the end of their third semester of enrollment or by the end of one calendar year, whichever comes first.
- Academic Renewal may be granted only once by a USG college or university.
- Students must have experienced their academic difficulties at Georgia Southern University or be a transfer student from a regionally accredited institution of higher education to be eligible for Academic Renewal.

Readmitted students

- Undergraduate students who return to a previously attended USG institution may be eligible for Academic Renewal.
- Readmitted students must be absent from Georgia Southern University for three (3) years, the required period of absence.
- The period of absence is calculated based on the period of time between the date of last enrollment at Georgia Southern University and the date of return to Georgia Southern University.
- Only coursework completed prior to the period of absence may be considered for Academic Renewal. If Academic Renewal is granted, all coursework completed prior to the period of absence will be renewed.
- Students may attend other institutions during the period of absence; however, that coursework will not be eligible for Academic Renewal. Transfer credit for any coursework taken during the period of absence shall be granted in accordance with the prevailing USG and Georgia Southern University policies and procedures regarding the awarding of transfer credit.

Transfer students

- Students who previously attended a USG institution or any regionally accredited institution of higher education and transfer to Georgia Southern University may be eligible for Academic Renewal for coursework taken three (3) or more years prior to the term of enrollment at Georgia Southern University.
- If Academic Renewal is granted, all coursework completed three (3) years prior to the term of enrollment at Georgia Southern University will be renewed.
- Courses taken less than three (3) years prior to the term of enrollment at Georgia Southern University are ineligible for consideration for Academic Renewal. Transfer credit for any coursework taken three (3) or more years prior to the first term of enrollment at Georgia Southern University shall be granted in accordance with the prevailing USG and Georgia Southern University policies and procedures regarding the awarding of transfer credit. Retained grades are not calculated in a renewal GPA. Such credit is considered in the same context as transfer credit, credit by examination, and courses with grades of "S".

About the Policy

- A student’s total institution Grade Point Average (GPA) upon Academic Renewal will begin at his/her first semester of enrollment/re-enrollment at Georgia Southern University.
- All past academic suspensions and exclusions will remain on the student’s permanent record.
- All Georgia History, Constitution, College Preparatory Curriculum (CPC), and other Board of Regents Policy requirements met prior to Academic Renewal will remain on the student’s permanent record and will count in regard to those policies.
- Graduation with honors will be based on the cumulative (overall) GPA as defined in the policies for determining graduation with honors. All previous grades will be used in determining honors.
- Reentry into a student’s previous major program is not automatic.
- The granting of Academic Renewal does not supersede any financial aid policies.
- Academic Renewal will not supersede admissions requirements for certain programs which require a specific minimum GPA based upon all course work.

Total Institution GPA

- All past grades of D and F will be forgiven in the readmitted student’s total institution GPA upon Academic Renewal, but will remain in the student’s official cumulative Georgia Southern University GPA. The student will lose credit for courses in which he/she earned D grades.
- All past grades of A, B, C, and S will remain in the student’s hours earned toward graduation, but they will not be included in the readmitted student’s total institution GPA upon Academic Renewal. They will, however, be included in the student’s official cumulative Georgia Southern University GPA.

Transfer Institution GPA

- All past grades of D and F will be forgiven in the student’s transfer institution GPA upon Academic Renewal. The student will lose credit for courses in which he/she earned D grades.
- All past grades of A, B, C, and S will remain in the student’s hours earned toward graduation, but they will not be included in the student’s transfer institution GPA upon Academic Renewal.

Academic Standing Policy

If a student has an institutional GPA less than 2.0, one of the following will apply:

Academic Warning 1 (W1)

A student will be placed on Warning 1 (W1) status at the end of the first semester of enrollment in which his/her institutional GPA drops below 2.0.

- A student on W1 status will lose credit for courses in which he/she earned D grades.
- A student on W1 status will remain on W1 status if his/her term GPA is 2.0 or higher.
- A student on W1 status will move from W1 when his/her institutional GPA is 2.25 or higher for the term but the institutional GPA is below 2.0.

Academic Probation 1 (P1)

A student will be placed on Probation 1 (P1) status if his/her institutional GPA is below 2.0.

- A student on W1 status will remain on W1 status if his/her term GPA is not 2.25 or higher at the end of the semester and the institutional GPA is below 2.0.

- A student who begins the semester on W1 will be placed on Academic Probation 1 (P1) if his/her term GPA is not 2.25 or higher at the end of the semester and the institutional GPA is below 2.0.
• A student on P1 status will move from P1 when his/her institutional GPA is 2.0 or higher.
• A student on P1 status will remain on P1 status if s/he earns a term GPA of 2.25 or higher for the term but the institutional GPA is below 2.0.
• A student who begins the semester on P1 will be placed on Academic Suspension 1 (E1) if his/her term GPA is not 2.25 or higher at the end of the semester and the institutional GPA is below 2.0.

**Academic Suspension 1 (E1)**
Academic Suspension results when a student who begins the semester on Academic Probation 1 (P1) does not earn either a term GPA of 2.25 or an institutional GPA of 2.0 at the end of the semester.

• A student on E1 status cannot be enrolled at Georgia Southern until they have not been enrolled for two consecutive fifteen-week semesters.
• Any student suspended from the university may submit an appeal to the Academic Standards Committee to be readmitted any time during the two-semester suspension period. If the appeal is denied by the Academic Standards Committee, the student may appeal to the Dean of his/her College.
  • If a student’s readmission appeal is approved by either the Academic Standards Committee or the Dean of his/her College, the student will remain enrolled at the University and will be placed on an intermediate (01) status. A student will be allowed no more than one approved appeal.

**Academic Warning 2 (W2)**
A student will be placed on Warning 2 (W2) status at the end of the first semester after academic suspension (E1).

• A student on W2 status will move from W2 when his/her institutional GPA is 2.0 or higher.
• A student on W2 status will remain on W2 status if s/he earns a term GPA of 2.25 or higher for the term but the institutional GPA is below 2.0.
• A student who begins the semester on W2 will be placed on Academic Probation 2 (P2) if his/her term GPA is not 2.25 or higher at the end of the semester and the institutional GPA is below 2.0.

**Academic Probation 2 (P2)**
A student will be placed on Probation 2 (P2) status if s/he was previously on Warning 2 (W2) status, s/he has a term GPA below 2.25, and his/her institutional GPA is below 2.0.

• A student on P2 status will move from P2 when his/her institutional GPA is 2.0 or higher.
• A student on P2 status will remain on P2 status if s/he earns a term GPA of 2.25 or higher for the term but the institutional GPA is below 2.0.
• A student who begins the semester on P2 will be placed on Academic Suspension 2 (E2) if his/her term GPA is not 2.25 or higher at the end of the semester and the institutional GPA is below 2.0.

**Academic Suspension 2 (E2)**
Academic Suspension 2 results when a student who begins the semester on Academic Probation 2 (P2) does not earn either a term GPA of 2.25 or an institutional GPA of 2.0 at the end of the semester.

• Students who are not enrolled for three years may be eligible for academic renewal.
• The granting of academic renewal does not supersede financial aid policies regarding Satisfactory Academic Progress.
• Any student suspended from the university may submit an appeal to the Academic Standards Committee to be readmitted any time during the three-year suspension period. If the appeal is denied by the Academic Standards Committee, the student may appeal to the Dean of his/her College.
  • If a student’s readmission appeal is approved by either the Academic Standards Committee or the Dean of his/her College, the student will remain enrolled at the University and will be placed on an intermediate (02) status. A student will be allowed no more than one approved appeal.

**Financial Aid Implications**
A student’s ability to receive future financial funding and ability to meet the Federally mandated Standards of Academic Progress may be impacted by his/her academic standing. Furthermore, earning a 2.0 institutional GPA or higher does not necessarily meet financial aid requirements regarding Satisfactory Academic Progress. Students should make an appointment with a financial aid counselor.

• Note: New Academic Standing Policy is effective Fall 2018.
• Students on Warning (W1 & W2) and Probation (P1 & P2) continue to be in good standing with the University.
• Institutional GPA is calculated using only the courses enrolled in and completed at Georgia Southern University. Transfer courses are not included in this calculation.
Academic Standing Policy – Visual (Effective Fall 2018)

Student GPA is 2.0 or higher

If student's institutional GPA drops below 2.0, student is placed on Academic Warning (AWS). At the end of the semester:

- Is student's total institutional GPA 2.0 or higher? [YES]
  - Student moves from W to F.

- Is student's term GPA 2.0 or higher? [NO]
  - Student's standing remains W.

Student is placed on Academic Probation (AP). At the end of the semester:

- Is student's total institutional GPA 2.0 or higher? [YES]
  - Student moves from AP to F.

- Is student's term GPA 2.0 or higher? [NO]
  - Student's standing remains AP.

Academic Suspension 1 is for two consecutive 15-week semesters.

Student is readmitted to the University after sitting out 2 semesters or receiving an approved appeal from the Academic Standards Committee or the Dean of Undergraduate College.

Academic Suspension 2 is for three years.

Student is readmitted to the University by an approved appeal from the Academic Standards Committee or the Dean of Undergraduate College.
Additional Academic Standing Policies

Readmission
A student who has been placed on Exclusion 1 (E1) may apply for readmission to Georgia Southern after remaining out for one year (three semesters). After a subsequent Exclusion 2 (E2), a student may apply for readmission after remaining out for three years. A former student application should be submitted to the Office of the Registrar for the semester readmission is desired. A student will have to be approved for Academic Renewal (p. 257) to be readmitted.

Readmission (Post-Baccalaureate)
A post baccalaureate student will only be allowed to take undergraduate classes. Post baccalaureate students will not be allowed to take any graduate classes.

Post baccalaureate students who are degree seeking may use the following website for more information on how to contact an advisor and schedule an appointment for advisement: http://academics.georgiasouthern.edu/advisement/.

Requirements After Readmission
Following any academic exclusion and a subsequent readmission, a student will be allowed to continue a maximum of three semesters of enrollment before their total institution GPA has to be above a 2.0. At this time the student will be placed on Academic Exclusion 2 if the total institution GPA is not a 2.0 or higher.

Right of Appeal
In all matters concerning Exclusion 1 or 2, the student may appeal by writing to the Registrar and clearly stating the basis for an appeal. The student may appeal after receiving an Exclusion 2 if the student has not received an approved appeal after they received an Exclusion 1. The appeal will be considered by the Academic Standards Committee. A student will be allowed no more than one approved appeal to the Academic Standards Committee and/or to the student’s dean.

Appeal forms are available online at http://em.georgiasouthern.edu/registrar/students/forms/ and must be submitted electronically. Click “Student,” click “Forms for Students,” and scroll down to the readmission appeal form and submit the appeal. The student should submit the appeal as soon as possible but must be received in the Office of the Registrar prior to 4 p.m. three (3) working days before the first day of University classes for the semester the student is seeking readmission to Georgia Southern University. Individuals failing to satisfy the deadline may submit their appeal for the following term.

Repeating Courses
An undergraduate student may repeat any course and the most recent grade becomes the official grade for the course even if the most recent grade is lower. All grades will be used in computing the total institution GPA. The total institution GPA will be used to determine a student’s academic standing and graduation GPA requirements.

Attending Other Colleges or Universities
The University cannot request another institution to accept a student during any period of ineligibility at Georgia Southern University, but we have no objection to another institution allowing a student to attend while on Exclusion 1 or Exclusion 2.

Classification
Students are classified at the beginning of each semester on the following basis:

<table>
<thead>
<tr>
<th>Classification</th>
<th>Credit Hours Earned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshmen</td>
<td>0 - 29.99</td>
</tr>
<tr>
<td>Sophomores</td>

Consolidation GPA Renewal Policy

Applying for Consolidation GPA Renewal

Part I

- Only undergraduate students who were adversely affected by the consolidation of the two universities can submit an appeal for Consolidated GPA Renewal status;
- Georgia Southern University shall establish specific evaluative criteria and procedures for appeal evaluation, approval, and denial for Consolidation GPA Renewal. These procedures are subject to change;
- The home institution of the student will be used to determine if the appeal is approved or denied;
- A student can be approved for Consolidation GPA Renewal status only one time.

Part II

- If the student’s appeal is approved, the updated Consolidation Renewal GPA becomes the total institutional GPA;
- The new total institutional GPA will be used for determining academic standing and eligibility for graduation;
- Graduation with honors will be based on the overall GPA as defined in the policies for determining graduation with honors. All previous grades, including any omitted to recalculate the total institutional GPA due to an approved Consolidation GPA Renewal appeal will be used in determining honors;
- Courses taken after the consolidation (Fall 2018) are ineligible for consideration for Consolidation GPA Renewal.

Part III

- Academic credit for previously completed coursework will be retained only for courses in which a grade of A, B, C or D has been earned;
- Retained grades may not be calculated in the total institutional GPA. Such credit is considered in the same context as transfer credit, credit by examination, and courses with grades of “S”;
- Courses with grades of F or WF must be repeated at the consolidated institution if they are required for the student’s degree requirements;
- Applicability of retained credit to degree requirements will be determined by the degree requirements in effect for the students major and catalog year. Specific institutional program regulations must also be met.

Part IV

- Repeated courses will adhere to the consolidated institution’s repeat policy;
_currently enrolled students may participate, and no financial eligibility
students find part-time jobs in the various departments on campus. All

Federal College Work-Study Program
Employment Programs
3.9 will be placed on the Dean's List. The Dean's List Certificate will be
en Georgia Southern University must receive
Course Load
A student's course load is computed on the credit hour value of all courses
taken for credit during the semester whether taken on-campus, off-
campus, or by correspondence. A normal load in a semester is fifteen (15)
to eighteen (18) hours. Twelve or more hours is considered a full-time
load for undergraduate students. A student must take six (6) to eight (8)
hours to be considered a half time student or a student must take nine
(9) to eleven (11) hours to be considered a three quarter time student.
An advisor may approve an overload for nineteen (19) to twenty-one (21)
hours. The Dean of the College in which the student's major is found
may approve an overload for twenty-two (22) to twenty-three (23) hours.
Under extraordinary circumstances, a student's dean may recommend
to the Provost that a student be allowed to take more than twenty-three
(23) hours, but never more than twenty-five (25) hours. Students are
allowed to take no more than seven (7) semester hours during Term A,
B, D, and E. No more than twelve (12) semester hours during the Long
Term or a combination of concurrent terms. During the summer semester,
an Georgia Southern University 59 undergraduate student must receive
approval from his/her advisor to enroll in more than twelve (12) hours.

Dean's List
During any semester, an undergraduate or post baccalaureate student
enrolled in 12 or more GPA hours and making a semester GPA of 3.5 -
3.9 will be placed on the Dean's List. The Dean's List Certificate will be
awarded by the appropriate dean.

Employment Programs
The University offers two student employment programs: Federal College
Work-Study and Institutional Work Program.

Federal College Work-Study Program - The Federal College Work-
Study Program (FWS) provides jobs for students who demonstrate
financial need and who want to earn money to help pay for some of their
educational expenses. Students must file the Free Application for Federal
Student Aid (FAFSA) to establish financial need in order to be awarded
FWS. The amount of the award depends upon demonstrated financial
need and the amount of funds available. Funding is very limited for this
program. The standard award allows the student to work 8 to 10 hours per
week for a 15 to 18 week period. Visit the Financial Aid website at http://
em.georgiasouthern.edu/finaid/ for more information.

Institutional Work Program - The Institutional Work Program helps
students find part-time jobs in the various departments on campus. All
currently enrolled students may participate, and no financial eligibility
requirements apply. Interested students should visit the Student
Employment Center website at http://jobs.georgiasouthern.edu/SEC/ in
order to review the various on-campus job openings and part-time job
opportunities available in the Statesboro area. Students must be enrolled
in six or more credit hours to qualify for this program.

Graduate Credit for Seniors
(Senior Privilege)
A Georgia Southern University senior with no more than nine (9) credit
hours remaining in completing the requirements for the bachelor's degree
may apply for Senior Privilege to enroll in graduate courses for graduate
credit providing:

• The student submits a Senior Privilege Application Form
(http://cogs.georgiasouthern.edu/wp-content/uploads/ SeniorPrivilegeApplicationForm.pdf);
• Permission to enroll in such courses is obtained from the chairperson
of the department involved, the appropriate graduate program director,
and COGS (College of Graduate Studies);
• The student is otherwise qualified for Regular Degree Admission to the
COGS;
• The total term load does not exceed fifteen (15) credit hours, with no
more than nine (9) credit hours of graduate credit.

Limited Grade Forgiveness Policy
Under the conditions outlined below, undergraduate students who have
retaken courses and earned a higher grade may request to have the first
course grades from their institutional GPA. If the request is approved,
the Office of the Registrar will make appropriate notations next to the
original course and the retaken course on the student's official transcript.
Grades for all attempts at the course will appear on the student's official
transcript regardless of whether or not the grade has been excluded from the
student's GPA.¹ This policy has no effect on any GPA requirements
set by state or federal laws/regulations (such as the GPA requirements set
by the HOPE scholarship program). A copy of the request and approval
will become part of the student's permanent record file. The attempt to
repeat must be made in Spring 2019 or thereafter. Students who have
repeated courses prior to this date will not be allowed to delete earlier
attempts from their GPA calculation.

An undergraduate student may request to have a grade excluded from
GPA computation under the following conditions:

• Only courses in Areas A through E of the University CORE are eligible
for grade forgiveness.
• Only courses taken at Georgia Southern University are eligible for
grade forgiveness.
• Only courses taken at Georgia Southern University are eligible for
grade forgiveness.
• No more than a total of five course grades (from five different courses)
may be forgiven.
• Before requesting to apply the limited grade forgiveness policy, a
student must have either retaken the same undergraduate course
(or the renumbered substitute for that course) or taken a course that
satisfies the same CORE requirement and earned a higher grade in
the course retaken.
• Once a request has been approved the request cannot be revoked or
reversed.
• Only grades of D, F, and WF may be forgiven.
• This policy does not apply if the original grade was assigned as a
result of a violation of the Student Code of Conduct.
• The Limited Grade Forgiveness Policy applies only to degree-seeking students pursuing their first undergraduate degree at Georgia Southern University.

1 Courses that do not count towards GPA calculations cannot count towards degree requirements.

Policy for Limiting Individual Course Withdrawals

Undergraduates may withdraw from a maximum of six (6) courses for their entire enrollment at the University. Students who have reached their maximum number of withdrawals may elect to receive a “withdrawal-failing” (WF) grade in the course, which is calculated as an “F” for GPA purposes. A student who attempts to withdraw from a course beyond the limit without special permission from the dean of his or her college will continue to be enrolled in the course and will receive a grade at the end of the semester.

Only withdrawals incurred at Georgia Southern University count toward the maximum number of withdrawals. Withdrawals incurred prior to the implementation date (Fall 2018) will not count toward students’ number of allowed withdrawals. Transfer students, irrespective of their classification upon enrolling at Georgia Southern, are also limited to six withdrawals at Georgia Southern.

Automatic exceptions are as follows:

• Withdrawals are automatically exempt from the maximum number of withdrawals when students withdraw from all classes for military or hardship reasons that are documented and approved.
• Linked lecture-lab courses will count as a single course withdrawal.

Petitions for exception based on other circumstances are heard in the following manner:

• In cases where students completely withdraw from the University for reasons not covered by the second bullet above, students may petition in writing to the Dean of Students (or the dean’s designee) to have these courses exempted from the total number allowed by completing the Voluntary Cancellation/Withdrawal Form.
• Once the withdrawal limit is reached, students will only be allowed to withdraw from an individual course or courses for extenuating circumstances beyond their control. To withdraw without penalty in these cases, students must appeal in writing to the dean (or the dean’s designee) of their academic college (not necessarily the college in which the course is taught). Appeals for individual withdrawals are not heard unless the student has already reached the maximum number of withdrawals allowed.

President’s List

During any semester, an undergraduate or post baccalaureate student enrolled in 12 or more GPA hours and making a semester GPA of 4.0 will be placed on the President’s List. A President’s List Certificate will be awarded by the President.

Registration Time Tickets and RANs

Undergraduate students are allowed to register on Georgia Southern University’s web system, WINGS (Web Interactive Network for Georgia Southern), each semester by means of their time ticket. A “time ticket” gives a student beginning and ending dates and times for registration. Time tickets are assigned on the basis of total cumulative credit hours earned. Students may view their time ticket on WINGS by going through their MyGeorgiaSouthern account. A student’s time ticket on WINGS is found by first clicking on the “Student” menu. After choosing this menu, the student will click on “Registration,” then click on “Check Your Registration Status, Time Slot and More.”

Before any student at Georgia Southern University registers for classes on WINGS, he/she must have a RAN (Registration Access Number). This number will be given to each student by the appropriate academic advisor during advisement each semester. Degree seeking post baccalaureate students will receive their RAN from their academic advisor. Non-Degree seeking Post Baccalaureate students will get their RAN from their MyGeorgiaSouthern account. Also, transient students will get their RAN from their MyGeorgiaSouthern account.

S/U Grading Options

Students may select the S/U grading option under the following conditions:

1. Student must have earned 67 semester credit hours prior to enrolling in any course for S/U grading;
2. Student must be in good academic standing;
3. Student must have declared a major;
4. S/U grading will be permitted only in courses being used to satisfy the free elective or minor requirements of the individual student’s degree program. A maximum of three credit hours will be allowed for any minor. The option applies only to undergraduate courses;
5. Student may not change from S/U grading status to letter grade status or vice versa after the last day of Drop/Add.

Under the S/U grading option, the course content and requirements are the same for S/U registrants as for regular registrants. The minimum performance for an “S” grade is equivalent to the minimum performance for the letter grade “D”.

A student electing the S/U grading option must obtain approval from the student’s advisor. The advisor giving such approval should submit an email specifying this approval to the Registrar’s Office.

Scholarship Programs

New Student Scholarships

Scholarships for first-time freshmen and transfer students are administered by the Office of Admissions. To review scholarship opportunities, please access the Admissions website at http://admissions.georgiasouthern.edu/.

Continuing Students

All continuing students are encouraged to apply for scholarships through their MyScholarships portal found on MyGeorgiaSouthern. Doing so qualifies the students for a wide variety of scholarships - including departmental, general, and study abroad. The site may also be accessed by visiting: https://georgiasouthern.academicworks.com/.

State Scholarships

The Georgia Student Finance Commission administers state scholarships and student grant programs. For information contact:

Georgia Student Finance Commission
2082 East Exchange Place, Suite 200
Tucker, GA 30084
(800) 505-4732
http://www.Gafutures.org/
The HOPE Scholarship (Helping Outstanding Pupils Educationally) and Zell Miller Scholarship are Georgia's unique programs that reward hard working Georgia students with matriculation scholarships in degree programs at any Georgia public college, university, technical college or eligible private institution. The programs are funded by the Georgia Lottery for Education and amounts are subject to change.

To qualify for HOPE, a student must be a legal resident of Georgia or be considered a Georgia resident for purposes of in-state tuition at the time of enrollment for the school term for which the scholarship is sought. Students who graduated from high school with a high school core curriculum GPA of at least 3.0 may qualify for the HOPE Scholarship as incoming freshmen.

Students who did not qualify for HOPE as incoming freshmen may still receive a HOPE Scholarship if they graduated from high school less than seven years ago, were a legal resident of Georgia at the time of enrollment for the school term for which the scholarship is sought, and have a 3.0 cumulative GPA after attempting 30, 60, or 90 credit hours of University course work.

HOPE eligibility is reviewed at various checkpoints during the academic year and all attempted credit hours are counted in the review. "Attempted hours" refers to all credit hours attempted in a degree program at a postsecondary institution after high school graduation, including classes that were dropped or failed. The deadline to apply for HOPE is the last day of class for the semester for which you are applying.

The Zell Miller Scholarship provides full tuition funding to undergraduate Georgia residents who graduate from high school with a 3.7 or greater GPA and score at least a 1200 reading and math score on the SAT or an ACT composite score of 26. To remain eligible, students must maintain at least a 3.3 college GPA at the checkpoints (30, 60, 90 attempted credit hours and after every spring semester).

The Georgia HERO Scholarship (Helping Educate Reservists and their Offspring) was created to provide financial aid to students seeking a post-secondary education, who are:

- Current members of the Georgia National Guard or United States Military Reserves who are deployed overseas on active service, on or after February 1, 2003, to a location designated as a combat zone; or
- The children of Georgia National Guard members or United States Military Reservists who were deployed overseas on active service, on or after February 1, 2003, to a location designated as a combat zone; or
- The spouses of Georgia National Guard members or United States Military Reservists who were deployed overseas on active service, on or after February 1, 2003, to a location designated as a combat zone, and who were killed in the combat zone, or died as a result of injuries received in the combat zone, or became 100 percent disabled as a result of injuries received in the combat zone.

The Georgia HERO Scholarship Program is funded by state appropriations. The maximum amount awarded to an eligible student is $2,000 per Award Year. The award amount is subject to change during the Award Year.

The Scholarship for Engineering Education for Minorities (MSEE) program offers financial assistance to Georgia residents who are enrolled in an engineering program of study approved by the Engineering Accreditation Commission of the Accrediting Board of Engineering and Technology (ABET). The purpose of the program is to attract minority undergraduate students into the engineering profession and to increase the number of qualified engineers in Georgia. MSEE is a service cancelable loan that can be used for tuition, room and board, or other educational expenses. In return, students agree to work in Georgia after graduation in an engineering-related field for a reduction in the loan's balance.

Contact a financial aid counselor for other requirements and further information, (912) 478-5413. Additional restrictions may apply. The above is based on the most recent information from the Georgia Student Finance Commission and is subject to change.

Other Outside Sources of Financial Aid

Many foundations, companies, and other groups have established scholarship or loan programs for use by Georgia Southern University students. To review these, access the Georgia Southern University Financial Aid website at http://em.georgiasouthern.edu/finaid/types-of-aid/scholarships/. Other helpful websites to use in searching for external scholarships may be found on our Financial Aid website under "Types of Aid" at http://em.georgiasouthern.edu/finaid/external-scholarships/.

Transient Students

Georgia Southern University students (with a 2.0 or higher Georgia Southern total institutional GPA) who wish to take course work at another institution and receive academic credit at the institution may do so if the following conditions are met:

1. Student must have a total institutional grade point average of 2.0 or higher;
2. Student must complete a Transient Form (available in the Registrar’s Office or at http://em.georgiasouthern.edu/registrar/students/forms/) obtaining the approval of his/her advisor and the Registrar;
3. If the student is within the last 25% of hours needed for graduation, the student must also obtain the written approval of his/her department chair and academic dean;
4. Students with learning support requirements must obtain permission from the Director of the Academic Success Center;
5. Students may be approved for transient status for only one semester at a time;
6. Students must make a minimum grade of “C” to assure that the course will be accepted in transfer;
7. Students attending another institution as a transient student must request that an official transcript of course work be sent to Georgia Southern University’s Office of the Registrar once the semester is over;
8. A student who takes his/her last work for a degree as a transient student during any graduation semester may not be eligible for graduation that semester;
9. A student must apply for admission to the school he/she wishes to attend;
10. A student must not have a financial hold (FH) and must not owe outstanding tuition and/or fees to the university;

Note: Courses taken as a transient will not be calculated in the Georgia Southern University GPA. However, transient work may affect a student’s eligibility for graduation with honors.
Admissions

The University accepts applications from qualified applicants from all cultural, racial, religious, and ethnic groups. Admissions standards are designed to identify students whose academic backgrounds indicate they are capable of successfully completing work at Georgia Southern University. (See Equal Opportunity Policy (p. 840) statement.)

Applications for admission may be submitted online at GeorgiaSouthern.edu/admissions (http://admissions.georgiasouthern.edu). Applications must be submitted prior to the application deadline.

Normally, all applicants who have applied or updated their applications prior to the application deadline for a specific term will be considered for admission. However, the University reserves the right to stop accepting applications at any time. Therefore, students are encouraged to apply or update well in advance of the application deadline.

The University reserves the right to examine any applicant by the use of psychological, achievement, and aptitude tests. Each applicant must give evidence of good moral character, promise for growth and development, seriousness of purpose, and a sense of social responsibility.

The University reserves the right to require additional biographical data and/or an interview before the applicant is accepted or denied admission. If an interview is required, the applicant will be notified.

The final decision of acceptance or denial will be made by the Director of Admissions subject to the applicant’s right to appeal as provided in the policies of the Board of Regents of the University System of Georgia.

An applicant who chooses not to enroll for the semester accepted must notify the Office of Admissions to update the term of application.

Acceptance may be deferred until additional information is received. An applicant who updates the intended term of entry must meet admissions requirements for the new term. Applications remain on file and are eligible for update well for two years.

Beginning Freshmen

Requirements for Summer 2018, Fall 2018, Spring 2019

Students being evaluated as a beginning freshman must present credits for seventeen specified USG courses:

- Mathematics: Four units of mathematics, including Algebra I/Coordinate Algebra, Geometry/Analytic Geometry, Algebra II/Advanced Algebra, and a fourth year of advanced math, or equivalent courses. Georgia Southern does not accept Mathematics Support or Mathematics of Finance.
- English: Four units of literature (American, English, World) integrated with grammar, usage, and advanced composition skills.
- Science: Four units of science where at least two of the courses include a laboratory component. Georgia public high school students must have at least one unit of biology, one unit of physical science or physics, one unit of chemistry, earth systems, environmental science, or an advanced placement science course, and a fourth science.
- Social Science: Three units of social science, with at least one course focusing on U.S. studies and one course focusing on world studies.
- Foreign Language: Two units in the same foreign language emphasizing speaking, listening, reading, and writing. Two units of American Sign Language or certain Computer Sciences (must have a coding and programming emphasis) may be used to satisfy this requirement.

An applicant will be considered for admission upon compliance with the following requirements and conditions:

1. Graduation from an approved secondary school;
2. Satisfactory completion of the Required High School Curriculum, which should include the following units as defined above:
   - 4 Mathematics
   - 4 English
   - 4 Science
   - 3 Social Science
   - 2 Foreign Language
3. Submission of satisfactory scores on the College Board Scholastic Aptitude Test (SAT) - minimum 1030 SAT total (Evidence-Based Reading & Writing + Math on redesigned exam) - or American College Test (ACT) with a 20 composite;
4. U.S. citizens or resident aliens for whom English is not the native language may be required to take the English Language Placement Exam upon arrival. Resident aliens must submit a copy of their green card;
5. Submission of an official high school transcript and a record of good conduct. Major or continued difficulty with the school or civil authorities may make an applicant ineligible regardless of academic qualifications.

Georgia Southern University offers a summer entry program for students to demonstrate their ability to succeed at college-level work. Students who participate can enroll regularly for Fall 2018. Refer to GeorgiaSouthern.edu/eip (http://admissions.georgiasouthern.edu/programs/eagle-incentive-program) for additional information.

Applicants are usually admitted prior to high school graduation, once they have completed their junior year of high school, and have submitted an official high school transcript. The transcript should include a satisfactory grade point average and a full listing of senior year courses yet to be completed. Satisfactory SAT or ACT scores must be requested from the testing agency and sent directly to the Office of Admissions by that testing agency.

Please note: Students applying to secondary admit programs must meet general admission requirements, as well as meet specific program requirements. An additional application to the program of choice is required. Admission to Georgia Southern University does not guarantee acceptance into secondary admit programs.

(GED holders - See Adult Student (p. 267) criteria)
Credit by Examination

Advanced Placement, International Baccalaureate, AICE, and CLEP

Georgia Southern University is a participant in the Advanced Placement (AP) Program, the International Baccalaureate (IB) program, the Cambridge AICE Diploma program, and the College Level Examination Program (CLEP) of the College Entrance Examination Board. Under the AP, IB, and AICE programs, a student offers a nationally-graded examination as evidence of completion of a college-level course taken in high school. Depending on the results of the examination, the student may receive credit for courses covering similar material. The total college course credit hours awarded for IB assessments may not exceed 24. Under the College Level Examination Program, Advanced Placement, and AICE, the University grants up to 30 credit hours of general education credit to those students who obtain the minimum scores defined by University policy. (Credit will not be awarded if the student has previously registered for a similar course or a more advanced course in the same field, or if six months have not elapsed since last taking the test.) For further information contact the Director of Admissions or check the website, http://admissions.georgiasouthern.edu/programs/ap-ib-clep/.

Dual Enrollment at Georgia Southern

Dual Enrollment courses are primarily available for eligible 11th or 12th grade (in some limited cases 9th-10th grade) high school students who are sixteen years or older. Students may enroll full-time or part-time in approved credit-bearing college-level courses. The Dual Enrollment program is available to 11th and 12th grade students at public and private high schools in the state of Georgia, or students who attend an eligible home study program. There is no residency or citizenship requirement to participate in the Dual Enrollment program.

Approved courses for dual enrollment are listed in the Approved Course Directory (https://apps.gscf.org/secure/dsp_accel_course_listings.cfm). Approved classes may include degree level or non-degree level courses in the five main academic areas (English, Mathematics, Science, Social Studies, and Foreign Language), as well as electives.

The Dual Enrollment program covers 100% of tuition for approved courses, all mandatory, non-course related fees, and textbooks for approved courses. Students may incur expenses for course-related fees and supplies required for a particular course, or optional fees such as parking, housing, and dining. Dual Enrollment is available during fall, spring, and summer semesters.

Students must apply by submitting an application for admission to Georgia Southern (no application fee required), high school transcript, student participation agreement, and SAT or ACT scores. The Georgia Department of Education (DOE) has produced and provided to the Georgia Student Finance Commission (GSFC) a directory of eligible public high school courses that can be substituted with college level coursework and applied toward high school graduation requirements for dual credit students. Georgia Student Finance Commission contact information - (770) 724-9000 or http://www.gsfcs.org/.

Questions regarding this program should be directed to the student's high school counselor or the Office of Admissions. Students should confer with their high school counselor to determine which courses are necessary for satisfying high school graduation requirements. Placement in these courses cannot be guaranteed.

Dual Enrollment is a state-funded program for high school (public, private, and approved home-study) students that provides dual enrollment tuition assistance in Georgia. The program offers the opportunity to earn dual credit, satisfying high school and college Required High School Curriculum.

Admission Requirements for Dual Enrollment

To be admitted to the Dual Enrollment Program at Georgia Southern University, the student must satisfy the following:

1. Earn an academic grade point average of at least 3.0 (85 on numeric scale) as recalculated by the Office of Admissions;
2. Submit SAT scores of at least 1050 (Evidence-Based Reading & Writing + Math on redesigned exam) or 20 Composite ACT;
3. Gain permission from their high school guidance counselor and parents by completing the student participation agreement;
4. Meet all other regular (non-provisional) admission requirements.

Students who participate in Dual Enrollment during high school with a college or university other than Georgia Southern University must meet the University System of Georgia's dual enrollment requirements before credit will be awarded in transfer to Georgia Southern.

Dual Enrollment students will only receive letter grades from Georgia Southern University. Numeric grades are not provided to the high schools.

International Student Admission

Georgia Southern subscribes to the principles of international education and to the concept that education and diversity can promote respect, appreciation, understanding, and tolerance of other cultures.

International students, permanent residents, and naturalized citizens graduating from U.S. high schools must meet requirements and conditions set forth under the heading of “Beginning Freshmen” in the Admissions section of this catalog. This includes completion of college preparatory subjects, submission of satisfactory scores on the Scholastic Aptitude Test (SAT) or the American College Test (ACT), and satisfactory grade point average. Students transferring from U.S. colleges or universities must meet the same requirements set forth in the “Transfer Admission (p. 267)” section of this catalog.

Applicants graduating or transferring from schools outside the United States will be considered for admission upon compliance with the following requirements:

1. Transfer students may be required to submit an evaluation of international transcripts completed by a professional evaluation agency.
2. Submission of original or official secondary school and higher educational records including exam results, certificates, degrees, diplomas, and/or transcripts in the native language. The grade point average must be above average in academic work.
3. Submission of all educational documents translated into English; must be official translations.
4. Non-native English speakers must submit satisfactory scores on the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). International students whose native language is not English, but whose secondary instruction was exclusively in English, must submit Scholastic Aptitude Test (SAT
scores) or American College Test (ACT) scores. Native speakers of
English will be required to submit satisfactory scores on the SAT or
ACT.
5. Applicants who require an F-1 student visa must submit a SEVIS
Data Form and official documentation from a financial institution
showing a minimum of one year’s educational and living expenses.
The University assumes no financial responsibility for the student.
Without this financial evidence, the University cannot issue the
required I-20 Certificate of Eligibility for Nonimmigrant F-1 Student
Status. Continuation of enrollment into a new program of study, such
as a master’s degree, requires additional financial documentation.
6. If the student is in the United States or has a U.S. visa, they must
submit a copy of the visa, I-94, and passport information.

International students, permanent residents, and naturalized citizens,
regardless of TOEFL or SAT/ACT scores, may be required to take an
English placement exam upon arrival at Georgia Southern University.
Georgia Southern University maintains the philosophy that all students
who gain admission should be given the best chance possible to succeed.
Since students enter at many levels of ability and preparation, the
University seeks to give assistance to each student where needed.
Georgia Southern University offers a full range of English Language
Program courses designed specifically to assist students whose native
language is not English in developing English skills.

Students in F-1 visa status are responsible for making sure they
comply with all laws regulating their visa status. To assist students
with maintaining their visa status, a summary of the visa laws are
sent with the I-20 and are provided at the International Orientation
session after arrival on campus. In addition, handouts are available in
the Office of International Programs & Services. Students are
encouraged to contact the Office of International Programs & Services
for information and assistance at (912) 478-7435 or on the web at http://
GeorgiaSouthern.edu/international.

Two basic aspects of maintaining status involve employment and full-time
enrollment. F-1 visa law allows students to work on campus for a maximum
of 20 hours a week. During summer semesters (if not enrolled) and
official breaks, students are permitted to work on campus full-time. Off-
campus work is NOT permitted without specific authorization from Georgia
Southern’s Immigration Specialist or U.S. Citizenship and Immigration
Services. F-1 visa law requires students to carry a FULL course of study
during fall and spring semesters. Summer semesters are recognized as
vacation terms and enrollment is not required. For international students
in F-1 status, no more than one online class per semester may be counted
toward the full course of study requirement.

Full time enrollment is as follows:
12 credit hours per semester = Undergraduate

Georgia Southern will only admit students who are academically qualified.

The University System of Georgia requires all international students
to have adequate health insurance. An insurance plan is available
through the University and is administered by the Office of International
Programs & Services. The current cost is approximately $1,500 per year
for undergraduate students and is paid in two installments. The August
premium (payment) covers fall semester and the January premium covers
spring and summer semesters. Students who have health insurance that
provides coverage in the U.S. may submit an International Student/Scholar
Insurance Waiver Form, available through the Office of International
Programs & Services, to their insurance company. If the waiver is received
directly from the insurance company and indicates the student has
insurance comparable to the policy available through Georgia Southern,
the insurance premium will be removed from the student’s fees. Insurance
is also available for dependents. Additional information on the international
health insurance plan can be obtained from the Office of International
Programs & Services.

Post-Baccalaureate Admission

Applicants for admission with a bachelor’s degree from an accredited
institution but who are not seeking graduate-level credit are expected
to meet general admission requirements established for enrollment in
undergraduate programs.

In addition to the application for admission and application fee, applicants
are required to submit an official transcript to the Director of Admissions
from the institution in which they received their undergraduate degree. If
the applicant is seeking an additional degree, official transcripts from all
previous institutions will be required.

Individuals enrolled as post-baccalaureate students are eligible to take
undergraduate level courses only.

Proficiency Exams

Georgia Southern University also offers the student an opportunity to
obtain credit by local proficiency examination. The procedure is as follows:
1. Student eligibility must be determined by the Office of the Registrar.
2. After obtaining the proper form from the Office of the Registrar, the
   student petitions the department head of the subject area for an
   examination covering a particular course listed in the catalog.
3. The student and the examiner will decide the date and time of the
   examination.
4. If the petition is approved, the student must pay a test fee of $15 per
test to the Cashier’s Office in Deal Hall. A receipt will be issued which
will allow the student to take the test. The receipt must be attached to
the Proficiency Exam Form.
5. Credit hours obtained by proficiency examination will be considered
resident credit.
6. The proficiency exam score must be at least a “C” to award credit
by exam. The Office of the Registrar will enter a grade of “K” on the
student’s academic record showing credit hours were earned by
proficiency examination, upon receiving the documents from the department.

Readmission Policy

The following students must fill out an undergraduate former student
application (FSA):
1. Students who do not attend the University for one calendar year.
2. Students whose most recent academic standing was exclusion.
3. Students who have earned a baccalaureate degree from Georgia
   Southern University who wish to enroll in additional undergraduate
   courses.
4. Students who wish to return as a transient student to Georgia
   Southern University.

Students can follow this link, https://www.ssta.georgiasouthern.edu/Axiom/
Login.aspx?SourceID=25, to complete the undergraduate former student
application (FSA).

Note: Students who are not required to file an application for readmission
who have attended another institution while away from Georgia Southern
University should contact that school and have an official transcript sent to
Georgia Southern University Office of the Registrar.

The transcript must indicate that the student is in good academic standing
at the last school attended. Failure to submit this transcript by the midpoint
of the first semester after returning to Georgia Southern University could result in the administrative withdrawal of the student.

Required High School Curriculum
Requirements for Summer 2018, Fall 2018, Spring 2019
The following high school courses are required of students who plan to enroll in regular college programs leading to the baccalaureate degree in institutions of the University System of Georgia:

1. Mathematics: Four units of mathematics, including Algebra I/Coordinate Algebra, Geometry/Analytic Geometry, Algebra II/Advanced Algebra, and a fourth unit of advanced math, or equivalent courses. Georgia Southern does not accept Mathematics Support or Mathematics of Finance.
2. English: Four units of literature (American, English, World) integrated with grammar, usage, and advanced composition skills.
3. Science: Four units of science where at least two courses include a laboratory component. Georgia public high school students must have at least one unit of biology, one unit of physical science or physics, one unit of chemistry, earth systems, environmental science, or an advanced placement science course, and a fourth science.
4. Social Science: Three units of social science, with at least one course focusing on U.S. studies and one course focusing on world studies.
5. Foreign Language: Two units in the same foreign language emphasizing speaking, listening, reading, and writing. Two units of American Sign Language or certain Computer Sciences (must have a coding and programming emphasis) may be used to satisfy this requirement.

The Board of Regents provides a listing of specific qualifying college preparatory and academic courses in the Student Affairs Handbook, Section 3.2.3. It is available online in the USG Academic Affairs Handbook. The Office of Student Affairs for the University System of Georgia maintains a complete list of courses that can be used to satisfy the RHSC requirements in the Staying on Course document that can also be found online in the USG Academic Affairs Handbook (https://www.usg.edu/assets/student_affairs/documents/Staying_on_Course.pdf).

Students who have completed the Required High School Curriculum and who meet all other admission requirements will be considered for admission to Georgia Southern University as regularly admitted students.

Special Admission for Adult and Non-Traditional Students

Adult and non-traditional students are those who have been out of high school for at least five years or whose high school class graduated at least five years ago.

Applicants applying for admission as an adult or non-traditional student must meet the following requirements:

Adult & Non-Traditional Freshmen
1. Have been out of high school at least five years or high school class graduated at least five years ago.
2. Hold a high school diploma from an accredited or approved high school as specified in the Board of Regents policy section 402.0101 or have satisfactorily completed the GED, HiSET, or TASC.
3. Have earned between zero (0) and 29 transferable semester credit hours.
4. Have a 2.0 or higher on all attempted college work.

Upon admission, students may be required to take the ACCUPLACER placement test prior to enrollment.

Adult & Non-Traditional Transfers
1. Have been out of high school at least five years or high school class graduated at least five years ago.
2. Hold a high school diploma from an accredited or approved high school as specified in the Board of Regents policy section 402.0101 or have satisfactorily completed the GED, HiSET, or TASC.
3. Have earned 30+ transferable semester credit hours.
4. Have a 2.0 or higher on all attempted college work.

Additional information can be found at admissions.georgiasouthern.edu/non-traditional-students/.

Special Admission for Students Age 62 and Older

Georgia citizens who are 62 years of age or older have the option, as granted by Amendment 23 of the Georgia Constitution, of enrolling in the University without the payment of tuition and fees subject to the following conditions:

- Must be a legal resident of Georgia;
- Must be 62 years of age or older and present proof of age before registration;
- Must enroll as a regular student to audit or take courses offered for resident credit;
- Must pay for books, supplies, laboratory and/or miscellaneous fees.

An eligible student may petition for the Senior Citizen Fee Waiver by visiting the website below (click on Senior Citizen Waiver), printing the form, and providing the completed petition and documentation.

http://em.georgiasouthern.edu/registrar/students/tuitionclassification/fee waivers/

Individuals who do not qualify as mature/non-traditional students (see section on “Special Admission for Adult & Non-Traditional Students”) must also satisfy the following:

- Must meet all Georgia Southern University and University System of Georgia admission requirements including high school graduation, SAT or ACT scores, and participation in Learning Support if required;
- If the applicant has previously attended another college or university, he or she must satisfy transfer admission requirements;
- If a course of study is pursued to degree, all institutional, system, and state-legislated degree requirements must be met (see Graduation Requirements (p. 252) in the Academic Resources Section).

Transfer Admission

Transfer admission policies are subject to change. Interested applicants should contact the Office of Admissions. Additional information can be found at GeorgiaSouthern.edu/transfer (http://admissions.georgiasouthern.edu/requirements/transfer).

