Kinesiology M.S. (Concentration in Athletic Training) (Thesis)

Degree Requirements: 36 Credit Hours

Admission Requirements

1. A minimum of a Bachelor's degree from an accredited institution.
2. Graduation from a CAATE accredited Athletic Training program or a Certified Athletic Trainer.
3. Minimum undergraduate grade point average (GPA) of 3.0 (this is a change from the 2.75 minimum).
4. GRE scores within the past five years.

NOTE: Prerequisite undergraduate course work may be required. Contact the Graduate Program Director in the Department of Health & Kinesiology for complete information.

NOTE: Achievement of the minimum admission requirements of the College of Graduate Studies and requirements of the graduate program does not guarantee admission to that graduate degree program.

Kinesiology M.S. (Concentration in Coaching) (Online)

Degree Requirements: 36 Credit Hours (Online)

Admission Requirements

1. Completion of a Bachelor's degree from an accredited institution.
2. Regular admission will be considered for students with a grade point average (GPA) of 2.75 (4.0 scale) for the last 60 credit hours of their undergraduate degree.
3. A College of Graduate Studies Online Application.
4. A full vita or resume that includes the following:
   - Work history,
   - Professional experiences,
   - Membership and participation in professional organizations,
Other experiences related to coaching,
Contact information for a minimum of three references

Provisional admission will be considered for students with a minimum grade point average (GPA) of 2.5 (4.0 scale) for the last 60 hours of their undergraduate degree.

Additional Requirements: This program starts in May and students will not be allowed to begin the program in the Fall or Spring semester. All students must be coaching while in the program.

Application Deadline: Application received by April 1 will receive first consideration.

NOTE: Prerequisite undergraduate course work may be required. Contact the Graduate Program Director in the Department of Health & Kinesiology for complete information.

NOTE: Achievement of the minimum admission requirements of the College of Graduate Studies and requirements of the graduate program does not guarantee admission to that graduate degree program.

NOTE: This concentration does not require GRE scores.

**Kinesiology M.S. (Concentration in Sport and Exercise Psychology) (Thesis)**

**Degree Requirements: 36 Credit Hours**

**Admission Requirements**

**Sport and Exercise Psychology Concentration**

- Completion of a Bachelor’s degree from an accredited institution
- Completion of prerequisite coursework may be required if degree major or minor is not in psychology or kinesiology/exercise science
- Minimum grade point average (GPA) of 3.00 (4.0 scale)
- A vitae or résumé that includes the following:
  a) Work history,
  b) Professional experiences,
  c) Membership and participation in professional organizations,
  d) Other experiences related to the academic program, and
  e) Names and contact information for a minimum of three references

- A personal statement of no more than 3 pages that includes a description of previous professional experiences and accomplishments, career goals, and reasons for interest in the graduate program at Georgia Southern University
- Submission of Graduate Record Examination (GRE) scores
- Completion of the online application for the College of Graduate Studies
- A phone, video-based, or in-person interview with the program director may be requested for some candidates after an initial review of submitted applications is completed

*Achievement of the minimum admission requirements of the College of Graduate Studies and requirements of the graduate program does not guarantee admission to that graduate degree program.*

Master of Health Administration
M.H.A.

Degree Requirements: 53 Credit Hours

Policies, Requirements and Standards

The objective of the Master of Health Sciences Administration degree is to provide the student with mastery of the knowledge and skills for the effective administration of health service organizations across the continuum of care. Specifically, the student will understand the basic organizational, financial, legal, and managerial components of health services as they relate to a dynamic and evolving healthcare delivery system.

Criminal Background Checks

Clinical agencies utilized by the Department of Health Sciences and Kinesiology and Program in Health Services Administration may require criminal background checks and/or drug testing prior to acceptance of the student into clinical facilities. Students who do not pass the criminal background check and/or drug test may be unable to initiate/complete the applied learning experience. Any fees or cost associated with background checks and/or drug testing is the responsibility of the student.

Admission Requirements

For consideration of admission to the MHA program, the applicant must have completed an application for admission to the College of Graduate Studies at Georgia Southern University, submitted official copies of all academic transcripts related to undergraduate and graduate coursework at the time of program application, submitted official GRE or GMAT scores, prepared a formal Letter of Intent and submitted an updated professional/personal resume, detailing educational and work experiences for a period of not less than three (3) years from the time of application. The applicant must also have satisfactorily completed requirements for the baccalaureate degree from a regionally-accredited institution, and must also score a minimum of 70 out of 110 possible points according to the following formula (NOTE: Scoring the minimum required DOES NOT GUARANTEE acceptance to the MHA program, only CONSIDERATION for admission):

1. Cumulative undergraduate GPA multiplied times 10 (max 40 points) and
2. Verbal + Quantitative GRE scores divided by 25 (max 50 points) (See note under Admissions Examinations about using revised GRE scores after August 1, 2011) or
   Verbal + Quantitative GMAT scores divided by 12.5 (max 50 points) and
3. Number of years of related management/administrative/clinical experience multiplied times 5 (max 20 points)

Add 1-3 together to get formula score

Total possible score = 110

Minimum score for admission consideration = 70

Note: In lieu of the above GRE/GMAT requirements, and earned doctorate or masters from a regionally-accredited institution may qualify the student for regular admission.

At the discretion of the MHA program coordinator, the MHA program reserves the right to waive the GRE/GMAT requirements if EITHER of the following criteria are met by a prospective applicant:

Minimum undergraduate GPA: 3.2 AND minimum years of relevant experience: 3 or more (preference for health-related experience) OR
Minimum undergraduate GPA: 3.5 AND minimum years of relevant experience: 2 or more (preference for health-related experience).

Standards of Progression and Graduation

A. All degree requirements must be completed within seven years.
B. Students are encouraged to apply for graduation two semesters before the anticipated date of graduation. Note: A copy of the official program of study must accompany the candidate’s application.

Sport Management M.S. (Online)

Degree Requirements: 36 Credit Hours

Program Description
The Sport Management Program at Georgia Southern University is an intensive two year, six semester course of study that prepares students to hold a wide range of careers in the sport industry. The general focus of the program is the management of sport events, ranging from professional sport to youth sport. Entry level jobs in the industry include: game day operations, ticket sales, event management, facility staff, youth sports administration, marketing and promotions assistant, and a host of other options. Graduates of the Georgia Southern Sport Management program can be found working for professional sport teams, college athletic departments, regional and national sport commissions, leagues and associations and many other sport based organizations.

Admission Procedures
The Faculty of Sport Management will evaluate applicants on each of the following:

1. A personal statement of purpose that includes a description of career goals over the next 5 years, reasons for interest in Graduate Program at Georgia Southern University, and relevant experiences and achievements.
2. The applicant's previous exposure to coursework that relates to the curriculum in the Master's in Sport Management program. Transcripts showing a Bachelor's degree completed in a college or university accredited by the proper regional accrediting association are required. If applicant holds additional degrees from accredited institutions, those transcripts should be submitted as well.
3. The applicant's overall academic performance.
4. The quality and length of related professional experiences. Applicants should submit a current resume. Sport industry experience and/or volunteer experience in the sport industry is preferred, but not required.
5. Official GRE or GMAT scores less than 5 years old.

The Graduate Admissions Person or Committee will judge the merit of each item and make a recommendation based on the sum total of the application.

Priority Application Deadline: Students interested in Teaching or Research Assistantships must apply by March 1 to receive considerations for open positions.

Application Deadline: All application materials must be received by July 1 to be considered for admission into the fall cohort.

Admission Cycle: The program follows a cohort model. Students accepted into the program will be admitted during the fall semester.

For additional information regarding admission to the program, including average GPA and test score information, please visit our website: http://chhs.georgiasouthern.edu/hk/graduate/sport-management/.

Program of Study
The Georgia Southern Sport Management program requires 36 credits for completion. Students are expected to enroll in six consecutive semesters to complete the program in two years. To earn their degree, students must complete 24 core credits and 12 credits from guided electives, nine (9) of which must be from the Sport Management program.

Sports Medicine M.S.S.M. (Emphasis in Human Movement Science)

Degree Requirements: 36 Credit Hours

The Master of Science in Sports Medicine (MSSM) degree at Georgia Southern University prepares leaders for the general field of sports medicine with advanced education in either Strength & Conditioning or Advanced Athletic Training.

The MSSM provides an interdisciplinary scientific background in sport and physical activity with a significant emphasis on work-related concepts and experiences. The educational experiences are designed utilizing evidence-based research to develop leaders in the scientific and clinical aspects of Sports Medicine.

Criminal Background Checks

Clinical agencies utilized by the Department of Health Sciences and Kinesiology and the Sports Medicine program may require criminal background checks and/or drug testing prior to acceptance of the student into clinical facilities. Students who do not pass the criminal background check and/or drug test may be unable to attend clinical courses and therefore may be unable to complete their Program of Study. Any fees or costs associated with background checks and/or drug testing is the responsibility of the student.

Admission Standards

For consideration of admission to the MSSM program, the applicant must have completed an application for admission to the College of Graduate Studies at Georgia Southern University, submitted official copies of all academic transcripts related to undergraduate and graduate coursework at the time of program application, submitted official GRE scores, and prepared a formal Statement of Graduate Education Goals. Courses in statistics, research methods, anatomy and physiology are recommended. The applicant must also have:

1. Completed requirements for a baccalaureate degree from a regionally-accredited institution; AND

2. A minimum 2.80 cumulative undergraduate GPA; AND

3. GRE: No less than 146 Verbal AND 141 Quantitative. See note under Admissions Examinations on page 9 about using revised GRE scores after August 1, 2011.

Note: In lieu of the above requirements, an earned doctorate or masters from a regionally-accredited institution may qualify the student for regular admission.

Standards of Progression and Graduation

A. All degree requirements must be completed within seven years.

B. Students must satisfactorily complete a thesis or research project.

C. Students must satisfactorily complete a comprehensive assessment.

D. Students are encouraged to apply for graduation two semesters before the anticipated date of graduation. Note: A copy of the official program of study must accompany the candidate’s application.

Strength and Conditioning Graduate Certificate

Certificate Requirements: 12 Credit Hours

Admission Standards

For admission to the Strength and Conditioning certificate program, the applicant must:

A. Have completed requirements for a baccalaureate degree from a regionally-accredited institution;
B. A minimum 2.5 cumulative undergraduate GPA; AND
C. Be admitted to Graduate Studies.

Standards of Progression and Graduation

A. Each student will file a program of study with College of Graduate Studies after a review with his/her advisor.
B. A minimum overall grade point average of B or better must be earned for the certificate to be awarded on the graduate level.
C. Each student will successfully complete a comprehensive assessment administered during the student’s last semester of completion.

Post-Certification Admission to MSSN

Students who successfully complete the Program of Study for the graduate certificate in strength and conditioning may be considered for admission into the MSSM program. Students who wish to be considered...
for admission into the MSSM program upon successful completion of the graduate strength and conditioning certificate must formally apply to the MSSM Program and meet all MSSM admission requirements.

Only 6 credit hours earned during completion of the strength and conditioning certificate may be applied to completion of the MSSM.

**Department of Rehabilitation Services**

Welcome to the Department of Rehabilitation Sciences located on Georgia Southern University Armstrong Campus in Savannah.

The department offers undergraduate and accredited graduate programs in rehabilitation sciences and communication sciences and a doctoral degree in physical therapy.

Our facilities include the RiteCare Center for Communication Disorders, located in the Armstrong Center on the Armstrong Campus, and the 3200-square-foot, state-of-the-art Biodynamics and Human Performance Center operated in collaboration with the Department of Health Sciences and Kinesiology. The Biodynamics and Human Performance Center comprises three specialized laboratories: the Biomechanics Laboratory, the Muscle Performance Laboratory and the Exercise Physiology Laboratory. Other facilities include an anatomy lab, a pulmonary function lab and a clinical athletic training facility. We have also recently acquired an Anatomage Medical Table, a state-of-the-art anatomy visualization system.

**Communication Sciences and Disorders Certificate**

**Certificate Requirements: 24 Credit Hours**

**Policies, Requirements and Standards**

The post-baccalaureate program is designed for individuals who have earned a Bachelor's degree in disciplines other than Communication Sciences and Disorders and now wish to complete the prerequisite courses (i.e., "leveling courses") that are often required for admission into a graduate program in either audiology or speech-language pathology.

The certificate is available to students who hold a baccalaureate degree from an accredited institution and have earned a cumulative GPA of 3.0. Baccalaureate degree must be completed within 5 years of application. Interested students should submit an application to the program. Course rotation begins each fall.

Students completing the certificate in Communication Sciences and Disorders are required to obtain twenty-five clinical observation hours verified with a signature by a certified audiologist or speech-language pathologist as required by the American Speech-Language-Hearing Association. Students are also required to obtain 10 hours of volunteer activities that are unpaid and serve the University or the Community for the certificate to be awarded.

While completion of the Post-baccalaureate program does not guarantee admission into the Communication Sciences and Disorders Graduate Program at Georgia Southern University, it does qualify students to submit an application for admission into the graduate program at Georgia Southern University and for many other graduate programs in the United States.

For more information about the certificate or for a career in Communication Sciences and Disorders, please contact the program.

**Communication Sciences and Disorders M.S.**

**Degree Requirements: 57 Credit Hours**

**Policies Requirements and Standards**

Consistent with the mission of the university and the goals of the College of Health Professions, the Communication Sciences and Disorders
Program incorporates a teaching-centered, student-focused philosophy that promotes collaboration and evidence based education in a context that acknowledges cultural and linguistic diversity.

The Master of Science Program in Communication Sciences and Disorders is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA).

Address: Accreditation Unit, American Speech-Language-Hearing Association, 2200 Research Blvd, #310, Rockville, MD 20850; telephone, 301-296-5700, accreditation@asha.org.

Graduates of this program will:

1. Demonstrate the knowledge and principles necessary for prevention, evaluation, and treatment of communication impairments across the lifespan
2. Analyze factors important to diagnosis and treatment plan development
3. Document and effectively communicate their findings to the clients, their families and other professionals
4. Meet legal and professional standards of competence and ethics
5. Employ active learning methods that encourage self-reliance and promote continuous professional development
6. Integrate theoretical knowledge and therapeutic competencies through group discussions, laboratories, and clinical practice
7. Demonstrate the highest qualities of character and ethical behavior as well as the knowledge, skills, and disposition that support scholarship, professionalism, technology, and diversity
8. Demonstrate clinical skill in supervised practicum settings and document the minimum of 400 clinical clock hours with a variety of populations as described by the American Speech-Language-Hearing Association (ASHA) for the Certificate of Clinical Competency

Criminal Background Checks

Clinical agencies utilized by the Program in Communication Sciences & Disorders as well as the campus-based university clinic requires criminal background checks and/or drug testing prior to acceptance of the student into clinical facilities.

Admission Standards

1. Immunizations and physical exams as required of all Armstrong State University students.

2. Applicants must complete the requirements for a baccalaureate degree in speech-language pathology from a regionally accredited institution or complete the requirements for a baccalaureate degree in a field other than communication sciences and disorders plus appropriate prerequisite coursework in the field of speech-language pathology/communication sciences and disorders in order to apply.

3. A cumulative grade point average of at least 3.0.

4. Admission requires a score of no less than 145 on the Verbal Reasoning section (or the equivalent score of 380) and 141 on the Quantitative Reasoning section (or the equivalent score of 430) of the Graduate Record Exam (GRE). Retired GRE scores may only be submitted if taken in the last 5 years otherwise the new GRE scores must be submitted.

1. For students whose second language is English, a score of 550 paper-based score or 6.5 or better on the International English Language Testing System (IELTS) may be substituted for the verbal GRE score.

5. Documentation of the following after admission and prior to enrollment:
   1. Completion of 25 clinical observation hours as mandated by the American Speech-Language-Hearing Association
   2. Proof of professional liability insurance
   3. Health insurance
   4. Background check and drug screen
   5. First aid/CPR certification by the American Red Cross or the American Heart Association;
   6. negative TB PPD skin test
   7. Flu shot
   8. Final transcript(s) documenting all required coursework

6. The following documents are required for admission to the Master of Science program in communication sciences and disorders and should be submitted via the Communication Sciences and Disorders Centralized Application System (CSDCAS).

   1. Official college transcripts requested using the CSDCAS transcript request form.
   2. Official GRE scores (Within 5 years of the application due date).

   1. Students are encouraged to send GRE scores to CSDCAS after they have created a CSDCAS application account. Students should also use the Armstrong State University CSDCAS Code 7712.

3. Three (3) Completed CSDCAS Reference Forms

   1. At least two of the three forms should be completed by professors with knowledge of the applicant's academic performance and professionalism. Professors in communication sciences and disorders are preferred.
   2. No more than one of the three forms should be completed by a professional reference such as an employer

4. Personal Statement submitted via CSCCAS (Vital information from resume's should be included in the Letter of Intent; however, resumes should not be submitted)

5. Essential Skills Statement: The Essential Skills document includes essential functions you will be expected to perform during your educational program as a student and professional career. Persons interested in applying for admission to the Communication Sciences and Disorders program should review this document in its entirety (cover sheet, Appendix A, and Appendix B) to develop a better understanding of the cognitive skills, physical abilities, and behavioral characteristics necessary to successfully complete the program and work as a speech-language pathologist. A cover sheet with acknowledgment, signature, and date MUST be obtained and submitted as part of the admissions packet via CSDCAS.

6. Video Recording: In lieu of onsite interviews, the CSDS program requires all applicants to submit a video recording as part of the admissions process. Information regarding requirements for the video can be found in the Questions section of CSDCAS.

7. Additional Requirements: The Graduate program in Communication Sciences and Disorders is accredited by the Council of Academic
Accreditation (CAC). Pre-requisite courses that provide a foundational understanding of speech, language, hearing, and swallowing, as well as (basic) courses in natural sciences, physical sciences, social sciences, and math must be completed to meet accreditation standards. We require all courses be completed or in process of completion when applying to the program. These include:

1. Biological Science (Science of living things-Biology, Human Anatomy, etc)
2. Physical Science (Science of non-living things-Physics, Chemistry, etc)
3. Social Science (Psychology, Sociology, Anthropology, etc)
4. Statistics

8. Meeting the minimum criteria for application for graduate school does not guarantee admission to the Communication Sciences and Disorders program. It should be noted that the pool of applicants for the Communication Sciences and Disorders program includes many highly qualified applicants, and the number of available positions is limited. Therefore, admission to the Communication Sciences and Disorders program is highly competitive.

Admission Process

1. The graduate admissions process for the masters of science degree in Communication Sciences and Disorders is managed by the Communication Sciences and Disorders Centralized Application System (CSDCAS). Applications may be obtained and submitted via CSDCAS.
2. The Georgia Southern graduate application will NOT be accepted. Only materials submitted via CSDCAS will be reviewed.
3. Deadline: the CSDCAS application and all support materials should be submitted by January 15th of each year via CSDCAS.
4. Applications and support materials are reviewed, and a limited number of applicants are accepted into the program.
5. Students selected for admission must formally accept the position and submit a non-refundable deposit. Students who matriculate in the CSD Program at Armstrong will have their deposits refunded.

Standards of Progression and Graduation Requirements

1. Students must maintain a B average or better on all coursework taken as a graduate student. If the student's average falls below 3.0, the student will have one probationary semester to earn the required B average or better. The student must be registered for all of the required courses in the program of study during the probationary semester. If the average is not raised to a B or better in that term, or the student earns a C or below on more than 3 hours, the student will be dismissed from the program. Students who are dismissed due to unsatisfactory performance cannot reapply to the program.

A student, who earns a D, F or WF in an academic course or a grade of C, D, F or WF in clinical practicum but has not met the criteria for dismissal, must demonstrate mastery of the failed content before the program is completed and the degree is granted. The student may be required to retake the failed course or retake specific course content via independent study or special topics classes.

2. Students must adhere to the American Speech-Language and Hearing Association Code of Ethics and guide for professional practices and the state of Georgia’s rules and regulations governing the practice of speech-language pathology. The program provides copies of, and instruction in, all of these policies. Students who violate these rules and regulations will be dismissed from the program and are ineligible for readmission.

3. Graduate coursework and clinical practicum are completed simultaneously over five consecutive semesters, which includes summer. Students are admitted as full-time. If the student is not enrolled for two consecutive semesters, that student must reapply for admission.

4. Students must complete the program within seven years.

5. Students who do not complete the program in seven years must reapply for admission. Those students must begin to meet the program requirements in effect at the time of readmission. For clarification, refer to Readmission Procedures C.1-3.

6. Students must annually present evidence of professional liability insurance, health/medical insurance, Negative TB PPD skin test, and first aid/CPR certification. In addition, students may need to provide evidence of preventative inoculations depending on extern placements.

Graduation Requirements

1. Students are encouraged to apply for graduation two semesters before the anticipated date of graduation. Note: A copy of the official program of study must accompany the candidate's application. Students must take the Praxis II examination in speech-language pathology and present a passing score of 162 or higher to the program by March 15th if graduating in May, June 15th if graduating in August or October 15th if graduating in December. The program will accept scores for the Praxis only on examinations taken AFTER October 31st of the student's SECOND year of graduate study.

2. Students who do not earn a Praxis score of 162 must take a comprehensive assessment developed by the program and earn a score of eighty percent or higher.

3. Students must maintain a B average or better in the program.

4. Students must accumulate a minimum of 400 client contact hours as described by the department and set forth by the American Speech-Language and Hearing Association.

5. Demonstrate acquisition of knowledge and skills needed for a graduate student in speech-language pathology.

Readmission Procedures

1. The student must complete the readmission application and go through the readmission process by submitting the current graduate application for Georgia Southern University and the Communication Sciences and Disorders major.

2. The student will be required to meet admission requirements in effect at the time of application for readmission.

3. The student's admission will be based upon space available in the class into which the former student is seeking admission and recommendation of the department faculty.

4. The student who has been dismissed for inability to meet minimum grade requirements or ethics violations is NOT eligible for readmission.

Program of Study

</tr>
</tbody>
</table>
Specifically, the Doctor of Physical Therapy program will:

1. Provide program graduates with the scientific knowledge and principles which practitioners need to examine, diagnose, develop prognoses, treat, document, measure outcomes, and instruct persons of all ages with movement disorders.
2. Equip program graduates with diagnostic abilities to critically analyze a large number of factors, determine the most important of those factors, and develop a treatment plan based on that analysis.
3. Supply graduates with the documentation and communication skills to effectively communicate their findings to the clients, the clients' families, other healthcare providers, and the agencies that reimburse the clients and/or the physical therapists for the physical therapy service.
4. Furnish graduates with the skills to provide care in a compassionate, competent, legal, and ethical manner.
5. Equip graduates with the skills to develop programs for the prevention of injuries and disabilities.
6. Provide students with clinically case-centered courses with the emphasis on problem identification and problem solving. This allows students to integrate pathophysiology, evaluation methods, treatment approaches, and psychosocial principles into each case. Students are encouraged to seek new solutions to the clinical problems and propose new treatment approaches.
7. Maintain an active learning environment that promotes independent thinking. Students learn to seek and confirm answers on their own rather than relying on faculty to provide answers. Active learning methods develop student self-reliance, an increase in self-assessment skills, and a pattern of independent learning which promotes lifelong learning and further professional development.
8. Support a curriculum where students work with each other in small groups. Small group activities:
   a. Develop among the students a respect and understanding for the problem solving skills and clinical solutions developed by their classmates.
   b. Promote the development of teamwork and leadership skills.
9. Provide group discussions, laboratories, and clinical practice experiences designed to foster the development of intellectual and physical competencies and strong professional values.
10. Promote, as the central axiom in the department's educational philosophy that the primary role of the instructor is as a facilitator of learning, not as the sole source of knowledge. The department will provide a supportive environment in which students take responsibility for their own learning. The department fosters mutual respect between faculty and students, between students and their classmates, and between students and other health care professionals. The department promotes a respect and understanding for all individuals regardless of their cultural background.

### Physical Therapy D.P.T.

**Degree Requirements: 134 Credit Hours**

#### Policies Requirements and Standards

The Physical Therapy Program at Georgia Southern University offers the Doctor of Physical Therapy (DPT) degree.

The DPT Program includes nine semesters of academic course work with three full-time clinical affiliations (totaling at least thirty weeks of full-time clinical practice), and numerous additional clinical experiences. Upon completion of the program, students are awarded the Doctor of Physical Therapy (DPT) degree.

The bachelor’s degree is required for admission to the physical therapy program. Contact the Department of Rehabilitation Sciences, Physical Therapy Program, for further information concerning eligibility.

Consistent with the mission of the university and the goals of the College of Health Professions, the mission of the Doctor of Physical Therapy program is to educate individuals whose physical therapy skills and knowledge meet the challenges of the rapidly changing healthcare system and the expanding need for physical therapy services. The program will work collaboratively with the physical therapy community to improve the quality of physical therapy care and enhance the scientific basis of professional practice.

Specifically, the Doctor of Physical Therapy program will:

1. Provide program graduates with the scientific knowledge and principles which practitioners need to examine, diagnose, develop prognoses, treat, document, measure outcomes, and instruct persons of all ages with movement disorders.
2. Equip program graduates with diagnostic abilities to critically analyze a large number of factors, determine the most important of those factors, and develop a treatment plan based on that analysis.
3. Supply graduates with the documentation and communication skills to effectively communicate their findings to the clients, the clients’ families, other healthcare providers, and the agencies that reimburse the clients and/or the physical therapists for the physical therapy service.
4. Furnish graduates with the skills to provide care in a compassionate, competent, legal, and ethical manner.
5. Equip graduates with the skills to develop programs for the prevention of injuries and disabilities.
6. Provide students with clinically case-centered courses with the emphasis on problem identification and problem solving. This allows students to integrate pathophysiology, evaluation methods, treatment approaches, and psychosocial principles into each case. Students are encouraged to seek new solutions to the clinical problems and propose new treatment approaches.
7. Maintain an active learning environment that promotes independent thinking. Students learn to seek and confirm answers on their own rather than relying on faculty to provide answers. Active learning methods develop student self-reliance, an increase in self-assessment skills, and a pattern of independent learning which promotes lifelong learning and further professional development.
8. Support a curriculum where students work with each other in small groups. Small group activities:
   a. Develop among the students a respect and understanding for the problem solving skills and clinical solutions developed by their classmates.
   b. Promote the development of teamwork and leadership skills.
9. Provide group discussions, laboratories, and clinical practice experiences designed to foster the development of intellectual and physical competencies and strong professional values.
10. Promote, as the central axiom in the department's educational philosophy that the primary role of the instructor is as a facilitator of learning, not as the sole source of knowledge. The department will provide a supportive environment in which students take responsibility for their own learning. The department fosters mutual respect between faculty and students, between students and their classmates, and between students and other health care professionals. The department promotes a respect and understanding for all individuals regardless of their cultural background.

### Admission Standards

#### Prerequisites

1. Applicants must complete the requirements for a baccalaureate degree from a regionally accredited institution. While any major field of study is acceptable, the degree and all prerequisite courses must be completed prior to matriculation. At least 5 of the 8 prerequisite science courses must be completed at the time of application.
2. Applicants need to demonstrate effective oral and written communication skills.
3. Applicants must demonstrate an understanding of the social, biological and physical sciences and mathematics so that they can comprehend and integrate physiological, pharmacological, behavioral and biomechanical principles into physical therapy practice. Minimal satisfaction of this criterion will include completion of:
   a. A one-year sequence of basic (general, inorganic) chemistry with laboratories that is designed for science or health professions majors;
   b. A one-year sequence of general physics with laboratories (both calculus or non-calculus physics are acceptable) that is for science or health professions majors and which include mechanics, electricity, magnetism and light;
   c. A one-year sequence of anatomy and physiology with laboratories (either as two combined anatomy and physiology courses or with one course in physiology and one course in anatomy) which may be lower division human anatomy and physiology courses for health professions majors or upper division vertebrate or human physiology and comparative or developmental anatomy.
Applicants are also encouraged to take advanced human physiology and anatomy courses such as exercise physiology, neurophysiology, advanced human physiology, kinesiology and/or biomechanics:

d. One general biology course with laboratory (botany, ecology, and environmental science are not acceptable substitutes).

e. One course in statistics (at a minimum, covering measures of central tendency, probability distributions, and linear regression).

f. Two courses in the social sciences are also required. Abnormal psychology and human development are recommended.

4. Applicants should have an understanding of the scope of physical therapy practice. This understanding is best developed through observation of physical therapists in multiple types of clinical practice. It is strongly recommended that the applicant demonstrate a total of 75-100 hours of observation, in as many as 3 different types of settings. Setting types include but are not limited to: acute care, fitness/wellness, general adult outpatient, inpatient rehabilitation, outpatient adult orthopedic/sports, pediatric inpatient, pediatric outpatient, school systems, skilled nursing facilities, and wound care. Receiving physical therapy treatment or being a caregiver for someone with a physical disability can count toward one setting for purposes of this requirement.

5. Applicants must have no less than a 3.0 in the PTCAS science grade point average (GPA) and an overall grade point average of 3.0. No grade of D or F will be acceptable for satisfaction of the prerequisite courses. If a grade of D or F is earned in a prerequisite course, that course cannot be repeated more than one time. Only two prerequisite courses may be repeated. Applicants may repeat courses with grades of C or higher to improve their prerequisite course GPA, but repeated courses will be averaged in the calculation of the prerequisite GPA.

6. Applicants must achieve a score on the Graduate Record Exam (GRE) of no less than 146 on the verbal section and 144 on the quantitative section. For students whose second language is English, a TOEFL score of at least 600 paper-based, 250 computer-based or 80 internet-web-based may be substituted for the minimal verbal GRE score. The TOEFL score is not used in calculating a final application score during review of the applications, as there is no mechanism for converting a TOEFL score into a GRE score. As a result, the applicant's application score may be lower than those of applicants who took the entire GRE. (Note that when requesting to have GRE scores sent to Georgia Southern University, the appropriate codes to be used are: school code 7813, department code 5199.)

7. The following documents are required for admission to the Doctor of Physical Therapy (DPT) program: Physical Therapist Centralized Application Service (PTCAS) application, college transcripts, GRE scores and three recommendation forms. One of the recommendations must be written by a physical therapist who has observed and supervised the applicant in a clinical setting. ALL application documents will be collected by PTCAS.

8. In addition to the PTCAS fees, a supplemental application fee of $25 for Georgia residents, or $50 for out-of-state applicants, is required.

9. All students are required to submit evidence of health insurance prior to participation in clinical experiences.

10. Meeting the minimum criteria for application does not guarantee admission to the physical therapy program. It should be noted that the pool of applicants for the program includes many highly qualified persons, and the number of available positions is limited.

**Admission Process**

1. Program applications are available through the Physical Therapist Centralized Application Service website (www.ptcas.org). The Graduate Studies application for Armstrong is not used.

2. Specific application deadlines are set annually and are posted at the PTCAS (www.ptcas.org) and program (www.pt.armstrong.edu) websites.

3. Students selected for admission must formally accept the position and submit a non-refundable deposit. Students who matriculate in the DPT Program at Armstrong will have their deposits refunded during the first week of classes.

**Accreditation Status and Degrees Offered**

1. The Doctor of Physical Therapy Program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, Virginia 22314; telephone: 703-706-3245; email: accreditation@apta.org; website: www.capteonline.org. The program received initial accreditation in May 1997. Present accreditation continues through December 31, 2022.

**The Georgia Board of Physical Therapy Legal Requirements**

1. Graduation from an accredited professional physical therapy education program allows students to take the National Physical Therapy Examination (NPTE). Passing this exam is required for licensure in any jurisdiction within the United States and its territories. In addition, the graduate must pass the Georgia state Jurisprudence exam to obtain licensure in Georgia.

2. The Georgia Board of Physical Therapy has the authority to refuse or revoke licensure to an applicant upon a finding by the board that the applicant has been convicted of any felony, crime involving moral turpitude, or crime violating any federal or state law relating to controlled substances or dangerous drugs in the courts of this state, any other state, territory, or country or in the federal courts of the United States including but not limited to a plea of nolo contendere entered to the charge.

**Standards of Progression and Graduation Program Progression Requirements**

1. Students must pass all courses with a B (Clinical Practicum 3 and Supervised Clinical Education 1, 2, and 3 must be passed with a satisfactory grade). If less than the required grade is earned in a PT course, that course must be repeated. Only one course can be repeated and that course can be repeated only once. A course can be repeated only when it is normally offered again in the curricular sequence. No additional courses can be taken in the physical therapy curriculum until the course deficiency is satisfied. Thus, failure to pass a course will require the student to “drop back” to the next graduating class.

2. All graded activities within courses must be passed at the 80% level or remediated, as directed by the course instructor. A TOTAL of 4 remedial activities will be allowed in each semester in ALL COURSES combined. A student that fails more than 4 examinations in one semester will not progress through the curriculum.

3. Failure to pass more than one course or failure to pass any course more than once will result in dismissal from the program.

4. Students will be dismissed from the program if they violate the professional standards of physical therapy established by the Code of Ethics and Guide for Professional Conduct of the American Physical Therapy Association, or violate the rules and regulations governing the practice of physical therapy within the state of Georgia or any other jurisdiction in which the student is working.

5. Students must be continuously enrolled in the program through the entire nine-semester sequence of courses. Medical or personal leave may be granted but will also require the student to “drop back” to the next graduating class.

6. Students must obtain faculty permission to “drop back” for academic, medical, or personal reasons. A student may re-enroll in PT courses
only if the faculty has determined that space is available for that student.
7. Students must complete all courses in the physical therapy curriculum within five consecutive years from the date of their initial admission to the physical therapy major.
8. Students who do not complete the program in the required period of time may apply for readmission
9. Students must maintain malpractice/liability and health/medical insurance; up-to-date immunizations; medical tests and physical exams required by the program; and CPR/first aid certification.

**Graduation Requirements**

1. Students must successfully complete all courses in the curriculum (earning a B or better in all courses; Clinical Practicum 2 and 3 and Supervised Clinical Education 1, 2, and 3 must be passed with a satisfactory grade).
2. Students must satisfactorily complete a research project.
3. Students must follow graduation procedures for Georgia Southern University.
4. The Doctor of Physical Therapy program of study requires a total of 134 semester hours.

**Readmission Procedures**

1. The student must complete the readmission application for the physical therapy major.
2. The student will be required to meet admission and curriculum requirements in effect at the time of application for readmission.
3. The student's admission will be based upon space available in the class into which the former student is seeking admission and recommendation of the department faculty.
4. The former student, who has failed out of the program because of an inability to meet the grade requirements or has been dismissed from the physical therapy program for any reason, is not eligible to apply for readmission.

**Total Credit Hours**: 134

**School of Nursing**

Nationally recognized as a top 100 nursing program, The School of Nursing offers the following baccalaureate, master’s and doctoral programs and degrees:

- Bachelor of Science in Nursing
- Accelerated Bachelor of Science in Nursing (ABSN)
- LPN/LVN-BSN Advanced Placement Track
- Registered Nurse to BSN
- Post-BSN-DNP with MSN opt out
- Post-MSN Certificate
- MSN
- Doctor of Nursing Practice (DNP)

The School of Nursing represents a strong and extraordinary community of excellent students, well-prepared faculty, dedicated staff, and supportive alumni and friends who promote and advance the quality, accessibility, and availability of nursing care for the people of southeast Georgia and beyond. The (baccalaureate degree in nursing/master’s degree in nursing/Doctor of Nursing Practice and/or post-graduate APRN certificate) at Georgia Southern University is accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation). All prelicensure programs are fully approved by the Georgia Board of Nursing. Georgia Southern University is accredited with the Southern Association of Colleges and Schools.

**Mission & Vision**

**School of Nursing Mission Statement**

The Mission of the Georgia Southern School of Nursing is to prepare a diverse student population to become professional nurses through academic excellence to promote health and enhance the quality of life for citizens in the rural and urban communities they serve.

**School of Nursing Vision Statement**

The School of Nursing aspires to be the premier center for academic excellence in professional nursing education for the Southeastern United States through transformative learning opportunities that promote a culture of caring and a legacy of lifelong scholarship, leadership and responsible community service and stewardship.
Accreditation

The Georgia Southern University School of Nursing is fully accredited by all appropriate national, state, and specialized/professional nursing accrediting agencies. Accrediting agencies assure that programs in nursing education engage in effective educational practices in the preparation of nurses. A determination of accreditation by an accrediting agency is an indication of confidence in the educational institution to offer a program of quality, deserving of public approbation. (NOTE: Universities and colleges in the United States must hold appropriate regional accreditation in order to be recognized to award higher education degrees. All nursing programs must hold approval from their State Board of Nursing. The Georgia Southern University holds the following accreditation and approvals:

1. Commission on Colleges of the Southern Association of Colleges and Schools (SACSCOC). This regional accreditation grants Georgia Southern University the right to award Associate, Bachelor, Master, Specialist, and Doctorate degrees. Current Accreditation Period: 2020 for BSN, RN-BSN, and MSN; Renewal for Post-Master's DNP and Post-MSN certificate: Fall 2025. The Georgia Southern University holds the following state and specialized/professional nursing accreditations:

2. Georgia Board of Nursing. (Required Approval). The Georgia Board of Nursing grants Full Approval to nursing programs who maintain compliance with the Georgia Board of Nursing Rules and Regulations as evidenced by: annual reports submitted by the program, site visit reports, and appropriate passing percentages of first-time writers on the NCLEX-RN examination. Inquiries regarding the accreditation status of the program can be directed to: Georgia Board of Nursing, 237 Coliseum Drive, Macon, GA 31217-3858. Phone: 912-207-1640. Active Current Approval Period.

3. Commission on Collegiate Nursing Education (CCNE). (Voluntary Specialized/ Professional Accreditation). Formed in 1998, the Commission on Collegiate Nursing Education is the premier accrediting agency recognizing professional baccalaureate and graduate programs in nursing in the United States. Georgia Southern University School of Nursing is approved for its baccalaureate and graduate programs by the Commission on Collegiate Nursing Education. To be accredited, the following are required:
   a. The nursing program is viable and appears, based upon the review of submitted materials, to be conducted in a manner that will enable compliance with CCNE accreditation standards.
   b. The institution has a history of seeking and ensuring continuing accreditation and program recognition by appropriate accrediting and regulatory agencies.
   c. The institution has ensured the continuing viability of the nursing education program by being responsive to the concerns of accrediting and regulatory agencies.

For further information about the status of the program, please contact the Commission on Collegiate Nursing Education at the following address:
Commission on Collegiate Nursing Education,
One Dupont Circle, NW, Suite 530
Washington, DC 20036-1120
Phone: (202) 887-6791

Current Accreditation Period: 2020 for BSN, RN-BSN, and MSN; 2025 for the DNP and Post-MSN certificate.

Adult/Gerontology Acute Care Nurse Practitioner Post-MSN Certificate

Certificate Requirements: 19 Credit Hours

Student Outcomes

Student outcomes are consistent with the BSN to DNP program outcomes.
Admission Cycle

The admission application materials for the College of Graduate Studies (COGS) for NP certificate programs must be received by March 1st for admission consideration into the fall semester cohort. Phone interviews with individuals under consideration may be conducted prior to admission.

Admission Criteria

1. Master's degree in Nursing (APRN Program which includes Clinical Nurse Specialist, CRNA, Nurse Midwife, Nurse Practitioner) from a college accredited by the appropriate accrediting association.
2. Minimum graduate GPA of 3.0 (on 4.0 scale)
3. Pharmacology Course cannot be older than 5 years.
4. Current unrestricted RN license in state of residence and eligibility for a Georgia RN license
5. Certification as a Clinical Nurse Specialist, CRNA, Nurse Midwife, Nurse Practitioner
6. Submission/completion of the College of Graduate Studies application (on-line)
7. Proof of current malpractice liability insurance as a RN and NP student
8. Must have the capability to fully utilize and interact within the on-line course delivery format of the institution.

Specific Admission Policy

The Nurse Practitioner certificate student will be admitted in Non-degree status and ineligible to enroll in other graduate courses unless admitted to that program. Only grades of "B" or better earned in the certificate are eligible for application to the nursing doctorate if the individual is later admitted to the Post MSN DNP degree program.

Progression Policy

A student admitted Non-Degree to the Post-MSN Nurse Practitioner Certificate option must have an overall 3.0 GPA, with the minimum of a "B" letter grade in each course in order to earn the certificate. Students will become academically ineligible to continue course work if a grade of "C", "D", "F", or "WF" is earned in any of the nurse practitioner courses. Students must also meet any applicable College of Graduate Studies progression policies.

Nurse Practitioner Certificate Programs

An individualized Program of Study is developed by the Graduate Program Director of the School of Nursing after a Gap Analysis is performed. Students must submit their transcripts and their syllabi for each course to be considered as equal to the courses offered at Georgia Southern University for the completion of the certificate. To enroll in a Post MSN Certificate Program each applicant must show completion of the following courses in their MSN Program or must complete them prior to admission into the Certificate Program: Nursing Research, Advanced Health Assessment, Pathophysiology, and Pharmacology for Advanced Practice Nursing.

Adult/ Gerontology Acute Care Nurse Practitioner

8. Must have the capability to fully utilize and interact within the on-line course delivery format of the institution.

Specific Admission Policy

The Nurse Practitioner certificate student will be admitted in Non-degree status and ineligible to enroll in other graduate courses unless admitted to that program. Only grades of "B" or better earned in the certificate are eligible for application to the nursing doctorate if the individual is later admitted to the Post MSN DNP degree program.

Progression Policy

A student admitted Non-Degree to the Post-MSN Nurse Practitioner Certificate option must have an overall 3.0 GPA, with the minimum of a "B" letter grade in each course in order to earn the certificate. Students will become academically ineligible to continue course work if a grade of "C", "D", "F", or "WF" is earned in any of the nurse practitioner courses. Students must also meet any applicable College of Graduate Studies progression policies.

Nurse Practitioner Certificate Programs

An individualized Program of Study is developed by the Graduate Program Director of the School of Nursing after a Gap Analysis is performed. Students must submit their transcripts and their syllabi for each course to be considered as equal to the courses offered at Georgia Southern University for the completion of the certificate. To enroll in a Post MSN Certificate Program each applicant must show completion of the following courses in their MSN Program or must complete them prior to admission into the Certificate Program: Nursing Research, Advanced Health Assessment, Pathophysiology, and Pharmacology for Advanced Practice Nursing.
The Doctor of Nursing Practice (DNP) is a terminal degree committed to educating advanced practice nurses who possess the knowledge, skills and values necessary to contribute to and lead in the efforts to improve the health care delivery system of the nation. The DNP is a professional terminal degree with an applied nursing focus. Students are trained for advanced-science-based practice and practice-oriented research in private-and/or public sector careers to include clinical practice, health education, research application, leadership, and analysis of health care outcomes. The DNP is a versatile degree which prepares advanced practice nurses (nurse practitioners (NP), certified nurse midwives (CNM), certified registered nurse anesthetists (CRNA), and clinical nurse specialists (CNS) to provide leadership in public and private organizations; assess health care needs, develop and implement new health care practices, care and evaluate health care outcomes; recommend health care policy; and interact with other health care providers and agencies at diverse levels. The program serves both the full-time student preparing for an advanced career in advanced practice nursing, as well as currently employed nursing professionals seeking advanced education to augment their existing skills to assume leadership positions. The DNP program builds on a high quality nursing master’s curriculum.

Model

The Post-Masters DNP requires a minimum of 43 credit hours and is offered on a full-time basis over 3 years. Guided by the AACN Essentials for Doctoral Education for Advanced Nursing Practice, sequencing of courses allows the development of content expertise prior to the initiation of the clinical project and experience core. A capstone practicum allows for role immersion and competency integration.

Admission Requirements

The DNP is designed to build upon the foundation of the Advanced Practice Registered Nurse (APRN) role. The DNP program is directed toward advanced practice registered nurses and closely associated specialty areas (i.e. NP, CNS, CRNA, CNM preparation), and other specialty areas reviewed on an individualized basis. All applicants prior course work will be reviewed and individual DNP programs of study will be developed.

Admission Criteria

Regular Option

1. Education
   a. Post-MSN Master’s degree in the proposed field of study (MSN) or its equivalent from a college accredited by the appropriate accrediting association.

2. Minimum undergraduate or graduate GPA of 3.0 (on 4.0 scale)

3. International students:
   a. All international applicants, including resident and non-resident aliens, whose native language is not English and who do not have an undergraduate degree from a regionally accredited U.S. college or university, are required to submit official TOEFL scores taken within the year immediately preceding the requested semester of admission. A minimum total score of 83, and minimum scores of 20 for each of the skills evaluated by the TOEFL: Listening, Reading, Speaking, Writing. An original copy of the test score, sent by the testing agency to the Office of Graduate Admissions is required before any action is taken on an application. The copy of the score provided to the student and subsequently forwarded is not acceptable.

Accelerated Option

1. Post-MSN: Master’s degree in the proposed field of study (MSN) or its equivalent from a college accredited by the appropriate accrediting association.

2. Minimum undergraduate or graduate GPA of 3.3 (on 4.0 scale)

3. International students:
   a. All international applicants, including resident and non-resident aliens, whose native language is not English and who do not have an undergraduate degree from a regionally accredited U.S. college or university, are required to submit official TOEFL scores taken within the year immediately preceding the requested semester of admission. A minimum total score of 83, and minimum scores of 20 for each of the skills evaluated by the TOEFL: Listening, Reading, Speaking, Writing. An original copy of the test score, sent by the testing agency to the Office of Graduate Admissions is required before any action is taken on an application. The copy of the score provided to the student and subsequently forwarded is not acceptable.

4. DNP portfolio to include evidence of:
   a. Vitae to include
      • Personal rationale for seeking DNP
      • Future goals
      • Education
      • Research experience
      • Publications (identify refereed)
      • Professional presentations (identify refereed)
      • Community service projects
   b. Certification in a specialty area for all NPs. For all others, appropriate certification in specialty area, if available.
   c. A minimum of 500 documented academic clinical hours in MSN APN preparation. Evidence of post-graduation clinical experience in the advanced practice role unless continuing immediately into DNP course work as post-MSN DNP student.
   d. Current registered nursing (RN) licensure
      • For Post-MSN DNP, licensure in state of residence where clinical hours will be completed
   e. Current malpractice liability insurance
   f. American Heart Association Level C (2 person-BLS) CPR certification
   g. Three letters of recommendation from professional colleagues who can attest to academic and clinical acumen
5. Complete submission of documentation:
   a. College of Graduate Studies application and fee

### Grades

Students in DNP coursework must maintain a 3.0 average ("B" or better) in course work to proceed in the doctoral program and to be eligible to graduate. Grades in all courses applied toward the doctoral must be "B" or better. Students will become academically ineligible when any of the following occur in course work of an approved program of study:

1. A grade of "D", "F", or "WF" in any course;
2. A grade of "C" in any three courses; or
3. The minimum 3.0 average is not achieved within the minimum number of credit hours required for the degree.

### Progression

All students admitted to, enroll in, the DNP program are required to attend a MANDATORY on campus annual Intensive PRIOR to each fall cycle of course work. The dates of this Intensive are scheduled by the School of Nursing. Students assume responsibility for all scheduling and costs in order to attend this Intensive time period.

### Enrollment

The DNP requires a minimum of one academic year of continual enrollment.

### Foreign Language Requirement

There is no foreign language requirement.

### Transfer Credit

A maximum of 6 credits of doctoral level nursing credits and 9 credits of graduate level electives may be applied toward the DNP upon approval by the Graduate Nursing Program. Transfer credit must also satisfy the same requirements as course taught for doctoral education within the School of Nursing Graduate Program (e.g., minimum grade of "B"), be consistent with the student’s approved program of study, and have been received from a regionally accredited college or university. Thesis and dissertation credit cannot be transferred. The student must provide documentation in support of equivalency, such as a course syllabus, transcript, term paper, and/or instructor testimony. Equivalence is determined by the Faculty Advisor or Program Director. Credit reductions do not influence the residency or enrollment requirements or comprehensive examination procedures.

Students who complete Biomedical Ethics in Practice and Leadership (NURS 9126), Biometrics for Advanced Practice Nursing (NURS 9131), Clinical Scholarship I: Theory, Scientific Underpinnings, and Evidence Based Practice I (NURS 9137), Clinical Scholarship II: Theory, Scientific Underpinnings, and Evidence-Based Practice II (NURS 9138), and Advanced Nursing Practice and DNP Role Transition (NURS 9231) while in the BSN to DNP program who “Opt Out” and obtain their MSN degree from Georgia Southern University have four (4) years from the dates of their MSN final transcript to re-apply to the DNP program to obtain their doctoral degree without penalty. These five (5) courses would meet the requirements of the DNP program and would not need to be repeated. After successfully completing the additional five (5) semesters of course work, students would obtain the Doctor of Nursing Practice degree.

### Course Time Limits

All requirements for the DNP must be completed within seven academic years from the date of the first enrollment for study following admission to the doctoral coursework. For transfer students, the seven year time limit commences with the semester during which the credit being transferred was earned at another institution.

### Essentials Examination

The purpose of the Essentials Examination is to assess the student’s knowledge, integration and application of knowledge to problems of advanced nursing practice at the doctoral level of study.

The Essentials Examination can be taken at the completion of 20 credits but must be taken within one semester of completing all course work. The examination will be completed using Internet capability. The School of Nursing DNP Program Committee will determine the questions to comprise the examination. The reading committee members will hold Graduate Faculty status. The examination responses will be awarded a pass, a conditional pass, or a failure. With a pass of all examination components the student may be approved for graduation upon successful completion of all degree requirements.

A conditional pass on any component will require a repeat of that exam component in a format suggested by the DNP Program Committee. Failure of the Essentials Examination may result in additional coursework prior to a second examination. A second failure constitutes dismissal from the program and denial of continued course work to earn the DNP.

### Clinical Immersion Project

Doctoral students are required to complete a clinical project at an advanced level. A dissertation is not required. The clinical project may take diverse forms (e.g., identification of a health care problem, development of an intervention and analysis of outcomes; an investigation of a health issue with development of health policy strategies to address the health problem; or the development of a complex programmatic strategy within a health care system to address a significant issue). Upon completion of the clinical project the student must present the project to faculty and peers in an appropriate venue determined by the faculty. Submission of the project to a refereed professional organization for presentation or peer reviewed journal for publication is required. It is expected that a minimum of one peer reviewed presentation or peer reviewed publication will be achieved on DNP related content prior to completion of course work.

### DNP Capstone Practicum

This capstone clinical experience course provides an opportunity to integrate the role of the DNP in a comprehensive real-world context that includes utilization of leadership, consultation, advocacy, and collaboration competencies. Individual experiences will be developed under the guidance of a faculty advisor with completion of 180 hours in an approved setting. Students will be jointly supervised by a graduate faculty member and the clinical site preceptor.

### Faculty Advisor

Each student will be assigned a faculty advisor upon admission. The role of the faculty advisor is to mentor the student, provide advice and academic support as needed, monitor progress, and to be available for student assistance as appropriate. The faculty advisor will advise the student in regards to chosen electives and modifications to the program of study which must be approved by the Graduate Program Director in order to assure that desired course offerings are available in the sequence desired to assure timely completion of all course work. The faculty advisor may act as the chair or member of the Clinical Project or Essentials Examination committee.

### Accreditation

The School of Nursing Graduate Program is accredited by the Commission on Collegiate Nursing Education (CCNE). The current MSN
Program and the proposed DNP Program were developed in accordance with the AACN Essentials for both Graduate and DNP Education. The MSN meets the NONPF National Standards for NP Programs, the Consensus Model, and the DNP Program Standards for NP preparation.

Additional Program Requirements

Completion of a minimum of 500 applied hours required for post MSN-DNP Degree Completion.

Family Nurse Practitioner Post-MSN Certificate

Certificate Requirements: 19 Credit Hours

Student Outcomes

Student outcomes are consistent with the BSN to DNP program outcomes.

Admission Cycle

The admission application materials for the College of Graduate Studies (COGS) for NP certificate programs must be received by March 1st for admission consideration into the fall semester cohort. Students meeting all pre-requisites (pathophysiology, pharmacology, physical assessment) may be eligible for a January (spring semester) start date. Spring semester start must be approved by the Program Director. Phone interviews with individuals under consideration may be conducted prior to admission.

Admission Criteria

1. Master's degree in Nursing (APRN Program which includes Clinical Nurse Specialist, CRNA, Nurse Midwife, Nurse Practitioner) from a college accredited by the appropriate accrediting association.
2. Minimum graduate GPA of 3.0 (on 4.0 scale)
3. Pharmacology Course cannot be older than 5 years.
4. Current unrestricted RN license in state of residence and eligibility for a Georgia RN license
5. Certification as a Clinical Nurse Specialist, CRNA, Nurse Midwife, Nurse Practitioner
6. Submission/completion of the College of Graduate Studies application (on-line)
7. Proof of current malpractice liability insurance as a RN and NP student
8. Must have the capability to fully utilize and interact within the on-line course delivery format of the institution.

Specific Admission Policy

The Nurse Practitioner certificate student will be admitted in Non-degree status and ineligible to enroll in other graduate courses unless admitted to that program. Only grades of "B" or better earned in the certificate are eligible for application to the nursing doctorate if the individual is later admitted to the Post MSN DNP degree program.

Progression Policy

A student admitted Non-Degree to the Post-MSN Nurse Practitioner Certificate option must have an overall 3.0 GPA, with the minimum of a "B" letter grade in each course in order to earn the certificate. Students will become academically ineligible to continue course work if a grade of "C", "D", "F", or "WF" is earned in any of the nurse practitioner courses. Students must also meet any applicable College of Graduate Studies progression policies.

Nurse Practitioner Certificate Programs

An individualized Program of Study is developed by the Graduate Program Director of the School of Nursing after a Gap Analysis is performed. Students must submit their transcripts and their syllabi for each course to be considered as equal to the courses offered at Georgia Southern University for the completion of the certificate. To enroll in a Post MSN Certificate Program each applicant must show completion of the following courses in their MSN Program or must complete them prior to admission into the Certificate Program: Nursing Research, Advanced Health Assessment, Pathophysiology, and Pharmacology for Advanced Practice Nursing.

Nursing BSN to DNP

Degree Requirements: 77 Credit Hours (> 95% Online)

Programs Available

Post BSN to DNP with "Opt-Out" option; Post-MSN Certificate

Total Credits: 43 credits for Adult/Gerontology Acute Care NP, Adult/Gerontology Primary Care NP, FNP or PMHNP; additional 34 credits for DNP.
*For students who choose to opt out at the MSN, their credits will be 43 for Adult/Gerontology Acute Care NP, Adult/Gerontology Primary Care NP, FNP or PMHNP.

**Admission Requirements**

1. Bachelor’s degree in the proposed field of study (BSN) or its equivalent from a college accredited by the appropriate accrediting association. BSN program must include a Healthy Assessment course.
2. Current Georgia RN license. Out-of-state students must obtain a Georgia RN license.
3. One year of full time clinical nursing employment prior to entering the nurse practitioner health assessment course. Proof of full time clinical nursing employment may be required.
   a. If you are applying for the Adult/Gerontology Acute Care NP track, one year of critical care nursing employment.
4. Prerequisite undergraduate statistics course or a statistically oriented methodology course, with a grade of C or better.
5. Submission/completion of documentation:
   a. College of Graduate Studies application
   b. Georgia Southern Health Services form
   c. School of Nursing Student Health Appraisal forms
   d. Proof of current malpractice liability insurance
   e. Proof of American Heart Association BLS certification
   f. Three letters of professional recommendations. A phone interview may be necessary.

**Specific Admission Policies**

Must gain Regular Degree-Seeking Status admission to the BSN to DNP program to be eligible to enroll in graduate nursing courses. Non-degree students are not permitted to enroll in graduate nursing courses with the exception of students formally admitted to the Post-MSN Certificate option or with prior approval from the Graduate Program Director. The Graduate Program Director will make an admission decision recommendation following a review of the applicant's credentials. Admission decisions are made on a case by case basis.

1. Minimum undergraduate GPA of 3.0 (on a 4.0 scale).
2. All international applicants whose native language is not English and/or who do not have an undergraduate degree from a regionally accredited U. S. college or university, are required to submit official TOEFL scores taken within two years immediately preceding the requested semester of admission. An official copy of the test score, sent by the testing agency to the Office of Graduate Admissions is required before any action is taken on an application. All international students must comply with all graduate school requirements.
3. Students must attend an annual, mandatory graduate intensive prior to enrolling in classes.
4. Criminal background and/or drug testing may be requested by clinical agencies. Cost and scheduling is the student’s responsibility.
5. All applicants will be required to complete all clinical practicums with a qualified preceptor within 250 miles of Georgia Southern University.

**Progression Requirements**

1. Program progression: in accordance with College of Graduate Studies' policies.
2. Clinical course progression: If a student is required to repeat any course with both a didactic and clinical component, then the student will be required to complete both courses.
3. Any student who withdraws from a course or program must meet with the Graduate Program Director to determine their revised program of study. The student may be required to complete a one hour independent study (didactic or clinical) or repeat a previous course(s).
4. All students enrolled in graduate nursing programs are required to attend a MANDATORY annual intensive prior to each Fall cycle of course work.

Students assume responsibility for all scheduling and costs related to their intensive attendance.

All graduate nursing programs must be completed within a seven year time period. Students who “opt-out” of the BSN to DNP with an MSN have two academic years to reapply to the program to complete the DNP.

**Required Credits**

**Major: Nursing, Post BSN to DNP Total, 77 Hours**

**MSN Opt-Out option concentration:** 
- Acute Care Nurse Practitioner, Adult/Gerontology
- Nurse Practitioner, Adult/Gerontology
- Primary Care Nurse Practitioner Family Nurse Practitioner (FNP) or Psychiatric Mental Health Nurse Practitioner (PMHNP), 43 Hours

(585 didactic hours and 720 clinical hours)

Students who opt out are eligible to sit for certification. Students who complete the graduate core, practice core, and specialty core and elect the MSN opt-out option degree from Georgia Southern University have two (2) years from the date of their MSN final transcript studies to re-apply to the DNP program to obtain their doctoral degree without penalty. After successfully completing the additional five (5) semesters of course work, students would obtain the Doctor of Nursing Practice Degree. Students who opt out with a MSN are eligible to sit for certification.

M.S.N. Degree, with a focus in Chronic Care Management, 30 credit hours

M.S.N. Degree, with a focus in Nursing Education, 36 credit hours

Admission Requirements
1. Bachelor’s degree in the proposed field of study (BSN) or its equivalent from a college accredited by the appropriate accrediting association.
2. Current Georgia RN license. Out-of-state students must obtain a Georgia RN license.
3. Prerequisite undergraduate statistics course or a statistically oriented methodology course.
4. Pre-admission interview by nursing faculty.
5. Submission/completion of documentation:
   a. College of Graduate Studies application
   b. Georgia Southern Health Services form
   c. School of Nursing graduate application
   d. Proof of current malpractice liability insurance
   e. Proof of American Heart Association Level C (2 person-BLS) CPR certification
   f. Three letters of recommendation
   g. School of Nursing Student Health Appraisal forms

Specific Admission Policies
Must gain Regular Degree-Seeking Status admission to the MSN program to be eligible to enroll in graduate nursing courses. Non-degree students are not permitted to enroll in graduate nursing courses with the exception of students formally admitted to the Post-MSN Certificate option or with prior approval from the Graduate Program Director. The Graduate Program Director may admit any student into a program at her discretion. Final decisions will be made on an individual basis.

- Minimum undergraduate GPA of 3.0 (on 4.0 scale) in all prior nursing studies

Progression Requirements
- Course Progression: All courses must be completed with a minimum grade of “B”

Other Program Requirements
- See academic standards and regulations in the graduate section for information on Program of Study and comprehensive examination procedures.
- Students must meet the progression policies of College of Graduate Studies and the BSN to DNP or Post MSN DNP Program.
- Students who opt out with a MSN are eligible to sit for certification.
- Students who complete the graduate core, practice core, and specialty core and elect the MSN opt-out option degree from Georgia Southern University have two (2) years from the date of their MSN final transcript to re-apply to the DNP program to obtain their doctoral degree without penalty. After successfully completing the additional five (5) semesters of course work, students would obtain the Doctor of Nursing Practice Degree.
- Students who opt out are eligible to sit for certification.

Nursing M.S.N. (Online)

Degree Requirements: 30-33 Credit Hours

Programs Available:
M.S.N. Degree, with a focus in Chronic Care Management, 30 credit hours
M.S.N. Degree, with a focus in Nursing Education, 36 credit hours

Other Program Requirements
- See academic standards and regulations in the graduate section for information on Program of Study and comprehensive examination procedures.
- Students must meet the progression policies of College of Graduate Studies and the MSN Program.
- A student admitted Non-degree to the Post-MSN Certificate options must meet the same academic standards and regulations for progress and retention as a Degree-seeking student.
- Preference is given to applicants with a desire to work in rural or underserved areas. Minority and rural students are encouraged to apply.

Total Credit Hours: 36

Psychiatric Mental Health Nurse Practitioner Post-MSN Certificate

Certificate Requirements: 19 Credit Hours

Student Outcomes

Student outcomes are consistent with the BSN to DNP program outcomes.

Admission Cycle

The admission application materials for the College of Graduate Studies (COGS) for NP certificate programs must be received by March 1st for admission consideration into the fall semester cohort. Students meeting all pre-requisites (pathophysiology, pharmacology, physical assessment) may be eligible for a January (spring semester) start date. Spring semester start must be approved by the Program Director. Phone interviews with individuals under consideration may be conducted prior to admission.

Admission Criteria

1. Master's degree in Nursing (APRN Program which includes Clinical Nurse Specialist, CRNA, Nurse Midwife, Nurse Practitioner) from a college accredited by the appropriate accrediting association.
2. Minimum graduate GPA of 3.0 (on 4.0 scale)
3. Pharmacology Course cannot be older than 5 years.
4. Current unrestricted RN license in state of residence and eligibility for a Georgia RN license
5. Certification as a Clinical Nurse Specialist, CRNA, Nurse Midwife, Nurse Practitioner
6. Submission/completion of the College of Graduate Studies application (on-line)
7. Proof of current malpractice liability insurance as a RN and NP student
8. Must have the capability to fully utilize and interact within the on-line course delivery format of the institution.

Specific Admission Policy

The Nurse Practitioner certificate student will be admitted in Non-degree status and ineligible to enroll in other graduate courses unless admitted to that program. Only grades of "B" or better earned in the certificate are eligible for application to the nursing doctorate if the individual is later admitted to the Post MSN DNP degree program.

Progression Policy

A student admitted Non-Degree to the Post-MSN Nurse Practitioner Certificate option must have an overall 3.0 GPA, with the minimum of a "B" letter grade in each course in order to earn the certificate. Students will become academically ineligible to continue course work if a grade of "C", "D", "F", or "WF" is earned in any of the nurse practitioner courses. Students must also meet any applicable College of Graduate Studies progression policies.

Nurse Practitioner Certificate Programs

An individualized Program of Study is developed by the Graduate Program Director of the School of Nursing after a Gap Analysis is performed. Students must submit their transcripts and their syllabi for each course to be considered as equal to the courses offered at Georgia Southern University for the completion of the certificate. To enroll in a Post MSN Certificate Program each applicant must show completion of the following courses in their MSN Program or must complete them prior to admission into the Certificate Program: Nursing Research, Advanced Health...
Assessment, Pathophysiology, and Pharmacology for Advanced Practice Nursing.

Total Credit Hours 19
Public Health

The Jiann-Ping Hsu College of Public Health (JPHCOPH) created January 2006 and accredited by the Council on Education for Public Health (CEPH). The College exists to provide public health education, research, and community service that will positively impact the quality of life and health disparities of rural and underserved populations. The establishment of the College was made possible by a generous gift from Dr. Karl E. Peace, in memory and honor of his wife, Dr. Jiann-Ping Hsu.

Vision

The Jiann-Ping Hsu College of Public Health will be the nationally recognized leader in the empowerment of rural communities and underserved populations to address public health issues, eliminate health disparities and improve health outcomes.

Mission

The mission of the Jiann-Ping Hsu College of Public Health is to improve health, eliminate health disparities and health inequities of rural communities and underserved populations globally through excellence in teaching, public health workforce development, research, scholarship, professional service and community engagement.

College Structure

- Certificate in Public Health (p. 443)
- Department of Biostatistics, Epidemiology and Environmental Health Sciences (p. 445)
- Department of Health Policy, Management and Behavior (p. 447)
- Doctor of Public Health (p. 449)
- Master of Public Health (p. 452)
- Structure (p. 455)

About Public Health

The Institute of Medicine (IOM) has defined the role of public health as "...the fulfillment of society’s interest in assuring the conditions in which people can be healthy" (IOM, 1988).

Public health activities focus on improving the health of communities. Public health is also defined as the art and science of promoting health, preventing disease, and prolonging life among human populations; the broad mission of public health is to enhance human health through organized community efforts (Council on Education for Public Health, 1978).

A diverse and ever-expanding field of practice, public health embraces an ecological approach that recognizes the interactions and relationships among multiple determinants of health. It involves the dissemination of reliable information for policy decisions; identifying systemic inequalities and problems; protecting the public’s health and safety through education and research; and fostering partnerships with individuals, communities, and organizations to promote health.

Though public health involves the knowledge and application of many disciplines in its research, teaching, service, and practice activities, the following have been identified as fundamental, core areas to the practice of public health (CEPH Accreditation Criteria, 2011):

- Biostatistics - collection, storage, retrieval, analysis and interpretation of health data; design and analysis of health-related surveys and experiments; and concepts and practice of statistical data analysis;
- Environmental Health Sciences - environmental factors including biological, physical, and chemical factors that affect the health of a community;
- Epidemiology - distributions and determinants of disease, disabilities, and death in human populations; the characteristics and dynamics of human populations; and the natural history of disease and the biologic basis of health;
- Health Policy & Management - planning, organization, administration, management, evaluation, and policy analysis of health and public health programs; and
- Community Health Education/Social and Behavioral Sciences - concepts and methods of social and behavioral sciences relevant to the identification and solution of public health problems.

The teaching, research, and service activities of the Jiann-Ping Hsu College of Public Health are grounded in these core public health knowledge areas. Our goals for workforce development, community-based research and community-based service help us focus our efforts on cross disciplinary projects that build on the synergistic effects of these core knowledge areas.

Public health is concerned with protecting the health of communities, both small and large. Public health professionals focus on building on assets and preventing problems from happening or re-occurring through implementing educational programs, developing policies, administering services, and conducting research in concert with, but in contrast to, clinical health professionals (e.g., physicians and nurses) who focus primarily on treating individuals after they become sick or injured. No matter what form public health assumes, its goal is always the same: to improve the quality of life of individuals, families, and communities by focusing on prevention, promotion, and protection.

This preventive model encompasses three core functions:

1. assessing and monitoring the health of communities and at-risk populations to identify health problems and establish priorities;
2. formulating public policies in collaboration with community and government leaders designed to prioritize and solve local and national health problems; and
3. assuring that all populations have access to appropriate and cost-effective health care, including health promotion and disease prevention services, and evaluating the effectiveness of the care.

Our Shared Values

The Jiann-Ping Hsu College of Public Health is endowed by Dr. Karl E. Peace as a tribute to his wife and an enduring celebration of her life characterized by "a zeal for excellence, consideration of others, intelligence and scholarship, honesty, kindness and humility." In honor of Dr. Hsu, the faculty, students and staff of the JPHCOPH commit to demonstrate these values in our behavior toward one another and to those that we serve.

In 2007, the JPHCOPH students, faculty and staff worked together to clarify the following list of shared core values. These values serve to guide decision making for our workforce development, research, professional service and community engagement activities. We will also use these values to help us make choices about how to move forward when the path is not clear.

- Excellence in research, service and instruction.
- Passion for improving the health of rural communities and underserved populations.
- Responsibility for promoting health equity and eliminating health disparities in rural communities and underserved populations.
- Commitment to community involvement.
Experiential Learning Opportunities

All M.P.H. students are required to complete a practicum experience and an integrated capstone experience. The practicum and capstone experience are both competency-based. The 300 hour in agency practicum provides the student the opportunity to further develop and integrate skills learned in the classroom. An electronic portfolio about the practicum is submitted at completion of the 300 hours. The capstone experience serves to facilitate problem solving skills through the integration of public health principles across all concentrations. Elements of these two experiences make up the culminating experience for the M.P.H.

All Dr.P.H. students are required to complete a preceptorship in Public Health, candidacy exams and a Dissertation. The preceptorship/field experience consists of 300 hours of field experience under the joint direction of a qualified specialist working in selected areas of public health. An electronic portfolio about the activities and outcomes of the experience is required upon completion of the preceptorship. Students must successfully pass a candidacy exam on the core and concentration competencies to begin the preceptorship and dissertation. The doctoral dissertation is a culminating experience that requires the student to synthesize and integrate knowledge and apply theory and principles learned to an area of public health practice within the area of concentration. The dissertation must also be presented and successfully defended before the faculty.

Advisement

Graduate students are advised by the Coordinator of Student Services and mentored by a faculty member from the Student’s concentration area.

Programs

Master’s

- Public Health M.P.H. (Concentration in Biostatistics) (p. 446)

Certificate in Public Health

Degree Requirements: 16 Credit Hours

Admission Requirements

The Jiann-Ping Hsu College of Public Health (JPHCOPH) Certificate in Public Health is an ONLINE program. International applicants are eligible to apply for the Certificate in Public Health if he/she plans to complete the program from outside the U.S. International applicants are not eligible to apply for a student visa, nor can they maintain their current F-1/J-1 status in a fully online program.

Students who wish to obtain the Certificate in Public Health need not be enrolled in the M.P.H. program but must still apply and be admitted to the certificate program. Admission into the Certificate in Public Health program does not guarantee subsequent admission to a graduate degree program. Applying to a graduate degree program is a separate process and different criteria must be met.

Regular Admission

1. Application - Completion of an application in Schools of Public Health Application Service (SOPHAS) Express.
2. Degree - Completion of a Bachelor’s degree or higher from a regionally accredited institution.
3. Transcripts - Official transcript(s) from each college or university previously attended. A transcript is required even if the courses from one school appear on the transcript of another school.*
   - All foreign transcripts must be evaluated by World Education Services (WES). Visit http://www.wes.org/ to view which documents are required for your country and to request an International Credential Advantage Package (ICAP) Course-by-Course Report.*
   - Upload transcript(s) from all institutions attended. (Do NOT send transcripts to SOPHAS Express)*
4. Grade Point Average (GPA) - Minimum cumulative GPA of 2.0/4.0 scale in either:

*
Certificate in Public Health

- Upper division undergraduate courses; OR
- Upper division graduate courses.

5. **English Language Proficiency** - International applicants and U.S. Citizens whose native language is not English must demonstrate English proficiency. Prior to consideration for admission, international applicants whose native language is not English must take and post acceptable scores on the Test of English as a Foreign Language (TOEFL) (http://www.ets.org/toefl) or the International English Language Testing System (IELTS) (http://www.ielts.org) unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The TOEFL and IELTS examinations are administered at various times of the year and in many centers throughout the world.

- A score of at least 75 (internet-based test, IBT) or 537 (paper-based test) on the TOEFL and 6.0 on the IELTS is normally required to be considered for regular admission. The official TOEFL and the official IELTS scores may not be more than two (2) years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus. Successful completion of Intensive English Programs (IEPs) at other English Language Program (ELP) providers will be considered on a case-by-case basis. Request that your official TOEFL scores be sent directly to SOPHAS.

Official IELTS scores should be sent to:
Georgia Southern University
Office of Graduate Admissions
P.O. Box 8113
Statesboro, GA 30460-8113

6. **Letters of Recommendation** - Three (3) letters of recommendation. It is strongly advised that two letters be from individuals who can address your past academic performance and it is encouraged that the third letter is from a work or internship supervisor.

7. **Curriculum Vitae/Resume** - A CV/Resume that includes the following:
   a. educational experiences,
   b. professional goals and objectives,
   c. work history,
   d. professional experiences, memberships and/or participation in professional organizations,
   e. experiences in public health programs.

8. **Statement of Purpose** - A Statement of Purpose (500-1000 words) that conveys the applicant's reasons for pursuing graduate study in public health and how admission into the program relates to the applicant's professional aspirations.

**NOTE:** Unofficial documents must be uploaded for review purposes. 

*Official transcripts and TOEFL/IELTS scores are only required if you are offered admission.* Following notification of admission, official transcripts mailed in sealed envelopes directly from each university attended (or directly from WES) and official TOEFL/IELTS scores mailed directly from the testing company are required **PRIOR** to the first day of classes of the original semester of acceptance. Failure to provide the official transcripts and TOEFL/IELTS scores following notification of admission will result in revocation of the admission offer.

Official documents must be mailed to:
Georgia Southern University
Office of Graduate Admissions
P.O. Box 8113
Statesboro, GA 30460-8113

**Appeals**

Students who wish to appeal an admission decision must follow the College of Graduate Studies appeal procedures.

**Program of Study**

The Certificate program requires a total of 16 credit hours and is offered fully online through the Master of Public Health (M.P.H.) program. All courses will be offered every fall and spring semester. The proposed courses are as follows:

<table>
<thead>
<tr>
<th>Course Requirements</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PUBH 6532</td>
<td>Environmental Health</td>
</tr>
<tr>

</tr>
<tr>
<td>PUBH 6541</td>
<td>Biostatistics</td>
</tr>
<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>16</strong></td>
</tr>
</tbody>
</table>

**Other Program Requirements**

To be awarded a graduate certificate, the student:

1. Must not be on probation,
2. Must have a cumulative GPA of 3.0 or higher on graduate coursework and on coursework applied to the certificate,
3. Must meet all the requirements of the College of Graduate Studies and the student's certificate program, and
4. Must be enrolled during the semester in which the certificate requirements are completed.

After earning the Certificate, all students are welcome to apply to the M.P.H. program which is offered in a face-to-face format. Certificate earning students will not be required to submit official scores from the GRE in order to apply. Those applicants who are admitted to the M.P.H. program will receive credit for 16 credit hours toward their M.P.H. degree. The M.P.H. degree requires a total of 45 credit hours, whereby in addition to core public health courses, students pursue an area of concentration in public health.

The completion of the Certificate in Public Health program will satisfy the prerequisite requirements for those students who wish to apply for the Dr.P.H. program but have not completed at least one graduate-level course in each of the five core areas of public health.

The completion of the Certificate in Public Health program must not be confused with the Certified in Public Health (CPH) Exam offered by the National Board of Public Health Examiners. The Certificate in Public Health is not a credentialing program. However, the completion of the Certificate in Public Health program will satisfy one of the requirements to sit for the CPH Exam. Other specific requirements to sit for the CPH Exam can be found at the website for the National Board of Public Health Examiners (https://www.nbphe.org).

Biostatistics
Are you looking for biostatistics graduate programs that prepare you for a career that excels? Our programs prepare you to develop and apply statistical reasoning and methods. Topics include addressing, analyzing and solving problems in public health, health care, biomedical, clinical and population-based research. The department offers two degrees: a Dr.P.H. in Biostatistics and an M.P.H. in Biostatistics.

Epidemiology
Do you want to become an applied epidemiologist in public health? In our programs you will study diseases of the human body in order to explain occurrence, distribution and causative factors of diseases in human populations. The department offers two degrees: a Dr.P.H. in Epidemiology and an M.P.H. in Epidemiology.

Environmental Health Sciences
Are you interested in the environmental and occupational factors that impact our public’s health? Students in this program will find a dedication to rigorous evidence-based science, collaboration and a strong commitment of a service learning approach to instruction. Students work very closely with the faculty and engage in multiple service and research projects bridging theory and practice. The department offers an M.P.H. in Environmental Health Sciences.

Programs

Master’s
- Public Health M.P.H. (Concentration in Biostatistics) (p. 446)
- Public Health M.P.H. (Concentration in Environmental Health Sciences) (p. 446)
- Public Health M.P.H. (Concentration in Epidemiology) (p. 446)

Doctoral
- Public Health Dr.P.H. (Concentration in Biostatistics) (p. 445)
- Public Health Dr.P.H. (Concentration in Epidemiology) (p. 445)

Doctoral Public Health Field Practicum
Public Health M.P.H. (Concentration in Biostatistics)

Degree Requirements: 45 Credit Hours

Public Health Core Courses
- PUBH 5520G Introduction to Public Health 2
- PUBH 6532 Environmental Health 3
- PUBH 6533 Epidemiology 3
- PUBH 6534 Health Policy and Management 3
- PUBH 6535 Social and Behavioral Sciences and Public Health 3

Biostatistics Courses
- BIOS 6135 Topics of Inference in Biostatistics I 3
- BIOS 6136 Topics of Inference in Biostatistics II 3
- BIOS 6331 Regression Analysis in Biostatistics 3
- BIOS 6332 Experimental Design in Biostatistics 3
- BIOS 6531 Categorical Data Analysis 3
- BIOS 7231 Clinical Trials Methodology 3
- BIOS 7544 Data Management for Biostatistics 4

Select one of the following guided electives:
- BIOS 7090 Selected Topics in Biostatistics 3
- BIOS 7131 Survival Analysis 3
- BIOS 7331 Multivariate Analysis in Biostatistics 3
- BIOS 7431 Statistical Issues in Drug Development 3
- BIOS 7535 Data Analysis with SAS 3

Practicum and Culminating Experience
- PUBH 7530 Integrated Capstone Experience 3
- PUBH 7790 Practicum in Public Health 3

Total Credit Hours 45

Public Health M.P.H.
(Concentration in Health Policy and Management)

Degree Requirements: 45 Credit Hours

Credit Hours

Public Health Core Courses
PUBH 5520G Introduction to Public Health 2
PUBH 6532 Environmental Health 3
PUBH 6533 Epidemiology 3
PUBH 6534 Health Policy and Management 3
The Doctor of Public Health (Dr.P.H.) program at Georgia Southern University is committed to producing public health practitioners who possess the knowledge, skills, and values necessary to contribute to an effective public health workforce. The Dr.P.H. prepares professionals for broad-based practice in public health, through the integration of a community-based practice core and advanced courses in four concentration areas: Biostatistics, Community Health Behavior and Education, Epidemiology, and Public Health Leadership. The program serves both the full-time student preparing for a career in public health, as well as currently employed public health professionals seeking an advanced education to augment their existing skills and backgrounds.

**Purpose**

The Dr.P.H. is the terminal professional degree for those who intend to pursue or advance their professional practice career in public health. The Dr.P.H. program aims to train students for advanced science-based practice and practice-oriented research. Public health practice involves the strategic, organized and interdisciplinary application of knowledge, skills and competencies necessary to perform essential public health services necessary to improve the population’s health.

Those who earn this degree are expected to occupy leadership positions in public health and related areas. Additionally, individuals earning this degree will be positioned to exert significant influence on the development of policies and programs as well as teaching, research, and service in academic roles at the undergraduate or graduate level.

The Dr.P.H. program expands the competencies included in the Jiann-Ping Hsu College of Public Health Master of Public Health (M.P.H.) program for all matriculating students, with increased emphasis on advanced skills in evidence-based problem-solving. Students who have not completed one or more of the M.P.H. core public health courses must complete these courses as part of their doctoral program. In addition, those students are required to complete a minimum of 60 credits for the doctoral degree. Students with a master’s degree other than in public health may be required to take health or health-related courses in addition to the 60 minimum credits.

The Dr.P.H. program offers students the opportunity to specialize their training in four program concentration areas (Specific concentration competencies for each area are provided in the following sections):

- Biostatistics
- Community Health Behavior and Education
- Epidemiology
- Public Health Leadership (Partially Online)

**Doctor of Public Health**

**Advisement**

Jiann-Ping Hsu College of Public Health
P.O. Box 8015
Statesboro, GA 30460
Phone: (912) 478-2674
FAX: (912) 478-5811
http://jphcoph.georgiasouthern.edu

**Cross-Cutting Competencies**

- Apply evidence-based practice, generation of practice-based evidence, and leadership positions that apply and synthesize translational and implementation science findings in governmental, non-profit, and private-sector settings as well as teaching, research, and service in academic roles at the undergraduate or graduate level.
- **Biostatistics**
- **Community Health Behavior and Education**
- **Epidemiology**
- **Public Health Leadership**

**Biostatistics Concentration Competencies**

- Design a public health and biomedical investigation in terms of the experimental design, data to be collected that reflect research objectives, number of subjects needed, and specification of appropriate methods for analysis.
- Analyze public health and biomedical data using appropriate statistical software such as SAS, R and S-plus.
- **Interpret analytic methods used in the public health and biomedical journals, as well as critique published reports of public health and biomedical experiments as to the validity of the inferential conclusions.**
- Develop new biostatistical methods and new ideas for applying existing biostatistical methods to applications in public health and the biomedical sciences.
- Develop written and oral reports to communicate effectively with research investigators the pivotal aspects of a study, including: design, study objectives, data analysis methodology, results and conclusions.
• Create a collaborative environment for working on written and oral reports.

Community Health Behavior and Education Concentration Competencies

• Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice.
• Communicate and interact with people across diverse disciplines, communities and cultures for development of programs, policies, and research.
• Develop collaborative partnerships with communities, policy makers, and other relevant groups.
• Engage communities in creating evidence-based, culturally competent programs.
• Understand community-based participatory intervention and research projects.
• Design action plans for enhancing community and population-based health.
• Assess cultural, environmental, and social justice influences on the health of communities.
• Implement culturally and linguistically appropriate programs, services, and research.

Epidemiology Concentration Competencies

• Design a public health and epidemiological investigation in terms of experimental design, data to be collected that reflect the research objectives, and specification of appropriate methods of analysis.
• Analyze public health and epidemiological data using appropriate statistical software such as SAS and R.
• Develop new epidemiological methods and new ideas for applying existing epidemiological methods to applications in public health and the epidemiological sciences.
• Develop written and oral reports to communicate effectively with research investigators the pivotal aspects of a study, including: design, study objectives, data analysis methodology, results, and conclusions.
• Create a collaborative environment for working on written and oral reports.
• Employ basic ethical and legal principles pertaining to the collection, maintenance, use and dissemination of epidemiological measures.

Public Health Leadership Concentration Competencies

• Evaluate the economic, professional, social and legislative influences as well as values and ethical dilemmas in public health that are inherent in efforts to control cost, while assuring access and quality of services, safety and preparedness, for the public.
• Analyze the trends in planning, resource allocation, and financing and their effects on consumers, providers, and payers in public health; evaluate the main components and issues of the organization, financing and delivery of public health systems in the US.
• Evaluate the application and role of policy and management on the conduct of public health research and practice through the application of qualitative and quantitative research methods for public health problem solving; evaluate grants, proposals or cooperative agreements for funding from external sources.
• Assess the ability to manage programs within budget constraints through analysis of budget preparation with justification and evaluation as related to public health initiatives; apply prevention effectiveness models to prevention strategies through cost effectiveness, cost-benefit, and cost-utility analysis.
• Analyze leadership skills for building partnerships in public health; analyze health policy and management effectiveness using appropriate channels and technologies.
• Evaluate the process for strategic planning and marketing for public health through the analysis of quality, cost benefit, and performance improvement concepts and develop a plan to implement a policy or program, including goals, outcomes and process objectives, staffing plans, budget and implementation steps.
• Analyze the policy development, assessment, and evaluation process for improving the health status of populations including urban rural differences wise applying population and individual ethical considerations in relation to benefit, cost and burden of public health programs. Use this knowledge to advocate for programs and resources that advance the health of the population.
• Analyze information from various sources to resource and program decision making and evaluate how “systems thinking” can contribute to solving public health organizational issues and problems while being mindful of the principles of health equity for public health problem solving.

The Curriculum

The Dr.P.H. program requires a minimum of 60 credits and is offered on both a full- and part-time basis. The overall curriculum model includes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Public Health Core</td>

<td>60</td>
</tr>
</tbody>
</table>

The Dr.P.H. Public Health Sciences Core provides a grounding in the scientific basis of public health, public health professionalism and ethics, and translational research. Advanced specialty coursework develops the skills and knowledge upon which to build or enhance a career in public health. Selective courses are available in four core areas of concentration: Biostatistics, Community Health Behavior and Education, Epidemiology, and Public Health Leadership.