Regular Transfer Admission

To be considered for regular transfer admission, students should:

1. Have earned a minimum 30 transferable semester hours (45 quarter hours) from regionally accredited post-secondary institution(s)
2. Hold a cumulative college GPA 2.0+ (On all transferable work attempted)

3. Be eligible to return to their current school

**Conditional Transfer Admissions**

To be considered for conditional transfer admission, students should:

1. Have earned at least 15 transferable semester hours (22.5 quarter hours) from regionally accredited post-secondary institution(s)
2. Hold a cumulative college GPA 2.0+ (On all transferable work attempted)
3. Prove with a course schedule that they are on track to have at least 30 transferable semester hours (45 quarter hours) completed from regionally accredited post-secondary institution(s) by the time they enter Georgia Southern.
4. Be eligible to return to their current school

**Freshmen Transfer Admissions**

To be eligible for freshman transfer admission, students should:

1. Have earned fewer than 30 transferable semester hours (45 quarter hours) from regionally accredited post-secondary institution(s)
2. Meet regular freshmen admission criteria (SAT/ACT*, High School GPA and Required High School Curriculum)
3. Hold a cumulative college GPA 2.0+ (On all transferable work attempted)
4. Be eligible to return to their current school

*SAT/ACT scores taken after a student has been enrolled in college level credit in a college/university (after high school graduation) cannot be used for admission consideration. Old SAT scores will be converted to Redesigned SAT scores for consideration. SAT scores are only valid for five years after the test date.

Students are required to send official transcripts from all post-secondary institutions where they have attempted work. All transcripts must be received before an admissions file will be reviewed.

Transfer and spring/fall transient students who have taken remedial, learning support, and/or required high school curriculum make-up courses in college must:

1. Exit those courses successfully
2. Earn credit for Area A equivalent courses that correspond to the mandated remedial/learning support courses with a "C" or higher
3. Accumulate 30 semester hours or 45 quarter hours beyond those courses
4. Remedial, learning support, and required high school curriculum make-up courses do not count towards transfer hours or the transfer GPA. If you have these types of courses, you are no longer eligible for Freshman Transfer Acceptance.

**Transfer Credit/Military Credit**

Accepted applicants who have attended any college or university may be granted advanced standing according to the following policies:

1. Transfer credit may be accepted from degree-granting institutions that are fully accredited at the collegiate level by their appropriate regional accrediting agency. The regional accrediting agencies are: Middle States Association of Colleges and Schools, North Central Association of Colleges and Schools, New England Association of Colleges and Schools, Northwest Association of Colleges and Schools, Southern Association of Colleges and Schools, and Western Association of Colleges and Schools. Provisions may be considered when an institution appeals the policy. However, should the quality of the educational program of the institution attended appear to be mediocre or unsatisfactory, the Director of Admissions has the prerogative not to accept all or any part of previously earned credits.

2. The amount of academic credit accepted in transfer may not exceed the normal amount of credit that could have been earned at Georgia Southern University during that time.

3. All degree requirements for a transferable academic associate’s degree must be completed at a transferable regionally-accredited institution. Georgia Southern will not accept credit in transfer from any non-accredited college.

4. Credit will be allowed for completed college courses which are parallel in nature. Below college level (remedial or learning support) courses cannot be accepted in transfer.

5. The Academic Unit responsible for the course will make judgments concerning satisfying requirements for areas A1-E of the Core Curriculum.

6. Transfer students who have a transferable academic associate’s degree are granted core curriculum credit as follows:
   a. A University System transfer will get credit for completion of core areas A1-F, health and kinesiology, provided they have not changed their intended major from the transferring school. If they change majors, they will have to complete area F at Georgia Southern University (Academic Affairs Handbook, University System of Georgia, 2.04.04).
   b. Non-system transfers who have completed a program with 60 credit hours or more will be given credit for core areas A1-E, health and kinesiology (46 credit hours). Area F courses will be evaluated by the major advisor for use in the student’s program of study.

7. Credits accepted in transfer by Georgia Southern University may not necessarily apply as credit hours toward graduation. Final determination, with exception of areas A1-E of the core curriculum, will be made by the appropriate academic advisor and are subject to the regulations of the school and department granting the degree and major.

8. Transfers who have earned 30 or more credit hours are exempt from First-Year Seminar (FYE 1220). Transfer students with fewer than 30 credit hours may seek a waiver of the First-Year Seminar (FYE 1220) requirement through their academic advisors if they meet either of the following criteria:
   a. they were full-time college students for two semesters at a previous institution; or
   b. they earned credit hours for a two or three hour FYE course at a previous institution that has similar learning outcomes to First-Year Seminar (FYE 1220).

9. A maximum of 30 credit hours of correspondence (including Advanced Placement, AICE CLEP, DANTES, Military Credit, Extension, etc.) or a maximum of 24 credit hours of International Baccalaureate credits may be accepted for transfer within the following guidelines:
   a. A minimum grade of "C" is required for courses completed by extension or correspondence.
   b. A maximum of 14 semester hours of credit for military service experience may be awarded upon receipt of AARTS or DD 214 or DD295 or JST or any other official documentation in the Registrar’s Office.
      i. Fourteen credit hours including up to four credit hours for physical education activity courses may be awarded for correspondence courses as recommended by the American Council on Education (A.C.E.).
      ii. Two credit hours will be allowed for Physical Conditioning and Marksmanship for active service less than one year and four credit hours for physical education activity courses may be allowed for one year or more active service.
c. Military experience credit should be appropriate to the degree programs offered at Georgia Southern University.
d. Any credit hour awarded for participation in the DANTES program will be awarded and administered in the same manner as CLEP.

Transient Admission

Subject to the availability of faculty, space, and facilities, a regular undergraduate student in good standing at another accredited institution may be permitted to enroll one semester at Georgia Southern University in order to complete work to be transferred back to the parent institution. The transient applicant should:

1. Submit the undergraduate application and application fee.
2. Present a statement from the Dean or Registrar of the home institution to the effect that he or she is in good academic standing and eligible to return to that institution.

Graduate Studies

The Jack N. Averitt College of Graduate Studies is the only academic unit at Georgia Southern University whose sole concern and primary advocacy is graduate education. The Jack N. Averitt College of Graduate Studies provides institutional oversight for more than 100 graduate curricula programs established across eight academic colleges, with nearly 3200 registered graduate students each semester. These programs span the breadth of graduate education from practice-oriented master’s programs that prepare students for leadership roles in a wide variety of professional settings to research-focused doctoral programs that develop the next generation of scholars. The Jack N. Averitt College of Graduate Studies works closely with the Faculty Senate Graduate Committee, the deans, and graduate faculties of the eight academic colleges and external accrediting organizations to ensure excellence in all aspects of the graduate experience. The Jack N. Averitt College of Graduate Studies also helps the University maintain a culture of collegiality and ethical behavior through its dedication to fairness and integrity. In addition to the Colleges, several other departments or agencies within Georgia Southern University enhance the academic life of the University.

Message from the Director of Graduate Studies

The mission of the Jack N. Averitt College of Graduate Studies is to develop, promote and sustain graduate programs of the highest quality at Georgia Southern University. The College of Graduate Studies seeks to support graduate students and graduate programs at the highest level, to provide a foundation for university graduate program growth and development, and to advance excellence in research and scholarly activities associated with graduate education.

The namesake of the College, Dr. Jack N. Averitt, was instrumental in inaugurating graduate education in South Georgia and served the Institution as a visionary faculty member and Dean from 1945 to 1979. Dr. Averitt organized Georgia Southern University’s first graduate programs with off-campus centers and served as the first Graduate Dean from 1969 until his retirement. A Paul Harris Fellow and Rotary International Foundation Trustee, Dr. Averitt further broadened the University’s horizons as Director of the campus Rotary Language Institute for international students. In 1998, the Graduate College was named the Jack N. Averitt College of Graduate Studies in honor of Dr. Averitt’s many contributions to the Institution and to the development and support of graduate studies.

To this day, the Jack N. Averitt College of Graduate Studies proudly subscribes to the Rotary’s core value of “Service Above Self,” as the College continues to diligently serve the many faculty, staff, and students who encompass the graduate education enterprise at Georgia Southern, supporting more than 100 degree majors and programs offered to more than 3200 graduate students. Working independently and collaboratively, Georgia Southern graduate faculty members offer committed graduate student unlimited opportunities for development. The University’s facilities provide outstanding opportunities for distinguished careers in the science and mathematics, public health, health and human sciences, nursing, engineering and information technology, the arts and social sciences, business, and education.

This Graduate Catalog provides an overview of the many academic colleges and graduate programs across campuses, as well as course descriptions. For additional information, we invite you to visit our web page at http://cogs.georgiasouthern.edu/, and encourage you to become well acquainted with your graduate program, the graduate program directors, and your mentors and advisors within your program.

Ashley Walker Colquitt, Ph.D.
Director of Graduate Studies

Graduate Policies and Procedures

The general academic regulations of the university that apply to graduate degrees and certificate programs are developed by the Faculty Senate Graduate Committee and administered by the College of Graduate Studies (COGS). Under this general regulatory structure, each program is locally administered by an academic unit within one of the eight colleges of the university. Although an academic unit may develop local regulations for a specific program under its control, the local regulations must be consistent with the general regulations and are, therefore, subject to review and approval by the Faculty Senate Graduate Committee. It is the responsibility of the Graduate Faculty and each graduate student to become thoroughly familiar with all regulations that govern the graduate program in which they participate.

- Registration Policies (p. 281)
- Reinstatement Appeal (p. 281)
- Theses and Dissertations (p. 282)

Academic Common Market - Graduate

Students from a number of states may be eligible for an out-of-state fee waiver based upon the Academic Common Market agreement that Georgia shares with these participating states (http://www.usg.edu/academics/academic_common_market). If a student majors in disciplines at Georgia Southern University that are not available in their home states, they may be eligible for the waiver. Sport Management is currently approved for graduate students from selected states.

Academic Intervention Policy

A graduate student who is on probation with an academic program, or has just been reinstated, will be placed on academic intervention until the student is no longer on probation. While on academic intervention, the student must complete an Academic Improvement Plan (AIP) under guidance of an assigned university official. The AIP is developed by the student and university official and may include, but is not limited to, participation in workshops, assessments, and progress meetings. The student’s progress on the AIP will guide the academic program when making decisions on academic exclusion or appeal for reinstatement.

Questions regarding requirements for the AIP should be directed to the Academic Success Center (http://academics.georgiasouthern.edu/success).

Academic Standing Policy

Academic Performance

Every graduate student must meet all the academic performance requirements as set forth by the program and the College of Graduate Studies to be in good standing.

Graduate Required Academic Standing

Graduate students must maintain an institutional minimum cumulative graduate GPA of 3.0 or higher, with some programs having higher requirements, in the graduate program on all graduate work and in the Program of Study to graduate. Students should check with their program and/or program director to see if the program has different policies related to academic standing.

Graduate students are ineligible to graduate with grades of "I" or "IP" on their graduate academic record.

Choice of Graduate Catalog Requirements

A student enrolled in a graduate degree or certificate program may choose to meet the requirements for that program as defined in any annual edition of the graduate catalog in effect for the semester the student was admitted to and enrolled in the program. The program requirements so specified will be used to evaluate the Program of Study and in the final degree or certificate program audit.

Academic Requirements Adjustment - Should program academic requirements change after a student is admitted to and enrolled in the program, the student may opt to change to the new program requirements. However, the student may not mix old and new requirements.

Earning a Duplicate Degree

A student with a master’s, education specialist, or doctorate earned from GSU or another institution may earn the same degree in the same field or in a different field at Georgia Southern University. The rules governing transfer credit for the first degree will apply.

Right of Appeal

You have the right to appeal any academic policy or requirement if either of the following conditions is present:

- extenuating circumstances make it impossible for you to comply with the policy or requirement, or
• an undue hardship would result from a strict application of interpretation of the policy or requirement.

Please note, however, that extenuating circumstances must be beyond your control and that undue hardship must be a condition far more serious than simple inconvenience. Documentation will be required and the timeliness of the appeal will be taken into consideration.

To appeal an academic policy or regulation (except a change of grade appeal) the student must complete and submit the online web based appeal form at Graduate Student Academic Appeal (http://cogs.georgiasouthern.edu/student/academicappeal). Information regarding required documents to support an appeal for reinstatement is found at that website. A student may attach documents files to the appeal form. Appellants may track the status of their appeal through the online website.

**Academic Appeal Procedures**

The responsibility of the College of Graduate Studies is to review an academic appeal for procedural fairness and to maintain and protect the rights of the graduate students, graduate faculty, and institutional policy. Within the limits set by faculty and administrative policy, members of the graduate faculty and graduate administrators act in good faith within the area of their academic expertise, provided their decisions are consistent with general policies established by the College of Graduate Studies and the Graduate Committee or its representative bodies. Graduate programs may utilize their own program, department or college-level process to consider an appeal and other measures required to assess the circumstances of a student's request for an appeal. In any event, the appeal process must not conflict with the College of Graduate Studies Policy on Academic Appeals.

Subject to these limitations, the College of Graduate Studies will assume that actions taken by the graduate faculty of the program or department concerning course requirements, graduation requirements, and similar matters are final and binding with all parties concerned. Only if it is found or determined by the College of Graduate Studies that the department, program, or academic college did not follow documented procedures, or that the student's appeal did not have a fair review, or that there is evidence on the part of the faculty which may be perceived to have materially affected the academic decision, will a decision imposed by the academic unit be subject to reversal by the College of Graduate Studies.

**Student Appeal Steps**

**Step 1**

Graduate students wishing to appeal must complete and submit their appeal online through the Graduate Student Academic Appeal (http://cogs.georgiasouthern.edu/student/academicappeal) portal. The appeal will be directed to the student's graduate program director who must review and take action on the appeal by indicating his/her appeal decision at the appeal portal. In some instances, the appeal may then be forwarded to the Department Chair and then the Dean of the relevant College for review. Normally, the Program Director's decision will be reviewed by the Director of Graduate Studies or his/her delegate acting on behalf of the Director. A favorable appeal decision by the Program Director will indicate approval of the appeal unless the decision is determined to be counter to COGS policy. If determined to be counter to COGS policy, the Director of Graduate Studies will consult with the Program Director regarding the best action to be taken on the appeal. The student would then be informed of the appeal decision by the Director of Graduate Studies. The student may review the Program Director's appeal decision at the web Appeal Portal.

**Step 2**

If the Program Director's decision is not acceptable to the student, the student may choose to appeal the Program Director's decision to the Department Chairperson after notification of the Program Director's appeal decision. The student's appeal to the Department Chair's decision must contain:

1. an explanation specifying the points on which the student disagrees with the director's decision; and
2. all evidence supporting the student's perspective.

The Department Chair's decision will be recorded on the web Appeal Portal.

**Step 3**

If the student does not accept the appeal decision by the Department Chair, the student may elect to appeal to the next appeal level. To do so, the student must direct the appeal to the Academic College Dean. The student's appeal to the Academic College Dean must contain:

1. an explanation specifying the points on which the student disagrees with the department chair's decision; and
2. all evidence supporting the student's perspective.

The Academic College Dean will review the appeal submit his/her decision. The Academic College Dean may review the decisions of the Department Chair and the Program Director and/or discuss the appeal with the Department Chair and/or Program Director prior to rendering the decision.

**Step 4**

If the student does not accept the decision of the Academic College Dean, the student may appeal the decision to the Director of Graduate Studies. The student's appeal to the Director of Graduate Studies must contain:

1. an explanation specifying the points on which the student disagrees with the Academic Dean's decision; and
2. all evidence supporting the student's perspective.

The Director of Graduate Studies may charge a subcommittee of the Graduate Committee (hereafter referred to as the Appeals Subcommittee) to review the student's appeal. The Appeals Subcommittee will consist of a five (5) member ad hoc panel drawn from members of the Graduate Committee. The Graduate Student Organization member of the Graduate Committee shall be an ex-officio member of the Appeals Subcommittee. In accepting to serve as a member of the Appeals Subcommittee, each member of the subcommittee shall declare that no actual or perceived conflict of interest exists between the member and any party involved in the appeal.

The Appeals Subcommittee will convene within fifteen (15) working days of the request of the Director of Graduate Studies. If the appeal is submitted to the Director of Graduate Studies during the summer, the subcommittee's review may, at the discretion of the Director of Graduate Studies, be delayed until after the beginning of the academic year. The subcommittee will review all available documentation, written responses to prior decisions, and convene interviews with individuals, necessary to determine whether the action(s) being appealed by the student were arbitrary, capricious, or contrary to University policy. A recommendation will be made within fifteen (15) working days after the Appeals Subcommittee's review of the materials or following the conclusion of the Appeals Subcommittee meeting(s), whichever is later. This recommendation shall be transmitted to the Director of Graduate Studies. The Director of Graduate Studies shall render a decision following receipt of the Appeals Subcommittee recommendation. The decision of the Director of Graduate Studies will be recorded in the web Appeals database for viewing by the student. The Director of Graduate Studies may elect to forward notice of the decision to others who have been involved in the appeal process to this stage.
Step 5
If the student does not accept the decision of the Director of Graduate Studies, the student may make a final appeal to the Provost and Vice President for Academic Affairs (hereinafter Provost). The student's appeal to the Provost must contain:

1. an explanation specifying the points on which the student disagrees with the Appeals Subcommittee's decision (step 4 above); and
2. all evidence supporting student's perspective.

The Provost shall review all materials and documentation of the prior appeals and shall render a decision.

All appeal decisions and recommended actions by the Provost are considered actionable and final.

Border County Fee Waiver
Graduate students who are legal residents of an out-of-state county bordering in Georgia county in which the reporting institution or a Board-approved external center of the University System is located may apply for a waiver of non-resident (out-of-state) tuition assessment. Georgia Southern University graduate students who live in an out-of-state county that borders Chatham County in Georgia, (Jasper and Beaufort, SC) and attend classes at the Armstrong Campus in Savannah are eligible for this waiver. Also, Georgia Southern University graduate students who attend the Augusta Center in Augusta, Georgia and are majoring in the Ed.D. Educational Administration program who live in an out-of-state county that borders Richmond County in Georgia, (Aiken and Edgefield, SC) are eligible for this waiver.

Continuous Enrollment Requirements
The College of Graduate Studies Continuous Enrollment policy states that: "All thesis or dissertation students who have registered at least once for courses titled thesis or dissertation must be continuously enrolled every semester thereafter, including the semester of graduation. Summer registration is not required unless summer is the graduation semester." Check with your major advisor to see if your college has a different, or additional, continuous enrollment requirement(s) that apply.

- A grade of "IP" will be recorded for all dissertation credit hour work in progress, and will automatically be recorded each semester the student is enrolled.
- The grade of "S" or "U" must be recorded for all dissertation credit hour when completed.
- The advisor and/or major professor will report a final dissertation grade of "S" or "U". Any reported grade other than "S" or "U" will be changed to an "S" or "U" grade according to the following: REPORTED GRADE OF "A", "B", "C" = "S", "D", "F" = "U"
- Upon completion of the dissertation requirements, final grades for preceding semester(s) will be changed to the appropriate grade.

Should a student not register each semester as required by the continuous enrollment policy, the student will be required to register in thesis or dissertation credit and pay tuition and fees for the missed registration semesters at the beginning of the semester the student resumes his/her study providing the student is eligible to return and resume registration.

A student who has been approved for a medical or a non-medical leave of absence is not required to be registered while under the approved leave period.

Correspondence Study
Credit taken by correspondence study or for continuing education units (CEUs) or as experiential learning or extension credit are not permitted to be counted toward degree program requirements.

Degree Requirements
To be eligible to be awarded the degree, the student must successfully complete all degree requirements including the minimum number of credit hours required for the degree, successfully pass the comprehensive or terminal examination (if required), successfully defend the thesis (if required), have an approved program study on file in the College of Graduate Studies, must have applied for graduation by the graduation application deadline, and have satisfied all non-academic requirements cleared by the Office of the Registrar.

To be awarded a degree, the student
1. must not be on academic probation;
2. must defer to the individual program for cumulative graduate grade point average (GPA) requirements;
3. must have an approved program of study or DegreeWorks audit on file in the College of Graduate Studies;
4. must meet all the requirements of the College of Graduate Studies and the student's academic program area;
5. have no grades of "I" or "IP" on the graduate transcript; and
6. if enrolled in a program that requires a final comprehensive examination, exit assessment, thesis, and/or residency, satisfy requirements stipulated by the program.

Degree Time Limit
Master's and Education Specialist Programs
The time limit to complete a master's and/or Education Specialist degree is seven years. Courses counting toward the degree may not have been taken more than seven (7) years prior to the degree completion date.

Doctoral Programs
The time limit to complete a doctoral degree varies by program. Doctoral students should consult with their respective department/college regarding the time limit for their individual program.

Enrollment in Dual Programs
A graduate student at Georgia Southern University may be enrolled in more than one Master's or more than one Education Specialist program at the same time providing they have met all admission requirements for each program and have been recommended for admission in each program. All requirements for each program must be met. Students should consult with each program area to determine program requirements.

Exclusion
A graduate student will be denied continued enrollment at Georgia Southern University for any of the following reasons:

- failure to meet the conditions of academic probation;
- failure to meet the conditions of Provisional Admission;
- failure to meet specified academic requirements as set by the department offering the program;
• failure to comply with the Academic Dishonesty section of the Student Conduct Code; and/or
• non-degree admission to the same major from which the student was excluded is not permitted.

Full-Time/Half-Time Enrollment

Full-Time enrollment Fall/Spring Semester is nine (9) credit hours for all programs except:

Simultaneous Enrollment in More Than One Graduate Program

A graduate student at Georgia Southern University may be enrolled in more than one Master’s or more than one Education Specialist program at the same time providing they have met all admission requirements for each program and have been recommended for admission in each program. All requirements for each program must be met. A student is permitted to count up to 9 credit hours from one previously earned master’s degree or education specialist degree, toward the requirements of the second Master’s or Education Specialist providing the courses are approved and recommended by the student’s advisor for the second program.

Grade Requirements

Graded Work

For graduate credit hour, the grade in a course must be a minimum grade of “C.” To be awarded a graduate degree, the student:

1. must not be on probation;
2. must have a cumulative GPA of 3.0 or higher on all graduate course work attempted and on course work on the program of study;
3. must meet all the requirements of the College of Graduate Studies, the student’s academic program area, and the student’s supervisory committee; and
4. must be enrolled during the semester in which the degree requirements are completed if completing a thesis.

A student may not repeat any course for credit hour for which he/she has already received a minimum grade of “C” unless specifically permitted by the degree program department policy.

Satisfactory/Unsatisfactory Graded Work

Certain courses including thesis and internship credit hour may be graded on a satisfactory/unsatisfactory (S/U) basis. A grade of “S” indicates that credit hour has been given for completion of the credit hour and the credit hour may count toward degree requirements. A grade of “U” indicates unsatisfactory progress in the course and credit hour may not be counted toward degree requirements. Satisfactory/Unsatisfactory graded work is not computed in the grade point average.

In-Progress (IP) Grade

“IP” indicates that credit has not been given in courses that require an “IP” continuation of work beyond the semester for which the student signed up for the course. The use of these symbols is approved for dissertation and thesis credit and project courses. With the exception of Learning Support courses, these symbols cannot be used for other courses. These symbols cannot be substituted for an “I”.

Incomplete Policy

An incomplete grade (“I”) indicates that the student was doing satisfactory work but was unable to meet the full requirements of the course due to non-academic reasons. It is the student’s responsibility to contact the instructor to complete the remaining requirements of the course. The instructor is responsible for keeping a record of all “I” grades assigned and the justification as to why the professor assigned the student the “I” grade. An “I” should be removed during the following semester, but the instructor may allow the student up to one calendar year to remove the incomplete. The student must complete the requirements of the instructor who assigned the incomplete and should not re-register for the course. If the “I” is not satisfactorily removed by the end of the third semester (one calendar year), it will be changed to an “F” by the Office of the Registrar.

Graduate Academic Advisement

Philosophy

Georgia Southern University accepts the philosophy that faculty members should be involved in graduate student advisement whenever possible since they provide a necessary academic orientation to the process. It
is important that the students have as much direct contact with faculty as possible, and advisement is a particularly individualized avenue of communication. Graduate students are assigned a graduate faculty advisor in their discipline area at the time of admission into a graduate program.

**Definition of the Role of Graduate Advisors**

Graduate advisors serve as resource persons, providing information about University graduate programs and institutional requirements. Advisors also serve as a link between students and the University community and refer them to areas of assistance. Advisors also mentor students in their development of self-direction and career pathways.

**Guidance for Graduate Students**

Upon acceptance in a graduate program, a graduate student will come under the guidance of an advisor who is assigned by the program at the time of admission. A thesis, supervisory, or dissertation committee will be established by the student in consultation with the advisor in those programs in which a thesis or dissertation is required. Proper guidance of graduate students is of primary importance and a major responsibility of the graduate advisors, graduate program directors, coordinators, and the graduate faculty.

**Advisor**

When the student is notified of admission to the College of Graduate Studies, a graduate faculty member in the student’s major field will be assigned as the advisor. A graduate student may request a change in advisor by contacting the Graduate Program Director of the program in writing. If the request is granted, the student will be notified in writing (email).

Graduate student advisors will assist in:

- helping the student plan a program of study in keeping with the student’s field and goals;
- approving course selection;
- reviewing and endorsing the Program of Study.

Students who are initially uncertain about their graduate program of study and graduate transient students may be advised by the College of Graduate Studies. International graduate students will be advised by a faculty advisor in their academic program. Graduate students with physical or developmental disabilities are encouraged to avail themselves of the services of the Student Disability Resource Center (SDRC).

**Graduate Courses**

All courses carrying graduate credit at Georgia Southern University numbered 5000G and above are open to graduate students. Courses 6000 through 9999 are open to graduate students ONLY. Courses numbered 9000-9999 and above are open to doctoral students ONLY. Graduate courses numbered 5000G-5999G may not be counted toward doctoral degree program requirements.

At least 50% of the courses applicable to earn a degree must be courses in which enrollment is restricted to graduate students.

A maximum of 6 credits earned in “Independent Study” may apply toward a graduate degree, with the approval of the advisor, provided the student is classified under Regular admission when the credits were taken.

**Dual-Listed Courses**

A graduate student enrolled in a 5000 level course with a “G” suffix must complete all work required of students earning undergraduate credit plus substantial work at the graduate level to earn graduate credit for the course. Graduate students must enroll in the course section with the “G” suffix. Graduate students enrolling in the course section without the “G” suffix will have enrolled in the undergraduate section and will not receive graduate credit for the course.

**Repeating a Course**

Graduate courses in which a grade of “D” or “F” was earned will not count toward degree requirements and must be repeated if required in the degree program. A graduate student may not repeat any course for credit for which he/she has already received a minimum grade of “C” unless specifically permitted by the degree program policy. All Georgia Southern University graduate grades and credits attempted count toward the institutional cumulative GPA. This includes repeated courses.

**Graduate Final Comprehensive Examination**

A final oral examination or a comprehensive written examination or both may be required for a degree. The examination will be administered after the student has completed the program of study and other requirements or in the semester in which the candidate intends to complete them. Examinations may take the form of a defense of the thesis, an interpretation of other scholarly work, a portfolio of the student’s work, or a test of the student’s understanding of the field. The academic unit determines the format of the examination and, along with the supervisory committee for programs requiring a thesis, is responsible for its administration. The Department Chair, Graduate Program Director, or major professor is responsible for reporting the results of the examination and/or thesis defense to the College of Graduate Studies on the Report on Comprehensive Examination/Thesis Defense Form. Normally, final oral examinations will be given on the Statesboro campus. Exceptions can be made if requested by the student, recommended by the supervisory committee, and approved by the Department Chair or Graduate Program Director, and the College of Graduate Studies. In the case of an examination in which the participants are not all in the same location, any technology used to conduct the examination must support simultaneous oral interaction between the student and all members of the examining committee. Copies of the questions for all final written examinations must be filed with the academic unit. In the case of a candidate writing a thesis, the examination cannot be scheduled until the thesis committee certifies that a satisfactory copy of the thesis has been presented. Final examinations must be scheduled by the academic calendar deadlines for examinations and/or thesis defenses and final submissions for the semester during which graduation is expected.

**Inactive Status**

A student who does not enroll for one semester is considered inactive and must have their enrollment eligibility updated through the Graduate Admissions Office to be eligible to re-enroll in the same program in subsequent semesters. A student who does not matriculate for three or more consecutive semesters must re-apply to (and be accepted into) a graduate program before being considered for re-entry by the College of Graduate Studies. In order to be allowed to resume graduate studies, the student must meet all requirements for entry in force at the time of the new application. Inactive students who seek to regain active status will not, however, be required to recreate materials submitted with their original applications and held in their files by the College of Graduate Studies. If allowed to regain active status, the formerly inactive student will be subject to all requirements in force in his or her graduate program.
and in the College of Graduate Studies at the time the student returns to active status. Students re-accepted into the program and who are at the dissertation writing phase of their program will be required to pay for any and all missed semesters under the continuous enrollment policy.

**Independent Study**

A maximum of six (6) credits earned in “Independent Study” may apply toward a graduate degree, providing the student was classified under “Regular” admission at the time the Independent Study courses were taken and providing the student’s advisor recommends the courses as part of the program of study.

**Internal Credit Sharing Between Graduate Degrees**

A graduate student is permitted to count up to 9 credit hours from one previously earned Master's degree or Education Specialist degree, toward the requirements of the second Master's or Education Specialist degree providing the courses are approved and recommended by the student's advisor for the second program.

**Non-course based credit might not be transferable based on individual program requirements.**

**Non-Medical Leave of Absence**

A graduate student may request a non-medical Leave of Absence from the degree program. To request a Leave of Absence, one must complete the General Policy Appeal Form (http://cogs.georgiasouthern.edu/students/forms/graduate-student-academic-appeal). A Leave of Absence may be granted for up to one year. Registration is not required during the approved Leave of Absence period and the time to Degree completion will be suspended during the approved Leave of Absence period.

**Off-Campus Research**

Thesis/Dissertation committees must take adequate steps to ensure appropriate guidance of off-campus research. As a minimal requirement, the student must submit to the committee a well-formulated research plan, including objectives and methodology, and the committee must review and approve the plan before the student departs for the research site and indicate approval on the program of study. In addition, the committee may require the following.

1. The major professor and/or a competent local authority who can reliably guide the student provide continuing on-site supervision.
2. The student provides the dissertation committee with frequent, periodic estimates of performance and progress. The committee may also require that these be authenticated by a competent local authority.
3. The major professor carries out local inspections of the student’s activities.

Regardless of the location at which the research is conducted, the thesis/dissertation defense will normally be given on the Statesboro campus. Exceptions can be made if requested by the student, recommended by the dissertation committee, and approved by the Graduate Program Director, School or Department Chair, and the College of Graduate Studies. In the case of a defense or examination in which the participants are not all in the same location, any technology used to conduct the examination must support simultaneous oral interaction between the student and all members of the committee. When unusual circumstances arise in the guidance of off-campus students, dissertation committees should consult with the College of Graduate Studies.

Research conducted outside an academic program cannot be accepted for credit as part of a program of study.

**Prior Learning Assessment**

**Prior Learning Assessment Policy**

Georgia Southern University graduate programs may offer students an opportunity to obtain select graduate credit by Prior Learning Assessment (PLA). For programs opting-in, PLA is the means by which university credit can be awarded for learning gains resulting from experiences outside of the traditional university milieu. A maximum of 6 credit hours may be earned via PLA, with the total number of PLA credit hours earned and credit hours transferred from another institution not to exceed 6 credit hours.

A student’s eligibility for PLA will be determined by the department chair in collaboration with the subject area program faculty and approved by the College of Graduate Studies. The department will determine the number of semester hours of graduate credit for which a student may request eligibility. A student may be deemed eligible for PLA before or within the first semester of admission to one of the University’s graduate programs. Note: Eligibility for PLA does not guarantee program admission. Program admission and eligibility for PLA are separate and distinct decisions.

Graduate credit earned by PLA will be considered resident credit. A grade of “B” or better on any and all assessments is required to receive graduate credit. Graduate credit earned by PLA will be noted as “K” on a student’s Georgia Southern University transcript. Program faculty will determine the appropriateness of accepting PLA for their individual degree programs. Program faculty may also specify courses to be excluded or included for possible PLA credit.

**Prior Learning Assessment Procedures**

The procedure for seeking PLA credit is as follows:

1. Student petitions the department chair of the subject area before or within the first semester of program admission for an opportunity to demonstrate competence in the learning outcomes associated with a particular course or set of courses listed in the University’s Graduate Catalog.
2. The department chair or his/her designee will provide guidance to the student regarding how competence must be demonstrated, the acceptable timeframe for demonstrating competence. The process of review (previously determined by department chairs in conjunction with program faculty members).
3. The student submits evidence of competence in the form and within the timeframe acceptable to the faculty of the program from which credit is sought. The evidence appropriate for each course under consideration for PLA will be determined by program faculty. Options include but are not limited to portfolios, exams, digital badges, or other means consistent with the learning outcomes of the course or courses at the program discretion.
4. The program faculty members will determine acceptable dates of evidence submission for each course or set of courses for which credit is sought via PLA.
5. The student will receive notification of performance results within a timeframe established by the program.
6. Students may appeal PLA decisions by following the procedures established by the university grade appeal process.

**Probation**

A graduate student whose cumulative graduate grade point average falls below the minimum program requirement for academic good standing upon the completion of nine (9) credits will be placed on academic
probation. If the cumulative GPA remains below that required for academic good standing after the completion of a maximum of nine (9) additional credits, the student will be excluded from the program and is ineligible to continue graduate work. In certain departments, a student will be excluded from the degree program upon earning more than two (2) grades of "C" or below. See Appeals Process (p. 275). Only credit earned in graduate courses at Georgia Southern University may be used to repair a GPA deficiency.

**Removal from Academic Probation**

A graduate student placed on academic probation will be reinstated to good standing providing the cumulative graduate GPA is raised to the program minimum requirement for academic good standing upon completing a maximum of nine (9) credits following the effective probation semester.

**Program of Study**

Every degree seeking student who began the degree program prior to Fall 2010 must file with the College of Graduate Studies a Program of Study, a formal list of the courses the student intends to take to fulfill the requirements of the degree. The program of study should consist solely of courses directly related to the degree. Undergraduate courses may not be included on the Program of Study. Students in a degree program in which the requirements are the same as those under the 2010 - 2011 catalog should use DegreeWorks to document the degree completion. DegreeWorks approval is required by the Advisor as part of the requirements for graduation. A predefined note should be posted on the student's DegreeWorks audit stating approval.

The Program of Study must be submitted by the student and signed by the Advisor, and Graduate Program Director or Department Chair before being submitted to the College of Graduate Studies for final approval. The POS must be submitted to the College of Graduate Studies not later than the end of the semester proceeding the expected graduation semester. Subsequent changes in the program will be submitted on an Amended Program of Study form or by filing a revised Program of Study that is signed by all persons as stated above. A revised Program of Study must be approved by the College of Graduate Studies before graduation.

**Records**

**Student Records**

The Office of Graduate Admissions maintains a permanent file for each student who has applied for admission to the College of Graduate Studies. The file will contain the application for admission, official transcripts, test scores, and any correspondence related to that application. Georgia Southern University maintains copies of all files electronically. Original documents are scanned electronically and stored. Once any application document is scanned and indexed to the electronic file, the paper document is destroyed per the procedures approved by the university system.

The Registrar's Office maintains a file of your permanent transcript record and materials that document your transcript record. Your faculty advisor may maintain a file of advising records and correspondence.

In general, you have the right to review the documents that constitute your official record, and you have the right to request the copies of those documents. If you request copies, Georgia Southern University will provide them in a timely and efficient manner.

**Transcript Records**

The Registrar's Office makes every effort to ensure that transcript records are up-to-date and accurate. You have the right to appeal any information on your transcript that inaccurately reflects your academic history. However, information on a transcript is changed only in extraordinary or extreme circumstances.

If there is an error or omission on your transcript, send a detailed description of the error or omission, along with copies of the relevant documents, to

The Office of the Registrar
PO Box 8092
Georgia Southern University
Statesboro, Georgia 30460, U.S.A.

**Registration Policies**

After you have been admitted as a graduate student, you will be assigned an advisor who can assist you in selecting appropriate courses. Prior to course registration, all students should and are encouraged to communicate with their advisor.

Registration is held at the beginning of each semester, including summer. The early registration period for each semester is posted on the university academic calendar. Students are encouraged to register early.

All registration may be completed on-line through the MyGeorgiaSouthern portal on the Georgia Southern University home page. To register on-line, you must have current admission eligibility and must have a Registration Access Number (RAN) for each semester. Graduate students may access their RAN through their MyGeorgiaSouthern homepage.

Certain programs may not permit on-line registration or may require that the student contact his/her advisor prior to on-line registration.

**Registration and RANs**

Graduate students are allowed to register on Georgia Southern University's web system, WINGS (Web Interactive Network for Georgia Southern), each semester. In WINGS, the student will click on "Student", then "Registration", then click on "Check Your Registration Status, Time Slot and More."

Before any student at Georgia Southern University registers for classes on WINGS, he/she must have a RAN. Graduate students will get their RAN from their MyGeorgiaSouthern account. Graduate transient students will also get their RAN from their MyGeorgiaSouthern account.

**Registration for Continuing, New and Readmitted Students**

Early registration begins on the date stated in the academic calendar at the front of this catalog or the academic calendar at the College of Graduate Studies Website or the Georgia Southern University Office of the Registrar's Website.

To receive credit for a course, a student must be officially registered. Official registration includes registering and paying the appropriate tuition and fees.

**Reinstatement Appeal**

Students who are academically excluded from a degree program may appeal for reinstatement following exclusion. For detailed information regarding the graduate Academic Appeal procedures refer to the Academic Appeal (p. 275) procedures section of the Catalog. To appeal for reinstatement, the student must complete and submit the online web based Appeal Form. Information regarding required documents to support an appeal for reinstatement is found at the website. A student may attach document files to the appeal form. Applicants may track the status of their appeal online.
appeal through the online website. Students granted reinstatement will be placed on probation, regardless of GPA. Please refer to the Probation (p. 280) section of the catalog for more information on this academic standing.

Theses and Dissertations

A student completing a program in which a thesis or dissertation is required must undergo a process involving three primary steps on the way to satisfying the thesis or dissertation requirement. These steps must come in proper order, and each subsequent step cannot be undertaken until the student has successfully completed the prior step.

1. The thesis or dissertation is defended by the student before the appropriate program committee.
2. The student makes any modification(s) that may be required by the committee and submits the revised thesis or dissertation to the chair (or Co-chairs) or the committee (or designee) for a final reading approval if required.
3. The student submits the thesis or dissertation to the College of Graduate Studies for format check in the required electronic Thesis and Dissertation (ETD) (URL) style via the ETD web site by the format submission deadline - http://em.georgiasouthern.edu/registrar/resources/calendars/.

Theses and dissertation students must submit the dissertation in electronic format. The Electronic Thesis and Dissertation (https://cogs.georgiasouthern.edu/etd-submission-links) policies and procedures are discussed in detail on the College of Graduate Studies Website.

Following a successful dissertation defense, the candidate must make any corrections or changes to the dissertation that are required by the defense committee. The student must submit the dissertation as an electronic file (ETD) required by the College of Graduate Studies for format review by the format review deadline - http://em.georgiasouthern.edu/registrar/resources/calendars/.

Once the format check process is complete, satisfactory documents are sent on to the committee for their revisions and approvals. If more discipline specific format corrections are to be made, the student must make the changes and submit the final corrected electronic version to the College of Graduate Studies by the final submission deadline as posted for the semester. The student should check with his/her dissertation chair and committee members to determine if the dissertation committee chooses to re-review the document before final electronic submission to the College of Graduate Studies.

Thesis, Dissertation (Supervisory) Committees

A supervisory or dissertation committee is composed of members of the graduate faculty who are approved by the College of Graduate Studies to serve on the committee and charged with the guidance of a student admitted to a specific graduate degree program. The committees consist of a Chair (or Co-Chairs) and must have a total of at least three members. The committee Chair must hold Graduate Faculty Member status. The Committee Chair (or Co-Chairs) must be endorsed by the academic department in which the degree is housed. The majority of the committee membership must hold appointments in the academic unit responsible for the program.

Appointment of a Thesis or Dissertation Committee is initiated by the academic unit by submitting the Application for Approval of Thesis Topic and Committee Membership Form for thesis students or the Dissertation Committee Membership Approval Form for doctoral students. The form must include a recommended committee membership based on a reasonable match between student and faculty academic interests. Once the College of Graduate Studies is satisfied with the recommended committee, he or she formally approves the committee and provides appropriate notifications. A change in committee membership can be made after initial appointment but only according to the policies and procedures developed by the academic unit and only with the approval of the College of Graduate Studies. The committee membership recommendation form must be submitted to the College of Graduate Studies within two (2) weeks of the academic unit committee recommendation.

Graduate Programs and Requirements

• Certificates and Endorsements (p. 282)
• Master's Programs (p. 283)
  • Accelerated Bachelor's to Master's (p. 283)
  • Foreign Language Requirement (p. 283)
  • Master's Degree Completion Check-List (p. 283)
• Thesis (p. 284)
  • University System of Georgia Franchise Programs (p. 284)
• Education Specialist Programs (p. 285)
  • Ed.S. Degree Completion Check List (p. 285)
• Doctoral Programs (p. 285)
  • Candidacy Examination (p. 285)
  • Dissertation (p. 285)
• Doctoral Degree Completion Check-List (p. 286)
• Doctoral Program Admission Requirements (p. 287)
• Doctoral Program Policies and Requirements (p. 287)

Certificates and Endorsements

Certificate Programs

A graduate certificate program is limited in scope relative to a graduate degree program but provides an opportunity for advanced study with a particular focus. Successful completion of a graduate certificate program is a structured academic accomplishment that leads to an official notation on the student transcript. A certificate program may be a stand alone accomplishment or may be embedded within a graduate degree program.

Certificate Program Admission Requirements

Certificate program admission requirements are set by the respective Certificate program academic unit. Applicants are required to submit all required application documents by the submission deadline. Graduate students who wish to complete an embedded certificate program are required to submit an additional certificate program application, however, no application fee will be charged.

Certificate Credit Requirements

Certificate program credit requirements depend upon the specific program. To receive credit or certificate program courses, a grade of "C" or better is required. A minimum cumulative grade point average of 3.0 is required in the certificate program.

Simultaneous Enrollment in a Graduate Certificate and Degree Program

Students admitted to a degree program in which the certificate program is embedded are permitted to complete the certificate program. If the certificate program requirements are met prior to the completion of the degree program, the student is eligible to be awarded the Certificate upon the successful completion of the certificate requirements.
Endorsement Programs
A graduate endorsement program is limited in scope relative to a graduate degree program but provides an opportunity for advanced study with a particular focus. Successful completion of a graduate endorsement program is a structured academic accomplishment that leads to an official notation on the student transcript. An endorsement program may be a stand alone accomplishment or may be embedded within a graduate degree program. Upon endorsement program completion, the endorsement may be added to a professional certificate in teaching, service, and leadership fields through the Georgia Professional Standards Commission.

Endorsement Program Admission Requirements
Endorsement program admission requirements are set by the respective Endorsement program academic unit. Applicants are required to submit all required application documents by the submission deadline.

Endorsement Credit Requirements
Endorsement program credit requirements depend upon the specific program. To receive credit for an endorsement program course, a grade of "C" or better is required. A minimum cumulative grade point average of 3.0 is required in the endorsement program.

Simultaneous Enrollment in a Graduate Endorsement and Degree Program
Students admitted to a degree program in which the endorsement program is embedded are permitted to complete the endorsement program.

Master's Programs
Programs leading to a master's degree are very diverse and generally fall into three categories depending on overall emphasis and the nature of the study program.

- **Thesis option:** As part of a degree program, the student will complete a thesis for a minimum number of credit hours as determined by the program.
- **Non-Thesis Option:** The student's degree program will consist of courses and evidence of advanced work, such as term papers, objects of art, music or designs, as determined by the graduate faculty of the department or school.
- **Internship option:** Students in certain designated degree programs must complete a supervised internship.

Not all master's degree programs offer all these options and a student may not select a plan that has not been approved by the graduate faculty of the program in which he or she is enrolled.

Degree seeking students must demonstrate competency in their study area as determined by the academic program. Competency is demonstrated in one or more of the following ways:

1. pass a final comprehensive and/or oral examination,
2. present a satisfactory portfolio,
3. thesis defense, and/or
4. studio exhibition or recital.

- **Accelerated Bachelor's to Master's (p. 283)**
- **Foreign Language Requirement (p. 283)**
- **Master's Degree Completion Check-List (p. 283)**
- **Thesis (p. 284)**
- **University System of Georgia Franchise Programs (p. 284)**

Accelerated Bachelor's to Master's
The Accelerated Bachelor's Master's (ABM) program provides qualified undergraduate students the opportunity to begin graduate studies in their senior year and to simultaneously satisfy some remaining requirements for the bachelor's degree.

A student must apply and be admitted into this program in the semester preceding the beginning of the ABM program. Students must have completed at least 24 hours of coursework in the discipline or related field of the Master's degree to be eligible. Prospective students should consult the program of study for admission deadlines and admission requirements.

A student may use up to 9 credit hours of graduate-level courses offered within a single degree program in meeting the requirements of both a bachelor's degree and a master's degree. However, there must be at least 150 unique hours between the two programs.

An undergraduate student enrolled in graduate classes is limited to six semester hours of graduate course work per term.

**Admission to an Accelerated Bachelor's Master's degree program is different than Senior Privilege. Please refer to the policy on Senior Privilege (p. 261) for more information.**

Foreign Language Requirement
The College of Graduate Studies has no requirement for a language other than English for the master's degree. Individual academic units may establish, with approval of the Faculty Senate Graduate Committee, language requirements for their degree programs and may define the level of competence needed to satisfy those requirements. A grade of "C" or better in the fourth level course of an approved foreign language or passing a foreign language examination administered by the Georgia Southern University Foreign Language Department will satisfy the foreign language requirement unless otherwise stated by the individual program policy. The foreign language must be approved by the student's advisor. Neither English nor the student's native language (if other than English) may be counted to meet the Foreign Language requirement.