The Preceptorship

The Preceptorship is an important practical experience in a public health related setting. Dr.P.H. students will complete a 300 hour preceptorship under the joint direction of a qualified public health professional and a public health faculty member.

The Candidacy Examination

All Dr.P.H. students are required to complete and pass a concentration-specific candidacy examination. Students failing the concentration exam are allowed only one retake. In the event any Dr.P.H. student fails the concentration retake exam, the student will be immediately excluded from the program and all registered courses for the upcoming semester will be administratively cancelled.

The Dissertation

All doctoral candidates are required to prepare, complete and successfully defend a dissertation.

Admission Requirements

Admission into the graduate programs within the Jiann-Ping Hsu College of Public Health (JPHCOPH) is competitive and decisions are based on the application as a whole. The Doctor of Public Health (DrPH) admission
requirements apply to the following DrPH degrees in the Jiann-Ping Hsu College of Public Health at Georgia Southern University:

- Public Health Dr.P.H. (Concentration in Biostatistics)
- Public Health Dr.P.H. (Concentration in Community Health Behavior and Education)
- Public Health Dr.P.H. (Concentration in Epidemiology)
- Public Health Dr.P.H. (Concentration in Public Health Leadership)

**Degree Admission Requirements**

**Regular Admission**

1. **Application** - Completion of an application in Schools of Public Health Application Service (SOPHAS).
2. **Degree** - Completion of a Master’s or terminal degree from a regionally accredited institution. Applicants who do not have a graduate degree in Public Health will be required to complete prerequisite Public Health coursework.
3. **Transcripts** - Official transcript(s) from each college or university previously attended. A transcript is required even if the courses from one school appear on the transcript of another school. *(NOTE: SOPHAS will NOT process your application without receiving all official transcripts. Please refer to the SOPHAS FAQs page for instructions on how to send transcripts.)*
   - All foreign transcripts must be evaluated by World Education Services (WES). Visit [http://www.wes.org/](http://www.wes.org/) to view which documents are required for your country and to request an International Credential Advantage Package (ICAP) Course-by-Course Report.
   - Transcript(s) should show completion of at least one (1) graduate-level core course in each of the following five (5) areas: biostatistics, epidemiology, social and behavioral sciences in public health, health policy and management, and environmental health. (Applicant may be asked to provide syllabi for courses taken.)
   - Courses must have been completed in the last five (5) years and each must have been passed with a grade of "B" or better. Applicants who have not completed these courses, but whose applications show exceptional potential for success in the Dr.P.H. program, may be admitted to the Dr.P.H. program, but will be required to complete the courses (as presented in the JPHCOPH M.P.H. core course requirements) with grades of "B" or better before progressing to the Public Health Core and Concentration Courses of the Dr.P.H. program. If the applicant has completed a Master’s degree in a field other than public health, professional public health work experience in one or more of the five core areas may be substituted for the corresponding M.P.H. level courses at the discretion of the College. Applicants who took these courses more than five years ago but who work in the Public Health field may request a waiver. Requests for this waiver must be submitted in writing to jphcoph-admissions@georgiasouthern.edu.
4. **Grade Point Average (GPA)** - Preferred minimum cumulative GPA of 3.0/4.0 scale in upper division graduate courses.
5. **Graduate Record Examination (GRE)** - Official scores on the Graduate Record Examination (GRE), taken within the last five (5) years sent to school code 8560. The requirement for completion of a standardized test will be waived for those applicants who hold a terminal degree from a regionally accredited college or university.
6. **English Language Proficiency** - International applicants and U.S. Citizens whose native language is not English must demonstrate English proficiency. Prior to consideration for admission, international applicants whose native language is not English must take and post acceptable scores on the Test of English as a Foreign Language (TOEFL) ([http://www.ets.org/toefl](http://www.ets.org/toefl)) or the International English Language Testing System (IELTS) ([http://www.ielts.org](http://www.ielts.org)) unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The TOEFL and IELTS examinations are administered at various times of the year and in many centers throughout the world.
   - A score of at least 75 (internet-based test, IBT) or 537 (paper-based test) on the TOEFL and 6.0 on the IELTS is normally required to be considered for regular admission. The official TOEFL and the official IELTS scores may not be more than two (2) years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus. Successful completion of Intensive English Programs (IEPs) at other English Language Program (ELP) providers will be considered on a case-by-case basis. Request that your official TOEFL scores be sent directly to SOPHAS.
   - Official IELTS scores should be sent to: Georgia Southern University Office of Graduate Admissions P.O. Box 8113 Statesboro, GA 30460-8113.

7. **Letters of Recommendation** - Three (3) letters of recommendation. It is strongly advised that two letters be from individuals who can address your past academic performance and it is encouraged that the third letter is from a work or internship supervisor.
8. **Curriculum Vitae/Resume** - A CV/Resume that includes the following: a) educational experiences, b) professional goals and objectives, c) work history, d) professional experiences, memberships and/or participation in professional organizations, e) experiences in public health programs.
9. **Statement of Purpose** - A Statement of Purpose (700-1,000 words) that conveys the applicant’s reasons for pursuing a Dr.P.H. in Public Health and how admission into the program relates to the applicant’s professional aspirations. *(Some students may be required to take prerequisite coursework prior to beginning the program of study. Conditions of admission will be presented at the student’s first advisement appointment. For more information on our programs, visit our website at [http://jphcoph.georgiasouthern.edu/](http://jphcoph.georgiasouthern.edu/).)*

**Non-degree Admission Requirements**

An applicant may be admitted as a Non-Degree (Doctorate) student to earn credit hours in [DOCTORAL-LEVEL Public Health courses](#) without working towards a degree or certificate program. Applying to a graduate degree or certificate program is a separate process and different criteria must be met.

1. **Application** - Completion of an application in Schools of Public Health Application Service (SOPHAS) Express.
2. **Degree** - Completion of a Master’s or terminal degree from a regionally accredited institution.
3. **Transcripts** - Official transcript(s) from each college or university previously attended. A transcript is required even if the courses from one school appear on the transcript of another school.
   - All foreign transcripts must be evaluated by World Education Services (WES). Visit [http://www.wes.org/](http://www.wes.org/) to view which documents are required for your country and to request an International Credential Advantage Package (ICAP) Course-by-Course Report.
   - Upload transcript(s) from all institutions attended. *(Do not send transcripts to SOPHAS Express)*
4. **Grade Point Average (GPA)** - Minimum cumulative GPA of 2.75/4.0 scale in either:
• Upper division undergraduate courses; OR
• Upper division graduate courses

5. Statement of Purpose - A Statement of Purpose (500-1000 words) that conveys the applicant’s reasons for pursuing graduate study in public health and how admission into the program relates to the applicant’s professional aspirations.

1 NOTE: Unofficial documents must be uploaded for review purposes. **Official transcripts are only required if you are offered admission.** Following notification of admission, official transcripts mailed in sealed envelopes directly from each university attended (or directly from WES) are required PRIOR to the first day of classes of the original semester of acceptance. Failure to provide the official transcripts following notification of admission will result in revocation of the admission offer.

Official documents must be mailed to:
Georgia Southern University
Office of Graduate Admissions
P.O. Box 8113
Statesboro, GA 30460-8113

Grades
Dr.P.H. level degree seeking students are required to maintain a cumulative GPA of at least 3.0 to remain in good academic standing and to be eligible to graduate. In the event the cumulative GPA falls below 3.0, the student will be placed on academic probation. Students have nine (9) credits to elevate the cumulative GPA to at least 3.0 or will be excluded from the program. Also, students earning grades of "D" or below will be excluded from the program.

Transfer Credit Hours
Students may request that up to, but no more than, six (6) graduate credits be applied toward the 60 credits required for the Dr.P.H. Transfer credit must also satisfy the same requirements as courses taught for doctoral training within the Jiann-Ping Hsu College of Public Health (e.g., minimum grade of "B"), be consistent with the student’s approved program of study, and have been received from a regionally accredited college or university. Thesis and dissertation credit cannot be transferred. The student must provide documentation in support of equivalence, such as a course syllabus, transcript, term paper, and/or instructor testimony. Equivalence is determined by the JPHCOPH faculty responsible for teaching the specific class. Credit reductions do not influence the residency and enrollment requirements or comprehensive examination procedures.

Course Time Limit
All requirements for the Dr.P.H. must be completed within seven academic years from the date of the first enrollment for study following admission to the doctoral program. For transfer students, the seven-year time limit commences with the semester during which transfer credit was earned.

Faculty Advisor
Graduate students are advised by the Coordinator of Student Services and mentored by a faculty member from the Student’s concentration area.

Master of Public Health
The Master of Public Health (M.P.H.) educational degree program at the Jiann-Ping Hsu College of Public Health at Georgia Southern University prepares professionals for broad-based practice in public health, through the integration of core competencies in the five areas of knowledge basic to public health (biostatistics, environmental health, epidemiology, health policy and community health) with specialized knowledge and expertise in one of these areas. The program serves both the full-time student preparing for a career in public health, as well as currently employed health professionals seeking an advanced education to augment their existing skills and background.

Purpose
The purpose of the M.P.H. is to prepare graduate level public health practitioners capable of applying practice-based skills to promote the concepts of the field.

A comprehensive public health education program should provide skills enabling students to assess the magnitude and potential impact of the multiple problems facing populations, as well as recognize existing community capacities or resources. In conjunction with assessment skills, students enrolled in a public health program should understand the role of community empowerment, community mobilization, networks, and partnerships in the development of comprehensive public health policies designed to impact the priority areas identified in the assessment phase. Lastly, student skill sets in a public health program should focus on the task of assuring a presence of services and infrastructure necessary to address problems identified in the assessment phase, as well as enforce policies developed in response to the assessment. Specific skill sets related to the core functions of public health practice are as follows:

• Monitor health status to identify community health problems;
• Diagnose and investigate health problems and health hazards in the community;
• Inform, educate, and empower people about health issues;
• Mobilize community partnerships to identify and solve health problems;
• Develop policies and plans that support individual and community health efforts;
• Recognize the importance of the enforcement of laws and regulations necessary to protect health and ensure safety;
• Link people to needed personal health services and assure the provision of health care when otherwise unavailable;
• Evaluate effectiveness, accessibility, and quality of personal and population-based health services; and
• Research for new insights and innovative solutions to health problems.

The M.P.H. program is committed to producing public health practitioners that possess the knowledge, skills, and values necessary to produce an effective public health workforce.

M.P.H. Competencies
At the completion of the M.P.H. degree program all students will be able to:

Cross Cutting Competencies
• Define public health and articulate the elements in the public health approach to ensuring the health of our public;
• Explain the historical developments of the field;
• Explain the core public health functions;
• Explain how the core public health functions are operationalized at the global, national, state and local levels;
• Describe the public health infrastructure within the United States and beyond (global);
• Define the five core knowledge areas of public health: biostatistics, environmental health sciences, epidemiology, health policy and management, and social and behavioral sciences;
• Explain how state and local governmental public health agencies ensure availability of the ten essential services;
• Describe the history and current status of the interactions between medicine and public health;
• Explain the status of the public health workforce and efforts to expand and ensure the quality and diversity of this workforce;

• Articulate the current issues within the field.

**Biostatistics Competencies**

• Provide the biostatistical components of the design of a public health or biomedical experiment by: clarifying the research objectives or questions; determining data and endpoints to be collected appropriate for the objectives; translating the objectives into biostatistical questions via hypothesis testing or confidence interval frameworks; determining the appropriate sample size; and writing the statistical analysis section of the experiment.

• Apply appropriate statistical analysis methods using SAS to analyze both categorical and quantitative data.

• Develop written and oral reports to communicate effectively to research investigators pivotal aspects of a study, including its design, objectives, data, analysis methods, results and conclusions ensuring that results and conclusions are valid and reliable and address the research objectives.

• Create a collaborative environment for working on written and oral reports and developing critical thinking skills.

• Describe key concepts and theory underlying biostatistical methodology used in probability and inferential, analytical and descriptive statistics.

**Environmental Health Competencies**

• Describe major environmental health hazards (physical, chemical and biological), and assess their genetic, physiologic, and socio-economic impacts on vulnerable and susceptible populations with special emphasis on rural and underserved communities.

• Apply research ethics and current research principles, including hypothesis development, experimental design, and current research methodology, to the qualitative and quantitative measurement and analysis of environmental health hazards.

• Apply the outcomes of environmental monitoring and environmental impact assessments to prevent, mitigate and/or forecast future exposures to environmental hazards and utilize this information to support or advocate for environmental health policy development.

• Apply current health risk assessment methods, utilized by federal, state, and local regulatory programs, and non-governmental guidelines and authorities directed toward management of environmental hazards and provide technical assistance and leadership to address the concerns of communities including environmental justice and equity.

• Apply current research methodology for community based intervention studies, assessing exposure to environmental factors as well as for the identification, quantification, and understanding of potential adverse effects on human health and ecosystems that might result from complex exposure to environmental stressors.

• Communicate environmental health hazards and associated health outcomes to community, stakeholders and professional audiences through oral and written communication and community-based intervention studies.

**Epidemiology Competencies**

• Identify key sources of data for epidemiologic purposes.

• Identify the principles and limitations of public health screening programs.

• Describe a public health problem in terms of magnitude, person, time and place.

• Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues.

• Comprehend basic ethical and legal principles pertaining to the collection, maintenance, use and dissemination of epidemiologic data.

• Apply the basic terminology and definitions of epidemiology.

• Calculate basic epidemiology measures.

• Communicate epidemiologic information to lay and professional audiences.

• Draw appropriate inferences from epidemiologic data.

• Evaluate the strengths and limitations of epidemiologic reports.

**Health Policy and Management Competencies**

• Define the main components and issues of the organization, financing and delivery of public health systems in the US and compare the economic, professional, social and legislative influences to include safety preparedness.

• Describe the legal, values and ethical dilemmas in public health that are inherent in efforts to control cost, while assuring access and quality of services for the public.

• Compare the policy development, assessment, and evaluation process for improving the health status of populations; compare the potential impacts of policy and management on the conduct of public health research and practice.

• Describe the principles of program development, management, budget preparation with justification and evaluation as related for public health initiatives; in that effort, define quality, cost benefit and performance improvement concept to address organizational performance issues in public health as well as trends in planning, resource allocation, and financing their effects on consumers, providers and payers in public health.

• Define principles of strategic planning and marketing in public health and define how “systems thinking” can contribute to solving public health organizational problems.

• Compare leadership skills for building partnerships in public health and demonstrate health policy and management effectiveness using appropriate channels and technologies.

**Social and Behavioral Sciences Competencies**

• Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice.

• Identify the causes of social and behavioral factors that affect health of individuals and populations.

• Identify individual, organizational and community concerns, assets resources and deficits for social and behavioral science interventions.

• Identify critical stakeholders for the planning, implementation and evaluation of public health programs, policies and interventions.

• Describe steps and procedures for the planning, implementation and evaluation of public health programs, policies and interventions.

• Describe the role of social and community factors in both the onset and solution of public health problems.

• Describe the merits of social and behavioral science interventions and policies.

• Apply evidence-based approaches in the development and evaluation of social and behavioral science interventions.

• Apply ethical principles to public health program planning, implementation and evaluation.

• Specify multiple targets and levels of intervention for social and behavioral science programs and/or policies.

**The Curriculum**

The M.P.H. is an applied professional/graduate degree designed for highly motivated students who have a substantial interest in public health. Unique sequencing of courses, community-based program activities, and field/
laboratory research provide students with multiple opportunities to develop the public health competencies.

The M.P.H. program requires a minimum of 45 credits and is offered on both a full- and part-time basis. The overall curriculum model includes:

<table>
<thead>
<tr>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Public Health Core</td>
</tr>
<tr>
<td>Concentration</td>
</tr>
<tr>
<td>Electives</td>
</tr>
<tr>
<td>Practicum in Public Health</td>
</tr>
<tr>
<td>Integrated Capstone Experience</td>
</tr>
<tr>
<td>Total Credit Hours</td>
</tr>
</tbody>
</table>

The M.P.H. core course requirements provide a broad overview of the disciplines of public health and the basic principles of public health practice. Specialty coursework develops the skills and knowledge upon which to build or enhance a career in public health. Selective courses are available in each of the five core areas of concentration: Epidemiology, Environmental Health Sciences, Biostatistics, Health Services Administration, and Social and Behavioral Sciences/Community Health Education.

In addition, all students are required to take an introduction to public health. An important practical experience in a public health venue is a field practicum in a community, a public health facility, a government agency, or related setting. The culminating experience is a course that requires the student integrate their specialization with public health practice.

**Admission Requirements**

Admission into the graduate programs within the Jiann-Ping Hsu College of Public Health (JPHCOPH) is competitive and decisions are based on the application as a whole. The Master of Public Health (MPH) admission requirements apply to the following MPH degrees in the Jiann-Ping Hsu College of Public Health at Georgia Southern University:

- Public Health M.P.H. (Concentration in Biostatistics)
- Public Health M.P.H. (Concentration in Community Health)
- Public Health M.P.H. (Concentration in Environmental Health)
- Public Health M.P.H. (Concentration in Epidemiology)
- Public Health M.P.H. (Concentration in Health Policy and Management)
- Public Health M.P.H. (Generalist Concentration)

**Degree Admission Requirements**

**Regular**

1. Application - Completion of an application in Schools of Public Health Application Service (SOPHAS).
2. Degree - Completion of a Bachelor’s degree or higher from a regionally accredited institution.
3. Transcripts - Official transcript(s) from each college or university previously attended. A transcript is required even if the courses from one school appear on the transcript of another school. (NOTE: SOPHAS will NOT process your application without receiving all official transcripts. Please refer to the SOPHAS FAQs page for instructions on HOW TO SEND TRANSCRIPTS.)
   - All foreign transcripts must be evaluated by World Education Services (WES). Visit http://www.wes.org/ to view which documents are required for your country and to request an International Credential Advantage Package (ICAP) Course-by-Course Report
4. Grade Point Average (GPA) - Minimum cumulative GPA of 2.75/4.0 scale in either:
   - Upper division undergraduate courses; OR
   - Upper division graduate courses
5. Graduate Record Examination (GRE) - Official scores on the Graduate Record Examination (GRE), taken within the last five (5) years sent to school code 8560.
6. English Language Proficiency - International applicants and U.S. Citizens whose native language is not English must demonstrate English proficiency. Prior to consideration for admission, international applicants whose native language is not English must take and post acceptable scores on the Test of English as a Foreign Language (TOEFL) (http://www.ets.org/toefl) or the International English Language Testing System (IELTS) (http://www.ielts.org) unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The TOEFL and IELTS examinations are administered at various times of the year and in many centers throughout the world.
   - A score of at least 75 (internet-based test, IBT) or 537 (paper-based test) on the TOEFL and 6.0 on the IELTS is normally required to be considered for regular admission. The official TOEFL and the official IELTS scores may not be more than two (2) years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus. Successful completion of Intensive English Programs (IEPs) at other English Language Program (ELP) providers will be considered on a case-by-case basis. Request that your official TOEFL scores be sent directly to SOPHAS. Official IELTS scores should be sent to: Georgia Southern University, Office of Graduate Admissions, P.O. Box 8113, Statesboro, GA 30460-8113.
7. Letters of Recommendation - Three (3) letters of recommendation. It is strongly advised that two letters be from individuals who can address your past academic performance and it is encouraged that the third letter is from a work or internship supervisor.
8. Curriculum Vitae/Resume - A CV/Resume that includes the following:
   - a) educational experiences, b) professional goals and objectives, c) work history, d) professional experiences, memberships and/or participation in professional organizations, e) experiences in public health programs.
9. Statement of Purpose - A Statement of Purpose (500-1000 words) that conveys the applicant’s reasons for pursuing graduate study in public health and how admission into the program relates to the applicant’s professional aspirations.

*Some students may be required to take prerequisite coursework prior to beginning the program of study. Conditions of admission will be presented at the student’s first advisement appointment.

**Provisional**

Admission may be granted to those individuals who do not fully satisfy the admission requirements. You must earn grades of “B” or better in your first nine (9) semester hours taken at Georgia Southern University following the effective admission term to obtain Regular Admission. A provisional student may enroll in graduate courses leading to a degree and such courses may count in a degree program once the student has changed to Regular Admission. Only credit earned in graduate courses at Georgia Southern University will satisfy provisional admission requirements. Failure to satisfy these requirements will result in an ineligibility to continue studies in the College of Graduate Studies. Provisional students are not eligible for Graduate Assistantship positions.

For more information on our programs, visit our website at http://jphcoph.georgiasouthern.edu/degrees/.
Non-Degree Admission Requirements

An applicant may be admitted as a Non-Degree (Master's) student to earn credit hours in MASTER'S-LEVEL Public Health courses without working towards a degree or certificate program. Applying to a graduate degree or certificate program is a separate process and different criteria must be met.

1. Application - Completion of an application in Schools of Public Health Application Service (SOPHAS) Express.
2. Degree - Completion of a Bachelor's degree or higher from a regionally accredited institution.
3. Transcripts - Official transcript(s) from each college or university previously attended. A transcript is required even if the courses from one school appear on the transcript of another school.*
   - All foreign transcripts must be evaluated by World Education Services (WES). Visit http://www.wes.org/ to view which documents are required for your country and to request an International Credential Advantage Package (ICAP) Course-by-Course Report.*
   - Upload transcript(s) from all institutions attended. (Do NOT send transcripts to SOPHAS Express)
4. Grade Point Average (GPA) - Minimum cumulative GPA of 2.75/4.0 scale in either:
   - Upper division undergraduate courses; OR
   - Upper division graduate courses.
5. Statement of Purpose - A Statement of Purpose (500-1000 words) that conveys the applicant’s reasons for pursuing graduate study in public health and how admission into the program relates to the applicant’s professional aspirations.

*NOTE: Unofficial documents must be uploaded for review purposes. Official transcripts are only required if you are offered admission. Following notification of admission, official transcripts mailed in sealed envelopes directly from each university attended (or directly from WES) are required PRIOR to the first day of classes of the original semester of acceptance. Failure to provide the official transcripts following notification of admission will result in revocation of the admission offer. Official documents must be mailed to: Georgia Southern University, Office of Graduate Admissions, P.O. Box 8113, Statesboro, GA 30460-8113.

Advisement: M.P.H.

Graduate students are advised by the Coordinator of Student Services and mentored by a faculty member from the Student’s concentration areas.

Grades

M.P.H. level degree-seeking students are required to maintain a cumulative GPA of at least 3.0 to remain in good academic standing and to be eligible to graduate. In the event the cumulative GPA falls below 3.0, the student will be placed on academic probation. Students have nine (9) credits to elevate the cumulative GPA to at least 3.0 or will be excluded from the program. Students earning grades of "D" or below will be excluded from the program.

Transfer Credit Hours

Students may request that up to, but no more than, six (6) graduate credits be applied toward the 45 credits required for the M.P.H. Transfer credit must also satisfy the same requirements as courses taught for masters training within the Jiann-Ping Hsu College of Public Health (e.g., minimum grade of "B"), be consistent with the student’s approved program of study, and have been received from a regionally accredited college or university. Thesis and dissertation credits cannot be transferred. The student must provide documentation in support of equivalence, such as a course syllabus, transcript, term paper, and/or instructor testimony. Equivalence is determined by the Division Director. Credit hour reductions do not influence the residency and enrollment requirements or comprehensive examination procedures.

Course Time Limit

All requirements for the M.P.H. must be completed within seven academic years from the date of the first enrollment for study following admission to the master’s program. For transfer students, the seven-year time limit commences with the semester during which transfer credit hour was earned.

Experiential Learning Opportunities

All M.P.H. students are required to complete a public health practicum and complete the Integrated Capstone Experience. The practicum permits the student to receive practical experience in a selected public health-related setting. The practicum requires 300 hours of service. The Integrated Capstone Experience requires students to integrate basic principles and practices of public health in a case-based format.

Structure

The organizational structure of the JPHCOPH was developed to facilitate the work of the faculty within the three major faculty roles at Georgia Southern University: Teaching, Research and Service as well as to assist the College in achieving its Vision, Mission, Goals, and Objectives.

Collaboration, facilitation and personal and collective responsibility are fundamental to the culture of JPHCOPH. Maintaining this culture is required for the effective functioning and advancement of our College.

The following is a listing of the components of the JPHCOPH organizational structure: Office of the Dean, two departments, three centers, and the Public Health Laboratory. The academic programs are embedded within the departmental structure. Associate Deans and Department Chairs are appointed by the Dean. College business is coordinated through standing and ad-hoc committees.

The faculty of the JPHCOPH consist of the professors, associate professors, assistant professors, instructors, lecturers, and adjunct appointments in the five departments. Responsibilities of the faculty within the College include teaching, scholarship, and service. In addition, faculty members may be assigned administrative duties by the Administrative Officers as deemed necessary for effective and efficient functioning of JPHCOPH. The faculty within each Department work in collaboration with the Administrative Officers within the JPHCOPH to advance the Vision, Mission, Values, Goals and Objectives.

Science and Mathematics

The College of Science and Mathematics contains the Departments of Biology, Chemistry & Biochemistry, Geology & Geography, Mathematical Science, and Physics, as well as the Department of Military Science. The College offers Master of Science programs in Biology, Mathematics, Applied Geography, and Applied Physical Science.

Vision
Within this decade, the College of Science and Mathematics will be recognized as a national leader in the development of innovative curricula and for its dedicated faculty who integrate distinguished scholarship with superior undergraduate and graduate education.

Mission
The College of Science and Mathematics strives for excellence and innovation in undergraduate and graduate research, teaching practices, and service to our community. With an emphasis on high-impact educational practices, our highly-respected faculty foster learning in the classroom and beyond by promoting student engagement and offering cutting-edge research opportunities to students. Our degree programs prepare students to apply scientific discoveries which inform education, health, natural resource protection, and economic development. By combining state-of-the-art research labs and teaching spaces with numerous regional, national, and global collaborations, the College of Science and Mathematics is a leader in producing graduates to meet tomorrow's challenges.

Advisement
Graduate students should meet with their research advisor or graduate program director for academic advisement each semester. While advisors provide information and guidance, final responsibility for completion of degree requirements rests with the student. Students may contact the Program Director for their Degree if they have questions about advising.

Biology M.S. (Non-Thesis)

Degree Requirements: 36 Credit Hours

Admission

Students are selected for the Master of Science in Biology degree program on a competitive basis. Meeting minimum requirements does not guarantee admission. Applications are usually evaluated during the eighth week of the semester prior to the semester of admission. Applications for graduate assistantships must be received by March 1 to receive full consideration for fall. Assistantships are awarded for a maximum of five semesters and are reviewed each semester. Students must comply with the College of Graduate Studies degree completion time line for a master's degree. A student who has not matriculated for three or more consecutive semesters must reapply and meet all admission requirements in effect at the time of the new application for admission.

Admission Requirements

For unqualified admission to the College of Graduate Studies to pursue graduate work leading to the Master of Science degree in Biology, the applicant must have:

Regular

1. Completed requirements for the bachelor's degree in a college accredited by the proper regional accrediting associations.
2. A 2.80 (4.0 scale) cumulative grade point average or higher on all undergraduate work.
3. Scores of at least 153 on the verbal and 146 on the quantitative portions of the Graduate Record Examination (GRE) are typical for applicants to the Master's Program in Biology. For applicants who took the GRE General Test prior to August 2011 scores of at least 500 on the verbal and 550 on the quantitative portions are typical. Lower scores will sometimes be considered, but the applicant will need strong evidence of ability to perform satisfactory graduate work.
4. An undergraduate major or the equivalent appropriate to the proposed field of study. Adequately prepared applicants will typically have completed 24 credits of biology, 9 credits of mathematics, 16 credits of chemistry (including organic chemistry), and 8 credits of physics (or geological science).
5. Two letters of recommendation from individuals familiar with the applicant's potential to complete successful graduate work.
6. A statement of career goals to explain why you are interested in pursuing the degree and to explain your long-term career plans.
7. Applicants are strongly encouraged to identify a thesis adviser and submit the name to the graduate program director prior to the application deadline.
8. GRE subject test in Biology is not required, but is preferred.

Provisional

Students who fail to meet one of the requirements 2-4 above may be admitted provisionally. To be converted to regular status, provisional students must earn a "B" or higher in their first six (6) credits of Biology graduate courses, approved by the Biology Program Director, with at least three (3) credits at the 7000-level. Directed Individual Study (BIOL 7890) or Biological Problems (BIOL 7893) cannot be taken for these six (6) credits. Students on provisional status may not hold a graduate assistantship.

Non-Degree

Non-degree students are accepted on an individual basis as space is available.
Thesis and Non-Thesis options are possible for the M.S. degree in Biology.

Program of Study (Non-Thesis Option)

The graduate student and the graduate committee shall jointly develop a Program of Study that includes 36 credits in graduate course work including the required courses listed below. Either faculty or the graduate program director may advise non-thesis students.

Non-Thesis Option, 36 Credit Hours

<table>
<thead>

Note: "Non-Thesis" must be part of the course title

Elective courses at 5000G level or above 17

Total Credit Hours 36

Note that a limit of six (6) credits of any contamination of Directed Individual Study (BIOL 7890) and Biological Problems (BIOL 7893) and a limit of four (4) credits of "Graduate Seminar (BIOL 7610) can be used toward the 36 credit degree requirement. Research (BIOL 7895) and Thesis (BIOL 7999) cannot be used toward the Non-Thesis option.

Other Program Requirements (Non-Thesis Option)

1. To continue with the second year, each candidate for the Master of Science Non-Thesis degree in Biology in conjunction with the Graduate Committee must complete a Program of Study and identify an advisor who will oversee the Directed Individual Study (BIOL 7890) and/or Biological Problems (BIOL 7893), with an extensive scientific writing component requirement. Note: "Non-Thesis" must be part of the course title.

2. Each candidate must receive Graduate Committee and Director of the Biology Graduate Program approval to take courses that do not apply to the MS Degree.

3. Students entering the Master of Science Non-Thesis option in Biology can switch to the Thesis option within their first two academic semesters assuming that they are in good standing. They can apply to switch programs by completing the Department of Biology Change of Degree Plan checklist and completing steps 4a. through 4e. under the “Other Program Requirements” of the Thesis option by the end of the second semester. After the second academic semester, students may switch to the Thesis option by completing the required change of option paperwork and completing steps 4a. through 4e. under the “Other Program Requirements” of the Thesis option in the term the change of option is requested. If the change of option is approved, all guidelines for the Thesis option apply.

Biology M.S. (Thesis)

Degree Requirements: 30 Credit Hours

Admission

Students are selected for the Master of Science in Biology degree program on a competitive basis. Meeting minimum requirements does not guarantee admission. Applications are usually evaluated during the eighth week of the semester prior to the semester of admission. Applications for graduate assistantships must be received by March 1 to receive full consideration for fall. Assistantships are awarded for a maximum of five semesters and are reviewed each semester. Students must comply with the College of Graduate Studies degree completion time line for the Master’s degree. A student who has not matriculated for three or more consecutive semesters must re-apply and meet all admission requirements in effect at the time of the new application for admission.

Admission Requirements

For unqualified admission to the College of Graduate Studies to pursue graduate work leading to the Master of Science degree in Biology, the applicant must have:

Regular

1. Completed requirements for the bachelor’s degree in a college accredited by the proper regional accrediting associations.
2. A 2.80 (4.0 scale) cumulative grade point average or higher on all undergraduate work.
3. Scores of at least 153 on the verbal and 146 on the quantitative portions of the Graduate Record Examination (GRE) are typical for applicants to the Master’s Program in Biology. For applicants who took the GRE General Test prior to August 2011 scores of at least 500 on the verbal and 550 on the quantitative portions are typical. Lower scores will sometimes be considered, but the applicant will need strong evidence of ability to perform satisfactory graduate work.
4. An undergraduate major or the equivalent appropriate to the proposed field of study. Adequately prepared applicants will typically have completed 24 credits of biology, 9 credits of mathematics, 16 credits of chemistry (including organic chemistry), and 8 credits of physics (or geological science).
5. Two letters of recommendation from individuals familiar with the applicant’s potential to complete successful graduate work.
6. A statement of career goals to explain why you are interested in pursuing the degree and to explain your long term career plans.
7. Applicants are strongly encouraged to identify a thesis adviser and submit the name to the graduate program director prior to the application deadline.
8. GRE subject test in Biology is not required, but is preferred.

Provisional

Students who fail to meet one of the requirements 2-4 above may be admitted provisionally. To be converted to regular status, provisional students must earn a “B” or higher in their first six (6) credits of Biology graduate courses, approved by the Biology Program Director, with at least three (3) credits at the 7000-level. Directed Individual Study (BIOL 7890) or Biological Problems (BIOL 7893) cannot be taken for these six (6) credits. Students on provisional status may not hold a graduate assistantship.

Non-Degree

Non-degree students are accepted on an individual basis as space is available.
Thesis and Non-Thesis options are possible for the M.S. degree in Biology.

**Program of Study (Thesis Option)**

The graduate student and their graduate committee shall jointly develop a Program of Study that includes 24 credits in graduate course work including the required courses listed below, plus three (3) credits of research and three (3) credits of thesis.

**Thesis Option, 30 Credit Hours**

<table>

</tbody>
</table>

Note that a limit of six (6) credits of any combination of Directed Individual Study (BIOL 7890) and Biological Problems (BIOL 7893), and a limit of four (4) credits of Graduate Seminar (BIOL 7610) can be used toward the 30 credit degree requirement.

**Other Program Requirements (Thesis Option)**

1. Each candidate for the Master of Science Thesis option in Biology must have accomplished the following by the end of their second term to earn or maintain their eligibility for a graduate assistantship:
   a. Identified an adviser within the Biology Department
   b. Formed a Steering Committee of the adviser and two other Biology Department Faculty
   c. Written a thesis proposal and submitted any necessary IACUC / IBC / IRB applications
   d. Met with the Steering Committee formally, submitted and received approval for their thesis proposal (i.e., prospectus) and Program of Study with appropriate signatures.

2. Each candidate must receive approval from his/her Steering Committee and the Director of the Biology Graduate Program to take courses that do not apply to the MS Thesis Degree in Biology, or are taught outside of the Department of Biology.

3. Each candidate for the Master of Science degree in Biology must complete a thesis on a subject approved by his/her steering committee:
   a. This thesis must be presented at a public exit seminar and, within 2 weeks following the seminar, defended before the thesis committee.
   b. The thesis defense is a comprehensive examination that may include questions on the thesis, and subject matter related to the thesis, and course work.
   c. In addition to the thesis, the student must provide the adviser with all forms of the data that were collected, including electronic files, and a written document detailing the contents of the data files (or other forms).
   d. The degree is conferred at the end of the semester, after the student has passed the thesis defense and the final written version of the thesis has been approved by the committee.

4. Students entering the Master of Science Thesis option in Biology can apply to switch to the Non-Thesis option within their first two academic semesters by completing the appropriate change of degree paperwork assuming that they are in good standing (See the Graduate Program Director for the required paperwork). After their second academic semester, applications to switch to the Non-Thesis degree can occur, but a student cannot transfer more than twelve (12) credits of coursework from the thesis option to the non-thesis option. Additional criteria required to switch programs after the second semester are:
   a. Email the Biology Graduate Committee via the program director a request to switch programs. This email should include an explanation and justification for the request. The request must receive approval for the switch from the Biology Graduate Committee. Approval to switch degree programs is not guaranteed.
   b. Complete the Department of Biology Change of Degree Plan checklist, including all signatures.
   c. If any thesis-related and/or grant-related research has been undertaken, providing the faculty mentor with the following (all in hard copy and electronic format whenever possible and relevant): a written one page document detailing the objectives of the initiated research
      • A complete description of the methods used to collect data
      • All forms of data that were collected
      • A written document detailing the contents of all the data files (or other forms)
   d. If data were gathered to meet the obligation of a grant (completely or in part), then the student must waive all rights and ownership over the data and any publications forthcoming from the use of the data.
   e. With the College of Graduate Studies file
      • a new Program of Study form, and
      • a Change of Major or Study Concentration form.

Note the Directed Individual Study (BIOL 7890)/Biological Problems (BIOL 7893) course, and course title, requirements described under the non-thesis program.

**Department of Chemistry and Biochemistry**

The Department of Chemistry and Biochemistry offers a well-balanced program for the education of its students. To prepare students for their professional careers, the Department is committed to providing quality teaching and research experiences emphasizing critical and independent thought. The curriculum provides strong innovative instruction in the theory and practice of the chemical sciences. The programs are designed to introduce students to modern laboratory methods and technology using state-of-the-art scientific equipment. The faculty is committed to providing an environment that addresses the individual needs of each student and encourages them to develop their potential through lifelong learning and to be responsible members of their profession and community.

Applied Physical Science
M.S.A.P.S (Professional Science Master)

Degree Requirements: 36 Credit Hours

Admission
Students are selected for the Master of Science in Applied Physical Science degree program on a competitive basis. Meeting minimum requirements does not guarantee admission.

Admission Requirements

Regular
1. B.S. or B.A. degree in chemistry, physics, or related degree from an appropriate regionally accredited college or university, or an equivalent degree from a recognized foreign college or university. Official TOEFL scores (not more than two years old) required for international students.
2. An overall minimum cumulative GPA of 2.75 on a 4.0 scale or at the discretion of the graduate admission committee.
3. Official GRE Report showing competitive subtest scores by the start of the first semester of graduate courses.
4. Two Letters of Recommendation from individuals familiar with the applicant’s potential to complete successful graduate work.
5. Applicant’s Statement of Purpose & Research Experience, which must address a. the student’s preparation and research experiences for graduate study, b. the student’s goals for the graduate program, potential concentration area, and possible advisor (for thesis option), and c. the student’s professional goals following completion of the M.S.A.P.S. program
6. The applicant must have the appropriate undergraduate preparation for the area of concentration. This requires meeting the general M.S.A.P.S. requirements and the prerequisites listed for the particular concentration area.

Provisional
Applicants who do not meet the admission requirements may be admitted provisionally. To be converted to regular status, provisional students must take any appropriate undergraduate courses as recommended by the graduate committee and must earn a “B” or higher in their first nine (9) credits of coursework approved by the graduate director.

Non-Degree
Non-degree students are accepted on an individual basis as space is available. Applicants must have a minimum cumulative GPA of 2.75 on a 4.0 scale and submit a Statement of Purpose and Research Experience.

Grades
Students are required to maintain a cumulative GPA of at least 3.0 to remain in good academic standing and to be eligible to graduate. In the event the cumulative GPA falls below 3.0, the student will be placed on academic probation. Students have nine (9) credits to elevate the cumulative GPA to at least 3.0 or will be excluded from the program. Students earning grades of “F” will also be excluded from the program.

Program Concentrations
The Master of Science in Applied Physical Science degree program provides concentrations in Environmental Science, Pharmaceutical Science, or Materials and Coatings Science.

A maximum of twelve (12) credits at the 5000 level are allowed for the Master of Science in Applied Physical Science degree.

### Thesis

Each Candidate for the Master of Science in Applied Physical Science degree, thesis option, must complete a thesis on a subject approved by the graduate thesis committee. The major professor supervises the research, directs the writing of the thesis, and approves the thesis in its final form. Prior to the final approval, the thesis is read by the thesis committee. One member, termed the second reader, has the responsibility for an intensive and rigorous criticism of the thesis, and a third member of the thesis committee has the responsibility of an "editorial reader." Both second and third readers must report all comments to the major professor. The thesis must be defended in an oral examination before the graduate committee prior to final approval and sign-off.

The style and format for the completed thesis shall follow that prescribed by the Director for the Master of Science in Applied Physical Science degree. Procedural steps in the preparation of the thesis are as follows:

- The prospectus for the thesis shall be submitted to the major professor and thesis committee for approval.
- The thesis must be electronically submitted to the ETD site for format check by the ETD format check submission deadline as stated in the University Calendar.
- The final corrected thesis must be electronically submitted to the ETD site by the ETD format check submission deadline as stated in the University Calendar. The final document must be electronically approved by the Thesis Committee.

### Department of Geology and Geography

The Department of Geology and Geography offers a balance of teaching, research, and service to the region served by the University, and beyond. Areas of focus among geology faculty include igneous and metamorphic petrology, paleontology, sedimentology, structural geology,
hydrogeology, geochemistry, coastal geology, environmental geology, and natural history of the Coastal Plain. Geography faculty interests include geomorphology, geospatial analysis, economic geography, health geography, cultural geography, urban geography, coastal wetlands, ecohydrology, hazards, and biogeography. Both programs emphasize the application of Geographic Information Science.

Programs

Master's

• Applied Geography M.S. (Non-Thesis) (p. 465)
• Applied Geography M.S. (Thesis) (p. 466)

Doctoral

No results were found.

Certificates

No results were found.

No results were found.

Applied Geography M.S. (Non-Thesis)

Degree Requirements: 36 Credit Hours (Non-Thesis Option)

Admission

Students are selected for the Master of Science in Applied Geography degree program on a competitive basis. Meeting minimum requirements does not guarantee admission. Applications for graduate assistantships must be received by April 1 to receive full consideration for fall. Assistantships are awarded for a maximum of five semesters and are reviewed each semester. Students must comply with the College of Graduate Studies degree completion timeline for a master's degree. A student who has not matriculated for three or more consecutive semesters must re-apply and meet all admission requirements in effect at the time of the new application for admission.

Admission Requirements

For potential admission to the College of Graduate Studies to pursue graduate work leading to the Master of Science degree in Applied Geography, the applicant:

1. Must have completed requirements for the bachelors degree in a college accredited by the proper regional accrediting associations.
2. Must complete the Graduate Record Exam (GRE) (scores must be sent to the College of Graduate Studies).
3. Must complete the TOEFL Exam with scores sent to the College of Graduate Studies (international students only).
4. Must submit a statement of purpose explaining the reasons for pursuing a Master of Science in Applied Geography.
5. Must submit three letters of recommendation.
6. Typically, will have a minimum 2.75 cumulative grade point average (on a 4.0 scale) for all undergraduate coursework.

Non-Degree

Non-degree students are accepted on an individual basis as space is available.

Thesis and Non-Thesis options are possible for the M.S. degree in Applied Geography.

Program of Study (Non-Thesis Option)

Non-Thesis Option, 36 Credit Hours

The graduate student and the program director shall jointly develop a program of study that includes 36 credits in graduate coursework including the required courses below. Note that Thesis (GEOG 7999) cannot be used toward the Non-Thesis Option.

Applied Geography M.S. (Thesis)

Degree Requirements: 36 Credit Hours (Thesis Option)

Admission

Students are selected for the Master of Science in Applied Geography degree program on a competitive basis. Meeting minimum requirements does not guarantee admission. Applications for graduate assistantships must be received by April 1 to receive full consideration for fall. Assistantships are awarded for a maximum of five semesters and are reviewed each semester. Students must comply with the College of Graduate Studies degree completion timeline for a master's degree. A student who has not matriculated for three or more consecutive semesters must re-apply and meet all admission requirements in effect at the time of the new application for admission.

Admission Requirements

For potential admission to the College of Graduate Studies to pursue graduate work leading to the Master of Science degree in Applied Geography, the applicant:

1. Must have completed requirements for the bachelor's degree in a college accredited by the proper regional accrediting associations.
2. Must complete the Graduate Record Exam (GRE) (scores must be sent to the College of Graduate Studies).
3. Must complete the TOEFL Exam with scores sent to the College of Graduate Studies (international students only).
4. Must submit a statement of purpose explaining the reasons for pursuing a Master of Science in Applied Geography.
5. Must submit three letters of recommendation.
6. Typically, will have a minimum 2.75 cumulative grade point average (on a 4.0 scale) for all undergraduate coursework.

Non-Degree

Non-degree students are accepted on an individual basis as space is available. Thesis and Non-Thesis options are possible for the M.S. degree in Applied Geography.

Program of Study (Thesis Option)

Thesis Option, 36 Credit Hours

The graduate student and the graduate committee shall jointly develop a Program of Study that includes 36 credits in graduate coursework including the required courses listed below. Either faculty or the graduate program director may advise non-thesis students.

Other Program Requirements (Thesis Option)

Each candidate for the Master of Science Thesis option in Applied Geography must have accomplished the following by the end of their second term to earn or maintain their eligibility for a graduate assistantship:

1. Identified an adviser within the Geography Program.
2. Formed a Steering Committee of the adviser and two other approved faculty.
3. Each candidate must receive approval from the Geography Graduate Director of the Applied Geography Graduate Program to take courses that are taught outside of the Geography Program and/or do not apply to the M.S. in Applied Geography degree.
4. Each candidate for the Master of Science Thesis Option in Applied Geography must complete a thesis on a subject approved by his/her steering committee.

- This thesis must be defended before the thesis committee.
- The thesis defense is a comprehensive examination that may include questions on the thesis, and subject matter related to the thesis, and course work.
- In addition to the thesis, the student must provide the adviser (if requested) with all forms of the data that were collected, including electronic files, and a written document detailing the contents of the data files (or other forms).

The degree is conferred at the end of the semester during which the student has passed the thesis defense and the final written version of the thesis has been approved by the committee.

Students entering the Master of Science Thesis option in Applied Geography can apply to switch to the Non-Thesis option within their first two academic semesters by completing the appropriate change of degree paperwork assuming that they are in good standing (See the Graduate Program Director for the required paperwork). After their second academic semester, applications to switch to the Non-Thesis degree can occur, but a student cannot transfer more than twelve (12) credits of coursework from the thesis option to the non-thesis option. Additional criteria required to switch programs after the second semester are: Email the Geography Department Chair.
Graduate Committee via the graduate program director a request to switch programs. This email should include an explanation and justification for the request. The request must receive approval for the switch from the Geography Graduate Director and Geology and Geography Department Chair.

Department of Mathematical Sciences

The Department of Mathematical Sciences offers programs of study for students interested in mathematics, mathematics education or statistics. The department is dedicated to providing students with excellent instruction that incorporates innovative instructional techniques and technologies, and with opportunities to participate with faculty in research. In their roles as teacher-scholars, the faculty maintains consistent and significant productivity, recognized at regional, national, and international levels, in basic research, applications, and pedagogy. The department is strengthened by the extensive service activities of the faculty on campus and in the community as well as through high-profile service to the profession. In addition, the department provides many areas for student involvement, including an active student organization and student competition teams.

Mathematical Sciences M.S. (Concentration in Applied Mathematics)

Degree Requirements: 36 Credit Hours

Admission Requirements

Regular

For regular admission to the College of Graduate Studies to pursue work leading to this degree, the applicant must have:

1. Completed requirements for the Bachelor's degree in a science, engineering, or mathematical discipline at a regionally accredited college or university.
2. Submitted scores from the Graduate Record Examinations (GRE) and Test of English as Foreign Language (TOEFL) (international students only) to the College of Graduate Studies. Conditional admission without the GRE is acceptable, provided it is completed within one calendar year of admission to the program.
3. Successfully completed courses in calculus, probability, and linear algebra.

Provisional

Applicants who do not meet admission requirements may be admitted provisionally but must take appropriate undergraduate courses before receiving regular admission. Admission of an applicant who is deemed marginal may require that an interview be conducted by a committee of graduate faculty members from the department.

Non-Degree

Non-degree students are accepted on an individual basis as space is available. Upon the advisor’s recommendation, up to a maximum of nine (9) credits earned as a non-degree student may be included in the program of study if a non-degree student is granted regular admission.

Program of Study

The graduate student and the graduate advisor shall develop a Program of Study that consists of 30 credits of graduate course work, including nine (9) credits of core courses, and 21 credits of elective courses. In addition, the Program of Study will include three (3) credits of Research and three (3) credits of Thesis in the area of concentration. Of the 36 required credits, at least 18 credits must be at the 7000 level. At most, 11 credits of any combination of Directed Study in Mathematics (MATH 7890), Research (MATH 7895) and Thesis (MATH 7999) will count towards the 36 credits required for the degree.

Department of Physics and Astronomy

The mission of the Department of Physics at Georgia Southern University is four-fold. First, to provide its majors with a strong, basic undergraduate physics/astronomy education that will serve them whether they pursue an advanced degree in physics, a professional career in medicine or dentistry, a career in industry or in science education. Second, to provide excellent instruction in introductory physics and astronomy to non-majors. Third, to conduct original research in physics and astronomy that is recognized at regional, national, and international levels. Fourth, to foster an interest in science in the community and the region.
The Institute for Coastal Plain Science (ICPS) is an interdepartmental organization that provides an identity to an area of exceptional research and teaching strength on campus. Members of the ICPS include faculty and students from several departments including biology, chemistry, geology and geography, civil engineering, and environmental health sciences. It also has three full-time scientists and two support personnel. The mission of the ICPS is to promote, in coordination with public and private partnerships, interdisciplinary research and education directed toward understanding the physical and biological resources occurring below the Fall Line and their sustainable use and management. Membership in the ICPS is open to any researchers with a focus on this geographic region. The ICPS also assists with management of the several natural history collections on campus and is the primary home of the U.S. National Tick Collection.

Department of Mathematical Sciences
The Department of Mathematical Sciences offers programs of study for students interested in mathematics, mathematics education or statistics. The department is dedicated to providing students with excellent instruction that incorporates innovative instructional techniques and technologies. In their roles as teacher-scholars, the faculty maintains consistent and significant productivity, recognized at regional, national, and international levels, in basic research, applications, and pedagogy. The department is strengthened by the extensive service activities of the faculty on campus and in the community as well as through high-profile service to the profession. In addition, the department provides many areas for student involvement, including an active student organization and student competition teams.

Department of Military Science
The Georgia Southern University Military Science Department is charged with managing the Army’s Reserve Officer Training Corps (ROTC) program on campus. Army ROTC provides college-trained officers for the U.S. Army, the Army National Guard, and the U.S. Army Reserve. It does this through a combination of college courses in military science and summer training sessions. The Professor of Military Science at Georgia Southern also administers the programs at Armstrong Atlantic State University, Savannah State University and Savannah College of Art and Design.

Department of Physics
The mission of the Department of Physics at Georgia Southern University is four-fold. First, to provide its majors with a strong, basic undergraduate physics/astronomy education that will serve them whether they pursue an advanced degree in physics, a professional career in medicine or dentistry, a career in industry or in science education. Second, to provide excellent instruction in introductory physics and astronomy to non-majors. Third, to conduct original research in physics and astronomy that is recognized at regional, national, and international levels. Fourth, to foster an interest in science in the community and the region.

James H. Oliver, Jr., Institute for Coastal Plain Science
The Institute for Coastal Plain Science (ICPS) is an interdepartmental organization that provides an identity to an area of exceptional research and teaching strength on campus. Members of the ICPS include faculty and students from several departments including biology, chemistry, geology and geography, civil engineering, and environmental health sciences. It also has three full-time scientists and two support personnel.
Admissions and Aid

The College of Graduate Studies invites applications from qualified applicants from all cultural, racial, religious and ethnic groups. Admissions standards are designed to identify students whose academic backgrounds indicate they are capable of successfully completing graduate study at Georgia Southern University. (See Equal Opportunity Policy (p. 840) statement)

Applications for admission may be submitted online at http://cogs.georgiasouthern.edu/admission. Applications must be submitted prior to the application deadline.

Normally, all applicants who have applied by the application deadline for a specific semester will be considered for admission. However, the University reserves the right to stop accepting applications at any time. Therefore, students are encouraged to apply well in advance of the application deadline. Not all graduate programs have the same application deadlines and some programs do not admit students every semester.

The College of Graduate Studies reserves the right to require additional indicators demonstrating the applicant's ability to successfully complete graduate study prior to rendering an admission decision.

• Admission Requirements (p. 471)
  • Admission by Appeal (p. 471)
  • Graduate Admission Classification (p. 471)
  • Graduate Transient Admission (p. 472)
  • Special Admission for Students Age 62 and Older (p. 472)
  • Graduate Assistantships (p. 473)
  • Graduate Full-Time Status Exception (p. 475)
  • How to Apply (p. 475)
  • International Students (p. 477)
  • Other Outside Sources of Financial Aid (p. 478)
  • Transfer Credit (p. 478)

Admission Requirements

In general, all applicants must hold at least a baccalaureate degree or the equivalent from a nationally accredited U.S. college or university or a degree from a non-U.S. institution of higher education that is judged equivalent to a U.S. baccalaureate degree by the College of Graduate Studies (COGS). International applicants who have graduated from a college or university that is a member of the Bologna Project will be considered for admission to a graduate degree program.

Any applicant who seeks admission to a graduate degree program is said to be applying as a graduate degree-seeking student. All other graduate applicants are said to be applying as graduate non-degree-seeking students.

Admission is granted for a specific semester and is validated by registration for that semester. Applicants seeking admission to a subsequent semester may request a one-time deferral from the Office of Graduate Admissions as long as the request occurs before the start of the original semester of matriculation.

Applicants must be admitted to COGS before they are eligible to register for classes. Only students formally admitted to COGS are eligible to enroll in graduate courses (courses numbered 5000G, 6000, 7000, 8000 and 9000). Official admission acceptance is conveyed to the applicant in a formal electronic letter issued by the College of Graduate Studies.

Minimum Admission Requirements for a Graduate Degree or Certificate Program

Achievement of the minimum admission requirements of the College of Graduate Studies does not guarantee admission to a graduate degree program. A student who is admitted to one graduate program is not guaranteed admission to any other graduate degree program at any time in the future.

Admission to a graduate program is competitive and qualified applicants may be denied admission depending on a wide variety of programmatic variables. To ensure the best possible opportunity for admission, each applicant is strongly encouraged to review the specific admission requirements and application procedures listed in this catalog for the specific program of interest. Typically, review of an application cannot begin until all application documents are received, including those that are specific to a program. Applicants can check the status of their application and the receipt of application documents by visiting the website (http://cogs.georgiasouthern.edu/admission) of Graduate Admissions.

Graduate Admission Test Score Requirements

Depending on the graduate program for which the student is applying, one of the following standardized admission tests will be required: GMAT, GRE, MAT or GACE. Standardized admission tests are listed among each program's itemized list of requirements for admission. To determine which admission test is required for each program, review the admission requirements on the program's webpage. Test scores must be sent from the testing agency directly to Graduate Admissions. Further information on test dates and fees may be obtained from:

Office of Testing Services (http://studentsupport.georgiasouthern.edu/asc/testing)
Post Office Box 8132
Georgia Southern University
Statesboro, GA 30460-8067
(912) 478-5415

Degree Admission Based Upon Exceptional Qualifications

Applicants with exceptional experience and/or academic qualifications may be granted degree admission to the College of Graduate Studies without the submission of admission test scores. Admission approval may be granted by the Director of Graduate Studies following a review of the recommendation by the respective Graduate Program Director and Department Chair.

Admission by Appeal

Applicants who believe they were unfairly or arbitrarily denied admission may appeal the admission decision to the College of Graduate Studies. The student will be required to provide additional information in support of the appeal. The request for an appeal must be submitted in writing to Graduate Admissions. The Director of Graduate Studies will make the final decision on an appeal.

Graduate Admission Classification

A prospective student who plans to take additional course work beyond the baccalaureate degree must apply to the COGS and be admitted through either Degree Admission or Non-Degree Admission.
Degree Admission

Students who are admitted to the COGS with the expressed intention of following a program leading to a graduate degree are classified as degree-seeking students. When admitted as a degree-seeking student, the applicant will be placed in one of the following categories:

1. Regular - Meets all requirements for unqualified admission and has been recommended by the college, department or program in which he/she proposes to study, and approved by the COGS.

2. Provisional - Does not satisfy the full admission requirements. Applicants granted Provisional admission are required to earn grades of "B" or better in their first nine (9) hours of graduate credit taken at Georgia Southern University under this admission category. Failure to satisfy the conditions of provisional admission will result in exclusion from the degree program. A student admitted in this category will be reclassified to Regular admission when the conditions have been met. A Provisional student may enroll in graduate courses and such courses may be counted in a degree program when the student has been reclassified as a Regular student. Only credit earned in graduate courses at Georgia Southern University may be used to satisfy Provisional admission requirements. A student excluded from a graduate degree program for failure to meet the conditions of provisional admission may not be readmitted to the COGS under non-degree admission. There is no provisional admission to Doctoral programs. Applicants with Provisional admission are not eligible for graduate assistantship positions.

Non-Degree Admission

An applicant may be admitted to the COGS as a non-degree student to earn credit in graduate courses without working toward a degree. Students who are admitted in a non-degree category may later apply to a degree program. Upon the advisor's recommendation, non-degree graduate courses may be included in the program of study should the student gain reclassification as a Regular student. A student may be admitted to the COGS in one of the following non-degree admission categories:

1. Limited - A student whose file is incomplete because all required application materials have not been received in the Office of Graduate Admissions. Enrollment in the Non-Degree Limited category is limited to a maximum of nine (9) credit hours in graduate courses in any seven contiguous years. A student may count a limited number of credit hours toward graduate degree program requirements if recommended by the degree Graduate Program Director and approved by the Director of Graduate Studies. Students enrolled under this admission category are not eligible for graduate assistant positions nor for financial aid.

2. Enrichment - A student who holds an undergraduate or graduate degree and desires to take courses for personal or professional improvement. Enrollment in the Non-degree Enrichment category is limited to 18 credit hours unless otherwise stated by the department. Certain Departments may limit the number of credit hours earned under this non-degree admission category that may count toward graduate degree requirements to less than 18 credit hours. Students enrolled under this admission category are not eligible for graduate assistant positions nor for financial aid.

3. Certificate - A student who holds an undergraduate or graduate degree can pursue a graduate certificate program through the Non-degree Certificate admission. Enrollment in the Non-Degree Certificate category is limited to the number of credit hours required for the certificate program, typically 12-24 credit hours, in any seven continuous years unless additional credit hours are approved by the College of Graduate Studies. A student may count up to 18 credit hours earned as part of the certificate program toward graduate degree program requirements if recommended by the degree Graduate Program Director and approved by the Director of Graduate Studies. Students enrolled under this admission category are not eligible for graduate assistant positions nor for financial aid.

Graduate Transient Admission

Students who are currently enrolled in a graduate program at another university may take courses at Georgia Southern University as a transient student. To be admitted as a transient student, the student must submit an application (selecting "Graduate Transient" status), and a certificate of good standing from the appropriate official from the home institution or a current transcript. A student is admitted under this classification for one semester only and must be readmitted under this classification each subsequent semester in transient status.

Special Admission for Students Age 62 and Older

Georgia citizens who are 62 years of age or older have the option, as granted by Amendment 23 of the Georgia Constitution, of enrolling in the University without the payment of fees subject to the following conditions:

- Must be a legal resident of Georgia;
- Must be 62 years of age or older and present proof of age at the time of registration;
- Must enroll as a regular student to audit or take courses offered for resident credit; and
- Must pay for supplies, laboratory or fees.

An eligible student may petition for the Senior Citizen Fee Waiver by visiting the website below (click on Senior Citizen Wavier), printing the form, and providing the completed petition and documentation to the Office of the Registrar:

http://em.georgiasouthern.edu/registrar/students/tuitionclassificationfeewaivers/

Individuals who do not qualify as mature students (see below) must also satisfy the following:

- Must meet all Georgia Southern University and University System of Georgia graduate admission requirements;
- The applicant must submit all college or university transcripts;
• If a course of study is pursued to degree, all institutional and system degree requirements must be met.

Graduate Assistantships

Graduate assistantships are essential to the success of the graduate programs at Georgia Southern University. The assistantship not only enables the student to complete the program of study in a timely fashion, but also affords the opportunity to be involved in full-time study at the University. Graduate assistants enliven the academic environment of the university by adding to the community of scholars within the institution. A graduate assistant is a graduate student who is appointed to a Teaching Assistantship, Research Assistantship, Graduate Assistantship, or Doctoral Fellowship and receives a stipend and a tuition waiver.

Definition

A graduate assistant is a graduate student employee appointed to the position title of Teaching Assistant (TA1 or TA2), Research Assistant (RA) or Graduate Assistant (GA). These are defined according to the emphasis placed on the student employee’s teaching, research, or general experience. Appointments and initial stipend are determined on the basis of academic background, prior experience, scholarship, and general potential. All graduate assistants receive a tuition waiver of the standard in-state and out-of-state tuition but must pay a reduced matriculation fee of $25 per semester along with all assessed university fees. Some programs are approved to charge a premium tuition rate that is not covered by the standard tuition waiver.

Financial Aid and Veteran Benefits

To qualify as a full-time graduate student for financial aid and veteran benefits, a student must be enrolled in the required number of credit hours set by regulations governing financial aid or veteran benefits. Students should contact the Financial Aid Office or the Office of Veterans Affairs in the Office of the Registrar for information about minimum enrollment requirements.

Work Study

Graduate students may qualify for work-study. Applicants must submit the application for work-study to the Office of Financial Aid.

Graduate Teaching Assistant (TA1)

A Graduate Teaching Assistant (TA1) is a graduate student who works under the direct supervision of regular faculty members and may be assigned only to duties related to instruction. A TA1 may not have primary responsibility for a course or serve as the instructor of record, but may assist in the instructional process by serving as a discussion leader in breakout sections, grade papers, proctor exams, or assist the primary instructor of record in other ways. The department chair and graduate program director shall determine that the credentials of a student assigned as TA1 qualify the individual to assist in instruction activities.

Graduate Teaching Assistant (TA2)

A Graduate Teaching Assistant (TA2) is an advanced graduate student who is given primary responsibility for teaching courses and may have autonomy for assigning grades and providing laboratory instruction/setup as part of a regularly schedule course. A TA2 must be under the supervision of a Georgia Southern faculty member that teaches in the discipline, but the student may be listed as instructor of record. A TA2 must have completed 18 credit hours of graduate course credit hour in the discipline and must have completed training, which consists of centralized training offered by the Center for Teaching Excellence (CTE) or decentralized training within the academic program. Decentralized training must have prior approval from COGS, CTE and the Office of the Provost. TA2s may also be required to participate in additional in-service training within their College or Department, as determined by their Program. The department chair and graduate program director shall determine that the credentials of a student assigned as TA2 qualify the individual to undertake the assignment of instruction and must submit all required documentation to the Office of the Provost.

Graduate Research Assistant (RA)

Graduate Research Assistant (RA) is a graduate student whose responsibilities are other than teaching. An RA position is one that allows a graduate student to conduct research of a scholarly nature, normally under faculty supervision. Services provided by a research assistant may include, but is not limited to, the production and analysis of data, the development of theoretical analyses and models, the production or publication of scholarly journals and research reports to develop his or her own research agenda and for the benefit of the University, faculty or academic staff supervisor, or granting agency.

Graduate Assistant (GA)

A Graduate Assistant (GA) is a graduate student who provides general administrative support to academic and administrative units within the University. The assigned duties to the GA should be relevant to the graduate program and the professional goals of the student whenever possible.

Graduate assistants, regardless of their functional classification as TAs, RAs or GAs, are to work under the supervision of faculty who are experienced and knowledgeable in their field. Supervision of graduate assistants includes providing appropriate training prior to and during the assistants’ assumption of responsibility for assigned tasks. Academic and non-academic units of the University may employ graduate assistants. Funding for the graduate assistantship may come from allocated funds (provided to the unit from the College of Graduate Studies for the purpose of assistantship support) or from unallocated funds (provided separately by the department or other budgetary unit).

Doctoral Fellowships (Assistantship)

A limited number of Doctoral Graduate Assistantships may be awarded by the respective colleges/department that house doctoral programs.Doctoral Graduate Assistantships are awarded on a competitive basis by the college/department and may include an annual appointment as determined by the college.

Eligibility

Assistantships may only be awarded to graduate students who have unqualified admission to the College of Graduate Studies under the “Regular” (not Provisional) classification to a degree seeking program. Qualifications to hold a Graduate assistantship include:

• Admission to COGS under the “Regular” degree admission classification,
• Enrolled full-time as defined by the program, and
• A cumulative GSU graduate GPA of at least 3.0 (3.25 for Ed.D. Curriculum Studies or 3.50 for Ed.D. Educational Leadership students) in all coursework.

Students enrolled in certificate or endorsement only programs are not eligible to hold an Assistantship.

ASSISTANTSHIPS FOR FULLY-ONLINE STUDENTS

At the discretion of the dean of the respective college, a limited number of assistantships may be provided to students enrolled in programs or classes that are delivered fully-online AND where the student will be
employed as a TA, RA or GA in the home college/department of the graduate program. In cases where the employing unit and the academic unit are NOT one and the same, the employing unit MUST seek prior approval from the dean of the academic unit in advance of offering the student an assistantship. To be eligible, fully-online students must be able to meet the same eligibility requirements and are required to fulfill the same on-campus work schedule as a traditional graduate assistant. As such, it is anticipated that fully-online graduate assistants will reside within a reasonable distance to the University.

Students who are enrolled in Georgia On My Line Programs (GOML) are not eligible to hold an Assistantship.

Credit Requirements

Graduate Assistants must be registered for a minimum of 9 credits of course work for Fall or Spring semester, within the program of study throughout the period of the assistantship. The only exceptions are:

- Master of Public Administration students must register for a minimum of 8 credits to be eligible.
- Master of Music students must register for a minimum of 7 credits to be eligible.
- Master of Science in Applied Economics students must register for a minimum of 6 credits to be eligible.
- Master of Science in Computer Science students must register for a minimum of 6 credits to be eligible.
- Doctor of Education, Educational Leadership students must register for a minimum of 6 credits to be eligible.
- Master of Science in Nursing students must register for a minimum of 5 credits to be eligible.
- Doctor of Nursing Practice students must register for a minimum of 5 credits to be eligible.

Graduate assistants may be approved to take less than the minimum required course load (as little as one hour) given that the graduate assistant is in the last semester of coursework, have completed the graduation application, and have a cleared DegreeWorks audit on file. This policy may only be applied once.

International Students working as Graduate Assistants must also have this reduced course load authorized by a DSO in the Office of International Programs & Services. The Authorized Reduced Course Load Form must be completed by the student’s advisor and submitted to IPS prior to the beginning of the final term of study.

Summer Assistantships

A student granted an assistantship during the summer semester must be enrolled during the summer to be eligible to hold an assistantship. Summer Term A or Term B require a minimum of 3 credit hours. Summer Long Term or Term A and B together require a minimum of 6 credit hours, except Master of Science and Nursing and Doctor of Nursing Practice which requires a minimum of 5 credit hours.

Graduate Assistantship Appointment

The head of the academic unit makes appointments of graduate assistants. The dean of the college in which the academic unit is located and the Director of Graduate Studies must approve appointments subsequently. The head of the academic unit offering the assistantship is responsible for making the offer of appointment in an official letter. At the time assistantship offers are accepted, the heads of the appointing units should provide recipients with a copy of any applicable departmental policies relating to graduate assistants.

All graduate assistants must be registered for classes prior to the first day of classes for each semester. A graduate assistant who withdraws or drops a course resulting in the registration total to fall below full-time will lose the assistantship, and the student will be required to pay full tuition and fees for the remaining number of enrolled credit hours. Graduate assistants are not permitted to enroll in courses for which they are assigned assistantship responsibilities and may require special permission to enroll in courses that are not part of their program of study.

Workload and Responsibilities

A normal workload for a full time graduate assistant is twenty (20) hours per week. Federal law generally limits the number of hours that international students can work on campus to twenty (20) hours per week in the fall and spring semesters. The Director of Graduate Studies may grant exceptions to this limitation. The standard starting date for a graduate assistant shall be one week before the first day of classes and the standard ending date shall be the last day of final exams. Students on assistantships may not otherwise be employed at Georgia Southern University.

Compensation

The stipend for a full time graduate assistantship is determined by the department/unit awarding the assistantship, with the minimum amount being determined by the College of Graduate Studies. A graduate student to whom an assistantship is awarded will receive a waiver of standard tuition (in- and out-of-state if student is classified as a non-resident). A graduate assistant is required to pay a $25 matriculation fee each semester of enrollment while holding an assistantship. Graduate assistants are responsible for paying all University Fees including the Institutional Fee, Health Insurance Premium, and the Technology Fee each semester.

To appoint a graduate assistant, the unit must have the necessary funds to cover the assistantship stipend and must meet the qualification to conduct the assistantship activities prescribed by the department.

Tuition Waivers on Sponsored Programs

If funding for an assistantship is derived from an external source (e.g. sponsored programs), a tuition waiver is not granted and either the student or the external agency is responsible for full tuition, including any fees and premium tuition.

In some cases, a tuition waiver for RAs may be provided, and in rare cases TAs, receiving full stipend supported from funding received by the Office of Research Services and Sponsored Programs. Graduate students supported by sponsored programs must meet and maintain enrollment and eligibility requirements and work only on tasks towards the sponsored program. If modifications to the sponsored program exclude the graduate assistant from working on the project, the principal investigator is responsible for issuing a termination notice for the position.

Graduate Assistant Health Insurance Requirement

All graduate students receiving a tuition waiver as a result of a graduate assistantship or doctoral fellowship are required to have health insurance that is provided through the University System of Georgia Board of Regents approved provider.

Graduate Assistant Appointment Duration

In most cases, assistantship appointments should be made for an academic or fiscal year so that employing units and assistants can plan effectively. In some instances, appointments may be made for one semester only. To be eligible for reappointment, the assistant must have maintained eligibility and must have received acceptable performance evaluations from their immediate supervisor.
Deadline
March 1 is the deadline for the receipt of graduate assistantship applications by the College of Graduate Studies to receive priority consideration for employment during the upcoming fall semester. A student’s acceptance of a graduate assistantship for the next academic year constitutes an agreement, which the College of Graduate Studies expects the student to honor. If the student accepts the offer and subsequently desires to withdraw, the student may submit, in writing, a resignation of the appointment within two weeks after accepting the offer. However, an acceptance given or left in force after this date prevents the student from accepting another offer without first obtaining a written release from the College of Graduate Studies.

Termination and Resignation
A graduate assistant will be ineligible to continue and/or will be terminated if any of the following conditions occur:

- Placed on academic probation.
- The cumulative graduate GPA falls below 3.0 (3.25 for Ed.D. Curriculum Studies students; 3.50 for Ed.D. Educational Leadership students).
- An “I” grade has not been cleared by the end of the next semester after which it was recorded. This includes summer.
- The graduate assistant does not meet the mandatory insurance policy.
- Full-time enrollment is not maintained.
- Assistantship responsibilities are not performed in a satisfactory manner.
- Loss of unit or department funding.

If a graduate assistantship is terminated or resigns, the student loses the assistantship tuition waiver and is assessed the full tuition and fee amount for the term.

All graduate assistants should receive prior written notice of termination, with a minimum expectation of two weeks’ notice. Failure to satisfactorily perform work assignments in particular needs to be documented in writing prior to the dismissal notification. Additionally, the University reserves the right to terminate a graduate assistant if, in the sole discretion of the Director of Graduate Studies, the circumstances of a particular situation warrant such action.

The College of Graduate Studies and the department/unit to which the student is assigned have the joint responsibility to ensure that appropriate procedures are followed before termination of the assistantship. A student choosing to resign or terminate employment must submit a letter of resignation to the Director of Graduate Studies through the Department/Division Chair of the employing unit.

Graduate Assistant Rights
Graduate assistants are granted rights as outlined in the American Association of University Professors’ Statement on Graduate Students. Graduate assistants must be notified in writing of all decisions that affect their status as temporary student employees. They will be given advanced notice of evaluation procedures and must receive notice of reappointment procedures in time to permit preparation of their assistantship applications. All graduate assistants, regardless of classification as RAs, TAs or GAs, have access to appeal and grievance procedures operative to the University. Appeals resulting from academic decisions are usually directed to the unit responsible for the decision. An unfavorable ruling may be appealed to successive levels in the University and ultimately to the Board of Regents of the University System of Georgia. Information on appeals of academic matters may be obtained from the College of Graduate Studies.

Complaints of discrimination based on race, color, religion, national origin, sex, age, handicap, or veteran’s status may be heard through the University’s Grievance Procedures. Under these procedures, a grievance panel will also hear complaints that allege deviation from official University policy.

Graduate Full-Time Status Exception
Requesting a Full-Time Status Exception pertains to higher contact hours for programs that are required to include a, practicum, clinical rotation or extended internship. Any program wishing to apply for an exception to the Full-Time Status criteria outlined in the Graduate Catalog must apply through the process outlined below. It is important to note the dates of the Enrollment Management Council (EMC) meetings, and the Graduate Curriculum Committee deadlines for catalog changes when drafting the Full-Time Status Exception proposal. The exception request will follow the curriculum process with the additional review from the Enrollment Management Council. Program faculty are invited to attend the Enrollment Management Council meeting if questions arise when the program proposal is reviewed.

Exception Approval Process
Department Curriculum Committee # College Curriculum Committee # Enrollment Management Council # Graduate Curriculum Committee

In regards to this Exception proposal, two questions will be added on the Program Change form available through Courseleaf. By answering ‘Yes’ to one of the questions, the proposal will be sent to EMC for review:
(1) Are program capacity limitations involved in the approval?
(2) If the program wishes to request a full-time status exception?

Full-Time Status Exception proposals must include:

- A justification for the exception (why is it necessary?)
- A degree map for the program that includes total credit hours and contact hours per semester
- If a higher number of contact hours is a part of the justification, an explanation for the need for these additional contact hours must be included (i.e. accreditation, licensure, or certification requirements)
- The number of students impacted by the proposed exception
- Impact analysis and accompanying mitigation strategies on the following:
  - Student progression and graduation
  - Student debt load
  - Graduate assistantship availability

Exception requests that primarily use the following justifications are more likely to be denied:

- Graduate assistants (requiring nine credit hours) being out of sync with a program cohort model based on six credit hours per semester
- Lowering the full time status requirement only in order for students to be eligible for federal financial aid with fewer credit hours
- Graduate programs degree maps intentionally structured where students are expected to take less than nine credit hours and are within normal contact hours (i.e. cohort model programs for working professionals)
- Graduate programs degree maps intentionally structured where students take fewer contact hours in the final semester, creating federal financial aid eligibility issues during that final semester.

How to Apply
The application for admission may be accessed from the COGS web site (http://cogs.georgiasouthern.edu/admission). Departments and schools in which graduate degree programs are offered set requirements to
complete an application. All application documents, including official test score reports, letters of recommendation and other required supporting documents, should be received in the Office of Graduate Admissions by the stated application dates for the application to receive admission review. All application documents must be received by the application deadline for the application to be considered. The applicant must submit a transcript from each college or university previously attended. A transcript is required even if the courses from one school appear on the transcript of another school. Official transcripts must be submitted by all applicants offered admission and are required for each college or university attended. All application documents become the property of Georgia Southern University and may not be forwarded to a third party or returned to the applicant. The applicant must indicate if he/she is applying for a graduate degree program, certificate program, non-degree or transient admission, and must indicate a specific graduate major area of study that is offered at Georgia Southern University.

Application documents are electronically available to the academic departments for their review and recommendation.

Application Deadlines - College of Graduate Studies

Application deadlines vary by program and are specific to a given semester to which each program admits applicants. Application deadlines are also subject to change. Therefore, applicants are encouraged to check the application deadline (http://cogs.georgiasouthern.edu/admission/GraduatePrograms/gradprograms.php) for the program in which they are interested. All items required for admission must be received by the published deadline. International applicants should apply significantly in advance of the deadline to allow time for the arrival of any required admission items via international mail. For those programs with rolling admission, in general, priority deadlines are specified below:

U.S. Citizens/Naturalized Citizens

Fall Semester
March 1 (Priority)
July 1 (Final Deadline)

Spring Semester
October 1 (Priority)
November 15 (Final Deadline)

Summer Semester
March 15 (Priority)
April 1 (Final Deadline)

International Students

Fall Semester
March 1 (Priority)
June 1 (Final Deadline)

Spring Semester
October 1 (Final Deadline)

Summer Semester
February 1 (Final Deadline)

Admission to the College of Graduate Studies is competitive. Applicants are encouraged to submit application materials by the Priority Deadline. Priority is for students seeking financial aid, scholarships, and assistantships. Applications received after the Final Deadline may be considered by the Program Directors on a case-by-case basis.

Graduate Application Process

Applicants are responsible for submitting all materials required for admission. These items include, but are not limited to, the following: application for admission, application-processing fee, transcripts, standardized exam scores, letters of recommendation, and any supplemental material required by the department and/or program. While certification of finances forms (international applicants only) may be submitted during the application process, the documents are forwarded directly to the Center for International Studies and are not used to determine academic admissibility. All application materials, unless otherwise specified, should be provided electronically at the time of submitting the on-line application for admission to the Office of Graduate Admissions. Only those application materials required by specific programs not available for electronic submission can be submitted in hard-copy format to the Office of Graduate Admissions or to the academic program. These items must be received prior to the deadline.

An applicant wishing to defer an application to a subsequent semester may submit a one-time request to the Office of Graduate Admissions, as long as the request occurs prior to the start of the original semester of matriculation. After the original semester of matriculation has begun, the applicant must submit a new application and application fee to be considered for admission to a future semester. Deferred applications are referred to the department for reconsideration and a new admissions recommendation.

The College of Graduate Studies will refuse admission to applicants whose files are incomplete after the beginning of the semester of expected matriculation and when the applicants have not requested deferrals to future semesters. The application and supporting documents become the property of the University and cannot be returned or forwarded elsewhere.

Domestic (U.S. Citizens and Resident Alien) Applicants

Must fulfill the following requirements.

- Submit a completed on-line Graduate Application for Admission Form.
- Pay the $50.00 non-refundable application fee (subject to change).
- Submit official transcripts from each college or university previously attended. Transcripts must be designated as official and sent directly from the institution(s) previously attended to the Office of Graduate Admissions. Transcripts marked “Issued to Student” will not be accepted as official. Applicants who have attended Georgia Southern University are not required to submit official Georgia Southern transcripts. Applicants who attended foreign institutions not regionally accredited by a US regional accrediting body are required to have transcripts evaluated by a member of the National Association of Credential Evaluations Services, Inc. (NACES).
- Provide official test scores as required for the selected program. Scores must be within the last five years (two years for the TOEFL/IETS and sent directly from the testing agency to the Office of Graduate Admissions.
- Submit the Certificate of Immunization Form. (Not required for applicants in fully on-line programs.) This form should be completed and sent directly to the Office of Health Services.
- Provide other documents as required by the department, college, or program. These may include letters of reference, personal statement, or letter of intent. See http://cogs.georgiasouthern.edu/ for information on program specific requirements.
- Applicants who are applying for a graduate assistantship must complete the Graduate Assistantship Application.
International Graduate Applicants

All international students admitted to the College of Graduate Studies must demonstrate the same level of achievement as U.S. students. They must have an outstanding undergraduate record, have the demonstrated ability to do graduate work, and give evidence of language proficiency sufficient for the pursuit of a graduate degree. International applicants must qualify for “Regular” admission and may not be granted “Provisional” admission. International applicants are not granted non-degree admission status unless holding an immigration status that permits non-degree admission. Questions about the qualifications of international students should be directed to the College of Graduate Studies.

International applicants for admission to the COGS must submit the following:

- Completed on-line Graduate Admission Form.
- $50.00 non-refundable application fee (subject to change).
- Certified copy of diploma and certified English translation of diploma. This must be sent directly from the institution(s) previously attended to the Office of Graduate Admissions.
- Certified original and English translations of transcripts. Transcripts designated as official must be sent directly from the institution in a sealed envelope to the Office of Graduate Admissions. Transcripts marked “issued to student” will not be accepted as official. Applicants who have attended Georgia Southern University are not required to submit official Georgia Southern transcripts. Applicants are required to have transcripts evaluated by a member of the National Association of Credential Evaluations Services, Inc. [NACES]).
- Official test scores as required for the selected program. Scores must be current, within the last five years, and sent directly from the testing agency to the Office of Graduate Admissions.
- Official TOEFL or IELTS scores not more than two years old.
- SEVIS Data Form. This form should be completed and sent directly to the Center for International Studies.
- Certified Bank Statement (not more than six [6] months old) confirming finances. (See page 1 of the SEVIS Data Form for specifications.) This statement should be completed and sent directly to the Center for International Studies.
- Other documents as required by the department, college, or program. These may include letters of reference, personal statement, or letter of intent. See http://cogs.georgiasouthern.edu for information on program specific requirements.
- Applicants who are applying for a graduate assistantship must complete the Graduate Assistantship Application.

International applicants admitted must submit the completed Certificate of Immunization Form to the Health Services Office to be eligible to register for classes.

Credentials evaluated by any U.S. agency that is a member of the National Association of Credential Evaluation Services, Inc. [NACES]) may be presented. The evaluation must be sent directly from the agency to the Office of Graduate Admissions. Three such agencies are:

International Students

Course Load - International Graduate Students

US immigration law requires international students on a student visa to participate in a full course of study which consists of nine (9) credit hours for most majors. In addition, at least six (6) of those credit hours must require physical presence in a classroom or other designated location. Failure to maintain full-time study will result in the loss of immigration status, and the student may be required to leave the United States. Questions regarding the effect of course load upon immigration status should be directed to immigration advisors in the Center for International Studies.

Financial Assistance - International Graduate Students

Graduate Assistantship - International students may apply for Graduate Assistantships.

International Diversity Scholarship - Georgia Southern University also offers a limited number of International Diversity Scholarships (Out-of-country tuition waivers) to exceptional international graduate students. The International Diversity Scholarship will waive the assessment of the non-resident (out-of-state) tuition but students will be assessed in-state tuition.

Visa Information - International Students

The University will issue an I-20 or DS-2019, whichever is appropriate, after the applicant has been fully admitted and all required financial documentation has been submitted. These documents permit the applicant to apply for the appropriate student visa from a U.S. embassy if outside the United States or transfer schools or apply for a change of status if within the United States. Note that immigration law restricts the time between completing a degree or practical/academic training and having a new I-20 or DS-2019 issued to 60 and 30 days respectively and classes must start within five months.

International Graduate Student Advisor

The Office of International Programs and Services at Georgia Southern has experienced and qualified advisors available to help international students with maintaining immigration status and becoming oriented to campus. Advisors are available for advice and support, and a full social and cultural program is available. To help students successfully adjust, international graduate students are required to attend orientation with the Office of International Programs and Services, which is usually scheduled the Friday before classes begin.

Graduate Student Health Insurance

All international students are required to have adequate student health insurance as determined by Georgia Southern University. A health insurance plan is available through the University. Charges for this insurance will be on the student’s invoice and collected with other
University fees. Insurance for families is available at a significantly higher cost. Students, who can prove that they have health insurance, equivalent to or better than the Georgia Southern University student insurance plan, may apply for a waiver of the University insurance. Students seeking a waiver must complete an insurance waiver form available from the Center for International Studies prior to arrival in the United States. Proof of health insurance is required before a student may register for classes.

**English Proficiency for International Students**

International applicants and U.S. Citizens whose native language is not English must demonstrate English proficiency. Prior to consideration for admission, international applicants whose native language is not English must take and post acceptable scores on the Test of English as a Foreign Language (TOEFL) ([http://www.ets.org/toefl](http://www.ets.org/toefl)) or the International English Language Testing System (IELTS) ([http://www.ielts.org](http://www.ielts.org)) unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. The TOEFL and IELTS examinations are administered at various times of the year and in many centers throughout the world.

A score of at least 75 (internet-based test, IBT) or 537 (paper-based test) on the TOEFL and 6.0 on the IELTS is normally required to be considered for regular admission to the College of Graduate Studies. The official TOEFL and the official IELTS scores may not be more than two years old. Those who do not meet the minimum proficiency standard may be recommended for enrollment in University English courses or for English courses offered by the English Language Program (ELP) on campus. Successful completion of Intensive English Programs (IEPs) at other English Language Program (ELP) providers will be considered on a case-by-case basis.

Certain graduate programs may require a higher TOEFL or IELTS exam score to be considered for admission.

**Other Outside Sources of Financial Aid**

Many foundations, companies, and other groups have established scholarship or loan programs for use by Georgia Southern University students. To review these, access the Georgia Southern University Office of Financial Aid website at [http://em.georgiasouthern.edu/finaid/types-of-aid/scholarships](http://em.georgiasouthern.edu/finaid/types-of-aid/scholarships). Other helpful websites to use in searching for external scholarships may be found on our financial aid website under Types of Aid at [http://em.georgiasouthern.edu/finaid/external-scholarships](http://em.georgiasouthern.edu/finaid/external-scholarships).

**Transfer Credit**

A graduate student may transfer graduate credit from a regionally accredited institution. Additionally, graduate credit from the American Council of Education (ACE) for National Board Certification may be accepted for elective credit hour(s) in a Master's or Education Specialist's program of study. Up to nine (9) transferred credit hours (unless otherwise noted by the program of study) may apply toward a Master's or Education Specialist's degree provided the following are met:

- A student pursuing a graduate degree at Georgia Southern University who plans to take graduate courses at another institution as a transient student must complete a Graduate Student Transient Permission Form, which must be approved by the advisor or major professor and the College of Graduate Studies prior to enrolling in the transient courses. This procedure insures that courses taken as a transient student at another institution will constitute a part of the planned program of study. Students who take courses without prior approval are doing so with the possibility that the course may not count in the degree program.
- A degree candidate may not graduate at the end of a term in which he/she is enrolled as a transient student at another institution. The student, upon request, will be furnished a statement that all requirements for the degree have been completed when the said requirements have been satisfied.
- No grade lower than a “B” in a course earned at another institution may be accepted in transfer to count toward a graduate degree at Georgia Southern University.

1. Each College of Education program involved in a USG franchise program will allow for additional graduate course credit hours to be received from other USG institutions involved in the respective franchise. The maximum number of transfer credits allowed will be identified by the specific program, ranging from 9 to 27 credits, and will be published in program materials.

---

1 Each College of Education program involved in a USG franchise program will allow for additional graduate course credit hours to be received from other USG institutions involved in the respective franchise. The maximum number of transfer credits allowed will be identified by the specific program, ranging from 9 to 27 credits, and will be published in program materials.
The Graduate Student Organization (GSO) is committed to representing and supporting the interests of all current and prospective graduate students at Georgia Southern University. The GSO seeks to support scholarly activities and professional development as well as promote social opportunities for all graduate students.

The GSO council consists of representatives from each of the colleges on all campuses. The members are elected by application and nomination process. The council is the main governing body of the GSO and their duties include, but are not limited to, making final decisions regarding grant applications, running GSO meetings, and helping to organize social and professional development events sponsored by the GSO for graduate students. The GSO accepts grant proposals for research and conference travel to the Graduate Student Professional Development Fund each semester.
Academics

In addition to the Colleges, several other departments or agencies within Georgia Southern University enhance the academic life of the University.

Division of Continuing Education

The mission of the Division of Continuing Education is to support Georgia Southern University’s commitment to extending the learning environment beyond the classroom to the communities it serves, promoting lifelong success by delivering multi-modal, multi-site, and empowering opportunities for the individual. We provide a variety of courses and programs, from non-degree personal and professional development to customized workforce training, and more. Our offerings are available online and in-person, designed to meet various cultural and generational learning needs and provide traditional and non-traditional learners with the flexibility needed to maintain work-life balance.

The Division is your full-service provider of non-credit bearing programs, while also providing technologically advanced meeting, classroom, event, and conference services in Statesboro, Hinesville, and Savannah. Seasoned in managing educational programs locally, regionally, nationally, and internationally, the Division of Continuing Education is a full-service, one-stop shop with the ability to manage the entire life cycle of a program or conference. We have the venues and resources to suit all programs and event types in a unique and personal setting. From inception to post-program evaluations, we work diligently to guarantee every aspect of your program is exactly what you envision.

Additionally, the Division of Continuing Education is committed to the mission of lifelong learning and personal enrichment. To fulfill this, we offer the English Language Program and a variety of youth programs. The English Language Program at Georgia Southern University offers an active, student-centered approach to learning. Our academically intensive program supports the idea that whole language practice in all four skill areas—reading, writing, listening, and speaking—should be active rather than passive. We also offer a non-credit English Communication Skills course that provides interactive and fun learning sessions led by an ESL expert with over 15 years of experience. Our youth programs carry the same spirit of student-centeredness, with camps that explore the science of the outdoors, creating exciting Lego® robots, and preparing for college entrance exams. Whether it’s the arts, academics, or preparation for lifelong success, our camps focus on hands-on learning taught by leaders in the community.

Our broad range of services, offered to both the regional and campus communities, include:

- Customized Workforce Training—offers developed proposals that align with the company’s objectives based on in-person consultations and needs assessments; enhances workforce readiness, and training that helps employees learn new technologies and/or acquire certification that demonstrate expertise;
- Conference and Event Services—includes venue sourcing and booking, contract negotiation, CEU application tracking and coordination, financial and registration services, marketing and catering options, arrangement and management of hotel room blocks and lodging, audio-visual equipment and support, and customizable planning packages;
- Personal and Professional Development—includes online and in-person courses, providing certifications, and the ability to customize courses by industry to teach strategies and a framework for personal growth, goal setting, and self improvement; coordination of curriculum, certification, and delivery process for certificates, as well as the creation of personal, professional, or youth programs; instructor management, and attendee participation tracking;
- Online Courses—provides self-paced or instructor-led options for busy professionals, including the ability to gain certifications and digital badges, with learning options available in most industries; benefits include maintaining a flexible schedule, as well as convenience and flexibility;
- Continuing Education Credits (CEU’s) and Certificates—includes application and coordination of CEU process and tracking of attendee participation;
- Marketing and Promotions—boasts consultancy experience and service to non-profit and corporate businesses in marketing national programs; our dedicated marketing team is ready to bring visibility to your program with services that include tailored market research and delivery of an integrated marketing communications plan; marketing plan includes environmental scans, data tracking, design and creation of marketing collateral, establishment and increase of brand awareness, creation of program website and continued maintenance, design of print and digital signage, creation and implementation of email and social media campaign, as well as mailing list/listserv management;
- Financial Services—includes budget creation, purchasing of services and goods, approval for payment of invoices, process and recording of expenses, compiling accounting summary, and maintaining account records;
- Registration Services—provides the building and management of the registration portal, online registration services maintained with SecureServer, receipt of fees, real-time fee collection and reporting, and invoicing of participants;
- Speaker and Presenter Management—includes the invitation of speakers, issuing of call for proposals, coordination of travel and lodging, processing of honorarium payments, preparation of speaker bios, poster and presentation session management, and organization of audio-visual requirements;
- Sponsor and Exhibitor Management—offers recruitment of sponsors and exhibitors based on program criteria, processing for exhibitor and sponsor information, confirmation, and registration, and coordination of exhibit space.

Introduction
This section of the catalog offers an alphabetical listing of undergraduate courses offered at Georgia Southern University, along with the college in which that course is taught. Undergraduate courses, in general, begin with a 1, 2, 3, or 4. Courses numbered “5000” are also undergraduate courses. Prerequisites, co-requisites and cross listings are noted at the end of each description.

Course Numbering System
In general, the first digit of the course corresponds to the level of the class.

| 1 | Freshman |
| 2 | Sophomore |
| 3 | Junior |
| 4 | Senior |
| 5 | dual Undergraduate/Graduate |

The second digit in the course number indicates the course type.

| 1-5 | Traditional course format/Example: Lecture and Lab |
| 6-7 | Internships and Practica |
| 8 | Independent Study |
| 9 | Research |
| 0 | Topics courses |

The fourth digit indicates the sequence of the course.

College Abbreviations

| CAH | College of Arts and Humanities |
| CBSS | College of Behavioral and Social Sciences |
| COB | College of Business |
| COE | College of Education |
| CEC | Allen E. Paulson College of Engineering and Computing |
| WCHP | Water's College of Health Professions |
| COPH | Jiann-Ping Hsu College of Public Health |
| COSM | College of Science and Mathematics |
Interdisciplinary Courses offered by more than one department and/or college

Introduction
This section of the catalog offers an alphabetical listing of graduate courses offered at Georgia Southern University, along with the college in which that course is taught. Prerequisites, Corequisites, and Cross Listings are noted at the end of each description. Graduate courses, in general, begin with a 6, 7, 8, or 9. Courses numbered “5000” followed by a “G” are also graduate courses. (See “Course Numbering” below).

Course Numbering System
In general, the first digit of the course corresponds to the level of the class.

5  dual Undergraduate/Graduate
6  Lower Division Graduate
7-8 Upper Division Graduate
9  Doctoral Level Graduate

The second digit in the course number indicates the course type.

1-5  Traditional course format/Example: Lecture and Lab
6  Seminar
7  Internships and Practica
8  Independent Study
9  Research
0  Topics Courses

The fourth digit indicates the sequence of the course.
A course number followed by a “G” indicates a Graduate course.

**AAST Africana Studies**

**AAST 2000 Introduction to African American Studies**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Interdisciplinary introduction to African American studies from a social science perspective.
Prerequisite(s): ENGL 1101.

**AAST 2330 Introduction to Africa and Its Diaspora**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A general examination of the history, cultures, and societies of peoples of African descent throughout the world, with emphasis on those who live in Africa, the United States, the Caribbean, and Latin America.

**AAST 3230 Race and Ethnicity**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a survey of the major concepts and theories in the study of racial and ethnic relations in the United States. The situations and experiences of various racial and ethnic groups are considered.
Prerequisite(s): A minimum grade of "C" in SOCI 1101.
Cross Listing(s): SOCI 3235.

**AAST 3330 Yoruba Culture and Civilization**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to Yoruba culture in Nigeria and other west African societies as well as the Diaspora.

**AAST 3332 African American Theatre**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Investigates the contributions of black playwrights, actors, and directors to American theatre.
Cross Listing(s): THEA 3332.

**AAST 3435 African Art History**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the major themes, cultural groups, and art traditions of Africa. Focuses on materials, functions, meaning and the distinctive aesthetic values of cultural objects and their ritual significance in African societies.
Prerequisite(s): A minimum grade of "C" in ARTH 2531 or ARTH 2532.

**AAST 3436 African American Art History**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of African American art and design from the period of pre-colonial Africa to the contemporary United States. The course investigates the creativity and cultural identity of African Americans and their contributions to the visual culture in America. Prerequisite(s): A minimum grade of "C" in ARTH 2531 or ARTH 2532.

**AAST 4133 Gullah and Geechee Language and Culture**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the culture, language, folklore, traditional stories, and creative output of the Gullah and Geechee people in Georgia and South Carolina through readings, lectures, films, and hands-on experiences. Prerequisite(s): A minimum grade of "C" in ENGL 1102.

**AAST 4134 The Civil Rights Movement**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course explores the origins, ideologies, strategies and legacy of the modern civil rights movement in the North and the South with special focus on the impact of race, class and gender on civil rights from 1946-1968.
Cross Listing(s): HIST 4134.

**AAST 4330 Geography of Africa South of the Sahara**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the physical, cultural, political and economic geography of Africa south of the Sahara Desert. Selected problems or situations of contemporary interest will be incorporated.
Cross Listing(s): GEOG 4330.

**AAST 4337 Rhetoric of Social Movements**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the rhetorical significance of selected movements, including labor reform, civil rights and environment protection, emphasizing the analysis of persuasive social movement discourse.
Cross Listing(s): COMS 4337.
AAS 4530 Revelation and Revolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores issues of gender, spirituality, and power within the context of African history.
Cross Listing(s): HIST 4530, WGST 4530.

AAS 4532 Destruction of Slavery
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the end of plantation slavery in the nineteenth century Atlantic World. The geographic concentration and topics covered will vary according to the focus of the instructor.
Cross Listing(s): HIST 4532.

AAS 4630 Seminar in Africana Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Seminar in Africana Studies must be taken within the 15-hours block required for the minor in Africana Studies. It is a capstone course in which students apply knowledge gained in the classes they have taken in the Africana Studies program through discussion of selected texts, a major research paper, and an oral presentation required of all Africana Studies minors. Prerequisite(s): AAST 3230.

AAS 4890 Directed Individual Study in Yoruba
1-15 Credit Hours. 1-15 Lecture Hours. 0 Lab Hours.
Concentrated study of a topic in Yoruba literature, culture, society, thought or language. May be repeated for credit provided a new topic is studied. Prerequisite(s): YORU 3000.

AAS 5233 The American City
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of American urban development from the colonial period to the present with particular attention paid to migration, architecture, technology, politics, transportation, and urban culture in the late nineteenth and twentieth centuries.
Cross Listing(s): HIST 5233, AAST 5233G, HIST 5233G.

AAS 5233G The American City
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of American urban development from the colonial period to the present with particular attention paid to migration, architecture, technology, politics, transportation, and urban culture in the late nineteenth and twentieth centuries. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): AAST 5233, HIST 5233, HIST 5233G.

ACCT Accounting

ACCT 2030 Survey of Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the theory and application of accounting concepts used to gather and report economic information to users within and outside of the organization. The course stresses the use of accounting information for decision making within the framework of a free economy. Open to non-BBA students. Credit for graduation can only be granted for either ACCT 2030 or ACCT 2101 and ACCT 2102. Credit for graduation can only be granted for either ACCT 2030 or ACCT 2101 and ACCT 2102.
Prerequisite(s): A minimum grade of "C" in all of the following: BUSA 1105 and prior or current enrollment in ENGL 1102 and CISM 2530 and MATH 1441 or MATH 1232.

ACCT 2102 Principles of Accounting II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The theory and application of managerial accounting concepts. The course stresses the use of accounting information for decision making and the role of managerial accounting in a business environment.
Prerequisite(s): A minimum grade of "C" in all of the following: ACCT 2101, CISM 2530, ENGL 1102, MATH 1232 or MATH 1441, ENGL 1101 or WRIT 1101.

ACCT 2106 Environment of Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

ACCT 3111 Intermediate Accounting I (SSU)
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
ACCT 3112 Intermediate Accounting II-SSU
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
ACCT 3131 Intermediate Accounting I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The conceptual framework behind financial accounting, reporting and current practice in the preparation of financial statements including the income statement and balance sheet is the focus of this course. This includes accounting for changes and errors in financial reporting, income recognition, financial accounting disclosure, and analysis of financial statements through percentage and ratio analysis. Recent developments at the FASB, SEC and IASB are reviewed as an essential part of this course and students should be prepared to critically examine prospective financial accounting standards. The course stresses problem solving, critical thinking and research skills.
Prerequisite(s): A minimum grade of "C" in all of the following: ACCT 2101, ACCT 2102, CISM 2530, MATH 1232 or MATH 1441, ENGL 1101 or WRIT 1101 and ENGL 1102.

ACCT 3132 Intermediate Accounting II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a continuation of ACCT 3131. This course focuses on the accounting treatment for assets and liabilities including cash; current receivables; inventories; property, plant and equipment; intangible assets; current liabilities and contingencies; and long-term liabilities and receivables. The financial statements of several public companies are reviewed and a detailed analysis of these statements is an essential part of this course.
Prerequisite(s): A minimum grade of "C" in ACCT 3131 and ACCT 2102.

ACCT 3231 Managerial Accounting II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Preparation and analysis of information to assist management in decision making, learning, planning, and controlling business activities. The use of management accounting information for costing products and services, budgeting, pricing and product mix decisions, and evaluating operating performance are emphasized.
Prerequisite(s): A minimum grade of "C" in ACCT 2102, CISM 2530, ENGL 1102, MATH 1232 or MATH 1441, ENGL 1101 or WRIT 1101.

ACCT 3330 Income Tax
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the basic concepts of federal income tax with a focus on taxation of individuals.
Prerequisite(s): A minimum grade of "C" in ACCT 3330.

ACCT 3530 Tax Aspects of Business Decisions
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to basic tax, business, and legal concepts instrumental in decreasing federal taxes. The course stresses problem solving, critical thinking, and application of skills necessary to reduce taxes. Open to either non-accounting BBA or Non-BBA students. Will not substitute for ACCT 3330.
Prerequisite(s): A minimum grade of "C" in ACCT 2101, ACCT 2102 or ACCT 2030.
ACCT 4030 Special Topics in Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that allows students to pursue further study in a specific accounting topic at the frontier of an area of research or a contemporary topic related to current real-world events.

ACCT 4130 Accounting Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to how accounting activities are implemented and integrated in manual and computer-based accounting information systems. Topics include AIS components, transaction cycles, system development, internal control, the relationship between AIS design and the audit process, and the effects of technology. The course stresses problem solving, critical thinking, and computer application skills.
Prerequisite(s): A minimum grade of "C" in ACCT 3131.

ACCT 4131 International Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to accounting issues and business operations in a global environment. Topics include foreign market currency systems, inflation and currency translation methodology, and international auditing and taxation issues impacting multinational corporations and individuals involved in exports, services, or capital transactions at an international level.
Prerequisite(s): A minimum grade of "C" in ACCT 3132, Accounting majors only.

ACCT 4133 Intermediate Accounting III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The capstone of the intermediate accounting sequence, this course is a continuation of ACCT 3132. Advanced accounting topics including accounting changes and error corrections, stockholders equity, accounting for income taxes, accounting for pensions and other post-retirement benefits, accounting for leases, and the statement of cash flows are the basis for this course.
Prerequisite(s): A minimum grade of "C" in all of the following: ACCT 3132 and ACCT 3330, Accounting majors only.

ACCT 4430 Auditing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Develops the background to understand the auditing process and judgments made by auditors. Topics include external, internal and governmental auditing.
Prerequisite(s): A minimum grade of "C" in all of the following: ACCT 3132 and concurrent enrollment in ACCT 4130, Accounting majors only.

ACCT 4530 Governmental and Institutional Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to accounting and financial reporting for state and local governments and not-for-profit entities. Financial management and accountability considerations particular to government and not-for-profit organizations are emphasized.
Prerequisite(s): A minimum grade of "C" in ACCT 3131, Accounting majors only.

ACCT 4631 Fraud Examination
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course takes a look at fraud by examining the pervasiveness of, and the causes, of fraud and white-collar crime in our society. Other topics to be explored include financial crime statutes, evidence gathering and admissibility, types and elements of fraud, general investigative methods, and report writing.
Prerequisite(s): A minimum grade of "C" in ACCT 2101 or ACCT 2030 and junior status.

ACCT 4632 Fraud Schemes
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course takes a look at the 44 most common fraud schemes, including how they work and how they can be effectively detected, investigated, and prevented.
Prerequisite(s): A minimum grade of "C" in ACCT 2101 or ACCT 2030 and junior status.

ACCT 4633 Forensic Interviews and Interrogation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the distinctions between interviews and interrogations and how each can be used in resolving criminal or civil allegations. Other topics to be explored include the verbal and nonverbal cues indicating truth or deception, preparation of interview memoranda, and obtaining and preparing legally-admissible admission statements.
Prerequisite(s): Junior Status.
Cross Listing(s): LSTD 4633.

ACCT 4790 Internship in Accounting
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised work-study program in selected business and accounting firms throughout the southeast. Any student enrolled in the internship program will be required to work for one full semester.
Prerequisite(s): Junior standing.

ACCT 4830 Special Problems in Accounting
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
A customized course that is under the direction of a faculty sponsor. The course is designed to offer students an opportunity to pursue studies at a level or on topics not covered in scheduled courses. The scope and nature of the material covered is determined with faculty sponsor.

ACCT 4890 Directed Study in Accounting
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Designed for independent study and research in selected areas of accounting under faculty supervision.

ACCT 5232 Managerial Accounting III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continues the study of management accounting by focusing on current topics in the areas of 1) controllership, 2) applications and implications of modern costing and management accounting techniques, including advanced costing techniques, performance measurement, and process analysis, and 3) the legal, corporate and professional responsibilities of accounting departments. Specific topics may vary from year to year.
Prerequisite(s): A minimum grade of "C" in ACCT 3231, Accounting majors only.
Cross Listing(s): ACCT 5232G.

ACCT 5232G Managerial Accounting III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continues the study of management accounting by focusing on current topics in the areas of 1) controllership, 2) applications and implications of modern costing and management accounting techniques, including advanced costing techniques, performance measurement, and process analysis, and 3) the legal, corporate and professional responsibilities of accounting departments. Specific topics may vary from year to year. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in ACCT 3231 or permission of the School of Accountancy director.
Cross Listing(s): ACCT 5232.

ACCT 5330 Taxation of Corporations and Partnerships
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the laws involving the formation, operation, and liquidation of corporations, S corporations, and partnerships.
Prerequisite(s): A minimum grade of "C" in ACCT 3330, Accounting majors only.
ACCT 6130 Accounting and Control
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of financial and management accounting. It illustrates how financial accounting information is generated, analyzed, and used for external reporting purposes and how management accounting information is used in management decision making. Differences in accounting practices between and among nations are also explored.
Prerequisite: Admitted to the Masters of Accounting program or permission of the School of Accountancy director.

ACCT 7130 Seminar in Financial Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of business combinations, consolidation of financial statements of affiliated companies, multinational operations, foreign currency transactions, translation of foreign currency financial statements, reporting disaggregated information, and interim financial statements.
Prerequisite(s): A minimum grade of "C" in ACCT 4133 and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7131 Selected Topics in Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to offer students an opportunity to pursue studies at a level or on topics not covered in existing graduate courses. The scope and the nature of the material covered is determined in consultation with the faculty sponsor.
Prerequisite(s): Admission to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7132 Theory of Accounting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of historical and contemporary developments of accounting theory, policy, and reporting procedures. The objectives of financial reporting are reviewed within the conceptual framework of accounting and the accounting standard setting process. Particular emphasis is placed on financial accounting theory formulation and the application of accounting theory to selected contemporary issues.
Prerequisite(s): Admission to the Masters of Accounting program or permission of the School of Accountancy director.

ACCT 7134 Financial Reporting and Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the interpretation of financial statement information for decision making. Topics include understanding the importance of industry context and the firm's own strategic choices in evaluating the financial statement; assessing the quality of financial statement information; and recognizing situations where more stringent forensic accounting measures might be appropriate; evaluating profitability and risk; and associating subsets of the available analytical tools with the kinds of decisions for which they are most appropriate; and recognizing the effects of GAAP on the input variables of various firm valuation models. Includes coverage of recent relevant legislation and pronouncements of the FASB, SEC and IASB.
Prerequisites: Admission to the Masters of Accounting program or permission of the School of Accountancy director.

ACCT 7230 Accounting for Executives
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of financial accounting and reporting, management accounting, and financial control. This course covers generally accepted accounting principles as the basis for financial statement analysis. The course also covers how management accounting information is used in pricing and product mix decisions, in decisions to improve existing activities and processes, and in performance measurement in decentralized operating units.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in MGNT 7331.

ACCT 7330 Taxation of Corporations and Partnerships
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the laws of taxation involving the formation, operation, and liquidation of corporations, S corporations, and partnerships.
Prerequisite(s): A minimum grade of "C" in ACCT 3330, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7331 Taxation of Pass-Through Entities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The federal income taxation of pass-through entities, including partnerships (LLC), S corporations, and trusts and estates. The income tax aspects of each of these entities are examined with regard to formation, operation, allocation of income among owners (or beneficiaries), distributions and liquidation.
Prerequisite(s): A minimum grade of "C" in ACCT 7330 or concurrent enrollment in ACCT 7330, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7332 Multijurisdictional Taxation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Addresses the increased importance of international, multistate, and ebusiness taxation in today's global environment. Introduces students to the principles guiding nexus, geographic allocation of income, and avoidance of double taxation. Develops an understanding of the U.S. tax rules that may apply to income involving the US and another country, and compares these with the multistate tax rules. Deals with the tax implications of business conducted electronically.
Prerequisite(s): A minimum grade of "C" in ACCT 7330 or concurrent enrollment in ACCT 7330, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7334 Tax Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of research techniques to income tax and other tax planning; case studies and reports. This course provides the student with the opportunity to analyze, critique, and do practical tax research. Emphasis is placed on research methodology rather than on technical or legal knowledge of the tax law.
Prerequisite(s): A minimum grade of "C" in ACCT 3330, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7430 Seminar in Auditing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced topics in independent, internal, and governmental auditing.
Prerequisite(s): A minimum grade of "C" in ACCT 4430, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7431 Auditing Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Practical and theoretical components are considered related to auditing topics including auditing in the computer environment, conducting auditing research, and report writing.
Prerequisite(s): A minimum grade of "C" in ACCT 7430, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7530 Seminar in Accounting Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Develops an understanding and appreciation for the design, analysis, development and implementation of computer-based accounting information systems with an emphasis on control and management issues of this accounting function. Practical application will be examined through computer projects and systems' cases.
Prerequisite(s): A minimum grade of "C" in ACCT 4130, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.
ACCT 7634 Fraudulent Financial Reporting  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
While asset theft fraud is well covered in the two fraud examination courses, additional training in financial statement fraud is needed due to the technical nature of accounting and reporting standards. This course demonstrates how financial statement analysis can be used to uncover fraudulent financial reporting. In addition, the most common methods for "cooking the books" will be examined along with strategies for detecting and investigating such schemes. 
Prerequisite(s): A minimum grade of "C" in ACCT 4133, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7635 Fraud and Society  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the numerous legislative, administrative, and other societal remedies that have emerged in response to white-collar crime. Such remedies encompass securities fraud, environmental crimes, anti-trust violations, bribery, money laundering, and corporate governance (e.g. Sarbanes-Oxley Act of 2002).

ACCT 7636 Expert Witnessing  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the role of accountants as either testifying or consulting experts in legal disputes involving professional negligence cases, securities fraud, business/partnership disputes, business interruption losses, business valuations, and marital disputes. Topics include how to communicate opinions effectively at deposition, at trial, and in written report; the law and procedure dealing with experts; ethics; and how to deal with attorneys.

ACCT 7637 Forensic Accounting Capstone  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This is an integrative capstone course with potentially many modes of delivery including instruction from multiple professors, use of comprehensive cases, mock trails, and panel and round robin discussions of current issues. Guest speakers may present, or students may report on various projects that they have been conducting either independently or in groups. Students may be assigned projects designed to assist in their preparation to sit for the Certified Fraud Examiner (CFE) exam. To successfully complete this course, students must demonstrate a growing mastery of the skills required of the forensic accountant. 
Prerequisite(s): A minimum grade of "C" in ACCT 7634, ACCT 7635 and ACCT 7636, or permission of the School of Accountancy director.

ACCT 7638 Business Valuation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This class focuses on determining the fair values of individual tangible and intangible assets, as well as the overall value of a business and includes calculating fair values for financial reporting. The three valuation approaches (Market Approach, Income Approach, and Asset Approach) are covered in depth along with the professional standards, developing the cost of capital, and applying valuation adjustments (discounts and premiums). 
Prerequisite(s): A minimum grade of "C" in ACCT 4133, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

ACCT 7639 Cyber Forensics and Data Analytics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course addresses the scientific aspects of classic computer forensic tools and technologies used to recover data and conduct appropriate analysis to improve individual computer, networks and mobile technology performance. In cyber forensics these tools and technology are used to facilitate: 1 – Collection of data while preserving the integrity of the data; 2 – Examination of data using manual and automated methods to assess and extract data of interest; 3 - Employ data analytics methods and techniques to derive useful information from relevant data; 4 – Reporting the actions used, how tools and procedures were selected, determine what other actions need to be performed, securing identified vulnerabilities and improving existing security controls. In cyber forensics and data analytics digital evidence is married to the practical side of financial forensic investigations and includes the use of digital evidence in legal settings. 
Prerequisite(s): Admitted to the Masters of Accounting program or permission of the School of Accountancy director.

ACCT 7680 Professional Problems  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The course is a comprehensive update of accounting regulations, laws, and standards. 
Prerequisite(s): Admitted to the Masters of Accounting program or permission of the School of Accountancy director.

ACCT 7730 Internship in Accounting  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
A supervised work-study program of specified length in selected business and accounting firms. 
Prerequisite(s): Admitted to the Masters of Accounting program or permission of the School of Accountancy director.

ACCT 7899 Directed Study in Accounting  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Designed for independent study and research in selected areas of accounting under faculty supervision. 
Prerequisite(s): Admitted to the Masters of Accounting program or permission of the School of Accountancy director.

ADED Adult Education

ADED 7010 Special Topics In Adult Educ  
3 Credit Hours. 2 Lecture Hours. 1-12 Lab Hours.  
Designed to promote specialized investigation apturate to the instructional needs of adult educators. Topics of independent student exploration will vary. This course may be repeated one time.

ADED 7100 History and Theory of Adult Education and Literacy  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to the fundamental nature, function and scope of adult education, including an overview of the historical, sociological and political forces affeding the field. Program providers, relations with parent organizations, societal influences and awareness of resources will be examined.

ADED 7110 Psychology of The Adult Learner  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Exploration of adults as learners. Emphasis on conditions that affect the adult learner: brain research, adult development, ability, potential, motivation, self-perception, role-identification status, and learning styles.

ADED 7120 Program Planning and Evaluation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A technology enhanced, community based initiative logic model course that includes a systematic process of situation analysis, with needs assessment, priority setting, program action and evaluation, participants in this course plan and implement a high quality adult education program.
ANTE 7170 Research and Grant Writing in Adult Learning
3 Credit Hours. 3 Lecture Hours. 0-9 Lab Hours.
Field-based research in adult learning. Explores needs-based funding sources, including local, state and federal grants.
ANTE 7180 Cultural Diversity and Community Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Knowledge of areas of diversity that affect the community. Participants will explore group dynamics, team building strategies and leadership techniques, strategies and skills, and ways to recognize and develop these in group situations through a servant leadership framework.
ANTE 7250 Training & Development In the Workplace
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines foundations, practices, and application of training and development in the workplace. Students will explore benefits for workplace training, history, current trends, characteristics, definitions, theories, and research associated with workplace development.
ANTE 7260 Issues and Strategies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines causal factors contributing to adult literacy and undereducation. Students will explore the underlying political and cultural causes of literacy relevant to designing educational programs (curriculum) for adult learning. Community action and learning processes in a variety of global community settings with emphasis on literacy levels is also studied.
ANTE 7310 Online Learning Environment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exploration of emergence of online learning environments as viable alternatives to traditional classroom instruction. Topics will include theoretical, conceptual, instructional and technical framework of implementing and using OLEs to support the learning paradigm. Basic technology and pedagogical implications of distance education explored: the Internet, asynchronous/synchronous communication tools, methods of instruction, online tools to support learning and instruction, design of OLE, facilitator and learner evaluation and assessment of distance education technologies.
ANTE 7500 Workplace Application
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of adult education theory and practice in an adult education setting.

AFAS African American Studies

AFAS 5000 Topics in African American Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Special topics in African American Studies. Will be offered in conjunction with selected upper level courses in the university curriculum when content of those courses address issues related to African American studies. Special topics in African American Studies. Will be offered in conjunction with selected upper level courses in the university curriculum when content of those courses address issues related to African American studies.
Prerequisite(s): Completion of AFAS 2000.
Cross Listing(s): AFAS 5000G.
AFAS 5000G Topics In African American Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Special topics in African American Studies. Will be offered in conjunction with selected upper level courses in the university curriculum when content of those courses address issues related to African American studies.

ANTH Anthropology

ANTH 1102 Introduction to Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The comparative study of humankind draws materials from the widest possible range of peoples, cultures, and time periods to determine and explain similarities and differences among peoples of the world. This course brings the perspectives of all of the sub-fields of anthropology to the study of humanity: cultural anthropology, archeology, linguistics, and biological anthropology. 

ANTH 1150 Glob Pers Ant: People of World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an ethnographically focused survey of the world and its peoples. Topically organized, this exploration emphasizes contemporary social issues as they relate to globalization and cultural change. Students will gain an understanding of the interactions between local peoples and their place in the larger world.

ANTH 2131 World Archaeology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce the methods and theories used by archaeologists to investigate and interpret the past, and apply them to an overview of the archaeology of the Old and New Worlds. It will examine how archaeology tells us about significant cultural developments in humanity’s past, with a particular focus on the transition to farming, the rise of complex societies, and the development of state level societies. The impact of these transitions on societal and cultural change will also be explored.

ANTH 2231 Biological Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines social life and physical diversity in the context of hominid evolution. Key areas of study include the fossil record, basic genetics, primatology, human variation, and the evolution of communication.

ANTH 2331 Cultural Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an exploration of the nature, structure, and dynamics of human cultural systems. Cultural patterns are used as a lens to examine what makes us uniquely human. Students will gain a better understanding and appreciation of difference and diversity through the practice of cultural relativity and a better grasp of how and why people, including ourselves, live as they do.

ANTH 2431 Cultural Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course brings the perspectives of all of the sub-fields of anthropology to the study of humanity: cultural anthropology, archeology, linguistics, and biological anthropology.

ANTH 2530 Anthropological Inquiry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to give students an introduction to the profession of anthropology. Students will focus on questions, such as: How do anthropologists investigate culture? How do we know what we know? How do students become an anthropologist and what is involved?.

ANTH 2691 Selected Topics Anthropology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Various topics in Anthropology.
Prerequisite(s): Permission of Instructor.
ANTH 3130 Fire, Stone, Hide and Bone
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasizing hands-on learning, this course introduces the concepts and evolution of basic human technologies. Students explore the manufacture and use of stone, bone, and wooden tools, cordage, and containers, and also practice the arts of fire-making, traditional hide tanning, and projectile use. Ranging across continents and through thousands of years, Fire, Stone, Hide & Bone instills an appreciation of the technologies developed, adapted, and applied by our shared ancestors.
Prerequisite(s): Permission of Instructor.

ANTH 3133 Southeastern Prehistory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Using archaeology and environmental studies, this course allows students to investigate cultural developments of native societies in the New World, with specific focus on the American Southeast, prior to contact with civilizations in the Old World. From small foraging bands to large-scale chiefdoms, topics include technology, economy, social organization, natural landscapes, and the built environment.

ANTH 3134 Native Peoples of the Southeast
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of the lifeways of the native peoples of the Southeastern United States. Students benefit from the historical nature of this study, as well as the direct hands-on identification and dating of artifacts.

ANTH 3135 Native Peoples of North America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of and orientation to the theoretical and practical aspects of biological anthropology. Topics include identifying human skeletal remains, cause of death, and search and recovery methods.
Prerequisite(s): ANTH 1150 or ANTH 1102.

ANTH 3136 Caribbean Cultures
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the anthropological study of European peoples and the effects of social, political, and economic changes on their cultures from an anthropological perspective. It also examines the principal anthropological methods and theories used in the study of European culture systems.

ANTH 3137 Foraging to Farming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course surveys the archaeological evidence for the origins of food production, specifically the transition from hunting and gathering wild foods to the cultivation and raising of domesticated plants and animals. Evidence derived from zooarchaeology, paleoethnobotany, human bioarchaeology, and other disciplines is used to identify where and when food production originated. Special attention is paid to the major centers of domestication and how the use of domesticated plants and animals spread from these primary centers.

ANTH 3138 Contact: Worlds Collide
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Weaving together archaeology and history, this course explores the complex interactions resulting from contact between the Old World civilizations of Scandinavia, Africa, and Eurasia, and those of the New World, with particular focus on the American Southeast. Students will expand their perspectives on culture, politics, economy, and the resiliency of native peoples.

ANTH 3139 Contact: Worlds Collide
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers Cultural Resource Management (CRM) and Public Archaeology, and the theory, methods, and techniques involved in their practice. CRM deals with the research, conservation, and management of cultural resources within a regulatory framework, and public archaeology is the communication of these results to the public. The course will address ethical responsibilities, the interpretation of archaeological sites, and public outreach techniques; international, federal, state, and local statutes affecting their practice and the integration of CRM and public archaeology.
ANTH 4131 Archaeological Methods and Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides an examination and application of current topics in archaeology relating to excavation strategy and interpretation. Analysis of various theoretical approaches as well as field techniques.

ANTH 4134 Archaeological Curation  
3 Credit Hours. 0 Lecture Hours. 6 Lab Hours.  
The course focuses on the process of managing and interpreting archaeological collections over the long term. Course work emphasizes hands-on experience with students participating in curation activities of the archaeological repository. Instruction in the history, legal issues, and best practices regarding archaeological curation is provided.

ANTH 4135 Advanced Archaeo Analysis  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An advanced course in the analysis of archaeological sites and materials. In-depth examination of certain types of archaeological materials. Students also learn about the conservation of archaeological materials.

ANTH 4136 Potsherds to Pixels: Digital and Spatial Technologies for Archaeologists  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course will examine and provide practical instruction in the application of a range of computer graphical techniques to archaeological problems, including site and landscape survey, modeling topographic and geophysical data, and 3-D archaeological modeling and scanning.

ANTH 4137 Archaeologies of Conflict  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course explores the global archaeology of conflict from the prehistoric to the modern period, and provides a foundational understanding of the main themes and approaches to the study of conflict in humanity’s past. Moreover, it will discuss recent theoretical debates within conflict archaeology, and the anthropology of conflict and violence, and their relationships with overarching cultural frameworks and social structures.

ANTH 4138 Zooarchaeology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The course focuses on laboratory methods in zooarchaeology, the study of animal remains from archaeological sites. Coursework emphasizes hands-on experience and will teach students how to identify, analyze, and interpret animal remains from archaeological sites. Other topics include taphonomic processes and assemblage formation, advanced zooarchaeological techniques, and human use of animals in the past.

ANTH 4150 Environmental Archaeology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course focuses on the complex relationship between humans and the environment over time. Students learn the methods used by archaeologists to investigate how humans interacted with and responded to diverse and changing environmental conditions. Emphasis is placed on environmental reconstruction and human resource use.

ANTH 4230 Paleanthropology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides a detailed examination of the fossil record of human evolution and the methods of paleoanthropological research. Evolutionary events from the initial divergence of ape and human lines through the origin of anatomically modern humans as we reconstruct their worlds in the past are covered.

ANTH 4331 Anthropology and Human Problems  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides a study of the applications of anthropology in coping with a variety of problems among diverse peoples of the world. Issues include intercultural health care, rural to urban migration, and international development. The history, methods, and ethics of practical or applied anthropology are examined, as well as career opportunities.

ANTH 4332 Anthropology of Sex and Gender  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the biocultural and multicultural perspectives on gender and sex provided by anthropology. Theories and examples from biological anthropology, cultural anthropology, archaeology, and linguistics.

ANTH 4334 Ethnographic Methods  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course focuses on the study of the research methods used by cultural anthropologists to gather and analyze data in order to describe and explain how people live and why they live that way. It emphasizes qualitative techniques such as interviewing and participant observation.

ANTH 4336 Medical Anthropology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides an integrative and multidisciplinary approach to medical anthropology by exploring perspectives relating to global and cross-cultural issues of human health, body, sickness, disease, health, and culture. In particular, this course integrates biocultural viewpoints, which incorporate how people interact with their environment, and cultural viewpoints that attempt to understand the ideas, beliefs, and values that shape human.

ANTH 4338 Reading Culture  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course evaluates ethnographic writing as a form of narrative and exposes students to the breadth and depth of the styles and content that anthropologists use to communicate. Students will learn to read critically and efficiently, and will write a book review according to the standards of the discipline. The class will focus on understanding ethnographies in their cultural contexts, and read studies from around the globe to illustrate the various ways in which ethnographers write culture.

ANTH 4340 Anthropology of Foodways  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines foodways, a central focus of Anthropology since the earliest days of the discipline. Our study is situated within the global political economy and focused on anthropology’s unique contribution to the study of foodways. Topics will include cultural practices surrounding food selection, preparation, sharing, and consumption in a variety of cultures and contexts.

ANTH 4350 Sorcery, Demons and Gods  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides an anthropological analysis of religion and religious beliefs across cultures, including father gods and mother goddesses, sorcery and magic, shamanism, sacrifice, and totemism.

ANTH 4432 Language and Culture  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This advanced anthropology course will explore the theories and methods related to linguistic anthropology. Topics covered include the Sapir-Whorf Hypothesis, ethnoscience, language socialization, the ethnography of speaking, ethnolinguistic methods, linguistic and cultural discourse analysis and other methods for conducting language and culture research.

ANTH 4433 Anthropology of Language and Gender  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the cross-cultural use of language as a central aspect in the construction, negotiation and performance of gender, and will provide students with an understanding of the complexities of language and gender from an anthropological perspective.

ANTH 4434 Life Cycle of Language  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course explores various aspects of the life of languages including created languages, creoles and pidgins, language shift, linguistic purism, language death and language revitalization and identity movements. Emphasis will be on the cultural social factors that impact language survival.
ANTH 4630 Capstone Seminar in Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will review and synthesize the concepts, theories, methods and ethics of archeology, linguistic anthropology, cultural anthropology, and biological anthropology. Applications of anthropological knowledge and skills, and career options, will be examined.

ANTH 4890 Directed Individual Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent study under faculty supervision.
Prerequisite(s): ANTH 1102 or ANTH 1150 and ANTH 3532 or departmental approval required.

ANTH 5091 Selected Topics in Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Various topics.
Prerequisite(s): Anthropology majors must have a minimum grade of “C” in ANTH 1102.
Cross Listing(s): ANTH 5091G.

ANTH 5091G Selected Topics in Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Various topics. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): Anthropology majors must have a minimum grade of “C” in ANTH 1102. Cross Listing(s): ANTH 5091.

ANTH 6091 Selected Topics in Anthropology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Various topics.

ANTH 6131 North American Archeology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introductory course on the archeology of North America. Concentrates on the prehistory and protohistory of Native Americans as well as introducing students to the history of North American archeology.

ANTH 6135 Cultural Resource Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cultural Resource Management (CRM) deals with the research, conservation and management of cultural resources within a regulatory framework. Most archaeologists will spend some or all of their careers working on CRM projects in the private sector or for a government agency. This course will provide an overview of the scope and practice of CRM work by archaeologists.

ANTH 6231 Methods and Theory in Archeology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination and application of current topics in archeology relating to excavation strategy and interpretation. Analyzes various theoretical approaches as well as field techniques.

ANTH 6233 Zooarcheology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the analysis of animal remains from archeological sites. Emphasis will be placed on the identification of specimens and the methodologies of interpretation.

ANTH 6235 Advanced Archeological Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course in the analysis of archeological sites and materials. In-depth examination of certain types of archeological materials. Students also learn about the conservation of archeological materials.

ANTH 6262 Field Session in Archeology
6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
On-site participation in the excavation of an archeological site including training in the physical and observational techniques of the extractive processes of archeological excavation. Experience in excavation, analysis, recording, and interpretation of archeological materials is provided.

ANTH 6531 Anthropology of Language and Gender
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will examine the cross-cultural use of language as a central aspect in the construction, negotiation and performance of gender, and will provide students with an understanding of the complexities of language and gender from an anthropological perspective.

ANTH 6638 Proseminar in Social Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the foundations and controversies in social scientific research.
Cross Listing(s): POLS 6638, SOCI 6638.

ANTH 6690 Archeology Field Supervision
3-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is designed to give students who have already completed an archeological field experience a supervisory role in field investigations. They will be expected to participate in supervising pre-field preparations, fieldwork and post-field wrap-up.

ANTH 7434 Quantitative Research Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the role of theory, research design, sampling, measurement and instrumentation, data collection, and ethical issues related to social scientific research.

ANTH 7436 Qualitative Research Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analysis and practice of qualitative methodology in social science. Topics may include participant observation, ethnographic methods, interviews, case studies, content analysis, archival research and other innovative techniques.

ANTH 7631 Seminar in Anthropology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores selected topics of contemporary relevance in anthropology which reflect the expertise of anthropology faculty and which are relevant to individual or small groups of students in their course of specialization in the graduate curricula of the University.

ANTH 7632 Seminar in Archeology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores selected topics in archeology of interest to individual or small groups of students which are relevant to their course of specialization in the graduate curricula of the University and which reflect the expertise of anthropology faculty.

ANTH 7638 Social Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the role of theory in the scientific endeavor and explores a number of theoretical perspectives, including structural functionalism, conflict, feminist, exchange, rational choice, symbolic interaction, and the current debates over modernity and postmodernity.

ANTH 7790 Practicum
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is designed as an educational placement to give graduate students a practical experience in a vocationally-appropriate setting.

ANTH 7891 Independent Study in Anthropology
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent examination of graduate course topics offered in the anthropology curriculum of the Department of Sociology and Anthropology following guidelines of the College of Graduate Studies.

ANTH 7999 Thesis
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Planned research and writing directed by the student’s thesis advisor.

APAN Applied Anthropology
APAN 3093 Selected Topics in Applied Anthropology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Various topics in Applied Anthropology. 
Prerequisite(s): Permission of Instructor.  

APAN 4790 Internship in Anthropology  
3-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
In this course, students complete a supervised internship in a professional setting relevant to anthropology. They are guided by a faculty mentor in applying anthropological knowledge, theory, methods and ethics in the work setting. Students learn and practice skills needed in the specific setting as well as the professional norms of the organization. They acquire experience and information to better assess career and/or educational opportunities grounded in anthropology. 
Prerequisite(s): Permission of instructor.  

ARAB Arabic  

ARAB 1001 Elementary Arabic I  
Elementary Arabic I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
For students who have never studied Arabic. Focus on basic communication skills (understanding, speaking, reading, and writing Arabic) and cultural understanding. Includes laboratory program.  

ARAB 1002 Elementary Arabic II  
Elementary Arabic II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Continued focus on basic communication skills (understanding, speaking, reading, and writing Arabic) and cultural understanding, with increased emphasis on active use of the language. Includes laboratory program. 
Prerequisite(s): A minimum grade of "C" in ARAB 1001.  

ARAB 2001 Intermediate Arabic I  
Intermediate Arabic I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Building upon communication skills (understanding, speaking, reading, and writing Arabic) and cultural understanding, developed at the elementary level.  
Prerequisite(s): A minimum grade of "C" in ARAB 1002.  

ARAB 2002 Intermediate Arabic II  
Intermediate Arabic II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Continued focus on communication skills and cultural understanding.  
Prerequisite(s): A minimum grade of "C" in ARAB 2001.  

ARAB 3030 Selected Topics in Arabic  
Selected Topics in Arabic  
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.  
Study of a topic in Arabic literature, culture, society, thought or language not included in the regular offering. Continued development of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied. 
Prerequisite(s): A minimum grade of "C" in ARAB 2002.  

ARAB 3130 Arabic Conversation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Continued development of language competencies (listening, speaking, reading, writing, and culture) with special emphasis on Arabic conversation. 
Prerequisite(s): ARAB 2002.  

ARAB 3185 Studies Abroad: Speaking I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This is a course in oral communications in Arabic using materials that are appropriate for building on intermediate-level skills and which are related thematically to the country/culture visited. 
Prerequisite(s): A minimum grade of "C" in ARAB 2002.  

ARAB 3330 Arabic Culture  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to Arabic culture patterns, behaviors, and monuments. Continued development of language competencies.  

ARAB 3385 Studies Abroad: Writing I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This is a course in written communications in Arabic using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited. 
Prerequisite(s): A minimum grade of "C" in ARAB 2002.  

ARAB 3530 Commercial Arabic  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to the language and practices of doing business in the Arab world. Continued development of language competencies.  

ARAB 4185 Studies Abroad: Speaking II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This is a course in oral communications in Arabic using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited. 
Prerequisite(s): A minimum grade of "C" in ARAB 2002.  

ARAB 4385 Studies Abroad: Writing II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This is a course in written communications in Arabic using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited.  
Prerequisite(s): A minimum grade of "C" in ARAB 2002.  

ARCH Archaeology  

ARCH 3092 Selected Topics in Archaeology  
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.  
Various topics in Archaeology. 
Prerequisite(s): Permission of Instructor.  

ARCH 4732 Archaeology Field Session  
3-9 Credit Hours. 0 Lecture Hours. 6-18 Lab Hours.  
This course is centered around on-site participation in the excavation of an archaeological site including training in the field and laboratory techniques involved in excavation. Experience in excavation, analysis, recording, and interpretation of archeological materials is provided. Repeatable for up to 9 total hours. Prerequisite(s): Permission of Instructor.  

ART Art  

ART 1000 Art in Life  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A general introduction to art and aesthetics and their role in human life and culture. Includes discussion and analysis of architecture, sculpture, painting, ceramics, drawing, printmaking, photography, design, and other art forms from various historical periods and world cultures.  

ART 1010 Drawing I  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
An introduction to the basic materials and methods of drawing. Students will develop skills in direct observations, composition, and techniques using still-life and natural forms.  

ART 1011 Drawing II  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Through direct observation and experimentation the student is led to develop a personal approach to expression. The figure, landscape and still-life are examined in a variety of materials. 
Prerequisite(s): ART 1010.  
ART 1020 2D Art and Design Foundations  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Emphasizes two-dimensional design through analysis of line, texture, color, size, shape, and mass. Individual experiences with a variety of media.

ART 1030 3D Art and Design Foundations  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Uses lectures, demonstrations, discussions, and hands on experiences to introduce students to a variety of basic materials, techniques, and general concepts related to design within the contexts of 3-D form and space.

ART 1031 Digital Art and Design Foundations  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is an introduction to the digital methods of image capture, creation, manipulation and research. Students will build skills in the fundamentals of digital technologies in art and design practices.

ART 1132 Digital Art and Design Foundations  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is an introduction to the digital methods of image capture, creation, manipulation and research. Students will build skills in the fundamentals of digital technologies in art and design practices.

ART 1536 Animation I  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is an introduction to animation. Students will cover concepts in 2D, stop motion, and sound. Course projects explore character development, storytelling and dialogue.

ART 2000 Advanced Placement Studio  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is designed to award Advanced Placement credits to High School students' portfolio scoring 4 and above in drawing 2D-Design and 3D Design. Credits will be given upon the completion of a portfolio review. Requires departmental permission.

ART 2135 Painting: Introduction  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is an introduction to painting through a variety of studio experiences. This course is designed to familiarize students with skills necessary for creating a painting. Emphasis is placed on technical competence using paint media, mixing color, mixing color values, and composition. Also stressed are concepts such as symbolic use of color, marks and form to increase expressionistic content within a work of art. Direct observation is utilized.

ART 2230 Ceramics: Introduction  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
In this course, students are introduced to clay and the various forming techniques, including pinching, coil construction, slab building, architectural relief, wheel throwing, and firing. Students will learn technical, conceptual, research and design skills, as well as professional skills.

ART 2235 Digital Dimensions  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course involves focused study of using computers and computer-controlled devices to create visualizations, patterns, and 3-Dimensional forms. 3-Dimensional modeling software will be used to design and produce actual objects through peripheral machines such as laser scanners, CNC routers, CNC plasma cutting, and powder-based rapid prototyping. Additionally, the course introduces a broad range of software and creation techniques currently used in the advertisement and motion picture industries, and the fields of industrial, automobile, architecture, furniture, and graphic design.

ART 2236 Small Metals Design: Fundamentals  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course introduces students to tools, materials, and techniques of small metal design. Students will learn technical, conceptual, research, design, and professional skills.

ART 2330 Typography I  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Introduction to the basic foundations of typographic design. Creative solutions to typographical design program will be explored, through the application of the practical and technical aspects of typography.  
Prerequisite(s): A minimum grade of "C" in ART 1010 and ART 1011 and ART 1030 and ARTH 2531 and ARTH 2532.

ART 2331 Visual Thinking in Graphic Design  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
A general introduction to graphic design. The focus of this course will be on students’ development of their creativity and skills at effective visual communications, while also learning about general concepts and issues that apply to the field of graphic design.  
Prerequisite(s): A minimum grade of "C" in ART 1020, ART 1010, ART 1011, ART 1030, ART 2531, ART 2532, ART 2330.

ART 2332 Design Theory I  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
A survey of theoretical frameworks in graphic design’s history from early twentieth century to present, this course examines theoretical, philosophical, social and historical aspects of graphic design with emphasis on the relationship of visual representation and design, form as content, semiotics and how graphic designers construct meaning.  
Prerequisite(s): A minimum grade of "C" in ART 1020, ART 1010, ART 1011, and ART 1132.

ART 2335 Photographic Imaging I  
3 Credit Hours. 3 Lecture Hours. 2 Lab Hours.  
This is a studio course that explores fundamental techniques and applications of the photographic medium within the context of art. Students learn to use the basics of digital camera and basic Photoshop skills to serve as an image-enhancing tool. Development of critical thinking skills, personal creative self-expression, and the creative potential of the individual are emphasized. Students are critiqued on the basis of technical proficiency, aesthetic accomplishment and conceptual development.

ART 2430 Print, Paper, Book Arts: Introduction  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is an overview of printmaking processes which may include relief, intaglio, serigraphy, and lithography, as well as, an introduction to hand-papermaking and bookbinding structures. Conceptual emphasis encourages growth of student's personal content and development as an artist.

ART 2536 Animation II  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This is an intermediate course in animation, covering concepts in 2D, stop motion, and sound. Course projects will explore character development, storytelling and dialogue. Students will create a pilot episode.  
Prerequisite(s): A minimum grade of "C" in ART 1536.

ART 3030 Selected Topics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  

ART 3131 Drawing III  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Involves students in drawings of an advanced technical and conceptual nature. Students are encouraged to experiment with traditional and contemporary approaches to personal image making in a variety of drawing materials.  
Prerequisite(s): ART 1010, ART 1011, ART 1020, ART 1030, ARTH 2531, ARTH 2532.

ART 3132 Figure Drawing  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
The historical, structural, anatomical, and compositional study of the human figure as an expressive subject.  
Prerequisite(s): ART 1010, ART 1011, ART 1020, ART 1030, ARTH 2531, ARTH 2532.
ART 3137 Painting: Intermediate
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course is intended to provide students with an advanced exploration of paint as an expressive medium and a visual language. Emphasis is on the cultivation of content and creative exploration as informed by technical competence handling traditional formal elements such as composition, color mixing, mediums, and paint surface. Students are urged to develop a personal iconography and to deepen the expressionistic content of their work with an awareness of traditional and contemporary art.
Prerequisite(s): A minimum grade of "C" in ART 2135.

ART 3230 Ceramics: Intermediate
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course is an intermediate exploration in selected technical areas of ceramics and firing. Students will explore glaze problems, firing techniques and aesthetics. Emphasis will be on historical and aesthetic concerns dealing with the form.
Prerequisite(s): ART 2230.

ART 3235 Materials and Making
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course is an introductory overview of sculptural processes, material properties and dimensional thinking. The course introduces additive/subtractive modeling and basic fabrication techniques for concrete, wood and metal forms. Various projects introduce abstract thinking, working with found objects, and trompe l'oeil (fool the eye) techniques.
Prerequisite(s): ART 2235.

ART 3236 Small Metals Design: Intermediate I
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course is an intermediate level exploration of tools, materials, and techniques of small metal design. Students will learn technical, conceptual, research, design, and professional skills.
Prerequisite(s): A minimum grade of "C" in ART 2236.

ART 3330 New Media Design
3 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
A study of the various aspects of new media design, specifically how formal aesthetic and concept is integrated with motion, sequence, duration, time and sound. Visual solutions will take shape in a non-print format that investigates how a user experiences new media differently than traditional media.
Prerequisite(s): A minimum grade of "C" in ART 2331 and ART 2330 and GCM 1321 and GCM 1411.

ART 3331 Graphic Design Methods
3 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
An intermediate level course which teaches page design and layout of various types, focusing on books, magazines, catalogs, and newspapers. Special emphasis will be on developing students' abilities to find creative yet functional solutions to a diverse range of paper design problems.
Prerequisite(s): A minimum grade of "C" in ART 2331, ART 2330.

ART 3333 Design Systems
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
A study of how to design a visual identity system which includes logos, trademarks, letterheads, business cards, signage, brochures, catalogs, electronic web designs, and other forms of communication appropriate to the business.
Prerequisite(s): A minimum grade of "C" in ART 3331, ART 3330.

ART 3334 Professional Practices
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This advanced level course will cover the practical issues that confront professional graphic designers today. Topics include job searching, freelancing, contract negotiation, ownership of intellectual property, client dynamics, presenting design solutions and other relevant issues. Students will learn to prepare files for printing and apply professional standards within the graphic design industry.
Prerequisite(s): ART 3331.

ART 3335 Photographic Imaging II
3 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
This is a studio course that explores the use of digital photography and Photoshop to creatively express ideas. Emphasis is on the continued development of technique and personal aesthetic. Students will analyze the writings and dogmas of historical and contemporary photo-historians and scholars to further develop their understanding of the medium.
Prerequisite(s): A minimum grade of "C" in ART 2335 and ART 4334.

ART 3338 Typography II
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course provides an advanced study of typographic systems, principles, and usage with emphasis on refining student's understanding of type aesthetics, and its informative, expressive, and experimental potential in solving complex communication problems. Students will use type as a visual form and visible language.
Prerequisite(s): ART 2330.

ART 3430 Print, Paper, Book Arts: Intermediate
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
In this course, multiple color, reduction, digital integration, and mixed-media technical applications for all printing processes will expand students' ability to further their personal conceptual direction, as well as resolving problems of delivery intention, to include both the fine art print and printed public commodity. Students will examine the presence of their print imagery and delivery, within the historical and critical context of printmaking and the powerful democratic ability of the printed image. Bookbinding and papermaking techniques will employ advanced historical/global forms/skills that will foster the intimate experience and powerful self-reflection when viewing imagery and content via the artist's book.
Prerequisite(s): A minimum grade of "C" in ART 2430.

ART 3536 Video & Motion Graphics
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course is an introduction to video, motion graphics, editing, and audio techniques. Student projects will cover expressive techniques in video editing, kinetic type, special effects, motion tracking and web streaming.
Prerequisite(s): A minimum grade of "C" in ART 1536.

ART 3537 Installation & Interactivity
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
In this course, students are introduced to interactivity and programming with motors, sensors, video mapping, and the Arduino. Students will create an independent body of work in interactive media with games, 3D printing, constructed environments and sound installation.
Prerequisite(s): A minimum grade of "C" in ART 1536.

ART 3731 Graphic Design Internship
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Students will apply their skills and learn practices of the profession through a professional experience in graphic design.
Prerequisite(s): ART 3331 and a minimum grade of "C" in ART 3338.

ART 4135 Painting: Advanced
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course is intended to provide students advanced opportunities to explore the process of personal image making through painting media. Students will work to refine their ability to create strong and "finished" imagery by focusing on edges, actively choosing placement of hard and soft edges to move the viewer’s eye through the image and actively mixing colors at edges that interact to strengthen and enhance colors used next to each other. Students will also focus on using paint mediums and on mark making to actively create a painterly surface.
Prerequisite(s): A minimum grade of "C" in ART 3137 or ART 3131 with permission of instructor.
ART 4190 Drawing IV  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
An intensive exploration of drawing media with special focus on advanced levels of personal expression. Thematic content, style, and expressive interpretation are to be determined by the student in consultation with the instructor.  
**Prerequisite(s):** Department approval required.

ART 4192 Illustration  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
This drawing course provides a broad introduction to the field of illustration with a series of individual assignments that mirror professional projects and practices. Each of the class projects will require conceptual thinking (telling a story), critical thinking (verbal/visual vocabulary), creative thinking (problem solving) and strong technical skills. Student process and progress will be documented and presented within each problem. Experimentation is strongly encouraged, as is strong technique, craft and attention to detail. Various traditional drawing media will be introduced and explored, including ink, colored pencil, markers and water-based paint. Students may also choose to explore digital solutions, but they would need to provide their own technology and have a basic understanding of programs like Photoshop and Illustrator. Successful completion of all Area F coursework required.

ART 4232 Ceramics: Advanced  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is intended to provide students expanded opportunities to explore and employ advanced ceramics materials, processes and techniques, glaze calculation and firing techniques leading up to a sophisticated professional portfolio of work that includes an artist statement, resume, and website presence. Students will learn technical, conceptual, research and design skills, as well as professional skills at an advanced level.  
**Prerequisite(s):** A minimum grade of "C" in ART 2330.

ART 4235 Hot and Cold Casting  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course emphasizes artistic expression using hot and cold casting techniques. Contemporary issues will be explored through a variety of topics that may include figurative studies, body-casting, combinations of 2- and 3-dimensional media, explorations of scale relationships, and art as a vehicle for social change. Emphasis is placed upon visual communication and personal expression.  
**Prerequisite(s):** A minimum grade of "C" in ART 2235.

ART 4236 Small Metals Design: Advanced I  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course is an advanced level exploration of tools, materials, and techniques of small metal design. Students will learn technical, conceptual, research, design, and professional skills.  
**Prerequisite(s):** A minimum grade of "C" in ART 2235.

ART 4330 Print, Paper, Book Arts: Advanced  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course continues the exploration of print/paper/book arts processes. Student artists will develop a body of work advancing their portfolio, including furthering individual style, concept development, and print, paper, book arts skills.  
**Prerequisite(s):** A minimum grade of "C" in ART 2430.

ART 4334 Photographic Imaging III  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This is a studio course in which the student explores the use of the digital camera and elements of Photoshop to use as tools for personal creative expression and development of the artist’s vision. Students will question and evaluate the role of photography in contemporary society and discuss the roles and responsibilities of image-makers.  
**Prerequisite(s):** A minimum grade of "C" in ART 2335 and ART 3335.

ART 4335 Web Page Design  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
The student will develop effective graphic design interfaces for website construction. Course content will address software and technical information with an emphasis on items such as site construction and site management, as well as current and future developments in online services, search engines, and how they affect the online community. Students will incorporate workflow and organizational skills into an active online website for a variety of topics.  
**Prerequisite(s):** ART 3331, ART 3338.

ART 4381 Graphic Design Theories  
3 Credit Hours. 3 Lecture Hours. 2 Lab Hours.  
An advanced level course that investigates in-depth theoretical and practical issues concerning the design profession, meaningful communication, ethics, and user-experience through the synthesis of visual and verbal solutions.  
**Prerequisite(s):** A minimum grade of "C" in ART 3331, ART 3330.

ART 4536 3D Animation  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This course introduces students to 3D animation, covering concepts in 3D, sound, and web. Student projects will explore character development, storytelling, and dialogue.  
**Prerequisite(s):** A minimum grade of "C" in ART 1536.

ART 4590 Selected Topics In Art  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Studio experiences to further students artistic development in varied, unique processes and approaches.  
**Prerequisite(s):** A minimum grade of "C" in ART 1010, ART 1011, ART 1020, ART 1030, ARTH 2531, ARTH 2532.

ART 4889 Graphic Design Portfolio  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
The student will compile a professional portfolio and exhibit creative work to the public.  
**Prerequisite(s):** A minimum grade of "C" in ART 4381, ART 3334.

ART 4988 Capstone in Studio Art  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
This is a professional application and practice course that provides an opportunity for students to identify and apply transferable skills acquired in their studio and non-studio classes in the B.A. Studio Art degree. The course is structured to allow each student to conceptualize and implement an individual semester-long capstone project which will be defined by the creative skills and interests gained during the program of study. Students will publicly present capstone projects at the end of the course. Students will also prepare professional materials needed for career opportunities post-graduation. Students must attain senior status and have the permission of the instructor to enroll.  
**Prerequisite(s):** A minimum grade of "C" in ART 1010, ART 1011, ART 1020, ART 1030, ARTH 2531, ARTH 2532.

ART 4999 BFA Portfolio And Exhibition  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Portfolio development and exhibition experience for senior BFA studio students. Must take this class last semester in degree program.

ART 7151 Design Activism  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Students work together as one unit to investigate current social issues and how to bring about social change through design.

ART 7152 Design & Semiotics  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Theoretical and Philosophical principles of signs, signifiers and what is represented is applied to the study of how meaning is created in graphic design. Investigated through studio projects, students will create work that anchors or relays meaning in visual communication.
ART 7153 Design Explorations
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Theoretical and practical application of design problems.

ART 7154 Design for the User
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Focus is placed on the relationship between the user and the principles of tangible design. Coursework includes research of existing problems in design, what are the needs of the user, and how design can be restructured to fill those needs to improve user experience.

ART 7190 Graduate Studio Practice
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Intensive studio practice provides the structure for candidates to pursue creative research in order to expand the depth and complexity of their studio based line-of-inquiry, as well as their ability to critically evaluate, understand, and develop their work in the context of contemporary art issues and interdisciplinary practices. Course may be repeated for credit.

ART 7251 Design Communication
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course explores the problem-solving methods when fusing verbal and visual language into one cohesive body of work. Coursework will emphasize critical readings and analysis of design theories.

ART 7252 Design Systems
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Advanced explorations in branding and brand elements. Students will research critical issues in branding while developing a pliable brand that spans into a variety of collateral.

ART 7253 Design Forms
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Advanced experimentation of visual forms and aesthetics in design and how it impacts user interpretation and meaning.

ART 7254 Design of Information
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Advanced exploration into the theory and practice of information design. Students will research types of information, different information structures and how information can impact meaning and effectiveness.

ART 7351 Design Methods
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Advanced exploration of a variety of methods used to solve visual problems. This can include, but are not limited to, metaphor, rhetoric, deconstructive theory, and narrative.

ART 7352 Design and Typographic Form
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course will integrate typographic theory in graphic design practice. Using typographic skills students will effectively apply type within various contexts, such as print, web, informational, poetic. This course will emphasize the importance of content, audience and purpose.

ART 7353 Design Ethics
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course explores ethical issues relating to the current design community, from the graphic designer’s relationship to other designers, to the clients of design, and the general public.

ART 7354 Design Issues
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
This course explores critical issues within the design profession, and their impact on design and society. Students will become more aware of their priorities and goals as working designers, and develop broader awareness of their place as designers; and design’s place in the culture. Issues reviewed in coursework will further graduate students’ positions as responsible leaders within the professional community.

ART 7890 Professional Practices in Art
1-9 Credit Hours. 1-9 Lecture Hours. 0 Lab Hours.
Strategies emerging artists need to know for career success including studio practices, finances, writing and securing grants, pursuing exhibitions and venues to sell artworks, copyright and legal issues for the artist, commission projects, marketing strategies, portfolio design collateral and web presence.

ART 8030 Selected Topics in Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Specific themes in the visual arts. Topics vary.

ART 8830 Readings and Research in Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Classic and contemporary readings in the field and practice in research and writing standards for theses support paper.

ART 8999 Master of Fine Arts Thesis
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the Master of Fine Arts degree candidate the opportunity of presenting a visual thesis. The candidate will present an exhibition which will be supported by a written defense. A major professor will supervise the creation of the thesis work and the written documentation.

ARTG Art Graphic Design

ARTG 3131 Design for Digital Reproduction
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Students are introduced to the various digital reproduction processes and how design techniques can optimize digital reproduction.

ARTG 3231 Graphic Reproduction Processes
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course introduces students to the various reproduction processes and the products they produce. The course provides an examination of the current reproduction processes for graphic communications, including digital, lithography, flexography, screen, pad, dye sublimation, gravure and specialty reproduction methods. Students will complete hands on experiences using the available processes.

ARTG 3331 Digital and On-Demand Publishing
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course introduces students to on-demand and personalized graphic reproduction. A review of the markets and the application of on-demand and personalized graphic reproduction are given. The collection of data and its reuse in the production of personalized targeted material is presented. Student will compete hands projects related to one to one marketing and personalized publishing.

ARTG 3431 Planning, Finishing, and Estimating
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course introduces students to the planning steps, finish process and the estimating procedures, used in the production of graphic communications projects. Students will plan, estimate, construct, and finish various graphic communications projects.

ARTG 3432 Color Management and Reproduction
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
An exploration of professional color reproduction and management concepts and procedures related to the graphic communication industries.

ARTG 4131 Selected Topics in Graphic Communication
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course will explore special areas in graphic communications and will carry a subtitle.

ARTG 4890 Readings and Research in Graphic Design
1-9 Credit Hours. 1-9 Lecture Hours. 0 Lab Hours.
Specific themes in the graphic arts. Topics vary.

A minimum grade of "C" in ART 1132.

A minimum grade of "C" in ART 1132.

A minimum grade of "C" in ART 1132.

A minimum grade of "C" in ART 1132.

A minimum grade of "C" in ART 1132.

ARTG 5060 Selected Topics in Graphic Design
2 Lecture Hours.

ARTG 5131 Professional Practices in Graphic Design
2 Lecture Hours.

ARTG 5151 Design Exploration I
2 Lecture Hours.

ARTG 5152 Design Exploration II
2 Lecture Hours.

ARTG 5153 Design Exploration III
2 Lecture Hours.

ARTG 5154 Design Exploration IV
2 Lecture Hours.

ARTG 5155 Design Exploration V
2 Lecture Hours.

ARTG 5231 Graphic Reproduction Processes
2 Lecture Hours.

ARTG 5331 Digital and On-Demand Publishing
2 Lecture Hours.

ARTG 5431 Planning, Finishing, and Estimating
2 Lecture Hours.

ARTG 5432 Color Management and Reproduction
2 Lecture Hours.

ARTG 5890 Readings and Research in Graphic Design
2 Lecture Hours.

A minimum grade of "C" in ART 1132.

A minimum grade of "C" in ART 1132.
ARTG 4231 Web Development for Graphic Communications  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course covers planning and designing effective web pages and developing. Students will learn how to enhance web pages through the use of page layout, text formatting, graphics, and multimedia. Students will learn how to obtain a domain name, web-hosting provider, and publish a working website.  
Prerequisite(s): A minimum grade of "C" in ART 1132.

ARTH Art History

ARTH 2531 Art History I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys the arts of the western and non-western world from the prehistoric eras through the 14th century. The emphasis is twofold: 1) recognizing the visual characteristics of period and individual styles through a study of major monuments and, 2) utilizing works of art to better understand the social, cultural and economic realities of the historical eras. The format for the course is lecture with discussion.

ARTH 2532 Art History II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys the arts of the western and non-western world from the 15th century to the present. The emphasis is twofold: 1) recognizing the visual characteristics of period and individual styles through a study of major monuments and, 2) utilizing works of art to better understand the social, cultural and economic realities of the historical eras. The format for the course is lecture with discussion.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531.

ARTH 3251 Dada and Surrealism  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will examine the profound and lasting contributions made by Dada & Surrealist artists as well as other revolutionary modernists of the early 20th century who sought to escape the traditional and rational in art and thought. An analysis of topics (dada and performance; neo-dada; dada and surrealist women; surrealism and photography; dada, surrealism and ethnography; collage; and the impact of surrealism in the United States) will be analyzed to define regressive ideas, which led to the dismantling of previous standards and the rise of an anti-art spirit, which continues today in various guises. Primary documents will be consulted regularly in order to provide a wider appreciation of the variety of Dada and Surrealist media (e.g. literature, film, theater, typography). The format for this course is lecture with discussion.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531.

ARTH 3261 Italian Mannerism  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will address the visual arts of Italy created during the late Renaissance, typically known as the Mannerist period. The class will primarily cover painting, and sculpture, with the inclusion of some architectural works. The course will begin by establishing the artistic traditions of the High Renaissance era to examine Mannerist innovations and shifts in style and aesthetics as well as the maintenance, in some instances, of High Renaissance ideals. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3272 Northern Renaissance Art  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will address the visual arts of northern Europe during the Renaissance, the 14th through the 16th century. The class will primarily cover the painting, printmaking, and sculpture of Germany, Flanders, France, and the Netherlands. The class will begin by establishing the artistic traditions of the medieval era and exhibit how the early Northern Renaissance artists both operated within these traditions and made marked innovations to the visual vocabulary, and will conclude with the 16th-century North's responses to the Protestant Reformation and to the influence of works of the Italian Renaissance. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3282 Pre-Columbian Art  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This survey introduces students to the art produced by the cultures of Mesoamerica up to the time of contact with European cultures; from the earliest traditions of Olmec ceramic sculpture to the spectacular Mayan architecture and awe-inspiring stone carvings of the Aztecs. Sacred architecture, precious stone and metal sculpture, basalt carving traditions, mural paintings and works of art on paper are examined with a consideration to both form and context. The format for this course is lecture with discussion.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531 and ARTH 2532.

ARTH 3377 Graphic Design Art History  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a survey of the history of graphic design communications from prehistory to the present, and will evaluate the impact of culture and technology on the development of graphic design in different historical contexts. Content includes the relation of art and graphic design, techniques of graphic representation, current trends, and the importance of graphic communication in contemporary society.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531.

ARTH 3435 African Art  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the major themes, cultural groups, and art traditions of Africa. Focuses on materials, functions, meaning and the distinctive aesthetic values of cultural objects and their ritual significance in African societies.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.  
Cross Listing(s): AAST 3435.

ARTH 3436 African American Art History  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of African American art and design from the period of pre-colonial Africa to the contemporary United States. The course investigates the creativity and cultural identity of African Americans and their contributions to the visual culture in America.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.  
Cross Listing(s): AAST 3436.

ARTH 3437 American Art  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the history of American Art from the Colonial Period through the present. Works of art and other forms of material culture will be explored and discussed within the context of philosophical, historical, social, and cultural developments. Attention will be given to the writings of artists and critics, as well as texts by contemporary art historians, historians, and other scholars which illustrate the variety of methodologies and interpretations that are currently being brought to bear on American art, architecture, and material culture. The format for this course is lecture with discussion.  
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.
ARTH 3530 Art and Architecture of the Ancient World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will encompass a study of the visual arts, primarily sculpture, painting, and architecture, both secular and religious, of the ancient world from Prehistoric times through circa 350 CE, with an emphasis on the art of Greece and Rome. A historical and cultural background will be provided to lay a contextual groundwork for the more specific information of the works of art and architecture. The material will begin with the examination of the earliest artistic creations by humankind in the Paleolithic era, proceed with the works of the ancient Egyptian, Greek, Etruscan, and ancient Roman cultures, and conclude with the conversion of the Roman Empire to Christianity and to the era known as Early Christian. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3531 Medieval Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will encompass a study of the visual arts in Europe, primarily sculpture, painting, and architecture from the fall of the Roman Empire to the thirteenth century. While some secular works will be covered, primarily the course will address Christian art because of the Church’s strong sway in the Medieval world. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3532 Italian Renaissance Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will encompass a study of the visual arts, primarily sculpture, painting, and architecture, both secular and religious, from the Italian Renaissance. The course will begin by establishing the artistic traditions of the Medieval era and exhibit how the early Renaissance artists both operated within these traditions and made marked innovations to the visual vocabulary, moves which eventually led to the new individualism of the artist and the renowned works of the High Renaissance, with which we will conclude the semester. The class will address differences in style between many of the Italian cities: Florence, Rome, Siena, Mantua, among others. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3533 Baroque and Rococo Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will address the visual arts of the Baroque and Rococo periods in both Northern and Southern Europe. The class will primarily cover painting, and sculpture, with the inclusion of some architectural works. The course will begin by establishing the artistic traditions of the Late Renaissance era to lay the groundwork for the revised aesthetic and innovations of the Baroque, and go on to examine further shifts in style as we move into the Rococo. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3534 19th Century Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the art, artists and issues in 19th century art through lectures and discussion. Topics for discussion include: Classicism & Romanticism, Representations of other cultures, Issues of gender, Realism, Impressionism & Post-Impressionism, Modernism, Abstraction, Symbolism. The format of the course is lecture with discussion.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 3535 20th Century Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the radical changes that occurred in Western painting, sculpture, photography, architecture and design from the beginning of Modernism in the 19th century through the early and late twentieth century. The approach will be lively and broad, utilizing ideas from diverse disciplines including theology, philosophy, literature, music, fashion design, politics, economic, sociology, psychology, the history of technology, and physics. Some of the most culturally significant artists, movements, and masterpieces of modern art will be addressed in readings, lectures, videos and discussion.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 4276 Art Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore selected themes and issues in modern and contemporary theory and criticism as they impact the ways in which art is produced, viewed, and assessed. Topics include Realism, Expressionism & Cognitivism, Formalism, Postmodern Pluralism, and more. The format for the course is seminar.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 4435 Art History Travel Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of important art works on location at museums, galleries, monuments and other sites. Specific topics and locations to be announced.
Prerequisite(s): A minimum grade of "C" in ARTH 2531 and ARTH 2532 or permission of instructor.

ARTH 4530 20th Century Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys European and American art, artists and issues/movements in the 20th century. The purpose of this course is to provide an understanding of not only stylistic principles of the century, but also those human values and cultural events which served as inspiration. Lectures, readings, discussions, and assignments focus on the intentions, creative biographies, and historical circumstances of 20th century artists. The format for this course is lecture with discussion.
Prerequisite(s): A minimum grade of "C" in ARTH 2531 and ARTH 2532.

ARTH 4531 Contemporary Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Through lectures and class discussion, this course explores the development of contemporary art from the 1970s to the present day. We will investigate issues pertaining to contemporary art such as place, memory, consumption, spirituality, identity, power, stories, loss and desire, time, humor, ecology and protest. Course content also considers the nature of “mega-exhibitions” and the changing role of art, artists, and curators as cultural activists; art as the product of economic relations between parties with different vested interests in the material object; visual strategies used in the media and advertising; and the impact of technology on contemporary culture in general and art in particular.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 4630 Senior Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A seminar-format course on selected topics in art history with emphasis on directed readings and classroom discussion.
Prerequisite(s): A minimum grade of "C" in ARTH 2531, ARTH 2532.

ARTH 4830 Art History Research
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent research and study on selected topics in art history.
Prerequisite(s): A minimum grade of "C" in ARTH 2531 and ARTH 2532 and permission of instructor and Departmental approval.
ARTH 4831 Senior Art History Thesis
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent research and writing on a specific topic under the supervision of an Art History faculty member. The thesis is a substantial research paper which demonstrates advanced understanding or interpretation on a specific Art History topic.
Prerequisite(s): A minimum grade of "C" in ARTH 2531 and ARTH 2532 and permission of instructor and Departmental approval.

ARTH 4891 Special Topics in Art History
1-4 Credit Hours. 0-18 Lecture Hours. 0-18 Lab Hours.

ARTH 7231 Art and Architecture of the Ancient World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will encompass a study of the visual arts, primarily sculpture, painting, and architecture, both secular and religious, of the ancient world from Prehistoric times through circa 350 CE, with an emphasis on the art of Greece and Rome. A historical and cultural background will be provided to lay a contextual groundwork for the more specific information of the works of art and architecture. The material will begin with the examination of the earliest artistic creations by humankind in the Paleolithic era, proceed with the works of the ancient Egyptian, Greek, Etruscan, and ancient Roman cultures, and conclude with the conversion of the Roman Empire to Christianity and to the era known as Early Christian. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.

ARTH 7232 Medieval Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will encompass a study of the visual arts in Europe, primarily sculpture, painting, and architecture from the fall of the Roman Empire to the thirteenth century. While some secular works will be covered, primarily the course will address Christian art because of the Church's strong sway in the Medieval world. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.

ARTH 7233 Italian Renaissance Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will encompass a study of the visual arts, primarily sculpture, painting, and architecture, both secular and religious, from the Italian Renaissance. The course will begin by establishing the artistic traditions of the Medieval era and exhibit how the early Renaissance artists both operated within these traditions and made marked innovations to the visual vocabulary, moves which eventually led to the new individualism of the artists and the renowned works of the High Renaissance, with which we will conclude the semester. The class will address differences in style between many of the Italian cities: Florence, Rome, Siena, Mantua, among others. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.

ARTH 7234 Baroque and Rococo Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will address the visual arts of the Baroque and Rococo periods in both Northern and Southern Europe. The class will primarily cover painting, and sculpture, with the inclusion of some architectural works. The course will begin by establishing the artistic traditions of the Late Renaissance era to lay the groundwork for the revised aesthetic and innovations of the Baroque, and go on to examine further shifts in style as we move into the Rococo. The class will be held in a lecture format with images projected during lecture for a combination of visual and verbal information.

ARTH 7235 19th Century Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the art, artists and issues in 19th century art through lectures and discussion. Topics for discussion include: Classicism & Romanticism, Representations of other cultures, Issues of gender, Realism, Impressionism & Post-Impressionism, Modernism, Abstraction, and Symbolism. The format of the course is lecture with discussion.

ARTH 7236 20th Century Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys European and American art, artists and issues/movements in the 20th century. The purpose of this course is to provide an understanding of not only stylistic principles of the century, but also those human values and cultural events which served as inspiration. Lectures, readings, discussions, and assignments focus on the intentions, creative biographies, and historical circumstances of 20th century artists. The format for this course is lecture with discussion.

ARTH 7237 Contemporary Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Through lectures and class discussion, this course explores the development of contemporary art from the 1970s to the present day. We will investigate issues pertaining to contemporary art such as place, memory, consumption, spirituality, identity, power, stories, loss and desire, time, humor, ecology and protest. Course content also considers the nature of "mega-exhibitions" and the changing role of art, artists, and curators as cultural activists; art as the product of economic relations between parties with different vested interests in the material object; visual strategies used in the media and advertising; and the impact of technology on contemporary culture in general and art in particular.

ARTH 7238 African Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the major themes, cultural groups, and art traditions of Africa. Focuses on materials, functions, meaning and the distinctive aesthetic values of cultural objects and their ritual significance in African societies.

ARTH 7330 American Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the history of American Art from the Colonial Period through the present. Works of art and other forms of material culture will be explored and discussed within the context of philosophical, historical, social, and cultural developments. Attention will be given to the writings of artists and critics, as well as texts by contemporary art historians, historians, and other scholars which illustrate the variety of methodologies and interpretations that are currently being brought to bear on American art, architecture, and material culture. The format for this course is lecture with discussion.

ARTH 7377 Graphic Design Art History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a survey of the history of graphic communications from prehistory to the present, and will evaluate the impact of culture and technology on the development of graphic design in different historical contexts. Content includes the relation of art and graphic design techniques of graphic representation, current trends, and the importance of graphic communication in contemporary society.

ARTH 7630 Art History Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A seminar-format course on selected topics in art history with emphasis on directed readings and classroom discussion.

ARTH 7899 Art History Travel Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of important art works on location at museums, galleries and other sites. Specific topics and locations to be announced.

ARTH 8630 Art Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore selected themes and issues in modern and contemporary theory and criticism as they impact the ways in which art is produced, viewed, and assessed. Topics include Realism, Expressionism and Cognitivism, Formalism, Postmodern Pluralism, and more. The format for the course is seminar.
Prerequisite(s): A minimum grade of "C" in ARTH 2531 and ARTH 2532.

ARTH 8831 Art History Research
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent research and study on selected topics in art history.
ARTS Art

ARTS 1100 Art Appreciation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Art 1100 is a 3 semester-credit-hour course focused on fostering an awareness, understanding, and appreciation for the visual arts. Through exposure to cross-cultural art images throughout history, students will build a global artistic vocabulary that allows for the constructive analysis of art objects. Students will also gain an understanding of the influence of art on other important aspects of culture including politics, history, religion, and science.

ARTS 2011 Introduction to Painting
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Acrylic painting from observed and secondary sources.

ARTS 2040 Intro to Darkroom Photography
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Black and white photographic aesthetics, processes. Functions of 35mm camera and processing of film and printing.

ARTS 2110 Introduction to Fibers
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Fundamentals of visual graphic communication as related to modern advertising techniques. Emphasis on design, layout, typography, and reproduction.

ARTS 2400 Intro to Graphic Design
3 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
Basic craft processes and techniques with emphasis on fibers and metalwork.

ARTS 3020 Intermediate Painting
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
The purpose of this class is to allow the student to develop their work through directed and self-motivated activities. Assignments will be designed to allow personal artistic development while further developing an understanding of painting mediums. Regular group and individual critiques will be held to monitor the progress of the student’s work. There will be several directed projects, discussions and demonstrations intended to expand the student’s knowledge of artistic processes.
Prerequisite(s): ARTS 2011 or ART 2135.

ARTS 3110 Advanced Graphic Design
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Advance techniques in visual idea development as applied to the professional field of graphic design and advertising.
Prerequisite(s): ARTS 2110.

ARTS 3140 Intermediate Darkroom Photogra
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Advanced study of the aesthetics and processes in black and white photography.
Prerequisite(s): A minimum grade of "C" in ARTS 2040.

ARTS 3160 Manipulated Silver Print
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Exploration of media and techniques to enhance and alter a silver print. Processes include building and shooting with pinhole cameras, paper negatives, solarization, composite printing, chromoskedaric sabattier, chemigrams, toning, and hand-coloring techniques.
Prerequisite(s): A minimum grade of "C" in ARTS 2040.