Master's Degree Completion Check-List
Students need to complete the following items:

- Have satisfied the Foreign Language requirement if completing a master's program in which a Foreign Language is required.
- Have accumulated the required number of credits for the degree.
- Have successfully completed all program requirements.
- Have an approved Program of Study on file in the College of Graduate Studies or have completed the program under DegreeWorks.
- Have no grades of "I" or "IP" on the graduate transcript.
- Have a cumulative graduate GPA of at least 3.0.
- Be registered in at least one (1) credit hour if completing a degree program in which a thesis is being completed.
- Take and pass the comprehensive examination (or equivalent in your department) if required for your degree program by the deadline. Your advisor must submit the Report on Comprehensive Examination/Thesis Defense Form to the College of Graduate Studies by the deadline.
- Pass the thesis or internship defense by the deadline if completing a degree program in which a thesis or internship is required.
• Submit the electronic thesis for format review by the College of Graduate Studies by the deadline.
• Submit the final electronic version of the approved thesis to the College of Graduate Studies by the deadline.
• Complete the Institutional Review Board (IRB) termination notification through the Office of Research Services and Sponsored Programs by the deadline.

**Thesis**

**Master’s Thesis Committee**

Following admission to a masters program, the student in a degree program that requires a thesis confers with the degree program coordinator of the academic program and selects an advisor, or “major professor,” from among the graduate faculty who have permission from their department chair to direct a Masters thesis and who are willing to assume the responsibility. Master’s thesis committees must be formulated by masters students in masters programs requiring a thesis. In some programs, the chair may be assigned to the student. The committee must consist of a minimum of three members of the Graduate faculty, including the student's major professor, who will serve as Chair of the committee. In some instances, a Co-chair may be part of the committee makeup.

Only faculty holding Member (Full) Graduate Faculty status may serve as the Master’s Thesis Committee Chair. If there are more than three members on the committee, there must be greater than 50% GSU faculty representation. The committee may include not more than one voting non-Georgia Southern University faculty. This individual must hold Affiliate Graduate Faculty status at Georgia Southern University, be appointed to the graduate faculty, and be approved by the dean of the College of Graduate Studies. Adjunct faculty cannot serve on a Master’s Thesis committee.

The student must submit the completed Application for Thesis Title and Committee Member Approval Form ([http://cogs.georgiasouthern.edu/student/forms](http://cogs.georgiasouthern.edu/student/forms)) to the College of Graduate Studies for committee approval and have the non-Georgia Southern member complete the online process ([https://w3.georgiasouthern.edu/cogs/externalcommitteemembers](https://w3.georgiasouthern.edu/cogs/externalcommitteemembers)). The College of Graduate Studies gives final approval for non-Georgia Southern committee members. Changes in the Committee membership must be submitted on the Committee Member Change ([http://cogs.georgiasouthern.edu/student/forms](http://cogs.georgiasouthern.edu/student/forms)) form and be approved by the College of Graduate Studies.

All members of a student’s dissertation committee participate as peers and have the responsibility for planning the program of study, advising the student, and ensuring that the student’s major’s program is of high quality.

Should some departments have Thesis Committee membership requirements that are more stringent than stated above, the department policy will be adhered to.

**Thesis**

Candidates who undertake a thesis should schedule their work to allow sufficient time for review by the major professor and the committee and for making any necessary revisions before proceeding to the final examination. With unanimous approval of the committee, a student majoring in Modern Languages may write a thesis in a language other than English, provided that the language is clearly appropriate to the subject matter. If the thesis requires the use of human subjects, animals, or biohazardous materials, the student is required to comply with University policies and procedures. The compliance policies and procedures can be found at [http://research.georgiasouthern.edu/](http://research.georgiasouthern.edu/).

The candidate must provide a copy of the thesis (electronic or hard copy format) to each member of the committee and all members of the committee must certify that they have received acceptable copies of the thesis before a final defense can be scheduled. A copy of the thesis must also be available at the defense. Following a successful final defense, the candidate must submit an electronic copy of the thesis to the College of Graduate Studies Electronic Thesis and Dissertation site for format check by the semester stated deadline. Late submissions will not be accepted. When the format check has been completed, the electronic document is returned to the student. Once the student has made all format corrections and changes, the student should ask his/her major professor and committee if they wish to review the electronic document before the final corrected copy is submitted to the College of Graduate Studies. The student must make all corrections and the electronic document must be in final and acceptable form, incorporating any revisions required by the committee. Information regarding the ETD ([http://academics.georgiasouthern.edu/etd](http://academics.georgiasouthern.edu/etd)) can be found on the COGS web site. The final corrected copy must be submitted and received by the final submission deadline stated in the university academic calendar.

**Thesis Continuous Enrollment Requirements**

The College of Graduate Studies Continuous Enrollment policy states that “All thesis students who have registered at least once for courses titled thesis or dissertation must be continuously enrolled every semester thereafter, including the semester of graduation. Summer registration is not required unless summer is the graduation semester.” Check with your major advisor to see if your college has a different, or additional, continuous enrollment requirement(s) that apply.

- A grade of “IP” will be recorded for all thesis or dissertation credit hour work in progress and will automatically be recorded each semester the student is enrolled.
- The grade of “S” or “U” must be recorded for all theses or dissertation credit hours when completed.
- The advisor and/or major professor will report a final thesis or dissertation grade of “S” or “U.” Any reported grade other than “S” or “U” will be changed to an “S” or “U” grade according to the following: REPORTED GRADE OF “A”, “B”, “C” = “S”, “D”, “F” = “U”
- Upon completion of the thesis, or dissertation requirements, final grades for preceding semesters will be changed to the appropriate grade.

Should a student not register each semester as required by the continuous enrollment policy, the student will be required to register and pay tuition and fees for the missed semesters. Tuition and fee payment is due for the missed registration semesters at the beginning of the semester the student resumes his/her study providing the student is eligible to return and resume registration.

A student who has been approved for a medical or a non-medical leave of absence is not required to be registered while under the approved leave period.

**University System of Georgia Franchise Programs**

Certain Master of Education degree programs are offered on-line through the University System of Georgia's Georgia ONmyLINE ([http://www.georgiaonmyline.org](http://www.georgiaonmyline.org)).

**Transfer Credits**

All of the College of Education program involved in a USG franchise program may allow for additional graduate course credits to be transferred from other USG institutions involved in the respective franchise. The
maximum number of transfer credits allowed will be identified by the specific program and will be published in program materials. The M.Ed. in Instructional Technology franchise program will allow up to 9 transfer credits with the advisor’s approval. The M.Ed. in Curriculum and Instruction - Accomplished Teaching will allow up to 27 transfer credits including 18 credits of that program’s required franchise courses with advisor’s approval.

**Franchise Programs Admission Requirements**

**Quick Admit**

For **quick admission** to a USG Franchise Program, applicants must:

1. Complete and submit the “Georgia OnMyLine (http://www.georgiaonmyline.org)” admission application and pay the specified application fee.
2. Have completed bachelor’s degree requirements from a regionally accredited institution.
3. Possess a clear, renewable Georgia certification in teaching, service, or leadership field.
4. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.

Quick Admit candidates will be evaluated at the end of the first 9 credits of study in terms of GPA and key assessments.

**Regular**

For Regular admission to a USG Franchise Program applicants must:

1. Complete and submit the “Georgia OnMyLine (http://www.georgiaonmyline.org)” admission application and pay the specified application fee.
2. Have completed bachelor’s degree requirements from a regionally accredited institution.
3. Present official score reports for the Miller Analogies Test (MAT) or the General Graduate Record Examination (GRE).
4. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.

**Collaborative Franchise Programs**

Applicants for a USG Franchise Collaborative Program, such as the M.Ed. in Curriculum and Instruction - Accomplished Teaching, must apply for and be admitted to the cooperating university from which they choose to earn the degree.

**Education Specialist Programs**

The Education Specialist degree is offered only in a limited number of areas in the College of Education.

**Ed.S. Degree Completion Check List**

Students need to complete the following items:

- Have accumulated the required number of credit hours for the degree.
- Have successfully completed all program requirements.
- Have an approved Program of Study or approved DegreeWorks audit on file in the College of Graduate Studies.
- Have no grades of “I” or “IP” on your graduate transcript.
- Have a cumulative graduate GPA of at least 3.0.

- Take and pass the comprehensive examination (or equivalent in your department) if required for your degree program by the deadline. Your advisor must submit the Report on Comprehensive Examination/Thesis Defense Form to the College of Graduate Studies by the deadline.

- Complete the Institutional Review Board (IRB) termination notification through the Office of Research Services and Sponsored Programs by the deadline.

**Doctoral Programs**

The doctoral degree is the most advanced academic degree awarded by the university. It requires demonstration of expertise in a major field of study, a working understanding of one or more related disciplines, and expression of independent research or abilities leading to a significant contribution to knowledge. Georgia Southern University offers the Doctor of Education (Ed.D.), Doctor of Public Health (D.P.H.), Doctor of Psychology (Psy.D.), Doctor of Philosophy (Ph.D.) and Doctor of Nursing Practice (D.N.P.).

- Candidacy Examination (p. 285)
- Dissertation (p. 285)
- Doctoral Degree Completion Check-List (p. 286)
- Doctoral Program Admission Requirements (p. 287)
- Doctoral Program Policies and Requirements (p. 287)

**Candidacy Examination**

The student must be given a written candidacy/qualifying examination, which may be supplemented by an oral examination as prescribed by the program requirements. These are designed to test the student’s breadth and depth of knowledge in the proposed field of specialization, as well as the student’s ability to explore problems on the boundaries of knowledge. Satisfactory performance in the examination is an indication that the student is prepared to perform independent work toward the doctoral degree. The candidacy/qualifying examination must be taken no later than the last semester of course work or the following semester. Copies of the examination are filed with the academic unit and made available on request to any graduate faculty member for a period of two years from the date of examination. The results of the candidacy examination are reported to the College of Graduate Studies on the Candidacy Exam Report form that must be signed by members of the Candidacy Committee. If the student fails the candidacy/qualifying examination, only one retake of the Exam is permitted. The format of the examination and the structure of the candidacy committee may differ among doctoral programs, and in some programs, the candidacy committee will differ from the dissertation committee. Within one week following the completion and determination of the results of the candidacy/qualifying examination, including those of any oral portion, the candidacy committee must sign the ballot indicating that the candidacy examination has been completed. In case of failure of the first candidacy/qualifying examination, the candidacy committee may approve a second examination with no more than one dissenting vote. A second examination can be taken no sooner than three months following the initial failure. As with the first examination, the signed Candidacy Exam Report Form must be submitted to the College of Graduate Studies within one week of the determination of the results of the examination.

**Dissertation**

**Dissertation Committee**

An approved dissertation, unless otherwise stated by the degree program, is required of all candidates for the award of a doctorate degree. Its purpose is to demonstrate the candidate’s ability to conduct significant original research of a type appropriate to the academic discipline, to
analyze the information obtained from the research, and to present the results in a form acceptable to the dissertation committee. A dissertation must be written in a form appropriate to the discipline.

When the student is admitted to candidacy and the Dissertation Committee Chair is satisfied with the completed dissertation, he/she will inform the candidate that the dissertation is ready to be read by all members of the Dissertation Committee. Per the preference of the Dissertation Committee, the student will then distribute dissertation copies in electronic file or hard copy format to the committee members. The candidate must provide a copy of the dissertation to each member of the final examining committee at least two weeks (in some programs three weeks) before the scheduled defense. The candidate, in consultation with the Committee Chair (Major Professor) and committee members, will then schedule the dissertation defense. The dissertation defense must be scheduled by the semester deadline stated in the university academic calendar to conduct the defense. The dissertation defense will be held in a forum open to the public.

The chairperson also has the right and the responsibility to evaluate the candidate’s performance and to cast a vote. The Dissertation Committee has a variety of responsibilities in the final defense process.

- The chair (and/or the committee) informs the student they are ready to schedule the dissertation defense. Agreeing to the dissertation defense scheduling does not imply that the dissertation is approved.
- Once the defense is scheduled, the committee will thoroughly review the candidates dissertation to make an assessment of the total dissertation as to presentation, methodology, and reporting. It is best practice in the time between the confirmation of the defense date and the defense date, that committee members do not engage in discussion around matters pertaining to the dissertation document. Questions about the students work should be saved for the oral defense so that the student can defend their work in this designated forum.
- The committee also agrees to hold a public, oral dissertation defense, after the dissertation is deemed acceptable in form, at which the candidate presents and defends the dissertation.
- All members of the examining committee (or substitutes appointed by the College of Graduate Studies) are expected to be present throughout the examination. At the conclusion of the dissertation defense, there can only be one dissenting vote of the examining committee including substitutes appointed by the College of Graduate Studies before the candidate is deemed to have passed. A refusal to vote by the chairperson or any other member of the examining committee shall be recorded as a negative vote. With the permission of the majority of the committee, a failed defense may be retaken only one time and scheduled no earlier than three months from the date of the failure. The defense must be given on the Statesboro campus.
- Following the defense, the committee will report the results (for both failed and passed) of this examination to the College of Graduate Studies.
- When the dissertation has been approved, the dissertation defense passed, and all other requirements have been met, the candidate is recommended to be awarded the degree by the College of Graduate Studies.

Following admission to a doctoral program, the student confers with the degree program coordinator of the academic program and selects an advisor, or "major professor," from among the graduate faculty who have permission from their department chair to direct dissertations and who are willing to assume the responsibility. Dissertation committees must be formulated by doctoral students in doctoral programs requiring dissertations. The dissertation committee must consist of a minimum of three members of the Graduate faculty, including the student’s major professor, who will serve as Chair of the committee.

Only faculty holding Member (Full) Graduate Faculty status may serve as the Dissertation Committee Chair. The committee may include not more than one voting non-Georgia Southern University faculty. This individual must hold Affiliate Graduate Faculty status at Georgia Southern University, be appointed to the graduate faculty, and be approved by the College of Graduate Studies.

The student must submit the completed Dissertation Committee Membership Approval Form (http://cogs.georgiasouthern.edu/student/forms) to the College of Graduate Studies for committee approval and have the non-Georgia Southern committee member complete the online process (https://w3.georgiasouthern.edu/cogs/externalcommitteemembers). The College of Graduate Studies gives final approval for non-Georgia Southern committee members. Changes in the Committee membership must be submitted on the Committee Member Change form and be approved by the graduate dean.

All members of a student's dissertation committee participate as peers and have the responsibility for planning the program of study, advising the student, and ensuring that the student's doctoral program is of high quality.

Dissertation Continuous Enrollment Requirement

The College of Graduate Studies Continuous Enrollment policy states that: "All thesis or dissertation students who have registered at least once for courses titled thesis or dissertation must be continuously enrolled every semester thereafter, including the semester of graduation. Summer registration is not required unless summer is the graduation semester." Check with your major advisor to see if your college has a different, or additional, continuous enrollment requirement(s) that apply.

- A grade of "IP" will be recorded for all dissertation credit hour work in progress, and will automatically be recorded each semester the student is enrolled.
- The grade of "S" or "U" must be recorded for all dissertation credit hour when completed.
- The advisor and/or major professor will report a final dissertation grade of "S" or "U". Any reported grade other than "S" or "U" will be changed to an "S" or "U" grade according to the following: REPORTED GRADE OF "A", "B", "C" = "S", "D", "F" = "U"
- Upon completion of the dissertation requirements, final grades for preceding semester(s) will be changed to the appropriate grade.

Should a student not register each semester as required by the continuous enrollment policy, the student will be required to register in thesis or dissertation credit and pay tuition and fees for the missed registration semesters at the beginning of the semester the student resumes his/her study providing the student is eligible to return and resume registration.

A student who has been approved for a medical or a non-medical leave of absence is not required to be registered while under the approved leave period.

Doctoral Degree Completion Check-List

The following are required of doctoral students for degree completion:

- satisfied the Foreign Language requirement if completing a doctoral program in which a Foreign Language is required;
- accumulated the required number of credit for the degree;
- successfully completed all program requirements;
- have an approved Program of Study on file in the College of Graduate Studies or have completed the program under DegreeWorks;
- have no grades of "I" or "IP" on your graduate transcript.
- have a cumulative graduate GPA of at least 3.0 or the cumulative GPA required by your program;
Doctoral Program Admission Requirements

To gain admission to a doctoral program, the applicant must be approved for admission both by the graduate faculty of the department and/or program and by the College of Graduate Studies.

Doctoral Program Policies and Requirements

Doctoral Program Credit Requirements

The minimum number of credit hours to satisfy the doctoral program requirements are set for each individual program. The maximum number of credit hours taken at another institution that may count as transfer credit hours toward the doctoral program are also set by the individual doctoral programs.

Electronic Thesis and Dissertation Requirements

Dissertation students must submit the dissertation in electronic format. The policies, procedures, and submission links for this are presented in detail on the College of Graduate Studies website for The Electronic Thesis and Dissertation (http://academics.georgiasouthern.edu/etd).

Following a successful dissertation defense, the candidate must make any corrections or changes to the dissertation that are required by the defense committee. The student must submit the dissertation as an electronic file (ETD) required by the College of Graduate Studies for format check by the format check deadline. After the document format has been completed, the electronic document is returned to the student. If format corrections are to be made, the student must make the changes and submit the final corrected electronic version to the College of Graduate Studies by the final submission deadline as posted for the semester. The student should check with his/her dissertation chair to determine if the dissertation committee chooses to re-review the document before final submission to the College of Graduate Studies. The final copy must also conform to the stylistic guidelines adopted by the academic unit established by the College of Graduate Studies.

Exclusion - Doctoral Students

A doctoral student will be denied continued enrollment at Georgia Southern University for any of the following reasons:

1. failure to meet the conditions of academic probation;
2. failure to meet specified academic requirements as set by the program and/or department; and/or
3. failure to comply with the Academic Dishonesty section of the Student Conduct Code.

Grade Requirements - Doctoral Programs

To be awarded a doctoral degree, the candidate must not be on academic probation and must meet the minimum GPA requirement for the degree program.

The minimum cumulative graduate GPA to remain in good standing is set by the respective doctoral program. Doctoral students should check their program student handbook or consult with their advisor or program director about the minimum GPA requirement for their program.

A student may not repeat any course for credit for which he/she has already received a grade of "C" or better unless specifically permitted by the degree program department policy.

Practicum Requirement

Some doctoral programs may have a practicum requirement. Doctoral students should consult with their respective department/college regarding practicum requirements.

Restricted Courses

While courses numbered 6000 and above are offered for graduate credit hour, courses numbered 9000 and above are open to doctoral degree students only. Courses numbered 5000G to 5999G may be taken for graduate credit but may not be counted toward doctoral degree requirements, unless specifically prescribed as a requirement for the doctoral curriculum. Because this varies by program, please refer to the program requirements for more information.

Additional Programs and Services

Office of International Programs and Services

Director: Dr. Dorothée Mertz-Weigel
Statesboro Campus:
Forest Drive Bldg. 1313
P.O. Box 8106
Phone: (912)478-0332

Armstrong Campus:
Gamble Hall 110
Phone: (912)344-3128
www.georgiasouthern.edu/international

The Office of International Programs & Services (OIPS) is responsible for the strategic execution of Georgia Southern’s internationalization process and provides oversight for the international activities of the campus. The OIPS aims to create a global awareness on campus and within the community. To prepare students with the global knowledge, attitudes and skills that will enable them to function as citizens of the world. We aim to infuse a global dimension throughout the University’s teaching, research, and service activities, and improve the breadth and depth of Georgia Southern’s global reach and engagement. These aspirations are achieved by managing international strategic partnerships; providing study abroad & exchange programming for students; offering professional development and service activities for faculty; maintaining high-quality, federally compliant international student and scholar services; and hosting programs and events to promote international awareness.
and an appreciation of global cultures. This infusion of internationalized educational activities extends beyond the scope of the University to support global learning, business, and economic development in Southeast Georgia.

Study Abroad and Exchange Programs

Studying abroad provides students with a trans-cultural experience that has many major benefits: discovering the culture and institutions of other lands, facilitating the development of relevant career skills, making important connections with overseas professionals, and enhancing language skills. In addition, studying abroad contributes to personal maturity, a sense of independence, self-knowledge, and self-confidence. Semester, and year-long exchange, summer, language immersion, and alternative break programs are available. All disciplines are eligible to participate, and programs are offered in more than 30 locations worldwide. For more information, visit www.georgiasouthern.edu/studyabroad or email stdyabrd@georgiasouthern.edu.

International Student and Scholar Services

There are nearly 500 international students and scholars in F-1 (student) and J-1 (exchange visitor) visa status from about 90 countries at the university. The Office of International Programs & Services helps international students acclimate to their new environment at Georgia Southern, provides support services, processes visa-related documents, educates students and scholars on the visa laws to help them maintain their status with U.S. Homeland Security, and maintains the university’s compliance with the visa laws. Services provided include: orientation (including academic advisement and registration), English proficiency testing/placement, assistance with health insurance coverage, and visa and cultural advisement.

Intercultural Educational Programs

The OIPS plans and coordinates programs which foster international understanding and cultural exchange, both on our campuses and within our surrounding communities. Some of the programs offered are: the Global Partner Zone program, yearly symposiums on different countries, weekly International Conversation Hours, the International Club, International Education Week, the International Festival, the Global Ambassadors Program, the Cross-Cultural Friendships Program, and the International Extended Families Program. Participation in these programs and events are open to both international and U.S. students, as well as the local community.

Center for Teaching Excellence (CTE)

The Center for Teaching and Technology (CTE), which is located in the Henderson Library, offers Graduate Teaching Enhancement Programs that are designed to help Georgia Southern graduate Teaching Assistants (TAs) develop and refine their teaching skills. All graduate TA2s involved in face-to-face instruction must have completed training, which consists of centralized training offered by the Center for Teaching Excellence (CTE) or decentralized training within the academic program. Decentralized training must have prior approval from the College of Graduate Studies, CTE, and the Office of the Provost. TA2s may also be required to participate in additional in-service training within their College or Department, as determined by their program. Centralized TA2 training in CTE consists of the Orientation to Teaching portion of the program, consisting of three 3-hour seminars conducted prior to the beginning of each semester.

In addition to the basic orientation, two different university teaching certification programs are offered to interested participants. All programs are coordinated by the Center for Teaching and Technology, with administrative support from the College of Graduate Studies. All TAs are further invited to individually consult with CTE staff regarding their teaching related questions.

Georgia Southern University Online Degrees

Center for Online Learning

Georgia Southern University offers the following online degree programs:

Graduate Programs
- Elementary Education (Grades P-5) Ed.S. (Online) (p. 350)
- Instructional Technology Ed.S. (p. 363)
- Middle Grades Education (Grades 4-8) Ed.S. (Online) (p. 377)
- Reading Education (K-12) Ed.S. (Online) (p. 345)
- Secondary Education (Grades 6-12) Ed.S. (Online) (p. 380)
- Special Education (Grades P-12) Ed.S. (Online) (p. 352)

- Accounting WebM.Acc. (The Web-Based Master of Accounting) (p. 326)
- Applied Economics M.S. (p. 329)
- Business Administration M.B.A. (The Georgia WebMBA) (p. 332)
- Communication Sciences and Disorders M.S. (p. 427)
- Criminal Justice and Criminology M.S. (Emphasis in Criminal Justice) (p. 311)
- Criminal Justice and Criminology M.S. (Emphasis in Cybercrime) (p. 313)
- Curriculum and Instruction - Accomplished Teaching M.Ed. (Online) (p. 349)
- Educational Leadership M.Ed.(Online) (p. 367)
- Elementary Education (Grades P-5) M.Ed. (Online) (p. 351)
- Evaluation, Assessment, Research, and Learning M.Ed. (Online) (p. 346)
- Instructional Technology M.Ed. (Georgia ONmyLINE) (p. 369)
- Kinesiology M.S. (Concentration in Coaching) (Online) (p. 420)
- Kinesiology M.S. (Concentration in Physical Education) (Online) (p. 421)
- Middle Grades Education (Grades 4-8) M.Ed. (Online) (p. 378)
- Nursing M.S.N. (Online) (p. 439)
- Reading Education M.Ed. (Online) (p. 346)
- Secondary Education (Grades 6-12) M.Ed. (Online) (p. 381)
- Special Education (Grades P-12) M.Ed. (Online) (p. 353)
- Sport Management M.S. (Online) (p. 424)
- Teaching Culturally and Linguistically Diverse Students M.Ed. (p. 385)
- Teaching M.A.T. (Concentration in Elementary Education P-5) (Hybrid) (p. 354)
- Teaching M.A.T. (Concentration in Elementary Education P-5) (Online) (p. 356)
• Teaching M.A.T. (Concentration in Special Education P-12) (Hybrid) (p. 357)
• Teaching M.A.T. (Concentration in Special Education P-12) (Online) (p. 358)
• Doctor of Nursing Practice D.N.P. (Online) (p. 435)

Graduate Endorsement Programs
• English for Speakers of Other Languages (ESOL) Education Endorsement (p. 375)
• Online Teaching and Learning Endorsement (Online) (p. 372)
• Reading Endorsement: Classroom Teacher of Reading Program (Online) (p. 347)
• Special Education Transition Specialist Endorsement (p. 354)
• Teacher Leadership Endorsement (Online) (p. 373)

Graduate Certificate Programs
• Adult/Gerontology Acute Care Nurse Practitioner Post-MSN Certificate (p. 433)
• Adult/Gerontology Primary Care Nurse Practitioner Post-MSN Certificate (p. 434)
• Applied Economics Certificate (Online) (p. 328)
• Applied Research and Evaluation Certificate Program (Online) (p. 347)
• Certificate in Public and Nonprofit Management (p. 320)
• Certificate in Public Health (p. 443)
• Clinical Specialist in Advanced Imaging Certificate (p. 191)
• Cybercrime Post-Baccalaureate Certificate (p. 314)
• Educational Leadership Tier I Certificate Program (Online) (p. 370)
• Educational Leadership Tier II Certificate Program (Online) (p. 374)
• Enterprise Resources Planning (ERP) Certificate Program (Online) (p. 332)
• Family Nurse Practitioner Post-MSN Certificate (p. 437)
• Instructional Technology Certificate Program (Online) (p. 371)
• Psychiatric Mental Health Nurse Practitioner Post-MSN Certificate (p. 440)
• School Library Media Certificate Program (Online) (p. 372)
• Strength and Conditioning Graduate Certificate (p. 426)
• Teaching Culturally and Linguistically Diverse Students Certificate (Online) (p. 385)
• Teaching English to Speakers of Other Languages (TESOL)/Applied Linguistics Certificate (Online) (p. 308)

Undergraduate Programs
• Information Technology B.S.I.T. (WebBSIT) (p. 184)
• Interdisciplinary Studies B.I.S. (Online) (p. 98)
• Medical Laboratory Science B.S.M.L.S. (Online) (p. 192)
• Radiologic Sciences B.S.R.S. (Concentration in Radiography) (p. 196)
• Respiratory Therapy B.S. (Online) (p. 198)

Online Course Support Services
Center for Online Learning (COL)
The COL provides technical and pedagogical training and support for faculty who develop online courses. For more information, call (912) 478-0049 or visit the COL website at: http://academics.georgiasouthern.edu/col/.

Center for Academic Technology Support (CATS)
CATS provides technical problem support for online courses for students and faculty. For more information call (912) 478-2287 or visit the CATS website at: http://academics.georgiasouthern.edu/cats/.

Online Programs at Georgia Southern University
For more information about online program at Georgia Southern University, please see the following website: http://academics.georgiasouthern.edu/online/.
• Graduate Degree Program Directors/Coordinators (p. 289)

Graduate Degree Program Directors/Coordinators
The Graduate Program Director (GPD) in an academic unit is a faculty member appointed by the unit administrator (Chair) to administer its graduate program(s). The GPD makes recommendations for program elements such as admission, provides approval for Programs of Study, handles student appeals, and coordinates Thesis and Dissertation committees. It is the GPD’s responsibility to coordinate the department’s program with the COGS. The GPD receives all inquiries, applications, announcements, and requests for data and information relative to the academic program(s), and communicates COGS policies and actions to program faculty and graduate students. Graduate Program Directors are expected to be knowledgeable of degree requirements, Graduate School regulations and procedures, and the general organization of the University as it affects graduate students. The specific duties of the GPDs include:
• processing and evaluation of applications;
• transmitting to the Office of Graduate Admissions the program’s recommendation on student applications for admission;
• notifying the COGS of the student’s progress towards the degree (exams, etc.);
• approving students’ Programs of Study in DegreeWorks;
• maintaining unit files on prospective, present and past students;
• providing department endorsement of requested exceptions to University policy;
• attendance and participation in COGS Program Director meetings and functions; and
• reviewing student appeals regarding academic program matters.

Preparing for Graduation
Program of Study Form (For degree seeking students admitted prior to Fall 2010)
The Program of Study Form confirms that you have taken the courses required for your graduate degree. The Program of Study Form must be submitted to the College of Graduate Studies not later than the end of the semester prior to the expected graduation term. Degree seeking students admitted Fall 2010 or later will complete their program under DegreeWorks.

Application for Graduation
This is the formal request for the Registrar’s Office to begin proceedings for declaration of the degree. It must be received in the Registrar’s Office not later than the first day of fall for fall graduation and the first day of
Preparing for Graduation

spring for spring and summer graduation. Application for Graduation Form (http://em.georgiasouthern.edu/registrar/students/graduationinformation/applicationforgraduation)

A doctoral student is not permitted to walk in a graduation ceremony until all requirements for the degree have been satisfied and the student cleared for graduation.

Graduation Fee Payment

A non-refundable fee of $35 is required to cover the processing of the graduation and the diploma. Payment should be received by the end of the semester in which the student plans to graduate. It is best to pay the graduation fee on-line through WINGS by logging into My.GeorgiaSouthern.edu (http://my.georgiasouthern.edu).

Graduate in Absentia Form

Students who do not plan on attending the commencement must complete the Request to Graduate in Absentia Form. Please refer to the Graduate in Absentia (http://em.georgiasouthern.edu/registrar/students/graduationinformation/requesttograduateinabsentia) website for more details.

Reserve Graduation Attire

Graduation attire must be reserved 8 weeks before graduation. Cap and gown fees can be paid directly to the Herff Jones Company when you place your order. Doctoral students must contact Herff Jones with their height, cap size, degree, and major at:

Herff Jones
7 South Mulberry Street
Statesboro, GA 30458
Telephone: (912) 764-9314
Fax: (912) 764-9550
Email: roderick@frontiernet.net

Graduation Attire Reservations (http://www1.herffjones.com/college/graduation)

Pay Outstanding Debts

All debts to Georgia Southern University must be paid in full. To determine debts such as parking tickets, library fees, fines, etc., students should contact the Cashier’s Office at: Georgia Southern University, Cashier’s Office, Deal Hall, (912) 478-0020.

Diploma Address

Georgia Southern University’s Office of the Registrar will mail the diploma to students 6-8 weeks after graduation if the student applied for graduation three semesters before completion. Students are strongly encouraged to update the Diploma Address and graduation e-mail address on WINGS before the end of the semester in which you are completing the degree requirements.
Arts and Humanities

Mission
The College of Arts and Humanities strives to serve students, the university, and communities throughout Southeast Georgia through instruction, research, and performance in the Arts and Humanities.

Betty Foy Sanders Department of Art

The Master of Fine Arts degree programs (Graphic Design, Studio Art) provide students with a comprehensive experience leading to the terminal MFA degree. The degree programs exhibit the professional intensity and high standards expected of all terminal degree programs. Recognizing the close scholarly and functional relationship between Art and Design, the MFA is cross-disciplinary and combines technical skills, creative work, inquiry, and investigation in ways that focus on the advanced preparation of artists and designers in their areas of specialization.

The MFA programs enable degree holders to become: professional practitioners in art and design, educators, leaders in critical thinking, and significant contributors in the contemporary dialog of their discipline through research and scholarship.

Art Education Post-Baccalaureate Certification

Certificate Requirements: 21 Credit Hours

Program

The Post-Baccalaureate, Non-Degree Teaching Certificate program is designed for individuals who want to teach art and hold an undergraduate art degree or graduate art degree with sufficient coursework. The program leads to Georgia teaching certification at the T-4 level.

This teacher certification program, in the field of art for all grades (P-12), is offered through the College of Education in partnership with the department.

Individuals can start this program in any semester. There is no firm application deadline, but we encourage applicants to apply as early as possible.

Art M.F.A. (Concentration in Graphic Design)

Degree Requirements: 60 Credit Hours

Application Deadlines

March 1 for Fall Semester, October 1 for Spring Semester; application portfolios for the MFA degree program are not reviewed during summer session.

Admission Requirements

1. Completed requirements for the Bachelor’s degree in a college accredited by the appropriate accrediting association.
2. Satisfactory completion of a minimum of 18 credits of undergraduate studio arts courses and an additional minimum of nine (9) credits of art history.
3. A 3.0 (4.0 scale) cumulative grade point average or higher on all undergraduate work.
4. In addition to application materials required by the College of Graduate Studies, prospective students are required to submit a creative portfolio for consideration by the admissions committee in the Art Department.

Electronic Portfolio is emailed directly to MFA Graduate Program Director and must include:

1. Statement of Interest and Intent describing purpose of entering full-time graduate program and ultimate goal(s) as a graphic designer.
2. Artist's Statement highlighting body of work presented in portfolio.
3. Three (3) letters of reference identifying your studio practices and ability to pursue coursework of an advanced critical and theoretical nature.
4. Resume.
5. 20 to 30 images of current artwork representing a mature body of work.

You may email the following file types:

**IMAGE:** JPEG or JPG, under 5MB and 1200 pixels or larger on the longest side.

**AUDIO:** AIFF, WAV, XMF, MP3, under 10 MB with a minimum bit rate of 96

**VIDEO:** 3GP, WMV, AVI, MOV, ASF, MPG, MP4, M2T, MKV, M2TS, under 100MB with a minimum resolution of 640x480; minimum 12 fps.

Acceptable Media:

File Types IMAGE MEDIA
File format: JPEG or JPG only
File dimensions: 1200 pixels or greater on the longest side
Anything larger than 1200 px may not be viewed by the committee
File size: under 5 MB

AUDI0 MEDIA:
File formats: AIFF, WAV, XMF, MP3
Bit rate: minimum 96 kpbs–maximum
320 kbps Codec: aiff, wav, au
File size: under 10 MB

VIDEO MEDIA
File formats: 3GP, WMV, AVI, MOV, ASF, MPG, MP4, M2T, MKV, M2TS
Resolution: minimum 640 x 480, maximum 1920 x 1080
Aspect ratio: 4:3 or 16:9
Bit rate: recommended above 240 kbps
Frame rate: minimum 12 fps, recommended 30 fps.
Codec: h.264, h.263, mpeg-1, mpeg-2, mpeg-4, Windows Media Video, and motion jpeg mpeg-1 muxed, Apple Lossless Container: 3gp, asf, avi, mov, mpeg, mpeg-2, mp4, ogg
File size: under 100 MB

Currently, linked media from YouTube, Vimeo, etc. is not accepted. Please use upload-ready media files only.

Program of Study

Students admitted into the Master of Fine Arts degree program pursue tracks in graphic design or studio art. Students are expected to maintain full-time enrollment throughout the degree program. A grade of “A” or “B”
is required in course work applied toward the degree. After earning grades of “C” or below in two courses during their degree program, students will be dismissed from the program.

Degree Requirements: 60 Credit Hours

Major Studio Concentration in Graphic Design: student develops the conceptual and strategic characteristics of their personal design work in studio coursework that explores current trends and essential competencies in contemporary graphic design.

Total Credit Hours 60

Required Participation in Faculty Review of Creative Work Throughout Program

- Graduate Semester Critiques: Present two to four works in one critique per semester during (Year 1 Fall and Spring; Year 2 Spring);
- Third Semester Review: Faculty Review of body of work during (Year 2 end of Fall);
- Graduate Research Symposia Poster Presentation (Year 1, 2, 3 Spring);
- Preparation of MFA Thesis Exhibition with Gallery Director (Year 2 Spring);
- Written Support Document reflective of thesis body of creative work;
- Presentation of hardbound thesis monographs to a. Thesis Chair and b. Department of ART Archives;
- Oral Defense of Thesis Exhibition/Written Text

Thesis Exhibition, Support Text, Oral Defense

Completed during the last two semesters of a student’s program, the thesis exhibition, support paper and oral defense of exhibition and paper is the culmination of the MFA graduate degree. The student’s thesis exhibition represents a sound-body of contemporary artwork, presented professionally. The written support text adheres to the College of Graduate Studies guidelines and explains the historical and theoretical foundations for the student’s creative body of visual artwork. The student acknowledges and defends their accomplishments during the oral defense of exhibition and written support text.

College of Liberal Arts and Social Sciences
Department of Communication Arts

The Professional Communication and Leadership degree focuses on written and verbal communication within the lens of leadership. It is a degree developed to prepare students as a working professional or for further study in the areas of communication, critical thinking, and leadership. Students of the program become familiar with communication strategies, technical editing, diverse contexts, and leadership in the public arena.

Reflecting the missions of Georgia Southern University and the College of Arts and Humanities, the Communication Arts and Writing and Linguistics departments foster a culture of close engagement with students, combining theory with practice, and extending the learning environment beyond the classroom to promote life-long learning and growth.

Professional Communication and Leadership M.A.

Degree Requirements: 30 Credit Hours

Policies, Requirements and Standards

The Master of Arts in Professional Communication and Leadership is designed to further professional development through coursework in written and verbal communication skills, critical thinking, and leadership. The program is directed toward both traditional and non-traditional students who are either already in the work force or are making the transition from an undergraduate degree to a professional setting. Unlike traditional master’s programs, which focus on developing skills in one specific discipline, the Professional Communication and Leadership program combines the interdisciplinary nature of liberal studies with a practical focus on professional development. Students who have a firm foundation in the arts and sciences are well positioned to advance professionally, but they often need specific skills that are not covered by traditional majors. This M.A. degree is designed to meet that specific need. The M.A. in Professional Communication and Leadership includes a core of courses in organizational communication, professional writing, and leadership, with elective courses available in written communication, small group communication, and conflict resolution, among others.

Admission Standards

Regular Admission

For regular admission the applicant must have:

1. Official transcripts that demonstrate completion of requirements for the baccalaureate degree from a regionally accredited institution. A 2.75 overall grade point average, OR a 2.50 overall grade point average with a minimum 2.75 major grade point average, on all undergraduate work is required.

2. A resume or vita.

3. Two professional letters of recommendation.

Standards of Progression and Graduation

Time Limit

All degree requirements must be completed within seven years.

Program of Study

Students will formalize a program of study with their major advisor. Students are encouraged to apply for graduation two semesters before the anticipated date of graduation. A copy of the official program of study must accompany the candidate’s application. At least fifty percent of the program must be completed at the 6000-8000 levels.

Graduation Requirements

The student must maintain a 3.0 overall average of all graduate courses completed.

Professional Communication and Leadership Post-Baccalaureate Certificate

Certificate Requirements: 15 Credit Hours

Professional Communication and Leadership Post-Baccalaureate Certificate

Certificate Policies, Requirements and Standards

The Graduate Certificate in Professional Communication and Leadership prepares students for workplace communication, critical thinking, and organizational leadership. It is directed toward both working professionals and mature college graduates who are either already in the work force or who are making the transition from an undergraduate degree to a professional setting, and aim to sharpen their communication abilities. At the core of the certificate program are four courses that focus on writing, professional communication, and leadership. From there, students choose one additional specialized course in information design, psychology, leadership, or communication to complete the 15 credit hours.

Admission Standards

- Official transcripts that demonstrate completion of requirements for the baccalaureate degree from a regionally accredited institution. A 2.75 overall grade point average, OR a 2.50 overall grade point average and a minimum 2.75 major grade point average, on all undergraduate work is required
- Official transcripts
- A resume or vita
- A Letter of Intent. A writing sample of 200-500 words that describes how a Graduate Certificate in Professional Communication and Leadership would help you meet your personal and professional goals. This essay may include a discussion of any weaknesses in your academic record.
- Two professional letters of recommendation

Standards of Progression and Graduation

Time Limit

All degree requirements must be completed within seven years.

Program of Study

Students will formalize a program of study with the program coordinator. Students are encouraged to apply for graduation in the semester before the anticipated date of graduation. A copy of the official program of study must accompany the candidate’s application. At least fifty percent of the program must be completed at the 6000-8000 levels.

Graduation Requirements

The student must maintain a 3.0 overall average of all graduate courses completed.

Spanish M.A.

Degree Requirements: 30 Credit Hours

Admission Requirements

Regular
1. Completed requirements for the Bachelor’s degree in a college accredited by the appropriate regional accrediting associations or a Ministry of Education approved institution if an international student.
2. A 3.0 (4.0 scale) cumulative grade point average or higher on all upper-division undergraduate work in which the language of instruction was Spanish.
3. An undergraduate major or the equivalent in the proposed field of study or permission of the graduate director and the chair of the department.
4. Two letters of recommendation by persons familiar with the applicant’s academic experience.
5. Minimum oral and writing proficiency ratings of Intermediate High (ACTFL Standards) as determined by a trained ACTFL Proficiency evaluator (the department has trained evaluators).

Provisional

Students who do not meet the requirements for regular admission may appeal to the departmental graduate director for provisional admission.

Program of Study

Candidates for the M.A. in Spanish must complete a total of 30 credits. The hours are divided as follows:

24 credit hours of graduate-level course work in Spanish

six (6) credit hours in Spanish or in a related field (approved by the graduate director) ¹

Total Credit Hours

30

¹ Note: a maximum of twelve (12) credit hours at the 5000G level may count toward the degree

Other Program Requirements

Comprehensive Exams

All degree candidates will take comprehensive written and oral examinations.

Students who fail the Comprehensive Exams may appeal to retake the exams one additional time. Students must retake the Comprehensive Exams within one year of their original attempt. Under no circumstances may the Comprehensive Exams be taken a third time. Students do not need to be enrolled in courses in order to retake the Comprehensive Exams.

Dual Enrollment in the M.A. in Spanish and the M.A.T. in Spanish (45 Credit Hours)

Students may elect to dual enroll in the M.A. in Spanish and the M.A.T. in Spanish programs (P-12 Education with Teaching Field in Spanish). Students can complete the requirements of the M.A. and certify at the same time. Students must meet the admission requirements for both programs in order to be dual enrolled.
M.A.T Admission Requirements in Addition to the M.A.

- Hold a bachelor's degree from a regionally accredited institution.
- Present a transcript evaluation by the College of Education's Director of the Graduate Academic Services Center, and completion of specified prerequisite content course work.
- Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
- Present a total adjusted GPA of 2.75 or higher on all teaching field course work.
- For Study Concentration Four (Spanish), candidates are not required to take either the MAT or the GRE; rather, they must pass an Oral Proficiency Interview and a Writing Proficiency Test in Spanish at the ACTFL-defined IH or above (tests administered by the Department of Foreign Languages).
- Submit passing scores on the GACE Program Admission Assessment exam or be exempt by acceptable SAT, ACT, or GRE scores.
- Submit a passing score on the GACE Content Assessment in the area for which one is seeking certification.
- Complete the state-required Georgia Educator Ethics--Program Entry (350) assessment. A minimum score is not required.
- Qualify for a Georgia Pre-Service certificate or Induction Pathway 4 certificate (see Certification section in the Graduate Catalog).
- Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant's reasons for pursuing graduate study and how admission into the program relates to the applicant's professional aspirations.
- Acknowledge "Disclosure and Affirmation" statements that address the Code of Ethics for Educators and the need for tort liability insurance.
- International applicants and U.S. citizens whose native language is not English must demonstrate competence in English. Applicants must pass an Oral Proficiency Interview and a Writing Proficiency Test in English at the ACTFL-defined IH or above (tests administered by the Department of Foreign Languages).
- If an applicant was previously enrolled in an initial teacher preparation program, an interview must be completed with the Program Coordinator prior to admission to the program.

Prerequisite

Students must take Foundations of Technology-Enabled Learning either as an undergraduate (ITEC 5233) or as a graduate (ITEC 5233G) (this course may also be taken concurrently with Step One below). Students may pursue the M.A. while awaiting official entry into the M.A.T. program.

Department of History

The graduate programs in the Department of History (M.A. in History, Certificate in Public History) are designed to serve the diverse needs of graduate students, whether they seek a solid grounding in graduate study as preparation for entry into doctoral programs, wish to earn a degree as part of their professional development, or are interested in pursuing careers as public historians, archivists, or librarians.

By emphasizing the complexities and interconnectedness of the past, the graduate programs in History seek to instill in students a sense of curiosity and to develop critical thinking, research, communication, and analytical skills — skills relevant to a variety of careers.

Reflecting the missions of Georgia Southern University and the College of Arts and Humanities, the department fosters a culture of close engagement with students, combines theory with practice, and extends the learning environment beyond the classroom to promote life-long learning and growth.

Certificate in Public History

Requirements: 18 Credit Hours

Admission Requirements

Students who wish to obtain the Certificate in Public History need not be enrolled in the M.A. in History program but must still apply and be admitted to the College of Graduate Studies.
Regular
Applicants seeking admission to the Certificate in Public History must have:

1. Completed requirements for the Bachelor’s degree in a college accredited by the proper regional accrediting associations.
2. A 3.0 (4.0 scale) cumulative grade point average or higher on all undergraduate work, with a 3.0 cumulative GPA in history and no grade in history lower than a “C.”
3. An undergraduate major or the equivalent in history. Students with majors in other fields of study are given equal consideration for admission providing they either have
   a. three years of history-related professional work experience OR
   b. at least 15 credits (or quarter-system equivalent) of history (at least 12 credits at the upper division level and a total of 30 credits in the social sciences and humanities).
4. Two letters of recommendation by individuals who are familiar with the applicant’s potential for successful graduate study.
5. A statement of purpose (approximately 250 words) outlining the applicant’s interest in graduate study in public history.

Provisional
Non-traditional students and applicants not meeting the above requirements may be considered for Provisional (Probationary) admission as determined on a case-by-case basis.