ARTS 3200 Art for the Child
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
The child and his or her development in relation to qualitative art experiences including studio experiences. Emphasis on materials and methods suitable for teaching art at the elementary school level. (May not be used for credit by art education majors).

ARTS 3210 Typography
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Introduction to typography as it relates to visual communications, analyzing letterforms from a historical perspective, aesthetic value, purpose, and functionality.
Prerequisite(s): A minimum grade of "C" in ARTS 2110.

ARTS 3220 Branding
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Designing symbols and text as a means to create visual identity for companies as it relates to branding.
Prerequisite(s): A minimum grade of "C" in ARTS 2110.

ARTS 3230 Packaging Design
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Designing and creating product containers utilizing three-dimensional forms as they relate to graphic design.
Prerequisite(s): A minimum grade of "C" in ARTS 2110.

ARTS 3240 Visual Design on the Web
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Introduction to web media, graphics, and web site structure to include best practices for web design. Concepts focusing on basic design, organization, aesthetics, management and development of websites emphasized.
Prerequisite(s): ARTS 2110.

ARTS 3310 Pottery Wheel Techniques
3 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
Techniques of pottery utilizing the potter's wheel.

ARTS 3330 Ceramic Sculpture
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Emphasis on developing ideas into large scale ceramic sculpture. Individual attention and direction facilitated. Projects may include pottery, the figure, abstractions, wall relief, mixed media constructions.
Prerequisite(s): A minimum grade of "C" in ARTS 3310.

ARTS 3340 Advanced Pottery Wheel Techniques
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
This course will emphasize advanced techniques for working on the potter’s wheel.
Prerequisite(s): ART 2230 or ARTS 3310.

ARTS 3400 Introduction to Printmaking
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Basic printmaking processes. Emphasis on relief, intaglio and non-traditional processes, i.e. collagragraph, monoprints.

ARTS 3470 Arts Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theory and practice in art programming management, including audience analysis and development, publicity, promotions and marketing tools examined.
Prerequisite(s): A minimum grade of "C" in ENGL 1101.

ARTS 3610 Screen Printing
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
An introduction to screen printing methods including hand-cut stencils and photographic processes for printing on a variety of surfaces. Emphasis is placed on concept development, repeat pattern, and contemporary approaches to designing fabrics.

ARTS 3620 Jewelry/Enameling
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Design and production of jewelry and enameled objects.

ARTS 3630 Fabric Design
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Fabric design methods and stitch techniques including batik, shibori, discharge, embellishment, and contemporary quilting.

ARTS 3640 Weaving
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Basic weaves, the hand loom, and off the loom weaving techniques.
ARTS 3680 Environmental Art
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
An interdisciplinary introduction to environmental art, examining the role of art in promoting and maintaining sustainable human societies.

ARTS 3700 Figure Sculpture
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Basic sculpture ideas, terminology, processes. Emphasis on the human figure using clay and other media.

ARTS 3720 Fiber Sculpture
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
The application of fiber methods to create three-dimensional pieces, using traditional and non-traditional materials.
Prerequisite(s): A minimum grade of "C" in ARTS 2400.

ARTS 3750 Contemporary Art & Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exploration of contemporary art historical and critical issues.
Prerequisite(s): A minimum grade of "C" in ARHS 2720.

ARTS 3760 Internship I-Pre-Student Teach
1 Credit Hour.
Directed practice in the teaching of students in P-12 public school setting.

ARTS 3800 Electronic Image Manipulation
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Advanced techniques and theory of computer imaging, graphics, illustration, and mixed media.

ARTS 3810 Intro to Digital Photography
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Digital photography techniques, integration of digital software and hardware with the photography process, and digital print production.

ARTS 3820 Intermediate Digital Photography
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Digital photographic study using advanced editing techniques. Focus on in-depth exploration of digital photographic concepts, proficiency in digital print production and introduction of experimental digital printing media.
Prerequisite(s): ART 1020 and ARTS 3810 or permission of Instructor.

ARTS 3840 Advanced Photographic Media
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Advanced techniques in the photographic medium, either in digital, darkroom, or a combination. Approaches include mixed media and installation, with an emphasis on developing a body of work.
Prerequisite(s): ARTS 2040 and ARTS 3810.

ARTS 4700 Senior Portfolio
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
One part of the two-part capstone experience taken prior to or concurrently with ARTS 4740 for senior art majors. Portfolio development, career planning, and professional practices for the artist will be covered.

ARTS 4710 Senior Seminar
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
One part of the two-part capstone experience taken prior to or concurrently with ARTS 4740 for senior art majors. Development and preparation of a body of work for exhibition in a variety of professional venues.

ARTS 4740 Senior Exhibition
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
Open only to art majors. Senior-level exhibition in a gallery setting. Course taken to satisfy graduation requirements.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in ARTS 4700 or ARTS 4710.

ARTS 4760 Internship II--Student Teach
12 Credit Hours. 0 Lecture Hours. 1-12 Lab Hours.
Supervised field based teaching experiences providing the opportunity to use knowledge and skills in a P-12 public setting. A capstone course.

ARTS 5300 Issues in Art Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical examination of educational theory and practice through selected historical and socio-political influences. Examinations of policy, career paths in art education, and global art forms.
Cross Listing(s): ARTS 5300G.

ARTS 5300G Issues in Art Education
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Critical examination of educational theory and practice through selected historical and socio-political influences. Examinations of policy, career paths in art education, and global art forms.

ARTS 5400 Art in the Elementary Grades
3 Credit Hours. 3 Lecture Hours. 1-18 Lab Hours.
Planning and implementing arts instruction at the elementary level. Overview of materials, methods, classroom management and technology appropriate to children at different levels in the elementary classroom. Thirty hours of practicum work is required.
Cross Listing(s): ARTS 5400G.

ARTS 5400G Art in the Elementary Grades
3 Credit Hours. 3 Lecture Hours. 1-9 Lab Hours.
Planning and implementing arts instruction at the elementary level. Overview of materials, methods, classroom management and technology appropriate for the middle and secondary classroom. Thirty hours of practicum work is required.
Prerequisite(s): Admission to Candidacy and a pre-certification certificate from the Georgia Professional Standards Commission.
Cross Listing(s): ARTS 5410G.

ARTS 5410 Art in the Middle and Second Grades
3 Credit Hours. 3 Lecture Hours. 1-9 Lab Hours.
Planning and implementing art instruction at the middle and secondary level. Overview of materials, methods, classroom management and technology appropriate for the middle and secondary classroom. Thirty hours of practicum work is required.

ARTS 5430 Technology in Art Education
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Examination, development, and use of technological resources for teaching art in PK-12 classrooms.

ARTS 5560 Issues in Aesthetics and Art Education Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to basic issues related to the teaching aesthetics, art criticism, and art history to P-12 students. Students will design, implement, and evaluate developmentally appropriate instruction for teaching these issues.
Prerequisite(s): A minimum grade of "C" in ARTS 5400 or ARTS 5410 or a minimum grade of "B" in 5400G or ARTS 5410G.

ARTS 5560G Issues Aesthetics/Art Ed Crit
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to basic issues related to the teaching aesthetics, art criticism, and art history to P-12 students. Students will design, implement, and evaluate developmentally appropriate instruction for teaching these issues.

ARTS 5750G Contemporary Art & Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exploration of contemporary art historical and critical issues.
ARTS 5800 American Arts in History Perspective
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of American visual arts including painting, sculpture, architecture, and the decorative arts. Examines artistic material culture as a means to critical understanding of American life.

ARTS 5850 Museum Studies
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Development of museums in the United States and of the ethics and practices of the museum profession, to include collections management, planning, outreach, and public education.

ARTS 6689 Special Topics in Art
1-3 Credit Hours. 0-2 Lecture Hours. 0-4 Lab Hours.
A study of topics from selected areas of studio art, art history, or art education.

ARTS 6750 Graduate Internship
4 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
Supervised field-based capstone experience.

ARTS 7900 Independent Study in Art
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Qualified students create a body of art work following research and supervised studio experimentation. Proposed work must be approved in writing by supervising faculty and department head prior to initiation of work.

ASTR Astronomy

ASTR 1000 Introduction to the Universe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the universe, examining the historical origins of astronomy; the motions and physical properties of the Sun, Moon, and planets; the formation, evolution, and death of stars; and the structure of galaxies and the expansion of the universe.

ASTR 1010 Astronomy of the Solar System
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Astronomy from early ideas of the cosmos to modern observational techniques. The solar system planets, satellites, and minor bodies. The origin and evolution of the solar system.
Prerequisite(s): Prior or concurrent enrollment in ASTR 1211.

ASTR 1020 Stellar and Galactic Astronomy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of the Sun and stars, their physical properties and evolution, interstellar matter, star clusters, our galaxy and other galaxies, and the origin and evolution of the Universe.
Prerequisite(s): Prior or concurrent enrollment in ASTR 1211.

ASTR 1211 Astronomy Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A series of laboratories designed to measure the physical properties of planets, stars, and galaxies.
Prerequisite(s): Prior or concurrent enrollment in ASTR 1010 or ASTR 1020.

ASTR 3000 Intro to the Universe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the Universe. Examines the historical origins of astronomy; the motions and physical properties of the sun, moon, and planets; the formation, evolution, and death of stars; the structure of galaxies; the expansion of the Universe. (Students may not receive credit for ASTR 3000 if they receive credit for ASTR 1010 and ASTR 1020.)
Prerequisite(s): Completion of MATH 0099 or MATH 1001 or MATH 1111.

ASTR 3131 Optics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Geometric, physical, and quantum optics in which the general principles of wave optics and several optical devices are studied.
Prerequisite(s): A minimum grade of "C" in PHYS 2212K.

ASTR 3137 The Search for Life in the Universe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will describe the current quest to find intelligent life in the universe. It will begin with a discussion of the nature and origin of life on Earth. After considering the search for life in our solar system, techniques used to search for extrasolar planets and extraterrestrial life will be explored. The course will also include a discussion of the physical limitations to interstellar spacecraft and alternative methods of communication.
Prerequisite(s): ASTR 1000 or ASTR 1010 or ASTR 1020.

ASTR 3538 Physical Astronomy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The physical nature of the solar system, stars and galaxies will be studied in detail. Principles of physics will be used and illustrated, especially in the areas of mechanics, thermodynamics, physical optics, and spectral analysis.
Prerequisite(s): PHYS 2211K or PHYS 1111K, and PHYS 2212K or PHYS 1112K.

ASTR 3558 Introduction to General Relativity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the metric description of different spacetimes that describe flat and various curved geometries so as to derive the laws of mechanics for planets, stars, black holes, etc. The course also introduces a very simple model of the expanding universe and briefly introduces cosmology.
Prerequisite(s): PHYS 3537 or permission of instructor.
Cross Listing(s): PHYS 3558.

ASTR 3790 Teaching Internship in Astronomy
1-2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The internship allows students to investigate teaching practices in astronomy. The student will participate in an introductory workshop immediately prior to the start of the semester, intern in the planetarium, and meet with the faculty mentor one hour each week.
Prerequisite(s): Permission of instructor required and ASTR 1000 or ASTR 1010 or ASTR 1020.

ASTR 4130 Astrophysics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will cover advanced topics in Astrophysics. Students will become familiar with the fundamental physics of stars. This includes stellar atmospheres, interiors, and evolution. Students will study the atomic properties of matter and its interaction with light. Students will also study techniques for observing stars using telescopes and interferometers.
Prerequisite(s): A minimum grade of "C" in PHYS 2212K.

ASTR 4138 Galactic Astronomy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Galactic Astronomy will cover advanced topics in galactic structure and evolution. This includes galaxy morphology, stellar and gaseous content, stellar orbits, disk dynamics, central massive black holes, large scale structure, interactions and evolution in a cosmological setting. Students will also be introduced to the historic development of our modern view of the universe.
Prerequisite(s): A minimum grade of "C" in PHYS 2212K.
ASTR 4330 Observational Techniques in Astronomy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will cover advanced topics in astronomical observing techniques. This includes the basic physical principles and methods needed to plan, obtain, and reduce photometric data of celestial objects. Students will be introduced to the principles of spherical astronomy, photoelectric detectors, atmospheric extinction and standard system transformations, and the Image Reduction and Analysis (IRAF) software package.
Prerequisite(s): A minimum grade of "C" in PHYS 2212K.

ASTR 5090 Selected Topics in Astronomy
2-5 Credit Hours. 0-5 Lecture Hours. 0-6 Lab Hours.
A course allowing for investigation of selected topics in Astronomy; it will be taught on a one-time basis. Lecture only courses can be for two, three, or five credit hours. For laboratory courses, one credit hour will be given for every three hours spent working in lab.
Prerequisite(s): A minimum grade of "C" in PHYS 2212K. Cross Listing(s): ASTR 5090G.

ASTR 5090G Selected Topics in Physics
2-5 Credit Hours. 0-5 Lecture Hours. 0-6 Lab Hours.
A course allowing for investigation of selected topics in Astronomy; it will be taught on a one-time basis. Lecture only courses can be for two, three, or five credit hours. For laboratory courses, one credit hour will be given for every three hours spent working in lab. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in PHYS 2212K.

ASTR 5890 Astronomy Research Experience
1-4 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
An independent physics research experience in which a student will investigate a research question under the direction of a faculty member. Students will be expected to maintain a laboratory notebook, prepare a written summary of the research, and give an oral presentation at the end of the experience.
Prerequisite(s): Permission of instructor is required. Cross Listing(s): ASTR 5090G, PHYS 5890, PHYS 5890G.

ASTR 5890G Astronomy Research Experience
1-4 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
An independent physics research experience in which a student will investigate a research question under the direction of a faculty member. Students will be expected to maintain a laboratory notebook, prepare a written summary of the research, and give an oral presentation at the end of the experience. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Permission of instructor is required.
Cross Listing(s): ASTR 5890, PHYS 5890, PHYS 5890G.

ASTR 6100 Stellar Astronomy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A review of stellar astronomy. Stars, evolution of stars, galaxies, active galaxies and quasars, structure of the universe, and cosmology. This course is a survey of stellar astronomy but is designed primarily for students enrolled in graduate education programs, and credit may not be earned in both ASTR 3100 and ASTR 6100.

BCHM Biochemistry

BCHM 2200 Introduction to Biochemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to cell structure and biochemistry. Topics may include molecular components of cells, an overview of metabolism and bioenergetics, structure and function, and applicability in society.
Prerequisite(s): A minimum grade of "C" in CHEM 3401.

BCHM 2910 Introduction to Biochemical Research
1-3 Credit Hours. 0 Lecture Hours. 3-9 Lab Hours.
Faculty originated biochemical lab-based research project. Written report required.
Prerequisite: Prior or concurrent enrollment in CHEM 1211 and CHEM 1211L or CHEM 1211K.

BCHM 3100 Bioinstrumental Chemistry
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Modern methods of instrumental analysis with emphasis on solving biological problems. Laboratory experiments supplement lecture topics. Students may not receive credit for both BCHM 3301 Bioinstrumental Chemistry and CHEM 3100 Instrumental Chemistry.
Prerequisite(s): A minimum grade of "C" in CHEM 2100 and CHEM 3402.

BCHM 3200 Principles of Biochemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A biochemistry course focused on the structure and function of nutrient molecules. Topics include the structure of carbohydrates, lipids, proteins, enzyme function, energetics of metabolism, and metabolic pathways relevant to nutrition. Does not count toward the major in biochemistry or chemistry.
Prerequisite(s): A minimum grade of "C" in CHEM 3402.

BCHM 3310 Bioinorganic Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the function of metal ions in biochemistry, the appropriate physical methods for studying biological metal centers, and the pathways of electron transfer in biomolecules. Topics include metal ion transport and storage, oxygen carriers, and metals in medicine. Majors may not receive credit for both BCHM 3310 Bioinorganic Chemistry and CHEM 3300 Inorganic Chemistry. Prerequisite(s): A minimum grade of "C" in CHEM 3402.

BCHM 3310L Bioinorganic Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
An advanced laboratory course for biochemistry majors. The course applies inorganic techniques to biological problems.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in BCHM 3310.

BCHM 3510 Biophysical Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The fundamentals of physical chemistry from a biochemical perspective. Topics including gas laws, heat and work, and the laws of thermodynamics, material and reaction equilibrium, standard thermodynamic functions, and reaction kinetics. Students may not receive credit for both BCHM 3510 Biophysical Chemistry and CHEM 3501 Chemical Kinetics & Thermodynamics.
Prerequisite(s): A minimum grade of "C" in CHEM 2100 and MATH 2242 and PHYS 2211K. Crosslisting(s): CHEM 3501.

BCHM 3511L Biophysical Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
An advanced laboratory course for biochemistry majors. The course applies physical chemistry principles to solve biological problems.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in BCHM 3510.

BCHM 3900 Biochemical Research
1-3 Credit Hours. 0 Lecture Hours. 3-9 Lab Hours.
Faculty originated biochemical lab-based research project. Scientific paper required.
Prerequisite(s): Prior or concurrent enrollment in CHEM 3402 and permission of department chair.
BCHM 4000 Advanced Topics In Biochemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics include advanced areas of study in biological chemistry and may include biocatalysis, bioinorganic chemistry, computational biochemistry, protein structure and design as well as others. Course may be repeated as topics vary.
Prerequisite(s): a minimum grade of "C" in BCHM 5201.

BCHM 4210 Biotechnology and Biocatalysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces principles and techniques in biotechnology. The biotechnology topics will be used to study the past, present, and future of biocatalysis.
Prerequisite(s): A minimum grade of "C" in BCHM 5201. Cross Listing(s): CHEM 4210.

BCHM 4220 Chemistry of Biofuels
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the principles of fuels and biofuels. It will also cover the latest in biochemistry and biotechnology and apply this knowledge to current research in biofuels.
Prerequisite(s): A minimum grade of "C" in BCHM 5201. Cross Listing(s): CHEM 4220.

BCHM 4991 Advanced Biochemical Research
1-3 Credit Hours. 0 Lecture Hours. 3-9 Lab Hours.
Faculty-originated biochemical lab-based research project. Literature evaluation and lab investigation. Scientific paper and oral presentation to faculty. Biochemistry MAJOR only.
Prerequisite(s): BCHM 5201 and permission of department Chair.

BCHM 5201 Biochemistry I
4 Credit Hours. 0,3 Lecture Hours. 0,3 Lab Hours.
Surveys the fundamental principles of protein structure, enzyme mechanisms, carbohydrate structure, and the major metabolic pathways of carbohydrate metabolism.
Prerequisite(s): A minimum grade of "C" in BCHM 3402.
Cross Listing(s): BCHM 5201G, CHEM 5201G.

BCHM 5201G Biochemistry I
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Surveys the fundamental principles of protein structure, enzyme mechanisms, carbohydrate structure, and the major metabolic pathways of carbohydrate metabolism. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): CHEM 5201, BCHM 5201.

BCHM 5202 Biochemistry II
4 Credit Hours. 0,3 Lecture Hours. 0,3 Lab Hours.
Examines the structure and function of biological membranes, as well as additional metabolic pathways not covered in CHEM 5201, including the degradation and biosynthesis of lipids and amino acids. In addition, the course will examine nucleic acid chemistry, including DNA replication, transcription, recombinant DNA technology and related topics.
Prerequisite(s): A minimum grade of "C" in CHEM 5201.
Cross Listing(s): BCHM 5202G, CHEM 5202G.

BCHM 5202G Biochemistry II
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Examines the structure and function of biological membranes, as well as additional metabolic pathways not covered in CHEM 5201, including the degradation and biosynthesis of lipids and amino acids. In addition, the course will examine nucleic acid chemistry, including DNA replication, transcription, recombinant DNA technology and related topics. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BCHM 5202.

BIOI 1011K Introduction to Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
An introduction to fundamental unifying principles in biology. Topics covered in the course include: chemistry of life, cell structure and membranes, cellular functions (metabolism, respiration, photosynthesis, communication, and reproduction), genetics (inheritance patterns, DNA structure and function, gene expression, and biotechnology), and evolution. This course involves both lecture and lab components.

BIOI 1103 Concepts of Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
May include topics such as evolution, ecology and the environment, genetics and heredity, diversity of life, cells and cellular energy, biomolecules, and the scientific process. (Credit in this non-majors course may not be applied to the Area F requirement in biology. Course not intended for science majors or clinical health majors).

BIOI 1103L Concepts of Biology Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
Laboratories that teach the basic principles of biology and their relevance to biological issues (e.g., disease, food safety, genetic modification, cloning, resistance to antibiotics, evolution, plant resources, and forensic science). Guided inquiry laboratory activities emphasize the scientific method of inquiry and promote the development of observation, analysis, and communication skills. Credit toward graduation will not be granted for both BIOI 1103L and BIOI 1110L.

BIOI 1107 Principles of Biology I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers foundational concepts in molecular and cellular biology. Topics include the scientific method, organic macromolecules, cell structure and function, respiration, photosynthesis, cell division, and the flow of information from DNA to proteins. Requires a minimum grade of C to serve as prerequisite to higher-level BIOI courses.
Prerequisite(s): Prior or concurrent enrollment in all of the following: ENGL 1101, and MATH 1001 or MATH 1101 or MATH 1111.
Corequisite(s): BIOI 1107.

BIOI 1107L Principles of Biology I Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
Laboratory course emphasizing an experimental approach to learning major principles of molecular and cellular biology. Requires a minimum grade of C to serve as prerequisite to higher-level BIOI courses.
Prerequisite(s): Prior or concurrent enrollment in MATH 1111 or MATH 1001 or MATH 1113 and ENGL 1101.
Corequisite(s): BIOI 1107.

BIOI 1108 Principles of Biology II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to evolution and its role in creating biodiversity. Students will explore how evolution creates a hierarchical pattern of shared ancestry among all living things. Topics include natural selection and evolutionary change, speciation, phylogeny and classification, and the structure and function of the major forms of life (domains, kingdoms, and major phyla). Requires a minimum grade of C to serve as prerequisite to higher-level BIOI courses.
Prerequisite(s): A minimum grade of "C" in BIOI 1107 and BIOI 1107L.
Corequisite(s): BIOI 1108.

BIOI 1108L Principles of Biology Laboratory II
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
Laboratory survey of evolution and biodiversity, including natural selection, principles of classification, and the structure and function of the major forms of life (domains, kingdoms, and major phyla). Requires a minimum grade of C to serve as prerequisite to higher-level BIOI courses.
Corequisite(s): BIOI 1108.
BiOL 1108 and BIOL 1108L, and CHEM 1211K, or CHEM 1211 & CHEM 1211L.

BiOL 2010L Microbiology Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
Corequisite(s): BIOL 2010.

BiOL 2081 Human Anatomy and Physiology I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Gross anatomy, histology and physiology of human organ systems. Requires a minimum grade of C to serve as prerequisite to higher-level BIOL courses. (Non-majors course intended for health professions students.)
Prerequisite(s): BIOL 1107 and BIOL 1107L or a minimum grade of "C" in CHEM 1151 and CHEM 1211K or CHEM 1211 and CHEM 1211L.
Corequisite(s): BIOL 2081L.

BiOL 2081L Human Anatomy and Physiology I Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
A laboratory designed to instruct and give students experience with lab safety, use of a microscope, cells and their parts, cell division, tissues, the integumentary system, skeletal system, muscular system, and nervous system. Requires a minimum grade of C to serve as prerequisite to higher-level BIOL courses. (Non-majors course intended for health professions students.)
Corequisite(s): BIOL 2081. Cross Listing(s): KINS 2511.

BiOL 2082 Human Anatomy and Physiology II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of BIOL 2081. Anatomy, histology, and physiology of human organ systems. Requires a minimum grade of C to serve as prerequisite to higher-level BIOL courses. (Non-majors course intended for health professions students.)
Prerequisite(s): BIOL 2081.
Corequisite(s): BIOL 2082L.
Cross Listing(s): KINS 2532.

BiOL 2082L Human Anatomy and Physiology II Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
A laboratory designed to instruct students on the form and function of the circulatory system, lymphatic system, respiratory system, digestive system, urinary system and reproductive system. Requires a minimum grade of C to serve as prerequisite to higher-level BIOL courses. (Non-majors course intended for health professions students.)
Corequisite(s): BIOL 2082.
Cross Listing(s): KINS 2512.

BiOL 2099 Special Topics in Biology
4 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
Course taught on a special topic in biology on a one-time basis.
Prerequisite(s): Permission of instructor.

BiOL 2120 Plant Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Evolution and diversity of plants, including comparative morphology, anatomy, physiology, growth and development, and reproduction. Plants will be examined at the cellular, organismal, and community levels. Laboratories may include field trips. Students may not count both BIOL 2120 and BIOL 3535 toward the Biology major.
Prerequisite(s): BIOL 1108 and BIOL 1108L.

BiOL 2240 Microbiology
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Emphasizes fundamental principles of microbiology. Topics include structure, physiology, and economic importance of microorganisms. (Non-majors course intended for health professions students.)

BiOL 2275 Microorganisms and Disease
4 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Morphology, genetics, physiology, and public health importance of microorganisms with emphasis on bacterial pathogens.
Prerequisite(s): A minimum grade of "C" in BIOL 2082 and 2082L.

BiOL 2275L Micro-Organisms/Disease Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
Corequisite(s): BIOL 2275.
BiOL 2320 Research Methods Biology  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Provides Departmental Honors in Biology students an overview of basic research methods, experimental design, visual presentation and analysis of biological information in diversity of biology sub-disciplines. This course provides the foundation for understanding the analyses typically presented in biological publications as well as the precepts necessary to plan a research project effectively.  
Prerequisite(s): BIOL 1011K and acceptance into the Departmental Honors in Biology Program is required.

BiOL 3099 Selected Topics in Biology  
1-4 Credit Hours. 1-3 Lecture Hours. 0.3 Lab Hours.  
Course taught on a selected topic in biology on a one time basis.  
Prerequisite(s): BIOL 1108 and BIOL 1108 and CHEM 1211K or CHEM 1211 and CHEM 1211L.

BiOL 3100 People and the Environment  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Interactions between humans and the support systems of the earth which are essential to their existence. Not for credit as a biology major elective.  
Prerequisite(s): BIOL 1107.

BiOL 3131 Physiology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to the fundamental principles of physiology. The focus is on how organisms maintain homeostasis in the face of changes in their internal and external environment. This course will cover energetics, the basic physiological processes of cells, how cell signaling can coordinate more elaborate functions, the hierarchical organization of cells into organs and organ systems, and how these organ systems can carry out complex adaptive functions. Students will see the fundamental relationship between structure and function and learn how physiological systems are constrained by phylogeny, physical limits, and functional trade-offs. Requires a minimum grade of C to serve as prerequisite to higher-level BiOL courses.  
Prerequisite(s): BIOL 1108, BIOL 1108L; CHEM 1211K, or (CHEM 1211 and CHEM 1211L).

BiOL 3133 Evolution and Ecology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to major principles of evolution and ecology. This course covers the origin and maintenance of genetic variation, genetic change in populations over time (microevolutionary processes of selection, drift, and gene flow), and taxonomic diversification (macroevolutionary process of speciation). Students will see how this evolution and diversification are shaped by ecological interactions between organisms and their abiotic and biotic environment. These ecological interactions will be studied at the population, community, and ecosystem levels. Requires a minimum grade of C to serve as prerequisite to higher-level BiOL courses.  
Prerequisite(s): BIOL 1108 and BIOL 1108L; CHEM 1211K or (CHEM 1211 & CHEM 1211L).

BiOL 3134 Cell and Molecular Biology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to cell structure and biochemistry. Topics may include gene regulation; bioenergetics; catalysis; cellular metabolism; cell evolution; genetic engineering; protein synthesis, structure and function. Requires a minimum grade of C to serve as prerequisite to higher-level BiOL courses.  
Prerequisite(s): BIOL 1108 and BIOL 1108L and CHEM 1211K or CHEM 1211 and CHEM 1211L.

BiOL 3440 Field Biology  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Field study of the basic natural history of plants and/or animals of the southeastern United States. Lectures, laboratories, and field trips emphasize the ability to locate, observe, collect, and identify organisms in the field, as well as manage field data.  
Prerequisite(s): BIOL 1108 and BIOL 1108L.

BiOL 3535 Botany  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to the biology of plants. Topics include the evolution and diversity of plants, as well as the unique morphology, physiology, reproduction and ecology of higher plants in particular. Students may not count both BIOL 2120 and BIOL 3535 toward the Biology major.  
Prerequisite(s): BIOL 1108 and BIOL 1108L.

BiOL 3610 Topics in Life Science for Educators  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of life sciences including topics such as biochemistry, cellular structure and function, DNA and protein synthesis, genetics and evolution, animal structure and function, the kingdoms of life, and principles of ecology. Admission to the College of Education and two courses in science, including one lab course. Open only to students in middle grades science track.

BiOL 3611 Research Methods Seminar  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
Students read and discuss scientific literature in advance of professional seminar presentations, attend and participate in seminar presentations, and write reflective summaries. Students practice reading scientific literature, discuss commonly employed methods of data analysis, and experience the dissemination of science through seminar presentations. The course may be repeated up to two times for additional credit.  
Prerequisite(s) BIOL 1108 and BIOL 1108L.

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Provides students in Departmental Honors in Biology with a structured introduction to current topics in biological research. The course familiarizes students with the scope of biological research and aids students in selecting an area of inquiry to pursue their capstone research requirement. Students will attend the Departmental Seminar series as part of this course. One outcome of this course is a research proposal written with a faculty mentor. Students may not receive credit for this course and BIOL 4620.

Prerequisite(s): BIOL 1101K and acceptance into the Departmental Honors in Biology Program is required.

BiOL 3790 Teaching Internship in Biology  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Student internship in teaching under the mentorship of a faculty member. The student will participate in a workshop immediately prior to the start of the summer intern in a designated Biology course, and meet with the faculty mentor one hour each week.  
Prerequisite(s): BIOL 1108 and BIOL 1108L.

BiOL 4130 Genetics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is a broad survey of the principles of inheritance, including the study of gene structure, gene function, and the role of genes in determining the traits of living organisms. Topics include the molecular structure of DNA/RNA, replication, transcription, translation, interaction of genes, linkage and mapping, sex linkage, regulation of gene expression, and Mendelian and non-Mendelian inheritance.  
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BiOL 4150 Horticulture  
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.  
Basic gardening principles with emphasis on plant growth and development as responses to environmental conditions; plant classification, growth and development, environment, propagation, disease, pest control.  
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and BIOL 2120 or BIOL 3535.  
Corequisite(s): BIOL 4150L.
BIOL 4230 Introduction to Immunology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the biology of lymphocytes and adaptive immune response including the study of immunoglobulins and cytokines. The roles of the immune system in health and disease are also examined.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4240 Biology of Microorganisms
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Covers the principles and techniques of general microbiology, including physiology, genetics, and host-parasite interactions involving bacteria, eukaryotic microorganisms and viruses.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4310 Applied Microbiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Microbiological aspects of food, milk, water, domestic wastes, and industry.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4320 Environmental Microbiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Principles of microbial ecology that may include biogeochemical cycling, symbiotic relationships, and microbial life in various terrestrial and aquatic habitats. Laboratory will cover methods to study the diversity, phylogeny, and metabolism of Bacteria and Archaea.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4450 Human Embryology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics will include development of the male and female reproductive systems and gamete formation, the process of fertilization, implantation, and the formation of the placenta. Development of the germ cell layers and subsequent development of the major organ systems will be covered with emphasis on the cardiovascular system, respiratory system, digestive system, urogenital system, limb formation, and neurologic system. The most common pediatric congenital defects associated with these systems will also be discussed and clinical examples provided.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4470 Sea Turtle Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Vertebrate anatomy, embryology, migration, population genetics, conservation and management of sea turtles and other threatened or endangered species.
Prerequisite(s): Completion of BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4520 Medical Microbiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Disease causing microbes, their diagnosis, pathogenesis, and epidemiology.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4530 Natural History of the Vertebrates
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Life history and functional biology of major vertebrate groups. Emphasis on behavioral, reproductive and feeding adaptations using case studies. Labs focus on field identification of native species.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4532 Evolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
“Covers the historical development of evolutionary thought and focuses on current issues in evolution. Emphasis is placed on the perceived importance of natural selection, mechanisms of speciation, the history of life on Earth, and human evolution.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4535 Vertebrate Zoology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the evolution, structure, and function of the vertebrates. This course will trace the origin of vertebrates from their invertebrate ancestors and explore how basic vertebrate design has evolved in the major vertebrate groups. Students will also learn how vertebrate structure has affected their function, distribution, behavior, and ecology.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4540 Principles of Ecology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Reviews basic ecological principles and current hypotheses relevant to biological organisms from the level of the population to ecosystems. Application of mathematical models to biological processes is emphasized.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4541 Invertebrate Zoology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A survey of the diversity and basic biology of the invertebrate animal phyla by comparing the body plans, life histories, and ecology of a range of representative species. Emphasis is placed on adaptations responsible for the diversity and life history strategies of invertebrates, and identifications of locally important invertebrate groups. Students may not count both BIOL 3630H and BIOL 4620 toward the Biology major.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4550 Biology of Marine Organisms
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Relationship between organisms and abiotic and biotic features of the marine environment, with emphasis on local marine ecosystems. Field labs.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Corequisite(s): BIOL 4550L.

BIOL 4550L Marine Organisms Lab
0 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
Corequisite(s): BIOL 4550.

BIOL 4620 Undergraduate Seminar Undergraduate Seminar
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Group study of selected biological topics held in conjunction with the normal seminar schedule of the Department of Biology. Topics will vary each semester and will be led by biology faculty.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and Junior standing in Biology Program is required.

BIOL 4635 Biological Basis of Animal Behavior
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will cover the biological basis of animal behavior, emphasizing the evolution, function, development and causes of behavioral actions by animals. Classes will be interactive and include student discussions. Video clips will illustrate behavioral concepts discussed in the course. A range of topics will be covered, including such possibilities as communication, predator/prey interactions, reproductive behavior, the interaction of genes and the environment, the development of behavior and sensory mechanisms.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4730 Internship in Biology
1-3 Credit Hours. 0 Lecture Hours. 3-9 Lab Hours.
Qualified biology majors may acquire practical experience by working with a public or private agency that specializes in the proposed area of study. A faculty member in the biology department will act as advisor. Internships must be approved by the head of the department, and a poster presentation of the results must be presented at the end of the semester.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
BIOL 4890 Research
1-4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Biology majors will be encouraged to conduct a research project under the supervision of faculty. The faculty recommendation must have approval of the head of the biology department. A written abstract and an oral presentation of the results by the student must be presented at the end of the semester.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.

BIOL 4895 Honors Research
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent research under the guidance of a biology faculty member for students in the Departmental Honors program. Required for students attempting to earn Departmental Honors in Biology. Students may register for 1-3 credit hours, but must complete 4 credit hours. Students opting to attempt the honors degree program would be precluded from receiving biology elective credit for BIOL 4890.

BIOL 4999 Honors Thesis
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Written and oral presentation of results of independent research. Honors thesis must follow the guidelines adopted by the University Honors Program. Required for students attempting to earn Departmental Honors in Biology.

BIOL 5099 Selected Topics/Biology
1-4 Credit Hours. 1-3 Lecture Hours. 0.3 Lab Hours.
A course taught on a selected topic in biology on a one-time basis.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5099G.

BIOL 5099G Selected Topics/Biology
1-4 Credit Hours. 1-3 Lecture Hours. 0.3 Lab Hours.
Course taught on a selected topic in biology on a one-time basis. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5099.

BIOL 5100 Cell and Molecular Biology Lab
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Laboratory research techniques in cell and molecular biology, with emphasis on inquiry-based projects, data analysis, and written and oral presentations.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and CHEM 3401.
Cross Listing(s): BIOL 5100G.

BIOL 5100G Cell and Molecular Biology Laboratory
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Laboratory research techniques in cell and molecular biology, with emphasis on inquiry-based projects, data analysis, and written and oral presentations. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5100.

BIOL 5110 Sensory Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The anatomy and physiology of the major sensory systems - chemosensory, hearing, vision and the somatosensory tactile and pain systems, and how the sensory pathways are interpreted by the nervous system to affect perception and behavior. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5110G.

BIOL 5110G Sensory Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The anatomy and physiology of the major sensory systems - chemosensory, hearing, vision and the somatosensory tactile and pain systems, and how the sensory pathways are interpreted by the nervous system to affect perception and behavior. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5110.

BIOL 5120 Reproductive Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics include the origin and maintenance of sexual reproduction, sexual selection among vertebrates, male and female reproductive anatomy and physiology and a survey of animal breeding systems across taxa.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5120G.

BIOL 5120G Reproductive Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics include the origin and maintenance of sexual reproduction, sexual selection among vertebrates, male and female reproductive anatomy and physiology and a survey of animal breeding systems across taxa. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5120.

BIOL 5131 Cell Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the structure and physiology of cells and subcellular organelles. Topics include the cell membrane and membrane transport, the extracellular matrix of the cell, the cell cytoskeleton, DNA structure and replication, transcription, translation and the regulation of gene expression.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5131G.

BIOL 5131G Cell Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics include the origin and maintenance of sexual reproduction, sexual selection among vertebrates, male and female reproductive anatomy and physiology and a survey of animal breeding systems across taxa. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5130.

BIOL 5132 Molecular Genetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines aspects of inheritance of organisms at the molecular, biochemical, and/or cellular levels.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5132G.

BIOL 5132G Molecular Genetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines aspects of inheritance of organisms at the molecular, biochemical, and/or cellular levels. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5132.
BIOL 5141 Forensic Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Forensic biology is the marriage of biological sciences and the law. The extensive use of biological evidence has had a significant bearing on the course of law enforcement investigations in criminal and civil court proceedings. This course will introduce students to some of the basic concepts in forensic biology. Students should expect graphic imagery associated with actual forensic cases.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5141G.

BIOL 5141G Forensic Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Forensic biology is the marriage of biological sciences and the law. The extensive use of biological evidence has had a significant bearing on the course of law enforcement investigations in criminal and civil court proceedings. This course will introduce students to some of the basic concepts in forensic biology. Graduate students will be required to complete advanced-level assignments beyond the scope of the undergraduate requirements. These assignments require a higher level of mastery in the subject matter with additional required deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5141.

BIOL 5142 Molecular Biotechniques Molecular Biotechniques
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Highlights modern discoveries in molecular genetics and their application in today's world. In addition to the body of facts associated with molecular methodology, the course will introduce students to experimental techniques such as PCR, electrophoresis, restriction enzyme digest analysis, and DNA sequencing.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5142G.

BIOL 5142G Molecular Biotechniques
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Highlights modern discoveries in molecular genetics and their application in today's world. In addition to the body of facts associated with molecular methodology, the course will introduce students to experimental techniques such as PCR, electrophoresis, restriction enzyme digest analysis, and DNA sequencing. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5142.

BIOL 5148 Human Genetics
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Basic principles of Mendelian inheritance and molecular genetics are applied to a systematic review of human disorders. Included are disorders of blood, connective tissue, muscles, lysosomes, lipoproteins, transport membrane and mechanisms, amino acid metabolism and the immune system. Special attention is given to diseases caused by chromosomal abnormalities. Sex determination, genetic markers, gene mapping and population genetics are also covered.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5148G.

BIOL 5148G Human Genetics
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Basic principles of Mendelian inheritance and molecular genetics are applied to a systematic review of human disorders. Included are disorders of blood, connective tissue, muscles, lysosomes, lipoproteins, transport membrane and mechanisms, amino acid metabolism and the immune system. Special attention is given to diseases caused by chromosomal abnormalities. Sex determination, genetic markers, gene mapping and population genetics are also covered. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5148.

BIOL 5150 Cancer Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to carcinogenesis with an emphasis on the genetic, molecular, and cellular mechanisms regulating cancer initiation, progression, and metastasis.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5150G.

BIOL 5150G Cancer Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to carcinogenesis with an emphasis on the genetic, molecular, and cellular mechanisms regulating cancer initiation, progression, and metastasis. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5150.

BIOL 5160 Plant Physiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Physiologic processes occurring in plants and the conditions which affect these processes. Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and BIOL 2120 or BIOL 3535.
Cross Listing(s): BIOL 5160G.

BIOL 5160G Plant Physiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Physiologic processes occurring in plants and the conditions which affect these processes. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5160.

BIOL 5200 Mammalian Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
General physiologic processes of mammals.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5200G.

BIOL 5200G Mammalian Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
General physiologic processes of mammals. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5200.
BiOL 5230 Comparative Animal Physiology
Comparative Animal Physiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A study of the physiology of animals within a comparative and integrative context. Selected topics include animal movement, circulation, respiration, osmoregulation, nervous and endocrine function and energetic metabolism. Laboratory will reinforce lecture content through inquiry-based activities.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5230G.

BiOL 5230G Comparative Animal Physiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A study of the physiology of animals within a comparative and integrative context. Selected topics include animal movement, circulation, respiration, osmoregulation, nervous and endocrine function and energetic metabolism. Laboratory will reinforce lecture content through inquiry-based activities. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5230.

BiOL 5237 Physiological Ecology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines how physiological adaptations of animals and plants to abiotic environmental factors (e.g., temperature, salinity, moisture, ultraviolet radiation) contribute to the understanding of local species diversity, biogeographic patterns, and habitat exploitation. Emphasis is placed on how physiological function (e.g., osmoregulation, thermoregulation, gas exchange, energy use) interfaces with ecology and evolutionary biology.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5237G.

BiOL 5237G Physiological Ecology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines how physiological adaptations of animals and plants to abiotic environmental factors (e.g., temperature, salinity, moisture, ultraviolet radiation) contribute to the understanding of local species diversity, biogeographic patterns, and habitat exploitation. Emphasis is placed on how physiological function (e.g., osmoregulation, thermoregulation, gas exchange, energy use) interfaces with ecology and evolutionary biology. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5237.

BiOL 5239 Neurobiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the mechanisms of neural responses, neural integration, neural development, and environmental effects on developing mature nervous systems.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5239G.

BiOL 5239G Neurobiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the mechanisms of neural responses, neural integration, neural development, and environmental effects on developing mature nervous systems. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5239.

BiOL 5240 Histology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the origin, development, structure and function of vertebrate tissues.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5240G.

BiOL 5240G Histology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the origin, development, structure and function of vertebrate tissues. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5240.

BiOL 5241 Comparative Vertebrate Anatomy
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A comparative and functional study of the morphological systems of vertebrates. Laboratory emphasizes dissection of representative vertebrate groups.
Cross Listing(s): BIOL 5241G.

BiOL 5241G Comparative Vertebrate Anatomy
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A comparative and functional study of the morphological systems of vertebrates. Laboratory emphasizes dissection of representative vertebrate groups. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5241.

BiOL 5242 Developmental Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course is an introduction to the principles of animal and plant development. The focus is on how male and female gametes fuse to form a zygote and how a single-celled zygote develops into an animal with multiple organs with specialized function. This course will cover the molecular and cellular mechanisms involved in fertilization and early embryonic development, molecular signaling involved in development of organs and organ systems, the concept of stem cells and regeneration, and cellular and molecular signaling mechanisms in plant development. Students will see the fundamental conservation of molecular and cellular mechanisms across animals and plants during development as an important example of evolution.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5242G.

BiOL 5242G Developmental Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course is an introduction to the principles of animal and plant development. The focus is on how male and female gametes fuse to form a zygote and how a single-celled zygote develops into an animal with multiple organs with specialized function. This course will cover the molecular and cellular mechanisms involved in fertilization and early embryonic development, molecular signaling involved in development of organs and organ systems, the concept of stem cells and regeneration, and cellular and molecular signaling mechanisms in plant development. Students will see the fundamental conservation of molecular and cellular mechanisms across animals and plants during development as an important example of evolution. Graduate students will be required to complete advanced-level assignments beyond the scope of the undergraduate requirements. These assignments require a higher level of mastery in the subject matter with additional required deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5242.
BIOL 5243 Toxicology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
An introduction to the principles of toxicology with a focus on the biology of aquatic organisms. Topics include risk assessment, regulatory toxicology, mutagenesis, teratology, and toxicology of the nervous and reproductive systems.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5243G.

BIOL 5243G Toxicology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
An introduction to the principles of toxicology with a focus on the biology of aquatic organisms. Topics include risk assessment, regulatory toxicology, mutagenesis, teratology, and toxicology of the nervous and reproductive systems. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5243.

BIOL 5246 Human Pathophysiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A selective survey of causes and effects of disease in humans at the molecular, cellular, and systemic level. Selected topics include cellular malfunctions, altered cell environments, cancer biology, and the pathophysiology of the nervous, endocrine, cardiovascular, pulmonary, and renal organ systems.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5246G.

BIOL 5246G Human Pathophysiology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A selective survey of causes and effects of disease in humans at the molecular, cellular, and systemic level. Selected topics include cellular malfunctions, altered cell environments, cancer biology, and the pathophysiology of the nervous, endocrine, cardiovascular, pulmonary, and renal organ systems. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5246.

BIOL 5247 Endocrinology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A study of endocrine mechanisms, including their evolution and importance at various levels of biological organization.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5247G.

BIOL 5247G Endocrinology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A study of endocrine mechanisms, including their evolution and importance at various levels of biological organization. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5247.

BIOL 5248 Immunology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A detailed study of the mammalian immune system emphasizing the experimental basis of current immunological theories. Topics include antigen antibody interactions, organization and expression of immunoglobulin genes, complement, major histocompatibility complex, antigen processing and presentation, and generation of humoral and cellular immune responses.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5248G.

BIOL 5248G Immunology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A detailed study of the mammalian immune system emphasizing the experimental basis of current immunological theories. Topics include antigen antibody interactions, organization and expression of immunoglobulin genes, complement, major histocompatibility complex, antigen processing and presentation, and generation of humoral and cellular immune responses. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5248.

BIOL 5250 Limnology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the physical, chemical, and biological aspects of lakes and the interrelationships of all three domains of life involved in nutrient and energy cycling in these ecosystems. Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5250G.

BIOL 5250G Limnology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the physical, chemical, and biological aspects of lakes and the interrelationships of all three domains of life involved in nutrient and energy cycling in these ecosystems. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5250.

BIOL 5260 Invasive Species
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Ecological and economic consequences of invasive, non-native species with topics that include the history of introductions, ecological and evolutionary processes, and the control and prevention of biological invasions.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5260G.

BIOL 5260G Invasive Species
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Ecological and economic consequences of invasive, non-native species with topics that include the history of introductions, ecological and evolutionary processes, and the control and prevention of biological invasions. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5260.

BIOL 5333 Emerging Diseases
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the epidemiology of emerging and re-emerging human diseases throughout the world, but with emphasis on the situation in North America. New and resurging diseases caused by prions, viruses, bacteria, protozoa, fungi, arthropods, and helminths will be discussed, including some vector-borne and tropical diseases.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5333G.
BIOL 5333G Emerging Diseases
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the epidemiology of emerging and re-emerging human diseases throughout the world, but with emphasis on the situation in North America. New and resurging diseases caused by prions, viruses, bacteria, protozoa, fungi, arthropods, and helminths will be discussed, including some vector-borne and tropical diseases. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5333.
BIOL 5340 Plant Pathology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A broad introduction to representative common plant diseases and disorders with emphasis on diagnoses, causes, epidemiology, and methods of control.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134; and BIOL 2120 or BIOL 3535.
Cross Listing(s): BIOL 5340G.
BIOL 5340G Plant Pathology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A broad introduction to representative common plant diseases and disorders with emphasis on diagnoses, causes, epidemiology, and methods of control. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5340.
BIOL 5341 Parasitology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A study of the general principles of parasitism, with emphasis on morphology, classification, identification, and life cycles of parasites of vertebrates.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5341G.
BIOL 5341G Parasitology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A study of the general principles of parasitism, with emphasis on morphology, classification, identification, and life cycles of parasites of vertebrates. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5341.
BIOL 5343 Medical-Veterinary Entomology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
An intensive study of the role of arthropods in the transmission, dissemination and causation of diseases of humans and animals. Topics include identification of vector arthropods and associated diseases, ecology, and control.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5343G.
BIOL 5343G Medical-Veterinary Entomology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Introduces the principles and methods of biosystematics. Speciation, bio-nomenclature, hierarchical taxonomic categories, systematic characters, molecular systematics, and phylogenetic analyses are discussed. Laboratories involve use of modern molecular techniques and computational analysis with a variety of software packages. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5343.
BIOL 5345 Systematic Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Introduces the principles and methods of biosystematics. Speciation, bio-nomenclature, hierarchical taxonomic categories, systematic characters, molecular systematics, and phylogenetic analyses are discussed. Laboratories involve use of modern molecular techniques and computational analysis with a variety of software packages.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5345G.
BIOL 5345G Systematic Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Introduces the principles and methods of biosystematics. Speciation, bio-nomenclature, hierarchical taxonomic categories, systematic characters, molecular systematics, and phylogenetic analyses are discussed. Laboratories involve use of modern molecular techniques and computational analysis with a variety of software packages. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): BIOL 5345.
BIOL 5346 Agroecology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Agroecology provides the theoretical and conceptual framework for sustainable agriculture with an emphasis on underlying environmental factors, crop plants and animals. Topics include biotic and abiotic factors influencing biodiversity, interaction and stability of agroecosystems, organic farming, agroforestry, energy-use in agriculture and ways to transition towards sustainability.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134; and BIOL 2120 or BIOL 3535.
Cross Listing(s): BIOL 5346G.
BIOL 5346G Agroecology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Agroecology provides the theoretical and conceptual framework for sustainable agriculture with an emphasis on underlying environmental factors, crop plants and animals. Topics include biotic and abiotic factors influencing biodiversity, interaction and stability of agroecosystems, organic farming, agroforestry, energy-use in agriculture and ways to transition towards sustainability. Graduate students will be required to complete advanced-level assignments beyond the scope of the undergraduate requirements. These assignments require a higher level of mastery in the subject matter with additional required deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5346.
BIOL 5347 Fisheries Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the principles and practices of fisheries management and fish conservation, built on a foundation of biology, ecology, and fisheries science, with emphasis on freshwater North American species and environments. Laboratory emphasizes applied methods for collection, analysis, and interpretation of fisheries data. Field trips are required.
Prerequisite(s): BIOL 3131, BIOL 3133, BIOL 3134.
Cross Listing(s): BIOL 5347G.
BIOL 5347G Fisheries Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the principles and practices of fisheries management and fish conservation, built on a foundation of biology, ecology, and fisheries science, with emphasis on freshwater North American species and environments. Laboratory emphasizes applied methods for collection, analysis, and interpretation of fisheries data. Field trips are required.
Cross Listing(s): BIOL 5347.
**BIOL 5400 Barrier Island Ecology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Covers the abiotic and biotic environment, flora, and fauna of coastal barrier island habitats with a focus on Georgia's barrier islands. Topics may include geological history, coastal processes, and ecological communities of barrier island habitats. Current threats and current and future coastal management techniques will be discussed.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5400G.

**BIOL 5400G Barrier Island Ecology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Covers the abiotic and biotic environment, flora, and fauna of coastal barrier island habitats with a focus on Georgia's barrier islands. Topics may include geological history, coastal processes, and ecological communities of barrier island habitats. Current threats and current and future coastal management techniques will be discussed. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5400.

**BIOL 5431 Virology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of the biology of viruses, with emphasis on viral diversity, virus-host interactions, viral diseases of humans, animals and plants and uses of viruses in medicine, research and biocontrol.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5431G.

**BIOL 5431G Virology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of the biology of viruses, with emphasis on viral diversity, virus-host interactions, viral diseases of humans, animals and plants and uses of viruses in medicine, research and biocontrol. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5431.

**BIOL 5432 Deep Sea Environments**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the current knowledge about hydrothermal systems in terms of their deep-sea environment and their geological and chemical makeup. Emphasis is placed on studying symbiotic relationships, reproductive biology, larval dispersal, thermal tolerances, sulfide and sensory adaptations by organisms found in non-vent, vent, and cold seep environments.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5432G.

**BIOL 5432G Deep Sea Environments**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the current knowledge about hydrothermal systems in terms of their deep-sea environment and their geological and chemical makeup. Emphasis is placed on studying symbiotic relationships, reproductive biology, larval dispersal, thermal tolerances, sulfide and sensory adaptations by organisms found in non-vent, vent, and cold seep environments. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5432.

**BIOL 5441 Mycology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Broad introduction to various taxonomic groups of Fungi, emphasizing morphology, taxonomy, evolution, physiology, and economic importance. Selected mycolic diseases and symbiotic relationships in nature will be explored.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5441G.

**BIOL 5441G Mycology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Broad introduction to various taxonomic groups of Fungi, emphasizing morphology, taxonomy, evolution, physiology, and economic importance. Selected mycolic diseases and symbiotic relationships in nature will be explored. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5441.

**BIOL 5442 Entomology**  
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.  
Examines the phylogeny, morphology, life history and ecology of insects. Identification of local species will be emphasized. Field trips required.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5442G.

**BIOL 5442G Entomology**  
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.  
Examines the phylogeny, morphology, life history and ecology of insects. Identification of local species will be emphasized. Field trips required. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5442.

**BIOL 5443 Plant Taxonomy**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
This course teaches the identification and taxonomy of the vascular plants, with an emphasis on the southeastern United States. Lectures, laboratories, and field trips cover the evolution, classification, identification, collection, and preservation of vascular plants.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134; and BIOL 2120 or BIOL 3535.  
**Cross Listing(s):** BIOL 5443G.

**BIOL 5443G Plant Taxonomy**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
This course teaches the identification and taxonomy of the vascular plants, with an emphasis on the southeastern United States. Lectures, laboratories, and field trips cover the evolution, classification, identification, collection, and preservation of vascular plants. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5443.

**BIOL 5444 Ichthyology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Emphasizes the systematics, evolution, biology, ecology and behavior of recent and extinct fishes. Laboratory emphasizes the identification, morphology, and natural history of fishes. Field trips required.  
**Cross Listing(s):** BIOL 5444G.
BIOL 5444G Ichthyology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Emphasizes the systematics, evolution, biology, ecology and behavior of recent and extinct fishes. Laboratory emphasizes the identification, morphology, and natural history of fishes. Field trips required.
Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5444.

BIOL 5445 Herpetology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the phylogeny, morphology, life history and ecology of reptiles and amphibians. Field identification of local species will be emphasized.
Field trips required.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5445G.

BIOL 5445G Herpetology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the phylogeny, morphology, life history and ecology of reptiles and amphibians. Field identification of local species will be emphasized.
Field trips required. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5445.

BIOL 5446 Ornithology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A comprehensive study of the biology of birds. Lectures will emphasize the evolution, classification, structure, physiology, behavior, and ecology of birds. Laboratories will give hands-on experience with bird morphology, and field trips will emphasize finding and identifying birds in their natural habitats.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5446G.

BIOL 5446G Ornithology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A comprehensive study of the biology of birds. Lectures will emphasize the evolution, classification, structure, physiology, behavior, and ecology of birds. Laboratories will give hands-on experience with bird morphology, and field trips will emphasize finding and identifying birds in their natural habitats. Graduate students will be required to complete advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Cross Listing(s): BIOL 5446.

BIOL 5448 Mammalogy
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Course examines the classification, evolution, distribution and life histories of mammals. The laboratory includes identification and preparation of specimens and development of field techniques. Field trips required.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5448G.

BIOL 5448G Mammalogy
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Course examines the classification, evolution, distribution and life histories of mammals. The laboratory includes identification and preparation of specimens and development of field techniques. Field trips required. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5448.

BIOL 5460 Phycology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Evolution, morphology, physiology, and ecology of the microalgal and macroalgal species found in marine and freshwater environments, with field trips to a selection of local habitats. Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5460G.

BIOL 5460G Phycology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Evolution, morphology, physiology, and ecology of the microalgal and macroalgal species found in marine and freshwater environments, with field trips to a selection of local habitats. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5460.

BIOL 5470 Marine Pollution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers current federal and Georgia environmental laws and regulations, coastal ecological concepts, and techniques used for remediation of environmental degradation. Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5470G.

BIOL 5470G Marion Pollution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers current federal and Georgia environmental laws and regulations, coastal ecological concepts, and techniques used for remediation of environmental degradation. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverable representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5470.

BIOL 5500 Bioinformatics and Biotechnology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Utilization of databases and software for the analysis of DNA and protein information. Production of products and services using biological materials.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5500G.

BIOL 5500G Bioinformatics and Biotechnology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Utilization of databases and software for the analysis of DNA and protein information. Production of products and services using biological materials. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5500.

BIOL 5520 Epigenetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The molecular mechanisms that change gene expression without changing DNA sequence will be explored. Emphasis will be placed on the effect of histone modification and DNA methylation on phenotype and genome function. The ramifications of molecular epigenetic mechanisms on ecology, evolution, and human health will be discussed. Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134. Crosslisting(s): BIOL 5520G.
BIOL 5520G Epigenetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The molecular mechanisms that change gene expression without changing DNA sequence will be explored. Emphasis will be placed on the effect of histone modification and DNA methylation on phenotype and genome function. The ramifications of molecular epigenetic mechanisms on ecology, evolution, and human health will be discussed. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5520.

BIOL 5530 Wildlife Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the principles and practices used to manage wildlife populations. The emphasis is on populations of importance to humans, particularly game animals. Students will explore the factors, both biotic and abiotic, that influence wildlife populations and how these factors can be managed to sustain game and nongame wildlife populations.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5530G.

BIOL 5530G Wildlife Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the principles and practices used to manage wildlife populations. The emphasis is on populations of importance to humans, particularly game animals. Students will explore the factors, both biotic and abiotic, that influence wildlife populations and how these factors can be managed to sustain game and nongame wildlife populations. Graduate students will be required to complete advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverable representative of graduate-level work, as determined by the instructor. Cross Listing(s) BIOL 5530.

BIOL 5534 Conservation Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores the causes and consequences of the loss of biodiversity, as well as methods for conserving rare species and ecosystems.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5534G.

BIOL 5534G Conservation Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores the causes and consequences of the loss of biodiversity, as well as methods for conserving rare species and ecosystems. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5534.

BIOL 5535G Sex and Evolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the evolution of sex and the subsequent conflict that arises between sexes. Models for the evolution and maintenance of sexual reproduction are compared. Sex allocation theory is reviewed and special attention is drawn to genetic mechanisms that permit sex ratio of offspring to be manipulated. Sexual selection and mate choice tactics are evaluated with reference to empirical studies in behavioral ecology.
Cross Listing(s): BIOL 5535.

BIOL 5537 Biogeography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the distributional patterns of animals and plants from the perspectives of vicariance biogeography and organismal dispersal. One field trip required.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5537G.

BIOL 5537G Biogeography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the distributional patterns of animals and plants from the perspectives of vicariance biogeography and organismal dispersal. One field trip required. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): BIOL 5537.

BIOL 5541 Tropical Marine Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This is an intensive 2-week field course conducted at a tropical marine field station. Through daily lectures and field excursions, students are exposed to the natural history and ecology of a variety of marine organisms and ecosystems that may include mangroves, sea grasses, rocky shores and coral reefs. Additional fees required.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and permission of instructor.
Cross Listing(s): BIOL 5541G.

BIOL 5541G Tropical Marine Biology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This is an intensive 2-week field course conducted at a tropical marine field station. Through daily lectures and field excursions, students are exposed to the natural history and ecology of a variety of marine organisms and ecosystems that may include mangroves, sea grasses, rocky shores and coral reefs. Additional fees required.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and permission of instructor.
Cross Listing(s): BIOL 5541.

BIOL 5542 Aquatic Ecology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Covers the biological and physiochemical factors that affect common organisms found in local aquatic ecosystems, including streams and rivers, wetlands, estuaries, and lakes.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134.
Cross Listing(s): BIOL 5542G.

BIOL 5542G Aquatic Ecology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Covers the biological and physiochemical factors that affect common organisms found in local aquatic ecosystems, including streams and rivers, wetlands, estuaries, and lakes.
Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5542.

BIOL 5543 Biological Field Experience
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A field expedition involving biological investigations of a major ecosystem or natural area. Expeditions normally require 2-5 weeks in the field, depending upon the destination and the type of travel required. Additional fees required.
Prerequisite(s): BIOL 3131 and BIOL 3133 and BIOL 3134 and permission of instructor.
Cross Listing(s): BIOL 5543G.

BIOL 5543G Biological Field Experience
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
A field expedition involving biological investigations of a major ecosystem or natural area. Expeditions normally require 2-5 weeks in the field, depending upon the destination and the type of travel required. Additional fees required.
Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Cross Listing(s): BIOL 5543.
**BIOL 5546 Plant Ecology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Examines fundamental principles and major conceptual issues in plant ecology. Students will learn about the distinctive and often unique ways in which plants interact with the biotic and abiotic components of their environment, and how these factors affect the abundance and distribution of plants.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134; and BIOL 2120 or BIOL 3535.  
**Cross Listing(s):** BIOL 5546G.

**BIOL 5546G Plant Ecology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Examines fundamental principles and major conceptual issues in plant ecology. Students will learn about the distinctive and often unique ways in which plants interact with the biotic and abiotic components of their environment, and how these factors affect the abundance and distribution of plants. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5546.

**BIOL 5547 Marine Ecology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Course stresses ecological processes and adaptations that act to structure coastal associations and permit their persistence through time. The course provides a background for students interested in research in the marine sciences. Students will learn to develop good statistical designs and use various techniques to collect data in marine ecology. Several field trips are required. **Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5547G.

**BIOL 5547G Marine Ecology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Course stresses ecological processes and adaptations that act to structure coastal associations and permit their persistence through time. The course provides a background for students interested in research in the marine sciences. Students will learn to develop good statistical designs and use various techniques to collect data in marine ecology. Several field trips are required. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5547.

**BIOL 5570 Stream Ecology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Advanced study of the structural (physical and biological) and functional (energy and nutrients) characteristics of stream and river habitats. Students will explore topics including watershed, litter processing, food webs, nutrient spiraling, ecosystem metabolism, the river continuum concept, and the flood pulse concept. **Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5570G.

**BIOL 5570G Stream Ecology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Advanced study of the structural (physical and biological) and functional (energy and nutrients) characteristics of stream and river habitats. Students will explore topics including watershed, litter processing, food webs, nutrient spiraling, ecosystem metabolism, the river continuum concept, and the flood pulse concept. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5570.

**BIOL 5644 Insect Ecology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Examines the basic principles of ecology as they apply to insects. The ecology of insects will be investigated at the level of individuals, populations, communities and ecosystems. Emphasis will be placed on how insects interact with, and have evolved unique adaptations to, their abiotic and biotic environment.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5644G.

**BIOL 5644G Insect Ecology**  
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Examines the basic principles of ecology as they apply to insects. The ecology of insects will be investigated at the level of individuals, populations, communities and ecosystems. Emphasis will be placed on how insects interact with, and have evolved unique adaptations to, their abiotic and biotic environment. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5644.

**BIOL 5645 Behavioral Ecology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course explores how evolution and ecology shape behavior. Selected topics may include habitat use and movement patterns, trophic interactions, and inter- and intraspecific communication. Content will be covered through traditional lecture, examination of classic and modern literature, and applied problem solving or case study exercises.  
**Prerequisite(s):** BIOL 3131 and BIOL 3133 and BIOL 3134.  
**Cross Listing(s):** BIOL 5645G.

**BIOL 5645G Behavioral Ecology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course explores how evolution and ecology shape behavior. Selected topics may include habitat use and movement patterns, trophic interactions, and inter- and intraspecific communication. Content will be covered through traditional lecture, examination of classic and modern literature, and applied problem solving or case study exercises. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.  
**Cross Listing(s):** BIOL 5645.

**BIOL 6000 Special Topics in Biology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A consideration of topics and issues in biology.  
**BIOL 7090 Selected Topics/Biology**  
9 Credit Hours. 0-9 Lecture Hours. 0-9 Lab Hours.  
A course taught on a one-time basis.

**BIOL 7133 Molecular Biology**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides graduate students with a fundamental knowledge of how organisms operate at the molecular level. Emphasis is on relevant biological theory and techniques in the molecular field.  
**BIOL 7135 Cytogenetics**  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Studies from a cytological aspect of eukaryotic chromosomes including chromosome structure, chromosomal aberrations, and chromosome mapping.
BIOL 7233 Applied Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Modern biological theory and technologies will be used to address applied questions related to conservation, restoration and environmental management. Emphasis will be on examining applicable, underlying theory with contemporary techniques and technologies to better understand and investigate solutions for relevant biological issues.

BIOL 7333 Evolutionary Ecology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Evolutionary Ecology is a quantitative examination of population growth, interspecific competition, predator-prey interaction, microevolution, and game theory relevant to sexual selection and sex ratio evolution. Topics are presented via spreadsheet simulations of dynamic processes. Students will analyze and simulate models and solve problems based on algebraic theoretical models.

Prerequisite(s): Graduate Status or permission of the Instructor.

BIOL 7440 Vector Ecology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines physiological, evolutionary, and ecological relationships between arthropod vectors, microbial pathogens they transmit and their vertebrate hosts.

BIOL 7530 Biometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides students with basic skills in the analysis of biological data. Lectures cover both parametric and nonparametric methods, with an emphasis on the practical problems posed by biological data.

BIOL 7531 Research Methods
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
A general introduction to biological research methods, including computer skills, web-based resources, oral and written scientific presentations, proposal writing, and the peer-review process. This course is designed for first-year M.S. students.

BIOL 7610 Graduate Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
An intensive study of an advanced biological topic covered by one or more members of the graduate faculty from the department of Biology. The selected topic will vary from semester to semester. Required for M.S. degree.

BIOL 7890 Directed Individual Study
1-4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An independent or directed individual study supervised by a member of the graduate faculty of the Department of Biology.

BIOL 7893 Biological Problems
1-4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Studies of biological problems in a specialized area of biology under the supervision of a member of the biology faculty.

BIOL 7895 Research
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Graduate students will pursue, under the direction of their advisory committee, a program of independent research in a particular area of biology. Results of the research will be presented as a thesis in partial fulfillment of the requirements for the Master of Science degree.

BIOL 7999 Thesis
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Results of individual research will be presented as a thesis in partial fulfillment of the Master of Science degree. The thesis requires defense of design, execution, analysis and interpretation of the research project.

BIOS 6135 Topics of Inference in Biostatistics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the fundamental knowledge of derivatives and integrals found in biostatistical inference. The course will introduce the theory of probability, expectation and variance of discrete and continuous distributions, moment generating functions, bivariate and multivariate distributions, maximum likelihood estimation, and bias. Emphasis will be placed on the development of critical thinking skills and how concepts in this course are used in public health and biomedical studies.

BIOS 6136 Topics of Inference in Biostatistics II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce large sample theory, such as law of large numbers and the central limit theorem; sampling distributions of estimators; the basis for inferences derived from hypothesis testing and confidence intervals; and simulation methods. Emphasis will be placed on how these techniques are used in biostatistical problems and applications using examples from the pharmaceutical industry.

Prerequisite(s): A minimum grade of "B" in BIOS 6135.

BIOS 6331 Regression Analysis in Biostatistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the methods for analyzing biomedical and health related data using linear regression models. The course will introduce the student to matrix algebra as used in linear models. The course will involve model selection, diagnosis and remedial techniques to correct for assumption violations. The students will learn how to apply SAS procedures PROC REG, PROC CORR, and PROC GLM and interpret the results of analysis. Emphasis will also be placed on the development of critical thinking skills.

BIOS 6332 Experimental Design in Biostatistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the student to experimental designs commonly used in public health and biomedical settings and the methods for analyzing them. It will introduce the student to the principles of designing an experiment (randomization, blocking and replication), completely randomized designs, factorial design, randomized block designs, nested designs, split-plot designs, crossover designs, Latin squares and analysis of the longitudinal designs, a fixed effect (Model I) single factor and multifactor experiment, a random effect (Model II) single factor and multifactor experiment, a mixed effect (Model III) multifactor experiment, and covariance model. Students will learn how to apply SAS procedures: PROC GLM, PROC MIXED, PROC GENMOD, PROC VARMIX, PROC RSREG and PROC MULTTEST to public health and biomedical data and interpret the results of the analysis.

Prerequisite(s): A minimum grade of "B" in BIOS 6331.

BIOS 6531 Categorical Data Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the methods for analyzing categorical and count data using linear regression models. The course will introduce the student to matrix algebra as used in linear models. The course will involve model selection, diagnosis and remedial techniques to correct for assumption violations. The students will learn how to apply SAS procedures: PROC GLM, PROC MIXED, PROC GENMOD, PROC VARMIX, PROC RSREG and PROC MULTTEST to public health and biomedical data and interpret the results of the analysis.

Prerequisite(s): A minimum grade of "B" in BIOS 6135.

BIOS 6533 Topics of Inference in Biostatistics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the fundamental knowledge of derivatives and integrals found in biostatistical inference. The course will introduce the theory of probability, expectation and variance of discrete and continuous distributions, moment generating functions, bivariate and multivariate distributions, maximum likelihood estimation, and bias. Emphasis will be placed on the development of critical thinking skills and how concepts in this course are used in public health and biomedical studies.

BIOS 6534 Topics of Inference in Biostatistics II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce large sample theory, such as law of large numbers and the central limit theorem; sampling distributions of estimators; the basis for inferences derived from hypothesis testing and confidence intervals; and simulation methods. Emphasis will be placed on how these techniques are used in biostatistical problems and applications using examples from the pharmaceutical industry.

Prerequisite(s): A minimum grade of "B" in BIOS 6533.

BIOS Biostatistics
BIOS 6541 Biostatistics for Biostatistics & Epidemiology Majors
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
This course examines statistics in public health with particular emphasis on applications in Epidemiology and other public health and medical fields. Topics will include sampling, basic discrete and continuous distributions, descriptive statistics, hypotheses testing, confidence intervals, two-sample inferences, odds ratios, relative risks, Chi-square tests of independence, non-parametric methods, correlation, regression, ANOVA, and logistic regression. Emphasis will be on the development of critical thinking skills and epidemiologic and other health data analysis applications with computer software.
Cross Listing(s): PUBH 6541.

BIOS 7090 Selected Topics in Biostatistics
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Allows the student the opportunity to receive specialized and/or focused instruction in a biostatistical topic not generally offered by the department.

BIOS 7131 Survival Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces statistical methods for analyzing data collected on the time to an event, referred to as survival data, in medical research and other health related fields. Emphasis will be placed on the application of the methodology and computational aspects rather than theory. The students will learn how to apply SAS procedures to data and interpret the results.
Prerequisite(s): A minimum grade of "B" in BIOS 6331 and BIOS 6531.

BIOS 7231 Clinical Trials Methodology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students are introduced to regulatory, scientific, statistical and practical aspects of methods inherent in design, monitoring and analyzing clinical trials. Clinical trials in many areas of drug development are presented, discussed and critiqued.

BIOS 7331 Multivariate Analysis in Biostatistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide students in biostatistics with an introduction to multivariate methods commonly found in health related fields. The course will emphasize multivariate regression, multivariate analysis of variance (MANOVA) and co-variance (MANCOVA), discriminant analysis and an alternative to logistic regression and cluster analysis. Students will be introduced to appropriate SAS procedures and be required to interpret and report their results in a form that meets both FDA and the International Committee on Harmonization.
Prerequisite(s): A minimum grade of "B" in BIOS 6332.

BIOS 7431 Statistical Issues in Drug Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Major statistical issues in the federal regulation of drug research and clinical development will be studied. Specifically, summarization, analysis and monitoring of adverse experiences, two treatment crossover designs, active control equivalence studies, optimization in clinical trials and combination drug development, dosing in the elderly, intention to treat in clinical trials, and dual control groups in rodent carcinogenicity studies will be studied.
Prerequisite(s): A minimum grade of "B" in BIOS 6331 and BIOS 6332.

BIOS 7535 Data Analysis with SAS
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The class is designed to provide skill building and practical experience in using SAS to: create analysis data files; analyze data such as that found in typical biostatistical consulting problems; and assess the validity of analysis methodology assumptions.
Prerequisite(s): A minimum grade of "B" in BIOS 7544.

BIOS 7544 Data Management for Biostatistics
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
This course emphasizes data management and software applications using the SAS (Statistical Analysis System) software package. It will introduce the student to SAS codes for: inputting and outputting data, creating temporary and permanent data sets, creating formatted and labeled SAS data sets, merging and connecting SAS data sets, creating output using the TABULATE and REPORT procedures, debugging a SAS program that includes the TABULATE, REPORT and SQL procedures, using character functions in SAS, using a random number generator, probability distributions, arrays, and date and time functions. Students will also write a simple and complex query using the SQL procedure; create, populate and modify a set of tables/views using the SQL procedure; and create a SAS program which includes one or more macros. This course will cover basic relational database design and descriptive statistics in SAS. Particular focus is placed on applications pertaining to public health and biomedical research.

BIOS 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.

BIOS 9130 Biostatistical Consulting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide the student with the current best practices in biostatistical consulting. Topics include: Identifying and constructing appropriate questions to ask clients regarding their consultation request, an overview of appropriate statistical methods and SAS software procedures to use for specific study designs and statistical analysis of collected data, directing a consultation appointment without faculty lead, conducting exploratory data analyses, conducting effective analyses based on appropriate statistical methods, construction needed simulation (including Monte Carlos methods and Bootstrap methods) and providing oral and written communication of statistical findings.

BIOS 9131 Advanced Statistical Theory for Biostatistics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an advanced study of theoretical statistics. Topics include: an introduction probability and sample space, conditional probability and Bayes Theorem, probability distribution of a random variable, discrete and continuous random variables, functions of random variables, moments and moment generating functions, order statistics and their distributions, discrete distributions, continuous distributions, bivariate and multivariate normal distribution, modes of convergence, limiting moment generating functions, and the central limit theorems.

BIOS 9132 Advanced Clinical Trials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students are introduced to regulatory, scientific, statistical and practical aspects of methods inherent in design, monitoring and analyzing clinical trials. Clinical trials in many areas of drug development are presented, discussed and critiqued.

BIOS 9133 Advanced Statistical Theory for Biostatistics II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a continuation of Advanced Statistical Inference for Biostatisticians I. The additional topics in this course consists of: sample moments and their distributions, the theory of point estimation, the Neyman-Pearson Theory of testing hypotheses, likelihood ratio test, chi-square tests, t-test, F-test, Bayes and Minimax procedures in hypothesis testing, confidence estimation, the general linear hypothesis, and nonparametric statistical inference.
Prerequisite(s): A minimum grade of "B" in BIOS 9131.
BIOS 9134 Stochastic Process for Biological Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides the student with an introduction to stochastic processes with emphasis on Markov chains, The Poisson Process, Brownian Motion and other continuous time processes. The theory developed will be used to model and simulate complex biochemical reaction networks and perform network inference given data from the stochastic trajectory of a biological process, typically arising from microarray or next generation sequencing experiments.

BIOS 9135 Advanced Survival Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course on the study of the theory of survival data. Counting processes and martingale methods will be introduced. Emphasis will be placed on the applications of the theory and on the methodologies for survival data, such as Kaplan-Meier estimate, log-rank test, Cox model, etc. The students will learn how to use R language to setup survival dataset and perform analysis.
Prerequisite(s): A minimum grade of "B" in BIOS 6331, BIOS 6531, and BIOS 7131.

BIOS 9136 General and Generalized Linear Models
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with a review of the classical General Linear model and an introduction to the Generalized Linear Model. The first half of the course includes a review of the linear model with the necessary matrix algebra and multivariate normal distribution theory, then to the analysis of quadratic forms and the study of the General Linear Model. The second half of the course begins with an introduction of the components of a Generalized Linear Model and methods of fitting these models. It also covers the most widely used types of models, logistic regression, log-linear models and Quasi-likelihood functions.

BIOS 9231 Bayesian Statistics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides the student with an introduction Bayesian Analysis and compares Bayesian methods to that of frequentists. The course includes selection of prior distributions, computing posterior distributions, conjugate models, Beta-Binomial model, Normal-Normal model, and Gamma-Poisson model. Bayesian inference using point and interval estimation, Bayesian hierarchical models, and exchangeability will be explored. Topics including Empirical Bayes versus a fully Bayes approach, Markov Chain Monte Carlo methods and model checking using Bayes factors and sensitivity analyses will be included.
Prerequisite(s): A minimum grade of "B" in BIOS 9131.

BIOS 9331 Multi-Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to address research questions in biomedical and other health-related research using meta-analysis techniques. A survey of past and present challenges of such techniques will be addressed, as will a mixture of Frequentist and Bayesian approaches to meta-analysis. Typical research questions found in health-related issues such as prevention, diagnosis, treatment, and policy will be constructed, followed by the methodologies to analyze such health-related questions. The course will focus on modeling and implementation issues in meta-analysis for biostatistical applications. In particular, this course will emphasize such topics as heterogeneous study results, combining studies with different designs, advantages and disadvantages to using meta-analysis over large trials, meta-analysis for 2x2 tables with multiple treatment groups, meta-analysis of clinical trials, addressing biases, meta-analysis of patient survival data, among additional biomedical applications.
Prerequisite(s): A minimum grade of "B" in BIOS 9131.

BIOS 9333 Applied Longitudinal Data Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to longitudinal and clustered data. Topics include the basic concepts of longitudinal data, linear models for longitudinal data, generalized linear models and salient features, generalized estimating equations, generalized linear mixed effects models, missing data and dropouts, sample size and power, repeated measures, and multilevel linear models.

BIOS 9432 Randomization and Bootstrap Methods in Health Data
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide the student with the basics of randomization tests and bootstrap methods. This course will cover the following topics: Randomization tests, the jackknife, the bootstrap and its application to health related data, Monte Carlo tests, considerations when using randomization, jackknife and bootstrap methods, one and two sample tests, analysis of variance, regression analysis, survival data and multivariate data.
Prerequisite(s): A minimum grade of "B" in BIOS 9131.
Corequisite(s): BIOS 9231.

BIOS 9433 Analysis with Missing and Mis-specified Data
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide the student with the basics of methods for analyzing data with missing data and mis-specified data. This course will cover the following topics: missing data in experiments, complete case analysis, weighted complete case analysis, available case analysis, single imputation methods such as mean, regression, last value varied forward, hot deck imputation, cold deck imputation, Bayes Imputation, Multiple imputation, and nonignorable missing data models.
Prerequisite(s): A minimum grade of "B" in BIOS 9132.
Corequisite(s): BIOS 9231.

BUSA Business Administration

BUSA 1105 Introduction to Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey course that acquaints beginning college students with the major institutions and practices in the business world, provides an understanding of basic business concepts , and presents a view of career opportunities that exist in business.
Prerequisite(s): Freshman and Sophomore standing only.

BUSA 1131 Financial Survival Skills
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the issues relating to managing your finances throughout your life. Attention will be given to career planning, budgeting, credit cards, loans, lease vs. purchase for automobiles and housing, saving for retirement and risk management with insurance.

BUSA 3083 Business Abroad
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The focus of this course is an international study abroad. The study abroad is designed to develop students' understanding of international cultures and of conducting business in an international arena. The course prepares students for their trip by requiring activities such as coordinated lectures, assigned readings, and a research paper aligned with each student's major. Pre-requisites: BBA status, Junior standing and Minimum of 2.0 GPA.
BUSA 3100 Essentials of Peer Advising
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.

This block course will prepare students to become peer advisors in the College of Business Administration. The course will teach students paraprofessionals skills and knowledge to allow them to serve other students in a peer advising role. The professional staff/instructor has the obligation to provide the essential theoretical and practical information necessary for students to effectively carry out their responsibilities. Specifically paraprofessionals will be provided with the information necessary to (1) give guidance to business students regarding academic procedures and policies, (2) offer knowledgeable referrals to university resources available to address academic questions and issues, and (3) help business students better understand and prepare for the advisement process. Cannot be applied to any COBA major or minor.

BUSA 3131 Business Statistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This introductory course covers the concepts and techniques concerning exploratory data analysis, descriptive statistics, probability distributions, sampling and sampling distributions, statistical inference methods including confidence interval and hypothesis testing, and an introduction of categorical data analysis. Students will learn how these topics apply to and can be used in business, using both manual computations and statistical software.

Prerequisite(s): A minimum grade of "C" in CISM 2530, and MATH 1232 or MATH 1441 or MATH 1112 or MATH 1113 or a minimum grade of "B" in MATH 1111 and Sophomore standing.

BUSA 3132 Applied Statistics and Optimization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course focuses on more advanced models including correlation, simple and multiple regression analysis, time series and forecasting, and optimization models. Computer software will be used to assist in modeling and analysis. Students will learn to apply these techniques to solve business problems.

Prerequisite(s): A minimum grade of "C" in BUSA 3131.

BUSA 3134 Accounting for Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Presents the internal and independent audit functions, demonstrating how they assist managers in organizations. Accounting information is used to enhance management decision making in a variety of business contexts, such as analyzing an annual report and making product pricing decisions for both internal and external customers.

Prerequisite(s): ACCT 2030 or ACCT 2101 and ACCT 2102.

BUSA 3610 Research Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.

This seminar style course is designed to acquaint COBA Honors students with the scientific method and how it is used in business to advance knowledge of the business disciplines. In this course, students will examine the various options for the Honors Thesis/Capstone Project in COBA. With the assistance of the COBA Honors Advisory Council and keeping in mind the personal and professional aspirations articulated in the Honors Business Philosophy Seminar taken the previous semester, the course will culminate with each student selecting an honors thesis topic and a thesis faculty advisor. Students will create an Honors Thesis Proposal and an Honors Thesis Completion Action Plan as part of the course.

BUSA 3620 Business Seminar
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.

This seminar style course is designed to allow students to explore the principles of effective business leadership through readings, discussions, in-depth interactions with business leaders, and corporate visits. Students will explore how the principles of positive psychology and servant leadership can be merged in the creation of high functioning work teams. The course will include significant coverage of leadership styles, factors that influence life satisfaction, business ethics, and sustainability. The course will culminate with each student writing a personal description of their individual business philosophy and professional goals. This course will be a lead-in to the next course in the sequence (the COBA Honors Thesis Research Seminar) in which students will design a capstone experience that will help them advance toward their individual goals.

BUSA 4131 Strategic Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

The major purpose of this course is to develop an understanding of the strategic management process and enable students to integrate the functional areas of business.

Prerequisite(s): A minimum grade of "C" in all of the following: BUSA 3132, FINC 3131, MGNT 3430, MKTG 3131 and MGNT 3130.

BUSA 4133 Modeling and Analytics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course covers the basic statistical concepts required for business analytics. The course covers but is not limited to multiple linear regression, logistic regression, regression diagnostics, discriminant analysis, principal components, factor analysis and ANOVA. The course will provide instruction in and utilize advanced statistical software.

Prerequisite(s): A minimum grade of "C" in BUSA 3132.

BUSA 4134 Advanced Decision Analysis and Optimization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course will cover, but will not be limited to, time series forecasting techniques, Monte Carlo simulation, decision theory, linear, integer, goal and non-linear programming. The focus will be on formulation of models and interpretation of results rather than on the underlying theory. A combination of software packages will be used including utilization of software. Emphasis will be placed on the decision making process and analysis of business problems.

Prerequisite(s): A minimum grade of "C" in BUSA 3132.

BUSA 4700 Cooperative Education
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. An S/U grade is assigned for each work assignment on the basis of the employer’s evaluation only.

BUSA 4790 Internship in Business
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

A supervised work-study program in selected business firms throughout the southeast.

Prerequisite(s): junior standing, and good academic standing (minimum cumulative GPA is 2.0).

BUSA 4830 Special Topics in Business
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

A customized course that is under the direction of a faculty sponsor. Designed to offer students an opportunity to pursue studies at a level or on topics not covered in scheduled courses. The scope and nature of the material covered is determined in consultation with faculty sponsor.
BUSA 4930 Undergraduate Research Practicum
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the opportunity to pursue research within the business disciplines under faculty direction. It is expected that students in this course will produce a research paper that is accepted for presentation at an academic conference and/or accepted for publication in a peer-reviewed academic journal.
Prerequisite(s): Approval of Director of COBA Undergraduate Research.