History M.A. (Concentration in Public History)

Degree Requirements: 33 Credit Hours

Application Deadlines
February 1, for Fall enrollment applications. Although later applications will be considered, applicants meeting this deadline will be given priority consideration for available graduate assistantships.

Admission Requirements

Regular
Applicants seeking admission to the graduate program in history must have:

1. Completed requirements for the Bachelor’s degree in a college accredited by the proper regional accrediting associations.
2. A 3.0 (4.0 scale) cumulative grade point average or higher on all undergraduate work, with a 3.0 cumulative GPA in history and no grade in history lower than a “C.”
3. Minimum Graduate Record Examination (GRE) scores of 550 Verbal plus 500 Quantitative or 4.0 Analytical Writing for applicants who took the GRE prior to August 2011; or minimum scores of 156 Verbal plus 144 Quantitative or 4.0 Analytical Writing for applicants who took the exam after July 31, 2011. Lower test scores may be considered but the applicant will need strong evidence of the ability to perform satisfactorily in graduate level work.
4. An undergraduate major or the equivalent in history. Students with majors in other fields of study are given equal consideration for admission providing they have at least 15 credits (or quarter-system equivalent) of history (at least 12 credits at the upper division level) and a total of 30 credits in the social sciences and humanities.
5. Two letters of recommendation by individuals who are familiar with the applicant’s potential for successful graduate study.
6. A statement of purpose (approximately 250 words) outlining the applicant’s interest in graduate study in history.

Provisional
Non-traditional students and applicants not meeting the above requirements may be considered for Provisional (Probationary) admission as determined on a case-by-case basis.

Program of Study

The department offers thesis and non-thesis options and a concentration in public history.

The degree candidate for a Master of Arts in History will take 27 credits of course work (out of a total of 33), which includes the following:

Program of Study

The department offers thesis and non-thesis options and a concentration in public history.

The degree candidate for a Master of Arts in History will take 27 credits of course work (out of a total 33), which includes the following:

General Requirements

Electives 12
Four history elective courses (at the 5000G-level or above)

Total Credit Hours 33

1 Students who enter the History M.A. program with a concentration in Public History after having completed the Graduate Certificate in Public History will substitute an additional Reading Seminar for Research Prospectus.

2 Internships are 150 hours.

3 This course concludes with a 6,000-10,000 word technical report on the final project that is defended orally before a committee. With the permission of the Director of Graduate Studies this course may be completed simultaneously with the Professional Internship in History.

4 One seminar must be outside the candidate’s field of concentration.

Other Program Requirements

- The student must also pass a reading-knowledge examination in an appropriate foreign language. (Prior completion of coursework in a foreign language through the fourth semester at the intermediate level with a grade of C or better shall exempt students from the foreign language exam.)

- The student must also pass an oral defense of the non-thesis project in public history.

- Two elective courses may be taken outside of the Department of History.

- The College of Graduate Studies limits independent study to 6 credit hours.

History M.A. (Non-Thesis)

Degree Requirements: 33 Credit Hours

Electives 12
Four history elective courses (at the 5000G-level or above)

Total Credit Hours 33

1 At least one seminar must be outside the candidate’s field of concentration. A seminar in Public History meets this requirement.

2 As part of this course, the candidate will produce an article-length paper (approximately 10,000 words) that is defended orally before a committee. Students pursuing the Graduate Certificate in Public History simultaneously with the Non-Thesis Option substitute HIST 7900 Non-Thesis Project in Public History.

Other Program Requirements

- The student must also pass a reading-knowledge examination in an appropriate foreign language. (Prior completion of coursework in a foreign language through the fourth semester at the intermediate level with a grade of C or better shall exempt students from the foreign language exam.)

- The student must also pass an oral defense of the non-thesis project.

- Two elective courses may be taken outside of the Department of History.

- The College of Graduate Studies limits independent study to 6 credit hours.

**Department of Literature**

The graduate program in English leads students to the Master of Arts in English degree. It prepares its students for a variety of careers in publishing, public relations, teaching, and advanced doctoral work. Students who enroll in the Master of Arts program in English enjoy the engaging atmosphere of graduate study and work closely with faculty members. The program fosters a genuine sense of community while providing students with a range of professional development opportunities, which is unusual for a graduate program of its size.

The faculty of the program are all published scholars with a wide variety of specialties. The program is dedicated to excellence in teaching and the development of a fertile learning environment, which is exemplified by a free exchange of ideas, high academic expectations, and individual responsibility for academic achievement.

In keeping with the broader institutional vision:

1. We create learning experiences of the highest quality, informed by our individual scholarly practice, research, and creative activities.
2. We offer a student-centered environment enhanced by technology and transcultural experiences.
3. We seek to instill the core values of integrity, civility, kindness, collaboration, and a commitment to lifelong learning, wellness, and social responsibility.
4. We prepare our students to achieve academic excellence, develop their analytic skills, enhance their creativity, and embrace their responsibilities as citizens of their communities, their nations, and the world.

Degree Requirements: 36 Credit Hours

Admission Requirements

Regular
1. Completed requirements for the Bachelor's degree in a college accredited by the appropriate regional accrediting associations.
2. A 3.0 (4.0 scale) cumulative grade point average or higher on all undergraduate work.
3. Graduate Record Examination (GRE) scores.
4. An undergraduate major or the equivalent in the proposed field of study.
5. Two letters of recommendation by persons familiar with the applicant’s academic experience.
6. A sample of the applicant’s scholarly writing of at least 12-15 pages.
7. Statement of Purpose (250-500) words. This statement should address the applicant’s academic achievements and major accomplishments, contributions to or experiences in this field of study, pertinent extra-curricular activities, and the reasons why he or she wishes to attend Georgia Southern. While the personal statement is only one of many factors the graduate admissions committee considers when making admission decisions, it helps provide context for the rest of the application.

Provisional
Provisional admission is sometimes possible if a candidate has a 2.75 (4.0 scale) or higher cumulative grade point average on undergraduate college work. Students who do not meet provisional requirements may appeal to a departmental graduate committee for admission.

Thesis
Thesis (see below for more information) 5

In cooperation with a thesis advisor and committee, the student will write an M.A. thesis of 10,000-12,000 words, not counting Notes and Works Cited. (With the approval of the thesis director, the student may write a longer thesis.) The student must pass an oral examination consisting of a discussion of the thesis and of questions related to it. In depth and scope, the thesis must demonstrate originality in research as well as independent and critical judgment in interpreting materials. The major professor shall supervise the research, direct the writing of the thesis, and in consultation with the second and third readers, approve the thesis in its final form. See the Graduate Student Manual for additional Thesis information. Prior to beginning the thesis, the student should have the supervisor complete a thesis Prospectus Form to be approved by the department and the Graduate College. For more information, consult the M.A. English web page at on the College of Arts and Humanities website.

Department of Music

The graduate programs in Music (M.M. Music, Certificate in Music Performance) prepare students with advanced technical and artistic skills for a career in a music-related profession, to conduct creative work, inquiry, and investigation, and to act independently as a performer, scholar, and/or practitioner by achieving in-depth knowledge and competency in a specific concentration area. This will be accomplished through a program of study with concentration areas in composition, conducting, music education, music technology, and/or performance as appropriate to the goals and aspirations of the student.

The MM program supports the college and university missions as it aims to create a culture of student engagement that bridges theory with practice, extends learning beyond the classroom, and promotes academic excellence and student success. This degree is designed for individuals with a Bachelor’s Degree in Music who would like to hone their musical skills to a higher level, to pursue a post-baccalaureate degree for professional advancement, or to prepare for admission to a Doctoral program in music.

The Certificate in Music Performance program offers a one-year, intensive post-baccalaureate experience in performance. It is intended for students who want more training in applied music after the bachelor’s degree, but who do not desire an advanced degree.

Note: Graduate programs in the Department of Music are available only on the Statesboro Campus.

Programs

Master’s
- Music M.M. (Concentration in Composition) (p. 304)

Certificate in Music Performance

Program
The graduate Music Performance Certificate program consists of 14 credits devoted to acquiring advanced performance skills through intensive work in applied lessons and solo/ensemble performance. It may serve as either a self-standing advanced capstone experience that builds on an undergraduate music performance degree or the certificate credit may transfer toward filling the requirements of Master of Music degree with a concentration in Music Performance provided that the student meets all admission requirements for the M.M.

Admission Requirements
Prospective students must be admitted by the College of Graduate Studies as a Non-Degree Certificate student, satisfying the following requirements:

1. Completion of a Bachelor's degree in music or its equivalent with a minimum 2.7 cumulative GPA or its equivalent.
2. A satisfactory audition. Please see the audition process and requirements for specific performance areas at http://class.georgiasouthern.edu/music/applications/graduate-application/.
3. Submission of official copies of all undergraduate and, if appropriate, graduate transcripts.
4. Two letters of recommendation from professionals acquainted with the student's performance abilities and experience.
5. A personal statement that includes a description of career goals and reasons for applying to the graduate Music Performance Certificate program. Prospective students should indicate in this statement whether they intend to proceed to the M.M. degree following the certificate or whether they intend to complete it as a self-standing program. Students who intend to proceed are required to formally apply for acceptance to the M.M. while completing the certificate, and they must meet the normal M.M. admission requirements in order to be considered for acceptance.
6. International students whose first language is not English and whose undergraduate degree was not completed at an institution where the primary language of instruction was English must have official TOEFL or IELTS scores submitted directly from the Testing Service to Georgia Southern University. For consideration to be admitted to the certificate program, a minimum TOEFL score of 70 or a minimum IELTS score of 6 is required. In order to continue to the M.M. degree at the completion of the certificate, a minimum TOEFL score of 80 with subscores of at least 20 in both speaking and writing is required, or an IELTS score of at least 6.5, with no single subscore below 6.0. International students who meet all other admission requirements for the certificate but are deficient in English will normally be conditionally admitted. Conditionally admitted students must successfully complete the highest level in the university’s English Language Program (ELP) and achieve a minimum score of 70 on the ELP’s standardized English proficiency exam prior to matriculating into the certificate program and taking any music classes and a minimum score of 80 prior to matriculating into the M.M. program.

Music Theory Proficiency for Students Intending to Continue to a M.M. Degree

Students declaring an intention to continue to a M.M. degree will be given the M.M. Departmental Entrance Exam at the beginning of their certificate program. If the score on the theory section falls below the passing level, they will be required to either take undergraduate music theory courses or to participate in a graduate theory review course, typically during Fall semester, so they are able to enroll in all courses required for the MM program upon admission. None of these remedial courses count toward the certificate.

Music M.M. (Concentration in Composition)

Degree Requirements: 33 Credit Hours

Admission Requirements

Regular
1. A completed bachelor's degree in music or equivalent.
2. A minimum 3.0 (4.0 scale) cumulative grade point average in undergraduate work.
3. Two letters of recommendation by individuals who are familiar with the applicant's potential for successful graduate study.
4. Requirements pertinent to the student's intended area of concentration:
   a. Composition: satisfactory sample scores for at least three different types of compositions
   b. Conducting: a successful audition (please see the audition process and requirements for specific performance areas at http://class.georgiasouthern.edu/music/applications/graduate-application/) and a satisfactory agreement with the conducting faculty committee about how the practical conducting requirement will be managed. Generally, full-time students will be assigned to work with various University ensembles; other students may request permission to work with an ensemble (such as a school band or choir) with which they are currently involved.
   c. Music Education: Level 4 certification by the State of Georgia or its equivalent
   d. Music Technology: a statement of purpose and a portfolio of previous work in music technology.
   e. Performance: a successful audition (please see the audition process and requirements for specific performance areas at http://class.georgiasouthern.edu/music/applications/graduate-application/).
5. International students whose first language is not English and whose undergraduate degree was not completed at an institution where the primary language of instruction was English must have official TOEFL or IELTS scores submitted directly from the Testing Service to Georgia Southern University. For consideration to be admitted to the M.M. program, a minimum TOEFL score of 80, with subscores of at least 20 in both speaking and writing is required, or an IELTS scores of at least 6.5, with no single subscore below 6.0. International students who meet all other admission requirements but who are deficient in English will normally be conditionally admitted. Conditionally admitted students must successfully complete the highest level in the university's English Language Program (ELP) and achieve a minimum score of 80 on the ELP's standardized English proficiency exam prior to matriculating into the M.M. program and taking any music classes. ESL exit level for these students is a MTLEP score of 255, with no subsection lower than 80.

Provisional
Students may be admitted, at the discretion of the graduate admissions committee, on a provisional basis if one or more of the requirements listed above are judged to be marginal. Specific provisions for exiting provisional status will be set in each case by the admissions committee and must be satisfied before proceeding past the first 12 credits of course work.

Departmental Entrance Examination
All students entering the program must pass a Departmental Entrance Examination to demonstrate acceptable undergraduate-level proficiency in music theory, analysis, and history. This examination is administered online prior to the start of the student's first semester, and details about the contents of the test and its administration will be sent to each student after s/he has been admitted. Students who do not pass the examination will be required to take a review course and may not take Advanced Analytical Techniques (MUSC 7331) until they have passed the review course. Students who cannot pass the review course will be dropped from the program.

All M.M. candidates are required to pass a comprehensive oral examination, covering coursework and their recital or final project.

**Department of Writing and Linguistics**

The Department of Writing and Linguistics, in conjunction with the College of Education, offers an online certificate program in Teaching English to Speakers of Other Languages (TESOL) with an emphasis in Applied Linguistics.

Writing and Linguistics also teaches courses in the Master of Arts in Professional Communication and Leadership program on both the Armstrong and Statesboro campuses. The MA PCL program is directed by the Department of Communication Arts.

**Programs**

**Master’s**

**Endorsements**

No results were found.

**Teaching English to Speakers of Other Languages (TESOL)/Applied Linguistics Certificate (Online)**

**Requirements: 18 Credit Hours**

**Admission Requirements**

**Regular**

A student normally must have the following items in his or her portfolio:

1. Completed requirements for the Bachelor's degree in a college accredited by proper regional accrediting association or the equivalent at a recognized international university.
2. A 2.75 (4.0 scale) cumulative grade point average in undergraduate work.
3. Regular admission is typically offered to applicants who fulfill criteria set by the College of Graduate Studies (COGS). Note: Applicants to graduate certificate programs do not submit GRE scores.
4. Three (3) letters of recommendation from persons familiar with the applicant's academic or employment experience.
5. Statement of career goals and objectives.

**International Students**

In addition to the items above, international students for whom English is not a first or native language must have the following TOEFL scores:

1. Paper Based Test - score of 600 or higher and TWE (Test of Written English) - score of 5 or higher; or
2. Internet-based Test (iBT) - Reading: 22 or higher ("high"); Listening: 22 or higher ("high"); Speaking: 26 or higher ("good"); Writing: 24 or higher ("good") for a total score of 94 or higher.

The TOEFL will be waived for students who have graduated from a U.S. college or university.

**Recommended Background**

Individuals applying to the Graduate Certificate program should have an interest in education and language study developed through work in disciplines including but not limited to education, English, foreign languages, linguistics, or writing or complementary areas in the humanities or social sciences.

**Program of Study**

The Graduate Certificate program requires a total of 18 credits and is offered fully online. It takes a total of one year to complete the six-course sequence.

**Secondary P-12 Education Programs**

Students who plan to seek teacher certification after completion of their undergraduate degree may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. Students interested in a Secondary Education (grades 6-12) certification in English, History, Political Science, and Writing and Linguistics or in P-12 (grades preschool-12) certification in Spanish should contact their departmental advisors OR the College of Education Student Success Center for information related to content and certification requirements.

*NOTE:* GACE Program Admission Assessment and GACE Content Assessment examination and 2.5 cumulative GPA requirements must be met for certification program admission and should be considered during enrollment in the bachelor's program.
Behavioral and Social Sciences

The College of Behavioral and Social Sciences was established July 1, 2018. It is comprised of the School of Human Ecology and Departments of Criminal Justice and Criminology, Political Science and International Studies, Public and Nonprofit Studies, Psychology, and Sociology and Anthropology.

The College offers 13 undergraduate degrees and five graduate degrees.

Mission

The College of Behavioral and Social Sciences is an interdisciplinary community of teacher-scholars who utilize varieties of social and behavioral research methodologies to enhance societal well-being and the quality of life of individuals, families, and communities across diverse environments and contexts.

The mission of the college is to prepare students to be productive citizens and contributing members of an ever-changing and complex society through the rigorous development of analytical skills, enhanced understanding of individual and collective behavior, culturally inclusive theory and professional work, and experiential learning that applies theory to policy and practice. To that end, faculty and students engage in cutting-edge research and creative scholarship to expand knowledge and understanding in the world. Additionally, through local, state, national, and international service and advocacy, college faculty, staff, and students work collaboratively to strengthen their communities.

The College of Behavioral and Social Sciences provides transformative experiences that extend learning from the classroom to the laboratory, studio, and community. As a result, graduates develop skills in ethics, critical thinking, problem-solving, creativity, and communication that prepare them for rewarding careers, lifelong learning, and engaged global citizenship.

Department of Criminal Justice and Criminology

The Department of Criminal Justice and Criminology offers two degree programs structured both for students seeking careers or professional advancement in the criminal justice field and for students who ultimately wish to pursue an advanced degree in criminal justice and/or criminology. The degrees are offered through various formats to enhance availability to students. As well, a variety of concentrations are offered to prepare students to work in traditional arenas of criminal justice and criminology, as well as emerging focuses in the field, specifically cybercrime.

Students in the M.S. in Criminal Justice and Criminology program can choose to focus on one of three concentrations: Criminal Justice, Criminology, or Cybercrime. The Criminal Justice concentration is available in both traditional and online tracks. The Criminology Concentration is available only via the traditional track, while the cybercrime concentration is available only via the online track.

Also available to students is the Post-Baccalaureate Certificate in Cybercrime. This Certificate may be completed fully online, however some traditionally formatted courses are classified to meet the requirements of this certificate. All courses in the Cybercrime Certificate program may be applied to the online cybercrime concentration of the M.S. with a major in Criminal Justice and Criminology.

Criminal Justice and Criminology M.S. (Emphasis in Criminal Justice)

Degree Requirements: 36 Credit Hours

Admission Standards

Regular Admission

Admission to this program is competitive. At a minimum, for regular admission the applicant must have:

1. A Bachelor's degree from an appropriately accredited, four-year institution in criminal justice/criminology or related field (that adequately prepares students for success in this field. This application requirement will be waived for applicants who successfully complete the Post-Baccalaureate Cyber Certificate.)
2. A 2.75 cumulative grade point average or higher on completed requirements for a baccalaureate degree from an accredited institution. (This application requirement will be waived for applicants who successfully complete the Post-Baccalaureate Cyber Certificate.)
3. Minimum GRE scores of 146 on the verbal section and 145 on the quantitative section or between a 3.5-4.0 on the analytical section. (This application requirement will be waived for applicants who successfully complete the Post-Baccalaureate Cyber Certificate.)
4. Letter of Application detailing: a) academic background and/or professional credentials, b) relevant research and work experience, c) career goals and reasons for enrollment in this program.
5. Two letters of recommendation addressing the applicant's: 1) academic work; 2) professional experience, if any; 3) ability to handle master's level curriculum, and 4) how the applicant can be expected to contribute to the program. (This application requirement will be waived for applicants who successfully complete the Post-Baccalaureate Cyber Certificate.)

Provisional Admission

Applicants who meet two out of the three requirements outlined for GPA and GRE scores may be granted provisional admission by the graduate faculty committee based on careful review of additional materials submitted.

Reclassification

A student may be reclassified with regular admission providing that they have completed three program or related courses (9 hours), approved by their advisor, with a grade of no less than B. Additional courses may be required to be completed prior to a student's reclassification that do not contribute to these nine hours (such as taking an undergraduate statistics course to prepare for graduate statistics). No more than nine hours may be earned under the provisional admission classification. After nine hours, the student must either be reclassified as a regular admission student or be removed from the program.

Prerequisites for Admission

While an undergraduate degree in criminal justice is not a prerequisite to admission, newly admitted students must be deemed adequately prepared for graduate study in this essentially multidisciplinary area. Students who lack the necessary background may be required to complete additional undergraduate coursework. For example, students who have not successfully completed an undergraduate statistics course may be required to do so prior to enrollment in graduate statistical analysis or research methods courses.

Standards of Progression and Graduation

A. Graduate students must maintain a 3.0 overall grade point average in all graduate courses. A student will be placed on academic probation if he or she earns one (1) C or below. If a student earns two (2) Cs or below, the student will be dismissed from the program. There is a one (1) semester waiting period after the first C is earned so that the student has the opportunity to replace the grade and get the GPA back to a 3.0. The student may repeat a class only once to replace a grade.

B. Each student must file a program of study and an application for graduation with Graduate Studies. Fifty percent of the program of study must be completed at the 6000-8000 levels.

C. If any change in the approved program of study is required, an amended program of study, signed by the student and advisor, must be submitted to Graduate Studies.

D. Satisfactory completion of a written comprehensive assessment one semester prior to graduation for the coursework option students is required. Students choosing the thesis option must receive a satisfactory score on a formal thesis defense. Students completing practicum must receive a passing grade on the paper required for completion of the course.

E. Students are encouraged to apply for graduation two semesters before the anticipated date of graduation. Note: A copy of the official program of study must accompany the candidate’s application.

F. All degree requirements must be completed within seven years.

Program of Study

The program is offered via two different tracks. The traditional track primarily is offered in a seated format, with some opportunities to take hybrid or online courses. The online track allows students to complete the degree requirements utilizing an online delivery method. Students will opt into one of three emphases, depending on the track they select.

- CRJU 7434 Quantitative Research Design
- CRJU 7436 Qualitative Research Design
- CRJU 7437 Statistics for Social Science

or other analytical tools course as approved by advisor and program coordinator.

Advanced Work

- Select a second research/analysis tools course (approved by advisor).
- In conjunction with their advisor and program coordinator, select the final 15 hours of advanced coursework for the emphasis:

Criminal Justice Emphasis

Two criminal justice electives, one criminology elective, and two free electives (traditional and online tracks).

Capstone Options

- Students select from three capstone options to complete their final 6 hours of the program:

Thesis Option:

Recommended for students who seek to do research for public and non-profit agencies or who seek further educational opportunities, such as a Ph.D. Students must pass the thesis defense.

Practicum:

Recommended for students who seek employment in the justice system or adjacent systems’ agencies. Students will complete an internship, approved by their advisor and the program coordinator, completing all tasks associated with the internship option. Students will complete a comprehensive paper as part of this course, and must earn a passing grade on this paper.

Free Electives:

Recommended for students who seek additional substantive information relative to their career track. Specific courses must be approved by their advisor and the program director. Students selecting this option must earn a passing grade on a comprehensive exam.

Total Credit Hours: 36

Cybercrime Post-Baccalaureate Certificate

The Cybercrime Certificate is a post-baccalaureate certificate program that may be completed fully online. However, some courses available in the traditional format also are classified to meet requirements within this certificate program. This program provides students with specialized skills in cybercrime and digital forensics. All courses in the cybercrime certificate program may be applied to the online cybercrime concentration of the Master of Science with a major in Criminal Justice and Criminology.

The Cybercrime Certificate is the only one of its kind offered in this region.

Degree Requirements: 18 Credit Hours

Admission Standards

Regular Admission

Admission to this program is competitive. At a minimum, for admission to the certificate program, the applicant must have:

1. A baccalaureate degree from an appropriately accredited four-year institution (with a major that adequately prepares students for success in this field).
2. A minimum of 2.75 overall undergraduate GPA.
3. A letter of application detailing: a) academic background, b) relevant experience, c) career goals and objectives relative to enrollment in this program.
4. A current resume providing details of relevant education and work experience.

Provisional Admission

Applicants who meet two out of the three requirements outlined for GPA and GRE scores may be granted provisional admission by the graduate faculty committee based on a careful review of additional materials submitted.

Reclassification

A student may be reclassified with regular admission providing that they have completed two program or related courses (6 hours), approved by their advisor, with a grade of no less than B. Additional courses may be
required to be completed prior to a student’s reclassification that do not contribute to these nine hours (such as taking an undergraduate statistics course to prepare for graduate statistics). No more than nine hours may be earned under the provisional admission classification. After nine hours, the student must either be reclassified as a regular admission student or be removed from the program.

**Standards of Progression and Graduation**

**Department of Psychology**

The Department of Psychology offers two graduate programs: the M.S. in Psychology and the Psy.D. in Clinical Psychology.

The Master of Science (M.S.) program in Psychology produces graduates who are knowledgeable in specific content areas of psychological science as well as skilled in conducting independent research. Guided by psychological science and a dedication to preparing students for a psychology (or psychology-related) doctoral program, college teaching, or other employment within the social sciences, the department faculty provide graduate students with rigorous coursework and opportunities to engage in one-on-one research collaborations and pedagogical instruction.

The Doctor of Psychology (Psy.D.) program in Clinical Psychology trains doctoral-level professional psychologists to practice psychotherapy and assessment skills in underserved rural areas. This training is accomplished through coursework, as well as practica, capstone activities, and internship experiences. The Psy.D. program is directly involved in providing health care and human services in the region, both by educating practitioners of applied psychology who have voiced a dedication to continuing practice in rural areas and by offering practicum experiences in which students provide clinical service to those in our predominantly-rural region.

The Psy.D. program is accredited by the American Psychological Association (APA).

**Endorsements**

**Clinical Psychology Psy.D.**

**Degree Requirements: 114-124 Credit Hours**

114 Credits beyond Bachelor’s degree including dissertation; 98 credits of coursework

**Program Mission**

The Psy.D. program in clinical psychology at Georgia Southern University offers a course of study leading to the Doctor of Psychology degree. The Program’s curriculum prepares graduates to practice psychology in rural areas.

**Model and Goals**

Critical to the program is high quality graduate education and training in clinical psychology with an emphasis on psychotherapy, assessment, and consultation in clinical practice. To this end, the Psy.D. program has a clear and coherent curriculum. The training for practice is lock-step, sequential, cumulative, and graduated in complexity. The program follows the practitioner-scholar model. In the first year, students take didactic courses concurrently with experiential skill-building courses. The psychological assessment sequence is also offered in the first year. In the second year, students begin the Practicum experience. The third and fourth years include practica focused on rural practice (3rd year) and professional development (4th year). Other clinical courses are interspersed among years one through four.

The program trains students to become generalists who practice psychotherapy, conduct psychological assessment, and provide consultation services. The program has an integrative orientation, emphasizing behavioral, cognitive, existential, family systems, humanistic, and psychodynamic orientations.

The following goals and objectives are consistent with APA standards and have been adapted from the recommendations of the NCSPP model for clinical training:

The following competencies and aims are consistent with APA standards and definitions are taken directly from the Commission on Accreditation, Implementing Regulations, Section C:

**Program Competencies, Aims, and Discipline Specific Knowledge**

**A. Profession-Wide Competencies**

1. **Competency 1: Research:** Students will demonstrate the independent ability to formulate research that is of sufficient quality and rigor needed to contribute to the scientific, psychological, or professional knowledge base.
   a. **Aim 1.1:** Students will demonstrate the ability to integrate and critically evaluate published literature.
   b. **Aim 1.2:** Students will demonstrate skills in interpreting and applying basic statistical techniques.
   c. **Aim 1.3:** Students will demonstrate competence in basic research methodologies.
   d. **Aim 1.4:** Students will demonstrate the capacity to develop and complete an empirical study.
   e. **Aim 1.5:** Students will publish or present their research at the institutional, regional, or national level.
2. **Competency 2: Ethical and Legal Standards**: Students will be knowledgeable of and act in accordance with professional ethics.
   a. **Aim 2.1**: Students will demonstrate a commitment to and working knowledge of the ethical code outlined by the American Psychological Association, relevant federal and state statutes and laws, and relevant professional standards and guidelines to guide practice in all professional activities.
   b. **Aim 2.2**: Students will demonstrate the ability to recognize ethical and legal dilemmas as they arise and apply ethical decision-making processes in order to resolve the dilemmas in all professional activities.
   c. **Aim 2.3**: Students will conduct themselves in an ethical manner in all professional activities.

3. **Competency 3: Individual and Cultural Diversity**: Students are expected to conduct all professional activities with sensitivity to human diversity, including the ability to deliver high quality services to a diverse population.
   a. **Aim 3.1**: Students will demonstrate an understanding of how their own personal/cultural history, attitudes and biases may affect how they understand and interact with people different from themselves.
   b. **Aim 3.2**: Students will demonstrate knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities, including research, training, supervision/consultation, and service.
   c. **Aim 3.3**: Students will demonstrate the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities).
   d. **Aim 3.4**: Students will demonstrate the requisite knowledge and ability to articulate an approach to working effectively with diverse individuals and groups, and apply this approach effectively in their professional work.

4. **Competency 4: Professional Values and Attitudes**: Students are expected to respond professionally in ways consistent with the profession of psychology.
   a. **Aim 4.1**: Students will behave in ways reflecting the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.
   b. **Aim 4.2**: Students will engage in self-reflection regarding their personal and professional functioning and engage in activities to maintain and improve performance, well-being, and professional effectiveness.
   c. **Aim 4.3**: Students will actively seek and demonstrate openness and responsiveness to feedback and supervision.
   d. **Aim 4.4**: Students will respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.

5. **Competency 5: Communication and Interpersonal Skills**: Students will demonstrate appropriate communication and interpersonal skills and respond professionally in increasingly complex situations.
   a. **Aim 5.1**: Students will develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.
   b. **Aim 5.2**: Students will produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated.
   c. **Aim 5.3**: Students will demonstrate a thorough grasp of professional language and concepts.
   d. **Aim 5.4**: Students will demonstrate effective interpersonal skills and the ability to manage difficult communication well.

6. **Competency 6: Assessment**: Students will demonstrate competence in conducting evidence-based assessment consistent with the scope of Health Service Psychology.
   a. **Aim 6.1**: Students will demonstrate current knowledge of diagnostic classification systems, functional and dysfunctional behaviors, including consideration of client strengths and psychopathology.
   b. **Aim 6.2**: Students will demonstrate understanding of human behavior within its context (e.g., family, social, societal, and cultural).
   c. **Aim 6.3**: Students will demonstrate the ability to apply the knowledge of functional and dysfunctional behaviors including context to the assessment and/or diagnostic process.
   d. **Aim 6.4**: Students will select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.
   e. **Aim 6.5**: Students will interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.
   f. **Aim 6.6**: Students will communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.

7. **Competency 7: Intervention**: Students will demonstrate competence in the delivery of evidence-based interventions consistent with the scope of Health Service Psychology.
   a. **Aim 7.1**: Students will establish and maintain effective relationships with the recipients of psychological services.
   b. **Aim 7.2**: Students will develop evidence-based intervention plans specific to the service delivery goals.
   c. **Aim 7.3**: Students will implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.
   d. **Aim 7.4**: Students will demonstrate the ability to apply the relevant research literature to clinical decision making.
   e. **Aim 7.5**: Students will modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking.
   f. **Aim 7.6**: Students will evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation.

8. **Competency 8: Supervision**: Students will acquire foundational knowledge regarding supervisory aspects of Health Service Psychology.
   a. **Aim 8.1**: Students will demonstrate knowledge of supervision models and practices.

9. **Competency 9: Consultation and Interprofessional/Interdisciplinary Skills**: Students will learn and demonstrate intentional collaboration with other individuals or groups to address problems, seek or share knowledge, or promote effectiveness in professional activities.
   a. **Aim 9.1**: Students will demonstrate knowledge and respect for the roles and perspectives of other professions.
   b. **Aim 9.2**: Students will demonstrate knowledge of consultation models and practices.

10. **Competency 10: Rurality**: Students are expected to develop an appreciation for the dynamics of a rural culture and how these forces influence individual development and community functioning.
   a. **Aim 10.1**: Students will demonstrate an appreciation for the unique cultural needs, identities, values, and traditions of rural community members.
Specific admissions procedures are as follows:

a. Aim 10.2: Students will demonstrate the ability to integrate knowledge of rural culture into their conceptualization of well-being.

b. Aim 10.3: Students will demonstrate knowledge associated with the role of advocacy in promoting well-being in rural communities.

1. B. Discipline Specific Knowledge: Students will acquire knowledge in the core areas of the discipline of psychology.
   a. DSK.1: Students will demonstrate knowledge of the history of psychology, including the origins and development of major ideas in the discipline of psychology.
   b. DSK.2: Students will demonstrate knowledge in Affective Aspects of Behavior.
   c. DSK.3: Students will demonstrate knowledge in Biological Aspects of Behavior.
   d. DSK.4: Students will demonstrate knowledge in Cognitive Aspects of Behavior.
   e. DSK.5: Students will demonstrate knowledge in Developmental Aspects of Behavior.
   f. DSK.6: Students will demonstrate knowledge in Social Aspects of Behavior.
   g. DSK.7: Students will demonstrate advanced integrative knowledge in scientific psychology that entails integration of multiple basic discipline-specific content areas identified in DSK b-f.
   h. DSK.8: Students will demonstrate knowledge of research methods.
   i. DSK.9: Students will demonstrate knowledge of statistical analysis.
   j. DSK.10: Students will demonstrate knowledge of psychometrics.

Accreditation

Georgia Southern University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). The Clinical Psychology Psy.D. is accredited by the American Psychological Association (APA).

Applying to the Psy. D. program

Although academic background, intellectual potential and professional experience and skills will be key selection criteria, we intend to recruit students who are committed to providing service to our region. Therefore, students should carefully consider their interest in rural and under-served populations before applying to the program. Applicants will only be considered for the Psy.D. program (i.e., students will not be admitted for a terminal masters degree in clinical psychology).

Credit hours for previously taken Courses: Students may be able to substitute credit hours received for taking graduate courses at a regionally-accredited institution during the last five years. A maximum of 18 credits of graduate level coursework is allowed. All decisions on substituted courses lie with the clinical training committee, and course equivalencies will be determined on a case-by-case basis and only after a student has been admitted to the program. In all cases, documentation (syllabi, tests, grades) from the previous course will be required and reviewed by the appropriate program faculty who will document action taken. Transfer credit will not be given for any clinical courses (i.e., courses where clinical theory and/or skills are taught), with the exceptions of Assessment I: Psychometric Theory (PSYC 7231) and Assessment II: Intellectual Assessment (PSYC 7234).

Specific admissions procedures are as follows:

1. Applications will be evaluated once per year for Fall admissions. The deadline for applications is December 31.
2. Applicants will submit an application packet electronically which will consist of all material listed in the Application Checklist. This application can be found at http://cogs.georgiasouthern.edu/gradadmin/applytogradschool.
3. A successful completion of a bachelor’s degree from a regionally accredited institution. Students’ academic record will be evaluated based on official transcripts from all previous enrollments in higher education.
   • The minimum GPA required for consideration is 3.3 (out of 4.0).
   • A minimum grade of “B” in the following undergraduate courses: Psychological Statistics, Research Design, Abnormal Psychology.
   • Record of having taken at least two of the following courses: Personality, Social Psychology, Developmental Psychology, Learning and/or Cognition, Health Psychology, Tests and Measurement, Theories of Psychotherapy, Psychology of Substance Abuse.
4. Record of taking the GRE test within the past 5 years. Average GRE scores for previous successful applicants are available at http://class.georgiasouthern.edu/psychology/psyd/. The GRE Psychology (subject) test is required only for those students who did not earn either a Bachelor’s or a Master’s degree in psychology.
5. Three letters of recommendation from former professors or appropriate employers/advisors.
6. A written statement of professional goals and a rationale for how the Psy.D. program will further the students’ career objectives. The written statement should discuss the fit of previous experiences and/or career goals with the mission of the Psy.D. program to train psychologists to work with rural and under-served populations. Please also include up to three clinical faculty with whom you would be most interested in speaking if invited for an interview.
7. A curriculum vitae.
8. An interview is required.

Part-time Admission and Part-time Status

The Psy.D. program is designed to be a full-time program that can be completed in five years. However, we realize some students may desire to do a portion of the program part-time. To this end, students may be admitted to the program with part-time status. If they wish to do this, the following criteria must be met:

- Students must apply via the same admission procedures as full-time students.
- Students can only begin the program in the Fall semester.
- Students must be admitted with a 18 credits in non-clinical courses (i.e., they must come into the program with the maximum amount of transfer credit).

Once admitted, part-time students must

- Enroll in a minimum of six (6) credits of coursework each semester.
- Be enrolled in the program every semester, unless a Leave of Absence is granted (see below).
- Enroll in necessary co-requisite courses when they are required.
- Enroll in Foundations of Psychotherapy I (PSYC 7232), Foundations & Skills II (PSYC 7433), and Group & Family Therapy (PSYC 7235) in consecutive semesters.
- Switch to full-time enrollment (minimum nine (9) credits per semester) for at least one full year to meet the residency requirement (see program manual for details).
- Complete the Psy.D. program within the 8-year time limit allowed for all students.

Part-time students may switch to full-time status at any point in their training. If a student desires to return to part-time status after being full-time, they must petition the program director.
**Program Requirements**

The program is designed to be a five-year, full-time program for those entering with a bachelor’s degree. The first four years will include coursework and graded practicum experiences. A minimum of one year (12 continuous months) of full-time coursework must be done in residency at Georgia Southern. The fifth year will consist of a full-time (2000 hour) approved internship.

- **Grades:**
  Students are expected to pass all courses with a grade of “A” or “B”. Should a student earn less than a B in any course, he or she is immediately put on probation and must retake the course (and earn an “A” or “B”) the next time the course is offered. Earning a second grade below “B” will result in dismissal from the program.

- **Annual Evaluations:**
  Once a year, students will have an individual meeting with their academic advisor for an evaluation of their progress. The evaluation will assess ongoing development of academic performance and professional skills, ethical judgment and sensitivity, as well as personal attributes or behaviors related to suitability for career in professional psychology. Documented poor performance in any of these areas will be the basis of efforts by the advisor and program faculty to assist the student in forming and completing a plan for improvement; continued poor performance within specified time frames will be the basis for terminating a student’s enrollment in the program.

- **Clinical Qualifying Examination; and Dissertation:**
  Students must successfully complete a Clinical Qualifying Examination at the time specified in their Handbook. This examination requires the student to demonstrate satisfactory skills in assessment, diagnosis, case conceptualization, tracking therapeutic progress, and treatment planning. In keeping with the practitioner-scholar model, the program aims to train practitioners who are grounded in the scholarly inquiry of scientific psychology. By the beginning of the fourth year, it is expected that students have drafted a doctoral dissertation proposal. The project should be conducted during the fourth year. At a minimum, the dissertation proposal is to be written, defended, and approved before applying for the pre-doctoral internship. At an aspirational level, it is highly desirable that students will successfully defend the dissertation project before leaving campus for internship.

- **Practicum:**
  An indispensable component of clinical training is to gain experience providing psychotherapy, assessment, and consultation. To this end, students are required to participate in a graduated series of practicum experiences beginning in the second year. All students are expected to conform to the APA Code of Ethics, Georgia state law, and to the rules of the practicum site. In the second year, students will be placed at internal practicum sites where their progress can be closely monitored. Internal practicum sites consist of the Psychology Clinic, Georgia Southern University Counseling and Career Development Center, and the Regents Center for Learning Disorders. In the third year, all students will be engaged in practicum experiences in rural agencies and/or at agencies that serve predominantly rural clientele. The fourth year of practicum can be at any site, but with a focus on professional development and developing knowledge about clinical supervision and consultation services. Failure to complete practicum successfully will result in remediation or dismissal, depending on the circumstances for the failure, as described in the Psy.D. Program Handbook.

- **Personal Therapy Requirement:**
  In our clinical training, we emphasize the development of the clinician as a person in parity with the acquisition of clinical skills and theoretical knowledge. To this end, we require all students to complete a minimum of 15 sessions of personal psychotherapy with a licensed therapist during their time in the program.

- **Internship:**
  State licensing boards for doctoral level psychologists require candidates for licensure to have completed a one-year, full-time (2000 hour) pre-doctoral internship. The Georgia Southern University Psy.D. program is designed for the Internship to be completed in the fifth year. Students will follow the application process outlined by the Association of Psychology Postdoctoral and Internship Centers (APPIC; www.appic.org).

**Leave of Absence**

Leaves of Absence are discouraged. They can lead to scheduling difficulties because of the sequencing of courses and experiences. However, leaves of absences may be granted to students on petition to do so with the DCT and the Dean of the College of Liberal Arts and Social Sciences or his/her designee. Students who have been granted a leave of absence are responsible for notifying the DCT and the Dean of the College of Liberal Arts and Social Sciences when ready to resume full-time graduate study. Leaves of absence cannot extend beyond one calendar year. Students who do not return after one year of absence will be dismissed from the program.

**Program of Study**

Below are the courses required for the Psy.D. program. A curriculum by year can be found by visiting the Psychology Department’s website at http://class.georgiasouthern.edu/psychology/psyd/files/
Consultation and Supervision

PSYC 7111 Supervision (must take a minimum of 8 times (maximum 9 times)) 1
PSYC 9130 Professional Development 3
PSYC 9131 Supervision and Consultation 3

Clinical Practica

PSYC 7730 Practicum I 3
PSYC 7731 Practicum II 3
PSYC 7733 Combined Practicum Seminar (must take a minimum of 2 times (maximum 3 times)) 3

PSYC 9731 Rural Practicum (must take a minimum of 2 times) 3

Internship

PSYC 9711 Pre-Doctoral Internship I 1
PSYC 9712 Pre-Doctoral Internship II 1
PSYC 9713 Pre-Doctoral Internship III 1

Dissertation

PSYC 9999 Dissertation (Students should take a minimum of 16 hours of dissertation, with a maximum of 26 hours.) 16-26

Total Credit Hours 114-124

Psychology M.S.

Degree Requirements: 36 Credit Hours
Admission Requirements

New students are admitted to the program in Fall semester only. The program is limited to 12 new students.

Regular

The applicant must have:

1. Completed requirements for the Bachelor’s degree in a college accredited by the proper regional accrediting associations.
2. Taken Introduction to Psychology, a statistics course, a research methods course, and at least two additional courses in psychology.
3. A 3.0 (4.0 scale) cumulative grade point average or higher on undergraduate work.
4. Minimum Graduate Record Exam (GRE) scores of 147 on the Verbal section and 146 on the Quantitative section for applicants who took the exam after July 31, 2011.
5. Submitted:
   a. A personal statement that includes a description of career goals, reasons for applying for graduate study at Georgia Southern University, a list of academic achievements, non-academic achievements, relevant work experience, a self-evaluation of maturity level and character. We strongly encourage students to obtain research experience as an undergraduate.
   b. Recommendations from three individuals who can speak of the applicant’s undergraduate academic performance, potential for graduate study, and maturity level and character. At least one letter must be from a faculty member.

Provisional

For applicants who meet two out of three of the following criteria for regular admission (GRE-V, GRE-Q, GPA), provisional admission may be granted by the departmental graduate faculty based on their consideration of the materials submitted by the applicant.

Other Program Requirements

- All students in the MS program must complete an acceptable thesis, including a successful oral defense.
- The program offers an option Teaching Emphasis, which prepares students to potentially serve as Teaching Assistants at University-level. In choosing this option, students will complete Seminar in Teaching Psychology (PSYC 7631) as well as meet other criteria.

Psychology M.S. (Psy.D. Track)

Admission Requirements

As this is a degree that is part of the Doctor of Psychology (Psy.D.) program, only students enrolled in the Psy.D. program are eligible.

Total: 54 Credits

Program Requirements

- All students must have completed the first two years (54 credits) of the Psy.D. program through the Spring semester of the second year and must have successfully completed the Clinical Qualifying Examination.

Department of Public and Nonprofit Studies

The Department of Public and Nonprofit Studies serves as the focal point for scholarship, teaching, and service in the fields of Public Administration and Public Policy. The department was founded with the mission to advance excellence in public and nonprofit management education.

The Department of Public and Nonprofit Studies offers the NASPAA accredited Master of Public Administration (M.P.A.) degree and an online
Certificate in Public and Nonprofit Management. Emphasizing both the theoretical foundations and practical application of the discipline, the Department’s academic programs prepare pre-service students for a career in public service, as well as provide advanced training to mid-career practitioners.

Certificate in Public and Nonprofit Management

Requirements: 15 Credit Hours

Regular Admission Requirements

A student must have the following items in his or her portfolio:

1. Completed requirements for the Bachelor’s degree in a college accredited by proper regional accrediting association.
2. A 2.75 (4.0 scale) cumulative grade point average in undergraduate work.
3. A current resume detailing relevant work experience.
4. Three (3) letters of recommendation from persons familiar with the applicant’s academic or employment experience.
5. Statement of career goals and objectives.

Prerequisite(s)

Individuals applying to the Certificate program must have at least three years of work experience in the public or nonprofit sector, or completed part of their graduate course work in a related field of study.

Program of Study

The Certificate program requires a total of 15 credits and is offered fully online through the Master of Public Administration (MPA) Program. It takes a total of 1 year to complete the five course sequence. Each course runs a period of eight weeks.

After earning the Certificate, students with a cumulative grade point average of at least 3.0 may apply to the MPA program. Successful MPA applicants will receive credit for 15 credits toward their MPA degree. The MPA degree requires a total of 39 credits, whereby, in addition to core management courses, students pursue an area of concentration in public management or nonprofit management.

Public Administration M.P.A.

Degree Requirements: 39 Credit Hours

Admission Requirements

Regular

A student must have the following items in his or her portfolio:

1. Completed requirements for the Bachelor’s degree in a college accredited by proper regional accrediting association.
2. A 2.75 (4.0 scale) cumulative grade point average in undergraduate work.
3. Applicants with an undergraduate GPA of less than 3.0 must submit official scores on the Graduate Record Exam (GRE) or Graduate Management Admission Test (GMAT). Applicants with an undergraduate GPA of at least 3.0 are not required to submit exam scores.
4. A current resume detailing relevant work experience.
5. Three (3) letters of recommendation from persons familiar with the applicant’s academic or employment experience.
6. Statement of career goals and objectives.
7. OR Completion of the Certificate in Public and Nonprofit Management with a cumulative grade point average of at least 3.0 (4.0 scale).