BUSA 7030 Special Topics in Business
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
A standard course developed for a special or newly emerging topic that is in demand by MBA students. Lectures, group work, readings, research, and writing are required as in any other advanced elective course.
Prerequisite(s): A minimum grade of "C" in MGNT 7331.

BUSA 7130 International Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents fundamental considerations for managers of international trade operations, providing students with the experience of simulating the business of exporting.

BUSA 7314 Team Building
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Designed to teach essential skills for teamwork.

BUSA 7530 Global Business Strategy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on global strategic management and encourages the analysis and development of business strategies within a global environment.
Prerequisite(s): A minimum grade of "C" in ACCT 7230 and FINC 7231 and MGNT 7430 and MKTG 7431.

BUSA 7790 Internship in Business
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised work/study program in selected organizations throughout the U.S.A. and abroad. Any student enrolled in the internship program will be required to work for one full semester.

BUSA 7831 Business Study Abroad
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course includes an international trip component. The business study abroad is designed to develop students' understanding of international cultures and business practices. The course prepares students for their trip by requiring activities such as coordinated lectures, assigned readings, and a research paper aligned with each student's career interests. Expenses specific to the travel portion of the course may vary.
Prerequisite(s): Permission of Director.

BUSA 7890 Individual Research
1-3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
A guided individual research project that provides the student with an opportunity to explore a particular topic in-depth. Normally, the course would culminate in a research report or case study.

BUSA 9031 Seminar on Scientific Method, Theory, and Philosophy of Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theoretical foundations and frameworks common to business research. Historical and philosophy of science perspectives. Fundamentals of theory building and employing the scientific method as a research process.

BUSA 9332 Applied Multivariate Methods for Business Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will enable students to master the analytical/methodological skills needed to evaluate and conduct research in their areas of specialization. Students will be introduced to multivariate data analysis methods, especially linear models, needed in their research areas. Students should be able to apply appropriate multivariate statistical techniques to analyze real data sets and prepare methodology and results appropriate for business journals. Students will be able to understand the multivariate techniques commonly used in current literatures of their research areas.
Prerequisite(s): A minimum grade of "B" in MGNT 7331.

BUSA 9333 Advanced Multivariate Methods for Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will enable students to master the analytical/methodological skills needed to evaluate and conduct research in their areas of specialization. Students will be introduced to multivariate data analysis methods needed in their research areas, including statistical concepts, principles, and techniques of analysis of variance, confirmatory factor analysis, and structural equations models. Students will be able to understand the multivariate statistical techniques used in current literatures, apply appropriate techniques to support their research and prepare methodology and results appropriate for business journals. Students will learn to use statistical software to assist problem solving.
Prerequisite(s): A minimum grade of "B" in BUSA 9332.

BUSA 9334 Qualitative Research Methods in Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a survey of qualitative research philosophies and methods. Its focus is on the use of qualitative research to understand phenomenon generally considered within the domain of logistics and supply chain management. The majority of the time will be spent comparing and contrasting four main approaches to qualitative research -- grounded theory, case studies, focus groups, and phenomenology -- to illustrate the variations on qualitative research available. Although philosophical foundations are discussed, the course places primary emphasis on the application of qualitative research methods. Of particular emphasis are decisions and activities that the qualitative researcher must accomplish, such as selecting a phenomenon for study, determining research objectives and questions, selecting a qualitative research design, choosing data sources, conducting a long interview, analyzing qualitative data, evaluating qualitative research, and writing and reporting the results.
Prerequisite(s): A minimum grade of "B" in BUSA 9332 and BUSA 9333.

CENG Civil Engineering

CENG 1133 Engineering Graphics for Civil and Construction Engineers
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course addresses the basic skills of engineering drawings with manual and computer-aided design tools. Topics include the use of engineering and architectural scales, multiple views and projections, 2D drawings using AutoCAD, and introduction of Civil3D and Revit.

CENG 1731 Civil Engineering Computations
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course serves as an introduction to the civil and construction engineering programs, with an emphasis on civil and construction engineering computations. Use of contemporary computing tools and methodologies, and acceptable technical reporting of data as appropriate to civil and construction engineering applications are also introduced.
Prerequisite(s): Minimum grade of "C" or concurrent enrollment in MATH 1441.
CENG 2131 Civil Engineering Fluid Mechanics
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course covers basic concepts of fluid mechanics, and the fundamental applications of ideal and real fluid flow. Topics include fluid statics, conservation principles, the Bernoulli equation, fluid flow in pipes, fluid flow measurement devices, open channel flow, and basic hydraulic structures.
Prerequisite(s): A minimum grade of "C" in ENGR 2231.

CENG 2231 Surveying
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Principles of the level, theodolite, electronic distance measurement (EDM), total station and global positioning systems, taping, note keeping, coordinate geometry, control surveys, triangulation, trilateration, plane coordinate systems, azimuth and topographic mapping. Laboratory includes use of level, theodolite, EDM, total station, GPS, traverse closure, level net closure, topographic mapping, measuring distances and heights using coordinate geometry calculations.
Prerequisite(s): A minimum grade of "C" in MATH 1112 or MATH 1113 or MATH 1441 and CENG 1133 or ENGR 1133 or TCM 1232.
Cross Listing(s): TCM 2233.

CENG 3131 Introduction to Environmental Engineering
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
The course is an introduction to environmental engineering. Topics include a review of the role of the United States Environmental Protection Agency (EPA) in environmental protection, mass balance, rainfall and runoff analysis, basic surface water and groundwater hydrology, water quality management, municipal solid waste and hazardous waste management, and air pollution control.
Prerequisite(s): A minimum grade of "C" in CHEM 1147.

CENG 3132 Introduction to Water and Wastewater Treatment
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
The course is an introduction to water and wastewater treatment. Topics include sources and characteristics of water and wastewater, treatment standards, selection of different water and wastewater treatment processes, design principles for treatment units in water and wastewater treatment plants, and standard laboratory tests used to control the operation of water and wastewater treatment plants.
Prerequisite(s): A minimum grade of "C" in CENG 2131 and CENG 3131.

CENG 3135 Construction Cost Control and Finance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the long-term contract methods for recognizing revenue and their impact on construction company financial statements. The course also covers the analysis of construction company financial statements and their use in developing budgets, project cash needs, pricing construction projects, and forecasting the impact of business decisions on profit. The project cost control and the contract delivery methods are also discussed, along with ethical guidelines for professional conduct and code of ethics.
Prerequisite(s): A minimum grade of "C" in ECON 2105.

CENG 3232 Soil Mechanics
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course is an introduction to soil mechanics, including an investigation of the mechanical and physical properties of soils and the relation to soil action in problems of engineering such as soil composition, index properties, classification, exploration, compaction, permeability, stress distribution, consolidation, settlement, shear strength, bearing capacity, and lateral earth pressure.
Prerequisite(s): A minimum grade of "C" in ENGR 3233.

CENG 3233 Civil Engineering Materials
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Introduction to materials science and basic engineering properties of common civil engineering materials including metals, soils, aggregates, Portland cement concrete, asphalt binder and asphalt concrete, wood, and masonry. Written and oral communication skills are an important part of this course.
Prerequisite(s): A minimum grade of "C" in ENGR 3233.

CENG 3311 Fluid Mechanics Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
The laboratory includes measurement of water properties including specific weight and dynamic viscosity, use of the Bernoulli equation, pressure measurement, flow rate measurement on a pipe, open channel flow, calibration of flow-measuring, head loss in piping systems, and characteristics of centrifugal pumps.
Corequisite(s): ENGR 3235.

CENG 3331 Structural Analysis
3 Credit Hours. 0 Lecture Hours. 0.2 Lab Hours.
Overview of transportation engineering with respect to traffic operation and transportation planning, including mainly highway. Emphasis on design and traffic control devices with considerations of economy, safety, and environment. Laboratory involves data measurement and analysis techniques associated with transportation engineering using probability.
Prerequisite(s): A minimum grade of "C" in CENG 2231 and MATH 3337.

CENG 4133 Transportation Systems
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Overview of transportation engineering with respect to traffic operation and transportation planning, including mainly highway. Emphasis on design and traffic control devices with considerations of economy, safety, and environment. Laboratory involves data measurement and analysis techniques associated with transportation engineering using probability.
Prerequisite(s): A minimum grade of "C" in CENG 2231 and MATH 3337.

CENG 4135 Highway Design
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course provides an introduction to highway design based on conventional constraints including: vertical and horizontal geometry, traffic, safety, drainage, economic, and human factors.
Prerequisite(s): A minimum grade of "C" in CENG 2231 or TCM 2233.

CENG 4232 Foundation Design
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Introduction to foundation design methods, including shallow foundations, slope stability, pile foundation, and retaining walls.
Prerequisite(s): A minimum grade of "C" in CENG 3232.

CENG 4331 Structural Steel Design
3 Credit Hours. 0.3 Lecture Hours. 0.1 Lab Hours.
Course includes characteristics of structural steel; introduction to AISC Load and Resistance Factor Design (LRFD) specifications; design of tension members, columns, beams, beam-columns, and connections.
Prerequisite(s): A minimum grade of "C" in CENG 3331.
CENG 4518 Introduction to Senior Project
1 Credit Hour. 0.1 Lecture Hours. 0.2 Lab Hours.
This course is the first component of the senior project series of two courses designed to aid the students in successful completion of the capstone project required for the civil engineering curriculum. This first course introduces students to contemporary civil engineering considerations and professional engineering practice in a global, economic, environmental, and societal context. The course prepares students to function on multi-disciplinary teams while completing preliminary tasks required for the senior project. The importance of lifelong learning and professional licensure is also addressed.
Prerequisite(s): A minimum grade of "C" in CENG 3333 or CENG 4331 and Senior standing.

CENG 4539 Senior Project
3 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
This course is designed to be the culmination of the undergraduate civil engineering education experience. The course draws together diverse elements of the Civil Engineering curriculum to provide an integrating experience and to develop competence in focusing both technical and non-technical skills in solving problems. The senior project course involves design and analysis of a new or modified civil engineering project or system with demonstrated feasibility.
Prerequisite(s): A minimum grade of "C" in CENG 4518 and approval of Department Chair.

CENG 4730 Experiential Learning in Civil and Construction Engineering - COOP
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides an opportunity for Civil and Construction Engineering students to participate in Experiential, Cooperative Education, and receive practical work experience with a pre-approved Civil and Construction Engineering employer. A minimum total of 400 documented contact hours of employment per work assignment with the selected employer are required for course credit.
Prerequisite(s): Completion of CENG 2231 or TCM 2233.

CENG 4890 Special Problems in Civil Engineering
1-4 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
This course provides for specialized study in the area of Civil Engineering not otherwise covered by the CE program.
Prerequisite(s): As determined by instructor.

CENG 5090 Selected Topics in Civil Engineering
1-3 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
This course is scheduled on an infrequent basis to explore special areas in civil engineering.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): CENG 5090G.

CENG 5090G Selected Topics in Civil Engineering
1-3 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
This course is scheduled on an infrequent basis to explore special areas in civil engineering. Graduate students will be required to complete a case study or research project not required of undergraduate students.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): CENG 5090.

CENG 5133 Water Supply and Wastewater Collection Systems
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course covers water supply and wastewater collection systems. Topics include basic hydraulics, major and minor head losses, pipes in series and parallel, water distribution network analysis, design of water supply distribution systems, sanitary sewer collection systems, and storm sewer collection systems.
Prerequisite(s): A minimum grade of "C" in CENG 3132 or permission of instructor.
Cross Listing(s): CENG 5133G.

CENG 5133G Water Supply and Wastewater Collection Systems
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course covers water supply and wastewater collection systems. Topics include basic hydraulics, major and minor head losses, pipes in series and parallel, water distribution network analysis, design of water supply distribution systems, sanitary sewer collection systems, and storm sewer collection systems. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3132.
Cross Listing(s): CENG 5133.

CENG 5136 Watershed Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the field of watershed management from an Environmental Engineering perspective. The course covers a wide range of topics that describe the most important aspects of watershed management including watershed assessment and the processes that control water quality in an urban and rural watershed. Fundamentals of environmental and water resources engineering will be used to understand the processes that control the transport and fate of pollutants in a watershed. The same principles will be used to develop processes and management practices to improve the water quality in watersheds. Topics addressed include: water quality regulations; physical, chemical, and biological processes affecting that rate and transport of pollutants to surface waters; nonpoint source pollution (NPS); and best management practices among others. The course is intended for seniors and graduate students who want to gain more experience in the area of Environmental Engineer and Water Resources.
Prerequisite(s): A minimum grade of "C" in CENG 3131 or Instructor Approval.
Cross Listing(s): CENG 5136G.

CENG 5136G Watershed Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the field of watershed management from an Environmental Engineering perspective. The course covers a wide range of topics that describe the most important aspects of watershed management including watershed assessment and the processes that control water quality in an urban and rural watershed. Fundamentals of environmental and water resources engineering will be used to understand the processes that control the transport and fate of pollutants in a watershed. The same principles will be used to develop processes and management practices to improve the water quality in watersheds. Topics addressed include: water quality regulations; physical, chemical, and biological processes affecting that rate and transport of pollutants to surface waters; nonpoint source pollution (NPS); and best management practices among others. The course is intended for seniors and graduate students who want to gain more experience in the area of Environmental Engineer and Water Resources. Graduate students will be required to complete advanced level assignments in areas beyond the scope of the undergraduate requirements demonstrating a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3131 for CECM students. Approval if the student is enrolled in another program at Georgia Southern.
Cross Listing(s): CENG 5136.
CENG 5137 Engineering Hydrology and Hydraulics
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course integrates concepts developed in Fluid Mechanics with fundamental hydrologic and hydraulic processes used in the analysis and design of urban drainage, flood control, and measurement structures. Hydrology topics include the hydrologic cycle, precipitation, hydrograph analysis, evapotranspiration, runoff, and flood routing. Hydraulics topics include open channel flow, hydraulic design, pump classification, pump and system curves, and water/wastewater pumping stations.
Prerequisite(s): A minimum grade of "C" in CENG 2131 or permission of instructor.
Cross Listing(s): CENG 5137G.

CENG 5137G Engineering Hydrology and Hydraulics
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course integrates concepts developed in Fluid Mechanics with fundamental hydrologic and hydraulic processes used in the analysis and design of urban drainage, flood control, and measurement structures. Hydrology topics include the hydrologic cycle, precipitation, hydrograph analysis, evapotranspiration, runoff, and flood routing. Hydraulics topics include open channel flow, hydraulic design, pump classification, pump and system curves, and water/wastewater pumping stations. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 2131 or permission of instructor.
Cross Listing(s): CENG 5137.

CENG 5138 Water and Sanitation for International Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses the design of small-scale, low cost systems for drinking water supply and wastewater disposal. Topics include surface water intakes, wells, storage tanks, water distribution systems, water quality testing, septic tanks, leach fields, and oxidation ponds. The course emphasizes on-site data collection methods, practical issues of design, and project sustainability.
Prerequisite(s): Minimum grade of "C" in CENG 2131.
Cross Listing(s): CENG 5138G.

CENG 5138G Water and Sanitation for International Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses the design of small-scale, low cost systems for drinking water supply and wastewater disposal. Topics include surface water intakes, wells, storage tanks, water distribution systems, water quality testing, septic tanks, leach fields, and oxidation ponds. The course emphasizes on-site data collection methods, practical issues of design, and project sustainability. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Minimum grade of "C" in CENG 2131.
Cross Listing(s): CENG 5138.

CENG 5139 Advanced Water and Wastewater Treatment
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
The course covers advanced water and wastewater treatment processes necessary for designing and managing modern drinking water and wastewater treatment plants. Topics include ion exchange, ozonation, adsorption, membrane, Biological Nutrients Removal (BNR), Membrane Biological Reactor (MBR), disinfection, sludge treatment and disposal, wastewater reclamation and reuse, and effluent disposal.
Prerequisite(s): A minimum grade of "C" in CENG 3132 or permission of instructor.
Cross Listing(s): CENG 5139G.

CENG 5139G Advanced Water and Wastewater Treatment
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
The course covers advanced water and wastewater treatment processes necessary for designing and managing modern drinking water and wastewater treatment plants. Topics include ion exchange, ozonation, adsorption, membrane, Biological Nutrients Removal (BNR), Membrane Biological Reactor (MBR), disinfection, sludge treatment and disposal, wastewater reclamation and reuse, and effluent disposal. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3132 or permission of instructor.
Cross Listing(s): CENG 5139.

CENG 5231 Pavement Analysis and Design
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course provides an introduction to different approaches to pavement analysis and design, including flexible and rigid pavement design, preservation, rehabilitation, and management.
Prerequisite(s): A minimum grade of "C" in CENG 3232 and CENG 3233 or permission of instructor.
Cross Listing(s): CENG 5231G.

CENG 5232 Foundation Design
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course provides an introduction to foundation design methods, including shallow foundations, slope stability analysis, pile foundations, and retaining walls.
Prerequisite(s): A minimum grade of "C" in CENG 3232 or permission of instructor.
Cross Listing(s): CENG 5232G.

CENG 5232G Foundation Design
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course provides an introduction to foundation design methods, including shallow foundations, slope stability analysis, pile foundations, and retaining walls. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3232 or permission of instructor.
Cross Listing(s): CENG 5232.

CENG 5234 Asphalt Mix Design
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course is an introduction to contemporary materials and engineering properties of asphalt binders, modified binders, and asphalt mixtures including: modern binder and mixture specifications, mix design systems and test methods.
Prerequisite(s): A minimum grade of "C" in CENG 3232 or permission of instructor.
Cross Listing(s): CENG 5234G.
CENG 5234G Asphalt Mix Design
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course is an introduction to contemporary materials and engineering properties of asphalt binders, modified binders, and asphalt mixtures including: modern binder and mixture specifications, mix design systems and test methods. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3233 or permission of instructor.
Cross Listing(s): CENG 5234.

CENG 5331 Advanced Structural Analysis
3 Credit Hours. 0.3 Lecture Hours. 0.1 Lab Hours.
This course covers the analysis of statically indeterminate structures. Classical methods, such as the slope-deflection and moment distribution techniques are presented. The course additionally covers the matrix-based stiffness method of analysis for indeterminate trusses, beams, and frames.
Prerequisite(s): A minimum grade of "C" in CENG 3331 and MATH 2331 or permission of instructor.
Cross Listing(s): CENG 5311G.

CENG 5331G Advanced Structural Analysis
3 Credit Hours. 3 Lecture Hours. 1 Lab Hour.
This course covers the analysis of statically indeterminate structures. Classical methods, such as the slope-deflection and moment distribution techniques are presented. The course additionally covers the matrix-based stiffness method of analysis for indeterminate trusses, beams, and frames. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3331 and ENGR 1731 or permission of instructor.
Cross Listing(s): CENG 5331.

CENG 5332 Prestressed Concrete Design
3 Credit Hours. 0.2 Lecture Hours. 0.1 Lab Hours.
This course introduces students to the design of common prestressed concrete elements. It presents historical developments, the properties of constituent materials, prestress losses, and the design of prestressed structural members to support flexural and shear loadings.
Prerequisite(s): A minimum grade of "C" in CENG 3333 or permission of instructor.
Cross Listing(s): CENG 5332G.

CENG 5332G Prestressed Concrete Design
3 Credit Hours. 3 Lecture Hours. 1 Lab Hour.
This course introduces students to the design of common prestressed concrete elements. It presents historical developments, the properties of constituent materials, prestress losses, and the design of prestressed structural members to support flexural and shear loadings. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3333 or permission of instructor.
Cross Listing(s): CENG 5332.

CENG 5333 Advanced Reinforced Concrete Design
3 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
This course presents advanced design topics not covered in the first reinforced concrete course. Examples of those topics are foundation elements, slender columns, two-way slabs, shear walls and earthquake-resistant structures.
Prerequisite(s): A minimum grade of "C" in CENG 3333.
Cross Listing(s): CENG 5333G.

CENG 5333G Advanced Reinforced Concrete Design
3 Credit Hours. 0.3 Lecture Hours. 0.1 Lab Hours.
This course presents advanced design topics not covered in the first reinforced concrete course. Examples of those topics are foundation elements, slender columns, two-way slabs, shear walls and earthquake-resistant structures. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 3333.
Cross Listing(s): CENG 5333.

CENG 5334 Advanced Structural Steel Design
3 Credit Hours. 0.3 Lecture Hours. 0.1 Lab Hours.
Develop skills in structural steel design and analysis beyond those taught in the basic steel design course. This covers the behavior and design of advanced components used in steel structures, such as flexural members with slender webs ("plate girders"), composite beams, and beam-to-column connections and also framing systems for seismic design.
Prerequisite(s): A minimum grade of "C" in CENG 4331.
Cross Listing(s): 5334G.

CENG 5334G Advanced Structural Steel Design
3 Credit Hours. 0.3 Lecture Hours. 0.1 Lab Hours.
Develop skills in structural steel design and analysis beyond those taught in the basic steel design course. This covers the behavior and design of advanced components used in steel structures, such as flexural members with slender webs ("plate girders"), composite beams, and beam-to-column connections and also framing systems for seismic design. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 4331.
Cross Listing(s): CENG 5334.

CENG 5335 Structural Dynamics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers topics related to the response of structures subjected to various dynamic loading conditions. Examples of topics discussed include undamped and damped single degree-of-freedom systems, response of one-degree-of-freedom system to harmonic loading and general dynamic loading, response spectra, free and forced vibration of shear buildings, and dynamics analysis of beams and frames. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in ENGR 2223 and CENG 5331 or 5331G, or permission of instructor.
Cross Listing(s): CENG 5335G.
CENG 5335G Structural Dynamics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers topics related to the response of structures subjected to various dynamic loading conditions. Examples of topics discussed include undamped and damped single degree-of-freedom systems, response of one-degree-of freedom system to harmonic loading and general dynamic loading, response spectra, free and forced vibration of shear buildings, and dynamics analysis of beams and frames. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in ENGR 2232 and CENG 5331 or 5331G, or permission of instructor.
Cross Listing(s): CENG 5335.

CENG 5336 Introduction to Finite Elements
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
This course provides an introduction to the Finite Element Method focusing on the analysis of common structural components encountered in civil engineering discipline utilizing a commercial FEA software package. The course covers key FEA principles and procedures associated with linearly behaving static structural members modeled using a variety of appropriate two-dimensional and three-dimensional elements.
Prerequisite(s): A minimum grade of "C" in MATH 2331 and CENG 3331 or permission of instructor.
Cross Listing(s): CENG 5336G.

CENG 5336G Introduction to Finite Elements
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
This course provides an introduction to the Finite Element Method focusing on the analysis of common structural components encountered in civil engineering discipline utilizing a commercial FEA software package. The course covers key FEA principles and procedures associated with linearly behaving static structural members modeled using a variety of appropriate two-dimensional and three-dimensional elements. Graduate students will be required to complete individual advanced level projects in areas beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in all of the following: CENG 3331 or permission of instructor.
Cross Listing(s): CENG 5336.

CENG 5337 Advanced Strength
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers advanced topics related to the strength of materials. Examples of topics discussed include analysis of stresses and strains, two-dimensional elasticity problems, classical failure theorems, bending of symmetrical and asymmetrical beams, torsion of prismatic bars, and application of energy methods for analyzing structural members. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 5331 or CENG 5331 G, or permission of instructor.
Cross Listing(s): CENG 5337G.

CENG 5337G Advanced Strengths
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers advanced topics related to the strength of materials. Examples of topics discussed include analysis of stresses and strains, two-dimensional elasticity problems, classical failure theorems, bending of symmetrical and asymmetrical beams, torsion of prismatic bars, and application of energy methods for analyzing structural members. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Minimum grade of "C" in CENG 5331 or CENG 5331G, or permission of instructor.
Cross Listing(s): CENG 5337.

CENG 5338 Theory of Elasticity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers advanced topics related to the application of the theory of elasticity in analyzing structural and solid members. Examples of topics discussed include introduction to elasticity and solid mechanics principles and theorems, plane stress and plane strain analysis, formulation of two-dimensional problems in rectangular and polar coordinates, analysis of stress and strain in three-dimensions, and elasticity in three dimensions. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 5331 or CENG 5331G, or permission of instructor.
Cross Listing(s): CENG 5338.

CENG 5338G Theory of Elasticity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers advanced topics related to the application of the theory of elasticity in analyzing structural and solid members. Examples of topics discussed include introduction to elasticity and solid mechanics principles and theorems, plane stress and plane strain analysis, formulation of two-dimensional problems in rectangular and polar coordinates, analysis of stress and strain in three-dimensions, and elasticity in three dimensions. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Minimum grade of "C" in CENG 5331 or CENG 5331G, or permission of instructor.
Cross Listing(s): CENG 5338.

CENG 5339 Theory of Elastic Stability
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers topics related to buckling of various structural members. Examples of topics discussed include elastic buckling of bars and frames, inelastic buckling of bars, torsional buckling, lateral buckling of beams, and buckling of rings, curved bars and arches. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 5331 or CENG 5331 G, or permission of instructor.
Cross Listing(s): CENG 5339.
CENG 5339G Theory of Elastic Stability
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers topics related to buckling of various structural members. Examples of topics discussed include elastic buckling of bars and frames, inelastic buckling of bars, torsional buckling, lateral buckling of beams, and buckling of rings, curved bars and arches. Graduate students will be required to complete individual advanced level assignments in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Minimum grade of "C" in CENG 5331 or CENG 5331G, or permission of instructor.
Cross Listing(s): CENG 5339.

CENG 5431 Advanced Surveying
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles of field astronomy, GPS surveys, control surveys, State Plane Coordinate Systems, photogrammetry, volume determination, route surveying (horizontal and vertical curvature) and an introduction to Geographical Information Systems. Laboratory includes: GPS for control, coordinate system transformations, survey boundary development, topography survey, and roadway alignment. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Departmental consent or a minimum grade of "C" in CENG 2231 or departmental consent.
Cross Listing(s): CENG 5431G.

CENG 5431G Advanced Surveying
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
Principles of field astronomy, GPS surveys, control surveys, State Plane Coordinate Systems, photogrammetry, volume determination, route surveying (horizontal and vertical curvature) and an introduction to Geographical Information Systems. Laboratory includes: GPS for control, coordinate system transformations, survey boundary development, topography survey, and roadway alignment. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Departmental consent or a minimum grade of "C" in CENG 2231 or TCM 2233.
Cross Listing(s): CENG 5431.

CENG 5432 Introduction to GIS in Surveying-Geomatics and Transportation
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
An introduction to the knowledge and skill requirements of Geographic Information Systems (GIS) as applied to surveying-geomatics and transportation. Students will learn and apply GIS and cartographic concepts to develop problem solutions in surveying mapping & thematic mapping and to manipulate geo-referenced spatial information as required in typical industry applications.
Prerequisite(s): Minimum grade of "C" in CENG 5331 or CENG 5331 G, or permission of instructor.
Cross Listing(s): CENG 5432G.

CENG 5432G Introduction to GIS in Surveying-Geomatics and Transportation
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
An introduction to the knowledge and skill requirements of Geographic Information Systems (GIS) as applied to surveying-geomatics and transportation. Students will learn and apply GIS and cartographic concepts to develop problem solutions in surveying mapping & thematic mapping and to manipulate geo-referenced spatial information as required in typical industry applications.
Prerequisite(s): Departmental consent or a minimum grade of "C" in CENG 2231 or TCM 2233 or departmental consent.
Cross Listing(s): CENG 5432.

CENG 5433 Drainage & Erosion Control
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles and practices of drainage design including drainage structures, stormwater quality and erosion & sediment control measures, with particular emphasis on governmental publications and regulations.
Prerequisite(s): A minimum grade of "C" in CENG 5137 or 5137G or departmental consent.
Cross Listing(s): CENG 5433.

CENG 5433G Drainage and Erosion Control
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles and practices of drainage design including drainage structures, stormwater quality and erosion & sediment control measures, with particular emphasis on governmental publications and regulations. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in CENG 5137 or 5137G or departmental consent.
Cross Listing(s): CENG 5433.

CENG 5434 Surveying History & Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the legal aspects of surveying, including boundary law and the surveyor's rights and responsibilities, with particular emphasis on surveying practice in Georgia.
Prerequisite(s): A minimum grade of "C" in CENG 2231 or departmental consent.
Cross Listing(s): CENG 5434G.

CENG 5434G Surveying History and Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the legal aspects of surveying, including boundary law and the surveyor's rights and responsibilities, with particular emphasis on surveying practice in Georgia. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Departmental consent or a minimum grade of "C" in CENG 2231 or TCM 2233.
Cross Listing(s): CENG 5434.

CENG 5435 Introduction to Terrestrial LiDAR
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course presents a thorough introduction to terrestrial light detection and ranging (LiDAR) or laser scanning and its multiple applications. It includes the use of selected state-of-the-art, ground-based, instruments and ranging (LiDAR) or laser scanning and its multiple applications. It includes the use of selected state-of-the-art, ground-based, instruments and ranging (LiDAR) or laser scanning and its multiple applications. It includes the use of selected state-of-the-art, ground-based, instruments and ranging (LiDAR) or laser scanning and its multiple applications.
Prerequisite(s): Approval of the Instructor.
Cross Listing(s): 5435G.

CENG 5435G Introduction to Terrestrial LiDAR
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course presents a thorough introduction to terrestrial light detection and ranging (LiDAR) or laser scanning and its multiple applications. It includes the use of selected state-of-the-art, ground-based, instruments and ranging (LiDAR) or laser scanning and its multiple applications. It includes the use of selected state-of-the-art, ground-based, instruments and ranging (LiDAR) or laser scanning and its multiple applications. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Permission of the instructor.
Cross Listing(s): CENG 5435.
CENG 5436 Introduction to Close-Range Photogrammetry
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course presents a thorough introduction to close-range photogrammetry and its multiple applications in Civil and Construction Engineering. It includes the use of selected, state-of-the-art, unmanned aerial vehicles and associated data collection and processing software packages to generate 3D spatial models. 
Prerequisite(s): Approval of the Instructor.
Cross Listing(s): CENG 5436G.
CENG 5436G Introduction to Close-Range Photogrammetry
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course presents a thorough introduction to close-range photogrammetry and its multiple applications in Civil and Construction Engineering. It includes the use of selected, state-of-the-art, unmanned aerial vehicles (UAVs) and associated data collection and processing software packages to generate 3D spatial models. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverable representative of graduate level work, as determined by the instructor.
Prerequisite(s): Permission of the instructor.
Cross Listing(s): CENG 5436.
CENG 7031 Research Methods for Civil Engineers and Construction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the synthesis and application of research design in the civil engineering and construction fields. The course emphasizes the understanding of current and emerging trends in these fields, formulation of research questions, development of research hypotheses, and the design of field data collection and experiments. Graduate students will be required to communicate research ideas in both oral and written forms.
Prerequisite(s): Graduate student standing.
CENG 7891 Master’s Project
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is available for students to undertake individualized experimentations research, and study related to civil engineering, and/or a capstone project. The specific topic will be approved by a faculty member in the program, and credit will be assigned commensurate with the magnitude of the study.
CENG 7895 Special Problems in Civil Engineering
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Individual or specialized study in the area of civil engineering not otherwise covered in the program. Students must submit a proposal of the special problem for approval by the faculty member of record. Credit will be assigned commensurate with the magnitude of the study.
CENG 7999 Thesis
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course focuses on the preparation and completion of the thesis.

CHBE Comm Hlth Behavior & Ed

CHBE 9130 Research Methods in Community and Behavioral Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces doctoral students to research methods in health science. Development and presentation of research proposals will be the focus of the course. Additional emphasis will be placed on writing skills in research and grant applications.
CHBE 9132 Ecological Determinants of Public Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides students with an examination of the social and behavioral determinants of health at all ecological levels, and their relationships with health equity. It also explores social and behavioral interventions to address community health inequity at multiple ecological levels (individual through policy).
CHBE 9230 Community-Based Public Health Program Planning and Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the theory and application of community-based program planning and evaluation. Concepts in community assessment, organization, and mobilization for the purpose of addressing identified public health concerns will serve as the foundation for the public health planning process. Appropriate techniques of partnership building, planning strategies, data collection, data analysis, and evidence-based decision making will also be introduced.
CHBE 9235 Communication and Advocacy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide students with the ability to evaluate the history and current applications of health communication theory and strategies to public health practice and research. Emphasis is placed on the communication theory and strategies designed to create change across the ecological spectrum, from individual to policy levels. Students will gain the skills to structure, develop, implement and evaluate social marketing, media advocacy, risk communication and advocacy efforts for policy change. In addition, ability to lead systematic qualitative and mixed method data collection processes involving interviewing skills, participant observation and focus group development will be developed. Emphasis is placed on critical thinking skills to help students analyze and utilize these skills in research and practice in diverse public health settings.
CHBE 9331 Health Disparities and the Rural Underserved
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an in-depth look at health disparities, including factors related to the history, politics, socioeconomic, race/ethnicity, and access to and utilization of health care. The extant literature in each of these areas will be examined and discussed.
CHBE 9335 Global Health and Preparedness
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on global public health and preparedness for domestic and global emergencies. Students will explore patterns of health and disease around the world, and compare them to public health issues in the United States. An ecological framework will be employed to illustrate the complex political, social, economic, and environmental determinants of global health inequity. Concepts from the social sciences, epidemiology, health systems, and policymaking will be incorporated. The course will emphasize issues related to humanitarian emergencies and natural disasters both globally and domestically, and the need to build public health infrastructure and preparedness to mitigate them.
CHBE 9630 Doctoral Seminar in Community Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This seminar will provide students with the opportunity to analyze the history and current applications of social and behavioral science theories, approaches, models and strategies (learned throughout the curriculum) to public health practice and research. This seminar will examine the breadth of epistemologies employed as we develop effective methods to create change across the ecological spectrum, from individual to policy levels. Emphasis will be placed on critical thinking skills to help students engage in dialogue about what will be effective research and practice in diverse public health settings over the next ten years.

CHEM Chemistry

CHEM 1010 Essentials of Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Quantitative survey of chemical sciences emphasizing applications in human physiology, clinical chemistry, inorganic, organic, and biochemistry. Experimental principles illustrated with class-room demonstrations. (Credit in CHEM 1010 may not be applied to the major field requirement in chemistry.)
Prerequisite(s): Completion of MATH 1001 or MATH 1111 or MATH 1113 or MATH 1161 or MATH 2072.
CHEM 1030 Chemistry and Your World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the many ways in which chemistry affects their lives. Topics include plastics, nutrition, drug design and the many aspects of environmental chemistry. Decision-making activities related to real-world societal issues will help develop critical thinking skills.

CHEM 1040 Chemistry and the Environment
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Students will study the fundamental aspects of chemistry in its political, economic, social, and international context. The laboratory will be a primary component of the course in that some of the course material will be first experienced in the laboratory. The laboratory will stress experimental design and data analysis as applied to environmental science.

CHEM 1151K Survey of Chemistry I
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
First course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Topics to be covered include elements and compounds, chemical equations, nomenclature, and molecular geometry. Laboratory exercises supplement the lecture material.
Prerequisite(s): A minimum grade of "C" in MATH 1111 or placement eligibility for a higher math course.

CHEM 1152K Survey of Chemistry II
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Second course in a two-semester sequence covering elementary principles of general, organic and biochemistry designed for allied health professions majors. Laboratory exercises supplement the lecture material.
Prerequisite(s): A minimum grade of "C" in either CHEM 1151K or CHEM 1212K.

CHEM 1211 Principles of Chemistry I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
First course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Topics to be covered include composition of matter, stoichiometry, periodic relations, and nomenclature.
Prerequisite(s): A minimum grade of "C" in MATH 1111 or placement eligibility for a higher math course.

CHEM 1211K Principles of Chemistry I
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
First course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Topics to be covered include composition of matter, stoichiometry, periodic relations, and nomenclature. Laboratory exercises supplement the lecture material.
Prerequisite(s): A minimum grade of "C" in MATH 1111 or placement eligibility for a higher math course.

CHEM 1211L Principles of Chemistry I Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
Laboratory exercises supplement the lecture material of CHEM 1211.
Prerequisite(s): Prior or concurrent enrollment in CHEM 1211.

CHEM 1212 Principles of Chemistry II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Second course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Prerequisite(s): A minimum grade of "C" in CHEM 1211.
Corequisite(s): CHEM 1212L.

CHEM 1212K Principles of Chemistry II
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Second course in a two-semester sequence covering the fundamental principles and applications of chemistry designed for science majors. Laboratory exercises supplement the lecture material.
Prerequisite(s): A minimum grade of "C" in either CHEM 1211K or CHEM 1211 and CHEM 1211L.

CHEM 1212L Principles of Chemistry II Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
Laboratory exercises supplement the lecture material of CHEM 1212.
Prerequisite(s): A minimum grade of "C" in CHEM 1211L.
Corequisite(s): CHEM 1212.

CHEM 1310 Comprehensive General Chemistry
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Fundamental laws and theories of chemical reactions. Topics include atomic structure, bonding, theory, stoichiometry, properties of matter; chemical thermodynamics, electrochemistry and kinetics. Prior completion of a high school chemistry course is highly recommended.

CHEM 2099 Special Topics in Chemistry
4 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
Course taught on a special topic in chemistry on a one-time basis.
Prerequisite(s): Permission of instructor.

CHEM 2100 Analytical Chemistry
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
The study of modern quantitative determination methods, including volumetric and gravimetric analyses, equilibrium calculations, and acid/base chemistry, as well as the fundamental theory of chromatography, spectroscopy, and electrochemistry.
Prerequisite(s): A minimum grade of "C" in either CHEM 1212K or CHEM 1212 and CHEM 1212L.

CHEM 2400 Fundamentals of Organic Chemistry and Biochemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamentals of organic chemistry applied to the major biochemical pathways. Course designed for allied health majors. (Credit may not be applied to the major field requirement in chemistry.)
Prerequisite(s): A minimum grade of "C" in CHEM 1212K or CHEM 1212 and CHEM 1212L.

CHEM 2900 Principles of Chemistry Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to develop basic research and laboratory skills in chemistry majors. Skills to be covered include literature and scientific writing, scientific ethics, report writing, presentation skills, waste handling, chemical labeling, SDS sheets, and appropriate use of common equipment. Additional topics to be covered include career options for chemists and resume/interviewing skills.
Prerequisite(s): A minimum grade of "C" in either CHEM 1212K or CHEM 1212 and CHEM 1212L.

CHEM 3000 Special Topics in Chemistry
5 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
An intensive study in a specialized field of chemistry. Provides an in-depth look at an area of special interest which is not a part of the standard coursework in chemistry.
Prerequisite(s): Permission of instructor required.

CHEM 3010 Scientific Glassblowing
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Develops the fundamental glassblowing skills required for the construction of glassware used in scientific investigations.
Prerequisite(s): Junior standing and science major required.
CHEM 3100 Instrumental Analysis
4 Credit Hours. 0.4 Lecture Hours. 0.3 Lab Hours.
The study of modern spectroscopy and chromatography methods. The spectroscopic methods to be covered may include mass spectrometry, ultraviolet/visible spectroscopy, fluorescence spectroscopy, atomic spectroscopy, infrared spectroscopy and raman spectroscopy. The chromatographic methods to be covered may include gas chromatography, liquid chromatography, supercritical fluid chromatography, thin-layer chromatography and capillary zone electrophoresis. Students may not receive credit for both CHEM 3100 Instrumental Chemistry and BCHM 3100 Bioinstrumental Chemistry.
Prerequisite(s): A minimum grade of "C" in CHEM 2100.

CHEM 3300 Inorganic Chemistry
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Introduces students to a broad overview of modern inorganic chemistry. Included are considerations of molecular symmetry and group theory, bonding and molecular orbital theory, structures and reactivities of coordination compounds, organometallic chemistry, catalysis and transition metal clusters. Laboratory experiences will include the measurement of several important features of coordination compounds, such as their electronic spectra and paramagnetism, as well as the synthesis and characterization of organometallic compounds. Majors may not receive credit for both CHEM 3300 Inorganic Chemistry and BCHM 3310 Bioinorganic Chemistry.
Prerequisite(s): A minimum grade of "C" in CHEM 3402 and CHEM 2100.
Corequisite(s): CHEM 3300L.

CHEM 3401 Organic Chemistry I
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Introduces the fundamental concepts of structure and reactivity of organic compounds. Topics covered include the chemistry of alkanes, alkyl halides, alkenes, and alcohols, as well as the concepts of reaction mechanisms, stereochemistry and spectroscopy of organic compounds.
Prerequisite(s): A minimum grade of "C" in either CHEM 1212K, or CHEM 1212 and CHEM 1212L.

CHEM 3402 Organic Chemistry II
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
A continuation of CHEM 3401 focusing on aromatics, aromatic compounds, aldehydes, ketones, amines, and carboxylic acids and their derivatives. Emphasizes the synthetic and mechanistic aspects of these compounds and will continue the study of spectroscopy of organic compounds.
Prerequisite(s): A minimum grade of "C" in CHEM 3401.

CHEM 3410 Introduction to Molecular Modeling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the use of computational chemistry models and their application to chemical research. Topics include the computational methods and model chemistries, single-point energy calculations, geometry optimizations, relative energies and stabilities, calculations of NMR chemical shifts, and vibrational frequency calculations among other topics.
Prerequisite(s): A minimum grade of "C" in CHEM 3401.

CHEM 3501 Chemical Kinetics and Thermodynamics
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
A survey of chemical kinetics and thermodynamics. Covers the kinetic theory of gases, rates of reaction, integrated rates, rate laws and reaction mechanisms, followed by a development of the three laws of thermodynamics, chemical and phase equilibria and solution thermodynamics. Students may not receive credit for both CHEM 3501 Chemical Kinetics and Thermodynamics and BCHM 3510 Biophysical Chemistry.
Prerequisite(s): A minimum grade of "C" in CHEM 2100 and MATH 2242 and PHYS 2211K.

CHEM 3502 Introduction to Quantum Chemistry
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
A development of quantum chemistry and its application in a number of relevant areas. Covers atomic structure, molecular structure, molecular spectroscopy, and statistical mechanics.
Prerequisite(s): A minimum grade of "C" in CHEM 2100 and MATH 2242 and PHYS 2212K.

CHEM 3700 Teaching Internship in Chemistry
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Student internship in the laboratory component of CHEM 1040 (Chemistry and the Environment) under the mentorship of a faculty member. The student will participate in an introductory workshop immediately prior to the start of the semester, intern in the CHEM 1040 laboratory and meet with the faculty mentor one hour each week. One credit hour per laboratory section of CHEM 1040 in which the student interns.
Prerequisite(s): Permission of the instructor and one of the following: CHEM 2900 or CHEM 3401.

CHEM 3901 Chemical Research
1-3 Credit Hours. 0 Lecture Hours. 3-9 Lab Hours.
Faculty-originated chemical lab-based research project. Written report. Open to transient students only with permission of the Dean of Arts and Sciences at AASU and the student's home college.

CHEM 4050 Ethical Issues in Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore the ethical issues of science integrity and responsibility that have confronted the scientific community in the past and today as it relates to research practices and its impact on the public domain. Prerequisite(s): A minimum grade of "C" in CHEM 3402.

CHEM 4100 Advanced Spectroscopy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to modern chemical structure elucidation using spectroscopic techniques. Details of multi-nuclear dimensional NMR spectra are discussed in depth, detailing both the background behind the techniques and their use in determining chemical structure. Multi-nuclear two-dimensional NMR spectra are used introduced as well, as well as the use of Fourier Transform IR spectroscopy and UV-Vis region spectroscopy.
Prerequisite(s): A minimum grade of "C" in CHEM 3402 and CHEM 2100.

CHEM 4110 Chemical Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theory and practice of modern electrochemical methods of analysis. These methods include potentiometry, coulometry, voltammetry, computer simulation and other modern forms of electrochemical analysis.
Prerequisite(s): A minimum grade of "C" in CHEM 2100.

CHEM 4120 Industrial Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide an overview of the chemical industry. In addition to providing a basic understanding of the top 50 industrial chemicals, their manufacturing processes, and raw materials sources, the course will also cover the origin and manufacture of basic petroleum feed stocks and petrochemicals; catalysis; pulp and paper chemistry; polymers and plastics; adhesives, sealants, and glues; agricultural chemistry; pharmaceutical chemistry; and selected topics of importance to the industry.
Prerequisite(s): A minimum grade of "C" in CHEM 3300.

CHEM 4140 Principles of Chemical Separations
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course will examine theories, and models of separation with applications to the analyses of a wide range of chemical, biological, and environmental samples. Topics include high-resolution gas chromatography and high-performance liquid chromatography. Emphasis is on the theory of reverse-phase, normal-phase, ion-exchange, size-exclusion, and affinity-based separations. Instrumentation such as detectors, pumps, and columns, and data acquisition and analysis are also presented.
Prerequisite(s): A minimum grade of "C" in CHEM 2100.
CHEM 4150 Chemometrics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will cover application of mathematical and statistical techniques for the analysis of complex chemical data set and to support experimental design. Prerequisite(s): A minimum grade of "C" in CHEM 3402 and CHEM 3100.

CHEM 4160 Forensic Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to forensic chemistry, which may include utilization of physical evidence in law enforcement, processing a crime scene, the application of chemistry principles to the identification and analysis of physical evidence, toxicology, microscopy, and aspects of arson. Prerequisite(s): A minimum grade of "C" in CHEM 3402 and CHEM 3100.

CHEM 4210 Biotechnology and Biocatalysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces principles and techniques in biotechnology. The biotechnology topics will be used to study the past, present, and future of biocatalysis. Prerequisite(s): A minimum grade of "C" in BCHM 5201. Cross Listing(s): BCHM 4210.

CHEM 4220 Chemistry of Biofuels
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the principles of fuels and biofuels. It will also cover the latest in biochemistry and biotechnology and apply this knowledge to current research in biofuels. Prerequisite(s): A minimum grade of "C" in BCHM 5201. Cross Listing(s): BCHM 4220.

CHEM 4310 Polymer Materials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce the world of polymer materials, which have become ubiquitous in daily life. The course will cover how polymers are synthesized and characterized, the unique properties of polymers, and how polymer materials are used. Important concepts on polymer structure, molecular weight and its distribution, glass transition, and amorphous versus crystalline state will be introduced. Prerequisite(s): A minimum grade of "C" in CHEM 3401.

CHEM 4320 Green Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on understanding the basic principles of green chemistry and applying them to make organic reactions and processes environmentally benign. Other course topics will include the study of the earth and its atmosphere, the concept of atom economy, catalysis, and enzyme catalysis, as well as green reaction media and the use of various renewable energy sources in organic reactions. Prerequisite(s): A minimum grade of "C" in CHEM 3402.

CHEM 4330 Solid State Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is an introductory course in solid state chemistry. It will cover synthesis, structure-property relationships and common characterization techniques for solid materials. The lab component will cover select syntheses and characterization techniques of extended solids, focusing on Single crystal and Powder X-ray diffraction structure determinations, and Rietveld Refinement techniques. Prerequisite(s): A minimum grade of "C" in CHEM 3300 and CHEM 3100.

CHEM 4340 Materials Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will be an introduction to materials chemistry, with emphasis on the interdisciplinarity of material research. It will overview various classes of materials, including synthesis and characterization, their structural and physical properties, and how those properties relate to their potential applications. Prerequisite(s): A minimum grade of "C" in CHEM 3300 and CHEM 3402.

CHEM 4410 Food Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores the chemistry associated with the production and processing of food. Includes an examination of the primary literature. Prerequisite(s): A minimum grade of "C" in CHEM 3402.

CHEM 4510 X-ray Crystallography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Diffraction and crystal structure with identification from single crystal and powder patterns. Lattice parameters and crystal orientation. Prerequisite(s): A minimum grade of "C" in CHEM 2100 and CHEM 3402.

CHEM 4790 Chemistry Internship
1-4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An independent research experience in which a student will investigate a research problem under the direction of a faculty member. All laboratory. Prerequisite(s): Permission of instructor required.

CHEM 4990 Independent Study
1-3 Credit Hours. 1-3 Lecture Hours. 3-9 Lab Hours.
Supervised individual research or study.

CHEM 5110 Environmental Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the current environmental issues and the underlying chemistry associated with them, including stratospheric chemistry, air pollution, global climate change, toxic organic chemicals, natural water systems, soil chemistry, and energy production. Prerequisite(s): A minimum grade of "C" in CHEM 2100 and CHEM 3402. Cross Listing(s): CHEM 5110G.

CHEM 5110G Environmental Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the current environmental issues and the underlying chemistry associated with them, including stratospheric chemistry, air pollution, global climate change, toxic organic chemicals, natural water systems, soil chemistry, and energy production. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): CHEM 5110.

CHEM 5410 Advanced Organic Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to build upon the knowledge gained in CHEM 3401 (Organic I) and CHEM 3402 (Organic II). Topics covered may include considerations of structural and mechanistic organic chemistry, synthetic organic chemistry and bioorganic chemistry. Prerequisite(s): A minimum grade of "C" in CHEM 3402. Cross Listing(s): CHEM 5410G.

CHEM 5410G Advanced Organic Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to build upon the knowledge gained in CHEM 3401 (Organic I) and CHEM 3402 (Organic II). Topics covered may include considerations of structural and mechanistic organic chemistry, synthetic organic chemistry and bioorganic chemistry. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): CHEM 5410.
CHEM 5420 Principles of Drug Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to introduce the chemistry of drug design and development, as well as drug actions and their impacts on society. Topics include drug discovery, receptor site theory, neurotransmitters, pharmacokinetics, federal drug laws, drugs in sports and individual classes of drugs. Prerequisite(s): A minimum grade of "C" in CHEM 3402. Cross Listing(s): CHEM 5420G.

CHEM 5420G Principles of Drug Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to introduce the chemistry of drug design and development, as well as drug actions and their impacts on society. Topics include drug discovery, receptor site theory, neurotransmitters, pharmacokinetics, federal drug laws, drugs in sports and individual classes of drugs. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): CHEM 5420.

CHEM 5430 Carbohydrate Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with an introduction to the chemistry of carbohydrates. Topics include structural aspects, stereochemistry, synthesis, conformational analysis, polysaccharides, and vaccine development. Prerequisite(s): A minimum grade of "C" in CHEM 3402. Cross Listing(s): CHEM 5430G.

CHEM 5430G Carbohydrate Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with an introduction to the chemistry of carbohydrates. Topics include structural aspects, stereochemistry, synthesis, conformational analysis, polysaccharides, and vaccine development. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Cross Listing(s): CHEM 5430.

CHEM 5430 Carbohydrate Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the chemistry of carbohydrates. Topics include structural aspects, stereochemistry, synthesis, conformational analysis, polysaccharides, and vaccine development. Prerequisite(s): A minimum grade of "C" in CHEM 3402. Cross Listing(s): CHEM 5430G.

CHEM 6130 Industrial Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide an overview of the chemical industry, focusing on the chemistries located in the Southern US. Topics to be covered will be the origin and manufacture of basic petroleum feedstocks and petrochemicals; catalysis; pulp and paper chemistry; polymers and plastics; adhesives, sealants, and glues; agricultural chemistry, green chemistry, and nuclear chemistry. Financial analysis, costs, and intellectual property will be discussed. The impact of these industries on the economy of the Southern United States will also be addressed.

CHEM 6131 Solid State Materials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to the physical and chemical properties of solids. Topics may include: periodic structure, symmetry of crystals, diffraction, reciprocal lattice, chemical bonding, lattice dynamics, phonons, thermal properties, and free electron gas. Bloch theorem, band structure, nearly free electron approximation, tight binding method, Fermi surface, semiconductors, electrons, holes, impurities, optical properties, excitons, and magnetism will be introduced. Prerequisite(s): A minimum grade of "C" in MATH 2242. Cross Listing(s): CHEM 6131.

CHEM 6133 Photonics Plasmonics & Metamat
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course offers an introduction into theory and models related to photonics and electronics of photonic crystals, plasmonic metal nanostructures, metal-dielectric metamaterials and metasurfaces, localized scatterers and emitters. Students will improve their overall understanding of how these methods and models apply to practical systems related to spectroscopy, imaging, excitation and control over condensed, chemical and biological nano- and microstructures. The course covers a broad range of topics including: dielectric properties of materials in relation to their electronic structure, propagation and emission of radiation in strongly inhomogeneous and anisotropic materials, introduction into plasmonics, properties of photonic crystals and metamaterials, Mie theory of light scattering and near-fields at micro and nanoparticles, optical forces and tweezers, energy and momentum transfer in light-matter interactions and others.

CHEM 6230 Scientific Inquiry and Ethics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide a foundation in modern research methods, data handling and analysis, and a grounding in the current standards for scientifically ethical behavior and publishing.

CHEM 6530 Professional Science Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to prepare professional scientists and science academicians in the skills of effective communication in order to convey scientific principles and knowledge to others in the sciences. It will also create awareness of the need to write promoting science understanding in lay people.

CHEM 6730 Master of Science in Physical Science Internship
3 Credit Hours. 0-12 Lab Hours.
This course is the required internship for the Master of Science in Physical Science (MSPS) degree. Students will apply their skills and knowledge to a current problem in a professional setting, either on campus or at the site of a participating sponsor.

CHEM 6940 Special Topics in Chemistry
1-4 Credit Hours. 0-12 Lecture Hours. 0-12 Lab Hours.
Topics chosen from all fields of chemistry dependent on instructor and student interest. Offered by special arrangement.

CHEM 6971 Independent Study I
1-4 Credit Hours. 0-12 Lecture Hours. 0-12 Lab Hours.
Qualified students perform literature searches and supervised laboratory experimentation and write acceptable reasearch reports. Proposed work must be approved in writing by supervising faculty and department head prior to initiation.

CHEM 7020 Chem for Secondary Sci Teacher
1-4 Credit Hours. 0-12 Lecture Hours. 0-12 Lab Hours.
Topics in chemistry with emphasis on their application to the secondary science classroom. Hands-on activities may include demonstrations, laboratory experiments and computer technology.

CHEM 7090 Selected Topics/Chemistry
1-6 Credit Hours. 0-6 Lecture Hours. 0-6 Lab Hours.
A course taught on a one time basis. Lecture only courses will be three credit hours while courses with a laboratory will be four credit hours.

CHEM 7130 Sustainability in the Physical Sciences
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide an overview of sustainability, including current standards of sustainability, quantitative methods of measurement, and current applications of sustainable practices. The twelve Principles of Green Chemistry and Engineering will form the foundation of this course. Case studies, analysis of sustainability trends and common practices, and future research will be covered. Lifecycle analysis, current best practices in sustainability, the triple bottom line, social impacts of sustainability, and other topics will be discussed.
CHEM 7231 Theoretical Chemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Chemistry research is increasingly supported by quantum chemical computations. This course will provide students with a complete understanding of ab initio quantum chemistry. Students are exposed to Hartree-Fock, MP2, and Coupled Cluster Theory in addition to basis sets and practical computational approaches. Upon completion, students will be able to choose a proper computational method, to diagnose issues that may arise within such computations, and also to compare methods from mathematical arguments. Prior knowledge in quantum chemistry and/or mechanics is highly recommended.

CHEM 7232 Toxicology of Nanomaterials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers concepts related to the toxicity of nanomaterials. Students will design methods for studying nanomaterial toxicity as well as for profiling various classes of nanomaterials.

CHEM 7334 Polymer Materials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the world of polymer materials, which are ubiquitous in daily life around the world. It will cover the chemistry of hard and soft polymers, applied polymer science, and the analysis of polymeric materials. This course will also cover how polymers are synthesized and characterized, what unique properties polymers have, and how polymer materials are used. Material covered will include different ways of synthesizing polymers, including step, chain (free radical, “controlled” free radical, ionic), catalytic, and ring opening polymerizations. Important concepts on polymer structure, molecular weight and its distribution, glass transition, and amorphous versus crystalline state will be introduced. Various physical properties and applications of polymers, including mechanical and electrical properties, will also be briefly described.

CHEM 7335 Coatings Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce the fascinating field of coatings technology, which is widely applied in daily life. The course will cover what a coating is typically composed of, what typical coating binders are and how they are made, how to formulate a coating (different coating categories), and how typical coatings properties are affected by various ingredients.

CHEM 7531 Chemistry of Biomolecules I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the fundamental structure and function of the three major classes of biomolecules: proteins, lipids, and carbohydrates, as well as signal transduction, DNA technologies, and membrane transport.

CHEM 7532 Chemistry of Biomolecules II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the catabolism and anabolism of biomolecules of proteins, lipids, and amino acids and examines nucleic acid chemistry, including DNA replication, transcription, translation, and recombinant DNA technology.

CHEM 7530 Graduate Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will consist of formal seminars and informal sessions on current topics of interest to the program as presented by visiting lecturers, local researchers, and students. All MS-APS students must attend a set number of seminars each term they are enrolled in the program. Thesis track students in their final semester will prepare a comprehensive presentation on their thesis research as well as submit a report reviewing the topics covered during the seminar series.

CHEM 7895 Research
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Graduate students will pursue, under the direction of their advisory committee, a program of independent research in a particular area of physical science. Results of the research will be presented as a thesis in partial fulfillment of the Master of Science in Applied Physical Science degree.

<td></td>
<td>Focusing on the characteristics of young children (6 weeks -5 years), this course teaches students how to put developmental theory into practice in a group care setting. Utilizing the Georgia Southern University Child Development Center, students will conduct observations and plan developmentally appropriate activities during their semester-long laboratory experience. Students are required to register for two laboratory sections, one preschool and one infant/toddler, along with the course. <strong>Prerequisite(s):</strong> A minimum grade of &quot;C&quot; in CHFD 1131 and CHFD 2135 and a completion of criminal background check and finger printing procedure.</td>

</tbody>
</table>
|             | This course emphasizes programming and evaluation across family and human service agencies. Topics will include nonprofit and government management needs assessment, program evaluation, and leadership skills. **Prerequisite(s):** A minimum grade of CHFD 1131, CHFD 2135, CHFD 2136.
CHFD 4134 Family Life Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to the theoretical, ethical, and methodological issues in family life education. Utilizing research and professional practice, students will learn to develop, implement, and evaluate educational programs and products that address issues of individuals and families across the lifespan.
Prerequisite(s): A minimum grade of "C" in CHFD 1131, CHFD 2135, CHFD 3139.

CHFD 4135 Parenting: Fam Child Int.
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The structure, function, and process of parenting are explored. An emphasis is placed on understanding characteristics of parents and parenting behavior and their consequences on children and parent-child relationships.

CHFD 4136 Assessment of Children
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course involves the assessment of development and learning of infants, children, and youth. A variety of tools and techniques will be used. Participation and collaboration as a team member is emphasized.
Prerequisite(s): A minimum grade of "C" in CHFD 1131, CHFD 2135, CHFD 3131.

CHFD 4138 Professional Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses essential workplace professional skills and ethical practice in careers related to Child and Family Development. An emphasis is placed on verbal and written communication skills, interview skills, job and internship placements, employment laws, application and utilization of ethical codes, and overall professionalism in the work setting.
Prerequisite(s): A minimum grade of "C" in CHFD 1131, CHFD 2135, CHFD 3131, CHFD 3133, CHFD 3135, CHFD 3136, CHFD 3139.

CHFD 4237 Legal and Public Policies Affecting Families
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines legal and public policies that affect families. Students will apply research, theory and developmentally appropriate knowledge to address contemporary public policy topics affecting families across the life span. Social policies will be analyzed from individualistic and familial perspectives to explore their impact on family processes.
Prerequisite(s): A minimum grade of "C" in CHFD 1131 and CHFD 2135 and CHFD 2136.

CHFD 4238 Child Life Practice in Healthcare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to foster the proficiency of the individuals pursuing a career in child life. Preparation that provides a theoretical and practical base for students will allow them to build a foundation of knowledge in the core competencies of child life. Through observation and interaction, the student will gain a working knowledge of how children and families are affected by illness and hospitalization.
Prerequisite(s): A minimum grade of C in CHFD 1131, CHFD 2135, CHFD 2136, and CHFD 3137.

CHFD 4790 Internship in Child and Family Development
9-12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The CHFD internship is a supervised experience in the Child and Family Development field where the intern employs the knowledge base acquired in their course work. Students must have a 2.5 GPA to apply to intern. The internship site is selected by the student after consulting with faculty and must be approved by the internship committee. Students enrolled in the program must comply with regulations required by the internship site and CHFD best practices. Interns must complete all components and required hours of the internship to receive a passing grade in the course. Interns will work full-time at the internship site for the entire semester.
Prerequisite(s): A minimum grade of "C" in CHFD 1131, CHFD 2135, CHFD 2130, CHFD 3131, CHFD 3133, CHFD 3135, CHFD 3136, CHFD 3139, CHFD 4138.

CHFD 4899 Directed Individual Study
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to investigate an area of interest under the direction of a faculty mentor.
Prerequisite(s): Permission of Instructor.

CHFD 6130 Parent Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of theory, research and developmental practice to: 1) understand the role of parents, teachers and community leaders in guiding the behavior of children from birth to adolescence; 2) establish mutually satisfying parent-child relationships throughout the life cycle; and 3) explore programs for parents and parental interactions with schools and other institutions.
Prerequisite(s): Completion of the Masters of Education core curriculum.

CHFD 6131 Assessment of Children's Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Assessment of Children's Development will prepare the graduate student to evaluate development and learning in the social, affective, physical and cognitive domains. Students will examine classroom and standardized assessment procedures as they relate to developmentally appropriate practices. Students will administer and score tests and then interpret results using a variety of assessment techniques.

CHIN Chinese

CHIN 1001 Elementary Chinese I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
For students who have never studied Chinese. Focus on basic communication skills (understanding, speaking, reading, and writing Chinese) and cultural understanding. Includes laboratory program.

CHIN 1002 Elementary Chinese II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued focus on basic communication skills (understanding, speaking, reading, and writing Chinese) and cultural understanding, with increased emphasis on active use of the language. Includes laboratory program.

CHIN 2001 Intermediate Chinese I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course builds upon communication skills (understanding, speaking, reading, and writing Chinese) and cultural understanding which is developed at the elementary level.

CHIN 2002 Intermediate Chinese II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued building upon proficiency skills (speaking, writing, listening, and reading) and cultural understanding. Focus on development of the ability to create with the language, to resolve simple situations, and to ask and answer questions. After completing this course, successful students should be prepared to function minimally in a Chinese-speaking environment and to take CHIN upper-division courses.

CHIN 3030 Selected Topics in Chinese
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Selected topics in Chinese.

Prerequisite(s): A minimum grade of "C" in CHIN 2002.
CHIN 3185 Studies Abroad: Speaking I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in oral communications in Chinese using materials that are appropriate for building on intermediate-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in CHIN 2002.

CHIN 4185 Studies Abroad: Speaking II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in oral communications in Chinese using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in CHIN 2002.

CHIN 4385 Studies Abroad: Writing II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in written communications in Chinese using materials that are appropriate for building on intermediate-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in CHIN 2002.

CIED Valdosta State-Franchise

CIED 7601 Course Management systems for E-Learning
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The study and ethical practice of facilitating online learning through integrated course management systems.

CIED 7602 Resources and Strat for E-Lear
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Practical experiences in selection, implementation, and evaluation of digital resources and strategies for teaching and learning.

CIED 7603 Design and Delivery of Inst E-Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Supervised online field-based experience in design, delivery, and evaluation of standards-based content to an appropriate student population.
Prerequisite(s): Completion of CIED 7601 and CIED 7602.

CISM Computer Infor Systems

CISM 1110 Computer Applications
1 Credit Hour. 0 Lecture Hours. 1 Lab Hour.
Provides lecture and detailed instruction in application software using word-processing, spreadsheets, database and presentation software.
Corequisite(s): CISM 1120.

CISM 1120 Computer Concepts
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Provides an introduction of computer concepts and the evolution of computers in society. Lecture topics include computer system components, data representation & storage, software & multimedia, computer architecture, data communications & network configuration, data security & privacy, viruses, ethics, email, Internet, and the computer marketplace.

CISM 1130 Computers and Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

CISM 1131 Computer Survival Skills
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a survey and instruction in the use of modern systems and applications software routinely used in personal, academic, and organizational computing. The purpose of the course is to aid students in becoming familiar and proficient in using common software and Internet tools. The topics address a wide variety of software available to manage personal computers; create, format, edit, convert, acquire, distribute and manage various PC and Internet file types; use and manage Web-based communications like email, FTP, IM, Chat and Blogs; effectively and efficiently use the Internet to search, acquire, research and manage Web-based content, data, and information; use established informational Web-sites for research. Other topics include PC and Internet security and risks, and recent developments in technologies and software that affect the typical computer user. This course is not a substitute for either CISM 1110, CISM 1120, or CISM 2530.

CISM 2030 Introduction to Business Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of fundamental Information Systems concepts and career opportunities. Students are introduced to the characteristics of business process, enterprise systems, and SAP ERP. Students use the Alice 3D visual programming environment and Java standard edition software to learn fundamental object oriented programming concepts.

CISM 2230 Advanced Java
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course extends the fundamental principles of object- oriented programming using Java as our tool. The focus of this class is on advanced applications development. Topics include: objects, classes, inheritance, interfaces, GUI components, layout managers, events, multimedia, exception handling, and I/O files.
Prerequisite(s): A "C" or better in CSCI 1236 (or equivalent) and a solid understanding of data types, control structures, and algorithm design.

CISM 2530 Advanced Business Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide students with hands-on experience in creating advanced business applications using spreadsheet and database management system (DBMS) tools. Advanced topics in word-processing and presentation tools will also be explored.

CISM 3131 Management Information Systems
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
An overview of the utilization of information technology in business organizations to support managerial decision making and to provide competitive advantage. This course will address the evolution of information and information technology as corporate assets, how information technology is reshaping organization structures and work processes, how it is changing business relationships among organizations, and emerging information technologies expected to significantly impact business operations in the years ahead.
Prerequisite(s): A minimum grade of "C" in all of the following: CISM 2530 and ACCT 2101 or ACCT 2030 and Sophomore standing.

CISM 3133 Database Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An applied study of business databases, their design, and implementation. The focus of the course is on application development with fourth generation systems. Applications using a third generation host language and application generators are used to demonstrate concepts and techniques.
Prerequisite(s): A minimum grade of "C" in CISM 2530 and Junior standing.
CISM 3134 Enterprise Infrastructure and Security  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An overview of the technology and management of the components that comprise today’s enterprise IT infrastructure, including its hardware, software, and networks. The course covers network architectures and protocols for the Internet including mobile and cloud computing, and discusses the pertinent security considerations.

CISM 3135 Enterprise Systems Analysis and Design  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to traditional and object-oriented analysis and design methods to solve business problems. Students will apply data and process modeling techniques to analyze the existing enterprise systems. The physical design will be performed by designing a customization to existing enterprise systems. Pre-requisite: A minimum grade of "C" in the following: CISM 3333 and CISM 3133 and Junior standing.

CISM 3237 Visual Basic.Net Windows and Web Applications Programming  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course introduces students to Visual Basic.Net which is a leading edge object oriented programming language that integrates with .Net platform to provide a programming component for Windows applications, as well as Internet and World-Wide-Web applications. The student will be exposed to and learn topics related to object oriented programming, strings, graphics, graphical-user-interface components, exception handling, multithreading, multimedia (audio, images, animation and video), file processing, prepackaged data structures, database processing, Internet and World-Wide-Web based client/server networking and distributed computing.  
Prerequisite(s): CISM 2230.

CISM 3331 Principles of Enterprise Information Systems Security  
3 Credit Hours. 0.2 Lecture Hours. 0.1 Lab Hours.  
An introduction to the various policy, administration, management, and technical aspects of information systems security across the enterprise. This course provides the foundation for understanding key policies and issues associated with protecting information assets; designing a consistent, reasonable information security system; identifying alternatives for determining the necessary levels of protection; and developing and administering appropriate responses to security incidents. Included are design issues for appropriate intrusion detection, disaster incidents, and reporting for various enterprise networking infrastructures.  
Prerequisite(s): A minimum grade of "C" in CISM 3134.

CISM 3333 ERP Systems Using SAP  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Focuses on Enterprise Planning (ERP) using SAP R/3. Students will spend computer intensive time navigating in SAP and completing SAP lab assignments. Currency in ERP developments by subscribing to Internet newsletters on ERP or SAP developments is required. Students will also be required to complete a major ERP project and give a presentation on important recent ERP developments.  
Prerequisite(s): A minimum grade of "C" in ACCT 2101 or ACCT 2030.

CISM 4135 Project Management and Development  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The course focuses on principles and processes of project management, specifically as they relate to the development of information systems to solve business problems. The fundamentals of organizational behavior, systems theory and systems dynamics, as well as the important components of project management such as planning, organizing, directing, and controlling are covered. In addition, team building and working with others is emphasized to improve efficiency and effectiveness. The students will have an opportunity to work with current Project Management software tools to emphasize the application of these concepts.  
Prerequisite(s): A minimum grade of "C" in CISM 3135 and Junior standing.

CISM 4136 Global Information Resource Management  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of the international management of the organization’s information systems function from the perspective of information as a critical organization resource and as a key to competitiveness in the global market. Emphasis will be placed on the application of technology to meet information systems requirement.  
Prerequisite(s): A minimum grade of "C" in CISM 3134 and CISM 3135.

CISM 4237 Business Intelligence  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to business intelligence and business analytics. Students will be exposed to recent technological developments in these areas, as well as best practices.  
Prerequisite(s): A minimum grade of "C" in CISM 2530 and junior standing; or a minimum grade of "C" in IT 3233.

CISM 4238 Network Administration  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An applied study of the problems inherent in the maintenance and management of the heterogeneous networking environments prevalent in the modern business enterprise. Emphasis will be placed on acquiring and integrating the practical management/technical skills that define the effective networking specialist.  
Prerequisite(s): A minimum grade of "C" in CISM 3134.

CISM 4239 Advanced Business Analytics with SAP HANA  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course covers advanced practices and concepts in the areas of business intelligence and business analytics. The course will emphasize more the data foundation required to support business intelligence and business analytics, rather than associated applications. Special emphasis will be given to the SAP HANA big data platform.  
Prerequisite(s): A minimum grade of "C" in CISM 4237 and CISM 3133 or IT 3233.

CISM 4332 Electronic Business  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course focuses on the linkage between organizational strategy and networked information technologies to implement a rich variety of business models in national and global contexts connecting individuals, businesses, governments, and other organizations to each other. The course examines e-business strategy and the development and architecture of e-business solutions and their components.  
Prerequisite(s): CISM 2230 and CISM 3134, MKTG 3131.

CISM 4333 Human Resource Information Systems  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of how human resource information systems are applied in organizations to support organizational strategy, improve efficiency and flexibility, increase productivity and performance, and ensure compliance with employment law. The focus will be on merging computer technology with a strategic human resource management perspective.  
Prerequisite(s): A minimum grade of "C" in MGNT 3334.

CISM 4335 Advanced Business Applications Programming (ABAP) for the SAP ERP System  
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.  
This course provides an overview of the ABAP programming language for the SAP enterprise resource planning system. Students will learn how to access database tables, design input screen selections and generate output list reports. Students will write a variety of beginning and intermediate level programs using the ABAP workbench, ABAP objects, and data dictionary tools. Modular programming technique such as subroutines, function modules, and events will also be discussed.  
Prerequisite(s): A minimum grade of "C" in all of the following: CISM 2030, CISM 3333 and prior or concurrent enrollment in CISM 3133 or IT 3233.
CISM 4336 ERP and Enterprise Performance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of Enterprise Resources Planning (ERP) systems and their impact on organizations. Organizational interest in integrated enterprise information systems and the factors that drive businesses to select and implement these solutions are addressed. Research evidence demonstrating the impact of ERP systems on enterprise performance is reviewed and students gain further understanding of the integrative nature of ERP systems by completing exercises using simulated ERP environments.
Prerequisite(s): A minimum grade of "C" in ACCT 2101 or ACCT 2030.

CISM 4434 Enterprise System Configuration
3 Credit Hours. 0.2 Lecture Hours. 0.1 Lab Hours.
This course focuses on configuring and testing an Enterprise Resource Planning (ERP) system for use in a large organization. Students learn how to setup a trading company from the ground up using SAP R/3. Throughout the semester, students will create and test the organizational structure, master data and business rules to integrate different functional business processes such as purchasing, sales, distribution, logistics, accounts payable, accounts receivable, etc. Students can also be expected to complete a major project working in cross-functional teams to configure and test an ERP system.
Prerequisite(s): A minimum grade of "C" in CISM 3333.

CISM 4435 ERP Web Portal Customization and Collaboration using SAP NetWeaver
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on how and why web-based ERP systems such as SAP Enterprise Portals are customized to extend their support of business processes. The course applies web portal customization and collaboration tools to illustrate key course concepts. The characteristics and benefits of enterprise web portals are examined along with the tools and processes used to implement and measure their success.
Prerequisite(s): A minimum grade of "C" in CISM 3333.

CISM 4436 SAP TERP10 Review
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a preparation course for the TERP10 SAP Academy Certification. Recommended for students who have completed 2 or more SAP approved courses toward earning their SAP Certificate.
Prerequisite(s): A minimum grade of "C" in ACCT 2101, ACCT 2030, CISM 3333, CISM 4436 and CISM 4434.

CISM 4437 Data Mining for Business Analytics
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Basic data mining techniques as applied within a business context. The following topics will be covered: predictive modeling, classification, pattern detection, clustering, and text and web mining.
Prerequisite(s): A minimum grade of "C" in BUSA 3131.

CISM 4790 Internship in Information Systems
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised work-study program in selected business firms throughout the southeast.
Prerequisite(s): Minimum institution GPA of 2.5 and permission of Department Chair or Internship Director.

CISM 4830 Special Problems in Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that is under the direction of a faculty sponsor. This course is designed to offer students an opportunity to pursue studies or topics not covered in scheduled courses. The scope and nature of the material covered is determined in consultation with the faculty sponsor.
Prerequisite(s): Senior standing.

CISM 4890 Directed Study in Information Systems
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Designed for independent study and research in selected areas of information systems under faculty supervision.
Prerequisite(s): Permission of Department Chair.

CISM 6120 Technology for Executives
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Examines the role of information technology (IT) in business and how IT is used to solve business problems. Fundamental grounding in key areas of IT (hardware, software, data resources, and networks) is provided, with the emphasis on how IT affects an organization, its employees and its competitive position. The challenges and opportunities related to networked enterprises and global markets are also explored. A variety of software tools are used to create solutions to traditional business problems, with the focus on the application of problem solving and critical thinking skills, rather than the achievement of computer literacy.

CISM 7030 Special Topics in Information Systems
3 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
Provides the student with an opportunity for in-depth study of selected topics in Information Systems.

CISM 7131 Survey of Digital Forensics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will survey the current digital environment as it relates to financial and business fraud. Topics will include a survey of the forensic investigative process for digital evidence, case studies of investigations where proper data handling and analysis resulted in positive investigative results, an overview of best practices for evidence presentation, and analysis of current events and investigations from open sources.
Prerequisite(s): Admission to the MAcc Program and permission of SOA director.

CISM 7231 ERP Business Process Analysis Using SAP
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Many business organizations have adopted enterprise resource planning (ERP) systems, such as SAP, to provide a platform for supporting and integrating core business processes such as accounting and finance, procurement, production planning, material management, and sales and distribution. This course focuses on Enterprise Resource Planning (ERP) systems and utilizes SAP to illustrate how ERP systems are employed in business organizations to support business processes. At the end of the course, students will have an overview of ERP characteristics, components and benefits; they will be familiar with the SAP graphical user interface (GUI) and navigation.
Prerequisite(s): Graduate standing and permission of Director of Graduate Programs for COBA.

CISM 7235 ERP Customization for SAP
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course focuses on how and why ERP systems are customized to extend their support business processes and employs SAP customization tools to illustrate key course concepts. The characteristics and benefits of enterprise portals are examined along with the tools and processes used to implement and measure their success.

CISM 7330 Information Technology Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to enable the manager to effectively utilize and manage information technology in the applied business environment. The course focuses on the managerial, not the technical aspects of information management. No prior technical expertise is required. Relevant readings and cases are used to apply the concepts and techniques presented in the course.
Prerequisite(s): Graduate standing and permission of Director of Graduate programs for COBA and prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.
CISM 7331 Enterprise Systems Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course emphasizes the methods, techniques, and tools of analyzing and designing an enterprise information system. Topics include design methodologies, data collection and analysis techniques, and design tools. Students will analyze problems of the current enterprise system, propose alternatives to resolve the problems, and implement their design to change/replace the current system. The implementation will be supported by modern enterprise resource planning tools: such as SAP R/3.
Prerequisite(s): Graduate standing and permission of Director of Graduate programs for COBA; prior or concurrent enrollment with a minimum grade of “C” in MGNT 7331.

CISM 7332 Enterprise Data Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the design and use issues underlying relational, object-oriented and multidatabase management systems. Design and implementation methods are examined with the support of modern software tools, such as Oracle. Data management issues are addressed, including modern data storage infrastructure technologies (such as Data Warehousing, and SANs), the role of metadata, and storage of semi-structured data.
Prerequisite(s): Graduate standing and permission of Director of Graduate programs for COBA; prior or concurrent enrollment with a minimum grade of “C” in MGNT 7331.

CISM 7333 Digital Commerce
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course aims to provide students with an introduction to the issues that surround the management of digital commerce technologies within the business environment. Topics include global issues of E-Commerce, Internet business models, online marketing, mobile and ubiquitous commerce, W3C E-Commerce standards, electronic payments, and online agent technologies.
Prerequisite(s): Graduate standing and permission of Director of Graduate programs for COBA; prior or concurrent enrollment with a minimum grade of “C” in MGNT 7331.

CISM 7334 IT Strategy and Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course emphasizes competitive advantage as a driver in information systems design and deployment. Among topics examined are: achieving sustainable competitive advantage via IT, how IT can be used to create business value, measuring returns on IT investments, developing an IT strategic plan, alignment of IT with corporate strategy, IT governance & ethics, outsourcing IT, developing IT as an organizational core competency, and improving business processes through the application of IT.
Prerequisite(s): Graduate standing and permission of Director of Graduate programs for COBA; prior or concurrent enrollment with a minimum grade of “C” in MGNT 7331.

CISM 7335 Business Intelligence and Performance Management Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the process of decision making, decision support systems, data warehousing, extraction, transformation and load (ETL) processes, on-line analytical processing (OLAP), enterprise performance management systems, and data mining. A number of software products from SAP are featured in this course, as well as software from other vendors.
Prerequisite(s): Completion of CISM 7330 is recommended.

CISM 7336 Enterprise Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Many organizations use large enterprise information systems, such as SAP, as the core of the financial, human resource, logistics, and manufacturing information systems. This course focuses on Enterprise Resource Planning (ERP) using SAP, along with Enterprise Architecture and other methods to implement an enterprise information solution. Special topics include managing SAP projects successfully.
Prerequisite(s): Completion of CISM 7330 is recommended.

CISM 7339 ERP Certification Review
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses the integration of business processes within SAP and prepares students for SAP's C_TERP10_60 certification exam. It serves as a capstone course for the ERP Certificate program and components of other graduate programs that include multiple courses that expose students to SAP.
Prerequisite(s): Completion of CISM 7231 is recommended.

CISM 7431 Project Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the principles and processes of project management using a systematic approach to problem solving. The project management body of knowledge areas (PMBOK) is covered, along with project management life cycle in addition to traditional project management (e.g., efficiency of the project, operational performance, planning, meeting time and budget goals). This course will give special emphasis to the management of implementation projects relevant to the students' majors, e.g. Enterprise Resource Planning (ERP) for Information Systems students or Total Quality Management (TQM) for Management students. Students are also taught how to use computer software to facilitate project management, and obtaining project management certification is emphasized.
Prerequisite(s): A minimum grade of “B” in CISM 7330 and prior completion of CISM 7331 is recommended.

CISM 9630 Information Systems Theories and Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide doctoral students with an overview of information systems theory and current research in information systems, which will provide students the foundational knowledge to perform cross-disciplinary research between the fields of IS and other disciplines, such as Logistics/SCM.
Prerequisite(s): Acceptance to Ph.D. Program in Logistics & Supply Chain Management.

CISM 9631 Seminar in Supply Chain Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of supply chain information systems and the critical role that these systems play in the ability of firms to reduce costs and increase the responsiveness of their supply chain. The value and competitive advantage of integrated supply chain management systems will be stressed along with the importance of enterprise resource planning, supply chain planning, warehouse management, and network modeling systems. SAP's SCM solutions and roadmap will be featured and emerging technologies capable of transforming supply chain operations and management will be explored.

CISM 9632 Enterprise Information Systems Theory and Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide doctoral students with an overview of current research in Enterprise Information Systems, with special emphasis on ERP (Enterprise Resource Planning) systems. This course will emphasize the design, implementation, and management aspects of these systems (e.g., EIS project management, architecture). Completion of this course will prepare doctoral students to perform research within the EIS subfield.
Prerequisite(s): Acceptance to Ph.D. Program in Logistic & Supply Chain Management.
COED PBB Practicum

COED 3610 Honors Research Seminar Education
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
A seminar course to prepare undergraduate teacher education students to conduct research projects in education. Reserved for teacher education students in the University Honors Program or others seeking educational research experience as an undergraduate.

Prerequisite(s): A minimum grade of "C" in EDUC 2110, EDUC 2120, EDUC 2130; and permission of instructor.

COHE Community Health

COHE 6130 Research Methods in Health Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to research methods in health science. Development and presentation of practicum and research proposals will be the focus of the course. Additional emphasis will be placed on writing skills in research and grant applications.

COHE 7090 Selected Topics in Community Health Education
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Allows the student the opportunity to receive specialized and/or focused instruction in a community health topic not generally offered by the department.

COHE 7232 Health Promotion Planning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to the theory and application of planning and evaluation principles. Planning and evaluation skills will be developed that can be utilized in a variety of health-related settings. Familiarizes students with theories and models from the social and behavioral sciences and health education used in behavior change interventions. Emphasizes the planning and implementing of community health interventions at multiple ecological levels.

COHE 7233 Ecologically Focused Program Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of the principles of program evaluation. It explores the methods associated with systematic evaluation of public health education programs. Students will learn the skills needed to plan, conduct, and critique evaluation research. The content of the course includes: program logic models, formative, process, impact, outcome, and summative evaluation; theory driven evaluation; a review of validity issues as they relate to evaluation; sampling in a complex context; operationalizing variables; assessment of measurement instruments; and analysis of quantitative evaluation designs. In addition, issues that impact evaluation across the ecological model, specifically the importance of context and equity issues, will be examined. Qualitative methods used in program evaluation and mixed method designs for evaluation will be highlighted. Supporting the needs of all stakeholders in the evaluation will be emphasized.

Prerequisite(s): A minimum grade of "B" in COHE 7232.

COHE 7234 Community Health Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced concepts in the purpose and methods of community health organization, social action, organizational development, policy influence, capacity building, community diagnosis (needs assessment), social networking and coalition formation to bring about health behavior change and improved quality of life. Special focus on the application of methods presented to develop and enhance community health education intervention efforts.

COHE 7237 Rural Community Health Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of social, economic, political, and cultural influences that impact the health of individuals and families in rural communities. Designed for health professionals, this course focuses on improving health status and developing culturally appropriate and effective intervention and services in rural settings.

COHE 7238 Communication for Change
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to familiarize students with the history and current applications of health communication theory and strategies to public health practice and research. This course examines how to structure, develop and evaluate social marketing, media advocacy, risk communication and advocacy skills for change. In addition, systematic qualitative data collection processes such as interviewing skills, participant observation and focus groups will be developed. Emphasis is placed on critical thinking skills to help students analyze and utilize these skills in research and practice.

COHE 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.

COML Comparative Literature

COML 2531 Crossing Borders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is the foundation course for the Minor in Comparative Literature. It is designed as a transcultural, interdisciplinary course in which students discover and analyze English and other national literatures in translation. Course includes guest lecturers from a number of related disciplines.

Prerequisite(s): A minimum grade of "C" in ENGL 1102.

COML 3090 Selected Topics
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Selected topics in comparative literature.

COML 3530 Literary Translation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the history and theory of literary translation. Emphasis on practical problems and techniques, with exercises culminating in the translation of a foreign language text appropriate to the student's interests and abilities.

COML 5330 World Drama to Romanticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of representative works of dramatic literature, primarily of the western world, from Aeschylus through Beaumarchais, excluding English drama.

Prerequisite(s): A minimum grade of "C" in all of the following: ENGL 2111 and prior or concurrent enrollment in ENGL 2131. Cross Listing(s): COML 5330G.

COML 5330G World Drama to Romanticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of representative works of dramatic literature, primarily of the western world, from Aeschylus through Beaumarchais, excluding English drama. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Prerequisite(s): A minimum grade of "C" in ENGL 2111 and ENGL 2131.

Cross Listing(s): COML 5330.

COML 5530 The Bible as Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the literary dimension of the English Bible. Major emphasis is upon the literary themes, types, personalities, and incidents of the Old and New Testaments.

Prerequisite(s): A minimum grade of "C" in ENGL 2111 and ENGL 2131.

Cross Listing(s): COML 5530G.
COMM 5530G The Bible as Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the literary dimension of the English Bible. Major emphasis is upon the literary themes, types, personalities, and incidents of the Old and New Testaments. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in ENGL 2111 and ENGL 2131.
Cross Listing(s): COML 5530.

COML 5533 Literary Criticism and Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An historical survey of literary criticism and theory from antiquity to modern times. Literary criticism considers issues important for all students of literature, such as the value of poetry in our world, the power of poets to represent reality or truth, and the sources of poetic inspiration. This course also delves into the subject of aesthetics, the nature of beauty, and the variety of forces that impact how humans respond to literature.
Prerequisite(s): COML 2531.
Cross Listing(s): ENGL 5533.

COML 5536 Post-Colonial Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines and evaluates the diverse "common-wealth" of post-colonial Anglophone literature written by authors from countries that were formerly part of the British Empire: Africa, Australia, Canada, the Indian sub-continent, Ireland, New Zealand, Southeast Asia, and the West Indies. Highlights the use of a variety of reading and critical strategies to analyze the formal and linguistic complexities and innovations of this literature.
Prerequisite(s): A minimum grade of "C" in ENGL 2131.
Cross Listing(s): COML 5536G.

COML 5536G Post-Colonial Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines and evaluates the diverse "common-wealth" of post-colonial Anglophone literature written by authors from countries that were formerly part of the British Empire: Africa, Australia, Canada, the Indian sub-continent, Ireland, New Zealand, Southeast Asia, and the West Indies. Highlights the use of a variety of reading and critical strategies to analyze the formal and linguistic complexities and innovations of this literature.
Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): Prior or concurrent enrollment in ENGL 2131.

COMM Communication Arts

COMM 1100 Human Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the historical roots of communication, discusses the encoding and decoding of messages, and introduces the contexts of message exchange.
Prerequisite(s): A minimum grade of "C" in ENGL 1101 or WRIT 1101.

COMM 1110 Public Speaking
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The critical study and practice of public speaking emphasizing the art of rhetoric from a humanistic perspective. Areas of study include research and preparation, ethics, audience analysis, and presentation of speeches.
Prerequisite(s): A minimum grade of "C" in ENGL 1101 or WRIT 1101.

COMM 2332 Media and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to print and electronic mass communications and media-related professions. Surveys the media's historical development in the United States with particular focus on structure, social roles, and related theories. Also considers change factors that can affect the future of media.

COMM 3030 Selected Topics In Communication Arts
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Offers varied courses in specialized areas of field of Communication Arts. Department approval required.

COMM 3331 Media Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Familiarizes students with dominant paradigms currently used in media studies. Particular emphasis will be given to theories addressing the social context of the media and criticism as a rhetorical act.
Cross Listing(s): COMM 3331.

COMM 3332 Voice and Phonetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

COMM 3336 International Media Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course comparatively studies mass media systems around the world. It analyzes media systems in terms of relevant political, social, economic and cultural factors. Diversity and change in global communication is a main theme. The influence of rapidly-advancing technology is analyzed for its dynamic impact around the world, especially in developing nations.
Prerequisite(s): A minimum grade of "C" in COMM 2332.

COMM 3337 Mass Communication Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys freedom of speech and press and its limitations by laws governing libel, privacy, copyright, contempt, free press, broadcast regulation, fair trial and reporter's shield. Broadcast industry self-regulation and ethical concerns of mass communications will be discussed.
Prerequisite(s): A minimum grade of "C" in COMM 2332.

COMM 3360 Critical Apprch/Mass Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of theoretical and critical approaches to various forms of cultural expression, including film, television, popular literature, magazines, music, video, and radio. Applications of differing critical methodologies.
Prerequisite(s): A minimum grade of "C" in ENGL 2100.

COMM 3430 Media Management and Sales
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students will examine the organization and operation of media operations’ policies and procedures. Students will also examine media management theory and practice, key media administrator roles, media industry processes and departments, and media manager skills in finances, personnel, programming, promotion/marketing, selling of commercial advertising in media and audience research.
Prerequisite(s): A minimum grade of "C" in COMM 3332.

COMM 3431 Digital Media Entrepreneurship
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the business side of the information business, specifically digital media startups. As part of this course, students develop an original idea for a digitally-based media startup, research and analyze the potential market for the startup, and develop a basic media business. This course would also look at the behavior of entrepreneurs, but will be focused more on media entrepreneurs and the development of student ideas into potential media startup projects.
Prerequisite(s): A minimum grade of "C" in COMM 2332.

COMM 3530 Media Ethics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course involves the study of moral and professional conduct within various mass communication contexts and provides students with the ability to recognize and confront potential ethical, diversity and shifting cultural issues as journalists and media consumers.
Prerequisite(s): A minimum grade of "C" in COMM 2332.

COMM 4330 History of Mass Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys the history of newspapers, magazines, radio and television, and web media content with emphasis upon their correlation with political, social and economic trends in America.
Prerequisite(s): A minimum grade of "C" in COMM 2332 and Junior standing.
COMM 4331 Gender, Media, and Representation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on three basic areas with regard to women and media: 1) the representation of women in the media; 2) the status of women as media professionals; 3) the ways women make use of media as audience members.
Cross Listing(s): WGST 4331. COMM 4331.

COMM 4332 Contemporary Communication Application
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Offers analysis of a selected contemporary topic in communication. Includes discussion of appropriate communication models and their analytical application to the selected topic. May be repeated a maximum of two times for credit. Department approval required.

COMM 4334 Advanced Law and Ethics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an evaluation of contemporary media regulations/law and ethical issues by way of case analysis along with the study of the evolution of media regulation for understanding of past, present, and future media performance.
Prerequisite(s): A minimum grade of "C" in COMM 3337.

COMM 5000 Topic in Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cross Listing(s): COMM 5000G.

COMM 5000G Topics in Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

COMM 5025 Popular Culture Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the theoretical and critical approaches to the study of various forms of popular cultural expression such as film, television, popular literature, magazines and music. Critical methodologies present may include semiotics, genre criticism, ethnography, feminism and cultural studies.
Prerequisite(s): A minimum grade of "C" in ENGL 2100.
Cross Listing(s): ENGL 3025.

COMM 5030 Television Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical Examination of various aspects of television, such as genres, social implications, historical significance and modes of production.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): COMM 5030G, ENGL 5030.

COMM 5030G Special Topics in Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Subject announced when course offered. Topics vary, such as environmental impacts on communication, transactional analysis theory, non-verbal communication. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.

COMM 5333 Theories of Mass Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the development of mass media systems and the resulting theoretical perspectives. Encourages theory application as means of understanding and explaining what happens to us individually and as members of a society as mass communication became possible and now as media systems are being adapted.
Prerequisite(s): COMM 2332.

COMM 5333G Theories of Mass Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the development of mass media systems and the resulting theoretical perspectives. Encourages theory application as means of understanding and explaining what happens to us individually and as members of a society as mass communication became possible and now as media systems are being adapted. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): COMM 2332.
Cross Listing(s): COMM 5333.

COMM 5335G Public Relations Campaigns in Health and Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines communication and public relations in health and science campaigns, with a focus on public communication and strategy effectiveness. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.

COMM 7100 Research in Communication and Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the concepts and methods of applied research and theory necessary for professionals in communication and leadership settings. Topics will include survey development, interviews, focus groups, experiments, ethnography, and content analysis. Students will construct a research question, review literature, collect and analyze data, and present the results of their analysis.
Cross Listing(s): LEAD 7100.

COMM 7150 Communication and Leadership in the Public Arena
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the communication and leadership on public issues. Course explores the theories and practices associated with leadership in groups and organizations in the public and private sectors. Focuses on interactive aspects of leading and following, and developing leadership skills from a communication perspective.
Cross Listing(s): LEAD 7150.

COMM 7300 Applied Crisis Communication Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of theories relevant to crisis communication management and application of those theories to cases, both actual and hypothetical.

COMM 7400 Health Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Applies various communication theories to the health care community. The impact of health communication in different contextual levels, i.e., interpersonal, group, organizational, mass and cultural will be examined.

COMM 7500 Selected Topics in Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the field of communication defined by the instructor. May be taught as a colloquium, directed reading, or seminar.

COMS Communication Studies

COMS 1711 Communication Studies Practicum
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Practical experience in speaking and performance events. A maximum of three credit hours may be applied toward the degree.

COMS 2330 Introduction to Communication Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the professional literature in communication and examines the major paradigms used in communication research. The students will gain practical experience using formal research styles.

COMS 2711 Communication Studies Practicum
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Practical experience in speaking and performance events. A maximum of three credit hours may be applied toward the degree.
COMS 3030 Selected Topics in Communication Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Offers varied courses in specialized areas of the field of communication studies. Departmental approval required.

COMS 3330 Health Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Applies various communication theories to the health care community. The impact of health communication in different contextual levels, i.e., interpersonal, group, organizational, mass and cultural will be examined.

COMS 3331 Argumentation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the function and structure of argumentation by focusing on the critical analysis of argument around important issues in public policy, science, law, religion and politics.

COMS 3332 Small Group Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the increasing importance of communication in small group situations. Communication in group roles, relationships, leadership, conflict, group discussion and reflective decision making, will be highlighted.
Prerequisite(s): COMM 1100 or COMM 1110.

COMS 3334 Communicating in the Workplace
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Considers the theoretical and practical challenges existing in a variety of workplace communication scenarios ranging from interviews and group interaction and structure through oral presentations supplemented by a variety of modern media.

COMS 3335 Interpersonal Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Considers current interpersonal research emphasizing practical analysis for how we communicate and form interpersonal relationships.
Prerequisite(s): COMM 1100.

COMS 3336 Introduction to Performance Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the performance process in relation to the cultural values communicated in social and artistic forms. An introduction to folklore, storytelling, and solo performance.

COMS 3337 Persuasion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Considers the ethics, philosophies, theories, and techniques of persuasion from the points of view of both senders and receivers of persuasive messages.
Prerequisite(s): COMM 1100.

COMS 3338 Rhetorical Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the major perspectives and approaches used in the practice of rhetorical criticism through the analysis of various rhetorical forms, including public speeches, drama and entertainment, tradition and ideology.

COMS 3339 Intercultural Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on the different contexts in which culture influences the communication process. Aspects of communication such as language, nonverbal communication, interpersonal relationships, and organizations will be examined across different cultures. Students will strive to understand the impact of culture on perception, social identity, values, and structures of power. Intercultural, cross-cultural, and multicultural contexts for communication will be discussed.
Prerequisite(s): A minimum grade of "D" in COMM 1100 or COMM 1110.

COMS 3430 Communication and Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the theories and practices associated with leadership in groups and organizations. Focuses on interactive aspects of leading and following, and developing leadership skills from a communication perspective. Topics will include perspectives of a leader's communication interactions with regard to: change, culture, decision making, diversity, ethics, followership, groups and teams, influence, organizations, and styles.
Prerequisite(s): A minimum grade of "C" in COMM 1100.

COMS 3711 Communication Studies Practicum
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Practical experience in speaking and performance events. A maximum of three credit hours may be applied toward the degree.

COMS 4330 Rhetoric of International Relations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the discourse of international relations from a rhetorical perspective. Emphasizes the analysis and criticism of persuasive messages used in international relations from Aristotelian, Neo-Aristotelian, dramatic and narrative rhetorical theoretical bases.
Cross Listing(s): INTS 4330.

COMS 4332 Political Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasizes the role and the function of communication in the political setting. Examines theories of political communication and their application to political campaigns, debates, and speech writing.

COMS 4333 General Semantics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Studies the relationship between symbols and meaning in the tradition established by Alfred Korzybski. Focuses on signs and symbols and their implications on nonverbal and oral communication.
Cross Listing(s): LING 4333.

COMS 4336 Performance, Culture, Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces performance techniques relevant to scripting and staging of presentational ensemble and solo performance. Emphasizes performance as a communicative act in social and cultural contexts. Introduces personal narrative construction and oral history interviewing as primary research methods.

COMS 4337 Rhetoric of Social Movements
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the rhetorical significance of selected social movements including labor reform, civil rights, and environment protection, emphasizing the analysis of persuasive social movement discourse.
Cross Listing(s): AAST 4337.

COMS 4338 Organizational Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explains the role and effects of communication in everyday organizational life. Includes interpersonal communication in the workplace, leadership, organizational communication and climate, motivation and flow of information in organizations.

COMS 4339 Philosophy of Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the contributions of philosophical debate from logical positivism through hermeneutics to the discipline of human communication studies.

COMS 4711 Communication Studies Practicum
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Practical experience in speaking and performance events. A maximum of three credit hours may be applied toward the degree.
COMS 4791 Communication Studies Internship  
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Provides practical experience in a professional setting appropriate for a  
student trained in communication studies. Will be under the supervision of  
a skilled practitioner in the particular area of communication. May be taken  
only by Communication Studies majors. A maximum of three hours may  
be applied to the major. To intern, students must have a minimum 2.5  
overall GPA.  
**Prerequisite(s):** COMM 1110, junior or senior standing, and departmental  
approval.  

COMS 4831 Directed Study in Communication Studies  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Offer students opportunities to design and conduct directed research and/or  
projects in specialized communication studies areas. Must be approved  
in advance by instructor and department chair. This course may not be  
used to replace an existing course in the catalog.  
**Prerequisite(s):** Departmental approval required.  

COMS 5030G Selected Topics in Communication  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Subject announced when course offered. Topics vary, such as environ- 
mental impacts on communication, transactional analysis theory,  
non-verbal communication. Graduate students will have additional  
readings and research expectations, including, when appropriate, a  
research presentation.  
**Cross Listing(s):** COMS 5030.  

COMS 5330 Communication Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to major approaches in the development of  
communication theory with emphasis on various communication contexts,  
e.g.; interpersonal, group, organization, mass media, intercultural.  
**Prerequisite(s):** A minimum grade of "C" in COMS 2330 or PRCA 4330.  
**Cross Listing(s):** COMS 5330G.  

COMS 5330G Communication Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to major approaches in the development of  
communication theory with emphasis on various communication contexts,  
e.g.; interpersonal, group, organization, mass media, intercultural. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  
**Cross Listing(s):** COMS 5330.  

COMS 5331 Communication and Conflict  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to the theory and practice of conflict management in personal and professional relationships.  

COMS 5331G Communication and Conflict  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to the theory and practice of conflict management in personal and professional relationships. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  

COMS 5332 Nonverbal Communication  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to the theories, processes and effects of communication in nonverbal codes. Topics may include kinesics, proxemics and paralanguage. Critical analysis and contemporary research emphasized.  
**Prerequisite(s):** A minimum grade of "C" in COMM 1100 or COMM 1110.  
**Cross Listing(s):** COMS 5332G.  

COMS 5332G Nonverbal Communication  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to the theories, processes and effects of communication in nonverbal codes. Topics may include kinesics, proxemics and paralanguage. Critical analysis and contemporary research emphasized. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  
**Cross Listing(s):** COMS 5332.  

COMS 5333 Communication and Gender  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to the literature of gender and communication. Considers how men's and women's self-perceptions and resulting communication patterns evolve as a function of cultural influences.  
**Cross Listing(s):** COMS 5333G.  

COMS 5333G Communication and Gender  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to the literature of gender and communication. Considers how men's and women's self-perceptions and resulting communication patterns evolve as a function of cultural influences. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
**Cross Listing(s):** COMS 5333.  

COMS 5334 Interpersonal Communication in the Workplace  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Communication theory, research, and applications of various forms of interpersonal communication in the workplace. Topics may include superior-subordinate communication, interviewing, and presentations.  
**Prerequisite(s):** A minimum grade of "C" in COMM 1100 or COMM 1110.  
**Cross Listing(s):** COMS 5334G.  

COMS 5334G Interpersonal Communication in the Workplace  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Communication theory, research, and applications of various forms of interpersonal communication in the workplace. Topics may include superior-subordinate communication, interviewing, and presentations. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  
**Cross Listing(s):** COMS 5334.  

COMS 5335 Family Communication  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examination of various communication theories within the unique contexts of family dynamics.  
**Prerequisite(s):** A minimum grade of "C" in COMM 1100.  
**Cross Listing(s):** COMS 5335G.  

COMS 5335G Family Communication  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examination of various communication theories within the unique contexts of family dynamics. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  
**Cross Listing(s):** COMS 5335.  

COMS 5336 Rhetoric  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Rhetoric from Aristotle to the present, with emphasis on rhetorical analysis of texts and other forms of discourse. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  
**Cross Listing(s):** WRIT 5530G.  

COMS 5336G Rhetoric  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Rhetoric from Aristotle to the present, with emphasis on rhetorical analysis of texts and other forms of discourse. Graduate students will have additional readings and research expectations, including, when appropriate, a research presentation.  
**Cross Listing(s):** WRIT 5530G.  

COMS 7200 Organizational Communication in Diverse Contexts  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Theories and principles of professional discourse applied toward working effectively in ethnically diverse organizations and in international contexts.
COMS 7300 Professional Communication Presentation Skills
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Development and enhancement of public presentation skills using communication theory as a foundation. Emphasis on speech writing, speech preparation, skill development, audience engagement, critical analysis of public address, and differences between face-to-face and electronically-mediated communication environments.

COMS 7400 Communication Training and Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prepares students for managing communication training programs in a variety of settings. Public speaking training and development will be a central focus.

COOP Cooperative Education Program

COOP 1000 Cooperative Education Program
1-12 Credit Hours. 0 Lecture Hours. 3-36 Lab Hours.

COOP 2090F Sophomore Coop-Full-time
12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. "V" grade is assigned for successful completion of the work assignment.
Prerequisite(s): Sophomore standing.

COOP 2090P Sophomore Coop-Part-time
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. "V" grade is assigned for successful completion of the work assignment.
Prerequisite(s): Sophomore standing.

COOP 3090F Junior Coop-Full-time
12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. "V" grade is assigned for successful completion of the work assignment.
Prerequisite(s): Junior standing.

COOP 3090P Junior Coop-Part-time
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. "V" grade is assigned for successful completion of the work assignment.
Prerequisite(s): Junior standing.

COOP 4090F Senior Coop-Full-time
12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. "V" grade is assigned for successful completion of the work assignment.
Prerequisite(s): Senior standing.

COOP 4090P Senior Coop-Part-time
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. Prerequisite(s): Senior standing.

COOP 6090 Graduate CO-OP
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An opportunity to gain work experience related to academic major, begin the career decision-making process and earn money for educational expenses. This is accomplished through the Cooperative Education program. The co-op program is coordinated administratively by the Office of Career Services. Salaries and benefits are determined by the employer and normally increase as the program proceeds. Board and lodging are the responsibility of the student. "V" grade is assigned for successful completion of the work assignment. Prerequisites(s): Graduate Students Only.

COUN Counseling Education

COUN 7231 Foundations of Clinical Mental Health Counseling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an overview of clinical mental health counseling. Includes a survey of theoretical foundations, research and practice, and ethical and legal issues in clinical mental health counseling. Topics covered include the role of the clinical mental health counselor, prevention and education, client advocacy, referral practices, consultation, and the adaptation of clinical mental health counseling models in community mental health agencies.

COUN 7232 Addictions Counseling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys aspects of a range of addictions and educates students about the process of addictions including skills and strategies needed to provide addictions counseling. Addresses the role counselors, teachers, and other professionals can play in prevention, treatment, and the recovery process including community resources.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program.

COUN 7233 Family Counseling
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Examines the family through an ecological approach, including how clients exist within their various systems. Students' awareness of their own family's system is used as a base from which they can develop an approach for understanding and working with families. The use of family counseling techniques in a variety of settings will also be examined.
Prerequisite(s): A minimum grade of "C" in COUN 7332; Permission from the instructor is required for students not accepted into the COUN program.
COUN 7234 Counseling Psychodiagnosis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses the nomenclature and criteria used in the assessment of mental health diagnoses from a mental health and wellness perspective. Students will develop an understanding of the professional identity and role of counselors as it relates to diagnosis and intervention. Students will develop a knowledge base for treatment planning and treatment documentation.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program.

COUN 7235 Short Term Counseling Strategies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an in-depth look at the theory and practice of brief counseling therapies as applied to counseling practice. Students will be presented with models of short-term counseling interventions.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program.

COUN 7236 Counseling and Sexuality
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course explores the interaction of biological, sociological, and cultural issues related to sexuality and counseling. This course examines the expression of human sexuality across the life span from a sex positive perspective, attitudes about sexuality, and possible counseling strategies and interventions.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program.

COUN 7332 Theories of Counseling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores a range of counseling theories, as well as the nature and process of counseling. Provides a foundation from which students can build a personal philosophy of counseling.

COUN 7333 Counseling Skills and Techniques
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on teaching students a variety of basic and advanced counseling skills through role play and other experiential activities.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program.

COUN 7334 Group Counseling and Group Work
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses group development, group dynamics, and group counseling theories through role play and other experiential activities. Group counseling methods and skills used in group work are also addressed.

COUN 7335 Counseling Assessment and Appraisal
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses counseling tests and assessments including cognitive, personal, career, and clinical assessments. Students learn about test selection, administration, and interpretation from experiential activities.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program.

COUN 7336 Career Counseling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses the world of work from a counseling perspective. Students learn to facilitate career development based on knowledge of career theories, career assessments and strategies, and career-related resources.

COUN 7337 Multicultural Counseling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses multicultural counseling models and fosters counseling skill development using a social justice and advocacy framework. Emphasis is placed on expanding self-awareness, knowledge, and skill development using experiential activities.
Prerequisite(s): Permission from the instructor is required for students not accepted into the COUN program. Prerequisite(s): COUN 7333.

COUN 7338 Lifespan Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses developmental theory and processes throughout the lifespan. Physical, cognitive, and social/emotional dimensions of human development are explored through a wellness, strengths-based lens.

COUN 7437 School Counseling Program Coordination and Curriculum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course examines the organization of comprehensive, developmental school counseling programs in the elementary, middle and high schools, as well as the design and implementation of the school counseling curriculum for grades P-12. The counselor's role as program coordinator focuses upon needs assessments, curriculum planning and implementation, time and resource management, public relations, and program evaluation. Ethical and diversity issues are emphasized in designing curricula and delivery strategies to address the developmental needs of all students.
Prerequisite(s): A minimum grade of "C" in COUN 7445.

COUN 7445 Foundations of School Counseling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course is designed to introduce students to the profession of school counseling and a comprehensive developmental school counseling program. The history and development of the profession, national association, standards for counselor preparation and credentials are examined as well as school counselor roles, functions, and responsibilities. Special attention will be given to students' introduction to school systems through field observations inclusive of the concepts of advocacy and social justice.

COUN 7448 Leadership, Consultation and Intervention in the Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a general framework for understanding and practicing various theories and models of consultation and potential interventions in P-12 systems. Designed to train school counselors how to intervene with children and adolescents presenting with learning disabilities and behavioral and emotional disorders at school, strategies are explored that counselors, teachers, and parents can use to prevent, recognize, and assist students at risk of developing emotional or behavioral barriers to learning connected to abuse, violence, addictions, childhood depression, suicide etc. The role of leadership in school reform as it pertains to the issues and barriers that may affect student development and functioning are explored. This course is designed to be taken concurrently with Internship I as field experience is integral to the course work.
Prerequisite(s): A minimum grade of "C" in COUN 7445 and COUN 7437.

COUN 7737 Counseling Practicum
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Areas covered in this course are application and critical evaluation of all counseling skills in practical situations with provision of clinical experiences under supervision for a total of 100 clock hours, 40 of which will be direct service work with clients. Individual and group counseling will be audio and/or video taped, critiques and evaluated.
Prerequisite(s): A minimum grade of "B" in COUN 7332 and COUN 7333.
COUN 7738 Counseling Internship I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Primary emphasis is on the integration of process, conceptual, professional and personal skills. Internship provides extensive supervised on-the-job experience in a school, community, or college counseling setting closely aligned with the student's professional career goals. The student is required to complete 300 hours of field experience.
Prerequisite(s): A minimum grade of "B" in COUN 7332, COUN 7333, COUN 7334, and COUN 7737.

COUN 7739 Counseling Internship II
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Primary emphasis is on the integration of process, conceptual, professional and personal skills. Internship provides extensive supervised on the job experience in a school, community or college counseling setting closely aligned with the student's professional career goals. The student is required to complete 300 hours of field experience.
Prerequisite(s): A minimum grade of "B" in COUN 7332, COUN 7333, and COUN 7334.

COUN 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Permits specialization beyond regular course content through in-depth study of individually selected topics of interest and importance in higher education student services. The study will be directed by the instructor.
Prerequisite(s): 12 semester hours of course work in the program.

COUN 8533 Professional Practice and Ethics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Informs students of ethical standards, laws, ordinances, and statues that govern professional behavior of counselors in schools and in community/mental health settings. Specific topics explored will include professional practice and ethics involving professional relationships, the impact of values, confidentiality, violations and licensure laws.

COUN 8536 Counseling Advocacy and Systemic Change in a Diverse Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to provide students with the knowledge about counseling advocacy and social change necessary for creating effective learning practices and environments. Students will acquire an understanding of the social, economic, and political factors which influence and shape the counselor's role in diverse institutional settings such as schools and community agencies. The course examines the role of the counselor as a change agent in eliminating systemic barriers that impede student and client success.
Prerequisite(s): Admission to Ed.S. program or instructor's permission.

COUN 8538 Advanced Group Development and Supervision
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
Emphasis is placed on principles of group leadership and group processes at the theoretical and applied levels. Supervised practice in leading and/or co-leading groups in counseling is included.
Prerequisite(s): A minimum grade of "C" in COUN 7334.

COUN 8590 Selected Topics in Counseling
1-6 Credit Hours. 1-6 Lecture Hours. 0 Lab Hours.
Participants examine selected topics in the areas of school, community, and college counseling. Course focuses on the specialized needs of Professional Counselors in public, school, community agency, and post-secondary educational settings.

COUN 8737 Clinical Counseling Supervision
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Advanced clinical experience in application of supervision theories, tools and techniques in counseling. Includes monitored experience in the supervision of counseling.
Prerequisite(s): Permission of instructor.

COUN 8839 Action Research
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Each student will implement a research study based on the proposal prepared in the field based Educational Research class. The study should be related to a practical problem in a professional practice setting. An oral presentation of the study is required. Students are limited to register for this course twice during the program of study.

COUN 8890 Directed Individual Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course permits specialization beyond regular course content through in-depth study of individually selected topics of interest and importance in counselor education. The study will be directed by the instructor.
Prerequisite(s): Permission of advisor.

CRJU Criminal Justice

CRJU 1010 Intro Criminal Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emergence and current state of formal institutions established within the American experience to deal with criminal behavior. Philosophical, cultural, social, economic, and political aspects of the justice system and process.

CRJU 1020 Ethics/Morals Criminal Justice
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Relationship between ethical theory and criminal justice policies and practices. Principle ethical theories of the Western world and the application of these theories to the administration of justice in the United States. Ethical underpinnings of the crime control and due process models of justice.

CRJU 1030 Interpersonal Commun Skills
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Development of interpersonal communication skills to improve interaction among agency employees and between employees and the public.

CRJU 1100 Introduction to Criminal Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an introduction and overview of the criminal justice system and its central components: police, courts, and corrections. Topics include: the history, development, and current status of law enforcement, the judiciary, and corrections in the U.S.; the philosophical, economic, and socio-political aspects of the criminal justice system and processes; individual rights and public order; an introduction to the juvenile justice system; theories of crime causation; and special issues such as drugs, mental health and public policy.

CRJU 1130 Interpersonal Commun Skills
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Development of interpersonal communication skills to improve interaction among agency employees and between employees and the public.

CRJU 1200 Intro to Law Enforcement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History, philosophy, and basic objectives of the police system in the U.S. and Georgia. Emphasizes applications of the law for law enforcement officers.
Prerequisite(s): CRJU 1010.

CRJU 1210 Introduction to Cybercrime
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History of cyber crime and the examination of techniques and strategies for investigating computer crime. Prerequisite(s): ENGL 1101.

CRJU 2010 Universal Justice
2-3 Credit Hours. 2-3 Lecture Hours. 0 Lab Hours.
Critical juxtaposition of the justice ideal in actual practice in the U.S. and other countries. Development of universal justice construct rooted in the Rule of Law and applicable to terrorism, piracy, international criminal conspiracy, immigration, sanctuary, asylum, amnesty, and war crimes.
CRJU 2020 Ethical Theor/Moral Iss in CJ
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Relationship between ethical theory and criminal justice policies and practices. Principal ethical theories of the western world and the application of these theories to the administration of justice in the United States. Ethical underpinnings of the crime control and due process models of justice.

CRJU 2100 Criminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Nature and extent of crime in the U.S. Evaluation of factors leading to criminal behavior and measures proposed to control it.

CRJU 2210 Introduction to Policing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical examination and assessment of American policing. Major emphases include policing history, functions, organizational structure, policing strategies, effectiveness of practices, and accountability measures.
Prerequisite(s): CRJU 1100.

CRJU 2210M Intro Law Enforcement by WC
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History, philosophy, and basic objectives of the police system in the U.S. and Georgia. Emphasizes applications of the law for law enforcement officers.

CRJU 2410 Introduction to Corrections
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Correctional process and interventions designed to deter and control adult criminal behavior. Addresses philosophy and goals underlying correctional interventions, types of criminal sentencing, and penal sanctions, including community-based programs, institutional corrections, and parole. Examines intentions and consequences of various methods of institutional and non-institutional processing and treatment of convicted offenders.
Prerequisite(s): CRJU 1100.

CRJU 2500 Criminal Evidence & Procedures
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Historical and contemporary overview of rules governing criminal procedure and rules of evidence as they affect the accused, the convicted, the functions of law enforcement, and the conduct of criminal prosecutions. Constitutional rights of the accused and the conflict of those rights with maintenance of public order and enforcement of criminal law.
Prerequisite(s): CRJU 1010.

CRJU 3110 Legal Process
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the American court system with a focus on the sources of law and the actors, institutions, and processes that affect the administration of justice.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.
Cross Listing(s): POLS 3137.

CRJU 3112 Honors Thesis Seminar II
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
In a seminar setting, students will continue to progress toward researching and writing the honors thesis. Particular emphasis will be given to construction of a comprehensive literature review and research design.
Prerequisite(s): Minimum junior standing.

CRJU 3120 Ethics in Criminal Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an overview of ethical theories and understandings of justice in the context of contemporary issues related to the criminal justice system. Students practice identifying ethical dilemmas and applying major ethical systems to resolve dilemmas and evaluate decision-making in law enforcement, the judiciary, and the correctional system.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in CRJU 1100.

CRJU 3131 Criminal Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the social and political influences on criminal law in the United States. Analyzes the constitutional limits on criminal law, principles of criminal liability, elements of crimes, criminal defenses, and the application of the Georgia Criminal Code to specific crimes.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3133 Evidence and Procedure
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the legal processes from arrest through appeal, with emphasis on the rights of the accused including due process, right to counsel, search and seizure, self-incrimination, and the rules of evidence governing criminal procedure.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3134 Investigations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to fundamentals of conducting investigations. Topics include: evidence gathering, interviews and interrogations, court preparation and testimony, and written reports.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3150 Organized Crime
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Examination of phenomenon of racketeering in society from a variety of perspectives, using historical, theoretical, and comparative materials. Analysis of the nature of the activities of organized criminals, the relationship between these criminals and the public, the structure of racketeering groups and enterprises, and the strategies and success of legal control on organized crime. Special attention paid to the ways in which these crimes can be differentiated from "common" street crimes.
Prerequisite(s): CRJU 1010.

CRJU 3160 Corporate Crime
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the laws, law enforcement, victimization, and cost of corporate, white collar and occupational crime.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3170 Criminal Justice Admin
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of basic concepts and principles concerned with the administration and management of agencies within the criminal justice system. Emphasis will be placed on organizational structure, functions, standard operating procedures, leadership, and the role of discretion.
Prerequisite(s): CRJU 1100 and CRJU 2020.

CRJU 3210 Law Enforc: Struct/Process
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Philosophical, cultural, and historical background of policing, focusing on the role of police in contemporary society, quasi-military organization, and community relations.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3220 Industr, Commer & Private Secur
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History, development, and analysis of privately employed police and security in the U.S. Topics include an analysis of public vs. private agencies, types (contract and proprietary), and components (physical, information and personnel) of private security. Special emphasis on the functions, strengths, and problems encountered by privatized agencies.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3233 Criminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the nature and extent of crime in the U.S. Evaluates factors leading to criminal behavior drawing on major criminological theories and research, as well as measures proposed to control crime. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.
CRJU 3234 Research Methods
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
Provides an overview of research methods and techniques in criminal justice and criminology, to include research design, analytical techniques, ethical issues in research, and relationships between theory, research, and practice. Particular topics include the nature of conceptualization, hypothesis testing, measurement, operationalization, and sampling populations to provide students with conceptual and practical foundations to develop research and program evaluation skills. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100. Cross Listing(s): CRJU 4231.

CRJU 3263 Cyber Criminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Assesses the usefulness of classic criminological theories to explain a wide range of cybercrimes and the possible need for the creation of new cyber-related criminological theories. CRJU 3310 Youth, Gangs & Drugs
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Relationship among illicit drugs, gang affiliation, and juvenile delinquency with emphasis on the drug/crime nexus. Topics include consideration of both the relationship between adolescent involvement with drugs/alcohol and affiliation with a negative peer group and the impact of these behaviors on progressive delinquency. Policies and programs for prevention and control of these destructive behaviors.

CRJU 3400 Corrections
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analysis and evaluation of both historical and contemporary correctional systems. Development, organization operation, and results of the different correctional systems in the U.S. Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3420 Applying Elementary Statistics in Justice and Crime Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students learn about and practice using elementary statistics with a focus on crime and criminal justice data and usage. Focuses on linking levels of measurement, inference, questions posed, and data limitations in statistical usage. Students will compute and interpret statistics. Corequisite(s): CRJU 1100.

CRJU 3431 Juvenile Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an overview of the juvenile justice system and juvenile jurisprudence. Examines the development of the juvenile justice system and treatment of juveniles in civil and criminal justice systems. Additional topics include examination of theoretical frameworks and correlates of juvenile delinquency as well as strategies aimed at reducing and preventing delinquency. Prerequisite(s): A minimum grade of "C" CRJU 1100.

CRJU 3432 Gangs and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the historical development and contemporary influence of gangs as well as their criminal and noncriminal activities. Emphasis is placed on myths associated with gangs, individual and structural forces influencing juveniles to join gangs, differentiating gangs from other organized criminal groups, how gangs fit into society as a whole, the impact of gangs on the criminal justice system, and the effectiveness of policies and initiatives aimed at reducing gang activity. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3531 Victimization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the causes, consequences, and theoretical explanations of victimization. Major emphases on victimization patterns, risk factors, the victim-offender relationship, range of injuries experienced, and the role of the victim in criminal justice proceedings. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3534 Drugs and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the scholarly study of drugs and alcohol from a multidisciplinary, liberal arts perspective. Students will become familiar with drug discourse, history, and policy with particular emphases on the legal prohibitions and enforcement of drugs in American society. Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3535 Family Violence
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an examination of family violence with specific focus on child abuse, intimate partner violence, and elder abuse. Attention centers on the nature, prevalence, causes, consequences, as well as on responses by social service agencies and the criminal justice system for each form of violence occurring within the family. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3536 School Violence
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an examination of school violence, focusing on the school as the location for various forms victimization of students, teachers, and school administrators. Specifically, the course will focus on several forms of school violence including bullying and school shootings. Theoretical explanations, administrative, and criminal justice responses to the various forms of school violence, and the consequences of these responses, will be examined. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3538 Gender, Crime, and Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical examination of gender as a significant, yet overlooked, dimension of criminality to include the nature and extent of women as victims, offenders, and workers in the criminal justice system. Causes of crime and victimization, gender disparities in processing/punishing female offenders, treatment of female offenders in the community, responses to female victimization, and ways to reduce both crime and victimization will be examined, while promoting justice by recognizing the important role of gender and the intersection of gender and other social inequalities. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 3631 Crime and Justice in Public Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the intersection of crime and social justice in the policy process. Particular attention paid to the development of public policy, actors in the process, and the impact of public policy on society, social programs, and the criminal justice system. Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3732 Conflict Resolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the causes of conflict and techniques to resolve conflict in the criminal justice system. Studies conflict among colleagues, the public, and with clients in the criminal justice field are a focus, as well as how criminal justice agencies (police, courts, and corrections) resolve conflict. Special emphasis on collaborative resolutions, restorative justice/peace making, community policing, mediation, arbitration, and development of interpersonal communication skills within and between agencies. Prerequisite(s): A minimum grade or "C" or better in CRJU 1100.

CRJU 3733 Inequalities, Crime, and Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces forms of social stratification and inequalities and their intersection crime and justice. Attention is given to race, class, and gender inequalities within the United States criminal justice system and the paths into contemporary inequality. The impacts of the extent, causes, and generation of institutionalized inequalities on criminal justice processes, victimization, and system employment are explored. Prerequisite(s): A minimum grade of "C" in CRJU 1100.
CRJU 3831 Popular Culture and Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines portrayals of crime, justice, social stratification, the criminal justice system, as well as social and political responses to those issues, in television, film, and literature.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 3931 Issues in Homeland Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores the legal, practical, and ethical challenges that accompany efforts to secure the homeland against major twenty-first threats such as terrorism and cyber-terrorism. Course topics may include but not be limited to: threat assessment, crisis response, incident prevention, and the need to reconcile governmental strategies for disrupting attacks on the homeland with the imperative of protecting civil liberties.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 4031 Community-Based Supervision and Treatment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines alternatives to incarceration and methods of treatment in non-institutional settings. Focus is on supervising criminal offenders in the community and theories/techniques employed to influence and alter attitudes, values, and behavior.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 4032 Criminal Behavior
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines criminal and deviant behaviors from a multidisciplinary approach. Addresses major theories and research, correlates of crime including classification concepts, case studies, and application by components of the criminal justice system.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 4092 Special Topics in Criminology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Periodically scheduled to allow exploration of contemporary substantive topics related to criminology and crime that are not offered in the regular curriculum. Topics will be announced when the course is scheduled. Repeatable if topic is substantially different. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 4093 Special Topics in Criminal Justice
1-3 Credit Hours. 0-18 Lecture Hours. 0-18 Lab Hours.
Periodically offered to facilitate exploration of contemporary topics related to law enforcement, courts, corrections, or justice administration not offered in the regular curriculum. Topics will be announced when the course is scheduled. Repeatable if topic is substantially different. Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 4100 Criminality/Abnormal Behavior
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Interface between abnormal behavior and criminality regarding identification, classification, and treatment of criminals. Emphasis on behavioral patterns and motivations of repeat offenders such as child molesters and serial killers.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 4110 International Criminal Conspiracies
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Organized crime transcending international boundaries, to include drug trafficking and corporate crime. Emphasis on origins and evolution of national/ethnic organizations such as the Sicilian and Russian syndicates.
Prerequisite(s): CRJU 1010.

CRJU 4120 Seminar on Justice Ideal
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Inquiry into the philosophical concept of justice in Western civilization and the means employed to achieve it in the United States and Europe. Emphasis on both normative and descriptive dimensions of justice and the rule of law in a system of ordered liberty.
Prerequisite(s): CRJU 1010.

CRJU 4135 Directed Study in Criminal Justice and Criminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Offers opportunity for individualized, structured examination of a specific topic. Student and instructor mutually agree upon topic and required output. Requires approval of instructor and department chair. Repeatable if topic is substantially different. Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 4137 Law, Justice, and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the historical and philosophical underpinnings of the legal system and analyzes the interrelationships of law, custom, morality, politics, economics, and social change.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 4531 Comparative Justice Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the institutions of justice in various countries around the world, as well as the variety of international institutions that address questions of justice. The historical development, legal, socio-political, economic, and philosophical factors underlying these institutions are examined, with an emphasis on comparison with the U.S. system of criminal justice.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 4532 Organized Crime in a Global Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of organized crime in a global context. Examples include but are not limited to: human, arms, and drug trafficking; racketeering; money laundering; environmental crime; and intellectual property crime. Governmental, legal, and institutional responses to the international crimes are also examined.
Prerequisite(s): A minimum grade of "C" or better in CRJU 1100.

CRJU 4632 Senior Seminar in Justice Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A discussion-based, intensive reading and writing capstone course for Justice Studies majors and minors. Integrates material from the major core courses and addresses current issues and trends in the administration of criminal and social justice. It is strongly suggested students complete BOTH Criminal Behavior and Justice Studies Research Methods prior to registering for Senior Seminar.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 4639 Inside-Out
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The "Inside-Out" Prison Exchange Program is an opportunity for a small group of students from Georgia Southern University and residents from a local prison to exchange ideas and perceptions about crime and justice, the criminal justice system, corrections, and imprisonment. All participants will gain a deeper understanding of the criminal justice system through the combination of theoretical knowledge and practical experience achieved by weekly meetings extended throughout the semester. Departmental and instructor approval is required before enrolling. Strong preference will be given to seniors. The course is repeatable if the topic is substantively different.
Prerequisite(s): A minimum grade of "C" in CRJU 1100.

CRJU 4792 Internship in Justice Studies
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides students an opportunity to work in a supervised setting to bridge academics with practical experiences. Students submit a substantial research paper and/or other writing assignments in addition to professional duties required by their intern organization. Enrollment requires permission of the internship coordinator. To meet Area G requirements, students must have senior status. Students enrolling prior to their senior year will be awarded credit toward their upper division criminal justice and/or general elective requirements. (Repeatable.).
CRJU 4910 Senior Seminar CRJU & Crim  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A discussion-based, intensive reading and writing capstone course for criminal justice and criminology majors and minors. Integrates material from the major core courses to critically examine past, current and future developments in the administration of justice. In addition, this seminar will help students explore and prepare for a career in criminal justice. It is strongly suggested students complete BOTH Criminology and Research Methods prior to registering for Senior Seminar. 
Prerequisite(s): A minimum "grade of C in CRJU 1100.". 

CRJU 4930 Justice Studies Honors Thesis  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A substantial research project in Justice Studies structured jointly by a University Honors Program student and faculty mentor, approved by the University Honors Program director. 

CRJU 5003 Cyber Forensics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Application of computer investigation and analysis techniques to gather evidence suitable for presentation in a court of law. Techniques of cybercrime scene analysis, media analysis, and the use of various forensic tools. Students cannot receive credit for both CRJU 5003 and 5010. 
Cross Listing(s): CRJU 5003G. 

CRJU 5003G Cyber Forensics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Application of computer investigation and analysis techniques to gather evidence suitable for presentation in a court of law. Techniques of cybercrime scene analysis, media analysis, and the use of various forensic tools. Graduate students are required to complete an additional substantive research paper or project based on course objectives. This course serves as a content area for Cybercrime. Students cannot receive credit for both CRJU 5003G and 5010G. 
Cross Listing(s): CRJU 5003. 

CRJU 5010 Applied Digital Forensics I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Identification, capture, and recording of evidence from suspect and victim’s computer hard drives and laptops. Students cannot receive credit for both CRJU 5003 and CRJU 5010. 
Prerequisite(s): CRJU 1100. 
Cross Listing(s): CRJU 5010G. 

CRJU 5010G Applied Digital Forensics I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Identification, capture, and recording of evidence from suspect and victim’s computer hard drives and laptops. Graduate students are required to complete an additional substantive research paper, project, or presentation based on course objectives. This course serves as a content area for Cybercrime. Students cannot receive credit for both CRJU 5003G and CRJU 5010G. 
Cross Listing(s): CRJU 5010. 

CRJU 5020 Applied Digital Forensics II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Expansion of the identification, capture, and recording of evidence from suspect and victim’s mobile devices such as mobile phones, tablets, and PDAs. Graduate students are required to complete an additional substantive research paper, presentation, or project based on course objectives. 
Prerequisite(s): A minimum grade of C in CRJU 5010. 
Cross Listing(s): CRJU 5020G. 

CRJU 5020G Applied Digital Forensics II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Expansion of the identification, capture, and recording of evidence from suspect and victim’s mobile devices such as mobile phones, tablets, and PDAs. Graduate students are required to complete an additional substantive research paper, presentation, or project based on course objectives. This course serves as a content area for Cybercrime. 
Prerequisite(s): A minimum grade of C in CRJU 5010G. 
Cross Listing(s): CRJU 5020. 

CRJU 5060 Special Topics in Cybercrime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines substantive topics, problems, and issues of importance to contemporary study of cybercrime. Topics announced when course is scheduled. Course may be repeated if substantially different. 

CRJU 5060G Special Topics in Cybercrime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines substantive topics, problems, and issues of importance to contemporary study of cybercrime. Topics announced when course is scheduled. Course may be repeated if substantially different. Graduate students are required to complete an additional research paper or project based on course objectives. This course serves as a content area for Cybercrime. 
Cross Listing(s): CRJU 5060. 

CRJU 5360 Hackers, Malware, and Online Economic Crime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines cybercrimes that are often influenced by either curiosity or financial motivation. Topics include, but are not limited to, the subculture of computer hackers, the role of malicious software in computer intrusions, and different types of online economic fraud. 
Cross Listing(s): CRJU 5360G. 

CRJU 5360G Hackers, Malware, and Online Economic Crime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines cybercrimes that are often influenced by either curiosity or financial motivation. Topics include, but are not limited to, the subculture of computer hackers, the role of malicious software in computer intrusions, and different types of online economic fraud. Graduate students are required to complete an additional substantive research paper or project based on course objectives. This course serves as a content area for Cybercrime. 
Prerequisite(s): Approval of instructor. 
Cross Listing(s): CRJU 5360. 

CRJU 5361 Cybercrimes against Persons and Society  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines cybercrimes in which violence is threatened or exerted against individuals or society. Topics include, but are not limited to, cyber harassment and stalking, pornography, child pornography and exploitation, and cyber terrorism. 
Cross Listing(s): CRJU 5361G. 

CRJU 5361G Cybercrimes against Persons and Society  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines cybercrimes in which violence is threatened or exerted against individuals or society. Topics include, but are not limited to, cyber harassment and stalking, pornography, child pornography and exploitation, and cyber terrorism. Graduate students are required to complete an additional substantive research project or paper based on course objectives. This course serves as a content area for Cybercrime. 
Prerequisite(s): Approval of instructor. 
Cross Listing(s): CRJU 5361. 

CRJU 6060 Current Issues in Cybercrime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines current cybercrime issues in the news, such as data breaches and recent computer intrusion. Graduate students are required to complete an additional substantive research paper or project. This course serves as a content area for Cybercrime.
CRJU 6080 Seminar in Transnational Crime  
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Special topics concerning illegal activities of international criminal organizations and the effect of transnational crime on the economic and socio-political environment in countries across the globe. Explores linkages between various crime groups, role of government corruption, and terrorism. Specific topics will be specified upon offering. Course may be repeated when topic is different.

CRJU 6801 Proseminar in Ethics and Criminal Justice  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to current research and critical issues in the administration of justice and criminological theory. Includes discussions of ethics and professional development for the field.

CRJU 6811 Criminal Justice Systems: Leadership, Management, and Policy  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Intersection of crime and policy process with particular attention on development of public policy and its impact on society. Includes exploration of organizational and managerial issues associated with the criminal justice system components.

CRJU 7080 Seminar in Victimization  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Explores special topics in victimization, placing attention on historical contexts, forms, theoretical frameworks, and victim-offender overlap. May focus on specific type or particular context of victimization. Specific topics will be specified upon offering. Course may be repeated when topic is different.

CRJU 7090 Topics in Violence and Crime  
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
In-depth analysis of selected topics on violence and crime. Analysis may include, but is not limited to, examination of nature, prevalence, causes and consequences of violence. Specific topics will be identified upon offering of course. Courses may be repeated when topic is different.

CRJU 7434 Quantitative Research Design  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course focuses on the study of the role of theory, research design, sampling, measurement and instrumentation, data collection, and ethical issues related to social scientific research.

CRJU 7436 Qualitative Research Design  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course addresses the analysis and practice of qualitative methodology in social science. Topics may include participant observation, ethnographic methods, interviews, case studies, content analysis, archival research and other innovative techniques.

CRJU 7437 Statistics for Social Science  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course addresses the techniques and statistics necessary to design and interpret quantitative social scientific research.

CRJU 7631 Criminological Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines major theoretical perspectives in classical and contemporary criminology, including but not limited to: control, learning, strain, labeling, rational choice, conflict and theoretical integration. The socio-political and historical context in which these theories were developed is also considered.

CRJU 7632 Seminar in Criminal Justice  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course explores a selected topic in criminal justice of interest to groups of students, including, but not limited to policing, corrections, courts, or the law, which are relevant to their course of specialization in the graduate curricula of the University. Course may be repeated when topic is different.

CRJU 7633 Seminar in Criminology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course focuses on the exploration of a selected topic in criminology of interest to groups of students which are relevant to their course of specialization in the graduate curricula of the University. Course may be repeated when topic is different.

CRJU 7695 Applying Elementary Statistics to Justice and Crime Research  
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.  
Provides an examination of the effects of public policies on crime trends and the control of crime. Specific attention is paid to the development of criminal justice policies and their consequences for the criminal justice system and society at large. Specific crimes and/or policies will be identified upon offering of course. Course may be repeated when topic is different.

CRJU 7791 Practicum II  
1-3 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.  
Educational placement designed for research observation and practical experience in a select criminal justice agency. May be used to satisfy Cybercrime Track or Certificate with permission of Advisor and Instructor. 
Prerequisite(s): Prior or concurrent enrollment in CRJU 7880.

CRJU 7822 Seminar in Law Enforcement  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
In-depth analysis of selected topics in the enforcement of laws in a system of ordered liberty. Course may be repeated when topic is different.

CRJU 7842 Seminar on Issues in Justice Administration  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Analysis of the unique contexts of management in the justice system and specific agency types. Emphasizes experiences and dilemmas of individuals working in these organizations, as well as organizational standards and guiding principles of professionalism. Course may be repeated when topic is different.

CRJU 7843 Special Topics in Corrections and Offender Supervision  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
In-depth analysis of selected topics in corrections within a larger system of ordered liberty. Course may be repeated when topic is different.

CRJU 7852 Seminar in Law Courts  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
In-depth analysis of selected topics in the role and operation of law and courts in a system of ordered liberty. Course may be repeated when topic is different.

CRJU 7864 Legal Aspects of Cybercrime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines basic computer forensic tools and applications including seizure, imaging and analysis of computer media with reference to computer hard drive and forms of storage. This course serves as a content area for Cybercrime.

CRJU 7865 First Responder Tools and Applications  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines basic computer forensic tools and applications including seizure, imaging and analysis of computer media with reference to computer hard drive and forms of storage. This course serves as a content area for Cybercrime.

CRJU 7866 Readings in Cybercrime  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Applicaton of ethical theory to 21st century issues, such as music piracy, cyber warfare, and cyber stalking. This course serves as a content area for Cybercrime.
CSCI 1302 Programming Principles I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a continuation of CSCI 1301. Emphasis is on advanced techniques such as recursion, regular expressions, refactoring, object oriented programming concepts and constructs, reusing components, templates/generics, interfaces and classes. Experiences include use of an integrated development environment and shared (code) repositories.
Prerequisite(s): A minimum grade of "C" in MATH 1441.

CSCI 1303 Programming Principles II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides a fundamental understanding of the development of computer solutions to solve problems with emphasis on structured, top-down development and testing. Concepts include the following: an overview of computer system design, problem solving and procedural abstraction design of computer solutions, algorithm development using simple data types and control structures, implementation and testing of programmed problem solutions, design modularization using subprograms and structured and user-defined data types.
Prerequisite(s): A minimum grade of "C" in MATH 1441.

CSCI 1307 Advanced Programming
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
This course is an independent examination of graduate course topics offered in the criminal justice and criminology curriculum of the Department of Criminal Justice and Criminology following guidelines of the College of Graduate Studies.
Prerequisite(s): CRJU 7868 Cyber Criminology or CRJU 7880 Practicum I or CRJU 7899 Thesis or CSCI 3230 Data Structures or CSCI 3231 Logic Circuits and Microprocessors or CSCI 3232 Systems Software.

CSCI 2120 Computers, Ethics and Society
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
An investigation of issues related to the use of computers and computer technology including the following: computer ethics, professional standards, and social impact of computer applications. Some topics to be researched include: philosophical ethics, the application of ethical theory to situations involving computer technology, codes of conduct, privacy, data protection, employee privacy, data regulation, artificial intelligence, copyright/patent issues, computer malfunction liability, computer crime and responsibilities of computer users.
Prerequisite(s): A minimum grade of "C" in CSCI 1301.

CSCI 2490 C++ Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Coverage of C++ programming techniques: Primitive data types, control structures, functions, pass-by-reference, arrays, pointers, C-strings, recursion, classes and objects, file input and output, operator overloading, inheritance, exception handling, templates, and STL.
Prerequisite(s): A minimum grade of "C" in CSCI 1302.

CSCI 3230 Data Structures
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to abstract data types such as lists, stacks, queues, and trees, and algorithm analysis.
Prerequisite(s): A minimum grade of "C" in CSCI 1302.

CSCI 3231 Logic Circuits and Microprocessors
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Digital system and Logic Circuits Design. Topics include the study of the Logic gate, Boolean Functions representation and Minimization, Combinational and Sequential logic circuits, Programmable Logic Arrays, Data Representation, RAM, ROM, and Cache Memories, Register Transfer Language and micro-operations, Hardware Description Language (VHDL), Microprocessor Organization and Design, Assembly Language, Computer Aided Design Tools and Filed Programmable Gate Arrays.
Prerequisite(s): CSCI 1302.

CSCI 3232 Systems Software
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides basic concepts of computer software systems including operating systems, language translators, utilities, linkers and loaders, system component interface, diverse programming language concepts, and interfaces.
Prerequisite(s): A minimum grade of "C" the following: CSCI 1302 and prior or concurrent enrollment in CSCI 3230.
CSCI 3236 Theoretical Foundations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of languages, formal grammars, and abstract representations of computation. Prerequisite(s): A minimum grade of "C" in MATH 2130, CSCI 1302.

CSCI 3330 Comparative Languages
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Comparative study of programming languages including facilities for procedures, parameter passing and recursion, control structures, and storage allocation techniques. Methods of specifying syntax and semantics. Introduction to program translation. Prerequisite(s): A minimum grade of "C" in CSCI 2490.

CSCI 3341 Into To Operating Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Concepts, structure, and mechanisms of operating systems. Topics include: processes, concurrency, memory management, scheduling, I/O management, disk scheduling, file management and basic aspects of protection and security and distributed systems. Prerequisite(s): A minimum grade of "C" in CSCI 2490 and CSCI 5331.

CSCI 3432 Database Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The fundamental concepts of database management systems (DBMS) including logical and physical database organization, date models and design issues. Emphasis will be placed upon the rational data model including design and implementation using commercial database systems. Prerequisite(s): A minimum grade of "C" in CSCI 1301, MATH 2130 or Permission of Instructor.

CSCI 4132 Data Warehouse Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will cover data warehouse design principles and technical problems. Topics will include: data warehouse architectures, organizing data warehouse design projects, analyzing data and requirements. SQL aggregate and analytic functions, materialized views, star-joins and other DW related features, data vault modeling, dimensional modeling, physical design and implementation of integrated data warehouse using commercial ROLAP engines such as Oracle or SQL Server. Prerequisite(s): A minimum grade of "C" in CSCI 3432.

CSCI 4210 High Performance Computing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
High performance software development for modern hardware. Introduction to multi-threaded and parallel computing concepts. Optimization techniques for practical parallel algorithms. Programming required. Prerequisite(s): A minimum grade of "C" in CSCI 3341.

CSCI 4220 Networks
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to data communications and networking. Topics include communications media, codes, data transmission, multiplexing, protocols, layered networks.

CSCI 4235 Human Computer Interaction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Human-Computer Interaction applies knowledge about how human beings perceive the world, think, remember and solve problems to the design of complex computer software. HCI goes beyond the construction of good user interfaces to specify how software projects are developed, tested and deployed. An important part of this course will emphasize field work practices for such things as user requirements gathering and usability testing. Prerequisite(s): A minimum grade of "C" in CSCI 3230 or Permission of Instructor.

CSCI 4320 Advanced Database Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of database systems, query processing and optimization, transactions, transaction systems, currency control, recovery, security, e-commerce. Prerequisite(s): A minimum grade of "C" in CSCI 3432.

CSCI 4322 Advanced Software Engineering
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced software engineering principles, including software processes and methodologies, CASE tools, software metrics, software quality assurance, reusability and reengineering, and future trends. A major project encompassing some or all of these concepts. Prerequisite(s): A minimum grade of "C" in CSCI 3341.

CSCI 4343 Systems Prog Under Unix (Tm)
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
UNIX (tm) system programming techniques in "C". I/O forking, pipes, signals, interrupts software tools, macros, conditional compilation, passing values to the compiler, lint, symbolic debugging, source code control, libraries. Prerequisite(s): A minimum grade of "C" in CSCI 3341.

CSCI 4350 Compiler Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Programming language translation and basic compiler implementation techniques, formal grammars and languages; specification of syntax and semantics; lexical analysis; parsing; semantic processing. A major project encompassing some or all of these concepts. Prerequisite(s): A minimum grade of "C" in CSCI 3330.

CSCI 4360 Embedded Systems Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Developing applications for embedded microprocessors including virtual machine architectures, data communications, time critical I/O, cross compiling, and debugging techniques.

CSCI 4370 Handheld/Ubiquitous Computing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of personal digital assistants (PDAs) and ubiquitous computing hardware, operating systems, virtual machines, and APIs. Development of PDA applications, cross compiling and hardware emulation, PDA GUI design, Infrac- Red and Wireless data communications, and desktop conduit development.

CSCI 4410 Numerical Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introductory numerical analysis and scientific computation. Topics include computer arithmetic, numerical error, polynomial interpolation, systems of linear equations, iterative methods for nonlinear equations, least squares approximation, numerical and integration. Prerequisite(s): A minimum grade of "C" in MATH 2242 and CSCI 1301.

CSCI 4439 Game Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to game design and development including game physics, using game engines, using AI in games, creating multithreaded games, and creating networked games. Prerequisite(s): CSCI 1302 or permission of instructor.

CSCI 4520 Machine Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Developing advanced applications using diverse machine learning and computational intelligence algorithms for pattern recognition, classification and decision-making, including decision trees, neural networks, Bayesian learning, clustering, and kernel-based techniques. Multiple projects and a term project encompassing some or all of these concepts. Prerequisite(s): A minimum grade of "C" in CSCI 2490 and MATH 2130.
Georgia Southern University

CSCI 4534 Software Testing and Quality Assurance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Essential concepts and technology for software systems quality assurance
and testing. Course covers software testing and the quality assurance
body of knowledge including theory, models and methods, as well as
contemporary standards and tools.
Prerequisite(s): A minimum grade of "C" in CSCI 3236 or Permission of
Instructor.
CSCI 4535 Data Mining
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of data mining functionalities including characterization and
discrimination, classification and prediction, cluster analysis, association
analysis, outlier analysis, evolution analysis; data mining system
architectures; data mining query languages; and OLAP technology for
data mining. Multiple projects encompassing a number of the discussed
concepts.
Prerequisite(s): A minimum grade of "C" in CSCI 3432.
CSCI 4537 Broadband Networks
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The basic concepts of broadband networks including an introduction
to broadband networks, principles and systems are presented. Basic
concepts and terminology needed for an understanding of broadband
networks which support a variety of service requirements. Emphasis is
on structures and principles of broadband networks. Major concepts and
principles will be examined along with their corresponding mathematical
analysis.
Prerequisite(s): A minimum grade of "C" in CSCI 5332 or Permission of
Instructor.
CSCI 4539 Optical Networks
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Basic concepts of optical networks will be explored including a summary of
fundamental mechanisms and recent developments and deployments of
optical networks and the network and software architecture to implement
optical networks designed to transport IP traffic.
Prerequisite(s): A minimum grade of "C" in CSCI 5332 or Permission of
Instructor.
CSCI 4610 Numerical Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introductory numerical analysis and scientific computation. Computer
arithmetic, numerical error, polynomial interpolation, systems of linear
equations, iterative methods for nonlinear equations, least squares
approximation, numerical and integration.
Prerequisite(s): A minimum grade of "C" in CSCI 1301.
CSCI 4720 Database Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Database management system concepts and architecture; the relational,
hierarchical, network, entity-relationship, and other models; design
concepts; internal implementation techniques.
CSCI 4790 Special Problems/CO-OP
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Work experience in computer science through the CO-OP program. A
student may enroll in this course more than once, but cumulative credit
may not exceed three credit hours.
Prerequisite(s): Acceptance as a CO-OP student in the area of Computer
Science.

565

CSCI 4820 Artificial Intelligence
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
project encompassing some or all of these concepts. developing
applications using diverse machine learning clustering and hidden
Markov Models. Includes a major Pattern matching and classification
with an emphasis on methods, including decision trees, neural networks,
production systems, knowledge representation, pattern production
systems, knowledge representation, pattern production systems,
knowledge representation, pattern production systems, knowledge
representation, pattern production systems, knowledge representation,
pattern matching, heuristic search, logical and probabilistic matching,
heuristic search, logical and probabilistic matching, heuristic search,
logical and probabilistic matching, heuristic search, logical and
probabilistic matching, heuristic search, logical and probabilistic reasoning,
and expert systems. The social, cultural and reasoning, and expert
systems. The social, cultural and reasoning, and expert systems. The
social, cultural and reasoning, and expert systems. The social, cultural and
reasoning, and expert systems. The social, cultural and economic impact
of artificial intelligence. economic impact of artificial intelligence. economic
impact of artificial intelligence. economic impact of artificial intelligence.
economic impact of artificial intelligence.
Prerequisite(s): A minimum grade of "C" in CSCI 3330.
CSCI 4830 Computer Graphics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to computer graphics. Topics include hardware and software,
algorithms for computer graphics programming, windows, clipping, two
and three dimensional transformations, hidden line and hidden surface
removal, graphics standards for hardware and software systems. Major
project emcompassing some or all of these concepts.
CSCI 4890 Directed Study in Computer Science
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Directed study under faculty supervision. Seminar with at least one hour to
be used as student engagement in service work.
Prerequisite(s): Permission of Instructor and Department Chair.
CSCI 5090 Selected Topics in Computer Science
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
Specialized study in a selected area of Computer Science.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): CSCI 5090G.
CSCI 5090G Selected Topics in Computer Science
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Specialized study in a selected area of Computer Science. Graduate
students will be given an extra assignment determined by the instructor
that undergraduates will not be required to do.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): CSCI 5090.
CSCI 5130 Data Management for Math and the Sciences
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in data management, including operating systems, word
processing, spreadsheets, and database management and their
applications to mathematics education. Intended primarily for those
majoring in Mathematics and Mathematics Education. For those majoring
or minoring in Computer Science, this course may not be used as an
upper level Computer Science elective.
Prerequisite(s): CSCI 1230 or Permission of Instructor.
Cross Listing(s): CSCI 5130G.


CSCI 5130G Data Management for Math and the Sciences

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Topics in data management, including operating systems, word processing, spreadsheets, and database management and their applications to mathematics education. Intended primarily for those majoring in Mathematics and Mathematics Education. For those majoring or minoring in Computer Science, this course may not be used as an upper level Computer Science elective. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Prerequisite(s): CSCI 1230 or Permission of Instructor.

Cross Listing(s): CSCI 5130.

CSCI 5230 Discrete Simulation

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Introduction to discrete simulation models and their implementation on computers. Topics include modeling techniques, experiment design, analysis and validation of results. Students will be exposed to one or more computer simulation languages.

Prerequisite(s): A minimum grade of "C" in STAT 2231 and CSCI 3230 or Permission of Instructor.

Cross Listing(s): CSCI 5230G.

CSCI 5230G Discrete Simulation

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Introduction to discrete simulation models and their implementation on computers. Topics include modeling techniques, experiment design, analysis and validation of results. Students will be exposed to one or more computer simulation languages. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Prerequisite(s): A minimum grade of "C" in CSCI 3230 and STAT 2231 or Permission of Instructor.

Cross Listing(s): CSCI 5130.

CSCI 5235 Human Computer Interaction

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Human-Computer Interaction applies knowledge about how human beings perceive the world, think, remember and solve problems to the design of complex computer software. HCI goes beyond the construction of good user interfaces to specify how software projects are developed, tested and deployed. An important part of this course will emphasize field work practices for such things as user requirements gathering and usability testing.

Cross Listing(s): CSCI 5235G.

CSCI 5330 Algorithm Design and Analysis

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An in-depth study of the design, implementation, testing, and analysis of algorithms.

Prerequisite(s): A minimum grade of "C" in CSCI 3236 and MATH 2242.

Cross Listing(s): CSCI 5330G.

CSCI 5330G Algorithm Design and Analysis

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An in-depth study of the design, implementation, testing, and analysis of algorithms. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Prerequisite(s): A minimum grade of "C" in CSCI 3236 and MATH 2242.

Cross Listing(s): CSCI 5330.

CSCI 5331 Computer Architecture

3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.

Digital logic: transistors, circuits, sensors, robotic control; registers and register banks; arithmetic-logic units; data representation: big-endian and little-endian integers; one and two complement arithmetic; signed and unsigned values; Von-Neumann architecture and bottleneck; instruction sets; RISC and CISC designs; instruction pipelines and stalls; rearranging code; memory and address spaces; physical and virtual memory; interleaving; page tables; memory caches; bus architecture; polling and interrupts; DMA; sensor and device programming; assembly language; optimizations; parallelism; data pipelining. Prerequisite(s): A minimum grade of "C" in CSCI 3232.

Cross Listing(s): CSCI 5331G.

CSCI 5331G Computer Architecture

3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.

Topics include the study of the Microprocessor Organization and Bus Structures, Complex Instruction Set Computer (CISC) Systems, Reduced Instruction Set, Computer (RISC) Systems, Micro-programmed Control and Controller Design, Concepts and Application of Embedded Systems, Pipeline and Vector processing, Input-Output Organization, Memory Organization, and Parallel processor Architecture. Advanced topics related to Hardware-Software Co-design. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Prerequisite(s): A minimum grade of "C" in CSCI 3231 or Permission of Instructor.

Cross Listing(s): CSCI 5331.

CSCI 5332 Data Communications and Networking

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Fundamental concepts of data communications including architecture models, protocol suites, network programming, signal and data transmissions, error detection, and performance analysis.

Prerequisite(s): A minimum grade of "C" in CSCI 3232 and STAT 2231.

Cross Listing(s): CSCI 5332G.

CSCI 5332G Data Communications and Networking

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Fundamental concepts of data communications including architecture models, protocol suites, network programming, signal and data transmissions, error detection, and performance analysis.

Prerequisite(s): A minimum grade of "C" in CSCI 3232 and CSCI 5331 and STAT 2231.

Cross Listing(s): CSCI 5332.

CSCI 5335 Object-Oriented Design

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Introduction to concepts, methods, and current practice of object oriented design and analysis. Topics include the study of the Unified Modeling Language (UML), which has become an industry standard notation. UML topics will include use cases, diagramming notation (class, object, sequence) and object state diagrams. Students will use UML to design and implement individual and small group projects. Additional topics include understanding design patterns in building applications.

Prerequisite(s): A minimum grade of "C" in CSCI 3230.

Cross Listing(s): CSCI 5335G.

CSCI 5335G Object-Oriented Design

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Introduction to concepts, methods, and current practice of object oriented design and analysis. Topics include the study of the Unified Modeling Language (UML), which has become an industry standard notation. UML topics will include use cases, diagramming notation (class, object, sequence) and object state diagrams. Students will use UML to design and implement individual and small group projects. Additional topics include understanding design patterns in building applications. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Prerequisite(s): A minimum grade of "C" in CSCI 3230.

Cross Listing(s): CSCI 5335.
CSCI 5380 Software Security and Secure Coding  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course covers methodological framework for identifying common programming errors that result in software vulnerabilities, understanding how these errors are exploited by attackers, and how to implement solutions in a secure fashion. Topics include concurrency and vulnerabilities that result from deadlock, race conditions, invalid memory access sequences, and vulnerabilities associated with file I/O and time of use (TOCTOU).  
Prerequisite(s): A minimum grade of "C" in CSCI 1302.  

CSCI 5430 Artificial Intelligence  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to different paradigms for creating software that can reason, access a knowledge base, handle uncertainty, learn, communicate, perceive and act. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Prerequisite(s): A minimum grade of "C" in CSCI 3230 and CSCI 5330 or Permission of Instructor.  
Cross Listing(s): CSCI 5430G.  

CSCI 5430G Artificial Intelligence  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to different paradigms for creating software that can reason, access a knowledge base, handle uncertainty, learn, communicate, perceive and act. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Prerequisite(s): A minimum grade of "C" in CSCI 3230 and CSCI 5330 or Permission of Instructor.  
Cross Listing(s): CSCI 5430.  

CSCI 5431 Computer Security  
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.  
Computer security theory and practice fundamentals including methods of attack, defending against attacks, privacy vs security, methods of encryption, authentication, writing secure code, web security, and network security.  
Prerequisite(s): A minimum grade of "C" in all of the following: CSCI 2120 and prior or concurrent enrollment in CSCI 5332.  
Cross Listing(s): CSCI 5431G.  

CSCI 5431G Computer Security  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
Computer security theory and practice fundamentals including methods of attack, defending against attacks, privacy vs security, methods of encryption, authentication, writing secure code, web security, and network security. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Prerequisite(s): A minimum grade of "C" in CSCI 2120 and prior or concurrent enrollment in CSCI 5332.  
Cross Listing(s): CSCI 5431.  

CSCI 5436 Distributed Web Systems Design  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course involves programming methodologies for the World Wide Web. Topics include: Client-side programming, distributed transactions, remote procedure calls, component objects, server side programming and network load balancing.  
Prerequisite(s): A minimum grade of "C" in CSCI 3432.  
Cross Listing(s): CSCI 5436G.  

CSCI 5436G Distributed Web Systems Design  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course involves programming methodologies for the World Wide Web. Topics include: Client-side programming, distributed transactions, remote procedure calls, component objects, server side programming and network load balancing. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Cross Listing(s): CSCI 5436.  

CSCI 5437 Computer Graphics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Course covers fundamentals of the theory of computer graphics, including raster systems, 3D viewing, illumination, shading and solid modeling. A standard computer graphics language is introduced.  
Prerequisite(s): A minimum grade of "C" in CSCI 3230 and CSCI 3236.  
Cross Listing(s): CSCI 5437G.  

CSCI 5437G Computer Graphics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Course covers fundamentals of the theory of computer graphics, including raster systems, 3D viewing, illumination, shading and solid modeling. A standard computer graphics language is introduced. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): CSCI 5437.  

CSCI 5438 Animation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Course covers mechanism of computer animation and their implementation in OpenGL, together with advanced graph theory.  
Prerequisite(s): A minimum grade of "C" in CSCI 5437.  
Cross Listing(s): CSCI 5438G.  

CSCI 5438G Animation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Course covers mechanism of computer animation and their implementation in OpenGL, together with advanced graph theory. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Prerequisite(s): A minimum grade of "C" in CSCI 5437G. Cross Listing(s): CSCI 5438.  

CSCI 5530 Software Engineering  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course serves as a major integrative, capstone experience for students and requires teamwork. A study of the development and management of software; strategies and techniques of design, testing, documentation and maintenance.  
Prerequisite(s): A minimum grade of "C" in CSCI 5330 and CSCI 5335 and CSCI 5432 or CSCI 3432.  
Cross Listing(s): CSCI 5530G.  

CSCI 5530G Software Engineering  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course serves as a major integrative, capstone experience for students and requires teamwork. A study of the development and management of software; strategies and techniques of design, testing, documentation and maintenance. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Prerequisite(s): A minimum grade of "C" in CSCI 5335 and CSCI 5330 or Permission of Instructor.  
Cross Listing(s): CSCI 5530.  

CSCI 5531 Systems and Software Assurance  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course presents a body of knowledge in systems and software assurance and evaluation including security, safety, and integrity analysis. The core part of the course is software assurance where students are exposed to code and architectural analysis, secure coding practices, standards, and tools. The course also explores standards in modeling internal security at the organizational level and will involve students in risk assessments, comprehensive assurance planning, as well as an array of countermeasure considerations.  
Prerequisite(s): A minimum grade of "C" in CSCI 1302 and CSCI 3432.  
Cross Listing(s): CSCI 5531G.
CSCI 5531G Systems and Software Assurance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents a body of knowledge in systems and software assurance and evaluation including security, safety, and integrity analysis. The core part of the course is software assurance where students are exposed to code and architectural analysis, secure coding practices, standards, and tools. The course also explores standards in modeling internal security at the organizational level and will involve students in risk assessments, comprehensive assurance planning, as well as an array of countermeasure considerations. Graduate students will be required to complete an individual research project not required of undergraduate students.
Prerequisite(s): A minimum grade of "C" in CSCI 1302 and CSCI 3432 or CSCI 5431G or permission of instructor.
Cross Listing(s): CSCI 5531.

CSCI 5532 Network Management Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theory and practice of network management systems architectures and protocols, including fundamentals of standards models, languages, SNMP, broadband and Web-based tools and applications.
Prerequisite(s): A minimum grade of "C" in CSCI 5332.
Cross Listing(s): CSCI 5532G.

CSCI 5532G Network Management Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theory and practice of network management systems architectures and protocols, including fundamentals of standards models, languages, SNMP, broadband and Web-based tools and applications. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in CSCI 5332G.

CSCI 5538 Wireless and Mobile Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course deals with the basics of cellular and mobile communication systems, multiple radio access procedures and channel allocation techniques, the architecture and functioning of satellite systems including global positioning system different wireless LAN technologies and personal area networks with an emphasis on Bluetooth networks and mobile application development required for mobile and wireless handheld devices like PDAs and cell phones.
Prerequisite(s): A minimum grade of "C" in CSCI 5332 and MATH 1441 or Permission of Instructor.
Cross Listing(s): CSCI 5538G.

CSCI 5538G Wireless and Mobile Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course deals with the basics of cellular and mobile communication systems, multiple radio access procedures and channel allocation techniques, the architecture and functioning of satellite systems including global positioning system different wireless LAN technologies and personal area networks with an emphasis on Bluetooth networks and mobile application development required for mobile and wireless handheld devices like PDAs and cell phones. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in CSCI 5332G or Permission of Instructor.
Cross Listing(s): CSCI 5538.

CSCI 5590 Special Topics in Computer Science
1-4 Credit Hours. 1-4 Lecture Hours. 1-4 Lab Hours.
Selected new topics in computer science.

CSCI 7090 Special Topics in Computer Science
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
Specialized study in a selected area of Computer Science.
Prerequisite(s): Permission of Instructor.

CSCI 7130 Artificial Intelligence - Theory and Application
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the fundamental theory for research, design, and development of artificial intelligence systems. Emphasizes state space search, computer gaming, logic, and knowledge representation. Topics include expert systems, natural language understanding, planning, machine learning and decision making with a view toward applications. Students develop a working system in a realistic application domain.
Prerequisite(s): A minimum grade of "B" in CSCI 3230 and CSCI 3232 or Permission of Instructor.

CSCI 7132 Database Systems Design-Theory and Application
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Effective design and application of complex Database Systems, involving both traditional relational databases, object-relational databases, advanced rules and constraints, advanced SQL programming, data model validation, ontology based data modeling, contemporary semi-structured data modeling with XML Schema, and advances in SQL, XML, XML Schema, XQuery, and Data Modeling standardization. Review of advances in DB research and DB technology trends. Students will also act as practicing advisors to other students working on DB design projects.
Prerequisite(s): A minimum grade of "B" in CSCI 3230 and CSCI 3232 or Permission of Instructor.

CSCI 7136 Distributed Web Systems Design - Theory and Application
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Client and server side programming, stateless client/server transactions, state maintenance, server side database transactions, Web project design methodologies, database design methodologies for distributed Web projects, testing methodologies, and Web systems project management concepts.
Prerequisite(s): A minimum grade of "B" in CSCI 7132 or Permission of Instructor.

CSCI 7140 Software Development and Machine Architecture
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Software and hardware topics that include an object oriented language, web page construction, electric circuits, architecture, language translation, operating system, and networks. This course is primarily intended for those that are beginning a Masters Degree in Technology. This course cannot be taken for credit by those earning a Masters in Mathematics.
Prerequisite(s): Enrollment in the Master of Science in Appliance Engineering degree program or permission of instructor.

CSCI 7230 Advanced Computer Architecture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Comparing different modern computer systems architecture and investigating their performances. Topics include: parallel computer systems, pipelining techniques, vector processor arrays, multiprocessor systems, data flow machines and fault-tolerant computer systems.
Prerequisite(s): CSCI 5331 or Permission of Instructor.

CSCI 7332 Parallel Algorithms Design and Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of parallel constructs for providing experiences in designing and analyzing parallel algorithms.
Prerequisite(s): A minimum grade of "C" in CSCI 5332 or Permission of Instructor.

CSCI 7334 Unix Network Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of UNIX interprocess communication protocols and how they can be used in programs.
Prerequisite(s): A minimum grade of "C" in CSCI 3232 or Permission of Instructor.
CSCI 7336 Broadband Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of the structures and principles of broadband networks. Major concepts and principles are explained along with their mathematical analysis.
Prerequisite(s): A minimum grade of "B" in CSCI 5332 and a minimum grade of "C" in STAT 2231 or Permission of Instructor.

CSCI 7337 Optical Networks
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to optical networks, their principles and systems, an understanding of the construction and organization of optical networks along with an in-depth study of the structures and requirements of lightwave-coherent systems. Major concepts and principles are covered along with their mathematical analysis.
Prerequisite(s): A minimum grade of "B" in CSCI 5332 and a minimum grade of "C" in STAT 2231 or Permission of Instructor.

CSCI 7371 Advanced Human Computer Interaction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Paradigms in modern user interface design and related human factors. Topics include: user-system compatibility analysis, techniques for user interface design, methods for interface analysis, multimodal interaction and interaction analysis.
Prerequisite(s): Permission of department head.

CSCI 7380 Software Security and Secure Coding
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers methodological framework for identifying common programming errors that result in software vulnerabilities, understanding how these errors are exploited by attackers, and how to implement solutions in a secure fashion. Topics include concurrency and vulnerabilities that result from deadlock, race conditions, invalid memory access sequences, and vulnerabilities associated with file I/O and time of use (TOCTOU).
Prerequisite(s): permission of instructor.

CSCI 7431 Distributed Database Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of distributed database architectures and system design, semantic data control, query processing, transaction management, concurrency control, distributed DBMS reliability, parallel DB systems, distributed object DB management systems, and database interoperability.
Prerequisite(s): A minimum grade of "B" in CSCI 7132 and CSCI 7136 or Permission of Instructor.

CSCI 7432 Algorithm Analysis and Data Structures
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced topics in algorithm design and analysis and data structures for implementing these algorithms. Problems considered from areas of information storage and retrieval, graph theory, cryptography and parallel processing.
Prerequisite(s): A minimum grade of "C" in CSCI 5330 or Permission of Instructor.

CSCI 7433 Data and Database Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers data protection approaches and mechanisms applicable for digital data in formatted data storage systems including Databases and Data Warehouses. Topics to be covered include: Data Security, View Security, Privacy and Statistical DB Security, DW Security, and Relevant Standards/Guidelines.
Prerequisite(s): A minimum grade of "B" in CSCI 7132 or permission of instructor.

CSCI 7434 Data Mining
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The application of concepts and techniques from information science, statistics, visualization, artificial intelligence, and machine learning for the purpose of extracting, integrating, and visualizing information and knowledge from large databases.
Prerequisite(s): A minimum grade of "B" in CSCI 7130 and CSCI 7132 or Permission of Instructor.

CSCI 7435 Data Warehousing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Data warehouse design principles and technical problems inherent in complex industrial implementations using commercial software. Possible topics include: an introduction to data warehousing, multidimensional data modeling, data warehouse architectures, data warehouse design and implementations, development of data cube technology, organizing data warehousing projects, from data warehousing to data mining.
Prerequisite(s): A minimum grade of "B" in CSCI 7132 or Permission of Instructor.

CSCI 7436 Internet Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced design and implementations of large-scale Internet applications through the use of high and low level programming constructs. Possible topics include: client side scripting languages, middle-tier programming languages, middle-tier transaction servers, server-side data access, server-side scripting/programming, integrating applications within a network cluster, internet protocols and socket programming.
Prerequisite(s): A minimum grade of "C" in CSCI 5332 and CSCI 3432 or Permission of Instructor.

CSCI 7437 Ethics and Research in CS
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the fundamentals of research methods, computer ethics and technical writing as it generally may apply in the Computer Sciences and specifically in broad area of cyber security.

CSCI 7532 Advanced Software Engineering
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The focus is the rigorous specification, modeling and prototyping of critical software systems/components. Topics selected from formal specification using Z and VDL, specifications using UML with OCL for real-time systems. Structure, dynamic and constraint modeling, constraint/ performance [rate monotonic] analysis, concurrency, re-configuration and distribution, prototyping, reuse and integration issues, and component implementation using advanced tools with implementation styles such as Generic and Meta-Programming.
Prerequisite(s): A minimum grade of "C" in CSCI 5530.

CSCI 7533 Requirements and Architecture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Software requirements and architecture evaluation using examples of complex software intensive systems. Product-line approach and use of industry standards. Functional and object oriented approaches in complex domains such as avionics, ground vehicles, medical devices, telecommunication. Students are expected to critically evaluate and develop architecture and requirements for sizable systems, functioning as lead architects and requirements managers.
Prerequisite(s): A minimum grade of "C" in CSCI 5530 or Permission of Instructor.

CSCI 7534 Testing and Measurement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Testing and quantitative evaluation of software products and processes. Topics include: models, methods, standards and tools for testing, measurement and evaluation, test (defect) catalog and coverage testing of units, components, and subsystems. Integration, system and acceptance testing and evaluation, test suites, regression testing and test automation.
Prerequisite(s): A minimum grade of "C" in CSCI 5530 or Permission of Instructor.
CSCI 7535 Applied Cryptography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of cryptographic techniques and their application. Topics will include stream ciphers, block ciphers, key exchange algorithms, asymmetric ciphers, digital signatures, public key infrastructure, hash functions, elliptic curve ciphers, and techniques of cryptanalysis and applications of cryptography.
Prerequisite(s): A minimum grade of "B" in CSCI 7536.

CSCI 7536 Network and Computer Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the fundamentals of network and computer security and their application. Topics include securing each layer of the OSI model, TCPIP versions 4 and 6, operating system security, network management systems, secure coding techniques, and the basics of encryption.

CSCI 7610 Graduate Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Students will research topics related to their major/concentration, under supervision of one or more faculty members. Each student will present results on topics of interest to the class on new developments in mathematical sciences, or on his/her research project. Faculty members also may present lectures for the benefit of the students. Course may be repeated up to a maximum of 3 credit hours to be counted toward the M.S. in Mathematics.
Prerequisite(s): CSCI 5230 or MATH 5330 or STAT 5531 or a minimum grade of "C" in MATH 7231.