Provisional

In the following circumstances, applicants who do not meet the above criteria may be admitted:

• Provisional admission will be considered for applicants who do not meet one or more of the academic requirements listed above if strong evidence of ability to perform well in graduate work is provided through reference to work experience or other means.

Non-Degree

In cases of incomplete admission applications, an applicant must have an undergraduate GPA of 2.75 and will be restricted to a maximum of three courses without gaining provisional or regular admission status.
Program of Study

The graduate student and the MPA Program Director shall jointly develop a Program of Study that includes 21 credits of core courses, twelve (12) credits of concentration courses, three (3) credits of internship (depending on whether student is pre-service or in-service), and a three (3) credit capstone course.

Department of Sociology and Anthropology

The Master of Arts with a major in Social Science offers students a multidisciplinary curriculum for understanding and investigating the social aspects of human behavior, social structure and culture in a global context. The program emphasizes the wide range of skills and perspectives that students need in order to analyze the historical, cultural, individual, and institutional conditions that shape our lives. We are committed to helping students become informed, responsible, active citizens and ethical workers in diverse communities. Consistent with the University’s mission, the program inculcates a culture of engagement that bridges theory with practice, extends the learning environment beyond the classroom, and promotes student growth.

Students in the M.A. Social Science program develop a program of study in conjunction with their advisor. A student will select an area of concentration within one of three areas - Anthropology, Political Science, or Sociology.

Social Science M.A.

Degree Requirements: 36 Credit Hours

Admission Requirements

Regular

1. An undergraduate degree from an accredited, four-year institution (or a course of study that is the equivalent of such a degree).
2. A statement of purpose expressing student’s aspirations.
3. A favorable review by the Social Science Graduate Admissions Committee. If an applicant’s overall undergraduate GPA is equal to or greater than a 3.0 or if the student already holds an advanced graduate degree, the GRE scores will be waived. Otherwise, GRE scores are required. Consideration is also given to the student’s statement of purpose and potential for succeeding in the program.

Provisional

Non-traditional students and applicants not meeting the above requirements may be considered for Provisional (Probationary) admission as determined on a case-by-case basis.

Elective Courses
A student will develop a program of study in conjunction with their advisor and approved by the graduate Director. A student will select an area of concentration within one of the three areas: Anthropology, Political Science, or Sociology. An area of concentration requires a minimum of 15 credit hours of coursework from within anthropology, political science, or sociology. With the exception of SOCI/ANTH/POLS 6638, core courses can be used to fulfill the area of concentration requirements.

**Terminal Project:**
Select one of the following Tracks

**Applied/Public Service Track**
The applied/public service track is for students who plan to enter applied or public service venues. Students may choose among three terminal projects. (Option 1) Students complete six credit hours of course work that has an applied emphasis (e.g., additional classes in methods, statistics, grant writing, program evaluation, public policy, or field research). Specific courses must be approved by the advisor and graduate director. (Option 2) Students complete an internship approved by the advisor and director. Or (Option 3) students take courses to prepare them for a career in teaching at the community college level.

**Thesis Track**
The research thesis track is strongly recommended for students who plan to continue in graduate or professional education. The thesis may be theoretical or empirical and should represent the student’s knowledge of social science theory, methodology and a substantive area as well as the ability to conduct research. Data for empirical research projects may be qualitative and/or quantitative and primary and/or secondary in nature.

**General Program Requirements**
Students can earn six (6) credits from courses at the 5000G level. Students will craft a program of study which draws from at least two of the three fields of study within the Social Sciences program. Enrollment in courses outside anthropology, political science, and sociology is limited to a maximum of six (6) credits. Courses that are taken to fulfill a prerequisite for admission may not be used to satisfy course credit hour requirements. All students must complete a portfolio to demonstrate the completion of program objectives.

Business

The College of Business at Georgia Southern University is part of a comprehensive, regional university. At the undergraduate level, we provide the Bachelor of Business Administration degree with majors in accounting, economics, finance, information systems, logistics and intermodal transportation, management, and marketing. At the graduate level, we provide the Master of Business Administration, online MBA, Master of Accounting, WebMACC, and online Master of Science in Applied Economics degrees, as well as a Graduate Certificate in Enterprise Resources Planning (ERP), to prepare students for accounting and management positions of significant responsibility. Our degree programs are accredited by the AACSB, an affiliation that underscores the College’s dedication to continuous improvement and commitment to excellence. Our accounting programs hold separate AACS CB accreditation.

Mission

The College of Business seeks to produce career-ready professionals by offering a broad array of high quality undergraduate and select graduate programs within a learning environment characterized by inspired teaching, relevant research, and meaningful service. We search for new knowledge, both theoretical and practical, and insightful learning opportunities for our students, guided by common values of continuous improvement, excellence, integrity, accountability, respect, and sustainability.

Teaching in the College of Business:

We endeavor to prepare career-ready professionals. This motivates our teaching. We equip students with the knowledge, critical thinking skills, and relevant tools for professional success. Our curriculum is driven by and evolves with informed theory and best practices. The learning environment we create within the classroom and beyond attracts students to the College and inspires them to learn. This rich learning environment creates demand for our graduates.

Research in the College of Business:

Our desire to produce career-ready professionals motivates the growth of our intellectual capital through rigorous and meaningful inquiry. Our scholarship supports our distinctiveness and represents the source of our expertise in the classroom and in the academic and business communities. We value scholarship that informs theory, practice and teaching. Our inquiry is validated through a diverse portfolio of scholarly and professional activities.

Service in the College of Business:

Service is a professional activity and is an important way by which we renew ourselves. We value service activities that leverage our position and expertise as teacher-scholars and researchers. Service provides benefits for our students, the professions they will enter, and the brand, the College or University. Because not all service activities are equal, we assess and recognize our service in terms of its overall impact.

College Structure

- Office of Graduate Programs (p. 324)
- Secondary or P-12 Education Certification (p. 338)

Internships

Internship opportunities are available through the Office of Experiential Learning and Student Engagement in the College of Business, room 1101A. Internships are supervised work-study programs, designed to allow students an opportunity to receive practical experience in their chosen field of study. Prerequisites include a review of academic qualifications, and approval of the Director. Students should contact Danielle Smith, Director of Experiential Learning & Student Engagement, for further information.

Advisement

Academic advisement for Graduate Programs occurs in the Office of Graduate Programs in the College of Business.

Office of Graduate Programs

Ph.D. in Logistics and Supply Chain Management

The Ph.D. Program in Logistics and SCM trains students for academic positions in logistics and supply chain management. The program builds on the College of Business’s nationally ranked undergraduate degree program in Logistics and Intermodal Transportation. Graduates will be prepared to generate new knowledge, as well as to communicate a deep understanding of logistics and supply chain management to wide ranging audiences. The program requires 60 credit hours of coursework, provided the student has an appropriate master’s degree. Course work in the degree is expected to be completed within two years. After successful completion of a Comprehensive Exam, students will then transition to completing their dissertation. Core classes focus on advanced courses in logistics, sourcing, operations management, and supply chain management providing a broad-based and integrative foundation to the discipline.

Master of Business Administration

The purpose of the MBA program at Georgia Southern University is to prepare men and women for careers in business and non-profit organizations in an increasingly complex and changing world. It emphasizes the fundamental knowledge and skills underlying modern administration and management, and applies these with emphasis upon the area of managerial and executive decision-making.

Georgia Southern University has offered the Master of Business Administration degree since 1969 with graduates going on to pursue successful careers in banking and finance, marketing, manufacturing, and international organizations. The MBA program is flexible enough to accommodate part-time students. Classes are moderate in size to create an optimal environment for effective learning and thought-provoking discussions.

Master of Accounting

The Master of Accounting (MAcc) program focuses on the knowledge and skills students need for careers in public accounting and consulting. The curriculum includes 18 credit hours of accounting and law and 12 credit hours of electives designed to allow students to customize their program of study to fit their personal career objectives. The WebMAcc is an online 30-credit-hour program spread over six semesters. All of the coursework is delivered online, and the diploma WebMAcc students earn is identical to that of on-campus students. The MAcc and WebMAcc programs meet Georgia’s 150-hour requirement for certification as a CPA. Graduate Certificate options in Tax and Forensic Accounting allow students to set themselves apart from other graduates and increase their versatility in the workforce.

Master of Science in Applied Economics

The Master of Science in Applied Economics (MSAE) is offered exclusively online. The MSAE consists of 30 credit hours and features a rigorous core curriculum consisting of Micro-economic Theory, Macroeconomic Theory, International Economics and Applied Econometrics. The program’s graduates are expected to be competitive for employment in private enterprise, including financial institutions, industry, utility companies and governmental organizations engaged in regulation and economic development.

Enterprise Resources Planning (ERP) Certificate

The Enterprise Resources Planning (ERP) Certificate is an online program for working professionals and recent graduates who want to deepen their understanding of ERP systems and integrated business processes within organizations. This 15 credit hour lockstep program offers students the opportunity to gain hands on experience with SAP® ERP and to earn an Associate Level SAP® Certification (SAP Certified Associate - Business Process Integration with SAP ERP 6.0). This certification is recognized globally and validates broad understanding of integrated business processes within the world’s most widely used ERP software. Admission to the program is competitive and the size of each cohort is limited.

Accounting M.Acc.

Degree Requirements: 30 Credit Hours

Admission Requirements

The Master of Accounting (MAcc) program focuses on the knowledge and skills students need for careers in public accounting. The curriculum includes 18 credit hours of accounting and 12 credit hours of electives designed to allow students to personalize their program of study to fit their career objectives. The Georgia Southern University MAcc program meets Georgia’s 150-hour requirement for certification as a Certified Public Accountant (CPA) and can be completed in one year. A prospective student who has earned a baccalaureate degree and plans to take courses in the program must be admitted under one of the following classifications: Degree Student Regular Admission, Degree Student Provisional Admission, Non-Degree Enrichment Student, or Non-Degree Limited Student.
Degree Student
Students who are admitted to the College of Graduate Studies with the expressed intent of following a program leading to a graduate degree are classified as degree students. When admitted as a degree student, the applicant will be placed in one of the following categories: Regular Admission or Provisional Admission.

Regular Admission
A prospective candidate for the M.Acc. degree who meets all requirements for unqualified admission and has been recommended by the Director of the School of Accountancy in the College of Business and approved by the College of Graduate Studies is classified as a regular degree student. Student transcripts are evaluated for prerequisite requirements during the review of the admission packet. The requirement to make up deficiencies in prerequisite courses is listed on the notification of acceptance as a condition of acceptance.

Provisional Admission
Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of coursework after admission and meet other stipulations outlined by the School of Accountancy to be converted to regular status. The requirement to make up deficiencies in prerequisite courses is listed on the notification of acceptance as a condition of acceptance.

Non-Degree Student
An applicant may be admitted to the College of Graduate Studies as a non-degree student to earn credit in graduate courses without working toward a degree. Admission as a non-degree student does not guarantee subsequent admission to a graduate degree program; that is a separate process and different criteria must be met. Students who are admitted in a non-degree category may apply to a degree program at any time. Upon the graduate director’s recommendation, non-degree courses may be included in the graduate degree program of study should the student gain reclassification as a degree student. A student may be admitted to the College of Graduate Studies and in Business in one of the following admission categories: Non-Degree Enrichment Student or Non-Degree Limited Student.

Enrichment
Students admitted in this category may take up to eighteen (18) graduate accounting credit hours for enrichment with the approval of the Director of the School of Accountancy on a space available basis. An enrichment student may apply for admission as a Degree Student and may count a maximum of nine (9) credit hours toward graduate degree program requirements if recommended by the graduate director and approved by the College of Graduate Studies. The requirement to make up deficiencies in the prerequisite courses is listed on the notification of acceptance as a condition of acceptance.

Limited
Enrollment in the Non-Degree Limited category is limited to a maximum of nine (9) credit hours of graduate courses in any seven contiguous years. A student may count a maximum of nine (9) credit hours toward graduate degree program requirements if recommended by the graduate director and approved by the College of Graduate Studies. The requirement to make up deficiencies in the prerequisite courses is listed on the notification of acceptance as a condition of acceptance.

Admission Appeals
Students who are denied admission may appeal to the College of Business Graduate Curriculum and Programs Committee (GCPC). Factors that the GCPC may consider for admission will include (but are not limited to) the following:

1. Probability of success in the program.
2. The diversity the applicant brings to the degree program.
3. Space availability in the program.

The GCPC will make its decision based on the best interests of the program. Its options include, but are not limited to, the following: admit with no restrictions, admit with restrictions, or reject.

Graduate Transfer or Transient Credit
The College of Business accepts graduate transfer or transient credit hours only from AACSB accredited programs not to exceed six (6) credits subject to review and approval by the Director of the School of Accountancy. WebMAcc courses cannot be used to fulfill the requirements for the M.Acc. degree nor can ACCT or LSTD courses be applied for credit hour in the WebMAcc program. However, a student currently enrolled in one program can, under special circumstances, apply for admission to the other program and request that credit hours be transferred. The request to transfer courses must be approved by the Director of the School of Accountancy or the Graduate Curriculum and Programs Committee.

Admission Factors
Admission to the M.Acc program is competitive. The School’s admissions committee reviews applications on an individual basis looking at both the quantitative and qualitative aspects of the applicant’s academic background and professional experience (if applicable). The committee seeks to assess each applicant’s potential for academic success in a graduate program based on the following:

- Statement of Purpose Essay: Because the admissions process may not allow for personal interviews, this essay is a crucial reflection of the applicant’s written communication skills.
- Past Academic Performance: Current competitive GPA: While there is no minimum undergraduate grade point average (GPA) requirement, the admissions committee views past grades as an important indicator of the applicant’s future academic performance. The committee may also consider the ranking and reputation of the applicant’s undergraduate institution.
- Professional Experience: There is no work experience requirement although work experience will be viewed positively by the admissions committee.
- GMAT Score: A current competitive GMAT is typically required. Applicants may request a waiver of the GMAT requirement based on exceptional academic and/or professional experience. A recommendation for a GMAT waiver must be made by the Graduate Director or Director of the School of Accountancy and approved by the College of Graduate Studies.
- Other Required Scores: Competitive scores on any other required tests will also be considered and are an extremely important component of the application.
- Letters of Recommendation: Letters are optional but may boost candidates’ chances for admission. References should speak to the applicant’s personal qualities, career potential, and potential to succeed in the classroom.

In addition to the applicant’s potential of success, space availability in the program may also impact admissions decisions. Decisions are made in as timely a manner as possible. A decision is not assured before the application deadline. Applications received after the applications deadline will be considered on a space available basis.
Program of Study

Prerequisites

A student admitted to the College of Graduate Studies as a prospective candidate for the Master of Accounting degree must present evidence of satisfactory completion (a minimum grade of "C") of the following course content:

**Accounting**

**Intermediate Accounting**

- ACCT 3131 Intermediate Accounting I
- ACCT 3132 Intermediate Accounting II
- ACCT 4133 Intermediate Accounting III

**Managerial Accounting**

- ACCT 3231 Managerial Accounting II

**Income Tax**

- ACCT 3330 Income Tax

**Accounting Information Systems**

- ACCT 4130 Accounting Information Systems

**Auditing**

- ACCT 4430 Auditing

**General Business**

**Accounting Fundamentals**

- ACCT 2101 Financial Accounting
- ACCT 2102 Managerial Accounting

**Foundations of Economics**

- ECON 2105 Principles of Macroeconomics
- ECON 2106 Principles of Microeconomics

**Fundamentals of Corporate Finance**

- FINC 3131 Principles of Corporate Finance

**Legal and Ethical Issues in Business**

- LSTD 2106 Legal Environment of Business

**Foundations of Management and Marketing**

- MGMT 3130 Principles of Management
- MKTG 3131 Principles of Marketing

**Business Statistics using Spreadsheet Analysis**

- BUSA 3131 Business Statistics

Electives

Selected from 7000-level courses offered by the College of Business, or from approved electives offered elsewhere in the University.

Total Credit Hours: 30

School of Accountancy (SOA) Progression Requirements

1. Students must have a GPA of 3.0 in all accounting courses plus the required legal studies (LSTD) course in order to graduate with a M.Acc. degree (in addition to the 3.0 overall GPA required by the university).

2. Students cannot retake a course in the MAcc program more than once. Earning a “D”, “F”, WF, or “W” on the second attempt will result in dismissal from the program.

3. Students cannot retake more than one graduate course in the MAcc program. Earning a “D”, “F”, WF, or “W” on a second course will result in dismissal from the program.

4. Students cannot earn more than 2 grades of “C” or below during their tenure in the Masters of Accountancy program. More than two grades of “C” or below will result in immediate dismissal from the program. Further, a student will not be allowed to graduate with a M.Acc. degree if the third “C” or below occurs in the last semester of the program.

5. Students who are dismissed from the MAcc program may appeal the program dismissal to the SOA Curriculum Committee. Students who wish to appeal their dismissal must write a letter to the committee requesting permission to continue in the MAcc Program.

6. Strict adherence to the American Institute of Certified Public Accountants’ Code of Professional Conduct is required of all accounting students. Failure to comply with these professional standards will result in review and action by the School of Accountancy faculty and could result in the student’s dismissal from the accounting program.

Accounting WebM.Acc. (The Web-Based Master of Accounting)

Degree Requirements: 30 Credit Hours

The Web-Based Master of Accounting (WebM.Acc.) degree curriculum consists of 10 3-credit hour courses. Students are required to complete two courses each fall and spring term and one course each summer for two consecutive years. WebMAcc courses cannot be used to satisfy the requirements of the M.Acc. degree.

Georgia Southern University considers the WebMAcc to be a full-time program.

The WebMAcc program focuses on the knowledge and skills students need for careers in public accounting. The curriculum includes 30 credit hours of coursework. The 30 credit hours include 18 credit hours of required courses; the remaining 12 credit hours of electives must be approved by the Program Director or the Director of the School of Accountancy. The Georgia Southern University WebMAcc program is designed to assist students in meeting Georgia’s 150-hour requirement to obtain a CPA License. A prospective student who has earned a baccalaureate degree and plans to take courses in the program must be admitted to the College of Graduate Studies as one of the following types: Degree Student Regular Admission, Degree Student Provisional...
Admission, Non-Degree Enrichment Student, or Non-Degree Limited Student.

Degree Student

Students who are admitted to the College of Graduate Studies with the expressed intent of following a program leading to a graduate degree are classified as degree students. When admitted as a degree student, the applicant will be placed in one of the following categories: Regular Admission or Provisional Admission.

Regular Admission

A prospective candidate for the WebM.Acc. degree who meets all requirements for unqualified admission and has been recommended by the Director of the School of Accountancy in the College of Business and approved by the College of Graduate Studies is classified as a regular degree student. The requirement to make up deficiencies in prerequisite courses is listed on the notification of acceptance as a condition of acceptance.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of coursework after admission and meet other stipulations outlined by the department to be converted to regular status. The requirement to make up deficiencies in the prerequisite courses is listed on the notification of acceptance as a condition of acceptance.

Non-Degree Student

An applicant may be admitted to the College of Graduate Studies as a non-degree student to earn credit in graduate courses without working toward a degree. Admission as a non-degree student does not guarantee subsequent admission to a graduate degree program; that is a separate process and different criteria must be met. Students who are admitted in a non-degree category may apply to a degree program at any time. Upon the graduate director’s recommendation, non-degree courses may be included in the graduate degree program of study should the student gain reclassification as a degree student. A student may be admitted to the Colleges of Graduate Studies and Business in one of the following admission categories:

Enrichment

Students may be admitted to up to eighteen (18) graduate accounting credit hours with the approval of the graduate director on a space available basis. A student may count a maximum of nine (9) credit hours toward graduate degree program requirements if recommended by the degree graduate director and approved by the College of Graduate Studies.

Limited

Enrollment in the Non-Degree Limited category is limited to a maximum of nine (9) credit hours in graduate courses in any seven contiguous years. A student may count a maximum of nine (9) credit hours toward graduate degree program requirements if recommended by the degree graduate director and approved by the College of Graduate Studies.

Admission Appeals

Students who are denied admission may appeal to the College of Business Graduate Curriculum and Programs Committee (GCPC). Factors that the GCPC may consider for admission will include (but are not limited to) the following:

1. Probability of success in the program.
2. The diversity the applicant brings to the degree program.
3. Space availability in the program.

The GCPC will make its decision based on the best interests of the program. Its options include, but are not limited to, the following: admit with no restrictions, admit with restrictions, or reject.

Graduate Transfer or Transient Credit

The College of Business accepts graduate transfer or transient credit hours only from AACSB accredited programs not to exceed six (6) credits subject to review and approval by the Director of the School of Accountancy. WebMAcc courses cannot be used to fulfill the requirements for the M.Acc. degree nor can ACCT or LSTD courses be applied for credit hour in the WebMAcc program. However, a student currently enrolled in one program can, under special circumstances, apply for admission to the other program and request that credit hours be transferred. The request to transfer courses must be approved by the Director of the School of Accountancy or the Graduate Curriculum and Programs Committee.

Admission Factors

Admission to the WebMAcc program is competitive. The School’s admissions committee reviews applications on an individual basis looking at both the quantitative and qualitative aspects of the applicant’s academic background and professional experience (if applicable). The committee seeks to assess each applicant’s potential for academic success in a graduate program based on the following:

- **Statement of Purpose Essay:** Because the admissions process may not allow for personal interviews, this essay is a crucial reflection of the applicant’s written communication skills.
- **Past Academic Performance:** Current competitive GPA: While there is no minimum undergraduate grade point average (GPA) requirement, the admissions committee views past grades as an important indicator of the applicant’s future academic performance. The committee may also consider the ranking and reputation of the applicant’s undergraduate institution.
- **Professional Experience:** There is no work experience requirement although work experience will be viewed positively by the admissions committee.
- **GMAT Score:** A current competitive GMAT is typically required. Applicants may request a waiver of the GMAT requirement based on exceptional academic and/or professional experience. A recommendation for a GMAT waiver must be made by the Graduate Director or Director of the School of Accountancy and approved by the College of Graduate Studies.
- **Other Required Scores:** Competitive scores on any other required tests will also be considered and are an extremely important component of the application.
- **Letters of Recommendation:** Letters are optional but may boost candidates’ chances for admission. References should speak to the applicant’s personal qualities, career potential, and potential to succeed in the classroom.

In addition to the applicant’s potential of success, space availability in the program may also impact admissions decisions. Decisions are made in as timely a manner as possible. A decision is not assured before the application deadline. Applications received after the applications deadline will be considered on a space available basis.

Program of Study

**Prerequisites**

A student admitted to the College of Graduate Studies as a prospective candidate for the WebMAcc. degree must present evidence of satisfactory completion (a minimum grade of “C”) of the following course content:
is complete in time for the first required test. It is also the students’ responsibility to contact the testing center in advance to schedule each test during the program and to complete the test or assignment by the stated deadline and/or during the stated time period. All costs of testing will be borne by the student.

Approved testing centers may include Prometric or other nationally or regionally recognized commercial testing centers, universities, colleges, or community colleges accredited by an acceptable accrediting agency, or other approved sites. The University is part of a consortium that certifies testing locations called the Consortium of College Testing Centers, provided by the National College Testing Association. Students can look up certified locations close to them to explore cost information, hours, etc. here: http://www.ncta-testing.org/test-center-certification. Testing sites that will not be approved include: the student’s workplace or any location where the proctor would be a relative (by law or marriage), an employer, an employee, or other person with a potential related interest.

Residency and Testing Requirements

Program or course testing should occur at an approved testing center with identification required if at all possible. Additional test security measures as deemed necessary by the faculty may also be required and students will be given appropriate notice of those additional security measures. ProctorU or similar online testing services may be required in lieu of testing held at testing centers. Online tools for proctored testing may include ProctorU, Respondus Lockdown Browser, Respondus Monitor, or other tools the university makes available or the instructor requires.

Students are responsible for contacting the proposed testing site to obtain approval to sit for exams at that site. Students must provide proof of permission to sit to their instructor and WebMAcc coordinator. Students are encouraged to do this early to ensure that the approval process is complete in time for the first required test. It is also the students’

### Applied Economics Certificate (Online)

#### Requirements: 18 Credit Hours

Admission Requirements

Admission into the Master of Science in Applied Economics program is competitive. To be considered for regular admission students must satisfy the following requirements:
1. Bachelor’s degree from an accredited college or university
2. Undergraduate GPA: minimum of 3.00 on a 4.00 point scale
3. Competitive GRE scores
4. Completed courses in calculus, statistics, macroeconomics, and microeconomics with a minimum grade of “C” in each course and a minimum GPA of 3.00 on a 4.00 scale in these courses
5. Completed Math for Applied Economics (ECON 7130) with a minimum grade of “C”.

Students who apply by the deadlines below and meet the first four requirements will be conditionally admitted and given the opportunity to take Math for Applied Economics. The Math for Applied Economics requirement will be waived upon demonstration of current proficiency in algebra and calculus. Contact the Program Director for details. The GRE requirement may be waived at the discretion of the Program Director for applicants holding a graduate degree in a quantitative field.

**Provisional**

Applicants may be admitted on a provisional basis based upon the evaluation of their application materials. Provisional admission is for applicants who do not satisfy regular admission requirements or applicants who require prerequisite coursework prior to entering the program.

**Application Deadlines**

The deadline for completed applications for fall semester admission is May 1st with decisions being made on or before June 1st. Applications for spring semester are due by October 1st with decisions being made on or before October 15th. Applications completed after the deadline will be considered at the discretion of the Program Director.

Business Administration M.B.A.

Degree Requirements: 30 Credit Hours

MBA Mission Statement

The mission of the Master of Business Administration program at Georgia Southern University is to create organizational leaders with an understanding of global, ethical, and social issues.

Graduates of the program will be able to:

1. Apply tools and concepts from the functional areas of business to identify problems and to support recommended courses of action;
2. Employ appropriate analytical methods for problem solving and to support decision making;
3. Evaluate economic opportunities in a global context and evaluate management and organizational strategies from a global economic perspective;
4. Employ appropriate technology in the analysis of information and to support decisions and recommendations;
5. Evaluate ethical alternatives and defend an ethical course of action in a business context; and
6. Evaluate appropriate leadership characteristics and techniques in the context of an organization's culture and of organizational change.

Admission Requirements

Admission to the MBA Program is competitive and decisions are made on a rolling-basis. This means that application packets are reviewed when they are complete and decisions are made shortly thereafter. Seats are filled as decisions are made, so candidates are encouraged to complete their applications as soon as possible.

The Program looks at a variety of criteria that measure the candidate's potential for being a successful graduate student and business leader. Factors used in determining admission include:

- Past academic performance
- Current Official GMAT score
- Professional work experience

Degree Student

Students who are admitted to the College of Graduate Studies with the expressed intention of following a program leading to a graduate degree are classified as degree students. When admitted as a degree student, the applicant will be placed in one of the following categories:

Regular Admission

1. A prospective student must have a baccalaureate degree from an accredited College or University
2. Present official transcripts from all credit-granting institutions
3. Present a current official report of score from the Graduate Management Admissions Test (GMAT)
4. TOEFL or IELTS scores are required for international applicants

Applicants may ask that the GMAT be waived under certain circumstances.

Provisional Admission

Applicants may be approved for provisional admission if all criteria are not met to gain regular admission. Provisional students must earn grades of "B" or higher on their first nine (9) credit hours of course work after admission and must meet any other stipulations outlined by the admissions committee to be converted to regular status.

Non-degree Student

An applicant may be admitted to the College of Graduate Studies as a non-degree student to earn credit in graduate courses without working toward a degree. Admission as a non-degree student does not guarantee subsequent admission to a graduate degree program; that is a separate process, and different criteria must be met. Students who are admitted in a non-degree category may apply to a degree program at any time. Upon the advisor’s recommendation, non-degree courses may be included in the graduate degree program of study should the student gain reclassification as a degree student. A student may be admitted to the College of Graduate Studies and in Business in one of the following admission categories:

Enrichment

An applicant who holds an undergraduate or graduate degree and desires to take business courses for personal or professional improvement may be admitted in this category. Enrollment in the Non-Degree Enrichment category is limited to eighteen (18) credit hours in graduate courses in any seven contiguous years, however, a student may count a maximum of nine (9) credit hours toward graduate degree program requirements if recommended by the degree Graduate Program Director and approved by the College of Graduate Studies.

Limited

A student whose file is incomplete because certain required application materials have not been received in the Office of Graduate Admissions for degree admission consideration may be admitted in this category. Enrollment in the Non-Degree Limited category is limited to a maximum of nine (9) credit hours in graduate courses in any seven contiguous years. A student may count a maximum of nine (9) credit hours toward graduate degree program requirements if recommended by the degree Graduate Program Director and approved by the College of Graduate Studies.

Graduate Transfer or Transient Credit

The College of Business accepts graduate transfer or transient credit only from AACSB accredited programs not to exceed six (6) credit hours subject to review and approval by the Program Director or the College of Business Graduate Curriculum and Programs Committee.

MBA Program Requirements

Requirements in the Program of Study leading to the Master of Business Administration depend on whether a student pursues a General MBA degree or an MBA degree with an area of concentration.

Program of Study: General M.B.A. Degree

A student admitted to the College of Graduate Studies as a prospective candidate for the Master of Business Administration degree must present evidence of satisfactory completion (a minimum grade of "C") of the following undergraduate course content in Business Administration. The prerequisite requirements for admission to the MBA program may be completed by taking the appropriate undergraduate courses from Georgia Southern, equivalent courses from any other accredited college or university, or other approved methods.

Business Administration M.B.A. (The Georgia WebMBA)

Degree Requirements: 30 Credit Hours

The online Georgia WebMBA® curriculum consists of 10 courses completed two courses each term for five consecutive terms. A preprogram orientation is also required. No electives are required. Convenient and affordable, the WebMBA® provides quality instruction in a Web-based virtual setting. The program is administered through a consortium of six University System of Georgia institutions comprising the Georgia WebMBA.

Admission Requirements

Admission occurs only for fall and spring semesters.

1. Complete the Graduate Admission Application Form at http://cogs.georgiasouthern.edu/.
2. A $50.00 application fee is required.
3. Send an official transcript from all colleges and universities attended to:
   Georgia Southern University
   College of Graduate Studies
   Admissions Office
   P.O. Box 8113
   Statesboro, GA 30460-8113
   (912) 478-0587
4. Official GMAT score. Our school code is 5253. For more information about the GMAT, go to http://www.gmac.com and/or http://www.mba.com/mba/ Applicants can request a waiver of the GMAT requirement based on outstanding prior academic performance and/or professional experience.
5. Send your résumé.
6. TOEFL or IELTS score (international students only).

Admission to the WebMBA Program is competitive and decisions are made on a rolling-basis. This means that application packets are reviewed when they are complete and decisions are made shortly thereafter. Seats are filled as decisions are made, so candidates are encouraged to complete their applications as soon as possible.

The Program looks at a variety of criteria that measure the candidate’s potential for being a successful graduate student and business leader. Factors used in determining admission include:

- Past academic performance
- Current official GMAT score
- Professional work experience

Prerequisite Requirements Showing Undergraduate Equivalents

A prospective candidate must present evidence of satisfactory completion (a minimum grade of “C”) of the following undergraduate equivalent course content in Business Administration or take the graduate prerequisites or undergraduate equivalents before enrolling in 7000 level coursework. The prerequisite requirements may also be completed by successfully completing online course content modules. Modules information is available on request from the Office of Graduate Programs.

the program with a realistic overview of ERP systems and hands-on experience using SAP.

The ERP Certificate program is also designed to assist students preparing for and passing SAP’s TERP10 certification exam. Students who pass the certification test will be listed in SAP’s database of certified business practitioners. The TERP10 certification is recognized worldwide and a continuing global shortage of skilled SAP workers will enable students who earn the ERP Certificate to compete for a wide range of jobs.

Admission Requirements

Admission to the ERP Certificate program is competitive. The ERP Certificate program’s admission committee reviews applications on an individual basis looking at both the quantitative and qualitative aspects of the applicant’s academic background and professional experience (if applicable). The committee seeks to assess each applicant’s potential for academic success in an online graduate program based on the following:

1. Admission to the Georgia Southern University College of Graduate Studies as a Non-Degree Certificate student. This requires the following:
   a. Completion of a Bachelor’s degree or equivalent from a college accredited by the proper regional association with a 2.7 (4.0 scale) cumulative grade point average or higher on undergraduate work.
   b. Official copies of all undergraduate and graduate, if appropriate, transcripts.
   c. An updated resume that includes the following:
      i. Work history,
      ii. Education history,
      iii. Professional experiences related to the academic program, and
      iv. Contact information for a minimum of three references.
   d. A personal statement that includes a description of career goals and reasons for applying to the graduate ERP Certificate program.
   e. Students whose first language is not English and who have not studied extensively in English must submit official TOEFL scores. TOEFL scores of at least 80 (internet-based), 213 (computer-based), or 550 (paper-based) are required for admission to the ERP Certificate program. TOEFL scores must be sent directly from the Educational Testing Service (ETS) to Georgia Southern University.
   f. Students who are not U.S. citizens must provide a photocopy of their VISA or permanent resident alien cards and satisfy all other admission requirements specified by COGS for international students.
   g. Students interested in applying course credit earned while completing the ERP Certificate toward the requirements for an MBA, MAcc, or MS in Applied Engineering degree must also satisfy the admission requirements for that degree program.

NOTE: Contact the Office of Graduate Admissions for other admission related information.

Admission Appeals

Students who wish to appeal an admission decision must follow the College of Graduate Studies appeal procedures.

Graduate Transfer or Transient Credit

Due to the lock-step nature of the program, credit hour will not be granted for courses taken outside of the ERP Certificate program.

Program of Study

Prerequisites

Students accepted to the program must have previous accounting experience or related coursework. Prospective students without accounting experience or related coursework can take Accounting and Control (ACCT 6130) or its undergraduate equivalent, Survey of Accounting (ACCT 2030), prior to Fall Semester.

Forensic Accounting Certificate

Requirements: 12 Credit Hours

Program

The Graduate Certificate in Forensic Accounting program is designed to provide the advanced knowledge and skills graduates need to investigate asset theft and financial statement fraud, to design internal control systems that detect and/or prevent fraud, and to serve effectively as expert witnesses in a court of law.

Admission Requirements

Students may gain admission to the Graduate Certificate in Forensic Accounting program in the following ways. First, Master of Accounting program students may apply for admission to the degree program and the Certificate program simultaneously to earn the Certificate as an extension of their MAcc program of study. A degree seeking application and an application to the Certificate program must be submitted. As part of the MAcc application process, the admissions committee reviews applications on an individual basis looking at both the quantitative and qualitative aspects of the applicant’s academic background and professional experience (if applicable). The committee seeks to assess each applicant’s potential for academic success and future professional growth based on the following:

- Statement of Purpose Essay: This essay is an optional component which allows the faculty to consider the applicant’s motivation as well as written communication skills.
- Past Academic Performance: While there is no minimum undergraduate grade point average (GPA) requirement, the admissions committee views past grades as an important indicator of
the applicant’s future academic performance. The committee may also consider the ranking and reputation of the applicant’s undergraduate institution.

- Extracurricular Activities: Public, community, or military service; travel experiences; extracurricular activities, hobbies and special aptitudes; and any honors or recognitions received are all important indicators of the applicant’s motivation and character.
- GMAT Score: GMAT scores will be an extremely important component of the application and thus applicants should attend this component aggressively. Applicants may request a waiver of the GMAT requirement based on exceptional academic and/or professional experience. A recommendation for a GMAT waiver must be made by the Graduate Director or Director of the School of Accountancy and approved by the College of Graduate Studies.
- Letters of recommendation: Letters are optional but may boost candidates’ chances for admission. References should speak to the applicant’s personal qualities, career potential, and potential to succeed in the classroom.

Participation in the Certificate Program is open to any qualified, degree-seeking graduate student at Georgia Southern University. Students currently enrolled in a degree program must first apply and be admitted to the Certificate program. As permitted by their degree program, students may apply coursework to both the certificate program and their degree. It is not required that the certificate and degree be completed simultaneously, however, students must be enrolled to take classes and the seven year limitation on the application of prior coursework to either the degree or the certificate must be satisfied. Upon recommendation of the Graduate Program Director and approval from the College of Graduate Studies, credit earned in a certificate program may be applied to a graduate degree program.

Finally, students seeking only the Graduate Certificate or the Graduate Certificate independent of another degree program, may be admitted by the College of Graduate Studies (COGS) under a Non-Degree Certificate admission status. Admission as a Non-Degree Certificate does not guarantee subsequent admission to a graduate degree program. Applying to a graduate program is a separate process and different criteria must be met. Certificate program admissions decisions are based on applicants’ prior academic work and other factors that indicate their potential for program success and enrichment of the learning environment. Upon recommendation of the graduate program director and approval of the College of Graduate Studies, a maximum of six (6) credits earned before the student entered the certificate program may be applied to that program.

The minimum grade requirements for the graduate certificate are the same as those for graduate degrees. For graduate credit, the grade in a course must be “C” or higher. To remain in good standing, a student must maintain a cumulative GPA of 3.0 or higher. To be awarded a graduate certificate, students:

1. must not be on probation;
2. must have a cumulative GPA of 3.0 or higher on graduate coursework and on coursework applied to the certificate;
3. must meet all the requirements of COGS and the student’s certificate program; and
4. must be enrolled during the semester in which the certificate requirements are completed.

COGS residence requirements and the requirements for a comprehensive final examination do not apply to the graduate certificate program.

Program of Study

Prerequisites

The Fraud Examination prerequisite courses are offered face to face on campus during the academic year and online in the summer. Successful completion of the ACFE exam or fraud examination boot camp (when offered) may be considered sufficient for completion of the fraud examination course prerequisites for admission into the Forensic Accounting program.

Graduate Certificate in Taxation

Requirements: 15 Credit Hours

Program

The Graduate Certificate in Taxation imparts a basic knowledge of the major technical, conceptual, and research issues in the area of tax and taxation, and provides training in the practical and procedural aspects of taxation. Students explore the ethical and legal obligations of practicing in the area of taxation. The Certificate program prepares students to be professional tax advisers and consultants, tax executives in private and public enterprises and leaders in the field.

Admission Requirements

Students may gain admission to the Certificate in Taxation program in three ways. First, Master of Accounting program students may apply for admission to the degree program and the certificate program simultaneously to earn the Certificate as an extension of their MAcc program of study. A degree seeking application and an application to the Certificate program must be submitted. As part of the MAcc application process, the admissions committee reviews applications on an individual basis looking at both the quantitative and qualitative aspects of the applicant’s academic background and professional experience (if
applicable). The committee seeks to assess each applicant’s potential for academic success and future professional growth based on the following:

- Statement of Purpose Essay: This essay is an optional component which allows the faculty to consider the applicant’s motivation as well as written communication skills.
- Past Academic Performance: While there is no minimum undergraduate grade point average (GPA) requirement, the admissions committee views past grades as an important indicator of the applicant’s future academic performance. The committee may also consider the ranking and reputation of the applicant’s undergraduate institution.
- Extracurricular Activities: Public, community, or military service; travel experiences; extracurricular activities, hobbies and special aptitudes; and any honors or recognitions received are all important indicators of the applicant’s motivation and character.
- GMAT Score: GMAT scores will be an extremely important component of the application and thus applicants should address this component aggressively. Applicants may request a waiver of the GMAT requirement based on exceptional academic and/or professional experience. A recommendation for a GMAT waiver must be made by the Graduate Director or Director of the School of Accountancy and approved by the College of Graduate Studies.
- Letters of recommendation: Letters are optional but may boost candidates’ chances for admission. References should speak to the applicant’s personal qualities, career potential, and potential to succeed in the classroom.

Participation in the Certificate Program is open to any qualified, degree-seeking graduate student at Georgia Southern University. Students currently enrolled in a degree program must first apply and be admitted to the Certificate program. As permitted by their degree program, students may apply coursework to both the certificate program and their degree. It is not required that the certificate and degree be completed simultaneously; however, students must be enrolled to take classes and the seven-year limitation on the application of prior coursework to either the degree or the certificate must be satisfied. Upon recommendation of the Graduate Program Director and approval from the College of Graduate Studies, credit earned in a certificate program may be applied to a graduate degree program.

Finally, students seeking only the Graduate Certificate or the Graduate Certificate independent of another degree program, may be admitted by the College of Graduate Studies (COGS) under a Non-Degree Certificate admission status. Admission as Non-Degree Certificate does not guarantee subsequent admission to a graduate degree program. Applying to a graduate program is a separate process and different criteria must be met. Certificate program admissions decisions are based on applicants’ prior academic work and other factors that indicate their potential for program success and enrichment of the learning environment. Upon recommendation of the graduate program director and approval of the College of Graduate Studies, a maximum of six (6) credits earned before the student entered the certificate program may be applied to that program.

The minimum grade requirements for the graduate certificate are the same as those for graduate degrees. For graduate credit, the grade in a course must be “C” or higher. To remain in good standing, a student must maintain a cumulative GPA of 3.0 or higher. To be awarded a graduate certificate, students:

1. must not be on probation;
2. must have a cumulative GPA of 3.0 or higher on graduate coursework and on coursework applied to the certificate;
3. must meet all the requirements of COGS and the student's certificate program; and
4. must be enrolled during the semester in which the certificate requirements are completed.

COGS residence requirements and the requirements for a comprehensive final examination do not apply to the graduate certificate program.

Business Administration Ph.D
(Logistics and Supply Chain Management)

Degree Requirements: 60 Credit Hours

Program Mission Statement

The program’s intended outcomes are to provide students with:

1. Advanced understanding of the core areas of study within the field of supply chain management, including logistics and transportation
2. Advanced knowledge, skills, and values in at least one of the core areas (operations management, marketing, or information systems) for specialized roles within supply chain management
3. Advanced analytical and assessment skills
4. Advanced capability to develop, conduct, and manage applied research streams
5. Ethical decision-making and integrity
6. Professional and personal responsibility
7. Understanding of, and respect for, persons from diverse cultural, socioeconomic, educational, and professional backgrounds
8. Commitment to improving the economy, employment levels and competitiveness of the state of Georgia
Admission Requirements

Applicants to the PhD program must submit the following:

- Completed online graduate application form (http://cogs.georgiasouthern.edu/admission/start/applynow/)
- $50 application fee
- Official transcript(s) from colleges and universities attended, showing courses completed, grades earned, dates, and degree(s) awarded.
- Three letters of recommendation. At least one letter must be from a graduate school faculty member.
- Official score from the GMAT taken in the last five years. An original copy of the test score, sent by the testing agency to the Office of Admissions, is required before final action will be taken on an application. A copy of the score provided to the student and subsequently forwarded is not acceptable for final admission decisions. The GRE will only be considered in exceptional cases.
- All international applicants, including resident and nonresident aliens, whose native language is not English, are required to submit official TOEFL scores taken within the year immediately preceding the requested semester of admission. An original copy of the test score, sent by the testing agency to the Office of Admissions, is required before final action is taken on an application. A copy of the score provided to the student and subsequently forwarded is not acceptable. International students that have a degree from a US university may have this requirement waived.
- Statement of purpose that includes a description of professional goals and a rationale for how the Ph.D. program will further the student’s career objectives.
- A current resume that includes, as a minimum, all academic programs, completed employment history, and any professional certifications or other significant achievements and honors.
- Applicants whose submitted application packages merit closer consideration may be asked to participate in an interview and/or submit additional information before a final decision is reached concerning their acceptance.

Acceptance decisions will be made, subject to budgetary constraints, first within the College of Business and ultimately at the College of Graduate Studies. After reviewing application materials, the Program Director may accept applicants who meet all of the following conditions:

- Successfully completed BBA or MBA from anAACSB-accredited program; a MBA is strongly preferred
- Scored at least a 550 on the GMAT or for exceptional cases where the GRE will be considered, the score must be above a 1200
- If English is not the applicant’s native language, scored above 80 on TOEFL

The Program Director will submit all remaining applications, along with his/her recommendations, to the PhD Advisory Committee for their decision. Once a decision has been made within the College of Business, the Program Director will forward all applications to the College of Graduate Studies for final disposition.

Accepted applicants who have not completed an AACSB-accredited MBA or an appropriately-accredited Master’s Degree in a field closely related to Logistics/Supply Chain Management may be required to complete all specified prerequisite courses (or courses determined by the Program Director to be equivalent) with grades of “C” or better before taking appropriate doctoral-level courses.

Applicants who wish to apply for a graduate assistantship must also complete the Electronic Graduate Assistantship Application (http://cogs.georgiasouthern.edu/new-current-students/graduate-assistantships-information/) and submit it to the Jack N. Averitt College of Graduate Studies.

Program Requirements

Graduate Transfer or Transient Credit

The College of Business Administration accepts graduate transfer or transient credit only from AACSB accredited programs. A maximum of two courses not to exceed six (6) credits may be considered for graduate transfer or transient credit.

Coursework

Students will be required to complete the courses specified in the Program of Study shown below with an overall GPA of 3.0 or better. One time only, a student may receive a grade of “C”, but will be required to re-take the course and earn a “B” or better and will also have to still achieve a cumulative GPA of 3.0 by the time they’ve completed their coursework. More than one “C” or any grade lower than a “C” will be grounds for elimination from the program. Any prerequisite courses must be completed within one calendar year of the student’s acceptance into the program. All required coursework (i.e. core, research, and concentration courses) must be completed within three years of the time the student enters the program or completes prerequisite coursework, whichever is later. (Students in violation of policies on grades or time limits may submit a written appeal to the PhD Advisory Committee via the Program Director, explaining why they believe their situation merits an exception to the policy.)

Comprehensive Examinations

Students will be required to pass one or more comprehensive examinations covering all coursework specified in the Program of Study before they may begin any dissertation activities (to include formation of the committee). The Program Director will be responsible for the creation, administration, and evaluation of these exams, although he/she may delegate associated tasks to other faculty members. At the discretion of the Program Director, all coursework may be covered by a single comprehensive exam or up to three separate exams may be given for the categories of core courses, research courses, and concentration courses, as differentiated in the Program of Study. Comprehensive exams may include both written and oral components and will be evaluated on a Pass/Fail basis. The Program Director will notify students in writing of whether they have passed and, if not, what areas require further study. Students may re-take any comprehensive exam once, if needed. Failure to pass any comprehensive exam after two attempts will result in termination of the student’s enrollment in the program. When a student has completed all required comprehensive exams, he/she will be considered a candidate for the Ph.D.

Dissertation

Following successful completion of all required comprehensive exams, candidates will formulate an appropriate dissertation topic that is likely to produce high-quality research publications. The candidate will then contact potential committee members to ascertain their suitability and willingness to serve on a Dissertation Committee for that topic. (The size and composition of the committee, as well as eligibility requirements for committee chairs and members will be defined in a COB Policy statement that is consistent with the College of Graduate Studies dissertation committee and appointment policy and will be made available to candidates by the Program Director no later than the time they are notified of having passed their comprehensive exams.) As soon as verbal commitments have been obtained, the candidate will submit the proposed dissertation topic and committee composition in writing to the Program Director. The Director will review the proposal for compliance with program and college policies, inform the student of any needed changes, and ultimately approve the proposal. Students must register for Dissertation (LSCM 9999). Dissertation credit hour during each semester.
the dissertation is in progress, earning a minimum of 18 credit hours of Dissertation by the end of their program. Furthermore, the students must register continuously in Dissertation (LSCM 9999) until the Dissertation is successfully defended. As soon as the Dissertation Committee Chair considers the intended research to be sufficiently developed, the student will conduct a formal defense of his/her dissertation proposal, supported by substantial preliminary research. As a minimum, the proposal will include a detailed description of the proposed research objectives, methodology, and value. It must also include a thorough literature review showing how the proposal relates to previously published research and a timeline for the project's completion. The Committee chair will notify the candidate in writing of the committee's assessment, to include any changes or additional tasks that need to be accomplished and whether another proposal defense will be needed. No earlier than the following semester and no later than two years from the semester in which the proposal was successfully defended, the candidate must conduct a formal defense of the completed dissertation. The Committee chair will notify the candidate in writing of whether the final defense was successful and what additional actions the Committee requires (to include the possibility of another formal defense). The candidate is responsible for submitting the completed dissertation in electronic format style consistent with that required by the College of Business dissertation publication and consistent with the required College of Graduate Studies front-matter style per the College of Graduate Studies Electronic Thesis and Dissertation (ETD) policy.

Leave of Absence

If it is necessary to interrupt progress toward the degree, the student may petition for a non medical leave of absence of up to one year. The petition must be submitted at least one month before the effective date of leave. The major professor, the department chair, and the Dean of the College of Graduate Studies must grant approval. The COGS Dean will establish the conditions of the leave. An extension of a leave of absence beyond one year may be granted by the Dean of the College of Graduate Studies upon recommendation of the student's dissertation committee. Students approved for a leave of absence are not required to be registered during the approved leave period and the leave time does not count in the degree time limit. Students seeking a Medical Leave of Absence may apply for Medical Leave as outlined under the Hardship Withdrawal (p. 847) section.

Time Limits

- Completion of all prerequisite coursework must be completed no later than one year from acceptance into program
- Completion of all required coursework beyond prerequisites (i.e. core, research, and concentration courses) must be completed no later than three years from acceptance into program or completion of prerequisite coursework, whichever is later
- Successful completion of comprehensive exam(s) must be completed no later than two semesters from completion of required coursework
- Approval of dissertation topic and committee must be completed no later than two semesters from completion of comprehensive exams
- Successful defense of dissertation proposal must be completed no later than two semesters from topic/committee approval or three semesters from completion of comprehensive exams, whichever is sooner
- Successful final defense of dissertation must be completed no later than two years from successful proposal defense
- Satisfaction of all requirements for submission of completed dissertation must be completed no later than one semester from successful final dissertation defense
- Completion of all program requirements, to include coursework, practicum, and dissertation must be completed no later than seven years from beginning of required coursework beyond prerequisites

NOTES:

1. Students in violation of policies on grades or time limits may submit a written appeal to the PhD Advisory Committee via the Program Director, explaining why they believe their situation merits an exception to the policy.
2. Enrollment and participation are expected to be continuous from a student's acceptance into the program. A student who needs to be excused from enrollment for one semester due to unusual circumstances should submit a written request and explanation to the Program Director. The Director may grant one such excusal, but anything more will require consideration by the COB Graduate Curriculum and Programs Committee.

Annual Reviews

At the conclusion of each Spring semester, the Program Director will solicit feedback from all faculty who've had any significant professional interaction with any of the program's students during the preceding year. Combining this feedback with his/her direct observations, the Director will accomplish a written review of each student's performance during the preceding year. The review will culminate with a recommendation as to whether the student should be retained in the program. Students will be given the option of offering a written response within three work days. If, after considering any written response, the Program Director still believes a student should be eliminated from the program, he/she will submit the recommendation (with all supporting materials) for a decision by the PhD Advisory Committee. At the same time, the Director will submit key data for all students enrolled in the program to that committee for review. As a minimum, the data for each student will include a list of all courses taken, all grades earned, and the start and completion date for each major stage of the program, i.e. prerequisite coursework, required coursework, comprehensive exams, dissertation topic/committee approval, proposal defense, final defense, and submission of completed dissertation. Based on this data, the Director will ask the committee to consider the elimination of all students in violation of any program policy on grades or time limits, including any appeals submitted by those students.

Program of Study: Ph.D. in Logistics and Supply Chain Management Degree

A student admitted to the College of Graduate Studies as a prospective candidate for the Ph.D. in Logistics and Supply Chain Management degree must present evidence of satisfactory completion (a grade of “C” or better) of the following “Prerequisite” course content in Business or graduate equivalents, unless a waiver is obtained from the Ph.D. Program Director.

Secondary or P-12 Education Certification

For Those Interested in Secondary Education (Grades 6-12) Certification with a Business Degree

Students who plan to seek teacher certification after completion of the B.B.A. program (Accounting, Finance, Information Systems, Logistics and Intermodal Transportation, Management, Marketing, or Economics) may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. To meet content requirements, the following courses must be completed as part of or in addition to your current program of study.

Total Credit Hours 60

Focused Methods

Additional depth in any method suitable for LSCM research in COB or across GSU. To be arranged and subject to program's administrative approval.

Directed Study

Project-based, independent, special topics or other studies available and approved prior to or along with dissertation work. Must be suitable for LSCM research and offered in COB or across GSU. To be arranged and subject to program's administrative approval.

For Those Interested in Secondary Education (Grades 6-12) Certification with an ECONOMICS Degree:

Students who plan to seek teacher certification after completion of the B.B.A. Economics program may achieve this through the Master of Arts in Teaching (MAT) or a non-degree certification program. If all B.B.A. Economic requirements are met, typically no other Economics content courses are required.

The following education courses may also be taken as electives while enrolled in your bachelor’s program:

<table>

Education Area F “Preprofessional Block” (PPB) courses may also be taken; however the PPB courses will not count toward certification requirements or MAT degree requirements. These courses can provide undergraduate students information and experiences in school settings that will help them make more informed decisions about becoming a teacher. Since the three PPB courses have USG-mandated field experiences, the following guidance should be followed:

- BA/BS/BBA majors can take the complete 9 credit PPB block of courses with the required 50 credits of field experience; OR
- BA/BS/BBA majors can take Exploring Learning and Teaching (EDUC 2130) concurrently with PPB Practicum (EDUC 2090) (50 contact hours in a school) – total of 3 credits. After taking Exploring Learning and Teaching (EDUC 2130), those students can take one or both of the other PPB courses with approximately 10 credits of field experience with each course. These courses are:
  - Investigating Critical and Contemporary Issues in Education (EDUC 2110) (3)
  - Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts (EDUC 2120) (3)

NOTE: GACE Program Admission Assessment and GACE Content Assessment examination and 2.5 cumulative GPA requirements must be met for certification program admission and should be considered during enrollment in the bachelor’s program.

Education

Vision

We envision a College of Education that continues to grow in its national recognition for excellence and innovation in teaching, scholarship, and outreach; and becomes the choice for novice and experienced professionals desiring a high quality, flexible education to help them meet their individual intellectual and career goals.

Mission

The mission of the College of Education is to prepare students to teach, lead, counsel, and model life-long learning; engage in scholarship that provides new pathways to meet the needs of a dynamic, diverse society; and facilitate access to learning opportunities that are authentic, student-centered, and technology-rich.

College Structure

- Admission and Retention in College of Education Programs (p. 341)
- Admission and Retention in the Teacher Education Program (p. 341)
- Admission to Graduate Clinical Practice (p. 342)

- Teaching Education Program (p. 390)

Advisement

Students in M.A.T., M.Ed., Ed.S., and Ed.D. programs are assigned to faculty advisors or professional advisors in the Graduate Academic Services Center. Advisement takes place in the advisor's office or by telephone, mail, or e-mail, as appropriate. Since the College's programs are developed to enable students to meet the certification requirements of the Georgia Professional Standards Commission, it is critical that students meet with their advisors to plan their programs of study before the completion of 12 credit hours. Students should also consult their graduate advisor for information on any exit comprehensive assessment (if required) for the M.Ed. or Ed.S. program. Note: If seeking initial teaching certification as a non-degree or a M.A.T. candidate, a transcript evaluation should be completed by the College's Graduate Academic Services Center. Once transcripts are evaluated, a faculty advisor will be assigned.

Admission and Retention in College of Education Programs

A student must be formally admitted to the graduate degree program for which he/she intends to earn a degree. Refer to the College of Graduate Studies for limits on the number of courses that may be applied to a program for non-degree seeking students.

In order to be admitted to a graduate education program, a student must meet all admission criteria as identified for the specific graduate program (degree and non-degree).

Prior to a structured field placement (i.e., an internship, practicum, and on-going experience that is more than a one-time classroom project), a graduate student must:

1. Meet all admission and retention requirements for the graduate education program, including GPA requirements.
2. Have a disciplinary record clear of any actions which might be a detriment to placement and successful performance in a school or other educational/community agency internship setting.
3. Disclose any previous misconduct or professional ethics violations or any pending professional ethics violations (e.g., pending PSC investigations).
4. Exhibit appropriate mental, emotional, and physical health skills and capabilities needed to meet the expectations of the profession.
5. Confirm that he/she continues to hold tort liability insurance coverage.
6. Complete a criminal background recheck. Please be aware that if a criminal background check (or recheck) shows a pending criminal charge or a criminal conviction, this may prevent you from receiving a field placement.
7. Participate in any required orientation activities for the internship.

All of the following requirements must be met for retention in a graduate education program:

1. Maintain required GPA.
2. Successfully complete all key assessments required by the program.
3. Successfully complete all field experiences required by the program.
4. Maintain an active account with the College of Education’s electronic assessment and data management system while enrolled as a graduate student.
5. Successfully complete all requirements specified by the program and be making satisfactory progress toward achieving program outcomes. Programs will be responsible for monitoring student progress and providing guidance to students who may be having difficulty meeting retention requirements.
6. Must not have violated the Georgia Professional Standards Commission’s Code of Ethics for Professional Educators. Must not have a past reprimand, monitoring, or warning statement in the educator’s certification file. Failure to report any violation of state or federal law to the Professional Standards Commission within 90 days is grounds for exclusion from a program.
7. Must not have been found in violation of the Georgia Southern University Student Conduct Code. Reviews will be made on a case-by-case basis based on the seriousness of the violation and with regard to consistency.
8. Maintain liability insurance.
9. Students who are required to participate in structured field placements as part of their graduate program are required to complete a criminal background recheck on admission to the program and before commencing the structured field placement. Students will be required to undergo a criminal background recheck once every two years but will not be required to perform a background recheck more than one time per year if their program requires multiple structured field placements. Students enrolled in the M.A.T. program who are not hired as teachers must apply for and receive a Preservice Certificate from the Georgia Professional Standards Commission: http://coe.georgiasouthern.edu/ssc/certification.
10. Meet all retention criteria established by the College of Graduate Studies.

Be sure to check the specific program page in the catalog for additional requirements.

Admission and Retention in the Teacher Education Program

Admission to the Teacher Education Program (TEP) is required for those students wishing to pursue the M.A.T. degree or related non-degree
program that leads to initial teacher certification. (See the Undergraduate Catalog (p. 39) for undergraduate TEP requirements.) M.A.T. or non-degree certification students must make formal application for admission into the Teacher Education Program which includes a TEP admissions folio review during Step One of the program. Also, during Step One of the M.A.T. program, students begin using an electronic assessment and data management system. This system supports the monitoring and assessment of students’ progress through the TEP.

In order to be admitted into the Teacher Education Program (TEP), a **graduate student** must have:

1. Earned a minimum cumulative GPA of 2.50 or better on all previously attempted coursework.
2. Earned a total adjusted GPA of 2.75 or higher on all teaching field course work.
3. Completed English composition and college algebra courses (or equivalents) with a minimum grade of “C.”
4. Successfully completed the GACE Program Admission Assessment examination or be exempted by SAT/ACT/GRE scores.
5. Successfully completed the appropriate GACE Content Assessment examination. (Not required for MAT Concentration in Special Education.)
6. Successfully completed the TEP Admissions Folio Review during Step One of the program.
7. Earned a passing evaluation on TEP Admissions field experience rubrics during Step One of the program. Any student who does not successfully complete the field component of the required course(s) may apply through the COE graduate studies office to attempt this field experience again. This field experience will be repeatable as field placements are available and must be completed successfully within three attempts, including the original attempt.
8. Successful completion of writing sample and interview, if applicable (see Transfer Student Plan available from the College of Education’s Student Success Center.)
9. Submitted proof of liability insurance.
10. Completed a criminal background check.
11. Opened an active account with the College of Education’s electronic assessment and data management system.
12. Created a MyPSC account with the Georgia Professional Standards Commission and claim Georgia Southern University as your program provider.
13. Completed the Georgia Educator Ethics-Program Entry (350).
14. Received a Preservice Certificate from the Georgia Professional Standards Commission.

All of the following requirements must be met for **retention** in the Teacher Education Program:

1. Students must maintain a cumulative GPA of 3.0 or higher, in the MAT program.
2. Students must earn a minimum grade of “C” in all professional education and all teaching field course work.
3. Students must successfully complete all field experiences.
4. Students must not have been found in violation of the Georgia Southern Student Conduct Code. Reviews will be made on a case-by-case basis based on the seriousness of the violation and with regard to consistency.
5. Students must not have violated the Georgia Professional Standards Commission’s Code of Ethics for Professional Educators. Students are provided a copy upon admission and must sign a statement agreeing to abide by this Code of Ethics upon admission into TEP.
6. Students must be making satisfactory progress toward meeting program objectives. Programs will be responsible for monitoring student progress and providing guidance to students who may be having difficulty meeting retention requirements.
7. Students must maintain liability insurance.
8. Students must maintain an active account with the College of Education’s electronic assessment and data management system.

Be sure to check the program page in the catalog for additional requirements.

### Admission to Graduate Clinical Practice

Clinical practice is required in all teacher preparation programs at the initial certification level. In order to participate in the student teaching/internship program, a teacher candidate in a MAT or graduate non-degree certification program must:

1. Meet all admission requirements for the Teacher Education Program.
2. If not required for program admission, attempt the GACE Content Assessment appropriate to the field.
3. Possess valid liability insurance.
4. Pass the Georgia Educators Ethics-Program 360 Assessment.
5. If not employed as a Teacher of Record, possess a Preservice Certificate from the Georgia Professional Standards Commission.
6. Apply for clinical practice by the established deadline one academic semester prior to registration for the course.
7. Note: School districts may have additional requirements for student teacher/intern placed in their schools. Student teacher/interns must meet these additional requirements.
8. Pass the Georgia Educators Ethics – program Exit (360).

### Certification

The programs offered by the College of Education at the graduate level are designed to prepare teachers and other school personnel for certification in the State of Georgia. The College of Education, in accordance with the Georgia Professional Standards Commission, provides courses for individuals who wish to reinstate expired certificates, add fields, and update certificates. For individuals who hold a bachelor’s degree, initial teaching certification may be obtained through the Master of Arts in Teaching (M.A.T.) program or similar non-degree graduate programs of study. Note: It is the students’ responsibility to confirm that their academic plans meet current certificate requirements of the Georgia Professional Standards Commission.

All College of Education candidates completing programs that qualify and plan to seek initial certification in Georgia must file an application for an induction certificate. This will include opening a MyPSC account with the Georgia Professional Standards Commission and claiming Georgia Southern University as the program provider. The applications for initial certification along with the verification of legal presence (forms are available at www.gapsc.com (http://www.gapsc.com)) will be filed through the candidates MyPSC account or through the candidates Board of Education. The Certification Officer will verify program completion to the Georgia Professional Standards Commission.

College of Education candidates, who are employed as educators in the State of Georgia, will complete the application process through their local units of administration (LUA). Program completion will be verified to the Georgia Professional Standards Commission through the College of Education Certification Officer, Ms. Christina Thompson, 912-478-0698 or cjthomp@georgiasouthern.edu
Department of Curriculum, Foundations, and Reading

The Department of Curriculum, Foundations, and Reading provides a service function to all other programs in the College. Undergraduate and graduate level courses are offered in the areas of educational foundations, educational psychology, curriculum theory and development, reading education, and educational research. The Department also offers several graduate degree programs: a master's degree program in reading education and in evaluation, assessment, research, and learning; an education specialist degree program in reading education; and a doctoral degree program in curriculum studies. In addition to degree programs, the department offers the reading endorsement and graduate certificates in applied research and evaluation and in curriculum and pedagogy for social justice.

Programs

Doctoral
• Curriculum Studies Ed.D. (p. 343)

Education Specialist
• Reading Education (K-12) Ed.S. (Online) (p. 345)

Master's
• Evaluation, Assessment, Research, and Learning M.Ed. (Online) (p. 346)
• Reading Education M.Ed. (Online) (p. 346)

Certificates
• Applied Research and Evaluation Certificate Program (Online) (p. 347)
• Curriculum and Pedagogy for Social Justice Certificate (p. 348)

Endorsements
• Reading Endorsement: Classroom Teacher of Reading Program (Online) (p. 347)

Curriculum Studies Ed.D.

Degree Requirements: 66-78 (Minimum of 66 Credit Hours beyond Master’s Including Dissertation, 60 Credit Hours beyond Master’s Excluding Dissertation)

Admission Requirements
The following minimum admission requirements must be met:

1. Complete the work necessary to be eligible for the minimum of a Master’s degree from an accredited graduate institution.
2. Present a minimum grade point average of 3.50 (4.0 scale) in all graduate work attempted (or other appropriate evidence of scholarly aptitude necessary for doctoral study).
3. Present current official report from the Graduate Record Examination (GRE) or the Miller’s Analogies Test (MAT) showing competitive scores. International Students who have not earned a degree at an institution of higher education in the United States must also submit the results of the TOEFL Examination.
4. Submit completed application for admission, required application fee and official transcripts consistent with the College of Graduate Studies admission requirements.
5. Submit three (3) professional letters of reference.
6. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
7. Complete a writing sample.
8. Complete an interview, if requested.

Applicants’ credentials will be evaluated by the Ed.D. in Curriculum Studies Admissions Committee in order to identify the candidates in that applicant pool to recommend for admission; admission is competitive. The number of applicants accepted each year will be dependent upon available resources. Applications will be evaluated once per year for Summer admissions. The deadline for applications is January 30. Students seeking a certificate upgrade must identify a concentration (i.e., certification field) on the Ed.D. admission application.

Enrollment
One academic year of continual enrollment.

Time Limit
Doctoral students must pass the Candidacy Exam within five years from the first Ed.D. admission registration term and no later than the last semester of Ed.D. course work or the following semester. All degree requirements must be completed within five (5) years of passing the Candidacy Exam. After successful completion of the Candidacy Exam, students have five years to finish program requirements, including the Dissertation; otherwise, the Candidacy Exam must be retaken.

Program of Study
This degree program consists of work in five areas:

1. Curriculum Studies Foundations,
2. Research and Inquiry,
3. Curriculum and Pedagogy Courses,
4. Emphasis Area, and

The first two areas require a combined minimum of 39 credit hours of course work, the third area requires a minimum of 9 credit hours of course work, the fourth area requires a minimum of 12 credit hours, and the fifth area requires a minimum of 6 credit hours. The complete program requires a minimum of 60 credit hours of course work plus a minimum of 6 credit hours of dissertation.

Some students might enter the program carrying course work beyond the Master’s degree. Once admitted and a Candidacy Committee Chair is identified, up to 9 credit hours of applicable and appropriate post-Master’s work may apply toward degree requirements with the approval of the student’s Candidacy Committee Chair.

Curriculum Studies Foundations
This is the nexus of the program. As such, it contains courses to be taken by all doctoral students. The Core intertwines the theoretical, ethical, and historical concepts underpinning curriculum work with advanced theories of design, development, and implementation.

Research and Inquiry
This portion of the program is designed to create scholars who might apply their knowledge base to the solving of problems encountered in daily education work. Both components of the Research and Inquiry Core are
understood to be essential in the preparation of doctoral students who will engage in meaningful, productive investigations into critical issues in curriculum. The Research component provides for advanced study into specific methodologies and their appropriate applications. The Inquiry component addresses theoretical questions of orientation of various research paradigms so that the doctoral student might make an informed decision as to the general approach (i.e., quantitative or qualitative) he/she will wish to pursue in order to effectively address a topic or problem in curriculum.

**Curriculum and Pedagogy Courses**

This praxis-oriented segment of the program of study provides opportunities for students to apply curriculum theory in their professional work environments. Curriculum and pedagogy courses satisfy the advanced pedagogy requirement for students seeking a certificate upgrade.

**Emphasis Areas**

This program offers three interdisciplinary emphasis areas covering a broad terrain of scholarly inquiry and educational application.

1. **Cultural Curriculum Studies**
   This emphasis area provides intensive exposure to critical aspects of the Curriculum Studies field. It also centers on the study of popular culture in its many manifestations and the implications of the ways in which the study of these educational sites impact the social construction of identity and the intersections of popular culture on pedagogy and curriculum theory.

2. **Learning, Development, and Curriculum**
   This emphasis area meets the needs of many practicing professionals including curriculum directors, staff development personnel, instructional coordinators, high school department chairs, and lead teachers as well as others in teaching or administrative positions at the P-12 level or in higher education.

3. **Multicultural and Social Justice Education**
   This emphasis area reflects the growing importance of addressing issues of culture, diversity, and social justice at all levels of education. The emphasis area allows examination of the needs of culturally diverse groups, the relationship between culture and academic achievement, and processes and mechanisms for realizing social justice aims within formal and informal educational environments.

**Grade Average**

To be eligible for graduation, a student must maintain a cumulative 3.25 grade point average. A student will be excluded from the program upon earning grades of “C” or below in two or more courses.

**Program of Study**

NOTE: All electives must be approved by committee chair.

Reading Education (K-12) Ed.S. (Online)

Degree Requirements: 33 Credit Hours

Certificate upgrade information: The educator who holds a level five certificate in Reading, Middle Grades Reading, Early Childhood Education, or Special Education with a cognitive area in Reading will qualify for a certificate upgrade in any Georgia Professional Standards Commission approved certification area. Students seeking a certificate upgrade must identify a concentration (i.e., certification field) during the Ed.D. admission process in order for the concentration to appear on their transcript.

Students must apply coursework to their certification field.

Admission Requirements

Regular

1. Complete requirements for a Master’s degree from a regionally accredited institution.

2. Possess or be eligible for a level five certificate. Candidates who have completed all eligibility requirements for the Professional Level Five Certificate have until the end of the first semester to obtain the certificate.

3. Present a 3.25 or higher GPA on all graduate work attempted.

4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.

5. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Total Credit Hours

33

1. Must be taken during the first nine (9) credits; Prerequisite(s): Admission into the Ed.S. in Reading Education.

2. Prerequisite(s): Research on Current Trends and Issues (ESED 8130) or concurrently enrolled.

3. Ed.S. candidates must complete the Content Specific Requirements in Reading Education.

4. Prerequisite(s): Educational Statistics I (EDUR 8131), Research on Current Trends and Issues (ESED 8130), Teacher Leadership (ESED 8131), Curriculum and Instruction (ESED 8132), Transforming Learning with Technology (ITEC 8231)

5. Prerequisite(s): Educational Statistics I (EDUR 8131), Field-Based Educational Research (EDUR 8434), Research on Current Trends and Issues (ESED 8130), Teacher Leadership (ESED 8131), Curriculum and Instruction (ESED 8132), Transforming Learning with Technology (ITEC 8231)

Other Program Requirements

• Successful completion of the Ed.S. Comprehensive Exit Assessment; involves constituting a three faculty advisory committee to guide field study, and requires the completion and oral presentation of a major field-based action research paper.
• Must successfully complete assessments identified at each program transition point.
• Maintain an active account with the COE electronic data management system.
• Claim Georgia Southern University as your program provider in your My PSC Account during your first term of enrollment (see information under My PSC Account in Graduate Catalog, College of Education).

Reading Education M.Ed. (Online)

Degree Requirements: 36 Credit Hours

Certificate Upgrade Information: The educator will qualify for a level 5 Georgia certificate upgrade with a new Field program upon successful completion of all program requirements, achieving a passing score on the required GACE Content Assessments for Reading, and applying for and successfully adding the Reading Education Specialist Program to the educator's GaPSC certificate.

Admission Requirements

Regular

1. Complete requirements for a bachelor's degree from a regionally accredited institution.
2. Possess a valid, level four or higher, Professional, Advanced Professional, or Lead Professional teaching certificate, leadership certificate, service certificate, or Life certificate.
3. Have at least three years teaching experience.
4. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
5. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
6. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of "B" or higher in their first nine (9) credit hours of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

### Applied Research and Evaluation Certificate Program (Online)

#### Degree Requirements: 12 Credit Hours

**Program Description**

The Applied Research and Evaluation Certificate program consists of four 3-credit hour graduate-level courses in the College of Education, all of which will be delivered online. This certificate offers students the opportunity to develop fundamental research strategies and apply this knowledge in various situations. Courses in the program provide students with hands-on experience collecting and analyzing data, interpreting data, and preparing findings for research reports. These skills will be useful for individuals seeking or employed in a professional position where evaluation and assessment are required to monitor and maintain high quality services.

This graduate certificate can be completed as a stand-alone program or in conjunction with a complementary master’s degree. Example academic disciplines where a master’s degree may be heightened by an Applied
Research and Evaluation certificate include psychology, sociology, mental health, criminology, public health, or education.

**Admission Requirements**

1. Complete requirements for a Bachelor’s degree from a regionally accredited institution.
2. Present a cumulative 3.0 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
3. Submit a personal statement of purpose, approximately 500 words, that identifies the applicant’s reasons for pursuing certificate program.

**Program of Study**

**Prerequisite**

Educational Research (EDUR 7130) is a prerequisite to the certificate program. Successful applicants to the certificate program who have not completed Educational Research (EDUR 7130) (or equivalent) will be provisionally admitted. Following successful completion of Educational Research (EDUR 7130) (grade of B or better), students will be moved from provisional to regular admission status in the program.

Students who complete this certificate in good standing (cumulative grade point average of at least 3.0) may apply to the online M.Ed. program in Evaluation, Assessment, Research, and Learning. Admission requirements for the M.Ed. program include submission of competitive Graduate Record Examination (GRE) scores. Successful applicants will receive credit for certificate coursework (12 hours or 15 hours if Educational Research (EDUR 7130) is required) toward the M.Ed. degree if the Applied Research and Evaluation certificate has been completed within the last 3 years. The M.Ed. requires a total of 36 hours with advanced coursework in evaluation, assessment, research, and learning.

**Curriculum and Pedagogy for Social Justice Certificate**

Degree Requirements: 18 Credit Hours

**Program Description**

The Curriculum and Pedagogy for Social Justice Certificate consists of six graduate level education courses designed to provide educators with the theoretical foundations, historical knowledge, practical experience, and supportive infrastructure needed to become reflective practitioners who successfully integrate social justice education into their classrooms. This graduate certificate can be completed as a stand-alone program or along with any of the Master’s degrees offered in the College of Education. An underlying assumption of this graduate certificate is that educators who engage in social justice education will be able to identify dehumanizing sociopolitical conditions that undermine good teaching and academic achievement and will actively engage in pedagogical practices to alter those conditions to educate all students to reach their highest potential.

**Admission Requirements**

1. Completed requirements for a Bachelor’s degree in an institution accredited by proper regional accrediting association or an equivalent at a recognized national or international university.
2. Present a cumulative 3.0 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
3. Submit a personal statement of career goals, purposes, and objectives, approximately 500 words that identifies the applicant’s reasons for pursuing certificate program.

**Program of Study**

The Graduate Certificate program requires a total of 18 credit hours. There are five required courses and one elective course. All of the courses are online except for the two capstone courses which are hybrid. The courses are rotated on a three-semester cohort model that begins in the Fall and ends with two capstone courses in the Summer.

**Department of Elementary and Special Education**

The Department of Elementary and Special Education at Georgia Southern University offers undergraduate degree programs that lead to initial teacher certification in the areas of elementary education (P-5), special education (P-12), and elementary education and special education combined (P-5). All areas also offer non-certification tracks that provide students interested in education the opportunity to take coursework with planned minors and concentration. At the graduate level, the department offers initial certification Master of Arts in Teaching (M.A.T.) degrees in elementary education (P-5) and special education (P-12), Master of Education (M.Ed.) degrees in elementary education (P-5) and special education (P-12), with concentrations in either general or adaptive curriculum), Education Specialist (Ed.S) degrees in elementary education (P-5) and special education (P-12), and a Special Education Transition Specialist Endorsement. The department also offers an M.Ed. in Curriculum and Instruction that is part of a USG collaborative with Valdosta State and Columbus State Universities. Many graduate programs offered by the department are 100% online. All programs are based upon the concept of developmentally appropriate practices and value diverse, intensive field experiences in a range of grade levels and school settings.

(Collaborative Degree with Valdosta State University and Columbus State University)

Certificate Upgrade Information: This program adds the new field of Curriculum and Instruction to a Professional certificate. This is an advanced professional program which can only be added to a level four or higher renewable Professional certificate in any field. The educator can apply and be admitted to the program with an Induction certificate; however, in order to add the new field and receive a certificate upgrade, the candidate must hold a level four or higher renewable Professional certificate.

The educator who is in possession of a level four or higher renewable Professional certificate will qualify for a level 5 Georgia certificate upgrade with a new Field program upon successful completion of all program requirements, achieving a passing score on the required GACE Content Assessments for Curriculum and Instruction, and applying for and
successfully adding Curriculum and Instruction to the educator’s GaPSC certificate.

This program is approved by the Georgia Professional Standards Commission as a program leading to certification in Curriculum and Instruction. Completing the program will prepare candidates for certification, but candidates should consult with program faculty, the College of Education Graduate Academic Services Center, or the Georgia Professional Standards commission regarding current certification rules upon entering the program.

**Admission Requirements**

**Regular**

1. Complete requirements for a bachelor’s degree from an accredited institution.
2. Possess a valid, level four or higher Induction, Professional, Advanced Professional, or Lead Professional teaching certificate, leadership certificate, service field certificate, or Life certificate.
3. Present a 2.75 or higher GPA on all undergraduate and graduate work combined.
4. GRE or MAT scores will not be required for applicants who hold a clear renewable certification in a teaching, service, or leadership field; instead the applicants must submit passing GACE or PRAXIS scores.

**Provisional**

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

**Program Exit Experience**

- Successful completion of each key assessment identified at each program transition point.

**Other Program Requirements**

- The candidate’s progress will be evaluated after the first 9 credits of course work, including the GPA and performance on the key assessments embedded in the courses, including dispositions.
- Maintain an active account with the COE electronic data management system.
- Claim Georgia Southern University as your program provider in your MyPSC Account during your first term of enrollment (see information under MyPSC Account in Graduate Catalog, College of Education).

Certificate Upgrade Information: An educator who holds a level five Georgia certificate in Elementary Education will qualify for a level six certificate upgrade upon successful completion of all program requirements. (See catalog section on Certification).

**Degree Requirements: 33 Credit Hours**

**Admission Requirements**

**Regular**

1. Complete requirements for a Master’s degree from a regionally accredited institution.
2. Possess or be eligible for a Georgia level five certificate in Elementary Education, or possess or be eligible for a Georgia Certificate of Eligibility for level five Induction Certificate in Elementary Education. Candidates who have completed all requirements for the Georgia Certificate of Eligibility for a level five Induction Certificate have until the end of the first semester to obtain the certificate.
3. Present a 3.25 or higher GPA on all graduate work attempted.
4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
5. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

**Provisional**

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

or Autism Endorsement | 3

Mild Disabilities - General Curriculum | 21
The Special Education Transition Specialist Endorsement program develops highly skilled special education transition specialists who can demonstrate and explicitly explain:

- career development and transition planning for students with special needs;
- the vocational assessment for students with special needs;
- interagency planning and service for students with special needs as they transition to adulthood; and
- appropriate community environments, methods for linking community-based instruction, and the interagency agreement methodology for preparing students with multiple and severe disabilities for adulthood.

### Requirements

1. An earned baccalaureate degree from a regionally accredited institution.
2. A minimum overall undergraduate grade point average of 3.00 OR in most recent degree or recommendation from employer.
3. Documented T-4 (or higher) certification or equivalent state-issued, clear, renewable teaching certificate in special education;
4. A current clear criminal background check conducted as directed by the College of Education. Note: This requirement may be waived only with evidence of employment as a full-time teacher of record in a public school in Georgia. Evidence must be presented on the College of Education’s Employment Verification Form.
5. A student must be admitted to the university on a degree-admission basis.

### Other Program Requirements

- All new master’s level candidates must schedule and meet with their assigned Special Education Advisor for a brief advisement orientation meeting prior to their first semester of course work in order to meet the registration requirements of the program.
- Candidates must take courses in sequenced order to meet Special Education Program Key Assessment criteria.
- Successfully complete assessments identified at each program transition point.
- Maintain an active account with the COE electronic data management system.
- Claim Georgia Southern University as your program provider in your MyPSC Account during your first term of enrollment (see information under MyPSC Account in Graduate Catalog, College of Education).

#### Autism Endorsement

- Concentration must be in a curriculum area in which one is currently certified: Adaptive Curriculum or General Curriculum.

#### or Reading Endorsement

- SPED 8411 (Vocational Assessment for Special Education Students), SPED 8412 (Interagency Planning and Service for Transition to Adulthood), and SPED 8413 (Community-Based Instruction)
- SPED 8531 (Nature and Needs of Students with Autism), SPED 8532 (Implementing Evidence-Based Practices in Teaching Students with Autism Spectrum Disorder), and SPED 8533 (Assessment and Procedures for Students with Autism Spectrum Disorder)
- SPED 8532 (Implementing Evidence-Based Practices in Teaching Students with Autism Spectrum Disorder) and SPED 8533 (Assessment and Procedures for Students with Autism Spectrum Disorder)
- READ 7131 (Approaches to Literacy Instruction) and READ 7330 (Literacy in the Content Areas)

#### Total Credit Hours

36

1. Concentration must be in a curriculum area in which one is currently certified: Adaptive Curriculum or General Curriculum.
2. SPED 8411 (Vocational Assessment for Special Education Students), SPED 8412 (Interagency Planning and Service for Transition to Adulthood), and SPED 8413 (Community-Based Instruction)
3. SPED 8531 (Nature and Needs of Students with Autism), SPED 8532 (Implementing Evidence-Based Practices in Teaching Students with Autism Spectrum Disorder), and SPED 8533 (Assessment and Procedures for Students with Autism Spectrum Disorder)
4. SPED 8532 (Implementing Evidence-Based Practices in Teaching Students with Autism Spectrum Disorder) and SPED 8533 (Assessment and Procedures for Students with Autism Spectrum Disorder)
5. READ 7131 (Approaches to Literacy Instruction) and READ 7330 (Literacy in the Content Areas)

#### Other Program Requirements

- All new master’s level candidates must schedule and meet with their assigned Special Education Advisor for a brief advisement orientation meeting prior to their first semester of course work in order to meet the registration requirements of the program.
- Candidates must take courses in sequenced order to meet Special Education Program Key Assessment criteria.
- Successfully complete assessments identified at each program transition point.
- Maintain an active account with the COE electronic data management system.
- Claim Georgia Southern University as your program provider in your MyPSC Account during your first term of enrollment (see information under MyPSC Account in Graduate Catalog, College of Education).

### Teaching M.A.T. (Concentration in Elementary Education P-5) (Hybrid)

#### Degree Requirements: 45 Credit Hours

**Program Intent and Admission Requirements:**

The Master of Arts in Teaching (MAT) leads to initial teaching certification and a master’s degree for those persons who hold a bachelor’s degree from a regionally accredited institution.

Elementary Education certification (P-5) for candidates who hold a bachelor’s degree. The program of study is designed to meet all content and methods requirements for initial certification in 45 credit hours. Candidates are required to complete supervised field experiences in Georgia schools to meet certification requirements. Two delivery options
are available: a hybrid program on the Armstrong Campus in Savannah and a fully online program.

**Admission Requirements**

**Regular**

1. Hold a bachelor’s degree from a regionally accredited institution.
2. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
3. Submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.
4. Complete the state-required Georgia Educator Ethics–Program Entry (350) assessment. A minimum score is not required.
5. Qualify for a Georgia Pre-Service certificate or Induction Pathway 4 certificate (see Certification section in the Graduate Catalog).
6. Submit a letter of intent (using the required format) that identifies the applicant’s reasons for pursuing graduate study, and describes their desire to learn strategies that integrate cultural experiences, values, and understanding into the P-5 teaching and learning environment.
7. Two (2) Initial Disposition Assessments using the proper form. Assessment requests should be made to current or former supervisors, colleagues or faculty members.
8. Acknowledge “Disclosure and Affirmation” statements that address the Code of Ethics for Educators and the need for tort liability insurance.
9. International applicants and U.S. citizens whose native language is not English must demonstrate competence in English. Applicants must take and pass the Test of English as a Foreign Language (TOEFL) and post a score of at least 80 (internet-based test, IBT), 213 (computer-based test) or 550 (paper-based test) on the TOEFL. The official TOEFL score may not be more than two years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus prior to admission to the program.
10. Select the delivery option you are applying to: Either (1) the hybrid format that is based on the Armstrong/Savannah campus or (2) the 100% online format.

**Provisional**

Applicants may be approved for Provisional admission based on the quality of the admission material presented. Provisional students must earn grades of B or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

**Degree Requirements**

**Step One:** The steps represent one way to progress through the program but other schedules are possible.

The following courses are prerequisites to Steps Two and Three:

- ELEM 6130 Culturally Responsive Classroom Management
- SPED 6130 Introduction to Special Education

Admission criteria to the Teacher Education Program (TEP), must be met for progression to Step Two.

**Step Two:**

- ELEM 7332 Problem Solving and Mathematical Representations in the Elementary Classroom
- EDUF 7132 Critical Approaches to Early Childhood Development and Learning

**Step Three:**

- ELEM 6440 MAT Elementary Mathematics Methods
- READ 7330 Literacy in the Content Areas

And ONE of the following:

- ESED 5234G Cultural Issues: ESOL
- EDUF 6235 Multicultural Elementary Education

**Step Four:**

- ELEM 6250 Language Arts and Creative Activities
- EDUF 7133 Instruction-Based Assessment

**Step Five:**

- ELEM 6430 MAT Elementary Science Methods
- ELEM 6530 MAT Elementary Social Studies Methods
- ELEM 6733 MAT Internship I

**Step Six:**

Choose from:

- ELEM 6799 MAT Internship II (for candidates who are not teaching full time)
- ELEM 7799 Professional Internship (for candidates who are currently teaching full time on an Induction Pathway 4 certificate)

**Total Credit Hours**

Candidates who are teaching full-time on a level 4 Induction Pathway 1 certificate may apply for the level 5 Induction Pathway 1 certificate upon successful completion of Steps 1-6. Candidates who are not teaching during the program may apply for a level 5 Induction Pathway 1 certificate after successful completion of Steps 1-6 and obtaining a teaching position.

- All new MAT candidates must attend an on-campus orientation meeting in order to meet registration requirements.
- Candidates must take courses in the sequenced order to meet Elementary Education Program Key Assessment criteria.
- Applicants who reside within the designated service region must apply to the Armstrong Campus cohort.
- A part-time enrollment option is available for a limited number of candidates enrolled in the Armstrong Campus cohort. Applicants must select this option when applying.

**OTHER PROGRAM REQUIREMENTS**

- Candidates must successfully complete assessments at each program transition point.
- Candidates must successfully complete all field experiences.

**Advisement**

**Armstrong Hybrid Option**

Teaching M.A.T. (Concentration in Special Education P-12) (Hybrid)

Degree Requirements: 45 Hours

Program Intent and Admission Requirements:

The Master of Arts in Teaching (MAT) leads to initial teaching certification and a master's degree for those persons who hold a bachelor's degree from a regionally accredited institution.

Special Education General Curriculum certification (P-12) for candidates who hold a bachelor's degree in counseling, child and family development, English, mathematics, psychology, science, social science, or a closely-related field.

The total credit hours for the degree are dependent on previous course work completed in the area of certification. A transcript evaluation by the College of Education's Graduate Academic Services Center is required. Prerequisite content course work, based on the transcript evaluation, must be completed as a non-degree student before admission into the program. Two delivery options are available: a hybrid program on the Armstrong Campus in Savannah and a fully online program.

Admission Requirements

Regular

1. Hold a bachelor's degree from a regionally accredited institution.
2. Present a transcript evaluation by the College of Education's Director of the Graduate Academic Services Center, and completion of a specified prerequisite content course work.
3. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
4. Present a total adjusted GPA of 2.75 or higher on all teaching field course work.
5. Submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.
6. Complete the state-required Georgia Educator Ethics--Program Entry (350) assessment. A minimum score is not required.
7. Qualify for a Georgia Pre-Service certificate or Induction Pathway 4 certificate (see Certification section in the Graduate Catalog.
8. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant's reasons for pursuing graduate study and how admission into the program relates to the applicant's professional aspirations.
9. Acknowledge "Disclosure and Affirmation" statements that address the Code of Ethics for Educators and the need for tort liability insurance.
10. International applicants and U.S. citizens whose native language is not English must demonstrate competence in English. Applicants must take and pass the Test of English as a Foreign Language (TOEFL) and post a score of at least 80 (internet-based test, IBT), 213 (computer-based test) or 550 (paper-based test) on the TOEFL. The official TOEFL score may not be more than two years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus prior to admission to the program. For Study Concentration Four (Spanish), candidates are not required to take the TOEFL: rather, those individuals who did not complete their undergraduate degree in the English language must pass an Oral Proficiency Interview and a Writing Proficiency Test in English at the ACTFL-defined IH or above (tests administered by the Department of Foreign Languages).
11. If an applicant was previously enrolled in an initial teacher preparation program, an interview must be completed with the Program Coordinator prior to admission to the program.
12. Select the delivery option you are applying to: Either (1) the hybrid format that is based on the Armstrong/Savannah campus or (2) the 100% online format

Provisional

Applicants may be approved for Provisional admission based on the quality of the admission material presented. Provisional students must earn grades of B or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Total Credit Hours: 45

* After successful completion of the required courses for certification, successful completion of the state-required content pedagogy assessment (edTPA), successful completion of the GACE content assessment, and successful completion of the state-required Educator Ethics—Program Exit (360) assessment, candidates who are teaching full-time may apply for a level 4 Induction Pathway 1 certificate, and candidates who are not teaching may apply for a Certificate of Eligibility for a level 4 Induction Pathway 1 certificate.

* Candidates who are teaching full-time on a level 4 Induction Pathway 1 certificate may apply for the level 5 Induction Pathway 1 certificate upon successful completion of Steps 1-6. Candidates who are not teaching during the program may apply for a level 5 Induction Pathway 1 certificate after successful completion of Steps 1-6 and obtaining a teaching position.

Specific Program Requirements

- All new MAT candidates must schedule and meet with their assigned Special Education Advisor for a brief advisement orientation meeting prior to entering Step Two of the program in order to meet registration requirements.
- Candidates must take courses in sequenced order to meet Special Education Program Key Assessment criteria.
- Candidates must successfully complete an electronic portfolio project in order to exit the program.
- Candidates are required to complete 900 clinical hours to meet certification requirements. These clinical hours are included in the courses in this program of study.
- Although this is a hybrid program, candidates are strongly encouraged to attend Student Teaching Orientation and all edTPA information sessions.

OTHER PROGRAM REQUIREMENTS

- Must successfully complete assessments identified at each program transition point.

**Department of Leadership, Technology, and Human Development**

The Department of Leadership, Technology, and Human Development offers a broad range of programs that provide school/system-wide and student-oriented support services for traditional and alternative settings. A diverse selection of graduate programs prepare school and community agency personnel in the areas of school and clinical mental health counseling, educational leadership, adult education, higher education administration, instructional technology, and school psychology. A doctoral degree program in educational leadership is also offered by this department. In addition to degree programs, the department offers the adult education certificate program, certificate programs in educational leadership, instructional technology and school library media, and the teacher leader and the online teaching and learning endorsements.

Degree Requirements: 69 Graduate Credit Hours beyond Master’s including Dissertation (60 Graduate Credit Hours of coursework, Plus Minimum of 9 Dissertation Credit Hours).