CSCI 7710 Advanced Computer Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theory and practice of computer security. Topics include cryptography, cryptanalysis, digital certificates, coding theory, computer forensics, and system security.
Prerequisite(s): CSCI 5330G or CSCI 5431G.

CSCI 7890 Directed Study in Computer Science
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
Directed study under faculty supervision.
Prerequisite(s): Permission of Instructor and Department Chair.

CSCI 7892 Research Project in CSC
1-6 Credit Hours. 1-6 Lecture Hours. 0 Lab Hours.
Research project addressed toward a real world problem.
Prerequisite(s): Permission of Project Advisor and Department Chair.

CSCI 7999 Thesis
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Thesis.

CSDS Communication Disorders

CSDS 1001 American Sign Language I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the structure of American Sign Language, as well as to the history and culture of the Deaf Community. Includes use of signs, finger spelling, body language and facial expressions. Grammar is introduced in context, with an emphasis on developing question and answer skills.

CSDS 1002 American Sign Language II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to increase recognition and recall needed to improve conversational skills in ASL to a functional level for expressive and receptive use. Content will provide greater knowledge of the grammar, syntax and other aspects of the language.
Prerequisite(s): A minimum grade of "C" in CSDS 1001.

CSDS 1220 Intro To Comm Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to professions in communication sciences and disorders and issues relevant to the discipline. Survey of types, characteristics, etiologies, and treatment methodologies of various communication disorders in children and adults.
Cross Listing(s): SLPA 1220.

CSDS 2001 American Sign Language III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an continuation of American Sign Language, expanding the emphasis on ASL grammar, vocabulary development, and Deaf culture. Dialogue, short stories, narratives, and short conversation, both receptive and expressive, will be featured through the course.
Prerequisite(s): A minimum grade of "C" in CSDS 1001 and CSDS 1002.

CSDS 2002 American Sign Language IV
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This intermediate course provides students an opportunity to increase their listening and signing skills in depth. Students will be exposed to individuals with hearing impairments as well as Deaf Culture. Students may do observations within the deaf and hard of hearing population.
Prerequisite(s): A minimum grade of "C" in CSDS 2001.

CSDS 2003 Introduction to Interpreting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the role of the interpreter in daily interaction with individuals who are deaf and the hearing population. Also includes discussion of business practices, professional conduct, with emphasis on observance of ethical standards.
Prerequisite(s): A minimum grade of "C" in CSBS 1002.

CSDS 2220 Communication and Deafness
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of speech, language, and hearing problems in populations who are deaf and hard-of-hearing.
Cross Listing(s): SLPA 2230.

CSDS 2240 Normal Speech/Lang Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Phonological, morphological, semantic, syntactic and pragmatic growth. Observation practicum required.
Cross Listing(s): SLPA 3150.

CSDS 2250 Phonetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the International Phonetic Alphabet (IPA) in communication sciences and disorders. Emphasis on IPA transcription of normal and disordered speech, regional/cultural dialects, diastratic markings, and phonological processes.
Cross Listing(s): SLPA 2250.

CSDS 2260 Communication Disorders in the Media
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An exploration of various communication disorders and how they are portrayed by the media and in the literature.
Cross Listing(s): SLPA 2260.

CSDS 3400 Speech Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in CSDS 2230 and CSDS 2250.
Cross Listing(s): SLPA 3400.

CSDS 3410 Intro to Audiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to etiology, characteristics, and assessment of individuals with hearing impairments. Directed Observation.
Prerequisite(s): A minimum grade of "C" in CSDS 2230.
Cross Listing(s): SLPA 3410.
CSDS 3420 Language Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Etiology, characteristics, classification, assessment, and treatment of language disorders. Supervised clinical observations may be required.
Prerequisite(s): A minimum grade of "C" in CSDS 2240.

CSDS 3430 Organ & Neuro Based Comm Disor
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Etiology, characteristics, assessment, and treatment of the disorders of voice, cleft palate, and cerebral palsy. Field experiences may be required.
Prerequisite(s): A minimum grade of "C" in CSDS 2240.

CSDS 3440 Aural Rehabilitation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles of aural rehabilitation with hearing impaired individuals across the lifespan.

CSDS 3450 Speech Sound Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Etiology, characteristics, classification, assessment, and treatment of speech sound disorders. Supervised clinical observations and field experiences may be required.
Prerequisite(s): A minimum grade of "C" in CSDS 2240 and CSDS 2250.

CSDS 3460 Professional Dilemmas in Healthcare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines dilemmas in health care relevant to today's society and the decision making process involved in service delivery. Philosophical and faith-based belief systems will be explored along with socio-cultural influences, professional codes, organizational and personal standards.

CSDS 3470 Independent Study
1-3 Credit Hours. 1-18 Lecture Hours. 1-18 Lab Hours.
Independent study in an area of interest in Communication Sciences and Disorders.

CSDS 4050 Intercultural Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores key concepts of culture as it relates to verbal and nonverbal communication using a global perspective. The course will address topics such as barriers to communication; dimensions of culture; multiculturalism and culture's influence on communication. In addition, students will examine cultural and linguistic variation/language difference versus language disorder. Course materials and activities are designed to expand students' intellectual curiosity, critical thinking, and intercultural competence in the area of speech, language and communication.

CSDS 4151 Clinical Writing for the Health Professions
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on critical writing skills for students in the health professions. Clinical documentation such as diagnostic reports, diagnostic plans, and progress notes will be covered. Emphasis on the ability to clearly and effectively express thoughts and information.
Prerequisite(s): A minimum grade of "C" in 1102.

CSDS 4152 Independent Study - Research
1-3 Credit Hours. 1-18 Lecture Hours. 1-18 Lab Hours.
Independent study in an area of Communication Sciences and Disorders to pursue research interests and/or complete research projects.

CSDS 4190 Clin Methods Speech/Lang Path
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in CSDS 3420 and CSDS 3430 and CSDS 3450.

CSDS 4210 Seminar in Comm Sci & Disorder
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cross Listing(s): SLPA 4210.

CSDS 4350 Speech Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

CSDS 7136 Introduction to Clinical Practicum in Communication Disorders
3 Credit Hours. 3 Lecture Hours. 0-9 Lab Hours.
First semester of clinical practicum lecture. Synthesis of knowledge and skills necessary to implement diagnostic and therapeutic approaches to communication impairments in children, youth and/or adults being served in a clinic setting.
Corequisite(s): CSDS 7136L.

CSDS 7136L Intro to Clin Pract in Comm Dis
1 Credit Hour. 0 Lecture Hours. 1-9 Lab Hours.
An introductory practicum course designed to provide instruction and practice experience in diagnostic and therapeutic approaches to communication impairments in children, youth and/or adults being served in a clinic setting.
Corequisite(s): CSDS 7136.

CSDS 7137 Clinical Practicum in Communication Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Second semester of clinical practicum lecture. Synthesis of knowledge and skills necessary to implement diagnostic and therapeutic approaches beyond the introductory level for communication impairments in children, adolescents and/or adults.
Prerequisite(s): A minimum grade of "C" in CSDS 7136.
Corequisite(s): CSDS 7137L.

CSDS 7137L Clinic Pract in Comm Disorders
1 Credit Hour. 0 Lecture Hours. 0-9 Lab Hours.
Second semester of supervised clinical practice. The clinical experience is designed to provide skill development in diagnostic and therapeutic approaches beyond the introductory level for communication impairments in children, adolescents and/or adults.
Prerequisite(s): A minimum grade of "C" in CSDS 7136L.
Corequisite(s): CSDS 7137.

CSDS 7138 Clinical Practicum in Communication Disorders Intermediate
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Third semester of clinical practicum lecture. Synthesis of knowledge and skills necessary to implement diagnostic and therapeutic approaches beyond the introductory level for communication impairments in children, adolescents and/or adults. Emphasis is placed on the development of interpersonal skills, professionalism and clinical independence.
Prerequisite(s): A minimum grade of "C" in CSDS 7137.
Corequisite(s): CSDS 7138L.

CSDS 7138L Clin Prac in Comm Dis - Inter
2 Credit Hours. 2 Lecture Hours. 0-9 Lab Hours.
Third semester of supervised clinical practice. The clinical experience is designed to provide skill development in diagnostic and therapeutic approaches beyond the introductory level for communication impairments in children, adolescents and/or adults. Emphasis is placed on the development of interpersonal skills, professionalism and clinical independence.
Prerequisite(s): A minimum grade of "C" in CSDS 7137L.
Corequisite(s): CSDS 7138.

CSDS 7140 Diag/Appraisal Comm Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

CSDS 7141 Cog & Ling Found of Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presents an overview of the nature, and development of cognitive and linguistic skills needed for effective communication Topics to be addressed include but are not limited to development of object permanence auditory and visual memory, and meta-linguistics and Brown's stages of development. Cultural factors related to cognition and linguistics will be discussed. Field experience may be required.
Overview of a variety of professional and ethically-based issues that relate to the licensure and practice of speech-language pathology in various settings. Topics may include the ASHA Code of Ethics, legal issues, confidentiality, documentation, scheduling, service delivery models and professional practices according to state of Georgia regulations.

Field experience/observation may be required.

Assessment and treatment of acquired neurogenic language disorders as well as cognitive communication disorders in adults. Field experience may be required.

Prerequisite(s): A minimum grade of "C" in CSDS 7145.

A minimum grade of "C" in CSDS 7144.

CSDS 7150 and CSDS 7151 and CSDS 7157 and CSDS 7147 and prior or concurrent enrollment in CSDS 7147.

CSDS 7155 Adv Practicum in Comm Dis II
3 Credit Hours. 1 Lecture Hour. 1-12 Lab Hours.
Fifth semester of supervised clinical practicum with clients of all ages and various cultural/linguistic backgrounds. A practicum course designed to provide instruction and practical experience in diagnostic and therapeutic approaches to communication impairments with emphasis on independent service delivery. Continued development of interpersonal skills, professionalism, and clinical fellowship readiness.

Prerequisite(s): A minimum grade of "C" in CSDS 7154.

A minimum grade of "C" in CSDS 7150.

CSDS 7156 Voice & Fluency Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

CSDS 7157 Speech Sound Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The assessment and treatment of speech sound disorders with a specific focus on articulatory and phonological disorders in early childhood. Field experience may be required.

Prerequisite(s): A minimum grade of "C" in CSDS 7147.

A minimum grade of "C" in CSDS 7144.

CSDS 7158 Acquired Cog. Comm Disorders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Presents an overview of the nature, assessment, and treatment of cognitive-communication disorders, including (but not limited to) communication impairments related to acquired deficits in attention, memory, problem solving, and executive function. Specific etiologies to be discussed include traumatic brain injury, dementias, and right hemisphere damage. Cultural implications of cognitive-communication disorders will be discussed. Field experience may be required.

Prerequisite(s): A minimum grade of "C" in CSDS 7144.

CSDS 7163 Research Methodology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An orientation to strategies and methodology in the design and evaluation of research in communication sciences and disorders.

CSDS 7165 Independent Study
1-3 Credit Hours. 1-12 Lecture Hours. 1-12 Lab Hours.
Independent study in an area of interest or need in communication sciences and disorders.

CSDS 7230 Spec Top in Speech/Lang Path
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

CVIS Cardiovascular/Interven

CVIS 3001 Cardiovascular Interventional Sciences I
6 Credit Hours. 6 Lecture Hours. 4 Lab Hours.
Introduction to field of cardiovascular interventional science, imaging, and equipment. This includes diagnostic and treatment methods, application of specific equipment and devices, contrast media, and technology utilized in the diagnosis and treatment of cardiovascular disease.

CVIS 3001L Cardiovas Interven Scien I Lab
0 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
CVIS 3002 Cardiovascular Interventional Sciences II
6 Credit Hours. 6 Lecture Hours. 3 Lab Hours.
Caring for the invasive, percutaneous, cardiovascular patient. Includes monitoring essentials and managing medical emergencies associated with the cardiovascular procedures.
Prerequisite(s): A minimum grade of "C" in CVIS 3001.

CVIS 3002L Cardiova Inter Sci II Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

CVIS 3003 Physiologic Monitoring and Recording
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
The advanced identification and interpretation of ECGs and hemodynamics and cardiac function.
Prerequisite(s): A minimum grade of "C" in CVIS 3002.

CVIS 3100 Introduction to Cardiovascular Interventional Clinical Education
1 Credit Hour. 1 Lecture Hour. 0-18 Lab Hours.
Overview of the clinical setting, administrative structures, legal/compliance requirements, and required documentation.
Prerequisite(s): A minimum grade of "C" in CVIS 3001.
Corequisite(s): CVIS 3002.

CVIS 4101 Cardiovascular Interventional Clinical Education I
5 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Supervised clinical experience in cardiovascular/interventional procedures.
Prerequisite(s): A minimum grade of "C" in CVIS 3100 and DDTS 3001.

CVIS 4102 Cardiovascular Interventional Clinical Education II
8 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Supervised clinical experience in cardiovascular/interventional procedures.
Prerequisite(s): A minimum grade of "C" in CVIS 4101.

CVIS 4103 Cardiovascular Interventional Clinical Education III
9 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Supervised clinical experience in cardiovascular/interventional procedures.
Prerequisite(s): A minimum grade of "C" in CVIS 4102.

CVIS 4200 Cardiva Interv Sci Synthesis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Discussion of advanced theoretical concepts in cardiovascular interventional technology as they relate to practice.
Prerequisite(s): A minimum grade of "C" in CVIS 3003 and CVIS 4102.

DDTS Diagnostic & Therapeutic

DDTS 2001 Intro to Diag and Therap Sci
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
An introduction to the disciplines in DDTS: Medical Laboratory Sciences, Respiratory Therapy, and Radiologic Sciences.
Prerequisite(s): ENGL 1102.
Corequisite(s): DDTS 2001L.

DDTS 2001L Intro to Diag & Therap Sci Lab
1 Credit Hour. 0 Lecture Hours. 1 Lab Hour.
An introduction to medical terminology relating to allied health including Medical Laboratory Science, Respiratory Therapy and Radiologic Sciences.

DDTS 3001 Patient Care and Assessment
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
An interdisciplinary approach to the understanding and knowledge of patient interaction, assessment, chart reviews, infection control, professionalism, communication, safety in transferring, disease processes, medical emergencies, managing medical devices, basic pharmacology and basic life support.
Corequisite(s): DDTS 3001L.
Cross Listing(s): RADS 3050.

DDTS 3001L Patient Care & Assessment Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
Practical applications of the fundamental concepts and procedures related to patient care in Diagnostic and Therapeutic Sciences.
Corequisite(s): DDTS 3001.

DDTS 4010 Research Methodologies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of quantitative and qualitative approaches to research issues specific to the Diagnostic and Therapeutic Sciences. Topics covered include development of research questions, study design, methodology, data collection and analysis.
Prerequisite(s): HLPR 2000.

DDTS 4020 Management and Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces leadership concepts, focusing on the contemporary theories of leadership and management, health care financing, and total quality concepts. A course component will include a leadership practicum.

DDTS 4020L Management and Leadership Lab
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
Corequisite(s): DDTS 4020.

ECE Elect/Computer Engineering

ECE 2000 GTREP 2000
1-15 Credit Hours. 0-15 Lecture Hours. 0-30 Lab Hours.

ECE 3000 GTREP 3000
1-15 Credit Hours. 0-15 Lecture Hours. 0-30 Lab Hours.

ECE 4000 GTREP 4000
1-15 Credit Hours. 0-15 Lecture Hours. 0-30 Lab Hours.

ECEG Early Childhood

ECEG 7100 Early Childhood Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Review of research, programs, and strategies in program development of PreK-5 students. Students will develop skills involved in translating concepts into classroom practice.

ECEG 7300 Coastal GA Writing Project
1-6 Credit Hours. 0-6 Lecture Hours. 0-18 Lab Hours.
This course requires extensive and varied writing, running the gamut from notetaking to reflective journals, and from personal narrative to formal position papers. Students enrolled in the course are encouraged to explore topics of importance and interest.

ECEG 8060 Professional Practices
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed for new teacher candidates seeking P-5 certification. Course addresses legal issues and best practices of pedagogy.

ECON Economics

ECON 1101 Survey of Economics
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Basic concepts of micro- and macroeconomics including supply and demand, economic decision-making, prices and wages, money, interest rates, banking systems, unemployment, inflation, taxes, and government spending.

ECON 1150 Prin of Macroeconomics by WC
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Impact of international trade, international finance, and foreign direct investment on various parts of the world with emphasis on current world economic problems.
ECON 2105 Principles of Macroeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The market mechanism and its relationship to the major institutions of developed economies, current events, and the challenges of globalization; particularly emphasizes informed decision-making about issues of the aggregate economy in a global setting.

ECON 2105M Prin of Macroeconomics by WC
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
ECON 2106 Principles of Microeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analyses the behavior of firms, workers, and consumers in perfectly competitive and imperfectly competitive markets. Particular emphasis is placed on firm behavior and how it is affected by the characteristics of the market.
Prerequisite(s): A minimum grade of "C" in ECON 2105.

ECON 3100 Multinational Econ Enterprises
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Evolution of multinational economic enterprises and their effect on jobs and exports/imports in the U.S. and on the economics of less developed countries.
Prerequisite(s): A minimum grade of "C" in ECON 2105.

ECON 3131 Intermediate Macroeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of forces which determine the level of income, employment, inflation, interest rates, output with particular attention to the effects of government monetary and fiscal policy. Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 3132 International Trade
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of international trade both in theory and practice. The course will cover standard trade theory models from Ricardo to Heckscher-Ohlin, including criticism of the theories. Provides students with the tools necessary to analyze trade and the likely impact of trade on domestic economic policy. Course will focus on microeconomic trade issues.
Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 3231 Intermediate Microeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The market mechanism and its relationship to major institutions. Household decision making and consumer demand. Production, cost and the firm's supply decision. Market structures, market failures and the appropriate role of government policy.
Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 3232 International Macroeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Studies macroeconomic relationships and policies in an open economy. Examines the balance of payments, the foreign exchange market, exchange-rate determination under alternative exchange-rate regimes, and international financial and monetary systems from the macroeconomic perspective.
Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 3460 Economics of Immigration
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Effects of immigration and immigration policy on labor markets, economic growth, education finance, health care finance, old-age retirement, enforcement costs, and federal, state, and local government finance. Focus is primarily on U.S. immigration.
Prerequisite(s): A minimum grade of "C" in ECON 2105 or ECON 2106.

ECON 3480 Economics of Vice
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Economic analysis of markets for goods and services that may be illegal or objectionable by community norms. Topics may include pornography, prostitution, drugs, human trafficking, gambling, corruption, alcohol, intellectual property theft, and cybercrime.
Prerequisite: ECON 2106.

ECON 3630 Economic History of U.S.
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Growth and development of economic institutions in the United States from the colonial period to the present with emphasis on the period since 1860. Developments in agriculture, industry, labor, transportation, and finance.
Prerequisite(s): Completion of HIST 2111 or HIST 2112.
Cross Listing(s): HIST 3630.

ECON 3710 Business and Economic Forecasting
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Concepts in time series analysis such as autoregression, moving averages, stationarity, and cointegration. Applications include topics such as macroeconomic and financial forecasting. Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106 and BUSA 3131 or STAT 2231.

ECON 4030 Special Topics in Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that allows students to pursue further study in a specific topic. Topics for the course may include, but not limited to, sports economics, behavioral and experimental economics, economics of social issues, history of economics thought, game theory, or resource economics.
Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4131 Applied Econometrics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course presents essential methods and tools of empirical analysis used in applied economics. The central theme is estimation and evaluation of regression models and interpretation of the results. Basic guidance on using a leading econometric software package for these purposes is provided.
Prerequisite(s): A minimum grade of "C" in BUSA 3132 or STAT 2232 and ECON 2106 and Senior Standing or permission of department chair.

ECON 4210 Internation Law Exprop/Compens
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the traditional Western view of the right of governments to expropriate foreign-owned property compared to the view of many third-world and Marxist governments expropriating property owned by U.S. citizens and corporations. Focus on arbitration and adjudication processes, as well as the role of the executive and legislative branches.
Corequisite(s): POLS 3260.

ECON 4242 Analyzing Innovation Through Science Fiction
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Analysis of the process, limits, intended and unintended consequences of innovation and technological change through the synthesis of materials in business, economics, and science fiction, broadly defined. Other media and genres may be included.
Prerequisite(s): ECON 2106.

ECON 4331 Money and Banking
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of money, banking, and financial markets with particular emphasis on the impact that monetary policy has on business decision making.
Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4332 Labor Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of wage and employment determination in the labor market. Topics include discrimination, human capital development, labor union, and unemployment. Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.
ECON 4333 Managerial Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Presents the theory of the firm as an aid to business decision-making, examines the employment relationship and incentive structures within and among firms, the make-or-buy decision, and the problems arising from incomplete contracting and opportunism.

Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4334 Transportation Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Provides students with the basic economic analysis of transportation, including the economic theories of transportation and location of economic activity, the history and current status of government regulation of transportation activities, and empirical analysis of the behavior of the transportation industries. Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4335 Public Finance and Public Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of the role of government in a market economy, how governments can efficiently allocate expenditures among the various members of society, the government decision-making process, cost-benefit analysis, government expenditures, and the effects and incidence of taxation. The focus of the course is on the federal government. The course also examines various public policy issues, such as welfare to work programs, health care, and Social Security. Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4336 Industrial Organization and Regulation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An introduction to the scientific study of imperfectly competitive markets. Topics include the causes of market imperfections (economics of scale, barriers to entry, etc.), behavioral and performance responses by firms to market imperfections, and government policy responses to market imperfections (antitrust law and regulation). Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4337 Environmental Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course will apply the basic principles of microeconomics to analyze a variety of environmental and natural resource policy problems. We will examine the causes of natural resource and environmental problems, the consequences of these problems, and measures for dealing with them. We will examine many real environmental and resource problems, including but not limited to, the depletion of oceanic fisheries, tropical deforestation, acid rain, pollution control, and endangered species. Prerequisite(s): A minimum grade of "C" in ECON 2106.

ECON 4338 Health Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course will apply the basic principles of microeconomics and statistics to health and health care markets. Topics addressed using economic theory and empirical methodology include the demand and supply of health care, health care market imperfections, and roles and behavior of physicians, hospitals, health insurers, and the government.

Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106 and BUSA 3131 or STAT 2231.

ECON 4339 Economic Analysis of the Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course examines the effects of legal rules on economic performance. The incentives for individual and firm behavior encompassed in legal rules are analyzed. Topics include legal systems and the economic analysis of property, torts, contracts, corporations, and criminal behavior.

Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4340 International Economics
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.

International monetary relations, different exchange rate systems, the balance of payments adjustment, and a survey of major international financial institutions.

Prerequisite(s): A minimum grade of "C" in ECON 2105.

ECON 4431 Economic Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course examines the economic and social challenges faced by rural areas of the United States and developing countries. The main concern is on what resources rural economies have, and how these resources can be used to sustain economic development. Special attention is given to economic development strategies that emphasize equity in distribution as a goal as well as access to resources by a wide cross-section of citizens.

Prerequisite(s): A minimum grade of "C" in ECON 2105 and ECON 2106.

ECON 4437 Regional and Urban Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course provides an overview of urban and regional economics, including the theories of regional growth and urban development. It also provides a framework for understanding regional economic development and the regional development planning process.

Prerequisite(s): A minimum grade of "C" in ECON 2106.

ECON 4450 Comparative Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Alternate economic systems as they relate to property rights and incentives, centralization, resource allocation, and distribution of income, economic development and economic transition.

Prerequisite(s): A minimum grade of "C" in ECON 2105 or ECON 2106.

ECON 4534 Commercial Risk Management and Insurance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course involves property and liability risks and the effective management of these risks with insurance. Application of property insurance to pure risk exposures including direct and indirect property. Application of liability insurance to general liability and catastrophic liability risks. Current topics in the field of commercial property and liability insurance.

Prerequisite(s): A minimum grade of "C" in FINC 3131.

Cross Listing(s): FINC 4534.

ECON 4550 Public Choice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Application of economic theory and methodology to the study of non-market (political, governmental and other collective) decision making. Causes and consequences of governmental growth, elections, the behavior of bureaucrats, competition among interest groups, and constitutional economics.

Prerequisite(s): A minimum grade of "C" in ECON 3231.

ECON 4631 Eagles on Wall Street
3 Credit Hours. 1 Lecture Hour. 0 Lab Hours.

This course will introduce students to the important topics of Wall Street finance, investment banking, and the financial markets of New York City. Students will meet with executives from the world’s most prestigious banking, investment, and financial services firms. Because New York City (NYC) is one of the most important financial centers in the world, the location and setting will provide an excellent backdrop for the topics covered. Furthermore, NYC offers many venues that can be visited by the class to illustrate and reinforce the concepts discussed in the classroom.

The classroom portion of the course will give students a broad overview of different sectors of the financial world while the travel portion will provide a chance for students to network with established professionals. Students could easily use this experience as a starting point to launch a Wall Street career. Regardless of a student’s intended career path, this course will broaden horizons and introduce students to the many opportunities available on Wall Street and in the field of finance. Expenses specific to the travel portion of the course may vary. Prerequisite(s): A minimum grade of "C" in FINC 3131.

Cross Listing(s): FINC 4631.

ECON 4790 Internship in Economics
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

The student is to work with/f or a manager of the enterprise in a management training or special projects capacity. Management level responsibilities and duties are expected of the student.
ECON 4830 Special Problems in Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that is under the direction of a faculty sponsor. It allows students to pursue further study in a specific topic. Topics for the course may include, but are not limited to, sports economics, behavioral economics, economics of social issues, history of economic thought, or resource economics.
Prerequisite(s): Junior standing.

ECON 4890 Directed Study in Economics
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Designed for independent study and research in selected areas of economics under faculty supervision.
Prerequisite(s): Permission of Department Chair.

ECON 4900 Economic Methods & Sen Thesis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Should be taken the last term available before graduation. Review of the methods and tools of economic analysis culminating in an extensive research report (International Economics track requires a topic related to international economics) which will be evaluated by a departmental committee. Honors senior theses must meet the standards for presentation at a professional conference or submission to a journal.
Prerequisite(s): Completion of ECON 3710.

ECON 5131 Teaching Economics K-12
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in ECON 2105.
Cross Listing(s): ECON 5131G.

ECON 5150G Survey of Econ for Educators
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of macroeconomic, microeconomic, and personal finance topics relevant to the Georgia Performance Standards for teaching economics in grades K-12. Course examples will be drawn from classroom resources available to educators. Students will be expected to develop a portfolio of grade-level appropriate examples for future classroom use.

ECON 5450 Comparative Economic Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the basic tenets of the major economic systems developed in the 19th and 20th centuries. The role of government and politics along with the contributions to economic and political thought of such men as Adam Smith, Karl Marx, John Maynard Keynes, and Milton Friedman.
Cross Listing(s): ECON 5450G.

ECON 5450G Comparative Economic Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the basic tenets of the major economic systems developed in the 19th and 20th centuries. The role of government and politics along with the contributions to economic and political thought of such men as Adam Smith, Karl Marx, John Maynard Keynes, and Milton Friedman.

ECON 6230 Foundations of Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the fundamental concepts and theories of microeconomics and macroeconomics.
Prerequisite(s): Graduate standing.

ECON 7030 Special Topics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that allows students to pursue further study in a specific topic.
Prerequisite(s): Permission of Department Chair.

ECON 7130 Math for Applied Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A review of mathematical concepts that will be utilized in the Master of Science in Applied Economics program. The primary focus will be on getting practice using mathematical concepts that are not necessarily new to the student but which may not have been used for some time. Topics include economic models, set theory, types of functions, comparative statics and differentiation, and constrained optimization techniques.
Prerequisite(s): Permission of Department Chair.

ECON 7131 Microeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the modern study of microeconomics. Examines the economic behavior of consumer households, firms, and goods and factor markets. The efficiencies offered by competitive markets and the costs imposed by deviation from competition are examined.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.

ECON 7132 Macroeconomics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to advanced macroeconomic theory. The first half studies dynamic models of long-run growth: the Salow model, the neoclassical growth model, overlapping generation models, and endogenous growth models; it also discusses long-run policy issues and determinants of cross-country differences in per capital income and growth. The second part of the course focuses on real business cycle models and the micro-foundations for macro models. It examines the nature of short-run fluctuations and the evaluation of macroeconomic policies that aim at stabilization, inflation, unemployment and the national debt.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.

ECON 7133 International Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an analytical framework for understanding economic interaction between independent nations and examining international trade policies. The classical theory is complemented by a new theoretical view in which economies of scale and imperfect competition play an important role in determining international trade patterns and gains from trade.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.

ECON 7232 History of Economic Thought
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a comprehensive study of the development of economic doctrine. Scientific discoveries of important economic theorists will be analyzed in detail. Special emphasis will be placed on the development to the theory of value, and how differences among economists on this topic have served to shape various market and non-market economic systems.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.

ECON 7331 Applied Econometrics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed as a first graduate course in applied econometrics. It teaches how to use regression modeling to examine practical economic problems. Students will learn how to build theoretically sound econometric models, estimate regression equations using statistical software, diagnose and correct specification errors, evaluate and correctly interpret regression results, and draw substantiated conclusions that help recommend economic policies and make managerial decisions.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.
ECON 7322 Applied Econometrics II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a graduate course in econometric techniques commonly used in applied microeconometric analysis. Instrumental variable models are discussed as alternatives to the linear regression model along with diagnostics and specification testing. Additional techniques include simultaneous equation models, cross-section and panel estimations, and models of qualitative choice.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.

ECON 7431 Regional Economic Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with an in-depth understanding of why economic development is important to business growth. Students will also discover the vital role industry plays in the economic development process. This course exposes students to the importance of economic development through case studies exploration, interaction with business leaders and government officials, and the course provides a hands-on look at economic development activities in the area.
Prerequisite(s): Admission to MSAE program or permission of Department Chair.

ECON 8131 Health Economics
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Topics addressed using advanced economic theory and empirical methodology include the demand and supply of health care, health care market imperfections, and roles and behavior of physicians, hospitals, health insurers, and the government.
Prerequisite(s): A minimum grade of "C" in ECON 7131 or the approval of the Department Chairperson or the Master of Science in Applied Economics Program Director.

EDAT Accomplished Teaching

EDAT 6000 Professional Decision Making
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Preparation for making informed decisions about effective practices, assessment of learning, and professional actions that will enable educators to optimize both instructional performance and student achievement. This course will focus on the self-assessment of individual student understanding and application of master teacher outcomes based on National Board for Professional Teaching Standards.

EDAT 6001 Using Assessment to Improve Teaching and Learning
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Advanced study of the critical role of formative and summative assessment implementation and evaluation in an effective standards-based P-12 classroom. The course addresses knowledge of assessment theory and skill in effective practice.

EDAT 6115 Knowledge of Students and Their Learning
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Students will compile artifacts gathered from various courses in the program and reflect on their learning in relation to program standards.

EDAT 6119 Infusing 21st Century Technology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Taught by Columbus State University.

EDAT 6159 Multicultural Studies across the Curriculum
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Examines professional literature, curricula, and teaching practices related to cultural diversity in education settings. Critically examines how traditional education promotes or hinders student success; identifies elements of culturally responsive pedagogy and their application to curriculum development and learning. Includes a 10-hour field experience in which teachers explore the cultural resources of the communities in which they work.

EDAT 6217 Lit & Learn Strat Across Curri
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Taught by Columbus State University.
EDAT 6226 Curriculum Design for Student Achievement
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course is part of the on-line M.Ed. in Accomplished Teaching. Investigates best practices in curriculum development, curriculum alignment reflecting state and national standards, and assessment in ensuring high student achievement. The course explores subject-specific pedagogical content, related content areas, inclusion of resources and technology that enhance curriculum development and implementation in the classroom. Includes a thirty-hour field experience in the public school environment in activities related to curriculum development and alignment. A curriculum development or curriculum alignment project will be submitted as partial requirement for the successful completion of the course. (Course fee required.).

EDAT 7100 Research Methodology in Education Research Methodology in Education
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A survey of education and educationally-related research methods incorporating an applied approach to research design. The ability to read, interpret, conduct and report research is emphasized to improve practice in educational settings.

EDAT 7131 Enhancing Student Performance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will emphasize strategies for selecting and adapting curriculum, instruction, resources, and assessments in order to maximize learning. The course will provide educators with ways to identify, analyze, and use results from multiple performance assessments to plan instruction aimed at enhancing and demonstrating learning. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

EDAT 7132 Framework for Teaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of teaching and learning strategies associated with effective teaching practices. Emphasis is placed upon the relationships that exist between student development, instructional practices, educational environments, continuous reflection and assessment, learning communities, and dispositions of the profession. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

EDAT 7133 Trends, Issues, & Research in Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to help practitioners develop critical frameworks for designing and evaluating educational practices and programs within the context of current trends and issues in education. Emphasis is placed on specific research findings and their application to practice, in addition to the development of analytical and communicative skills needed to improve teaching and learning. Candidates will formulate their own professional goals that will culminate with the presentation of a professional portfolio at the end of the program.

EDCI-EDUCATION GASTATE FRANCHI

EDCI 7660 Practicum I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

EDET Education-GOML

EDET 8010 Reflective Teaching Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introductory course for Educational Specialist Degree. National Board for Professional Teaching Standards are used for candidate’s self-assessment of professional goals that are based upon an understanding and application of a master teacher as leader. This course provides the basis for an individualized program of study by identifying appropriate guided electives.

EDET 8020 Using Assessment and Data
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Techniques for establishing reliable and valid data sources for student, classroom, and school improvement decisions. Candidates learn how to utilize technology tools for educational management.

EDET 8040 Strategic Plan School Reform
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of major theories and evidence-based practices in the design and development of research to evaluate the effectiveness of school-based programs, including curricular, co-curricular, and staff development initiatives for the improvement of student learning.

EDLD Educational Leadership

EDLD 7090 Selected Topics in Educational Leadership
1-3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Participants examine selected topics in the areas of P-12 and postsecondary administration and supervision. Focuses on the specialized needs of administrators, supervisors, and teachers.

EDLD 7331 Foundations of Student Affairs in Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the student services associated with divisions of student affairs in higher education settings. The course is designed to trace the development and understand the philosophy of student services, and to explore the issues that face student affairs professionals in higher education settings. Prerequisite(s): Admission to M.Ed. in Higher Education or permission of instructor.

EDLD 7430 American Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course analyzes the evolution and organization of American higher education. Participants examine the dominant historical, philosophical, and social constructs which impacted American higher education. Consideration will be given to the roles and missions of vocational/technical institutes, 2-year and 4-year colleges, and comprehensive universities. Prerequisite(s): Admission to M.Ed. program or permission of instructor.

EDLD 7431 Higher Education Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Overview of the evolution and organization of American higher education administration. Examines the dominant leadership and managerial themes shaping the nation’s system of post-secondary education. Considers administrative and management precedents that shaped the structuring and management of vocational/technical institutes, 2-year and 4-year colleges, and comprehensive universities.

EDLD 7432 History of American Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an analysis of the historical evolution of American higher education. The course examines the conceptual belief that American higher education is a culmination of historical development which directly influences every aspect of higher education administration. Considers historical precedents that shaped the structuring and management of vocational/technical institutes, 2-year and 4-year colleges, and comprehensive universities.

EDLD 7530 Transformational School Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide an introduction to leadership through a comprehensive overview of the field of educational administration. Transformational leadership, as well as distributed and democracy-centered school leadership, will be studied as a means of leading schools in the 21st century. This course is aligned to the GaPSC Educational Leadership (EL) Standards 1 and 4, Teacher Leader Endorsement (TLE) Standards 2, 4, 7, and LKES Standards 1, 2, and 7.
EDLD 7531 Legal and Ethical Issues in School Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide candidates the opportunity to examine legal and ethical principles and professional norms by promoting the development of an inclusive school climate characterized by supportive relationships, a personalized culture of care, and an equitable and culturally responsive school environment. Candidates in the course will study legal and moral liability of school boards, administrators, and teachers. The goal is to provide school leaders awareness and understanding of their ethical and legal obligations in leading schools with a commitment to serving and providing access to schooling for all, including students, teachers, and parents. The school leader will examine issues concerning local, regional, state, and federal laws and guidelines that may impact the educational leader’s efforts to develop a legally sound and ethical educational institution. The Code of Ethics for Georgia Educators provides a core ethical system for transformational school leaders. This course is aligned to the GaPSC Leadership Program Standards 7 and LKES 4, 7.

EDLD 7532 Managing Human Capital
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide an overview of the system of human resources, including recruiting, selecting, maintaining, and developing school personnel in the democracy-centered school. Candidates will explore, demonstrate, and evaluate the relationships between administrators and other school personnel with an emphasis on empowering human resources in educational settings. Human resources process, procedures and techniques used to facilitate the attainment of state, school district and school educational visions, missions, goals, and objectives will be reviewed and analyzed. A focus on cultural, legal, and ethical issues involved in leading productive teams in democracy-centered schools will be articulated and demonstrated in this course.

EDLD 7533 Mobilizing Communities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide teacher leaders with the opportunity to demonstrate the knowledge, skills, and dispositions essential for democracy-centered school leaders in communicating with various stakeholders. Sensitivity to multicultural needs and an understanding of all communities—both internal and external—provide a foundation for the democracy-centered school leader to provide means of access to the school’s systems. Interacting with internal and external stakeholders as a key role in teacher leadership will be explored and practiced through readings, discussions, seminars, and field-based experiences for the purpose of mobilizing communities in support of teaching and learning. This course is aligned to the Georgia Board of Regents Principles, Georgia Professional Standards Commission’s Teacher Leadership Program Standards, and Council for the Accreditation of Educator Preparation Standards.

EDLD 7534 Leading Innovation and Change
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on knowledge and skills of leading innovation and change. Candidates will understand how problem-solving and decision-making may be utilized in support of innovation, change, learning, and teaching. Stages of innovation and change will be explored in the school/district setting. This course is aligned to the Georgia Board of Regents Principles (Leading Change) (Relationship Development) and the ELCC Standards.

EDLD 7535 Utilizing Data in Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides educational leaders with knowledge, skills, and application of data in the school improvement process in order to promote robust and meaningful curricula and assessment programs and ensure effective and efficient management of the school or district to promote student social and academic learning. Among key competencies that educational leaders need to successfully harness, manage and implement educational change efforts leading to student outcomes is through the use of educational data. This course builds such competencies by equipping candidates with the knowledge, skills and dispositions needed to identify, navigate, discuss, explain, analyze, interpret, and communicate school, district, state, and national educational databases appropriate in school development and improvement processes.

EDLD 7536 Developing Professional Learning Communities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide candidates with the opportunity to examine and apply theory and research related to leadership, motivation, facilitating change, communicating effectively, team-building, and creating and sustaining professional learning communities.

EDLD 7539 Finance for Educational Leaders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will provide participant the means to promote the academic success and personal well-being of every student by ensuring effective and efficient management of the school’s fiscal resources. Candidates examine essential business functions to include budgeting, facilities management, and efficient management of the school’s fiscal resources. Candidates will focus on the development of an electronic portfolio that is evidence-based to meet GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will focus on the development of an electronic portfolio that is evidence-based to meet GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards.

EDLD 7540 Politics of P-12 Public Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides candidates the opportunity to examine and apply theory and research related to leadership, motivation, facilitating change, communicating effectively, team-building, and creating and sustaining professional learning communities.

EDLD 7737 Supervised Field Experience I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
In the EDLD M.Ed. program, transformational school leaders will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. In the EDLD M.Ed. program, transformational school leaders will engage in innovative, performance-based practices aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will focus on the development of an electronic portfolio that is evidence-based to meet GaPSC criteria for certification under the guidance of the Leadership Candidate Support Team (LCST).*125 Clinical Practice/Field Experience Hours are required.

EDLD 7738 Supervised Field Experience II
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
In the EDLD M.Ed. program, transformational school leaders will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. In the EDLD M.Ed. program, transformational school leaders will engage in innovative, performance-based practices aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will have the opportunity to present a completed electronic portfolio that is evidence-based to meet GaPSC criteria for certification under the guidance of the Leadership Candidate Support Team (LCST).*125 Clinical Practice/Field Experience Hours are required.
EDLD 7739 Supervised Field Experience III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In the EDLD M.Ed. program, transformational school leaders will demonstrate skills, knowledge, and dispositions aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. In the EDLD M.Ed. program, transformational school leaders will engage in innovative, performance-based practices aligned with the GaPSC and Leader Keys Effectiveness System (LKES) standards. Candidates will have the opportunity to present a completed electronic portfolio that is evidence-based to meet GaPSC criteria for certification under the guidance of the Leadership Candidate Support Team (LCST). This course is aligned to the GaPSC Leadership Program Standard 1-7 and LKES Standards 1-8.*50 Clinical Practice/ Field Experience Hours are required.

EDLD 8135 Educational Planning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines concepts and theories relating to various forms and approaches of planning at the school district and postsecondary educational levels. Emphasis is placed on specific skills to perform educational forecasting and management techniques to plan for future events.

EDLD 8230 Instructional Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In the EDLD Ed.S., instructional leaders build consensus among all stakeholders of what students should know and do as a consequence of their participation in schools, as well as what it means for students to become well-adjusted, contributing members of society. In this course, leadership candidates will work to build such a vision that can require reconciling possibly competing perspectives among diverse members of the school community. Based on this vision, these leaders will create a plan to implement, monitor, and evaluate impact to promote continuous and sustainable improvement.

EDLD 8231 Planning, Instruction, and Assessment through Transformational Leadership
3 Credit Hours. 3 Lecture Hours. 100 Lab Hours.
Transformational school leaders promote the use of rigorous curricula, which set high expectations for students and are aligned to academic standards. In this course, leadership candidates will develop a plan that seeks to maximize student learning through authentic and differentiated planning and pedagogy, instruction and effective assessment strategies that inform practice. They develop and coordinate these systems in ways that create opportunities to personalize the academic program to meet individual student needs. The effectiveness of implementation and the impact of these systems on student learning are evaluated. The clinical practice embedded in this course is 100 field experience hours. This course is aligned to the GaPSC Leadership Program Standard 2 and LKES Standard 3.

EDLD 8232 Leading Human Capital
3 Credit Hours. 3 Lecture Hours. 100 Lab Hours.
Transformational school leaders support the professional learning of effective, caring teachers and leaders who are able to work with students productively in the classroom and who can collaboratively lead a school or district. In this course, leadership candidates will collaborate with other transformational leaders in building an effective staff with a focus on personnel recruitment, selection, assignment of responsibilities, support, evaluation, and retention. Developing the professional skills of educators involves such activities as coaching, creating supportive conditions, and fostering a learning community. The clinical practice embedded in this course is 100 field experience hours. This course is aligned to the GaPSC Leadership Program Standard 3 and LKES Standard 5.

EDLD 8233 Cultivating School Climate
3 Credit Hours. 3 Lecture Hours. 100 Lab Hours.
Transformational school leaders create healthy, safe, and supportive school environments in which students are known, accepted, valued, and empowered to reach their fullest potential. In this course, candidates will do so by supporting a culture defined by high expectations, trust and a collective sense of responsibility for the academic, social and emotional needs of all students. The clinical practice embedded in this course is 100 field experience hours. This course is aligned to the GaPSC Leadership Program Standards 4 and LKES Standard 2.

EDLD 8234 Building Instructional Capacity
3 Credit Hours. 3 Lecture Hours. 100 Lab Hours.
Education leaders strive to ensure that staff have the requisite organizational resources, time, structures and roles to increase student learning and achievement. In this course, leadership candidates will use innovation in developing class schedules, student and teacher assignments, implementation of instructional technology in the classroom, and plans for allocation of time and space for staff to exchange ideas and collaborate via Professional Learning Communities (PLC). The clinical practice embedded in this course is 100 field experience hours. This course is aligned to the GaPSC Leadership Program Standard 5 and LKES Standard 6.

EDLD 8235 Engaging Stakeholders in School Improvement
3 Credit Hours. 3 Lecture Hours. 100 Lab Hours.
In the EDLD Ed.S., transformational school leaders build and sustain productive relationships with families and other community partners in the government, non-profit and private sectors. In this course, leadership candidates will promote understanding, appreciation and use of the community’s diverse cultural, social and intellectual resources. In doing so, they will communicate regularly and openly with families and community partners, and seek their input and support for continuous improvement efforts.

EDLD 8236 Managing Operations for Viability
3 Credit Hours. 3 Lecture Hours. 100 Lab Hours.
Transformational school leaders are responsible for the effective, efficient, equitable and ethical management of schools and districts. In this course, leadership candidates demonstrate responsibilities that include acquiring and allocating resources, monitoring and addressing internal and external regulatory requirements, developing organizational policies and practices, and other administrative duties that maintain the continued viability of the school or district. The clinical practice embedded in this course is 100 field experience hours. This course is aligned to the GaPSC Leadership Program Standards 7 and LKES Standard 4.

EDLD 8431 Higher Education Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores basic legal precepts and their application to institutions of higher education, primarily using the case study method and discussion. Covers such topics as constitutional mandated of due process and equal protection, non-discrimination in employment and educational programs, privacy openness, contractual relationships with students, tenure and academic freedom, and faculty governance.

EDLD 8432 Higher Education Finance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fiscal management and budgeting practices applicable to higher education institutions are the focus of this course. It is intended for persons seeking a working knowledge of budget development, financial management, and fiduciary control in vocational/technical schools, two- and four-year colleges, and universities.

EDLD 8433 Higher Education Governance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the organizational dynamics of higher education institutions as well as traditional and emerging managerial patterns. The use of organizational models and paradigms enables participants to analyze a variety of contemporary issues and situations in higher education settings.
EDLD 8434 The Community College
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the educational mission of the two-year postsecondary institution (vocational/technical institutes and community college). Particular emphasis is given to the philosophical, pedagogical and organizational underpinnings of two-year institutions with concentration on their historical development, student clientele, and educational mission.

EDLD 8435 Higher Education Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines policy-formation processes in higher education institutions. The skills of policy analysis and policy development, the identification of policy issues appropriate for study at these institutions, and the relationship of policy to all other areas of administration are considered.

EDLD 8436 Grant Development/Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will learn the methods and processes of project development, funding source development, and proposal writing. All grants and proposals developed during the course will be submitted to various foundations and/or government agencies for possible funding.

EDLD 8439 Politics of Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the myth that politics and American higher education exist in separate worlds. Participants will examine the current “press” for institutional change and its political implications for two-year colleges, four-year colleges, and comprehensive universities. Manifestations of political influence systems at the federal and state levels will also be considered.

EDLD 8535 College Student Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines trends and changes in the characteristics of college students and the institutions they attend (cohort changes), research issues related to college impact (student change), and emerging theories and methodologies that address the consequences of attending college. This course intends to provide a broad introduction to research on students in a broad range of developmental and sociological areas.

EDLD 8536 Assessment and Evaluation in Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide an understanding of current assessment and evaluation methods in higher education settings. The course provides students with an introduction to the concept of institutional effectiveness, which focuses on an institution's ability to use planning strategies and evaluation information to assess current performance and plan for improvement. This course will also examine the design and appropriate implementation of assessment evaluation methods as they relate to various accreditation standards within higher education. Prerequisite(s): Admission to M.Ed. in Higher Education or permission of instructor.

EDLD 8630 Planning for Change
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will serve as the introductory course to the Ed.S. Program in Educational Leadership. The course will focus on issues that democracy-centered leaders may face relative to high expectations and school/community relations as part of planning for change. While the focal point will be on how the democracy-centered leader plans for meaningful change in education, the change will be in context with human dynamics and relationships. Participants will examine cultural, ethical and interpersonal issues that affect school climate and resistance to significant change in a democracy-centered school culture. The course is designed to be 1/3 knowledge-based, 1/3 lab-based, and 1/3 performance-based at the district or school level. This course is aligned to the Georgia Board of Regents Principles (7) Performance Management, (9) Leading Change, and (10) Relationship Development and ELCC Standards 1-6. Corequisite(s): EDLD 8631.

EDLD 8631 Implementing Change
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on leading change by having the participants apply change theory in initiating a change effort in the educational setting. After a review of structural and post-structural perspectives, candidates will identify a need with special attention given to the relationship of the change effort to the organizational vision. Candidates will be coached on tools and processes used in implementing change to address the need, as well as coached on how to monitor progress of the change initiative. Skills of leading change will be demonstrated through simulations and lab activities. The course is designed to be 1/3 knowledge-based, 1/3 lab-based, and 1/3 performance-based at the district/school level. This course is aligned to the Georgia Board of Regents Principles (7) performance Management and (9) Leading Change and ELCC Standards 1-5. Corequisite(s): EDLD 8630.

EDLD 8632 Organizational Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus primarily on components of organizational culture, including curriculum and instruction, the technical “core” of the school/ district and leadership. Distributed leadership within the culture of high academic expectations will be examined, as well as school/district climate issues associated with “fluid leadership.” A major emphasis will be on conflict management and motivational strategies for students, faculty/ staff. The course is designed to be 1/3 knowledge-based, 1/3 lab-based, and 1/3 performance based at the district or school level. This course is aligned to the Georgia Board of Regents Principles (5) Organizational Culture and ELCC Standards. Prerequisite(s): A minimum grade of “C” in EDLD 8630 and EDLD 8631. Corequisite(s): EDLD 8737.

EDLD 8633 Curriculum and Instructional Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for the beginning principal/district level administrator to demonstrate best practices in leading curriculum and instruction in the democracy-centered educational setting. The candidates in the course will implement strategies to facilitate curriculum wisdom. Candidates will also identify research-based best practices and strategies in effective schools. Candidates will be immersed in instructional supervision of teaching and learning, including assessment for learning. The course is designed to be 1/3 knowledge-based, 1/3 lab-based, and 1/3 performance based at the district or school level. This course is aligned to the Georgia Board of Regents Principles (1) Curriculum (2) Instruction and ELCC Standards 1,2,3, and 5. Prerequisite(s): A minimum grade of “C” in EDLD 8630, EDLD 8631, and EDLD 8632; a minimum grade of “S” in EDLD 8737. Corequisite(s): EDLD 8634 and EDLD 8738.
EDLD 8634 Managing Operations and Processes
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide candidates with an in-depth look at the essential day-to-day operational management of the school/system, as well as features of day-to-day processes that impact teaching and learning, such as attendance, parent volunteer programs, professional learning programs, the hiring process, staff scheduling, etc. Fiscal policies and procedures will be analyzed from the perspective of aligning resources with instructional priorities. The physical site, including grounds and buildings, will be analyzed from the perspective of state, system, and local school rules, policies, and procedures, as well as aligning the use of facilities with instructional priorities. The course will provide an overview of the safe, orderly and engaging learning environment, as it relates to day-to-day operations. Working conditions will be examined from a best practices perspective. The beginning principal/district office administrator will understand, practice, and implement strategies to facilitate professional learning in a high performing school, where teaching and learning needs define facilities and resource needs. Candidates will identify barriers and interventions to professional learning and development, especially as professional learning relates to operational procedures. The course will emphasize current problems in the management of the learning organization, including, but not limited to, diversity, ethical leadership, politics, and policy in today’s global society. The course is designed to be 1/3 knowledge-based, 1/3 lab-based, and 1/3 performance-based at the district or school level. This course is primarily aligned to Georgia Board of Regents Principles (B) Managing Operations and Processes and ELCC Standards 2, 3, 5.
Prerequisite(s): A minimum grade of "C" in EDLD 8630, EDLD 8631, and EDLD 8632.
Corequisite(s): EDLD 8633 and EDLD 8738.

EDLD 8635 Leading School Renewal
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course allows candidates to develop the knowledge, skills and disposition needed to implement successful school improvement and allow them to lead such process in their own school/school district. Successful school improvement under state and federal mandates requires major and dramatic change in a limited time. Major topics to be covered, among others, include elements of successful school improvement process; benchmarking and correlates of successful schools; building the capacity for change through effective and focused program of staff development; leading the school improvement effort by engaging teachers, faculty, parents, and community members; dealing with barriers against the school improvement process; utilizing technology in school improvement process to improve student outcomes; assessing the school improvement process to identify progress and gaps in student learning; building appropriate school culture for sustainable and lasting school improvement process.

EDLD 8735 Higher Education Practicum
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Participants complete a supervised field experience under the direction of a practicing higher education administrator or supervisor.

EDLD 8737 Residency I
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
In the EDLD Ed.S. program, transformational school leaders will engage in innovative, performance-based practices aligned with the Georgia Professional Standards Commission (GaPSC) and Leader Keys Effectiveness System (LKES) standards. This course will include orientation to the EDLD Ed.S. program, the GaPSC Leadership Standards, the LKES standards, and an overview of field experience requirements (750 hours). Under the guidance of a Leadership Candidate Support Team (LCST), candidates will focus on the development of a performance-based, electronic portfolio to meet GaPSC requirements for Tier II Educational Leadership certification. The clinical practice embedded in this course is 250 field experience hours. Admission into this course is by instructor permission only. *250 Clinical Practice hours are required. Prerequisite(s): Admission to Advanced Doctoral Study (Tier II).

EDLD 8738 Residency II
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): In the EDLD Ed.S. program, transformational school leaders will engage in innovative, performance-based practices aligned with the Georgia Professional Standards Commission (GaPSC) and Leader Keys Effectiveness System (LKES) standards. Under the guidance of a Leadership Candidate Support Team (LCST), candidates will focus on the development of a performance-based, electronic portfolio to meet GaPSC requirements for Tier II Educational Leadership certification. The clinical practice embedded in this course is 250 field experience hours. Admission into this course is by instructor permission only. *250 Clinical Practice hours are required. Prerequisite(s): A minimum grade of "S" in EDLD 8737.

EDLD 8739 Residency III
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
In the EDLD Ed.S. program, transformational school leaders will engage in innovative, performance-based practices aligned with the Georgia Professional Standards Commission (GaPSC) and Leader Keys Effectiveness System (LKES) standards. This course will include orientation to the EDLD Ed.S. program, the GaPSC Leadership Standards, the LKES standards, and an overview of field experience requirements (750 hours). Under the guidance of a Leadership Candidate Support Team (LCST), candidates will focus on the development of a performance-based, electronic portfolio to meet GaPSC requirements for Tier II Educational Leadership certification. The clinical practice embedded in this course is 250 field experience hours. Admission into this course is by instructor permission only. *250 Clinical Practice hours are required. Prerequisite(s): A minimum grade of "S" in EDLD 8738.

EDLD 8830 Directed Study in Educational Leadership
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Participants propose and carry out an independent research project. Projects may be in the areas of P-12 or higher education administration and/or supervision. The approved project will address the specialized preservice/in-service needs of the participant. Prerequisite(s): Instructor permission.

EDLD 8839 Directed Research in Educational Leadership
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Participants complete a fully formulated study in the area of education administration or supervision, and orally defend a written report descriptive of that study. Students are limited to register for this course twice during the program of study. Prerequisite(s): A minimum grade of "C" in EDUR 7130, 8131, and EDUR 8434.

EDLD 9235 Contemporary Issues in Educational Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the two extremes of doctoral study. At one end the student must analyze and synthesize the historical precedents that have provided direction to educational administration, particularly in their (his/her) research area. At the other end the student must hypothesize and conceptualize the current issues that are impacting administrators in complex educational institutions. Such a synthesis will provide guidance in a research agenda and ultimately in dissertation development. Prerequisite(s): Admission to Advanced Doctoral Study (Tier II).
EDLD 9331 Building Leadership Capacity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on building individual and district leadership for effective schools. Candidates will examine leadership behaviors and dispositions from theoretical perspectives to identify ways individual leadership contributes to the development of vision and accomplishment of mission in a school/district setting. Given that leadership is a values-laden profession, dispositions of leadership candidates will be assessed and examined. Effective leadership behaviors in promoting learning and high-performance schools will be considered in light of leadership selection, development, and succession planning. A major component of the course will require development of a personal action plan to guide candidates to implement distributed leadership model within a school/district. 
Prerequisite(s): Admission to Tier II Ed.D. cohort in Educational Leadership (P-12 Education).

EDLD 9332 Organizational Behavior in Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, candidates will review theoretical assumptions and empirical studies in organizational behavior in education. Candidates will be able to describe how assumptions/empirical claims have led (or not led) to dominant structures in American schools (political, economic, and legal dimensions). From the study of three perspectives of organizational culture, including integration, differentiation, and fragmentation, candidates will explore the usefulness of the three-perspective approach in analysis of their school/district culture. In addition, candidates will understand organizational identity to acquire skills to lead school/district to adapt to problems, performance expectations, and global challenges from the external environment that affect culture. Finally, approaches to help manage and change organizational culture will be assessed for utility in school/district settings. Prerequisite(s): Admission to Tier II Ed.D. cohort in Educational Leadership (P-12 Education).

EDLD 9333 Ethics in Educational Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to prepare school leaders to identify and analyze ethical issues in education, with emphasis given to the role of the school leader in fostering an ethos of social justice in diverse communities. The course includes a survey of ethical theories and models for ethical decision-making, with candidates identifying and resolving ethical dilemmas from their own professional experiences. 
Prerequisite(s): Admission to Tier II Ed.D. cohort in Educational Leadership (P-12 Education).

EDLD 9432 Program Evaluation for School Leaders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Program Evaluation covers the theory and practice of systematic investigation of instructional programs, projects, products, and processes. The course is designed to teach practitioners to enhance organizational performance, address quality improvement, or improve school curricula by assessing the effectiveness of endeavors. Prerequisite(s): Admission to Ed.D. cohort in Educational Leadership.
Prerequisite(s): Admission to Tier II Ed.D. cohort in Educational Leadership.

EDLD 9434 Transformative Educational Leadership Practice I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, candidates will examine transformative education and the vision, leadership, and drive that it takes to create innovative and transformative learning experiences. Candidates will briefly examine three major concepts: change, transformation, and creativity, and will spend the majority of time examining how to effectively plan a creative and transformative educational program or intervention at the micro/local level. Overriding questions to be addressed include how it works, what are the forces that facilitate or impede the process of innovation, and what values underlie the overall effort. This first in a series of two courses will introduce and define the nature of change and transformation in education, investigate changes strategies; and, review and refine theories regarding educational transformation. 
Prerequisite(s): Admission to Tier II EdD cohort in Educational Leadership (P-12 Education).

EDLD 9435 Transformative Educational Leadership Practice II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course candidates examine two critical concepts: Transformative Education and Enlivened Learning from a global, interdisciplinary perspective. Candidates will explore current transnational issues relevant to education in relation to how they inform practices of student learning/identity and everyday social relations (e.g., knowledge production, transnational organizations, study abroad, citizenship, media, language, power, and curriculum). In addition, candidates will explore these issues from different critical social justice theoretical perspectives namely anti-racism, post/anti-colonialism, Marxism, disability studies, feminist perspectives, and theories of intersectionality. Key questions in this course will be engaged most directly in relationship to issues of learning and education, while at the same time drawing on broad literature that examines globalization, the nation-state, imperialism, and other social justice issues related to inequities across broader society. Candidates will also examine the practices of critical self-reflexivity, resistance, and healing to pursue social change.
Prerequisite(s): Admission to Tier II EdD cohort in Educational Leadership (P-12 Education).

EDLD 9531 Educational Leadership in the 21st Century
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is planned for current and prospective leaders who seek to learn more about leadership in P-20 education in this new global era. Students will study several theoretical perspectives that have gained some credibility and research basis over the last several decades. Participants will be asked to relate course material to their own current experience and personal goals. The ultimate goal of the course will be to create a personal knowledge base from which to create a plan for developing or refining one’s own leadership outlook as a current or prospective professional in higher education administration. 
Prerequisite(s): Admission to Tier II EdD cohort in Educational Leadership (Higher Education).

EDLD 9532 Higher Education Resource Allocation and Deployment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasis on financial policies, planning, and budgeting; allocation; financial analysis and management, patterns of expenditure, sources of income including grantsmanship, philanthropy, and fundraising. Relationships between educational objectives and resource allocation. 
Prerequisite(s): Admission to Tier II EdD cohort in Educational Leadership (Higher Education).
EDLD 9533 Globalization and Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Candidates will explore the social, educational, economic, and political structures of globalization and the resulting impact on the mission and vision for higher education. Candidates will review major works on how higher education around the world has changed as a result of globalization and how higher education in the United States will meet the challenge to internationalize. Participants will focus on analysis of educational issues on a worldwide basis with opportunities to focus on a particular country and analysis of qualitative research methods as used in cross-cultural and comparative education studies. **Prerequisite(s):** Admission to Tier II EdD cohort in Educational Leadership (Higher Education).

EDLD 9534 Emerging Pedagogical Approaches in Educational Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore and critically examine recent scholarly writing and research on teaching and learning in higher education. Topics will include recent developments in adult education theory, innovations in curriculum design and delivery, best practices in college teaching, student support, and assessment. **Prerequisite(s):** Admission to Tier II EdD cohort in Educational Leadership (Higher Education).

EDLD 9535 Executive Leadership in Higher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will examine the theoretical approaches that define and describe various elements of academic and student affairs environments. Emphasis will be placed on executive-level positions in academic and student affairs administration in postsecondary institutions (e.g., department heads, deans, vice presidents) encompassing the knowledge and skills for current and future leaders in higher education. This course will include analysis and interpretation of research related to higher education, with implications for application of findings for improvement of colleges and universities. **Prerequisite(s):** Admission to Tier II EdD cohort in Educational Leadership (Higher Education).

EDLD 9631 Research Seminar I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course, the first in a series of three, assists the doctoral student with becoming a consumer as well as a creator of academic research. Research Seminar I provides the doctoral candidate with an introduction to the dissertation process to include research and academic writing, the research process, conducting a library search, creating an annotated bibliography, updating IRB certification, identifying a dissertation topic, and writing the introduction to the dissertation. **Prerequisite(s):** Admission to Tier II doctoral study in Educational Leadership.

EDLD 9632 Research Seminar II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The second of a three-course sequence designed to culminate in a comprehensive review of literature. In this second course, students prepare a preliminary review of literature suitable for use (with requisite adaptation) as the Background of the study for a pre-prospectus to include the leadership framework that will guide the study. **Prerequisite(s):** Minimum grade of “C” in EDLD 9631.

EDLD 9633 Research Seminar III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The third in a four-course series, this course will provide students with the opportunity to identify, develop, and construct the Methods (Ch. 3) to be used in their dissertation study. In addition students will identify the appropriate IRB documents relevant to their studies, and prepare said documents for IRB submission at the appropriate time. 3 credit hours.

EDLD 9634 Research Seminar IV
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The last in a four-course series, this course will provide students with the opportunity to complete a fully-developed pre-prospectus will be the culminating project. In addition, during this course students will conduct mock defenses, write the Qualifying for Candidacy exam, and present their completed leadership portfolios.

EDLD 9999 Dissertation
1-7 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The objective of this course is to prepare and assist the graduate student to successfully write and orally defend the Dissertation document. **Prerequisite(s):** Admission to Tier III doctoral degree candidacy.

EDMS Ed Accplish Teach CSU-GML

EDMS 6001 Assessment for Instruction
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Overview and introductory study of the critical role of formative and summative assessment implementation and evaluation in an effective standards-based P-12 classroom. The course addresses knowledge of assessment theory and skill in practice at the basic level of the Extended Georgia Framework for Teaching and is appropriate for students pursing initial teaching certificates. A weekly field experience is a required component of the course.

EDMS 6115 Knowledge of Students
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Interrelationships between human development, teaching and learning, including stage theories of development and age characteristics of learners, and understanding diversity and socioeconomic differences. Meets PSC requirement for teaching children with special needs. Requires 60 hours of field experience. (Course fee required.).

EDMS 6116 Research in Education
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is part of the on-line MAT in Math & Sciences. This course will provide the student with the opportunity to acquire skills, knowledge, and strategies necessary to perform action or educational research. (Course fee required.).

EDMS 6474 Technology as Teach and Learn Tool
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

EDMT Educ Math-GOML

EDMT 7360 Integration Technology in Math Instruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students examine the role of technologies in the teaching and learning of mathematics, with a particular focus on classrooms within urban environments. Course includes hands-on experience with graphing calculators, computer software tools, Internet resources, and instructional materials for integrating technology in mathematics instruction.

EDMT 7560 Theory & Pedagogy of Math Instruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

EDMT 8430 Sociocult/Hist Issues Math Education
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students explore cultural, economic, political, and social structures and discourses as they relate to mathematics, mathematics teaching and learning, and research in mathematics. Course includes an examination of how research in mathematics and mathematics education is framed and enacted within different theoretical frameworks.

EDRD Georgia State Univ Franch
EDRD 7550 Link Literacy Assess and Classroom Instruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Linking Literacy and Classroom Instruction. This course involves advanced study of the planning and managing of classroom literacy events based on assessment information. Emphases include a supervised classroom experience where students (1) examine the ways of recording, analyzing, and using assessment information in daily classroom instruction; and (2) consider cultural, psychological, social, and political issues associated with traditional ability groups and alternative approaches to ability grouping that can be implemented to meet students' needs. Course may extend beyond one term.

EDRD 7600 Theory and Pedagogy in the Study of Reading
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course addresses methodologies and materials used in developmental reading programs. Students analyze strategies, materials, and organizational designs for teaching reading to all students including those representing diverse cultural and linguistic communities.

EDRD 7630 Literacy in the Content Areas
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
EDRD 7650 Individual Literature Assess and Instruction
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
EDRD 8610 Supervision of School Literature Program
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite: three literacy courses and admission to a master's-level degree program or admission to an EdS or PhD program. This course introduces students to organization, administration, and supervision of school (p-12) literacy (reading, language arts, English) programs. Students examine roles of literacy personnel, and address methods of program evaluation and ways to achieve change in literacy programs.

EDSC Sci for Teachers

EDSC 5131 Earth Science I
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Earth Science I is a survey of the natural processes at work on the Earth, including processes and history of the atmosphere, lithosphere, hydrosphere, and biosphere of the Earth. Materials comprising the Earth's crust (minerals and rocks) will be examined. This course is designed to fulfill the requirement for a one-semester, science lecture and laboratory course.
Cross Listing(s): EDSC 5131G.

EDSC 5131G Earth Science I
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Earth Science I is a survey of the natural processes at work on the Earth, including those associated with its oceans, weather and climate. The history of climate change is also covered. This course is designed to fulfill the requirement for a one-semester, science lecture and laboratory course.
Cross Listing(s): EDSC 5132.

EDSC 5132G Earth Science II
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Earth Science II is a survey of the natural processes at work on the Earth, including those associated with its oceans, weather and climate. This history of climate change is also covered. This course is designed to fulfill the requirement for a one-semester, science lecture and laboratory course.
Cross Listing(s): EDSC 5132G.

EDSC 5151 Physics for Teachers: Mechanics and Thermodynamics
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of mechanics and thermodynamics to provide a framework for teachers to introduce or enhance a performance-based physical science curriculum in K-12 education. Students will develop an understanding of Newton's laws and many of the conservation laws. Topics include one and two dimensional motion, forces and Newton's laws, circular motion, rotational motion, momentum, energy, work, thermal properties of matter, and fluid mechanics.
Cross Listing(s): EDSC 5151G.

EDSC 5152 Physics for Teachers: Waves, Electricity and Magnetism
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of waves, electricity, and magnetism to provide a framework for teachers to introduce or enhance a performance-based physical science curriculum in K-12 education. Students will develop an understanding of sound, light, electricity and magnetism. Topics include oscillations, traveling and standing waves, sound, wave and ray optics, electric forces and fields, electric potential and electric potential energy, circuits, magnetic fields and forces, electromagnetic induction and electromagnetic waves.
Cross Listing(s): EDSC 5152G.

EDSC 5161 Space Science for Teachers: Our Earth and Solar System
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of our Earth and Solar System to provide a framework for teachers to introduce or enhance a performance-based space science curriculum in K-12 education. Students will also develop an understanding of the history, methods and physics of solar system astronomy. Topics include motions of the sky, seasons, planetary geology and atmospheres, moons, asteroids and comets.
Cross Listing(s): EDSC 5161G.
EDSC 5161G Space Science for Teachers: Our Earth and Solar System
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of our Earth and Solar System to provide a framework for teachers to introduce or enhance a performance-based space science curriculum in K-12 education. Students will also develop an understanding of the history, methods and physics of solar system astronomy. Topics include motions of the sky, seasons, planetary geology and atmospheres, moons, asteroids and comets.
Cross Listing(s): EDSC 5161.

EDSC 5162 Space Science for Teachers: Stars, Galaxies and the Nature of the Universe
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of stars, galaxies and the nature of the Universe to provide a framework for teachers to introduce or enhance a performance-based space science in K-12 education. Students will also develop an understanding of the history, methods and physics used to construct the modern view of the Universe. Topics include the Sun, the Sun-Earth connection, the Milky Way, special relativity, gravity and black holes, stars and stellar evolution, galaxies and the formation of modern cosmology, dark matter, dark energy and the creation and evolution of the Universe, and the formation of the chemical elements.
Cross Listing(s): EDSC 5162G.

EDSC 5162G Space Science for Teachers: Stars, Galaxies and the Nature of the Universe
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of stars, galaxies and the nature of the Universe to provide a framework for teachers to introduce or enhance a performance-based space science in K-12 education. Students will also develop an understanding of the history, methods and physics used to construct the modern view of the Universe. Topics include the Sun, the Sun-Earth connection, the Milky Way, special relativity, gravity and black holes, stars and stellar evolution, galaxies and the formation of modern cosmology, dark matter, dark energy and the creation and evolution of the Universe, and the formation of the chemical elements.

EDUC 5161 Self-Assessment for the Classroom Teacher
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
EDUC 8105 Hip Hop Pedagogy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
EDUC 2090 PPB Practicum
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
This Pre-Professional Block Practicum is designed to assist students to integrate and apply knowledge gained through class activities in each of the following Area F Pre-Professional Block courses: EDUC 2110, Investigating Critical and Contemporary Issues in Education; EDUC 2120, Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts; EDUC 2130, Exploring Learning and Teaching. This practicum requires the completion of a variety of field-based assignments from each course. Successful completion of this practicum may be used to complete one of the requirements for admission to the Teacher Education Program. This 0-credit course will be completed as part of the Area F Pre-Professional Block. One-credit hour registration is needed only if student does not successfully complete the PPB Practicum course on the first attempt.
Corequisite(s): EDUC 2110, EDUC 2120, EDUC 2130.

EDUC 2110 Investigating Critical and Contemporary Issues in Education
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course engages students in observations, interactions, and analyses of critical and contemporary educational issues. Students will investigate issues influencing the social and political contexts of educational settings in Georgia and the United States. Students will actively examine the teaching profession from multiple vantage points both within and outside the school. Against this backdrop, students will reflect on and interpret the meaning of education and schooling in a diverse culture and examine the moral and ethical responsibilities of teaching in a democracy.
Corequisite(s): EDUC 2090, EDUC 2120, EDUC 2130.

EDUC 2120 Exploring Socio-Cultural Perspectives on Diversity in Educational Contexts
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Given the rapidly changing demographics in our state and country this course is designed to equip future teachers with the fundamental knowledge of understanding culture and teaching children from diverse backgrounds. Specifically, this course is designed to examine 1) the nature and function of culture; 2) the development of individual and group cultural identity; 3) definitions and implications of diversity, and 4) the influences of culture on learning, development, and pedagogy.
Corequisite(s): EDUC 2090, EDUC 2110, EDUC 2130.

EDUC 2130 Exploring Learning and Teaching
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Explore key aspects of learning and teaching through examining your own learning processes and those of others, with the goal of applying your knowledge to enhance the learning of all students in a variety of educational settings. Corequisite(s): EDUC 2090, EDUC 2110, EDUC 2120.

EDUC 3234 Educational Psychology: Sec Ed
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
EDUC 7130 Curriculum, Theories and Design
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A comprehensive overview of the field of curriculum designed to develop the theoretical knowledge competencies and strategies needed by teachers and other curriculum developers at all levels of education to participate in the curriculum change process.

EDUC 8105 Hip Hop Pedagogy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course designed for masters, specialists, and doctoral students interested in connecting the history, politics, economics, and culture of hip-hop to their pedagogical practices. The primary focus of this class will focus on middle school and high school science, history, and literature classrooms but can also be applied to elementary school classrooms as well. Critical and culturally relevant pedagogy will also be a focus of content.
EDUC 8130 Curriculum Theories and Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A comprehensive overview of curriculum orientations and paradigms, theoretical traditions, and emerging complexities within the field of curriculum studies. This course is designed to develop the theoretical knowledge competencies and strategies needed by teachers and other curriculum developers at all levels of education to participate in the curriculum change process.

EDUC 8230 Curriculum Design and Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines multiple theoretical bases and practical processes by which curriculum planning, design and evaluation decisions can be made. Students will have an opportunity to devise and critique their own plans for developing curriculum projects using one or more of these planning perspectives and processes.

EDUC 8605 Critical Media Literacy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical Media Literacy examines the social, cultural, political, and economic forces that influence and are influenced by our media systems. This interdisciplinary course will situate media as a pedagogical location in the political economy, and therefore, examine the educative and mis-educative possibilities. This interdisciplinary course includes the following topics: the history of media, media ownership, identities negotiated through media, democracy and media, cultural intervention through media, rhetorical practices in media, audience studies, media production, digital media and the teaching and learning of media literacy.

EDUC 8632 Curriculum and Pedagogy for Social Justice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This capstone course synthesizes theory and research for social justice and provides a framework within which students can demonstrate their abilities to conceptualize a social justice curriculum to apply to their specific teaching contexts. It provides a synthesis of social justice education concepts and places emphasis on students' abilities to develop theoretically sound and culturally sustaining curricula that are directly applicable to their diverse teaching contexts. Students who successfully complete this course will demonstrate sociopolitical consciousness in their curriculum development and will evidence through their curriculum design, an integrated understanding of the importance of community and other funds of knowledge, curricular knowledge, and ongoing professional development in fostering culturally sustaining and just curriculum and pedagogy for racially, culturally, socioeconomically, and linguistically diverse learners.

Prerequisite(s): Admission into Curriculum and Pedagogy for Social Justice certificate program and permission of advisor and instructor.

EDUC 8633 Social Justice Inquiry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This capstone course provides a practical experience of exploring multiple forms of curriculum inquiries directed to personal and professional concerns in the real lives of the enrolled teachers. Teachers will engage in dialogue with colleagues in schools, communities and society. This course is designed to prepare students for the candidacy exam in the field of curriculum studies. Students will be introduced to the leading edge of curriculum scholarship. Prerequisite(s): Permission of Instructor.

EDUC 9130 Contemporary Curriculum Theorists
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course in contemporary curriculum theorists in which students will explore the histories and the works of contemporary leaders in the field of curriculum studies. Students will be introduced to the leading edge of curriculum scholarship. Prerequisite(s): Permission of Instructor.

EDUC 9131 Inquiry and Development of Educational Practices
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide the doctoral candidates with a critical understanding of the diversity of roles of professionals in education. This course will focus on exploring the dimensions of inquiry as it supports, enhances, and strengthens the development of educational practice in a variety of settings. Doctoral candidates will develop the skills and competencies in the research and design of grant and presentation proposals, as well as in the reflective analysis of teaching and professional growth. Course will include a field component.

Prerequisite(s): Ed.D. admission.

EDUC 9132 Critical Reading in Curriculum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced seminar for doctoral students offering an in-depth study of a specific topic in Curriculum Studies.

EDUC 9230 Power and Schooling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores competing analysis of power and the relationships of these analyses to schooling. Topics include structural, poststructural, Marxist, neo-Weberian, feminist, conflict, and/or critical analysis of power and the process of schooling. Students will read both original writings and interpretive works addressing three or four major theoretical positions of the topic of power.

EDUC 9232 Forms of Curriculum Inquiry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of major research within the field of curriculum studies, along with an analysis of the varied forms of inquiry used in this research, including philosophical, practical, historical, empirical, theoretical, critical, deliberative and action inquiry, among others.

Prerequisite(s): EDUC 9631 and EDUF 9133.

EDUC 9233 Advanced Critical Pedagogy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course engages in critically examining the representations, ideologies, and power structures that influence teaching and learning in their disciplines and grade levels in the United States and globally, including elitism/classism, racism, sexism, homophobia, ableism, and colonialism/imperialism. Candidates will reflect on the relationships between school and society, particularly the ways that institutional forces impact teacher and student lives, influence choices about curriculum and instruction within specific disciplines, and shape the cultures of their classroom, school, and community.

Prerequisite(s): EDD admission.

EDUC 9630 Doctoral Writing Seminar I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to prepare students for the candidacy exam in three areas: curriculum studies foundations, research and inquiry, and curriculum and pedagogy.

EDUC 9631 Advanced Seminar in Curriculum Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of major curriculum theories, their adequacy and merit. These theories will be studied in their originator's own words from the writings of the theorists themselves.

Prerequisite(s): EDUF 9133.

Corequisite(s): EDUC 9632, EDUC 9636.
EDUF 9632 Doctoral Writing Seminar II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for doctoral students to write a draft of the dissertation pre-prospectus which includes diving into life and writing into contradictions in research phenomena; naming key research issues/questions/purposes; reflecting upon the autobiographical roots of inquiry; positioning research in theoretical, methodological, and social contexts/contexts of study; reviewing related literature; building the research design [theoretical framework, descriptions of participants and research site(s), data collection/story gathering/composing field text, data management/organizing stories, data/narrative analysis, and data representation/composing research text based upon reachable stories and narrative analysis]; and defining the value: significance, challenges/limitations, implications, and future directions.
Prerequisite(s): A minimum grade of "C" in EDUR 9231.

EDUF 9633 Research Seminar in Curriculum Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explorations and independent research for students in the area of Curriculum Studies for students pursuing the Ed.D. in Curriculum Studies.
Prerequisite(s): Admission to EDD in Curriculum Studies.

EDUF 9636 Advanced Seminar in Forms of Curriculum Inquiry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an examination of contemporary research literature in curriculum studies and exploration of multiple forms of inquiry and modes of expression and representation within the field of curriculum studies and their potentials for the advancement of curriculum theory and practice in an increasingly diversifying and contested world, including philosophical, historical, empirical, theoretical, critical, multicultural/multilingual/multicultural, subaltern, indigenous, art-based, auto/biographical, documentary, oral history, speculative essay, fiction, story, play, poetry among others. This course will serve as a required advanced seminar for students to explore forms of curriculum inquiry and modes of expression and representation relevant to their dissertation research.
Prerequisite(s): A minimum grade of "C" in EDUC 9232 and EDUR 9232.

EDUC 9999 Dissertation
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Readings and research under the direction of a member of the education faculty whose interests coincide with those of the student.
Prerequisite(s): Admission to EDD Candidacy.

EDUF Educational Foundations

EDUF 1230 Education, Society and Learners
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Education of youth is one of the foremost responsibilities of any society and greatly impacts the future well being of the society. As a member of a society, an employer, a parent, a taxpayer, the future of our society depends upon the quality of the job done in the education of its youth. This course utilizes both psychological and sociological foundations of education to enable students to understand and participate in these important social and political debates.

EDUF 2090 Special Topics in Educational Foundations
3 Credit Hours. 0-3 Lecture Hours. 0 Lab Hours.
Designed to provide specialized coursework to meet the needs of students. Attention will be directed toward a wide range of topics as they relate to education.

EDUF 2121 Human Growth and Development
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the study of growth and development of the person from conception through adolescence. Particular aspects of development, such as physical, social/personality, emotional, intellectual, and moral development and the relationship of these aspects of development to learning and achievement in school will be addressed.

EDUF 3040 Childhood Development from Prenatal Period to Adolescence
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the development of social, emotional, cognitive, language and physical processes from the prenatal period to adolescence. Emphasis will be placed on connecting theories, research and concepts to applied settings involving work with children.

EDUF 3131 Assessment for Differentiated Instruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of this course is to provide advanced preparation in a variety of evidence-based, best practice assessment techniques for differentiating learning. The course will provide pre-service P-5 teacher candidates with the knowledge and skills to create, implement and interpret developmentally appropriate valid and reliable traditional and alternative forms of assessment, as well as standardized assessments. Differentiation principles will be utilized for developing assessments, interpreting assessment data, and planning instruction. Prerequisite(s): Admission to the Teacher Education Program.

EDUF 3232 Educational Psychology: General
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will examine psychological principles of learning, cognition, motivation, behavior and the practical implications of these principles for teaching, learning, and assessment. The development of skills to interpret behavior and classroom interaction within a framework of psychological theory will be a major feature of the course.
Prerequisite(s): Junior standing and admission to Teacher Education Program; completion of pre-professional block or equivalent.

EDUF 3234 Educational Psychology: Secondary Education
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Examines psychological principles of learning, cognition, motivation, behavior and the practical implications of these principles for teaching, learning, and assessment. The development of skills to interpret behavior and classroom interaction within a framework of psychological theory will be a major feature of the course. Requires an additional lab component.
Prerequisite(s): Junior standing and admission to Teacher Education Program.

EDUF 6235 Multicultural Elementary Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of multicultural education through a focus on the historical, sociological, and philosophical foundations of elementary education. Special emphasis is placed on the role of ethnicity in the development of the United States and its education system. Includes an overview of multicultural/multilingual curricula with a special focus on culturally linguistically responsive instruction for elementary learners.

EDUF 7090 Selected Topics in Educational Foundations
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Readings and research under the direction of a member of the educational foundations faculty whose interests coincide with those of the student.

EDUF 7130 Learning Theories and Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the principles and theories of learning that serve as a basis for educational models, practice, and assessment. Special emphasis is given to recent empirical findings and to practical applications of theory to a variety of educational settings. This is a three credit hour class. Cross Listing(s): FRLT 7130.
EDUF 7131 Assessment and Management of Elementary Learners
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Assessment and Management emphasizes research-based strategies for assessing student growth and promoting positive classroom environments to enhance student performance. The purpose of this class is to review the major principles of classroom assessment and classroom management, and to teach students to apply these principles in culturally and developmentally appropriate ways. The course provides instruction in identification and development of different forms of classroom assessment, development of learning targets with attention to curriculum alignment within school contexts, and promoting student engagement through the development of positive classroom environments to encourage student growth. The course provides teachers with ways to identify, design, analyze, and use results from student assessments to diagnose problems, improve teaching, and to enhance student learning in culturally responsive ways, as well as means to promote student engagement with a focus on treating students with dignity and respect and the effective use of prevention strategies. Helping future teachers come to understand how to maintain a successful classroom and create accurate assessments is central to their success in education.

EDUF 7132 Critical Approaches to Early Childhood Development and Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical Approaches to Early Childhood Development and Learning examines classic and contemporary approaches to early childhood development and learning and their application in the learning environment. The purpose of this class is to examine the major principles associated with these theories and to teach students to apply these principles in culturally and developmentally appropriate ways. Students will begin the planning process as they research and report on the context for learning and learner characteristics and plan for learning experiences that address these characteristics. A field component will accompany this course.

EDUF 7133 Instruction-Based Assessment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Instruction-based assessment emphasizes research-based strategies for assessing student learning. The purpose of this class is to review major principles of classroom assessment and data literacy. The course provides instruction in identification and development of different forms of classroom assessment and the development of learning targets with attention to curriculum alignment within school contexts. Classroom-based data are employed to diagnose learning difficulties, improve teaching, formulate effective instructional interventions, and measure student progress and change over time. This course facilitates need-based and developmentally appropriate approaches in relation to the scope and sequence of the curriculum.

EDUF 7134 Classroom Assessment and Data Literacy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course emphasizes evidence-based strategies for measuring student progress and change over time and for using the data from these assessments. The course provides instruction in identification and development of different forms of classroom assessment and provides teachers with ways to identify, design, analyze, and use results from student assessments to diagnose problems, improve teaching, and to enhance student learning. The course will place a special emphasis on developing high-quality summative assessments, the interpretation and use of summative assessment data for instructional decision making and the interpretation of standardized assessment data.

EDUF 7140 Learning, Cognition, and Curriculum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This three-hour course examines principles and theories of human cognitive processes on education and determines how this knowledge can be best applied to the development of skills for instruction and assessment of students. Individuals will explore political, social, economic, and cultural contexts of monitoring and evaluating the implementation of a standards-based curriculum and develop an understanding of transformative curriculum leadership that empowers teachers and helps them to accomplish emancipatory teaching and learning.