Admission Requirements

The admission process has two phases. Applicants must be accepted for admission by both the Jack N. Averitt College of Graduate Studies and the Educational Leadership EDLD Program at Georgia Southern University. Application to or acceptance in the College of Graduate Studies in any other program does not guarantee admission to the Program of Educational Leadership. Applicants who wish to pursue advanced professional preparation in Educational Leadership with a view to becoming a candidate for the Ed.D. degree will be expected to file a formal application and present themselves to the faculty to meet program requirements. When applying for admission, applicants must indicate whether they are applying for the cohort for specialization in Higher Education Leadership or the cohort for specialization in P-12 Educational Leadership. Recommendations on admission will be made by program faculty only after screening procedures have been completed. Admission will be upon the recommendation of the EDLD program faculty and the approval of the Dean of the College of Graduate Studies.

The first phase of admission to the Ed.D. program in Educational Leadership requires the applicant’s satisfaction of the following standards:

1. Complete all College of Graduate Studies admission requirements.
2. Hold a Master’s degree at minimum from an institution accredited by the appropriate regional accrediting agency.
3. Present a minimum grade point average of 3.50 (4.0 scale) in previous graduate work.
4. Present current official scores from the Graduate Records Examination (GRE) on Verbal Reasoning, Quantitative Reasoning, and Analytical Writing.
5. Submit a brief, two-page resume that highlights the personal and professional achievements of the applicant.
6. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

The second phase of the admission process will require adherence to the following procedures:

1. Applicant credentials are rated by EDLD faculty.
2. These faculty, meeting as a committee of the whole, will use these ratings to assemble a list of top candidates for interviews.
3. Applicants will be invited to interview with EDLD faculty and produce a writing sample.
4. The Higher Education and P-12 EDLD cohorts may be combined based on the number of students admitted in each area.

Enrollment

The Ed.D. degree presupposes a minimum of five semesters of prescribed continuous study beyond satisfaction of Tier I requirements which cannot be secured through summer study alone. A minimum of 9 credits of Dissertation (EDLD 9999) is required beyond other coursework. Full-time residency (defined as continuous enrollment) is required throughout the program.

Time Limit

All course requirements for the Ed.D. degree, except the dissertation, must be completed within a period of three years. This time requirement begins with the first registration for Tier II on the student’s approved program of doctoral study. In addition, a candidate for the Ed.D. degree who fails to complete all degree requirements within five years after passing the qualifying examinations will be withdrawn from the program. When extenuating circumstances exist, students may apply for an extension of the time requirement. If an extension is granted, degree requirements must be completed that are consistent with the conditions and terms specified in the time extension notification.

Grade Average

A student must maintain at least a 3.50 GPA on all graduate courses taken and on all courses on the Program of Study.

Qualifying Examinations

A student must pass formal, comprehensive written and/or oral examinations before being admitted to candidacy for the degree. These examinations will be administered in accordance with policies in effect in the College of Graduate Studies and the candidate’s department. The results of the examination(s) will be reported to the College of Graduate Studies. If a student fails the qualifying examination for a second time, he/she will be removed from the program.

Admission to Degree Candidacy

The student, in conjunction with his or her Dissertation Committee, is responsible for initiating an application for admission to degree candidacy so that it is filed with the College of Graduate Studies at least one semester before the date of graduation. The application for degree
candidacy is a certification by the student's program that the student has shown the ability to do acceptable graduate work in the chosen field of study and that:

1. all prerequisites set as a condition for candidacy have been met;
2. all inquiry/research skill requirements have been met;
3. the Program of Study has been approved by the Dissertation Committee Chair, the Department Chair, and the Dean of the College of Graduate Studies;
4. a grade point average of 3.50 or higher has been maintained on all graduate courses taken and on all completed courses on the Program of Study; no more than one grade of "C" may be placed on the Program of Study;
5. written and/or oral candidacy examinations have been passed and reported to the College of Graduate Studies; and
6. the Dissertation Committee is confirmed and all of its members have been notified of their appointments.

Educational Leadership Ed.S.

Degree Requirements: 27 Credit Hours

The Educational Leadership Educational Specialist (Ed.S.) Degree Program is designed to prepare Educational Leadership (EDLD) candidates for Tier II advanced leadership positions that include P-12 school level principals or the equivalent, superintendents, or other LUA staff who supervise principals pursuant to the GaPSC Educational Leadership Preparation rule (Rule 505-3-.77).

Admission Requirements

Georgia Southern University Requirements

The applicant must meet the following Georgia Southern University Requirements:

1. Complete requirements for a Master's degree or higher in Educational Leadership from a regionally accredited institution. For the Tier II Educational Leadership Certification Only Option, hold an Educational Specialist degree or Doctorate degree from a regionally accredited institution and a Level 6 or Level 7 Georgia Educator Certification.
2. Present a 3.25 or higher GPA on all graduate work attempted.
3. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
4. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
5. Three years school/district experience prior to admission to the program.
6. Submit school/district endorsement and agreement for Residency at the Building or District level.
7. Hold a valid GaPSC Tier I Educational Leadership Certificate or the equivalent (a valid GaPSC-issued Standard Professional L or PL certificate in Educational Leadership) and are employed in a current leadership position.

GaPSC Requirements

Tier II of the Educational Leadership preparation program must be completed through an Ed.S. or Certification-only program. Admission is open to any individual who meets the Georgia Southern University and GaPSC requirements and providing that the candidate’s Local Unite of Administration (LUA) has entered into an agreement with Georgia Southern University that outlines the agreements related to Tier II leadership preparation. Said agreement must state that the LUA and school agree to allow candidates to complete 750 hours of clinical practice (supervised field experiences) and provides supporting documents, as well as access to opportunities to lead and participate in leadership functions as appropriate for completion of leadership performances. Additional requirements are listed below; additionally, candidates must comply with any rule changes and/or additions instituted by the GaPSC affecting Educational Leadership certification.

All applicants must present passing scores on the Educational Leadership Georgia Assessments for the Certification of Educators (GACE), Test 301, Georgia’s state-approved education lender certification assessment program, prior to program enrollment. All candidates must claim Georgia Southern University as their provider, which may be done by logging into your myPSC account (https://mypsc.gapsc.org/Home.aspx). This must be completed prior to signing up for the Georgia Ethics for Educational Leadership Assessment-Program Entry (Test 370).

All candidates admitted to any GaPSC-approved Educational Leadership program after fall term 2016, must have completed (does not have to pass) the Georgia Ethics for Educational Leadership Assessment-Program Entry (Test 370) prior to becoming enrolled. A candidate who completes this program entry requirement (Test 370) for Tier I. does not have to complete Test 370 for Tier II. Official documentation will be required.

All candidates completing any GaPSC-approved Educational Leadership program on or after July 1, 2016, must attempt the Georgia Ethics for Educational Leadership-Program Exit (Test 380) prior to completion and must pass the assessment to earn certification in the field of Educational Leadership.

Per the GaPSC Educator Preparation Rule 505-3-.77, the ETS Performance-Based Assessment for School Leaders (PASL) will be used as a certification requirement for Educational Leadership Tier II.

It is important to note that admission to and completion of Tier II does not ensure employment in a leadership position. Under state law, completion of an approved Tier II Educational Leadership program will not lead to additional pay until employed by a local Unit of Administration (LUA) in a leadership position that requires Tier II certification.

Concentration: School Administration, 27 Credit Hours

For students holding Tier I Educational Leadership Certification and seeking Tier II Educational Leadership Certification. The Program is administered through the Cohort Process, and the course sequence is prescribed and provided to candidates at orientation. The 750 required hours of clinical practice are embedded throughout coursework, and are guided cooperatively by the university and the school/district partner.

Instructional Technology Ed.S.

Degree Requirements: 30 Credit Hours

Admission Requirements

Regular

1. Complete requirements for a Master’s degree in Instructional Technology or closely related field such as Library & Information Science; or possess a Master’s degree in another field that includes a minimum of 18 graduate credits of instructional technology coursework. The Master’s degree must be from a regionally accredited institution.

2. Present a 3.25 or higher GPA on all graduate work attempted.

3. Students seeking certification in Instructional Technology through the Ed.S. program must possess a valid level four or higher teaching, leadership, service field, or Life certificate. Initial certification in school library/media is not available through the Ed.S. program.

4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.

5. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

This program is approved by the Georgia Professional Standards Commission as a program leading to certification in Instructional Technology. Completing the program will prepare candidates for certification, but candidates should consult with program faculty, the College of Education Graduate Academic Services Center, or the Georgia Professional Standards commission regarding current certification rules upon entering the program.

School Psychology Ed.S.

Degree Requirements: 78 Credit Hours

Program Intent

This program provides training to serve children and adolescents with learning, behavioral, or emotional problems in educational settings. After successful completion of 36 credits of course work and passing a written comprehensive examination, students may be awarded an interim M.Ed. degree and continue on in the program to complete the remaining requirements of the Ed.S. degree. The 36 credits required for the interim M.Ed. include the following courses: Professional Education Core Requirements (6 credits), Specific Requirements (27 credits), and Educational Research (EDUR 7130) (3 credits). Professional entry-level in the field of School Psychology requires Level Six (S-6) Certification which is acquired after successful completion of the prescribed Ed.S. Program of Study and a passing score on the GACE examination in School Psychology.

Admission Requirements

Regular

1. Complete requirements for a bachelor's degree in the social sciences or in education from a regionally accredited institution.
2. Present a cumulative 3.00 (4.0 scale) or higher GPA on all undergraduate and graduate work (if any) combined.
3. Submit a personal statement of purpose that includes reasons for selecting school psychology as a career, self evaluation of personal qualities that would be brought into the program, and the impacts the applicant believes school psychologists should have on the lives of children.
4. Submit three letters of recommendation from persons well acquainted with the applicant’s academic and/or professional performance.
5. Participate in an interview on-campus or by phone if notified.
6. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance. Students who are accepted into the program must agree to abide by the ethical principles established by the National Association of School Psychologists. Documentation of professional liability insurance must be submitted to the assigned advisor at the beginning of the first semester.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Adult Education M.Ed.

Degree Requirements: 30 Credit Hours

Program Intent

The program in adult education shall prepare individuals who are trainers and educators to better disseminate their knowledge to others. The program of study will require students to:

- Develop a deeper, comprehensive understanding of the adult learner through a plan of study which builds upon prior professional preparation and experience.
- Interpret adult behavior through exploration theories and research findings related to the physical, social, emotional, intellectual and moral development of the adult learner.
- Investigate historical and philosophical factors which influence curriculum and pedagogy/andragogy for the adult learner.
- Plan and facilitate lessons that elevate their learners’ subject matter knowledge and skills.
- Implement developmentally responsive practices that reflect the philosophical foundations of education.
- Employ best practices in the use of assessment using a variety of strategies to meet the varying abilities and learning styles of all learners.
- Implement appropriate instructional strategies designed according to learner variables and academic discipline.
- Understand the importance of working collaboratively with a variety of stakeholders.
- Engage in practices and behaviors that develop competence as professionals.

Admission Requirements

Regular

1. An earned bachelor’s or master’s degree from a regionally accredited institution.
2. A minimum overall undergraduate grade point average of 2.50 OR in most recent degree.
3. Two (2) letters of recommendation.
4. A letter of intent (following the program’s approved format).

Counselor Education M.Ed.
Degree Requirements: 60 Credit Hours

Program Intent
The Counselor Education program prepares counselors to work in school and community settings. There are two degree program concentrations based on educational background and career goals, and both concentrations are accredited by CACREP:

Concentration One
School Counseling - This concentration is designed for people who wish to work as school counselors. The concentration is designed for graduates to meet the requirements for school counseling certification in Georgia.

Concentration Two
Clinical Mental Health Counseling - This concentration is designed for people who wish to work as clinical mental health counselors in community agency settings (public, private, or non-profit).

Admission Requirements
Note: Admission to the graduate program is required. Non-degree status to achieve initial certification is not permitted.

Regular
1. Complete requirements for a bachelor’s degree from a regionally accredited institution.
2. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
3. Submit a personal statement of purpose, not to exceed 1000 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional goals and aspirations.
4. Submit a current resume.

Educational Leadership M.Ed.
(Online)

Degree Requirements: 36 Credit Hours

Completion of all program requirements leads to an M.Ed. as approved by Georgia Southern University, as well as a Teacher Leadership Endorsement and Educational Leadership Tier 1 certification as approved by the GaPSC.

Admission Requirements

Regular

1. Complete requirements for a Bachelor's degree from a regionally accredited institution.
2. Possess a Professional Level Four Certificate or higher in a teacher, service, or leadership field.
3. Present a cumulative 2.75 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant's professional aspirations.
5. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
7. Candidate’s Local Unit of Administration (LUA) is required to have entered into an agreement with Georgia Southern University that outlines the agreements related to Tier I Leadership preparation. Said agreement must state that the LUA and school agree to allow candidates to complete 250 hours of clinical practice (Supervised Field Experience) and to provide supporting documents, as well as access to opportunities to lead and participate in leadership opportunities as appropriate for completion of leadership performances. Additional requirements are listed below; additionally, candidates must comply with any rule changes and/or additions instituted by the GaPSC affecting Educational Leadership certification. 
8. All candidates admitted to any GaPSC-approved Educational Leadership program must have completed (do not have to pass) the Georgia Ethics for Educational Leadership Assessment-Program Entry (Test 370) prior to becoming enrolled.

Other Program Requirements

1. Passing scores on the Georgia Assessments for the Certification of Educators® (GACE®), Test #301. Georgia’s state approved educator certification assessment program, prior to program completion.
2. All candidates completing any GaPSC-approved Educational Leadership program on or after July 1, 2016, must pass the Georgia Ethics for Educational Leadership-Program Exit (Test 380) prior to completion and must pass the assessment to earn certification in the field of Educational Leadership.
3. Candidates must claim Georgia Southern University as their provider. Candidates must log into their MyPSC account (https://mypsc.gapsc.org/Home.aspx) and claim Georgia Southern University as their provider.
4. All candidates admitted to any GaPSC approved Educational Leadership program must have passed the Georgia Ethics for Educational Leadership Assessment Program Entry (Test 370) prior to completion and must pass the assessment to earn certification in the field of Educational Leadership.

**It is important to note that admission to and completion of Tier 1 does not ensure employment in a leadership position. Under state law, completion of an approved Tier 1 program will not lead to additional pay until employed by a Local Unit of Administration (LUA) in a leadership position that requires Tier 1 certification. **
Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Instructional Technology M.Ed.  
(Georgia ONmyLINE)

Degree Requirements: 36-42 Credit Hours

The courses in this program are offered 100% online.

Admission Requirements

Regular

1. Complete requirements for a Bachelor’s degree from a regionally accredited institution.
2. For admission to the Instructional Technology Concentration or the Dual Certification Concentration, a valid, level 4 or higher Induction, Professional, Advanced Professional, or Lead Professional teaching certificate, leadership certificate, service field certificate, or Life certificate is required.
3. For admission to the non-degree certification only program in Instruction Technology, a valid, level 4 or higher Induction, Professional, Advanced Professional, or Lead Professional teaching certificate, leadership certificate, service field certificate, or Life certificate and a master’s degree in any field in education are required.
4. For admission to the Media Specialist Concentration, certification is not required, but the program will exceed 36 hours to meet certification requirements.
5. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
6. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
7. Persons seeking initial certification not holding level four certification must submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.

Other Program Requirements

- Must maintain an account on the College’s electronic data-management system.
- Must successfully complete assessments identified at each program transition point.
- Instructional Technology Foundations (ITEC 7530) may not be used as credit hour toward the Instructional Technology M.Ed. Program elective.
- Claim Georgia Southern University as your program provider in your MyPSC Account during your first term of enrollment (See information under MyPSC Account in the Graduate Catalog).

Concentration: School Library Media Specialist, 36 Credit Hours

Concentration Intent: This program meets the content requirements for level five Service certification as a media specialist in Georgia.

School Library Media Certificate Program (Online)

Requirements: 24 Credit Hours

The courses in this program are offered 100% online.

Admission Requirements

Regular

1. Complete requirements for a Master’s degree from a regionally accredited institution.
   This program is approved by the Georgia Professional Standards Commission as a program leading to certification in Instructional Technology. Completing the program will prepare candidates for certification, but candidates should consult with program faculty, the College of Education Graduate Academic Services Center, or the Georgia Professional Standards Commission regarding current certification rules upon entering the program.
2. Possess an Induction or Professional Certificate or equivalent in a teaching field or a Certificate of Eligibility for an Induction Certificate in a teaching field. Persons not holding level four certification may be admitted, however, additional hours will be required.
3. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
4. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
5. Persons seeking initial school library media certification not holding Level Four Certification must submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.

Teacher Leadership Endorsement (Online)

Requirements: 9 Credit Hours

The Teacher Leader Endorsement (TLE) Program administered through Georgia Southern University is intended to prepare individuals to serve in teacher leader roles in grades P-12. The TLE is governed by the Georgia Professional Standards Commission (GaPSC) under the TLE Program Preparation Rule (Rule 505-3-.104) approved May 2014.

Georgia Southern University Requirements

The applicant must meet the following requirements:
1. Hold a current and valid Professional certificate or higher;
2. Must have a Bachelor’s degree or higher from an accredited college/university;
3. Present a cumulative 2.75 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined from an accredited college/university;
4. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance, and,
5. Submit school/district endorsement and agreement for Clinical Practice.

Enrollment requirements for the TLE Program are the same regardless of whether an applicant holds a Master’s Degree or not.

GaPSC Requirements

Admission is open to any individual who meets the above-referenced criteria providing that the candidate’s Local Unit of Administration (LUA) has entered into an agreement with Georgia Southern University that outlines the agreements related to teacher leader preparation. Said agreement must state that the LUA and school agree to allow candidates to complete 90 hours of clinical practice/supervised field experience hours and provide supporting documentation as evidence. The candidate requires access to opportunities to lead and participate in leadership functions as appropriate for completion of leadership performances; however, candidates are not required to be in a leadership position/role nor does this TLE ensure advancement to a leadership role/position. Additional requirements are listed below; additionally, candidates must comply with any rule changes and/or additions instituted by the GaPSC affecting TLE.

Adult Education Certificate

Degree Requirements: 12 Credit Hours

Program Intent

The Certificate in Adult Education leads to a State of Georgia Board of Regents certificate in Adult Education. Adult education is the teaching or training of adults. This program is designed to assist individuals entering a wide variety of careers as trainers or educators. The program of study has been designed to enhance communication skills in the dissemination of knowledge about one’s area of expertise. Individuals completing the program will accomplish the following objectives:

• develop a deeper, comprehensive understanding of the adult learner through a plan of study which builds upon prior professional preparation and experience.
• interpret adult behavior through exploration theories and research findings related to the physical, social, emotional, intellectual and moral development of the adult learner.
• investigate historical and philosophical factors which influence curriculum and pedagogy/andragogy for the adult learner.
• implement appropriate instructional strategies designed according to learner variables and academic discipline.

Admission Requirements

Regular
1. An earned baccalaureate degree from a regionally accredited institution.
2. A minimum overall undergraduate GPA of 2.50.

Educational Leadership Tier II Certificate Program (Online)

Degree Requirements: 18 Credit Hours

Completion of all program requirements leads to Educational Leadership Tier II certification as approved by the GaPSC.

Admission Requirements

The applicant must meet the following Georgia Southern University Requirements:

1. For the Tier II Educational Leadership Certificate Program, applicants must hold an Educational Specialist degree or Doctorate degree from a regionally accredited institution and a Level 6 or Level 7 Georgia Educator Certification.
2. Present a 3.25 or higher GPA on all graduate work attempted.
3. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
4. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
5. Three years school/district experience prior to admission to the program.
6. Submit school/district endorsement and agreement for Residency at the Building or District level.
7. Hold a valid GaPSC Tier I Educational Leadership Certificate or the equivalent (a valid GaPSC-issued Standard Professional L or PL certificate in Educational Leadership) and are employed in a current leadership position.

GaPSC Requirements

1. Tier II of the Educational Leadership preparation program must be completed through an Ed.S. or Certification-only program. Admission is open to any individual who meets the Georgia Southern University and GaPSC requirements and providing that the candidate’s Local Unit of Administration (LUA) has entered into an agreement with Georgia Southern University that outlines the agreements related to Tier II Leadership preparation. Said agreement must state that the LUA and school agree to allow candidates to complete 750 hours of clinical practice (supervised field experiences) and provide supporting documents, as well as access to opportunities to lead and participate in leadership functions as appropriate for completion of leadership performances. Additional requirements are listed below; additionally, candidates must comply with any rule changes and/or additions instituted by the GaPSC affecting Educational Leadership certification.
2. All applicants must present passing scores on the Educational Leadership Georgia Assessments for the Certification of Educators (GACE), Test 301, Georgia’s state-approved education lender certification assessment program, prior to program enrollment.
3. All candidates must claim Georgia Southern University as their provider. Please log into your MyPSC account (https://mypsc.gapsc.org/Home.aspx). This must be completed prior to signing up for the Georgia Ethics for Educational Leadership Assessment-Program Entry (Test 370).
4. All candidates admitted to any GaPSC-approved Educational Leadership program fall term 2016, must have completed (does not have to pass) the Georgia Ethics for Educational Leadership Assessment-Program Entry (Test 370) prior to becoming enrolled. A candidate who completes this program entry requirement (Test 370) for Tier I, does not have to complete Test 370 for Tier II. Official documentation will be required.
5. All candidates completing any GaPSC-approved Educational Leadership program on or after July 1, 2016, must attempt the Georgia Ethics for Educational Leadership-Program Exit (Test 380) prior to completion and must pass the assessment to earn certification in the field of Educational Leadership.
6. Per the GaPSC Educator Preparation Rule 505-3-.77, the ETS Performance-Based Assessment for School Leaders (PASL) will be used as a certification requirement for Educational Leadership Tier II.
7. It is important to note that admission to and completion of Tier II does not ensure employment in a leadership position. Under state law, completion of an approved Tier II Educational Leadership program will not lead to additional pay until employed by a local Unit of Administration (LUA) in a leadership position that requires Tier II certification.
8. Tier II of the Educational Leadership preparation program must be completed through the Ed.S. or graduate certificate/cert only program. Admission is open to any individual who meets the Georgia Southern University and GaPSC requirements and providing that the candidate’s Local Unit of Administration (LUA) has entered into an agreement with Georgia Southern University that outlines the agreements related to Tier II.

Department of Middle Grades and Secondary Education

The Department of Middle Grades and Secondary Education at Georgia Southern University offers a variety of programs to prepare teachers and provide advanced professional development. Programs at the undergraduate level include middle grades education (4-8); secondary education (6-12) with specializations in biology, chemistry, English, history, mathematics and physics; and health and physical education (P-12). The Master of Arts in Teaching (MAT) program offers initial teacher preparation in middle grades, health and physical education, and Spanish education, as well as secondary areas of business, biology, chemistry, economics, English, history, geography, mathematics, physics, and political science. The department offers Master of Education (M. Ed.) and Education Specialist (Ed.S) degrees in middle grades and secondary education and an M.Ed. in Teaching Culturally and Linguistically Diverse Students. In addition to these degree programs, the department also offers an endorsement in English for Speakers of Other Languages (ESOL) and a certificate in Teaching Culturally and Linguistically Diverse Students.

Teaching M.A.T. (Concentration in Health and Physical Education P-12)

Degree Requirements: 37 Hours

Program Intent and Admission Requirements:

The Master of Arts in Teaching (MAT) leads to initial teaching certification and a master's degree for those persons who hold a bachelor's degree from a regionally accredited institution.

Health and Physical Education certification (P-12) for candidates who hold a bachelor's degree in Exercise Science, Athletic Training, Kinesiology, Public Health, or a closely-related field. Candidates who do not hold a bachelor's degree in Exercise Science, Athletic Training, Kinesiology, Public Health, or a closely-related field may need to enroll in additional courses. The total credit hours for the degree are dependent on previous course work completed in the area of certification. A transcript evaluation by the College of Education’s Graduate Academic Services Center is required. Prerequisite content course work, based on the transcript evaluation, must be completed as a non-degree student before admission into the program.
Admission Requirements

Regular

1. Hold a bachelor's degree from a regionally accredited institution.

2. Present a transcript evaluation by the College of Education's Director of the Graduate Academic Services Center, and completion of a specified prerequisite course work.

3. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.

4. Present a total adjusted GPA of 2.75 or higher on all teaching field coursework.

5. Submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.

6. Complete the state-required Georgia Educator Ethics-Program Entry (350) assessment. A minimum score is not required.

7. Qualify for a Georgia Pre-Service certificate or Induction Pathway 4 certificate (see Certification section in the Graduate Catalog).

8. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant's reasons for pursuing graduate study and how admission into the program relates to the applicant's professional aspirations.

9. Acknowledge "Disclosure and Affirmation" statements that address the Code of Ethics for Educators and the need for tort liability insurance.

10. International applicants and U.S. citizens whose native language is not English must demonstrate competence in English. Applicants must take and pass the Test of English as a Foreign Language (TOEFL) and post a score of at least 80 (internet-based test, IBT), 213 (computer-based test) or 550 (paper-based test) on the TOEFL. The official TOEFL score may not be more than two years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus prior to admission to the program. For Study Concentration Four (Spanish), candidates are not required to take the TOEFL; rather those individuals who did not complete their undergraduate degree in the English language must pass an Oral Proficiency Interview and a Writing Proficiency Test in English at the ACTFL-defined IH or above (test administered by the Department of Foreign Languages).

11. If an applicant was previously enrolled in an initial teacher preparation program, an interview must be completed with the Program Coordinator prior to admission to the program.

Provisional

Applicants may be approved for Provisional admission based on the quality of the admission material presented. Provisional students must earn grades of B or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Total Credit Hours 37

- MAT in Health and Physical Education is on campus and will have an enrollment maximum of 15 students due to availability of field experience and students teaching sites.
- Upon successful completion of ESED 5799G and KINS 7637, successful completion of the state-required content pedagogy assessment (edTPA), successful completion of the GACE content assessment, and successful completion of the state-required Educator Ethics-Program Exit (360) assessment, candidates who are teaching full-time on an Induction Pathway 4 certificate may apply for a level 4 Induction Pathway 1 certificate, and candidates who are not teaching may apply for a certificate of eligibility for a level 4 Induction Pathway 1 certificate.
- Candidates who are teaching full-time on a level 4 Induction pathway 1 certificate may apply for the level five Induction Pathway 1 certificate upon successful completion of all program requirements. Candidates who are not teaching during the program may apply for a level 5 Induction Pathway 1 certificate after successful completion of all program requirements and obtaining a teaching position.

OTHER PROGRAM REQUIREMENTS

- Must successfully complete assessments identified at each program transition point.

Middle Grades Education (Grades 4-8) Ed.S. (Online)

Degree Requirements: 33 Credit Hours

Concentrations

Candidates must select one area of concentration from the areas in which they are currently certified:

- Middle Grades Language Arts
- Middle Grades Mathematics
- Middle Grades Reading
- Middle Grades Science
- Middle Grades Social Studies.

Certificate Upgrade Information: An educator who holds a level five Georgia certificate in Middle Grades Education will qualify for a level six certificate upgrade upon successful completion of all program requirements. (See catalog section on Certification).

Admission Requirements

Regular

1. Complete requirements for a Master's degree from a regionally accredited institution.

2. Possess or be eligible for a Georgia level five certificate in Middle Grades Education or a Certificate of Eligibility for a level five Induction certificate in Middle Grades Education. Certification must be in one of the following concentration areas: Middle Grades Language Arts, Middle Grades Mathematics, Middle Grades Reading, Middle Grades Science, and Middle Grades Social Studies. Candidates who have completed all requirements for the Certificate of Eligibility for a level five Induction certificate have until the end of the first semester to obtain the certificate.

3. Present a 3.25 or higher GPA on all graduate work attempted.

4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant's reasons for pursuing graduate study and how admission into the program relates to the applicant's professional aspirations.

5. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Teaching M.A.T. (Concentration in Middle Grades Education Grades 4-8)

Degree Requirements: 45 Hours

Program Intent and Admission Requirements:

The Master of Arts in Teaching (MAT) leads to initial teaching certification and a master’s degree for those persons who hold a bachelor's degree from a regionally accredited institution.

• Middle Grades certification (4-8) for candidates who hold a bachelor’s degree. Candidates must complete two teaching concentrations from language arts, science, social studies, and mathematics.

The total credit hours for the degree are dependent on previous course work completed in the area of certification. A transcript evaluation by the College of Education’s Graduate Academic Services Center is required. Prerequisite content course work, based on the transcript evaluation, must be completed as a non-degree student before admission into the program.

Admission Requirements

Regular

1. Hold a bachelor’s degree from a regionally accredited institution.
2. Present a transcript evaluation by the College of Education’s Director of the Graduate Academic Services Center, and completion of a specified prerequisite content course work.
3. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
4. Present a total adjusted GPA of 2.75 or higher on all teaching field course work.
5. Submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.
6. Submit a passing score on the GACE Content Assessment in the area for which one is seeking certification.
7. Complete the state-required Georgia Educator Ethics—Program Entry (350) assessment. A minimum score is not required.
8. Qualify for a Georgia Pre-Service certificate or Induction Pathway 4 certificate (see Certification section in the Graduate Catalog).
9. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
10. Acknowledge “Disclosure and Affirmation” statements that address the Code of Ethics for Educators and the need for tort liability insurance.
11. International applicants and U.S. citizens whose native language is not English must demonstrate competence in English. Applicants must take and pass the Test of English as a Foreign Language (TOEFL) and post a score of at least 80 (internet-based test, IBT), 213 (computer-based test) or 550 (paper-based test) on the TOEFL. The official TOEFL score may not be more than two years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus prior to admission to the program. For Study Concentration Four (Spanish), candidates are not required to take the TOEFL; rather, those individuals who did not complete their undergraduate degree in the English language must pass an Oral Proficiency Interview and a Writing Proficiency Test in English at the ACTFL-defined IH or above (tests administered by the Department of Foreign Languages).

12. If an applicant was previously enrolled in an initial teacher preparation program, an interview must be completed with the Program Coordinator prior to admission to the program.

Provisional

Applicants may be approved for Provisional admission based on the quality of the admission material presented. Provisional students must earn grades of B or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Secondary Education (Grades 6-12) Ed.S. (Online)

Degree Requirements: 33 Credit Hours

Concentrations

Candidates must select a concentration in their area of certification:

- Biology Education
- Broad Fields Science Education
- Business Education
- Chemistry Education
- Economics Education
- English Education
- Geography Education
- History Education
- Mathematics Education
- Physics Education
- Political Science Education

Certificate Upgrade Information: An educator who holds a level five Georgia certificate in a Secondary Education field will qualify for a level six certificate upgrade upon successful completion of all program requirements. (See catalog section on Certification.)

Admission Requirements

Regular

1. Complete requirements for a Master’s degree from a regionally accredited institution.
2. Possess or be eligible for a Georgia level five certificate or a Certificate of Eligibility for a level five Induction certificate in one of the secondary education certification fields: biology, broad fields science, business, chemistry, economics, English, geography, history, mathematics, physics, or political science. Candidates who have completed all requirements for the Certificate of Eligibility for a level five Induction certificate have until the end of the first semester to obtain the certificate.
3. Present a 3.25 or higher GPA on all graduate work attempted.
4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
5. Submit a completed “Disclosure and Affirmation Form” that addresses misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.

Provisional

Applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Teaching M.A.T. (Concentration in Secondary Education Grades 6-12)

Degree Requirements: 39 Hours

Program Intent and Admission Requirements:

The Master of Arts in Teaching (MAT) leads to initial teaching certification and a master's degree for those persons who hold a bachelor's degree from a regionally accredited institution.

- **Secondary Education certification (6-12)** for candidates who hold a bachelor's degree in English, business, mathematics, history, geography, economics, political science, chemistry, biology, geology, physics, or related field. Upon successful completion of all program requirements, students will receive a Master's Degree in teaching. At the time of employment, students are eligible for an induction level certificate.

The total credit hours for the degree are dependent on previous course work completed in the area of certification. A transcript evaluation by the College of Education's Graduate Academic Services Center is required.

Prerequisite content course work, based on the transcript evaluation, must be completed as a non-degree student before admission into the program.

Two campus options are available: a hybrid program on the Statesboro campus and a hybrid program on the Armstrong campus in Savannah. Contact the individuals listed in the "Advisement" section below for further information.

Admission Requirements

Regular

1. Hold a bachelor's degree from a regionally accredited institution.
2. Present a transcript evaluation by the College of Education’s Director of the Graduate Academic Services Center, and completion of a specified prerequisite content course work.
3. Present a cumulative 2.50 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.
4. Present a total adjusted GPA of 2.75 or higher on all teaching field course work.
5. Submit passing scores on the GACE Program Admission Assessment or be exempt by acceptable SAT, ACT, or GRE scores.
6. Submit a passing score on the GACE Content Assessment in the area for which one is seeking certification.
7. Complete the state-required Georgia Educator Ethics—Program Entry (350) assessment. A minimum score is not required.
8. Qualify for a Georgia Pre-Service certificate or Induction Pathway 4 certificate (see Certification section in the Graduate Catalog).
9. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
10. Acknowledge "Disclosure and Affirmation" statements that address the Code of Ethics for Educators and the need for tort liability insurance.
11. International applicants and U.S. citizens whose native language is not English must demonstrate competence in English. Applicants must take and pass the Test of English as a Foreign Language (TOEFL) and post a score of at least 80 (internet-based test, IBT), 213 (computer-based test) or 550 (paper-based test) on the TOEFL. The official TOEFL score may not be more than two years old. Those who do not meet the minimum proficiency standard may be
recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus prior to admission to the program. For Study Concentration Four (Spanish), candidates are not required to take the TOEFL, rather, those individuals who did not complete their undergraduate degree in the English language must pass an Oral Proficiency Interview and a Writing Proficiency Test in English at the ACTFL-defined IH or above (tests administered by the Department of Foreign Languages).

12. If an applicant was previously enrolled in an initial teacher preparation program, an interview must be completed with the Program Coordinator prior to admission to the program.

13. Select the campus you are applying to: Either (1) the Statesboro campus or (2) the Armstrong campus in Savannah.

Provisional

Applicants may be approved for Provisional admission based on the quality of the admission material presented. Provisional students must earn grades of B or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Secondary Education with Teaching Fields in biology, chemistry, physics, history, geography, political science, economics, broad field science, mathematics, English, or business. Candidates in one of the science fields or social science fields are encouraged to complete additional courses in order to pursue certification in several or all of the disciplines in science or in the social sciences. There is a broad field science test one can take to for candidates seeking certification in one or more of the science fields; however, for the social sciences, candidates must take separate tests for the different social science fields in order to be certified in more than one of the social science disciplines (Grades 6-12).

*Step Two: Secondary Education Block (taken concurrently)*

| MSED 6131 Curriculum and Instruction II                                                   | 3            |

Select one from the following:

| SCED 6738 Supervised Practicum in Secondary Education (Candidates who are currently teaching full-time on an Induction Pathway 4 certificate enroll in SCED 6739 - M.A.T. Internship I: Secondary) | 3            |

or SCED 6739 M.A.T. Internship I: Secondary

Select one of the following appropriate subject-specific courses:

| MSED 6237 Science Methods                                                                 | 3            |
| MSED 6337 Language Arts Methods                                                            | 3            |
| MSED 6437 Social Science Methods                                                            | 3            |
| MSED 6537 Mathematics Methods                                                               | 3            |
| MSED 6637 Business Education Methods                                                        | 3            |

Step Three: Student Teaching/Supervised Internship Semester: (See Admission to Student Teaching/Internship section in Graduate Catalog)

Select one of the following:

| SCED 5799G Student Teaching in Secondary Education (For candidates who are not teaching full-time) | 6            |

OR

| SCED 6799 Supervised Internship: Secondary (For candidates who are currently teaching full-time on an Induction Pathway 4 certificate) | 3            |

MSED 7635 MAT Seminar in Middle Grades and Secondary Education | 3

Step Four: Additional Course Work Required for Initial Certification

| SPED 6130 Introduction to Special Education                                                | 3            |
| MSED 6330 Instructional Assessment for Diverse Learners                                   | 3            |

Upon successful completion of steps 1-4, successful completion of the state-required content pedagogy assessment (edTPA), and successful completion of the state-required Educator Ethics--Program Exit (360) assessment, candidates who are teaching full-time on an Induction Pathway 4 certificate may apply for a level 4 Induction Pathway 1 certificate, and candidates who are not teaching may apply for a Certificate of Eligibility for a level 4 Induction Pathway 1 certificate.

Step Five: Course Work Required for Completion of the MAT Degree

| EDUR 7130 Educational Research                                                             | 3            |
| MSED 7130 Middle and Secondary School Colloquium                                           | 3            |

Candidates who are teaching full-time on a level 4 Induction Pathway 1 certificate may apply for the level 5 Induction Pathway 1 certificate upon successful completion of all program requirements. Candidates who are not teaching during the program may apply for a level 5 Induction Pathway 1 certificate after successful completion of all program requirements and obtaining a teaching position.

Total Credit Hours 39

Teaching Culturally and Linguistically Diverse Students Certificate (Online)

Degree Requirements: 18 Credit Hours

Admission Requirements

1. Completed requirements for the Bachelor’s degree in a college accredited by proper regional accrediting association or the equivalent at a recognized international university.
2. A 2.75 (4.0 scale) cumulative grade point average in undergraduate work.
3. At a minimum, possess or be eligible for a Georgia Induction or Professional Certificate or the equivalent or possess or be eligible for a Georgia Certificate of Eligibility for an Induction Certificate.
4. Submit a completed Disclosure and Affirmation Form that address misconduct disclosure, criminal background check, the Code of Ethics for Educators, and tort liability insurance.
5. Three (3) letters of recommendation from persons familiar with the applicant’s academic or employment experience.
6. Statement of career goals and objectives.

Description of Certificate Program

This Certificate Program is for teachers and administrators that hope to improve K-12 education for culturally and linguistically diverse students. The program of study includes the three course sequence needed to earn an ESOL endorsement and three additional courses that emphasize the social, cultural and academic contexts inherent in working with culturally and linguistically diverse students. The purpose of the certificate is to develop the capacity of teachers and administrators to provide high quality instructional experiences for diverse learners. This certificate course work will be centered in a menu of reading and assignments that allow teachers and administrators to select those that are most germane to their local teaching context. Teachers and administrators can initially complete the coursework to earn their ESOL endorsement. Successful completion of the next series of three courses will earn them the Teaching Culturally and Linguistically Diverse Students Certificate. One unique aspect is the potential for several teachers from a site or district to engage in the coursework simultaneously and collaborate on capstone experiences. This coursework aligns with TAPS standards that comprise the TKES assessment system for teachers in Georgia.

Program of Study

The Graduate Certificate program requires a total of 18 credit hours and is offered fully online.

Teaching Culturally and Linguistically Diverse Students M.Ed.

Degree Requirements: 36 Credit Hours

Certificate Upgrade Information: An educator who holds a level four Georgia teaching certificate in ESOL will qualify for a level five certificate upgrade upon successful completion of all program requirements. (See catalog section on Certification).

Admission Requirements

Regular

1. Complete requirements for a Bachelor’s degree from a regionally accredited institution.
2. Possess or be eligible for a Professional Level Four Certificate in the state of Georgia or its equivalent in other states. OR Possess or be eligible for a Standard Professional Administrative Certificate or its equivalent in other states.
3. Present a cumulative 2.50 (4.0 scale) grade point average on all undergraduate and graduate work combined.
4. Submit a personal statement of purpose, not to exceed 200 words, that identifies the applicant’s reasons for pursuing graduate study and how admission into the program relates to the applicant’s professional aspirations.
5. Successfully complete ESED 5234 or ESED 5234G Cultural Issues: ESOL or its equivalent.
Doctor of Education Programs

The Ed.D. program in Curriculum Studies provides a unique and contemporary approach to doctoral study in curriculum. The program prepares graduates to work directly in the P-12 schools (e.g., master teacher, instructional coordinator, curriculum director) or to enter the professoriate as curriculum scholars. The Curriculum Studies program evaluates applications once per year for summer admission, and admission is competitive. See program’s Catalog page for specific information on admission, program of study, and other requirements.

The Ed.D. degree program in Educational Leadership is designed to extend the competence and knowledge base of educational leaders who have been prepared to work in elementary, middle, secondary, and postsecondary educational settings. The program seeks to develop administrators and supervisors who:

1. will become team and community leaders,
2. have developed an informed vision of what educational organizations are and can become,
3. will focus on teaching and learning for an increasingly diverse student group as the mission of the educational organization, and
4. have acquired an initial mastery of the theory and practice of organizational leadership and management in a climate of fiscal and social constraint. See program’s catalog page for specific information on admission, program of study, and other requirements.

Continuous Enrollment

A student working for a doctorate must be enrolled at Georgia Southern University during the semester in which the comprehensive/qualifying/candidacy examination is taken and in each subsequent semester, including summer term, following the first dissertation registration until the degree requirements are met and the dissertation is accepted by the College of Graduate Studies. Failure to enroll will result in loss of candidacy. To regain candidacy, the student must successfully petition the College of Graduate Studies.

If it is necessary to interrupt failure to enroll will result in loss of candidacy. To regain candidacy, the student must successfully petition the College of Graduate Studies. If it is necessary to interrupt progress toward the degree, the student may petition for a leave of absence of up to one year. The petition must be submitted at least one month before the effective date of leave. The major professor, the department chair, and the Vice Provost must grant approval. The Vice Provost will establish the conditions and postsecondary educational settings. The program seeks to develop administrators and supervisors who:

Education Specialist Programs

The Education Specialist (Ed.S.) degree is a unique professional degree for educators that is designed to provide the opportunity to develop a high level of proficiency in the field of study as well as develop research and leadership skills. Ed.S. degree programs are offered in eight areas of study. Programs of study leading to the Ed.S. degree enable students to meet certification requirements for the Georgia Professional Standards Commission as specified in Georgia Southern’s “approved programs.” Upon successful completion of the program, students are eligible for the appropriate Level Six Certificate.

The Ed.S. degree requires a program of study to include a research sequence of nine (9) to twelve (12) credits, including Educational Statistics I (EDUR 8131), Field-Based Educational Research (EDUR 8434), and a directed field-based research course. Upon admission into the Ed.S. program, the student is responsible for meeting with the assigned graduate advisor. Collaboratively an individualized Program of Study

Other Program Requirement

Successfully complete assessments identified at each program transition point.

Advisement

Dr. Alisa Leckie
P.O. Box 8134
Statesboro, GA 30460
aleckie@georgiasouthern.edu
should be developed that meets degree requirements and also reflects the student’s career goals, educational background, interests, and needs. Each program requires a culminating experience that is connected with the field-based research course, serves as the comprehensive exit assessment, and must be satisfactorily completed in order for the Ed.S. degree to be awarded. Upon completion of the Ed.S. degree, graduates are eligible to apply for the Georgia Level Six Certificate if they possess the Level Five Certificate in the field.

Admission to Ed.S. Programs

Georgia Southern University admits persons who display an educational development and achievement level that are better than average. To this end, admission requirements reflect previous educational orientation, and a judgment of admission or rejection is made by the College. For admission to the College of Graduate Studies to pursue the Education Specialist degree, the applicant should refer to the program page for specific information on admission, program of study, and other requirements.

A Georgia Southern University graduate student who is within six (6) credits of completing a Master’s program may, with the approval of the Master’s degree program advisor, enroll for a maximum of three (3) credits toward an Ed.S. program provided all College of Graduate Studies admission requirements for “Regular” Ed.S. admission have been satisfied except for completion of the Master’s degree. The total number of credit hours for the semester in which the Ed.S. enrollment is approved may not exceed nine (9) credits. Under no circumstances may a course be used for credit in both a student’s Master’s and Education Specialist programs of study.

Ed.S. Provisional Admission

If program policy allows, applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Ed.S. Comprehensive Exit Assessment

To complete degree requirements for the Ed.S. degree, each candidate must demonstrate the ability to conduct and present a field-based research project. The candidate and the graduate advisor should consider possible research topics that complement the candidate’s career objectives and Program of Study. Prior to enrollment in Field-Based Educational Research (EDUR 8434), the candidate is expected to have formulated a research topic and will select graduate faculty members to serve on the candidate’s Ed.S. Committee. The Ed.S. Committee will be comprised of at least 3 faculty members who guide the development, implementation, and defense of the field study. The research proposal developed in EDUR 8434 will include the statement of the problem, a literature review, hypotheses or research questions, and research methodology. In the directed field-based research course specific to the field of study, the candidate implements the field study using the proposal developed in EDUR 8434. The instructor guides the candidate in the implementation process and is responsible for evaluating the research project and assigning the final course grade. The project is then orally defended in a meeting with the candidate’s Ed.S. Committee members. This defense serves as the exit assessment for the program. The purpose of the defense is to assess the candidate’s knowledge of the topic area, the adequacy of the candidate’s application of research principles, and the ability of the candidate to articulate the results and implications of the study. The defense consists of a formal presentation by the candidate, followed by questions from the Ed.S. Committee.

Endorsements

Endorsement programs are available in the areas of: English for Speakers of Other Languages (ESOL), Online Teaching and Learning, Teacher Leadership, Special Education Transition Specialist and Reading. Endorsement programs can be completed as non-degree course work or, as appropriate and with advisor approval, included in a degree program of study. These endorsements may be added to a professional certificate in teaching, service, and leadership fields. See the endorsement programs at the end of the College of Education Graduate Section for specific admissions and course requirements that pertain to each individual program.

Graduate Program Approval and Unit Accreditation

The College of Education offers graduate programs to prepare its students for work in public education, in community agencies, and in higher education. Programs are developed in collaboration with departments across the campus and with professionals in the field of education. Each program has been approved by the Georgia Professional Standards Commission, the National Council for Accreditation of Teacher Education, and the Southern Association of Colleges and Schools; the counselor education program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP); and the school psychology program has National Association of School Psychologists (NASP) approval-full (national recognition).

Internships

Some graduate programs (in addition to initial teacher certification programs) require extensive field experience through internships as a program requirement. The student’s faculty advisor arranges the internship in cooperation with the student and local school systems/agencies. For students enrolled in an initial teacher certification program at the graduate level, application for internships must be submitted to the student’s home department. Students who are required to participate in internships or other field experiences as part of their graduate program are required to complete a criminal background check on admission to the program and before commencing the internship. Students will not be required to undergo a criminal background check more than once per year.

Master of Education Programs

Master of Education (M.Ed.) degree programs are offered in twelve areas of study. A student admitted to the College of Graduate Studies as a prospective candidate for the M.Ed. degree must satisfactorily complete a planned Program of Study including a minimum of 6-9 credit hours in the professional education core and a minimum of 15 credit hours in the content field of the major. Since programs of study in all certificated areas areas are planned to enable students to meet the requirements of the Georgia Professional Standards Commission as specified in Georgia Southern’s “approved programs,” it is critical that students meet with their advisors early in their course work to plan an appropriate Program of Study. The development of the Program of Study expedites the registration process and ensures that all course work may be applied toward fulfilling degree requirements. Upon successful completion of the Program of Study, graduates in certification programs will be recommended for the appropriate Georgia Level Five Certificate.

M.Ed. programs of study must include at least 50% of level 6000, 7000 and 8000 courses. Students and their advisors are strongly encouraged not to include more than one 5000G-5999G level course in the Program of Study.
Admission to M.Ed. Programs

Regular Admission

For regular admission to the College of Graduate Studies to pursue the Master of Education degree, the applicant should refer to the specific admission requirements, program of study, and other requirements on the specific program’s catalog page.

Provisional Admission

If a program policy allows, applicants may be approved for provisional admission based on the quality of the admission material presented. Provisional students must earn grades of “B” or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status.

Non-Degree Graduate Studies

For non-degree admission to graduate education programs for those interested in professional development, certification renewal, or an endorsement to an existing certificate, students must be admitted to graduate study as a non-degree student. For non-degree admission to the College of Graduate Studies, the applicant must:

1. Possess a bachelor’s degree from a regionally accredited institution.
2. Possess or be eligible for certification as prescribed by the specific program.
3. Present a cumulative 2.5 (4.0 scale) grade point average or higher on all undergraduate and graduate work combined.

Note: Initial certification in non-teaching fields such as Counselor Education and Instructional Technology require completion of the master’s degree; Educational Leadership and School Psychology require completion of the education specialist's degree. Initial certification in Counselor Education and School Psychology cannot be completed as non-degree study. To pursue certification in Educational Leadership or Instructional Technology as a non-degree student, refer to the program pages in this catalog.

Online and Off-Campus Graduate Offerings

Multiple education courses and graduate programs are offered in a 100% online format. For specific information about which courses are offered online in a particular term, please contact the program director or the Graduate Academic Services Center at gasc@georgiasouthern.edu. For admission criteria to one of the College of Education’s online programs, please refer to the catalog page for that specific program.

Policies and Procedures for Field Experiences, Internships and Clinical Experience - Initial Teacher Preparation

Field Experience Placement Policies

• Field placements are very important to candidates in the teacher preparation program. Georgia Southern University and its Partner Schools place great importance on field experiences.

All field experiences are coordinated between the Office of Initial Teacher Preparation and Assessment, academic programs, and Partner Schools.

• An attempt will be made to place two or more teacher candidates in a school. An exception to this clustering policy could be rendered by a program or department. This exception would be a result of specialization required of the clinical supervisor. (This does not apply to candidates in an on-line Master of Arts in Teaching program).

• One geographical area will serve Georgia Southern’s teacher candidate population. The primary area is approximately 70 miles from each Georgia Southern campus. (This includes Teacher of Record). Candidates can expect the maximum one-way travel of 70 miles or less from Georgia Southern to a school placement. (This policy does not apply to candidates in a fully on-line Master of Arts in Teaching program).

• All field placements and clinical practice assignments are identified and assigned by the program director/coordinator. Placements are not negotiable.

• Teacher candidates seldom receive a field placement at a school site where they have had a previous field experience placement. This policy provides candidates with diversity in placements and teaching experiences. The exception to this policy is year-long placements during the senior year.

• Teacher candidates are not placed in schools where they have attended, relatives are employed, or relatives are enrolled as students.

• Teacher candidates that have an identified disability requiring accommodations during a field experience or clinical practice must consult with the Student Accessibility Resource Center the semester prior to the field experience to discuss accommodations. All teacher candidates must successfully demonstrate their ability to meet with or without accommodations, the standards and expectations of the teaching profession.

• Teacher candidates are limited to enrolling in a maximum of 12 semester hours during the clinical practice semester. The exception to this is when a candidate is enrolled in ESED 5235 and/or COED 3160.

• Candidates enrolled in a Master of Arts in Teaching program can only accept employment in a Georgia school that meets the GaPSC requirements. See rule 505-3-.01, section 4 (iv).

• Candidates enrolled in a Master of Arts in Teaching program and hired by a school system as a Teacher of Record must be teaching in the content area of the certification they are seeking.

• Candidates enrolled in a Master of Arts in Teaching program and hired by a school system as a Teacher of Record must be teaching full time in the content area of the certification they are seeking during their semester of clinical practice/internship.

Intervention Policies for Field Experiences, Student Teaching, and Internship

• Candidates are allowed a maximum of two (2) Professional Support plans (A/B) (each for different areas of difficulty) per field experience, or clinical practice.

• Candidates are allowed a maximum of one (1) Probationary Status per field experience, or clinical practice.

• Candidates may repeat each field experience, or clinical practice one (1) time.
• Withdrawing without academic penalty, withdrawing failing, or withdrawing at the recommendation of the program faculty from a field experience, or clinical practice will be considered one (1) attempt at that field experience.
• When school personnel request that candidate be removed from the school for performance or professional reasons the placement will end immediately. A new field placement will rarely be identified until the following semester.

Structure

The College of Education has a variety of centers and offices that provide specific services to its students, faculty, and public schools:

Within the Office of Initial Educator Preparation and Assessment, the Associate Dean coordinates all activities related to undergraduate education, initial teacher preparations, state and national reporting, CAEP accreditation, PSC program approval, College of Education and program assessment, and Educator Preparation Committee activities. The Director of Field Experiences and the Clinical Practice Field Experience Coordinator facilitate all field experiences and coordinate clinical practice in partner schools in collaboration with the various department, public schools (Clinical Associates and Clinical Supervisors) and international partners.

The Office of Graduate Education and Research coordinates graduate admissions and program offerings as well as research and grant activity for the College in collaboration with the various departments, campus offices, and school systems.

The Coastal Area Teacher Education Service (CATES) promotes the continuing education and professional development of teachers and other educators in school systems in the southeast area of Georgia. CATES assists in the scheduling of off-campus graduate education courses, publicizes those courses and Professional Learning Unit (PLU) opportunities, and assists off-campus graduate education students as needed.

The College of Education Student Success Center (SSC) is responsible for the advisement of all undergraduate education majors. The Director of the SSC and Certification Officer serves as a liaison between the College and the Georgia Professional Standards Commission dealing with certification matters. The Director evaluates student transcripts to determine course needs for acquiring initial or additional certification fields and makes the College’s recommendations for certification.

The Georgia Center for Educational Renewal conducts research and identifies its applications to practice for education renewal and/or reform in P-20 schools. It also focuses on educator preparation to facilitate improved teaching and learning in schools, especially for under-served populations. The Center is committed to closing the gaps between research and practice, the university and the schools and in the achievement of minority/majority students.

The Graduate Academic Services Center provides a comprehensive graduate experience beginning with recruiting prospective graduate students to providing student support for College of Education graduate students from program entry through graduation. The staff provides direct advisement for graduate students in several programs and provides pre-admission advisement for students in the College of Education.

The Instructional Resources Center (IRC) provides computer laboratories, portable multimedia equipment, and a variety of material resources and equipment for students and faculty. The IRC also provides technical and instructional assistance to College of Education faculty, staff, and students.

Student Teaching/Internship Placements

All student teachers/interns are placed within a 70-mile radius of either Georgia Southern campus.

Under the auspices of the International Learning Community, student teaching exchanges within the United Kingdom may be available. Information regarding this exchange can be obtained from the Office of Initial Teacher Preparation and Assessment.

Teacher Certification Process and Procedures

The College of Education offers the Master of Arts in Teaching (M.A.T.) degree for those who hold bachelor’s degrees in a related teaching field. The M.A.T. is available in Middle Grades Education, Special Education, Elementary Education, Secondary Education fields (biology, broad fields science, business, chemistry, economics, English, history, geography, mathematics, physics, and political science), Health and Physical Education, and a P-12 Education field (Spanish education). Non degree options are available for some M.A.T. concentrations. Those who hold a bachelor’s degree and are interested in Elementary or Health and Physical Education, another certification option is to complete program requirements at the undergraduate level. Certification programs in Art Education are available at the undergraduate level and graduate non-degree. For Music Education, a certification program is only available at the undergraduate level. (See undergraduate program descriptions in the Undergraduate Catalog (p. 39).) For M.A.T. and all non-degree program options, students must have their transcripts evaluated by Georgia Southern University’s College of Education Graduate Academic Services Center and they must meet all Teacher Education Program (TEP) admission and retention requirements, including an overall GPA of 2.50 or higher on all college course work attempted. If a graduate degree is sought, all admission requirements for the graduate program must also be met and admission granted prior to entering Step Two of the program. See the College of Education’s graduate programs section of this catalog for further information on these program options.

Candidates in a certification program (degree or non-degree) must be admitted to the Teacher Education Program (TEP) by the end of Step One, prior to enrolling in Step Two of the program of study. For non-degree candidates who seek to enter the M.A.T. program, GRE or MAT test scores must be submitted and admission granted into the M.A.T. degree program before enrolling in Step Two. Any M.A.T. program application submitted by a candidate who is enrolled under non-degree status will not be considered for admission once the candidate enrolls in Step Two courses.

Prospective students should contact the College of Education Graduate Academic Services Center for specific information and questions: https://coe.georgiasouthern.edu/gasc/services/transcript-evaluation/.

All applicants are expected to meet the criteria for admission to the Teacher Education Program.

Candidates for the M.A.T. or a graduate non-degree program are advised by graduate program faculty assigned at the time of admission.

For further information about alternative certification programs and the transcript evaluation process, please contact:

Graduate Academic Services Center
College of Education
P.O. Box 8083
Statesboro, GA 30460
(912) 478-1447
Teacher Certification Programs

The College of Education offers the Master of Arts in Teaching (M.A.T.) degree or a similar graduate non-degree program option for those interested in acquiring initial teacher certification in the fields of Middle Grades Education, Special Education, Secondary Education fields (biology, broad fields science, business, chemistry, economics, English, history, geography, mathematics, physics, and political science), and a P-12 Education field (Spanish education). Concentrations are also offered in Elementary Education and Health and Physical Education.

Master of Arts in Teaching

The College of Education offers the Master of Arts in Teaching (M.A.T.) degree for those who hold bachelor’s degrees in a related teaching field. The M.A.T. is available in Middle Grades Education, Special Education, Elementary Education and Secondary Education fields (biology, broad fields science, business, chemistry, economics, English, family and consumer sciences, history, geography, mathematics, physics, and political science), Health and Physical Education, and a P-12 Education field (Spanish Education). Those who hold a bachelor’s degree and are interested in Elementary or Health and Physical Education, another certification option is to complete program requirements at the undergraduate level. Certification programs in Art Education are available at the undergraduate level and graduate non-degree. For Music Education, a certification program is only available at the undergraduate level.

Candidates in the graduate alternative certification program (M.A.T degree or non-degree) must be admitted to the Teacher Education Program (TEP) by the end of Step One, prior to enrolling in Step Two of the program of study. For non-degree candidates who seek to enter the M.A.T. program, GRE or MAT test scores must be submitted and admission granted into the M.A.T. degree program before enrolling in Step Two. Any M.A.T. program application submitted by a candidate who is enrolled under non-degree status will not be considered for M.A.T. admission once the candidate enrolls in Step Two courses.

For admission to the M.A.T., students must have their transcripts evaluated by Georgia Southern University’s College of Education Graduate Academic Services Center and they must meet all Teacher Education Program (TEP) admission and retention requirements, including an overall GPA of 2.50 or higher over all college coursework attempted. Prospective students should contact the College of Education Graduate Academic Services Center for information and questions: https://coe.georgiasouthern.edu/gasc/services/transcript-evaluation.

Students in the M.A.T. program are assigned a faculty advisor in their home Department.

Admission to M.A.T. Program

Regular

Check with individual M.A.T. program concentrations for specific admission requirements.

 Provisional

Applicants may be approved for Provisional admission based on the quality of the admission material presented. Provisional students must earn grades of "B" or higher in their first nine (9) credits of course work after admission and meet any other stipulations outlined by the department to be converted to regular status. Check with individual M.A.T. program concentrations for provisional admission guidelines.

Non-Degree Initial Teacher Certification Programs

Non-degree initial certification programs are available in some teaching fields. Check with the program director for specific details in the certification field desired. The non-degree program option is designed for those who do not wish to pursue a master’s degree. Non-degree initial certification students must be admitted for graduate study as a Non-degree Teaching/Service/Leadership student (test scores are not required). All students seeking initial teaching certification must meet all TEP admission requirements. A transcript evaluation by the College of Education Graduate Academic Services Center identifies the program of study required in order to meet initial certification requirements for the desired field.

Note: Initial certification in non-teaching fields such as Counselor Education, Educational Leadership, and Instructional Technology require completion of the master's degree; School Psychology requires completion of the Education Specialist's degree. Initial certification in Counselor Education and School Psychology cannot be completed as non-degree study. To pursue certifications in either Instructional Technology or in Educational Leadership as a non-degree student, the applicant should check the individual program page.

Teacher Education Program

Students seeking initial certification as non-degree/M.A.T. students must meet admission requirements for the Teacher Education Program. Criteria for retention in the program must also be met, as well as specific program requirements and Student Teaching/Internship requirements. Candidate progress is monitored by program faculty and advisors to ensure that candidates are satisfactorily meeting program outcomes.
Engineering and Computing

The Allen E. Paulson College of Engineering and Computing (CoEC) at Georgia Southern University started operations on July 1, 2012. The college offers both undergraduate and graduate degree programs. The college offers Bachelor of Science degree programs in Civil Engineering, Computer Science, Construction Management, Electrical Engineering, Information Technology, Manufacturing Engineering and Mechanical Engineering. The Regents' Engineering Pathway Program (REP Program) is also offered as an option for undergraduate students to earn an engineering degree at Georgia Southern or one of four other Georgia institutions that offer engineering degrees. At the graduate level, the college offers the Master of Science in Applied Engineering (MSAE) and the Master of Science in Computer Science (MSCS) degrees. The CoEC also offers two graduate certificates in Engineering & Manufacturing Management (EMM), and Occupational Safety & Environmental Compliance (OSEC). All of which are currently offered only on the Statesboro campus.

The MSAE degree program integrates state-of-the-art technology and interdisciplinary and conceptual science with hands-on, operational skills preparation. The MSAE is designed to meet the growing global demand for engineers who possess leadership skills but also applications experience in consumer, commercial, and industrial fields. The theoretical and research-based curriculum provides excellent preparation for graduates to make an immediate impact on their career and their employers. MSAE students have the option of concentrating in one of five specialized areas of study: Electrical and Electronic Systems, Energy Science, Engineering Management, Information Technology, and Mechatronics.

The MSCS is designed as a hybrid program to allow those with degrees in traditional, non-computing fields, to earn a master's degree in computer science. People currently working in corporate positions, the military, and academia benefit from this flexibility. Also, current undergraduate computer science majors can begin coursework in the MSCS immediately upon earning their bachelor's degree.

The EMM and OSEC certificates can be earned as stand-alone credentials or in addition to the MSAE degree. They provide concentrated study in two important fields in today's commercial and industrial environments.

Vision

The Allen E. Paulson College of Engineering and Computing will be a nationally recognized leader in engineering, computer science, and information technology in the areas of student-centric and application-based teaching, research, and service.

Mission

The College of Engineering and Computing will maintain a dynamic and evolutionary environment of excellence in teaching, research, and service in which students, faculty, and staff can achieve their professional goals. In these endeavors, the CEIT will foster student-centric professional learning experiences utilizing advanced technologies applied with state-of-the-art equipment, inspire innovation and invention, encourage sustainability, and technically and economically enrich our communities and societies.

College Structure

- Department of Civil Engineering and Construction (p. 392)
- Department of Computer Science (p. 395)
- Department of Electrical and Computer Engineering (p. 398)

Experiential Learning Opportunities

Internships

Internships are supervised experiential learning programs, designed to allow students an opportunity to receive practical experience in their chosen field of study. Internships provide rich professional development content and connect students with relevant experiences that enhance their graduate education. Not only do they prepare students for their next steps after graduation, whether that involves a full-time job or furthering their education, internships can provide a means for students to financially support themselves and fund their education. Students should contact Dr. David Williams, Director of REP Program and Co-op Programs in the Allen E. Paulson College of Engineering and Computing Office of the Dean for further information.

Advisement

Graduate students in CoEC are advised by the department's professional advisors and the student's major faculty advisor. For information regarding the MSAE, MSCS or the Graduate Certificate programs, contact Erica Colbert at MSAE@georgiasouthern.edu or MSCS@georgiasouthern.edu.

Department of Civil Engineering and Construction

The Master of Science in Applied Engineering (MSAE) degree program offered on the Statesboro Campus of Georgia Southern integrates state-of-the-art technology and interdisciplinary and conceptual science with hands-on, operational skills preparation. Graduates gain valuable knowledge and are placed in a unique position to make an immediate impact on their career and their employers. The Department of Civil Engineering and Construction offers MSAE students a concentration in Civil Engineering and Construction. Thesis or Non-thesis tracks are available within the program. Courses in the Civil Engineering and Construction concentration include hydrology, advanced water and waste water treatment, pavement analysis and design, asphalt mix design, structural analysis, and finite elements. Research conducted through the thesis or independent study project provides opportunity for individualized in-depth study within the concentration.

Programs

Master's

• Applied Engineering M.S.A.E. (Concentration in Civil Engineering and Construction) (Non-Thesis) (p. 392)
• Applied Engineering M.S.A.E. (Concentration in Civil Engineering and Construction) (Thesis) (p. 393)
• Civil Engineering M.S.C.E. (Non-Thesis) (p. 394)
• Civil Engineering M.S.C.E. (Thesis) (p. 394)

Doctoral

Applied Engineering M.S.A.E. (Concentration in Civil Engineering and Construction) (Non-Thesis)

Degree Requirements: 30 Credit Hours (Non-Thesis)

Total Hours: Non-Thesis Track 27 +3 hours Master's Project

Admission Requirements

Regular

1. Completed requirements for the Bachelor’s degree at a college or university accredited by the proper regional accrediting association.
2. An undergraduate degree or the equivalent in Civil Engineering or closely related field of study.
3. A 3.0 (4.0 scale) cumulative grade point average or higher on courses in undergraduate work, or equivalent.
4. International students must meet College of Graduate Studies English Proficiency requirements.

Provisional

A student may be granted provisional admission based upon the recommendation of the Master of Science in Applied Engineering Graduate Coordinator or department chair.

Non-Degree

Non-degree students are accepted on an individual basis as space is available.
Program Concentrations

A minimum of 50% of courses for the Master of Science in Applied Engineering degree must be taken at or above the 6000 level.

Degree Requirements

Non-Thesis Track: 27 credit hours and 3 credit hours Master’s Project

| Comprehensive Exam                                    | 30           |

Thesis

Each candidate for the Master of Science in Applied Engineering Thesis Track degree must complete a thesis on a subject approved by the graduate thesis committee. The major professor supervises the research, directs the writing of the thesis, and approves the thesis in its final form. Prior to the final approval, the thesis is read by the thesis committee. One member, termed the second reader, has responsibility for an intensive and rigorous criticism of the thesis and a third member of the thesis committee has the responsibility of an “editorial reader.” Both second and third readers must report all comments to the major professor. The thesis must be defended in an oral examination before the graduate committee prior to final approval and sign-off.

The style and format for the completed thesis shall follow that prescribed by the Director for the Master of Science in Applied Engineering degree. Procedural steps in the preparation of the thesis are as follows:

- The prospectus for the thesis shall be submitted to the major professor and thesis committee for approval.
• The student must prepare the thesis for electronic submission following the latest version of the Electronic Thesis and Dissertation (ETD): Student Guide to Preparation and Processing manual.
• The thesis must be electronically submitted to the ETD site for format check by the final thesis submission deadline as stated in the University Calendar.
• The final corrected thesis must be electronically submitted to the ETD site by the ETD format check submission deadline as stated in the University Calendar. The final document must be electronically approved by the Thesis Committee.

Civil Engineering M.S.C.E. (Non-Thesis)

Degree Requirements: 30 Credit Hours
Total Hours: Thesis Track 27 and 3 hours Master’s Project

Admission Requirements
Regular
1. Completed requirements for the Bachelor’s degree at a college or university accredited by the proper regional accrediting association.
2. An undergraduate degree or the equivalent in Civil Engineering or closely related field of study.
3. A 3.0 (4.0 scale) cumulative grade point average or higher on courses in undergraduate work, or equivalent.
4. International students must meet College of Graduate Studies English Proficiency requirements.

Provisional
A student may be granted provisional admission based upon the recommendation of the Master of Science in Applied Engineering Graduate Coordinator or department chair.

Non-Degree
Non-degree students are accepted on an individual basis as space is available.

A minimum of 50% of courses for the Master of Science in Civil Engineering degree must be taken at or above the 6000 level.

Specializations
The Master of Science in Civil Engineering degree program provides specializations in Construction Engineering, Environmental/Water Resources Engineering, Transportation-Pavement/Geotechnical Engineering, Structural Engineering and Surveying-Geomatics.

Program of Study
A minimum of 30 semester hours of course work, none of which was used to satisfy requirements for a previous degree, are required. The student’s faculty advisor, the Civil Engineering & Construction Department Chair and the Associate Dean for Students, Curriculum & Advisement must approve the program of study. Certain specialization groups within the department have specific course requirements, so students are advised to speak with their advisor to ensure degree requirements are satisfied.

Students who are not writing a thesis must take at least 18 hours of coursework in their major field. The major field is defined as the student’s area of specialization.

Department of Computer Science

The Master of Science in Computer Science (MSCS) degree program is structured specifically to provide a rigorous master’s program for people currently working in the information technology industry, as well as for those who wish to enter the field or are current undergraduate students interested in advancing their education. This hybrid program prepares students in the area of data and knowledge systems. With a concentration in the high-demand, competitive fields of data mining and data warehousing, the Georgia Southern University MSCS program is one of only a handful of such master’s degree programs in the world. Both thesis and project options are available within the MSCS program.

Programs
Master’s
- Computer Science M.S. (Hybrid) (Non-Thesis) (p. 396)
- Computer Science M.S. (Hybrid) (Thesis) (p. 397)

Computer Science M.S. (Hybrid) (Non-Thesis)

Degree Requirements: 30 Credit Hours

Admission Requirements

Regular Admission

Domestic Candidates: (Choose Option A or Option B)

Option A
1. Bachelor of Science in Computer Science or in a related field (Computer Engineering, Information Technology, Information Systems, Software Engineering, etc.) from an accredited program.
2. Have a cumulative GPA of 3.0/4.0 or its equivalent.
3. Submit a General GRE score.

Option B
1. Bachelor of Science in Computer Science or in a related field (Computer Engineering, Information Technology, Information Systems, Software Engineering, etc.).
2. Have a cumulative GPA of 2.4/4.0 or its equivalent.
3. Have at least two years of relevant professional experience (employment) in computing.
4. Submit a General GRE score.

International Candidates
1. Bachelor of Science in Computer Science or in a related field (for example, Computer Engineering, Information Technology, Information Systems, Software Engineering, etc.)
2. Have a cumulative GPA of 3.0/4.0 or its equivalent.
3. Submit a General GRE score.
4. Submit a minimum TOEFL score of 550 (paper-based), 213 (computer-based), or 80 (internet-based) The TOEFL will be waived for international applicants who have graduated from a U.S. College or University.

Provisional Admission

Applicants who meet most (but not all) of the Regular admission requirements may be admitted on a Provisional basis. Applicants granted Provisional admission must earn grades of “B” or higher in the courses taken under the Provisional admission status. Any other conditions of Provisional admission will be stated in the admission letter. Applicants with such admission status may take graduate-level courses counting toward the M.S. degree requirements. It is every student’s responsibility to satisfy his or her conditions of admission as soon as possible after acceptance. Prerequisites for provisionally admitted students consist of the following undergraduate courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 1301</td>
<td>4</td>
</tr>
<tr>
<td>CSCI 3230</td>

<tr>
<td>CSCI 3232</td>
<td>3</td>
</tr>
</tbody>
</table>

Non-Degree

Applicants who have a high number of deficiencies may be granted Non-Degree admission to the College of Graduate Studies to take a limited number of graduate level courses.

Program of Study

The graduate student and the graduate advisor shall develop a Program of Study that consists of 30 credits of graduate course work, including 9 credits of core courses, 3 to 6 credits of Directed Study, 12 to 15 credits of elective classes at the 7000 level, and 3 credits of Research Project in Computer Science (CSCI 7899) (project option).

For the online Concentration program in Data and Knowledge Systems, the graduate student and the graduate advisor shall develop a Program of Study that consists of 30 credits of graduate course work, including 9 credits of core courses, 9 credits in the concentration area, 9 credits of elective classes at the 7000 level, and 3 credits of Research Project in Computer Science (CSCI 7899) (project option).

Department of Electrical and Computer Engineering

The Master of Science in Applied Engineering (MSAE) degree program offered on the Statesboro Campus of Georgia Southern integrates state-of-the-art technology and interdisciplinary and conceptual science with hands-on, operational skills preparation. Graduates gain valuable knowledge and are placed in a unique position to make an immediate impact on their career and their employers. The Department of Electrical Engineering offers MSAE students a concentration in Electrical and Electronic Systems. Thesis or Non-thesis tracks are available within the program. Courses in the Electrical and Electronic Systems concentration include analytical math and experimental research in area such as autonomous systems, optical communications, wireless power, micro antennas, and energy harvesting. Research conducted through the thesis or independent study project provides opportunity for individualized in-depth study within the concentration.

Programs

Master’s
- Applied Engineering M.S.A.E. (Concentration in Electrical and Electronic Systems) Non-Thesis (p. 398)
- Applied Engineering M.S.A.E. (Concentration in Electrical and Electronic Systems) Thesis (p. 399)
- Electrical Engineering M.S.E.E. (Non-Thesis) (p. 399)
- Electrical Engineering M.S.E.E. (Thesis) (p. 400)

Applied Engineering M.S.A.E. (Concentration in Electrical and Electronic Systems) Non-Thesis

Degree Requirements: 30 Credit Hours
Total Hours

Admission Requirements

Regular
1. Completed requirements for the Bachelor’s degree at a college or university accredited by the proper regional accrediting association.

2. An undergraduate degree or the equivalent in the proposed or closely related field of study.
3. A 2.75 (4.0 scale) cumulative grade point average or higher on courses in undergraduate work, or equivalent.
4. International students must meet College of Graduate Studies English Proficiency requirements.
5. The Master of Science in Applied Engineering program with an Information Technology concentration requires: a) a bachelor’s degree in computer sciences, information systems, information technology, or related field and a minimum of 2-years of work experience in IT or related field; or b) a bachelor’s degree and a least 4-years of work experience in IT or related field; or c) permission of the Graduate Program Director.

Provisional
A student may be granted provisional admission based upon the recommendation of the Master of Science in Applied Engineering Graduate Coordinator or department chair.

Non-Degree
Non-degree students are accepted on an individual basis as space is available.

Program Concentrations

Degree Requirements
A minimum of 50% of courses for the Master of Science in Applied Engineering degree must be taken at or above the 6000 level.

Thesis

Each candidate for the Master of Science in Applied Engineering Thesis Track degree must complete a thesis on a subject approved by the graduate thesis committee. Thesis credits must be completed over no less than two semesters. The major professor supervises the research, directs the writing of the thesis, and approves the thesis in its final form. Prior to the final approval, the thesis is read by the thesis committee. One member, termed the second reader, has responsibility for an intensive and rigorous criticism of the thesis and a third member of the thesis committee has the responsibility of an “editorial reader.” Both second and third readers must report all comments to the major professor. The thesis must be defended in an oral examination before the graduate committee prior to final approval and sign-off.

The style and format for the completed thesis shall follow that prescribed by the Director for the Master of Science in Applied Engineering degree. Procedural steps in the preparation of the thesis are as follows:

- The prospectus for the thesis shall be submitted to the major professor and thesis committee for approval.
- The thesis must be electronically submitted to the ETD site for format check by the final thesis submission deadline as stated in the University Calendar.
- The final corrected thesis must be electronically submitted to the ETD site by the ETD format check submission deadline as stated in the University Calendar. The final document must be electronically approved by the Thesis Committee.

Department of Information Technology

The Master of Science in Applied Engineering (MSAE) degree program offered on the Statesboro Campus of Georgia Southern integrates state-of-the-art technology and interdisciplinary and conceptual science with hands-on, operational skills preparation. Graduates gain valuable knowledge and are placed in a unique position to make an immediate impact on their career and their employers. The Information Technology (IT) concentration in the MSAE program embraces the constantly changing IT industry, prepares graduates to analyze and manage IT networks and systems. Thesis or Non-thesis tracks are available within the program. Courses include IT management, data analytics, networking, data management and storage, and network security. Research conducted through the thesis or independent study project provides opportunity for individualized in-depth study within the concentration.

Each candidate for the Master of Science in Information Technology Thesis Option degree must complete a thesis on a subject approved by the graduate thesis committee. The major professor supervises the research, directs the writing of the thesis, and approves the thesis in its final form. Prior to the final approval, the thesis is read by the thesis committee. One member, termed the second reader, has responsibility for an intensive and rigorous criticism of the thesis and a third member of the thesis committee has the responsibility of an “editorial reader.” Both second and third readers must report all comments to the major professor. The thesis must be defended in an oral examination before the graduate committee prior to final approval and sign-off. The thesis must be electronically submitted to the ETD site for electronic submission (ETD): Student Guide to Preparation and Processing manual.

Department of Manufacturing Engineering

The Master of Science in Applied Engineering (MSAE) degree program offered on the Statesboro Campus of Georgia Southern integrates state-of-the-art technology and interdisciplinary and conceptual science with hands-on, operational skills preparation. Graduates gain valuable knowledge and are placed in a unique position to make an immediate impact on their career and their employers. The undergraduate Manufacturing Engineering program was launched in the fall semester 2015. With a projected program rollout over four years, the first program graduates are expected in spring semester 2019. Graduate level
courses in the areas of Lean and Six Sigma, Additive Manufacturing, NanoManufacturing, and Packaging will be offered as the rollout process progresses. These graduate courses are applicable as electives in MSAE concentrations as determined in consultation with the major advisor. MSAE concentrations are Electrical and Electronic Systems, Energy Science, Engineering Management, Information Technology, or Mechatronics. Thesis or Non-thesis tracks are available within the program. Research conducted through the thesis or independent study project provides opportunity for individualized in-depth study within the concentration.

Programs

Master's

- Applied Engineering M.S.A.E. (Concentration in Advanced Manufacturing Engineering) (Non-Thesis) (p. 405)
- Applied Engineering M.S.A.E. (Concentration in Advanced Manufacturing Engineering) (Thesis) (p. 405)

Doctoral

Certificates

No results were found.

Endorsements

No results were found.

Applied Engineering M.S.A.E. (Concentration in Advanced Manufacturing Engineering) (Non-Thesis)

Degree Requirements: 30 Credit Hours (Non-Thesis)

Regular

1. Completed requirements for the Bachelor's degree at a college or university accredited by the proper regional accrediting association.

2. An undergraduate degree or the equivalent in the proposed or closely related field of study.

3. A 2.75 (4.0 scale) cumulative grade point average or higher on courses in undergraduate work, or equivalent.

4. International students must meet College of Graduate Studies English Proficiency requirements.

Provisional

A student may be granted provisional admission based upon the recommendation of the Master of Science in Applied Engineering Graduate Coordinator or department chair.

Non-Degree

Non-degree students are accepted on an individual basis as space is available.

Program Concentrations

A minimum of 50% of courses for the Master of Science in Applied Engineering degree must be taken at or above the 6000 level.

Department of Mechanical Engineering

The Master of Science in Applied Engineering (MSAE) degree program offered on the Statesboro Campus of Georgia Southern integrates state-of-the-art technology and interdisciplinary and conceptual science with hands-on, operational skills preparation. Graduates gain valuable knowledge and are placed in a unique position to make an immediate impact on their career and their employers. The Department of Mechanical Engineering offers concentrations in Energy Science, Engineering Management, and Mechatronics. Thesis or Non-thesis tracks are available within the program. Courses in the Mechanical Engineering concentrations include analytical math, renewable energy, combustion, engine development, quality control, leadership, environmental law, mechanical controls, system design and automation, modeling and simulation, fracture mechanics, robot dynamics, design and analysis, as well as experimental research. Thesis or independent study project research provides opportunity for individualized in-depth study within the concentration.

Capstone Activity

MENG 7895 Independent Study (AND) | 3
A 6th Technical Elective         | 3
Requirements: 12 Credit Hours

Program

A certificate at the graduate level is a coherent set of courses related to work in a particular field. The Graduate Certificate program offers two certificate options each of which consists of 12 credits. Either option consists of two required courses and two courses chosen from a list of restricted electives. The two options are Engineering and Manufacturing Management and Occupational Safety and Environmental Compliance.

In the case of the Engineering and Manufacturing Management graduate certificate, Industrial Production Manager, Engineering Manager, and Industrial Engineer are position titles that traditionally include responsibility for managing engineering and manufacturing operations in the public and private sectors. A related degree or post-secondary and/or graduate academic preparation is highly desirable or required. The intent of the Graduate Certificate in Occupational Safety and Environmental Compliance is to enhance the academic training of technical managers and engineers specifically in the field of safety and environmental compliance. Health and Safety Engineer, Environmental Engineer, and Industrial Safety Manager are position titles that traditionally include responsibility for occupational safety and environmental compliance. Although a degree in safety or environmental compliance is not typically required in such positions, post-secondary and/or graduate academic preparation in these areas is highly desirable or required.

Admission Requirements

Students seeking a Graduate Certificate would be admitted by CGOS under a Non-Degree Certificate admission status. Students pursuing the Graduate Certificate in Engineering and Manufacturing Management would be required to hold an undergraduate or graduate degree from an accredited institution. They would be required to have an undergraduate GPA of 2.75 or higher and/or a graduate GPA of 3.0 or higher. Standardized test scores such as the GMAT or GRE would not be required for the Graduate Certificate. Admission as Non-Degree Certificate does not guarantee subsequent admission to a graduate degree program. That is a separate process and different criteria must be met.

- Upon recommendation of the Graduate Program Director and approval from the Dean of the College of Graduate Studies, credit earned in a certificate program may be applied to a graduate degree program.
- Upon recommendation of the Graduate Program Director and approval from the Dean of the College of Graduate Studies, a maximum of six (6) credits earned before the student entered the certificate program may be applied to that program.
- The minimum grade requirements for the graduate certificate are the same as those for graduate degrees. For graduate credit, the grade in a course must be "C" or higher. To remain in good standing, a student must maintain a cumulative GPA of 3.0 or higher.
- To be awarded a graduate certificate, the student

  a. must not be on probation,
b. must have a cumulative GPA of 3.0 or higher on graduate coursework and on coursework applied to the certificate,

c. must meet all the requirements of the College of Graduate Studies and the student’s certificate program, and

d. must be enrolled during the semester in which the certificate requirements are completed.

- The College of Graduate Studies residence requirements and the requirements for a comprehensive final examination do not automatically apply to the graduate certificate program

Program of Study

The Graduate Certificate in Engineering and Manufacturing Management would require a total of 12 credits. This would include 6 credits of required courses and 6 credits of restricted electives. The proposed courses are as follows:

Occupational Safety and Environmental Compliance Certificate

Occupational Safety and Environmental Compliance Certificate

Requirements: 12 Credit Hours

Program

A certificate at the graduate level is a coherent set of courses related to work in a particular field. The Graduate Certificate program offers two certificate options each of which consists of 12 credits. Either option consists of two required courses and two courses chosen from a list of restricted electives. The two options are Engineering and Manufacturing Management and Occupational Safety and Environmental Compliance.

In the case of the Engineering and Manufacturing Management graduate certificate, Industrial Production Manager, Engineering Manager, and Industrial Engineer are position titles that traditionally include responsibility for managing engineering and manufacturing operations in the public and private sectors. A related degree or post-secondary and/or graduate academic preparation is highly desirable or required. The intent of the Graduate Certificate in Occupational Safety and Environmental Compliance is to enhance the academic training of technical managers and engineers specifically in the field of safety and environmental compliance. Health and Safety Engineer, Environmental Engineer, and Industrial Safety Manager are position titles that traditionally include responsibility for occupational safety and environmental compliance. Although a degree in safety or environmental compliance is not typically required in such positions, post-secondary and/or graduate academic preparation in these areas is highly desirable or required.

Admission Requirements

Students seeking a Graduate Certificate would be admitted by COGS under a Non-Degree Certificate admission status. Students pursuing the Graduate Certificate in Occupational Safety and Environmental Compliance would be required to hold an undergraduate or graduate degree from an accredited institution. They would be required to have an undergraduate GPA of 2.75 or higher and/or a graduate GPA of 3.0 or higher. Standardized test scores such as the GMAT or GRE would not be required for the Graduate Certificate. Admission as Non-Degree Certificate does not guarantee subsequent admission to a graduate degree program. That is a separate process and different criteria must be met.

- Upon recommendation of the Graduate Program Director and approval from the Dean of the College of Graduate Studies, credit earned in a certificate program may be applied to a graduate degree program.
- Upon recommendation of the Graduate Program Director and approval from the Dean of the College of Graduate Studies, a maximum of six (6) credits earned before the student entered the certificate program may be applied to that program.
- The minimum grade requirements for the graduate certificate are the same as those for graduate degrees. For graduate credit, the grade in a course must be “C” or higher. To remain in good standing, a student must maintain a cumulative GPA of 3.0 or higher.
- To be awarded a graduate certificate, the student a. must not be on probation,
  b. must have a cumulative GPA of 3.0 or higher on graduate coursework and on coursework applied to the certificate,
  c. must meet all the requirements of the College of Graduate Studies and the student’s certificate program, and
  d. must be enrolled during the semester in which the certificate requirements are completed.
- The College of Graduate Studies residence requirements and the requirements for a comprehensive final examination do not automatically apply to the graduate certificate program

A complete disclosure of policies regarding admission is provided in the university catalog. Students who subsequently are awarded admission into a degree program may transfer certificate courses into the degree program if recommended by the Graduate Program Director.

Program of Study

Health Professions

Vision
The vision of the Waters College of Health Professions is to become the leader in the preparation of health professionals who are engaged in transformational thinking and evidence-based practices that impact the health and quality of life for individuals, families, and communities. We will accomplish this vision through a focus on: high academic expectations, individual responsibility for academic achievement, student-centered teaching and learning, impacting regional and global communities, interdisciplinary collaboration, innovative healthcare technology, experiential learning, community-engaged service and scholarship.

Mission
The mission of the Waters College of Health Professions is to prepare future health professionals through academic excellence and interdisciplinary collaboration while advancing knowledge through scholarship and serving culturally diverse communities.

College Structure
- Department of Diagnostic and Therapeutic Sciences (p. 417)
- Department of Health Sciences and Kinesiology (p. 418)
- Department of Rehabilitation Services (p. 427)
- School of Nursing (p. 432)

Advisement
Undergraduate students in the Waters College of Health Professions are advised on their home campus by assigned academic advisors.

Armstrong Campus: Students are advised in the Office of Academic Advising and Support located in the Student Success Center. Students can contact the office at (912) 344-2570.

Liberty Campus: Students are advised in the Advising Office, room 139. Students can contact the Advising Office at (912) 877-1906.

Statesboro Campus: Students are advised in the WCHP Student Services Center located in the Hollis Building – Room 2123-B Hollis Building. Students can contact the Student Services Center at (912) 478-1931.

Department of Diagnostic and Therapeutic Sciences

The Department of Diagnostic and Therapeutic Sciences at Georgia Southern University offers bachelor and degree completion programs in the high tech fields of medical laboratory science, radiologic sciences and respiratory therapy. All programs offer options for completing the coursework either fully or substantially online.

Mission Statement
The Department of Diagnostic and Therapeutic Sciences, as part of the Waters College of Health Professions at Georgia Southern University
University, exists to educate students, and to provide our culturally diverse communities with competent, team-oriented and compassionate healthcare professionals.

Core Values

Core Value 1: The Department of Diagnostic and Therapeutic Sciences faculty is dedicated to providing excellence in health professions education through an interdisciplinary approach.

Core Value 2: The Department of Diagnostic and Therapeutic Sciences faculty participate in a team-oriented approach to learning and instruction for the advancement of integrated healthcare education.

Core Value 3: The Department of Diagnostic and Therapeutic Sciences faculty provide a student-learning environment committed to fostering culturally sensitive and compassionate professional community service.

Radiologic Sciences Post-Baccalaureate Certificate

Certificate Requirements: 18 Credit Hours

Policies, Requirements and Standards

Admission Standards

A. An earned baccalaureate degree from a regionally accredited institution.

B. Current professional certification from the American Registry of Radiologic Technologists, Nuclear Medicine Technology Certification Board or the American Registry for Diagnostic Medical Sonography or equivalent. (If not yet certified, must become certified prior to the end of the first semester at Armstrong).

C. Grade point average of 2.5 or higher for all college work.

Standards of Progression and Completion

A. Each student will file a program of study with Graduate Studies.

B. A minimum overall grade point average of B or better must be earned for the certificate to be awarded on the graduate level.

C. Students are encouraged to apply for graduation two semesters before the anticipated date of graduation. Note: A copy of the official program of study must accompany the candidate’s application.

D. If any change in the approved program of study is required, an amended program of study, signed by the student, the advisor, and the program coordinator must be submitted to Graduate Studies.

E. Consistent with Graduate Studies policies, any student who earns a grade of C will be placed on academic probation. Students who earn a C in any required course should meet with their academic advisor (and other appropriate professors) to develop a plan to enhance future success.

F. Students may attempt any given course no more than two times. A student who does not receive a grade of C or higher in a given course after two attempts will not be allowed to continue in the program.

Georgia Southern University Armstrong Campus in Savannah
Department #4076
University Hall 154
Admission Requirements

Meeting minimum entry requirements does guarantee a seat in the program; admission to the program is limited to 10 seats in the Community Nutrition concentration and 10 seats in the School Nutrition concentration.

1. Completion of a Didactic Program in Dietetics (DPD), accredited by the Accreditation Council for Education of Nutrition & Dietetics, the accrediting agency of the Academy of Nutrition & Dietetics, with coursework completed within the last 10 years.
2. Minimum cumulative grade point average (GPA) of 3.0 or higher (on a 4.0 scale), with a minimum of a ‘C’ in prerequisite DPD, math, and science coursework.
3. TOEFL IBT score of 80 with a minimum score of 20 in each of the four exam sub-sections (international students).
4. Completion of dietetic related volunteer and work experience, in the fields of nutrition, food science, health, laboratory or clinical research, foodservice, food industry, nutrition education, or health promotion.
5. Completion of the on-line Graduate Application for Admission Form.
6. Submission of the $50.00 Graduate School application fee at: http://chps.georgiasouthern.edu/hk/graduate/dietetic-internship/approximate-expenses/.
7. Official transcripts from each college or university previously attended.
9. Completion of the on-line Dietetic Internship Centralized application Service (DICAS http://portal.dicas.org ) packet with the following:
   a. Application Information
   b. Intent to Complete or Verification of Completion of a Didactic Program in Dietetics
   c. Personal statement (8000 character limit) discussing the following:
      • Why you want to enter the dietetics profession
      • Your interest in community nutrition or in school nutrition
      (choose only one)
      • Your short-term and long-term goals
      • Experiences and skills that reflect your ability to be successful in the dietetic internship and as a registered dietitian
      • An assessment of the qualities, knowledge, and skills you feel you need or wish to improve upon
      • Other information you consider important for the selection process
   d. Resume that includes education, work and professional history, recognitions/awards, membership and participation in professional organizations, dietetic related volunteer experience, other experiences related to the dietetic internship, and contact information for a minimum of three references
   e. Three letters of reference
   f. Upload results of a criminal background check that includes federal, state and local levels. If using Professional Screening & Information (PSI), the costumer code is CUST and the product code GSUN for background check only (background check must be clear of offenses for the previous five years), http://www.psibackgroundcheck.com/
10. Completion of a pre-admission interview
11. Completion of a pre-admissions math quiz.

NOTE: Contact the Office of Graduate Admissions for other admissions related information.

Certificate Requirements: 13 Credit Hours

Program

The program, with concentrations in community nutrition and school nutrition, consists of 13 credits and 1200 supervised practice hours that occur in the community nutrition, food systems administration, and clinical nutrition practice areas. Students will take five courses: School Nutrition Administration, Applied Medical Nutrition Therapy, Energy Balance for Weight Management, Public Health & Community Nutrition, and Culinary Skills. Previous graduate course work may be accepted at the discretion of the Program Director. Previous graduate course work must be supported by an institutional catalog description and course syllabus.

Course Requirements

</table>
At the completion of 9 credits, the student must sign a form declaring that he/she will complete the Certificate Program (total 13 credits) or will apply for admission to a degree seeking program. This is necessary because only 9 credits (no more than 3 courses) of non-degree course work may be accepted towards completion of a degree program (some exceptions; please see the Georgia Southern University Graduate Catalog).

Gerontology Graduate Certificate

Certificate Requirements: 18 Credit Hours

Admission Standards

A. Completed requirements for a baccalaureate degree from a regionally-accredited institution.
B. A student must be admitted to Graduate Studies on a degree or certificate basis.