EDUF 7150 Learning Theories and Assessment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the principles and theories of learning that serve as a basis for educational models, practice, and assessment. Special emphasis is given to recent empirical findings and to practical applications of theory to assessment in elementary school settings. Learning theories and assessment practices are integrated to teach students to make informed instructional decisions and enhance student learning. The course focuses on the application of content to authentic learning experiences in elementary school classrooms.

EDUF 7230 Understanding Diverse Students through Case Study
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course utilizes case study approach to enhance educator’s understandings of the assets and needs of the culturally and linguistically diverse students with whom they work. A series of lessons will be developed and implemented to connect findings from the case study to current research.

Prerequisite(s): Admission to College of Education Graduate Program.

EDUF 7233 School and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the contributions of the social sciences to debates about the interrelated nature of school and society. Focuses particularly on a theoretical examination of the purposes of education and schooling in a democratic society.

EDUF 7235 Multicultural Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Using an interdisciplinary approach, this seminar investigates underlying theoretical concepts and social assumptions that both inform and impede efforts in multicultural education.

EDUF 8131 Theories of Adolescence
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The rapidly changing world of today’s adolescents and the ever-changing nature of the field of adolescence will be examined from three perspectives: theory, research and contemporary social forces. This course will be eclectic in its orientation. Rather than adopting one theoretical position, various views will be discussed. Similarities and differences among theories will be examined, in addition to an analysis of strengths, weaknesses, and contributions of each, as well as the implications for educating, guiding and working with adolescents.

EDUF 8133 Interaction and Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines views of learning which emphasize the importance of interaction, authenticity and the social construction of knowledge. Students will also explore instructional practices and assessment issues consistent with these perspectives. Relevant theories, research, and practical implications will be examined for each perspective addressed. Perspectives and practices which will be explored may include, but are not limited to, constructivism, situated cognition, the social formation of mind, cooperative learning, and authentic assessment.

EDUF 8134 Models of Motivation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critically examines how contemporary models of motivation are utilized to improve the delivery of instruction. Special emphasis is placed on the theoretical principles, empirical research and educational strategies involved in the design and implementation of motivational models.
EDUF 8135 Thinking and Problem Solving  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines current conceptions and models of critical thinking and creative problem solving as they relate to learning and instruction. Emphasis will be given to how instructional practices can positively affect students’ thinking skills and dispositions for learning and to methods designed to increase students’ awareness and control of their thinking processes. In addition, the course will evaluate the effectiveness of current programs designed to teach critical thinking and problem solving strategies across the curriculum and within specific content areas.  
Prerequisite(s): A minimum grade of “C” in EDUF 7235.

EDUF 8136 Theories of Human Development  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines theories of human development, with a focus on infancy to adolescence. Major theoretical perspectives pertaining to several aspects of development, such as cognitive, social, moral, emotional and personality development, will be considered. In addition, students will gain an understanding of the value of theories in general, as well as the particular characteristics of a good theory, in order to critically evaluate these theories in light of empirical research evidence.  
Prerequisite(s): A minimum grade of “C” in EDUF 7235.

EDUF 8231 Global Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course focuses on the analysis of theories and practices of transformative educational reforms and changes in various countries in the era of globalization, cultural interrelatedness, and interdependence of the world.  
Prerequisite(s): A minimum grade of “C” in EDUF 7235.

EDUF 8233 Regional Issues In Multicultural Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This field based course will involve students in researching the local multicultural educational needs, issues, and problems and developing strategies for constructing a pluralistic and culture-tolerant environment in the schools and/or communities of the region.  
Prerequisite(s): A minimum grade of “C” in EDUF 7235.

EDUF 8236 International Study of Educational Practices  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course offers students the opportunity to examine educational practices of another country through travel abroad, involvement in international initiatives, and/or use of technology. Students will be asked to reflect on the American educational system -- theoretical perspectives, curriculum, instructional methodologies, and comparative issues and trends -- to compare and contrast it with another country’s educational system. Topics will be investigated through selected readings, observations, participation, and discussions.  
Prerequisite(s): A minimum grade of “C” in EDUF 7235.

EDUF 8631 Foundations for Social Justice Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is a sustained inquiry into the historical and theoretical foundations of social justice education with a focus on connections between these foundations and contemporary struggles to overcome educational inequities. This course provides students with opportunities to learn about and reflect on theories and concepts related to social justice education and the application of social justice praxis within formal and informal educational contexts. A main objective of this course is to provide students with an accessible framework through which they can understand and disrupt interlocking systems of oppression and injustice within and beyond the formal educational environment that negatively impact the educational experiences and outcomes of racially, culturally, socioeconomically, and linguistically diverse learners.  
Prerequisite(s): Admission into the Curriculum and Pedagogy for Social Justice certificate program and permission of advisor and instructor.

EDUF 8831 Philosophies of Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
In this course, students study the major philosophical schools of thought which inform all educational activities. Particular attention is given both to current and historical writings, and the relationship of philosophical assumptions to current practices in the process of schooling.  
Prerequisite(s): EDUF 8831 or permission of instructor.

EDUF 8890 Directed Individual Study in Educational Foundations  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Readings and research under the direction of a member of the educational research faculty whose interests coincide with those of the student.  
Prerequisite(s): EDUF 8831 or permission of instructor.

EDUF 9131 Ethical Dimensions of Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Develops an understanding of ethical obligations and considerations within the field of education through case studies immediately applicable to their professional lives. Students will explore traditional ethical systems, such as Consequentialism and Situationism, as well as more contemporary perspectives including those of equity and technology.  
Prerequisite(s): EDUF 8831.

EDUF 9132 History of American Curriculum  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An advanced course in curriculum studies designed to provide an in-depth analysis of the major historical curriculum documents, trends and reform movements that have given form and shape to the American public school curriculum. Special emphasis will be given to the interpretation and critique of the competing curriculum discourses, especially as they appear in primary source historical curriculum documents, state/local curriculum guidelines and textbooks.  
Prerequisite(s): EDUF 9132.

EDUF 9133 Theories of Educational Inquiry  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An advanced seminar in the field of curriculum investigating the major paradigms within which the competing methodologies of empirical educational inquiry are grounded and the epistemological and ethical issues involved in conducting research within each paradigm.  
Prerequisite(s): EDD admission.

EDUF 9234 History of American Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Focuses on the social, political, economic and ideological forces that have shaped the growth and development of the American public school system from colonial times to the present. A special emphasis will be an analysis and critique of the purpose, structure, function and results of the various school reform movements in American history.

EDUF 9631 Seminar in Cultural Studies  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This advanced seminar investigates contemporary questions and movements in the field of cultural studies.  
Prerequisite(s): EDUF 7235.

EDUR Educational Research  

EDUR 7130 Educational Research  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an undergraduate introductory course in educational research. Research designs, methods and applications of research specific to investigations while working in schools will be explored. Practical informal and formal data collection approaches are assigned to illustrate techniques teachers use when compiling data to inform their practice.  
Prerequisite(s): Permission of Instructor.

EDUR 7130 Educational Research  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A comprehensive overview of topics related to research as it is applied to educational settings. Emphasis is placed upon methods of quantitative and qualitative research, especially in regard to applied and basic research in education.  
Cross Listing(s): FRER 7130.
EDUR 7140 Action Research in Elementary Settings
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a graduate-level survey of action research methods with an emphasis on fundamental comprehension of educational research for ready application and transfer to elementary education settings.

EDUR 7999 Thesis/Research Project
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Requires completion of an independent research project on topic approved by faculty advisor/committee.
Prerequisite(s): Permission of instructor.

EDUR 8131 Educational Statistics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics covered in this course include central tendency, variability, distributions, correlation, significance testing, t-tests, linear regression and chi-square analysis. Emphasis is placed on application of statistics in educational research situations. Prerequisite: EDUR 7130 or equivalent or permission of instructor.

EDUR 8132 Educational Statistics II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is an advanced statistics in education course that extends knowledge of educational research situations and statistical procedures beyond EDUR 8131. Emphasis is placed on more complex analysis of variance procedures (e.g., repeated measures, analysis of covariance), multiple regression analysis and multiple dependent variable techniques (e.g., canonical correlation) as applicable to current educational research problems. Prerequisite(s): Minimum grade of "B" in EDUR 8131.

EDUR 8231 Applied Qualitative Research Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide practical experience applying qualitative research methods in a variety of settings. Topics addressed in the course include selecting participants, conducting observations, creating descriptive field notes, interviewing techniques, analyzing qualitative data, and writing qualitative reports.
Prerequisite(s): A minimum grade of "C" in EDUR 7130.

EDUR 8331 Applied Measurement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide an introduction to concepts and practices in measurement and survey research. Practical applications of measurement -- such as interpreting standardized test scores, constructing and administering tests and questionnaires, and producing evidence for validity and reliability -- will be included.
Prerequisite(s): A minimum grade of "C" in EDUR 7130 and EDUR 8131.

EDUR 8434 Field-Based Educational Research
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed primarily to assist Ed. S. level students in developing a sound research proposal for the conduct of an independent research project required as part of their Ed.S. program. Prerequisite(s): Minimum grade of "C" in EDUR 8131 and submission of a signed topic approval form.

EDUR 8890 Directed Individual Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Readings and research under the direction of a member of the educational research faculty whose interests coincide with those of the student.

EDUR 9131 Doctoral Research Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of this course is for doctoral-level students to gain a firm foundation in educational research prior to enrollment in the more specialized courses in quantitative methods. Students engage in an applied research project that updates their understanding of research procedures (hypothesis generation, sampling theory, instrument construction, measurement concepts and descriptive and inferential statistics). Emphasis is on the "hands-on" application of advanced inquiry skills.
Prerequisite(s): Minimum grade of "C" in EDUR 7130 and EDUR 8131.

EDUR 9231 Qualitative Research in Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines a broad survey of major styles of qualitative/descriptive research, as well as attention to the major field work techniques and problems associated with conducting qualitative research.
Prerequisite(s): Minimum grade of "C" in EDUR 7130.

EDUR 9232 Advanced Qualitative Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced graduate level course in qualitative data analysis for educational research which includes an in-depth treatment of the analytical approaches for each of the major traditions in qualitative research as well as the technologies used to assist in analysis.
Prerequisite(s): Minimum grade of "B" in EDUR 9231.

ELE Early Elementary Edu

ELE 7421 Advanced Qualitative Research
1-6 Credit Hours. 1-6 Lecture Hours. 1-6 Lab Hours.
This course is designed to promote specialized training appropriate to the needs of in-service school personnel. Topics will vary based upon their significance to local school systems.

EENG Electrical Engineering

EENG 3230 Electromagnetic Fields
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of electromagnetic fields theory and applications including Coulomb's law, Gauss' law, Divergence Theorem, potentials, polarizations, conductance, capacitances, boundary conditions, Ampere's law, Biot savart law, Faraday's law, Maxwell's equations, uniform plane and wave propagation.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and prior or concurrent enrollment in ENGR 2334.

EENG 3241 Electric Machines w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
The concepts of electric machines and their operational characteristics are covered with emphasis on different types of DC/AC motors and generators including single-phase and three-phase transformers. The course also includes laboratory activities in support of instruction.
Prerequisite(s): A minimum grade of "C" in all of the following: EENG 3230 and prior or concurrent enrollment in EENG 3345 or EENG 3335.

EENG 3337 Power Systems Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce students to the basic concepts of power systems. Single-phase and 3-phase networks, electric power generation, transformers, transmission lines, and power flow analysis including stability and fault analysis are thoroughly covered. Additional topics dealing with conventional energy sources, electricity market, and regulations affecting the power sector are introduced and discussed. Students are expected to perform power flow simulations using Power World Software and/or other professional programming tools for power system studies.
Prerequisite(s): Prior with a minimum grade of "C" or concurrent enrollment in EENG 3241.

EENG 3340 Microcontrollers with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Fundamental concepts of microcontroller architecture, including the Central Processing Unit (CPU), memory devices (ROM & RAM), Input/output peripheral devices and sensor interfacing. Students learn to write programs in C and Assembly languages used to implement real practical applications using microprocessors. The course includes laboratory activities in support of instruction.
Prerequisite(s): A minimum grade of "C" in ENGR 1732, ENGR 2323 and ENGR 2332.
EENG 3341 Microelectronics with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
A study of the characteristics and design of bipolar junction and metal oxide semi-conductor integrated circuit devices with emphasis on commercial and industrial applications including operational amplifiers, digital logic, and solid state memory. Prerequisite(s): A minimum grade of "C" in (EENG 3345 or EENG 3335) and CHEM 1310 or equivalent.

EENG 3345 Circuit Analysis II with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
The course focuses on advanced topics in circuit analysis and design. Topics include Phasor analysis, three-phase systems, AC steady-state power, transformers, transfer functions, Bode plots, passive and active filters, Laplace and Fourier transforms, and two-port networks. Prerequisite(s): A minimum grade of "C" in ENGR 2334.

EENG 3420 Linear Systems
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The mathematical foundations and modeling techniques to solve linear systems are covered in this course. Topics include vectors and matrices, eigenvalues and eigenvectors, Fourier series, Fourier transform, Laplace transform, and Z-transform. Several engineering applications in control and communication systems are provided. Prerequisite(s): A minimum grade of "C" in MATH 3230 and prior or concurrent enrollment in EENG 3345.

EENG 3421 Advanced Engineering Analysis
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course offers introduction to the basic concepts of probability within engineering systems such as discrete and continuous random variables and their properties. This course also introduces the basic concepts of statistics and design of experiments such as randomization, replication, blocking, hypothesis Testing, Z-test, t-test, ANOVA, pair-wise comparisons, and randomized complete block designs. Matlab and Minimlab software are used to support instruction. Prerequisite(s): A minimum grade of "C" in MATH 2242.

EENG 4620 Senior Project I
2 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course is the first sequence of a two-semester long capstone project with emphasis on project research, design, simulation, development and team work, under real engineering constraints. Topics include background and state-of-the-art research on the particular topics of the projects, tasks scheduling, project management, and the research of ethical, environmental and sustainability issues related to the project. Students are required to work in teams, conduct research and start basic project design under the direction of a faculty advisor. Prerequisite(s): A minimum grade of "C" in EENG 3340 and prior or concurrent enrollment in EENG 3341 and (EENG 5431 or 5540).

EENG 4621 Senior Project II
2 Credit Hours. 0.1 Lecture Hours. 0.2 Lab Hours.
This course is the second sequence of a two-semester long capstone project with emphasis on project implementation. Students continue the implementation process of their projects including CAE/CAD software development, program writing, printed circuit board fabrication, systems testing, and performance evaluation. Course requirements include weekly progress meetings, oral presentations, a comprehensive final report, and a final project demonstration. Prerequisite(s): A minimum grade of "C" in EENG 4620.

EENG 4890 Directed Study in Electrical and Computer Engineering
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An individualized study involving research and applications pertaining to Electrical Engineering or Computer Engineering. Prerequisite(s): Prior study form as approved by instructor.

EENG 5090 Selected Topics in Electrical and Computer Engineering
1-4 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
Students in this course will have the opportunity to study selected topics in Electrical Engineering or Computer Engineering not currently offered by these programs. Prerequisite(s): Permission of Instructor. Cross Listing(s): EENG 5090G.

EENG 5090G Selected Topics in Electrical and Computer Engineering
4 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
Students in this course will have the opportunity to study selected topics in Electrical or Computer Engineering not currently offered by these programs. Graduate students will complete advanced research beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery of the subject with additional required deliverables representative of graduate work, as determined by the instructor. Prerequisite(s): Permission of instructor. Cross Listing(s): EENG 5090.

EENG 5234 Nuclear Power System Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the basic principles, technologies and components of nuclear power systems. It provides a broad scientific and technological understanding of nuclear energy and the nuclear fuel cycle, understanding of economic, environmental, and political issues that influence the nuclear fuel cycle. This course focuses on nuclear power systems from an electrical power utility perspective with many of the topics applicable to other large commercial and industrial power systems. Prerequisite(s): A minimum grade of "C" and prior enrollment in EENG 3337. Cross Listing(s): EENG 5234G.

EENG 5234G Nuclear Power System Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the basic principles, technologies and components of nuclear power systems. It provides a broad scientific and technological understanding of nuclear energy and the nuclear fuel cycle, understanding of economic, environmental, and political issues that influence the nuclear fuel cycle. This course focuses on nuclear power systems from an electrical power utility perspective with many of the topics applicable to other large commercial and industrial power systems. Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in EENG 3337 or permission of instructor. Cross Listing(s): EENG 5234.

EENG 5235 Converters Control Techniques
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the basic principles, technologies and components of nuclear power systems. It provides a broad scientific and technological understanding of nuclear energy and the nuclear fuel cycle, understanding of economic, environmental, and political issues that influence the nuclear fuel cycle. This course focuses on nuclear power systems from an electrical power utility perspective with many of the topics applicable to other large commercial and industrial power systems. Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in EENG 3337 and EENG 3420 and prior or concurrent enrollment in EENG 5431. Cross Listing(s): 5235G.

EENG 5235G Converters Control Techniques
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents the needed techniques for analyzing power electronic converters, modeling their dynamics, and designing and synthesizing various types of controllers for them, specifically employed in multiterminal, hybrid ac/dc, smart grids, and their real-time implementation in digital real-time simulation platforms. Prerequisite(s): A minimum grade of "C" in EENG 3337 and EENG 3420 and prior or concurrent enrollment in EENG 5431. Cross Listing(s): 5235G.

EENG 5090G Selected Topics in Electrical and Computer Engineering
1-4 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
Students in this course will have the opportunity to study selected topics in Electrical Engineering or Computer Engineering not currently offered by these programs. Prerequisite(s): Permission of Instructor. Cross Listing(s): EENG 5090G.
EENG 5242 Power Systems Protection with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course offers a comprehensive study of methods and devices used in power system protection including relay types, responses, pilot wire, carrier systems, transmission lines, transformers, machines protection, and modern trends in protection technology. This course will review the need for protection of power system elements and explore the development and regulations of smarter, more flexible protective systems applied to modern power grids. Students will learn the trade-offs between reliability, selectivity, speed, simplicity, and economy using real world case studies. A hands-on lab project, using state of the art equipment, will also be completed during the course. 
**Prerequisite(s):** A minimum grade of "C" in EENG 3337 or Permission of Instructor.
**Cross Listing(s):** EENG 5242G.

EENG 5242G Power System Protection w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course offers a comprehensive study of methods and devices used in power system protection including relay types, responses, pilot wire, can-ier sys1e1ns, transmission lines, transformers, machines protection, and modern trends in protection technology. This course will review the need for protection of power system elements and explore the development and regulations of smarter, more flexible protective systems applied to modern power grids. Students will learn the trade-offs between reliability, selectivity, speed, simplicity, and economy using real world case studies. A hands-on lab project, using state of the art equipment, will also be completed during the course. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor. 
**Prerequisite(s):** A minimum grade of "C" in EENG 3337 or Permission of Instructor.
**Cross Listing(s):** EENG 5242.

EENG 5243 Power Electronics with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
A coverage of the concepts of power electronics and converters including the use of thyristors, triacs, timers, logic control circuits, optical devices, and sensors. The course also includes laboratory activities in support of instruction. 
**Prerequisite(s):** A minimum grade of "C" in EENG 3241 and EENG 3341. 
**Cross Listing(s):** EENG 5243G.

EENG 5243G Power Electronics w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
A coverage of the concepts of power electronics and converters including the use of thyristors, triacs, timers, logic control circuits, optical devices, and sensors. The course also includes laboratory activities in support of instruction. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level. 
**Prerequisite(s):** A minimum grade of "C" in EENG 3241 and EENG 3341. 
**Cross Listing(s):** EENG 5243.

EENG 5244 Smart Grids Technology Fundamentals with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course introduces new topics related to distributed generation, micro-grids, renewable energy sources, and smart homes applications. Topics covered include design, modeling, control, and analysis to provide a working knowledge of smart-grid systems. Concepts dealing with computational intelligence, decision support systems, smart metering, optimization, and renewable energy sources are presented and discussed. The laboratory component will provide students with hands-on experience in the utilization of smart-grid technologies and equipment. 
**Prerequisite(s):** A minimum grade of "C" and prior or concurrent enrollment in EENG 3337 or permission of instructor.
**Cross Listing(s):** EENG 5244G.

EENG 5244G Smart Grids Technology Fundamentals w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course introduces new topics related to distributed generation, micro-grids, renewable energy sources, and smart homes applications. Topics covered include design, modeling, control, and analysis to provide a working knowledge of smart-grid systems. Concepts dealing with computational intelligence, decision support systems, smart metering, optimization, and renewable energy sources are presented and discussed. The laboratory component will provide students with hands-on experience in the utilization of smart-grid technologies and equipment. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor. 
**Prerequisite(s):** A minimum grade of "C" and prior or concurrent enrollment in EENG 3337 or permission of instructor. 
**Cross Listing(s):** EENG 5244.

EENG 5330 Network Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to emerging technologies (such as smartphones, wiki, Facebook, YouTube, Twitter) that define our networked life while detailing the underlying engineering concepts governing their operation. This course includes an introduction to the basics of analytical and engineering techniques such as optimization, game/auction theory, graph analysis, and learning as applied to networked technologies. In addition, the course explains the use of these concepts to answer key practical questions pertaining to networks and their impacts on real-world engineering systems. 
**Prerequisite(s):** This course introduces students to emerging technologies (such as smartphones, wiki, Facebook, YouTube, Twitter) that define our networked life while detailing the underlying engineering concepts governing their operation. This course includes an introduction to the basics of analytical and engineering techniques such as optimization, game/auction theory, graph analysis, and learning as applied to networked technologies. In addition, the course explains the use of these concepts to answer key practical questions pertaining to networks and their impacts on real-world engineering systems. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level. 
**Prerequisite(s):** A minimum grade of "C" and prior enrollment in EENG 3421 or permission of instructor. 
**Cross Listing(s):** EENG 5330G.

EENG 5330G Network Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to emerging technologies (such as smartphones, wiki, Facebook, YouTube, Twitter) that define our networked life while detailing the underlying engineering concepts governing their operation. This course includes an introduction to the basics of analytical and engineering techniques such as optimization, game/auction theory, graph analysis, and learning as applied to networked technologies. In addition, the course explains the use of these concepts to answer key practical questions pertaining to networks and their impacts on real-world engineering systems. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
**Prerequisite(s):** A minimum grade of "C" and prior enrollment in EENG 3421 or permission of instructor. 
**Cross Listing(s):** EENG 5330.

EENG 5341 Robotic Systems Design with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
The principles of robotics are introduced with emphasis on mobile robots and applications. Topics include robot mechanical base design, motor control, sensor interfacing, robot navigation techniques and path planning. Students will work in teams to design and build mobile robotic systems for different applications. The course also includes laboratory activities in support of instruction.
**Prerequisite(s):** A minimum grade of "C" in EENG 3340 or MENG 3521 or Permission of Instructor.
**Cross Listing(s):** EENG 5341G.
EENG 5341G Robotic Systems Design w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
The basic elements of robotics are introduced with emphasis on mobile robots and applications. Topics include coordinate transformations, sensors, path planning, kinematics, effectors, and control. Students will work in teams to design and build increasingly complex robotic systems. The course also includes laboratory activities in support of instruction. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 3340 or MENG 3521 or Permission of Instructor. Cross Listing(s): EENG 5341.

EENG 5342 Computer Systems Design with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Digital computers with emphasis on design and simulation are covered including instruction set design, processor implementation, pipelining, cache design, memory hierarchy, and input/output. The course also includes laboratory activities in support of instruction.
Prerequisite(s): A minimum grade of "C" in EENG 3340 or Permission of Instructor.
Cross Listing(s): EENG 5342G.

EENG 5342G Computer Systems Design w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Digital computers with emphasis on design and simulation are covered including instruction set design, processor implementation, pipelining, cache design, memory hierarchy, and input/output. The course also includes laboratory activities in support of instruction. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 3340 or Permission of Instructor.
Cross Listing(s): EENG 5342.

EENG 5431 Control Systems with Lab
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Introduction to classical control theory and applications is presented with emphasis on feedback and its properties including the concept of stability, stability margins, and the different tools that can be used to analyze the system properties. Students will develop a working knowledge of the basic elements of linear control techniques. The course also includes laboratory activities in support of instruction. Prerequisite(s): A minimum grade of "C" in EENG 3420 or Permission of Instructor.
Cross Listing(s): EENG 5431G.

EENG 5431G Control Systems with Lab
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Introduction to classical control theory and applications is presented with emphasis on feedback and its properties including the concept of stability, stability margins, and the different tools that can be used to analyze the system properties. Students will develop a working knowledge of the basic elements of linear control techniques. The course also includes laboratory activities in support of instruction. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 3420 or Permission of Instructor.
Cross Listing(s): EENG 5431.

EENG 5432 Programmable Logic Controllers with Lab
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Topics covered include sequential programmable logic controllers (PLC's) with emphasis on ladder diagrams, input/output devices, networking, and programming design through advanced functions. The course also includes laboratory activities in support of instruction.
Prerequisite(s): A minimum grade of "C" in ENGR 2323 and EENG 3341.
Cross Listing(s): EENG 5432G.

EENG 5432G Programmable Logic Controllers w/Lab
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Topics covered include sequential programmable logic controllers (PLC's) with emphasis on ladder diagrams, input/output devices, networking, and programming design through advanced functions. The course also includes laboratory activities in support of instruction. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 3241 or MENG 3521 or Permission of Instructor.
Cross Listing(s): EENG 5432.

EENG 5433 Machine Learning and Adaptive Control
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Machine Learning is one of the most widely applied technical fields in academia and industry. The class covers fundamental algorithms in machine learning including linear regression, classification, neural networks, support vector machines, clustering, and introduction to reinforcement learning. This course also covers adaptive control algorithms: including direct and indirect adaptive control. Electrical Engineering applications are demonstrated in image processing, autonomous driving, and robotics. Prerequisite(s): A minimum grade of "C" in EENG 3421 and prior or concurrent enrollment in EENG 5431.
Cross Listing(s): EENG 5433G.

EENG 5433G Machine Learning and Adaptive Control
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Machine Learning is one of the most widely applied technical fields in academia and industry. The class covers fundamental algorithms in machine learning including linear regression, classification, neural networks, support vector machines, clustering, and introduction to reinforcement learning. This course also covers adaptive control algorithms: including direct and indirect adaptive control. Electrical Engineering applications are demonstrated in image processing, autonomous driving, and robotics. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 3421 and prior or concurrent in EENG 5431, or permission of instructor.
Cross Listing(s): EENG 5433.

EENG 5434 Engineering Optimization Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course introduces the students to practical optimization methods for solving real-world applications and preparing them for a career in academia and industry. Topics to be covered include linear programming, unconstrained optimization, convex optimization, dynamic programming, and their applications to multiple electrical engineering systems.
Prerequisite(s): A minimum grade of "C" in EENG 3420 and prior or concurrent enrollment in EENG 5540.
Cross Listing(s): EENG 5434G.

EENG 5434G Engineering Optimization Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course introduces the students to practical optimization methods for solving real-world applications and preparing them for a career in academia and industry. Topics to be covered include linear programming, unconstrained optimization, convex optimization, dynamic programming, and their applications to multiple electrical engineering systems. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 3420 and prior or concurrent enrollment in EENG 5540.
EENG 5532 Wireless Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The concepts and techniques of wireless communication systems are covered in this course including propagation channels, communication link analysis, transceivers, signal processing, and multiple access schemes. **Prerequisite(s):** A minimum grade of “C” in EENG 5540 and EENG 3230 or Permission of Instructor. **Cross Listing(s):** EENG 5532G.

EENG 5532G Wireless Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The concepts and techniques of wireless communication systems are covered in this course including propagation channels, communication link analysis, transceivers, signal processing, and multiple access schemes. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level. **Prerequisite(s):** A minimum grade of “C” in EENG 3230 and EENG 5540 or Permission of Instructor. **Cross Listing(s):** EENG 5532.

EENG 5533 Optical Fiber Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course offers introduction to the physics of optical fiber communication components and the applications to communication systems. Topics include light and its behavior in the fiber, fiber attenuation, dispersion and nonlinear effects, laser modulation, photo detection and noise, receiver design, bit error rate calculations, and coherent communications. **Prerequisite(s):** A minimum grade of “C” in EENG 5540 or Permission of Instructor. **Cross Listing(s):** EENG 5533G.

EENG 5533G Optical Fiber Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course offers an introduction to the physics of optical fiber communication components and the applications to communication systems. Topics include light and its behavior in the fiber, fiber attenuation, dispersion and nonlinear effects, laser modulation, photo detection and noise, receiver design, bit error rate calculations, and coherent communications. Graduate students will be required to complete an individual research project not required of undergraduate students. **Prerequisite(s):** A minimum grade of “C” in EENG 5540 or Permission of Instructor. **Cross Listing(s):** EENG 5533.

EENG 5535 Electronic Warfare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the fundamental materials of electronic warfare (EW) including basic mathematical/physical concepts of EW, antenna parameters, various types of antennas, aperture, phased arrays, radar system, radar range resolution, radars range equations, radar wave equation, radar cross section (RCS), propagation, LPI signals, jamming, decoys, and simulation with CST and FEKO software. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor. **Prerequisite(s):** A minimum grade of “C” in EENG 3230 and ENGR 2341. **Cross Listing(s):** EENG 5535.

EENG 5535G Electronic Warfare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the fundamental materials of electronic warfare (EW) including basic mathematical/physical concepts of EW, antenna parameters, various types of antennas, aperture, phased arrays, radar system, radar range resolution, radars range equations, radar wave equation, radar cross section (RCS), propagation, LPI signals, jamming, decoys, and simulation with CST and FEKO software. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor. **Prerequisite(s):** A minimum grade of “C” in EENG 3230 and ENGR 2341 or Permission of Instructor. **Cross Listing(s):** EENG 5535.

EENG 5538 Cybersecurity for Networked Electrical and Electronics Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce emerging topics related to cybersecurity for networked electrical & electronics systems and cyberphysical systems. The course will provide theoretical understanding and practical basis of cybersecurity for networked systems including Shannon's secrecy system, information-theoretic security, wiretap channels, cyber-attacks on electrical and electronics systems (smart power grid, embedded systems, connected electric vehicles, space communications, etc.), general cybersecurity models, jamming and anti-jamming, broadcast/interference channels cooperative secrecy, interference and broadcast channel with confidential messages, cooperative secrecy, and security limits of Gaussian and wireless channels. **Prerequisite(s):** A minimum grade of “C” in all of the following: ENGR 2332 and EENG 3421 or CSCI 5332 or IT 5434 or permission of instructor. **Cross Listing(s):** EENG 5538G.

EENG 5538G Cybersecurity for Networked Electrical and Electronics Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce emerging topics related to cybersecurity for networked electrical & electronics systems and cyberphysical systems. The course will provide theoretical understanding and practical basis of cybersecurity for networked systems including Shannon's secrecy system, information-theoretic security, wiretap channels, cyber-attacks on electrical and electronics systems (smart power grid, embedded systems, connected electric vehicles, space communications, etc.), general cybersecurity models, jamming and anti-jamming, broadcast/interference channels cooperative secrecy, interference and broadcast channel with confidential messages, cooperative secrecy, and security limits of Gaussian and wireless channels. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor. **Prerequisite(s):** A minimum grade of “C” in EENG 2332 and EENG 3421 or CSCI 5332 or ENGR 2341 or IT 5434. **Cross Listing(s):** EENG 5538.

EENG 5540 Communication Systems with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
The theory and principles of communication systems are presented in this course. Topics covered include AM, FM, and PM modulation/demodulation, transmission and reception, noise and random processes, pulse modulation, and digital transmission techniques. Laboratory emphasizes hands-on modeling of modulation and demodulation techniques. **Prerequisite(s):** Prior (with a minimum grade of “C”) or concurrent enrollment in EENG 3421 or Permission of Instructor. **Cross Listing(s):** EENG 5540G.
EENG 5540G Communication Systems Communication Systems w/ Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
The theory and principles of communication systems are presented in this course. Topics covered include AM, FM, and PM modulation/demodulation, transmission and reception, noise and random processes, pulse modulation, and digital transmission techniques. Laboratory emphasizes hands-on modeling of modulation and demodulation techniques. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in all of the following: EENG 3421 and prior or concurrent enrollment in EENG 3420 or Permission of Instructor.
Cross Listing(s): EENG 5540.

EENG 5541 Digital Communications with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Theory and applications of digital communications systems are covered. Topics include ASK, FSK, DPSK, QAM, signaling over AWGN, bandlimited and fading channels, inter-symbol interference, and error-correction codes. The course also includes hands-on laboratory activities in support of instruction.
Prerequisite(s): A minimum grade of "C" in EENG 5540 or Permission of Instructor.
Cross Listing(s): EENG 5541G.

EENG 5541G Digital Communications w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Theory and applications of digital communications systems are covered. Topics include ASK, FSK, DPSK, QAM, signaling over AWGN, bandlimited and fading channels, inter-symbol interference, and error-correction codes. This course also includes hands-on laboratory activities in support of instruction. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): A minimum grade of "C" in EENG 5540 or Permission of Instructor.
Cross Listing(s): EENG 5541.

EENG 5543 Antennas with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course introduces basic concepts of dipoles and monopoles, solution to radiation problems, antenna parameters, different types of antennas, antenna aperture/array theory, radio wave propagation, impact of antenna performance in communication links. The course also includes laboratory activities in support of instruction.
Prerequisite(s): A minimum grade of "C" in EENG 3230.
Cross Listing(s): EENG 5543G.

EENG 5543G Antennas Antennas w/Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course introduces basic concepts of dipoles and monopoles, solution to radiation problems, antenna parameters, different types of antennas, antenna aperture/array theory, radio wave propagation, and impact of antenna performance in communication links. The course also includes laboratory activities in support of instruction. Graduate students will be required to complete additional assignments and a culminating research project commensurate with graduate level work that is not required of undergraduate students.
Prerequisite(s): A minimum grade of "C" in EENG 3230 or Permission of Instructor.
Cross Listing(s): EENG 5543.

EENG 5891G Special Problems in Electrical and Computer Engineering
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course provides for specialized study in the area of Electrical and Computer Engineering not currently offered by these programs. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): As determined by Instructor.
Cross Listing(s): EENG 5891G.

EENG 5891 Special Problems in Electrical and Computer Engineering
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course provides for specialized study in the area of Electrical and Computer Engineering not currently offered by these programs. Graduate students will complete an independent research project which involves a written and oral presentation not required at the undergraduate level.
Prerequisite(s): As determined by Instructor.
Cross Listing(s): EENG 5891.
EENG 7999 Thesis
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course focuses on the preparation and completion of the thesis.
Prerequisite(s): Graduate student standing.

EEXE Exceptional Education

EEXE 7031 Meth/Strat Teach Ld:Read/Writ
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course provides an in depth study of remediation methods and strategies specific to improving reading and written expression skills. Covers skills from pre-kindergarten readiness through secondary school levels.
Prerequisite(s): A minimum grade of "C" in CEUG 3072.

EEXE 7034 Cog & Beha Probs that Dis Lrng
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasis on differentiating characteristics of students with various cognitive and behavioral problems that disrupt learning. Includes etiologies, cultural and social implications of disability and the theories and systems that support assessment, interventions, and support services. Designed for special education majors.

EEXE 7060 Consult/Collabor Partnerships
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
School personnel will be prepared to assume the roles as consultants and multidisciplinary team members. The impact of disability within the family and the mainstreamed setting will be explored.

EEXE 7130 Assessment Exceptional Student
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to and practice with standardized evaluatory tools and teacher-made criterion referenced tests for the evaluation of exceptional students.

EEXE 7401 Lang Dis and Lear Dysfunction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course provides an indepth study of language disorders linked to learning dysfunction. Explores strategies for assessment and remediation.
Prerequisite(s): A minimum grade of "C" in EELE 7150.

EEXE 7510 Ast Tech-Stud w/Multi/Sev Dis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of a wide range of forms of assistive technology including switches, computer use and adaptations, and communication devices. Provides opportunities for candidates to develop devices for use in meeting the needs of students with physical and sensory disabilities.

EGC East Georgia College

EGC 1000 East Georgia College
99 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

ELEM Elementary Education

ELEM 3131 Elementary Curriculum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the teacher candidate to the curriculum, instruction, assessment, and organization of elementary schools serving a preschool through fifth grade population. Emphasis is placed on elementary schools implementing developmentally appropriate practices to meet the diverse needs of the elementary population. Field experience required.
Prerequisite(s): Admission to the Teacher Education Program.

ELEM 3232 Elementary Arts and Literature Across the Curriculum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Teacher candidates will become acquainted with the vast selection of children's literature and critical perspectives for selecting from that variety; and with the theories and processes of creativity and art disciplines. Literature and Arts standards will be explored, along with strategies for incorporating them across the curriculum.
Prerequisite(s): Admission to the Teacher Education Program.

ELEM 3233 Elementary Language Arts Methods
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course incorporates instructional strategies for a variety of methods for developing critical thinking in the areas of literacy and language arts.
Prerequisite(s): Admission to the Teacher Education Program.

ELEM 3732 Elementary Pre-Internship
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This practicum experience is designed to provide the teacher candidate with meaningful opportunities to observe, actively engage in classroom activities, and teach in a supervised P-5 classroom. This experience builds upon ELEM 3131 or SPED 3133 by applying new knowledge of teaching, learning, and assessing through increased field hours. Elementary Education majors will be placed in a general education classroom, and Elementary/Special Education majors will be placed in a special education setting or inclusive classroom.
Prerequisite(s): A minimum grade of "C" in ELEM 3131 or SPED 3133.

ELEM 4090 Special Topics
1.3 Credit Hour. 1.3 Lecture Hour. 0 Lab Hours.
Promotes specialized training appropriate to meet the needs of pre-service teachers. Attention will be given to a range of specific problems as they relate to the elementary, middle, or secondary schools and teaching field.
Prerequisite(s): Approval of advisor, instructor, and department chair.

ELEM 4333 Elementary Mathematics Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines teaching and learning in the elementary mathematics classroom and emphasizes best practice in mathematics instruction and assessment. This course provides the teacher candidate with an understanding of how to make mathematics learning meaningful and appropriate for children in grades P-5.
Prerequisite(s): Admission to the Teacher Education Program.

ELEM 4433 Elementary Science Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to prepare teacher candidates for teaching science in the P-5 classroom. An emphasis is placed on instructional strategies, assessments, technology, materials, and best practices.
Prerequisite(s): Admission to the Teacher Education Program.

ELEM 4533 Elementary Social Studies Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to prepare students for teaching social studies in grades P-5. The goals and definitions related to the early childhood elementary social studies program will be considered. The content of P-5 social studies will be reviewed. Students will become acquainted with appropriate teaching methods, materials, and organizational techniques for providing children with successful learning experiences in social studies.
Prerequisite(s): Admission to the Teacher Education Program.

ELEM 4632 Elementary Internship Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Teacher candidates will reflect upon and analyze issues related to school law, diverse P-5 student populations, classroom management, home and school connections, culturally relevant pedagogy, and issues and trends in education, technology integration, and ethics.
Prerequisite(s): Admission to Teacher Education Program and a minimum grade of "C" in ELEM 4733. Co-requisite(s): ELEM 5799.
ELEM 4733 Elementary Internship I
3 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
This practicum experience is designed to provide the teacher candidate with meaningful opportunities to observe, actively engage in classroom activities, and teach in a supervised P-5 classroom. This experience builds upon ELEM 3732 by further developing planning, instruction, and assessment of diverse learners through increased field hours. Elementary Education majors will be placed in a general education classroom, and Elementary/Special Education majors will be placed in a special education setting or an inclusive classroom.
Prerequisite(s): Admission to Teacher Education Program and a minimum grade of “C” in ELEM 3732.

ELEM 5799 Elementary Internship II
9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Student teaching is a fifteen week period of guided teaching practice in a P-5 classroom setting. Under the direction of a clinical supervisor, the candidate gradually assumes increasing responsibility for classroom instruction and management. During this experience, candidates are expected to engage directly in many of the activities that constitute the wide range of a teacher's assigned responsibilities. The candidate will also assume the full responsibilities of the clinical supervisor for a minimum of four weeks. Elementary majors’ field placements will be in a general education classroom. Elementary/Special Education majors’ field placements will be in a special education setting or general education classroom with students with disabilities.
Prerequisite(s): Admission to Teacher Education Program and satisfactory completion of ELEM 4733. Co-requisite(s): ELEM 4632. Cross Listing(s): ELEM 5799G.

ELEM 6130 Culturally Responsive Classroom Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A research-based approach to managing behavior in a culturally responsive classroom.

ELEM 6250 Language Arts and Creative Activities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores theories, models, and strategies for teaching and learning language arts in the elementary school. Students will identify and apply strategies for teaching reading, writing, listening, and speaking. The integration of the arts into language arts instruction is emphasized.

ELEM 6430 MAT Elementary Science Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to prepare candidates/students for teaching science in grades P-5 based on relevant standards, appropriate instructional methods and materials, organizational techniques, and research to support best practices. Emphasis will be placed on preparing teachers to incorporate appropriate science content, process skills, attitudes, and real-world applications into the science classroom as well as effective and developmentally appropriate ways to teach and assess students, including those with exceptionalities, disabilities, and cultural diversities.

ELEM 6440 MAT Elementary Mathematics Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an overview of the mathematics content and methods used to teach elementary school students. Focuses on a variety of topics, including number and operations, algebraic reasoning, geometry and measurement and data. Emphasis is placed on how such concepts can be effectively taught and assessed in the elementary classroom.

ELEM 6530 MAT Elementary Social Studies Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of social studies instructional methodology and inquiry in the elementary classroom. Critical components and theoretical foundations of the social studies curriculum will be investigated. Students will identify appropriate teaching methods, materials, organizational techniques, and research to support best practices for meeting the needs of diverse learners.

ELEM 6730 Advanced Mathematics Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide an extension of mathematical knowledge base acquired at the undergraduate level that is necessary to provide a firm foundation for mathematics instruction for students in elementary school. Emphasis will be on planning for differentiated instructional strategies and utilizing a wide variety of resources in implementing standards-based mathematics instruction. Prerequisite(s): A minimum grade of “C” in EDUR 7130 or EDUF 7130 or ELEM 7132.

ELEM 6799 MAT Internship II
6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides a semester-long, full-day teaching experience for teacher candidates. Candidates are assigned to public schools and gradually assume all responsibility for the classroom to which they are assigned. Student Teachers participate in classroom teaching, observing, planning and evaluation conferences and other school-related experiences with guidance provided by a clinical supervisor and a university supervisor. Emphasis is placed on appropriate application of educational theory and content knowledge in a P-5 setting through systematic reflexive analysis and critical evaluation of current classroom practices.

ELEM 7132 Effective Curriculum and Instruction in Elementary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides students the opportunity to explore the relationship between curriculum and instruction. How to effectively plan curriculum and instruction for elementary classrooms will be emphasized.

ELEM 7230 Advanced Language Arts Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to build on the graduate students' knowledge of materials and methods of teaching language and literacy in the P5 classroom. Students will examine issues related to language arts instruction and the theoretical background and research base related to these issues. Prerequisite(s): A minimum grade of “C” in EDUR 7130 or EDUF 7130 or ELEM 7132.

ELEM 7232 Children's Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed for the graduate student who has some knowledge of children's literature. Attempts to update the student's knowledge of children's literature in the classroom and media center.
Cross Listing(s): FREC 7232.

ELEM 7233 Teaching Writing in the Elementary School
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students the opportunity for an in-depth examination of both the process and products of writing in P-5 schools. Students will explore the current trends and issues related to the teaching of writing in the elementary school including curriculum and assessment.

ELEM 7234 Teaching Communication Across Cultures
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the principles of culture and addresses communication among educators and students, including youth-at-risk, students in poverty, and English language learners. This course requires a field placement.

ELEM 7330 Advanced Mathematics Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide an extension of mathematical knowledge base acquired at the undergraduate level that is necessary to provide a firm foundation for mathematics instruction for students in elementary school. Emphasis will be on planning for differentiated instructional strategies and utilizing a wide variety of resources in implementing standards-based mathematics instruction. Prerequisite(s): A minimum grade of “C” in EDUR 7130 or EDUF 7130 or ELEM 7132.
ELEM 7332 Problem Solving and Mathematical Representations in the Elementary Classroom
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses the knowledge and skills needed to teach mathematics effectively to students in elementary school classroom settings. Candidates will examine their own knowledge of mathematics, learn how young students think and learn about mathematics, develop a set of strategies and skills that will enable them to create an environment that helps children understand mathematical concepts.

ELEM 7430 Advanced Science Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is an advanced course in science instructional methodology and inquiry-based instruction in the elementary classroom. Emphasizes current issues and trends in science education.
Prerequisite(s): A minimum grade of "C" in EDUR 7130 or EDUF 7130 or ECED 7132.

ELEM 7530 Advanced Social Studies Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course in social studies instructional methodology and inquiry in the elementary classroom. Critical components and theoretical foundations of the social studies curriculum will be investigated. Concepts, skills, and attitudes associated with elementary school social studies will be discussed in conjunction with various teaching methods, models, and materials considered developmentally appropriate and effective for diverse learners in the elementary classroom.
Prerequisite(s): A minimum grade of "C" in ECED 7132 or EDUF 7130 or EDUR 7130 or permission of instructor.

ELEM 7639 Seminar in P-5
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed as a culminating experience for students to integrate educational theory with classroom practice in a P-5 setting. Emphasis is placed on appropriate application of educational theory and content knowledge in a P-5 setting through analysis and evaluation of current classroom practices.

ELEM 7799 Professional Internship
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
Designed for those students who are employed in an approved accredited school setting and who are teaching on a non-renewable teaching certificate. The student completes the course requirements in the classroom where he or she is employed, under the mentorship of a school-based mentor and university supervisor. Emphasis is placed on appropriate application of educational theory and content knowledge in a P-5 setting through analysis and evaluation of current classroom practices.

ELEM 8890 Directed Individual Study
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Provides an opportunity for a student to pursue an area of interest not covered by any existing courses in a guided, independent format. The student is responsible for defining an area of study, course objectives, activities and assessment procedures and identifying a graduate faculty member in the Early Childhood Education department who will supervise the study.

EMBA Executive MBA

EMBA 7030 Information Technology Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to enable the manager to effectively utilize and manage information technology in the applied business environment. The course focuses on the managerial, not the technical aspects of information management. No prior technical expertise is required. Relevant readings and cases are used to apply the concepts and techniques presented in the course.

EMBA 7130 Financial Reporting and Analysis
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course focuses on the interpretation of financial statement information for decision making. Topics include understanding of industry context and the firm’s own strategic choices in evaluating the financial statement; assessing the quality of financial statement information and recognizing situations where more stringent accounting measures might be appropriate; evaluating profitability and risk; and associating subsets of the available analytical tools with the kinds of decisions for which they are most appropriate; and recognizing the effects of GAAP on the input variables of various firm valuation models.

EMBA 7132 Legal and Ethical Issues in Business
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A survey of the legal and ethical rules which govern the managerial decision making process, particularly focusing on constitutional “Commerce Clause” interpretation, contract and agency principles, administrative agency regulations, and evolving ethical issues which influence the application of the law. The course is set in domestic law, but includes operational legal aspects of the international market place.

EMBA 7230 Managerial Decision Analysis
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The course will provide a conceptual paradigm for decision makers to construct models and analyze decisions in today’s business environment. Quantitative methods will be used to construct models with emphasis placed on representing real world problems and gaining insight and understanding of the decision making process. Specific models developed may include, but are not limited to, statistical fundamentals and probability for decision making, multiple regression and forecasting models. The course will be spreadsheet based.

EMBA 7231 Managerial Finance
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A study of financial risk and return, capital budgeting, valuation, capital structure, working capital management and current topics in financial management.

EMBA 7232 Management of Operations for Competitive Advantage
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The objectives of this course are to familiarize students with the problems and issues confronting operations managers and to examine the key tools and techniques that have proven applicable to deal with these issues – their objectives, their principles and the requirements for their successful implementation. It examines how distinct business strategies require distinct operational processes and how distinct operational capabilities can enable diverse strategies to achieve competitive advantage. The course focuses on key management attitudes and tools to direct the process of continuous improvement and transformation.

EMBA 7233 Financial Modeling
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The focus of this course is on developing spreadsheet models for a wide variety of financial concepts including, but not limited to portfolio optimization, derivatives pricing, financial engineering methods, asset allocation, value at risk, asset prices, etc. Students will gain familiarity with the financial instruments through the construction of the models, and will gain greater insights by analyzing and solving the models. Simulation and optimization may be used to analyze the models.

EMBA 7330 Managerial Economics
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Introduces the basic tools of microeconomics and macroeconomics to analyze management decisions and competitive strategies of firms in a market economy. Microeconomic concepts of supply and demand, production, cost, and market structure are combined with macroeconomic issues related to fiscal and monetary policy to form a solid understanding of the relationship between the structure and performance of the business firm and the economic environment is which it operates.
EMBA 7420 Leadership, Motivation and Organizational Change
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
A study of leadership, motivation and organizational change. Using readings, cases, discussion, and guest speakers, the course explains the importance of leadership, motivation, power, and influence in organizational life. Special emphasis is placed on leadership for change. Also, provides an overview of the field of organization development (OD) and the management of change in today's organizations.

EMBA 7432 Social Issues in Business
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Overview of the social issues on managerial decision making. Examines the role of the businessperson in modern society. Considers business and society responsibility, pollution, consumerism, micro-lending, and the social responsibilities of multinational corporations.

EMBA 7433 Global Business Strategy
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course focuses on global strategic management and encourages the analysis and development of business strategies within a global environment.

EMBA 7630 Introduction to Entrepreneurial Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
First residency interdisciplinary course. Course covers fundamentals of team building and presents the students with various leadership tools and assessments. An introduction to Entrepreneurship is also covered.

**ENGL English**

ENGL 0097 English Skills
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
Guidance and intensive practice in correcting errors with grammar and standard English. Editing for clarity and correctness, with emphasis on the student’s own writing. Computer assisted learning. Open to all students—especially helpful to students taking courses that require writing.

ENGL 0098 Basic Writing Skills
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Sequence of reading and writing assignments. Writing process. Practice in correcting errors in grammar and standard English.

ENGL 0099A Communication Skills
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Designed to help students develop language skills necessary for entering regular college courses. Emphasizes grammar and punctuation, essays and other forms of written expression, oral participation, and reading proficiency. Because the course is developmental, a student may exit at the end of any semester by passing the course and achieving a satisfactory score on the exit examination. Audit or institutional credit only.

ENGL 0099B Communication Skills
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Designed to help students develop language skills necessary for entering regular college courses. Emphasizes grammar and punctuation, essays and other forms of written expression, oral participation, and reading proficiency. Because the course is developmental, a student may exit at the end of any semester by passing the course and achieving a satisfactory score on the exit examination. Audit or institutional credit only.

ENGL 0099C Communication Skills
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Designed to help students develop language skills necessary for entering regular college courses. Emphasizes grammar and punctuation, essays and other forms of written expression, oral participation, and reading proficiency. Because the course is developmental, a student may exit at the end of any semester by passing the course and achieving a satisfactory score on the exit examination. Audit or institutional credit only.

ENGL 0999 Support for English Composition
1 Credit Hour. 0,1 Lecture Hours. 0,2 Lab Hours.
ENGL 0999 is a corequisite support course that provides additional instruction for concepts covered in ENGL 1101. The course focuses on students' composition practices, including academic English conventions, citation styles, and critical reading. Students will be placed in ENGL 0999 based on their ACCUPLACER score. Students earn A, B, C, or F grade for the one-credit course.

Corequisite(s): ENGL 1101.

ENGL 1101 Composition I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the conventions of academic and professional writing through the rhetorical practices of reading and composing texts. Students will use critical thinking and information literacy skills to develop texts through the processes of writing, revision, and reflection. Some sections may have specific course themes.

Cross Listing(s): WRIT 1101.

ENGL 1102 Composition II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course develops students’ knowledge of writing beyond the proficiency required by ENGL 1101, emphasizing interpreting, evaluating, and synthesizing information to create arguments from a variety of sources using more advanced research methods. Some sections may have specific course themes.

Prerequisite(s): A minimum grade of "C" in ENGL 1101 or WRIT 1101.

ENGL 2100 Literature And Humanities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of literature as an expression of the humanities through study of several complete works from at least two historical periods, two genres, and two cultures/countries. Includes an essay or projects involving documentation.

ENGL 2111 World Literature I
3 Credit Hours. 0,3 Lecture Hours. 0 Lab Hours.
A survey of representative works of world literature from ancient times to the end of the 17th century, with emphasis on critical reading and writing skills.

ENGL 2112 World Literature II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of representative works of world literature from the mid-17th century to the present, with emphasis on critical reading and writing skills.

ENGL 2121 British Literature I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of important works of British literature from its beginnings to 1800.

ENGL 2122 British Literature II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of important works of British literature from approximately 1800 to the present.

ENGL 2131 American Literature I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of American Literature from the colonial period to the mid-19th century.

ENGL 2132 American Literature II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of American Literature from the mid-19th century to the present.

ENGL 2434 The Language of Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the semantics of cinema and the evolution of the film language. The course will examine technical, literary, and cultural means and aspects of communicating meaning in film.
ENGL 3025 Pop Culture Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the theoretical and critical approaches to the study of various forms of popular cultural expression such as film, television, popular literature, magazines and music. Critical methodologies present may include semiotics, genre criticism, ethnography, feminism and cultural studies.
Cross Listing(s): COMM 5025.

ENGL 3030 Selected Topics in Cinema
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Courses will cover a variety of special topics in film, such as specific film genres, auteurs, critical approaches, historical film movements, and representation. May be repeated for additional credit with new topics.
Cross Listing(s): FILM 3030.

ENGL 3090 Selected Topics in Literature
1-9 Credit Hours. 1-9 Lecture Hours. 0 Lab Hours.
Selected topics in English.

ENGL 3110 Intro To Literary Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Vocabulary and approaches of modern literary criticism, reading and interpretation of literary texts, and the tools of literary research and writing.

ENGL 3141 The Bible as Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the Bible from the perspective of literary analysis, focusing on the Bible's historical, generic, and narrative contexts as well as its subsequent influence on western literature.

ENGL 3150 Mythology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the major characters, plots, and themes of mythological narratives.

ENGL 3200 Introduction to the Novel
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An exploration of the origins and development of the novel as a distinct literary form, examining the aesthetic, philosophical, and social concerns that inform selected works from the eighteenth, nineteenth, and twentieth centuries. The course may focus primarily on the American or the British novel, or it may integrate the two through a specific thematic focus.

ENGL 3232 The Art of Film Adaptation of Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Comparative interpretation of the differences between literature and film and the complex challenges of turning diverse narrative literature into autonomous works of cinema.

ENGL 3300 Introduction to Dramatic Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of dramatic literature from its origins to the present, addressing the genre's unique characteristics, the development of its techniques, the range of its uses and concerns, and its major literary and theatrical practitioners.

ENGL 3311 History of Cinema
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of aesthetic, economic, social, technological and industry development of cinema from 1896 to the present day with an emphasis on film movements and film analysis. Cross Listing(s): FILM 3331.

ENGL 3322 Documentary Film Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of Documentary studies that examines film form, reception, historical developments, ethics, key figures and representation. Cross Listing(s): FILM 3332.

ENGL 3330 Cinema Genres
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analysis of cinema form, genre conventions, film theory, culture and the film industry through a survey of film genres. May be repeated for additional credit with new topics.
Cross Listing(s): FILM 3333.

ENGL 3350 Introduction to African American Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to African American literature from its beginnings to the present emphasizing literary, historical and cultural contexts.
Prerequisite(s): ENGL 2100 or ENGL 2111 or ENGL 2112 or permission of department chair.

ENGL 3400 Introduction to Poetry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
American and/or British poetry in the context of technological developments, philosophical movements, and literary currents. Exploration of forms and themes with emphasis on prosody and interpretation.

ENGL 3535 Patterns in Film and Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A comparative interpretation of themes, ideas, and patterns in selected works of narrative literature and cinema.
Prerequisite(s): A minimum grade of "C" in all of the following: ENGL 2111 or ENGL 2112 and prior or concurrent enrollment in ENGL 2131.

ENGL 4255 Popular Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focus on popular literary genres. Topics vary.
Prerequisite(s): Completion of ENGL 2100 or ENGL 2111 or ENGL 2112.

ENGL 4435 Single Author
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Devoted to the study of a single author whose work has occasioned a significant body of criticism. Students will focus on the body of the author's work and consider both historical context and critical response.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

ENGL 4630 Senior Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this capstone course, English majors will study a discrete body of literature and conduct extensive research in literary criticism related to a specific topic. Emphasis will be on preparation, revision, and oral presentation of an original research project. Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112.

ENGL 4790 Internship
3-6 Credit Hours. 3-6 Lecture Hours. 0 Lab Hours.
Opportunity for work and/or research, jointly supervised by sponsoring institution or organization and staff member. Six hours credit requires twenty-five hours, 3 hours credit requires fifteen hours. Repeatable up to a maximum of six credit hours.

ENGL 4890 Independent Study
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Open to seniors. To be determined by student and professor. Available to transient students only with approval of the department head.

ENGL 5025 Pop Culture Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the theoretical and critical approaches to the study of various forms of popular cultural expression such as film, television, popular literature, magazines and music. Critical methodologies present may include semiotics, genre criticism, ethnography, feminism and cultural studies. Cross Listing(s): COMM 5025.

ENGL 5030 Television Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical Examination of various aspects of television, such as genres, social implications, historical significance and modes of production.
Cross Listing(s): COMM 5030.
ENGL 5035 Film Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth examination of film theory and criticism concepts. Cross Listing(s): FILM 5035.

ENGL 5040 Women in Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Representations of women in film, may include issues such as feminist film theory and criticism, presentation of female characters in major film.
Cross Listing(s): FILM 5040.

ENGL 5090 Special Topics
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Special topics in English. May be repeated for additional credit when topics change.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.
Cross Listing(s): ENGL 5090G.

ENGL 5090G Special Topics in English
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
May be repeated for additional credit when topics change. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

ENGL 5135 Teaching Literature to Middle and Secondary School Students
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to introduce classroom approaches to literature to middle grades and high school teachers. It will include work with a variety of literary genres and multicultural texts.
Cross Listing(s): ENGL 5135G.

ENGL 5135G Teaching Literature to Middle and Secondary School Students
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to introduce classroom approaches to literature to middle grades and high school teachers. It will include work with a variety of literary genres and multicultural texts. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5135.

ENGL 5200 Postcolonial Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Literature and theory that emphasizes the interactions between European nations and the societies they colonized.
Prerequisite(s): ENGL 2100 or ENGL 2111 or ENGL 2112; or permission of the department chair.
Cross Listing(s): ENGL 5200G.

ENGL 5200G Postcolonial Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Literature and theory that emphasizes the interactions between European nations and the societies they colonized. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5200.

ENGL 5234 Literature of the American South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of representative works of Southern literature from the colonial period to the present, emphasizing their literary and cultural contexts.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.
Cross Listing(s): ENGL 5234G.

ENGL 5234G Literature of the American South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of representative works of Southern literature from the colonial period to the present, emphasizing their literary and cultural contexts. Graduated students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Prerequisite(s): A minimum grade of "C" in ENGL 2131. Cross Listing(s): ENGL 5234.

ENGL 5235 Irish Literature to 1850
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of representative Irish poetry, prose, and drama, from Gaelic times through the Great Hunger of the 1840s. The course interrogates the four mythological cycles; the Aisling and other native literary genres; and texts reflective of British colonization. All works are in English or English translation. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5235G.

ENGL 5235G Irish Literature to 1850
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of representative Irish poetry, prose, and drama, from Gaelic times through the Great Hunger of the 1840s. The course interrogates the four mythological cycles; the Aisling and other native literary genres; and texts reflective of British colonization. All works are in English or English translation. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5235.

ENGL 5236 Irish Literature since 1850
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of representative Irish poetry, prose, and drama since the Great Hunger of the 1840s. The course interrogates literature from the Irish Cultural Revival; the Easter Rising, War of Independence, and Civil War; the Free State; the Northern Irish Troubles; and the Celtic Tiger. All works are in English or English translation. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5236G.

ENGL 5236G Irish Literature since 1850
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of representative Irish poetry, prose, and drama since the Great Hunger of the 1840s. The course interrogates literature from the Irish Cultural Revival; the Easter Rising, War of Independence, and Civil War; the Free State; the Northern Irish Troubles; and the Celtic Tiger. All works are in English or English translation. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5236.

ENGL 5238 Irish Women Writers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of poetry, prose, and drama produced by Irish and Irish-diasporic women. The course examines female archetypes from Irish mythology; female hagiography from medieval Ireland; and the Field Day controversy. It also interrogates such literary accomplishments by Irish women as nineteenth-century Big House novels and twentieth-century neo-domestic verse.
Cross Listing(s): ENGL 5238G.

ENGL 5238G Irish Women Writers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of poetry, prose, and drama produced by Irish and Irish-diasporic women. The course examines female archetypes from Irish mythology; female hagiography from medieval Ireland; and the Field Day controversy. It also interrogates such literary accomplishments by Irish women as nineteenth-century Big House novels and twentieth-century neo-domestic verse. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5238.
**ENGL 5280 Literature and the Environment**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of representations of the environment in literature and theory. Readings in ecological literary criticism as well as fiction and literary nonfiction from various world areas and historical periods.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

Cross Listing(s): ENGL 5280G.

**ENGL 5280G Literature and the Environment**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of representations of the environment in literature and theory. Readings in ecological literary criticism as well as fiction and literary nonfiction from various world areas and historical periods. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5280.

**ENGL 5315 17th and 18th Century American Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of representative works in American literature from 1585 to 1800 in their literary and cultural contexts.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

Cross Listing(s): ENGL 5315G.

**ENGL 5315G 17th and 18th Century American Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of representative works in American literature from 1585 to 1800 in their literary and cultural contexts. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5315.

**ENGL 5324 18th Century British Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of the literature of the long eighteenth century (1660-1800) in its cultural and ideological contexts.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

Cross Listing(s): ENGL 5324G.

**ENGL 5324G 18th Century British Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of the literature of the long eighteenth century (1660-1800) in its cultural and ideological contexts. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5324.

**ENGL 5325 19th Century American Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of representative works from 19th century American literature in their literary and cultural contexts.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

Cross Listing(s): ENGL 5325G.

**ENGL 5325G 19th Century American Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of representative works from 19th century American literature in their literary and cultural contexts. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5325.

**ENGL 5335 20th and 21st Century American Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of 20th and 21st century American poetry and prose in its literary and cultural contexts. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.

Cross Listing(s): ENGL 5335G.

**ENGL 5340 Literature by Women**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of literature written by women within social, historical, and theoretical contexts. Topics may include classic, contemporary, and experimental writing by women, feminist theory and criticism.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair. Cross Listing(s): ENGL 5340G.

**ENGL 5340G Literature by Women**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of literature written by women within social, historical, and theoretical contexts. Topics may include classic, contemporary, and experimental writing by women, feminist theory and criticism. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5340.

**ENGL 5440 Early British Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of literature from the British Isles prior to 1500. Literary genres may include heroic poetry, elegiac verse, lyric, romance, dream visions, drama, and mystical literature.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.

Cross Listing(s): ENGL 5440G.

**ENGL 5440G Early British Literature**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

An examination of literature from the British Isles prior to 1500. Literary genres may include heroic poetry, elegiac verse, lyric, romance, dream visions, drama, and mystical literature. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5440.

**ENGL 5450 Chaucer**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of The Canterbury Tales and other selected works in the context of Chaucer's culture and language.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair. Cross Listing(s): ENGL 5450G.

**ENGL 5450G Shakespeare**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of The Canterbury Tales and other selected works in the context of Chaucer's culture and language. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5450.

**ENGL 5455G Shakespeare**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A selection of Shakespeare's tragedies, comedies, and history plays illustrating representative themes and literary techniques of the dramatist, as well as his links to contemporary issues of his day.

**ENGL 5460 Shakespeare**

3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A selection of Shakespeare's works which may include the sonnets and dramatic genres illustrating representative themes and literary techniques.

Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair. Cross Listing(s): ENGL 5460G.
ENGL 5460G Shakespeare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A selection of Shakespeare's works which may include the sonnets and
dramatic genres illustrating representative themes and literature
techniques. Graduate students will be given an extra assignment
determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5460.
ENGL 5480 Literature of the English Renaissance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A selection of representative literary works from the period 1485—1689 in
their social and intellectual contexts. Graduate students will be given an
extra assignment determined by the instructor that undergraduates will not
be required to do.
Cross Listing(s): ENGL 5480G.
ENGL 5480G Literature of the English Renaissance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A selection of representative literary works from the period 1485—1689 in
their social and intellectual contexts. Graduate students will be given an
extra assignment determined by the instructor that undergraduates will not
be required to do.
Cross Listing(s): ENGL 5480.
ENGL 5485 Milton
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of Milton's major poetry and prose within their social, political, and
intellectual context. Graduate students will be given an extra assignment
determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5485G.
ENGL 5485G Milton
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of Milton's major poetry and prose within their social, political, and
intellectual context. Graduate students will be given an extra assignment
determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5485.
ENGL 5500G 18th Cent British Poet/Prose
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of British poetry and prose from 1690 to 1784, emphasizing
philosophic and aesthetic concerns. Authors such as Swift, Pope,
Johnson, and Fielding.
Cross Listing(s): ENGL 5500.
ENGL 5525 19th Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of Romantic and Victorian literary works in their intellectual
and social contexts.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission
of the department chair. Cross Listing(s): ENGL 5525G.
ENGL 5525G 19th Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of Romantic and Victorian literary works in their intellectual
and social contexts. Graduate students will be given an extra assignment
determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5525.
ENGL 5526 20th and 21st Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of major British and Commonwealth poets, novelists, and
dramatists against the background of the major social and cultural
changes of the 20th and 21st centuries.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission
of the department chair. Cross Listing(s): ENGL 5526G.
ENGL 5526G 20th and 21st Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of major British and Commonwealth poets, novelists, and
dramatists against the background of the major social and cultural
changes of the 20th and 21st centuries. Graduate students will be given
an extra assignment determined by the instructor that undergraduates will
be required to do.
Cross Listing(s): ENGL 5526.
ENGL 5533 Literary Criticism and Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An historical survey of literary criticism and theory from antiquity to modern
times. Literary criticism considers issues important for all students of
literature, such as the value of poetry in our world, the power of poets to
represent reality or truth, and the sources of poetic inspiration. This course
also delves into the subject of aesthetics, the nature of beauty, and the
variety of forces that impact how humans respond to literature.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission
of the department chair. Cross Listing(s): COML 5533, ENGL 5533G.
ENGL 5533G Literary Criticism and Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An historical survey of literary criticism and theory from antiquity to modern
times. Literary criticism considers issues important for all students of
literature, such as the value of poetry in our world, the power of poets to
represent reality or truth, and the sources of poetic inspiration. This course
also delves into the subject of aesthetics, the nature of beauty, and the
variety of forces that impact how humans respond to literature. Graduate
students will be given an extra assignment determined by the instructor
that undergraduates will not be required to do.
Prerequisite(s): Completion of ENGL 2100 or ENGL 2111 or ENGL 2112;
or permission of the department chair. Cross Listing(s): ENGL 5533.
ENGL 5534 Literature for Adolescents
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of literature, primarily (but not exclusively) narrative, on the subject
of adolescence, with emphasis on analyzing and evaluating contemporary
literature written especially for or about adolescents.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission
of the department chair. Cross Listing(s): ENGL 5534G.
ENGL 5534G Literature for Adolescents
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of literature, primarily (but not exclusively) narrative, on the subject
of adolescence, with emphasis on analyzing and evaluating contemporary
literature written especially for or about adolescents. Graduate students
will be given an extra assignment determined by the instructor that
undergraduates will not be required to do.
Cross Listing(s): ENGL 5534.
ENGL 5535 Children's Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of literature written for or read by children with a focus on British
and American classics. Students will read and write critical analyses of
these works with special attention to the history of childhood. Authors
studied may include the Brothers Grimm, Lewis Carroll, Louisa May Alcott,
Mark Twain, Kenneth Graham, Frances Hodgson Burnett, and others.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission
of the department chair. Cross Listing(s): ENGL 5535G.
ENGL 5535G Children's Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of literature written for or read by children with a focus on British and American classics. Students will read and write critical analyses of these works with special attention to the history of childhood. Authors studied may include the Brothers Grimm, Lewis Carroll, Louisa May Alcott, Mark Twain, Kenneth Grahame, Frances Hodgson Burnett, and others. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5535.

ENGL 5538 20th and 21st Century World Fiction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of some of the major works of fiction written by American, British, and World authors since 1900.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair. Cross Listing(s): ENGL 5538G.

ENGL 5538G 20th and 21st Century World Fiction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of some of the major works of fiction written by American, British, and World authors since 1900. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5538.

ENGL 5560 Studies in Drama
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A specialized focus in the genre of drama. Topics may vary. Course repeatable as topics vary.
Prerequisite(s): ENGL 2100, 2111, or 2112; or permission of the department chair.
Cross Listing(s): ENGL 5560G.

ENGL 5560G Studies in Drama
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A specialized focus in the genre of drama. Topics may vary. Course repeatable as topics vary. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): Completion of ENGL 2100 or ENGL 2111 or 2112; or permission of the department chair.
Cross Listing(s): ENGL 5560.

ENGL 5570 Studies in Fiction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A specialized focus in the genre of fiction. Topics may vary. Course repeatable as topics vary.
Prerequisite(s): ENGL 2100 or ENGL 2111 or ENGL 2112; or permission of the department chair.
Cross Listing(s): ENGL 5570G.

ENGL 5570G Studies in Fiction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A specialized focus in the genre of fiction. Topics may vary. Course repeatable as topics vary. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5570.

ENGL 5580 Studies in Poetry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A specialized focus in the genre of poetry. Topics may vary. Course repeatable as topics vary. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ENGL 5580.

ENGL 5590 Studies in African American Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Thematic approach to African American literature, with emphasis on historical, philosophical, and/or cultural contexts. Topics such as gender, religion, migration, the oral tradition, autobiography, popular culture, rhetoric, civil rights, slavery, sexuality, or literary theory. May be repeated for additional credit when topics change.
Prerequisite(s): ENGL 2100, ENGL 2111, or ENGL 2112; or permission of the department chair.
Cross Listing(s): ENGL 5590G.

ENGL 5590G Studies in African American Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Thematic approach to African American literature, with emphasis on historical, philosophical, and/or cultural contexts. Topics such as gender, religion, migration, the oral tradition, autobiography, popular culture, rhetoric, civil rights, slavery, sexuality, or literary theory. May be repeated for additional credit when topics change. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): ENGL 5590.

ENGL 5630G Modern & Contemporary Drama
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exploration of drama in its social, historical, and theoretical contexts from 1880 to the present.
Cross Listing(s): ENGL 5630.

ENGL 5840 Contents and Methods English
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the major currents and figures in modern critical and literary theory since the "New Critics," looking at the basic concepts, philosophical assumptions, and historical and ideological contexts of figures such as Lukacs, Benjamin, Adorno, Bakhtin, Derrida, Foucault, Barthes, Deleuze, Jauss, DeMan, Lacan, Cixous, Irigaray, Kristeva, and Homi Bhabha.
Prerequisite(s): A minimum grade of "C" in ENGL 2100.
Cross Listing(s): ENGL 5840G.

ENGL 5840G Content & Methods English
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the major currents and figures in modern critical and literary theory since the "New Critics," examining concepts, philosophical assumptions, and historical and ideological contexts of figures such as Lukacs, Bakhtin, Derrida, Foucault, Barthes, Deleuze, Lacan, Kristeva, and Homi Bhabha.
Cross Listing(s): ENGL 5840.

ENGL 6630 Seminar in Medieval Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the major authors, genres and literary influences of the English Middle Ages with an emphasis on Chaucer and the fourteenth century.

ENGL 6631 Shakespeare Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A close examination of several of Shakespeare's "problem" plays.

ENGL 6632 Seminar in Literature of the English Renaissance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study in the major writers of the English Renaissance, including such figures as Sidney, Spenser, Herbert, Donne, and Browne. Lesser authors may be incorporated for their historical significance in the development of modern English prose and poetry.

ENGL 6633 Seminar in Restoration and Eighteen Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of major works and documents from the period. Specific topics and texts may vary.

ENGL 6634 Seminar in Major Authors
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An intensive study of the life (lives) and works of one to three major authors. May be repeated for credit.
ENGL 6635 Women's and Gender Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of women's and gender issues and concerns in the context of important works of literature.

ENGL 6636 African-American Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course involves the study of images, issues, and themes in African-American literature through an examination of works by such writers as Douglass, Washington, Chestnutt, Hughes, Wright, Baldwin, and Morrison.

ENGL 6637 Criticism and Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the great tradition of literary critics, from Plato to the present, and the contemporary critical approaches and theory they shape today.

ENGL 7111 Seminar in College English
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
A study of strategies and techniques for developing rhetorical skills in College English. Required of graduate assistants in English and open to other graduate students in English.

ENGL 7121 Methods of Research
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The seminar provides an in-depth understanding of the bibliographic, research, and critical skills required to do advanced scholarship in literary studies.

ENGL 7618 Thesis Preparation
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Students in this workshop will begin research on a thesis topic, draft and revise a thesis prospectus and bibliography, and meet regularly with a thesis advisor.

ENGL 7630 Seminar in World and Comparative Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Research and discussion of a topic in a specific period of world literature or comparative literature. May be repeated for credit.

ENGL 7631 Seminar in the British Novel
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of important developments or themes of the British Novel.

ENGL 7632 Seminar in the American Novel
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the novel in America from the eighteenth to the twentieth centuries.

ENGL 7633 Seminar in Nineteenth-Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of prose and poetry of the nineteenth century, focusing on either Victorian or Romantic authors. May be repeated for credit.

ENGL 7634 Seminar in Twentieth-Century British Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of British prose, poetry, or drama of the twentieth century, with emphasis and works to be chosen by the instructor.

ENGL 7635 Seminar in Nineteenth-Century American Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of major authors and documents of the nineteenth century, focusing on either Romantic or Realist authors. May be repeated for credit.

ENGL 7637 Seminar in Twentieth-Century American Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of American prose, poetry or drama of the twentieth century, with emphasis chosen by the instructor.

ENGL 7638 Seminar in Twentieth-Century Poetry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of British and American poets of the twentieth century, with emphasis on major authors of either the Modern or Contemporary periods. May be repeated for credit.

ENGL 7639 Seminar in Selected Topics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in English.

ENGL 7999 Thesis
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Thesis.

ENGR Engineering

ENGR 1112 Introduction to Scientific Modeling and Simulation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the problems and solution methodologies in computational scientific modeling and computation. Computational tools such as a computer algebra system, visualization software and Internet resources will be used to explore and solve mathematical problems drawn from various fields of science and engineering.
Prerequisite(s): MATH 1111 or MATH 1113 or MATH 1441.

ENGR 1121 Computing Applications in Mechanical Engineering
2 Credit Hours. 0,2 Lecture Hours. 0,4 Lab Hours.
This is an introductory level computing and application course for Mechanical Engineering students. It is intended for students to develop their technical computing skill using platforms that are current and widely used in the professional world. Standard mathematical functions and applications including logical expression, data input/output, arrays, and statistical functions will be introduced. Specific mechanical engineering applications are utilized to introduce students to basic problem solving techniques, flow charting, and programming. Prerequisite(s): Prior or concurrent enrollment in MATH 1112 or MATH 1113 or MATH 1441.

ENGR 1133 Engineering Graphics
3 Credit Hours. 0,2 Lecture Hours. 0,3 Lab Hours.
This course develops and improves student visualization and spatial skills, free-hand sketching, design consideration of fabrication processes, and parametric solid modeling. The introduction of drawings, a working understanding of technical terminology and participation in group engineering activities are the major highlights of this course. It is expected that the students will gain fundamental abilities in the use of commercial solid modeling tools and techniques.

ENGR 1731 Computing for Engineers
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This is an introductory course in the foundations of computing, computational thinking, and engineering problem-solving using programming. The course introduces students to the concepts of design and analysis of algorithms, and construction of programs for engineering problem-solving. Topics such as arrays, data types and related operations, decision, looping, input/output, functions, files, and plotting. Prerequisite(s): Prior with a minimum of "C" or concurrent enrollment in MATH 1441.

ENGR 1732 Program Design for Engineers
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course will introduce engineering students to applications for engineering problem-solving and object-oriented programming principles in Electrical and Computer Engineering using standard (ANSI) C and C++. Prerequisite(s): A minimum grade of "C" in ENGR 1731.

ENGR 2010 Computational Modeling
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Fundamentals of numerical methods and development of programming techniques for implementing them to solve civil and environmental engineering problems via computers.
Prerequisite(s): MATH 2242 and PHYS 2211K and ENGR 1731 or ENGR 1121.
ENGR 2110 Creative Decisions and Design
3 Credit Hours. 0.2 Lecture Hours. 0.3 Lab Hours.
Fundamental techniques for creating, analyzing, synthesizing, and implementing design solutions to open-ended problems through team and individual efforts utilizing flexibility, adaptability, and creativity. Prerequisite(s): A minimum grade of "C" in ENGR 1133 and ENGR 2231, and prior or concurrent enrollment with a minimum grade of "C" in MATH 2430.

ENGR 2112 Solid Modeling and Analysis
1 Credit Hour. 0 Lecture Hours. 0.3 Lab Hours.
Students will develop advanced proficiency using parametric solid modeling software, such as SolidWorks. In addition to creating solid models (advanced parts, advanced assemblies, surface, and weldments), students will develop a basic proficiency in structural analysis, flow simulation, surface modeling, NC programming, Manufacturing Constraints and Design for Additive Manufacturing. Prerequisite(s): A minimum grade of "C" in ENGR 1133.

ENGR 2131 Electronics and Circuit Analysis
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course introduces electric circuit elements, electronic devices, digital systems, and analysis of circuits containing such devices in order to provide students with the fundamental knowledge of electrical engineering principles and applications. Basic concepts of laboratory practice and instruments in the analysis of elementary electrical circuits will be covered in this course. Prerequisite(s): A minimum grade of "C" in PHYS 2212K and prior or concurrent enrollment in MENG 2139.

ENGR 2137 Introduction to Renewable Energy
3 Credit Hours. 0-2 Lecture Hours. 0-2 Lab Hours.
This course will serve as an introduction to Renewable Energy sources and systems basic design and operation, with environmental and socio-economic impacts considered. Prerequisite(s): A minimum grade of "C" in CHEM 1147 or CHEM 1146.

ENGR 2231 Engineering Mechanics I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamental concepts of mechanics. Statics of particles. Moments and equivalent systems of forces on rigid bodies; equilibrium of rigid bodies. Distributed forces-centroids and centers of gravity. Analysis of trusses, frames and machines. Internal normal and shearing forces, bending moments, and torque. Shear and bending moment diagrams, relations between distributed load, shear, and bending moment. Friction. Distributed forces area moments of inertia. Prerequisite(s): A minimum grade of "C" in MATH 2242 and PHYS 2211.

ENGR 2232 Dynamics of Rigid Bodies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

ENGR 2323 Digital Design Lab
2 Credit Hours. 0.1 Lecture Hours. 0-3 Lab Hours.
Design and implementation of digital systems, including a team design project, using CAD tools, discrete chip-set and FPGA. Both schematic and hardware description language are used for digital design. Students will also learn logic systems, assembly language programming and project design methodologies. Prerequisite(s): A minimum grade of "C" in all of the following: ENGR 1732, ENGR 2332.

ENGR 2332 Logic Circuit Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Computer systems and digital design principles. Architectural concepts, software, Boolean algebra, number systems, combinational datapath elements, sequential logic and storage elements. Prerequisite(s): Prior (with a minimum grade of "C") or concurrent enrollment in ENGR 1731 or permission of instructor.

ENGR 2334 Circuit Analysis I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the students to the basic concepts of circuit theory and analysis. Topics covered are basic elements and sources, energy and power, Ohm's law, Kirchhoff's law, nodal and mesh analysis, Thevenin's and Norton's theorems, capacitors, inductors, transient analysis, first-order and second-order circuits. Prerequisite(s): A minimum grade of "C" in all of the following: PHYS 2212K and (prior or current enrollment in ENGR 2341) and (prior or current enrollment in MATH 3230).

ENGR 2341 Introduction to Signal Processing with Lab
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course introduces students to signal processing for discrete-time and continuous-time signals, convolutions, filtering, frequency response, Fourier series, Fourier transform, Laplace transform, and Z-transform. Laboratory emphasizes computer-based signal processing. Prerequisite(s): A minimum grade of "C" in MATH 2242 and ENGR 1731 or equivalent.

ENGR 2343 Engineering Software Design
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Object-oriented software methods for engineering applications including numerical analysis methods; simulations and graphical presentation of simulation results; and analysis of numerical precision. Students will apply and develop these concepts through programming projects. Prerequisite(s): A minimum grade of "C" in all the following: ENGR 2332 and prior or concurrent enrollment in ENGR 2341 or permission of instructor.

ENGR 2423 Introduction to Engineering Materials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The structure, property, processing, and performance relationships of engineering materials. Materials selection is treated as part of engineering design. Prerequisite(s): CHEM 1146 or both CHEM 1146 and CHEM 1147.

ENGR 2890 Introductory Selected Problems in Engineering
1-3 Credit Hours. 0 Lab Hours.
Individual and specialized introductory-level study in the areas of engineering projects and research not otherwise covered in the student's curriculum. This experience cannot be used as a substitute for a technical elective in the engineering curriculums. Prerequisite(s): Identification of a problem or study area and permission of the instructor and department chair.

ENGR 2991 Topics in Engineering
1-4 Credit Hours. 0-4 Lecture Hours. 0-12 Lab Hours.
"Special topics at freshman and sophomore level of current interest in engineering. Prerequisite(s): Announced with the topic.

ENGR 3233 Mechanics of Materials
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Definition and analysis of stress and strain, mechanical properties of materials, axially loaded members, torsion of circular sections, bending of beams, transformation of stress and strain, design of beams, and buckling of columns. Prerequisite(s): A minimum grade of "C" in ENGR 2231.
ENGR 3235 Fluid Mechanics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course includes fundamentals of fluid statics and fluid dynamics for incompressible fluids, fluid properties, static and dynamic forces, Bernoulli’s equation, pipe flow and losses, open channel flow and flow measurement. The course also includes methods, procedures and the use of equipment to measure standard fluid properties and phenomena.
Prerequisite(s): MATH 2243 and MATH 3230 and a minimum grade of "C" in ENGR 2231.
ENGR 3310 Circuit Analysis Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
Laboratory experimentation to enhance understanding of analytical principles developed in Circuit Analysis I & II by design and implementation of analog circuits (DC and AC), and achieving proficiency with standard electronic instrumentation including multimeters, oscilloscopes, dual power supplies, and function generators. Simulation tools are used to verify experimental results.
Prerequisite(s): A minimum grade of "C" in all of the following: ENGR 2334 and prior or concurrent enrollment in EENG 3335 or permission of instructor.
ENGR 3431 Thermodynamics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Thermodynamic properties, state postulate, work interactions, steady-state and transient energy and mass conservation, entropy and the second law. First and Second Law analysis of thermodynamic systems. Gas cycles and vapor cycles.
Prerequisite(s): A minimum grade of "C" or better in PHYS 2211K and MATH 2242.

ENVH Environmental Hlth Scienc
ENVH 7234 Environmental Toxicology
3 Credit Hours. 3 Lecture Hours. 1 Lab Hour.
This course introduces students to concepts associated with the lethal and sub-lethal effects of environmental and occupational stressors on humans and other living organisms. The course also includes laboratory experiments designed to enhance comprehension, among students, in the area of toxicology.
Prerequisite(s): A minimum grade of "C" in PUBH 6532.
ENVH 7235 Field Methods in Environmental Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to an overview of current and accepted standards of environmental and occupational exposure monitoring. Also examines the field methodology related to sample collection for water and air quality monitoring.
ENVH 7236 Spatial Analysis for Environmental Health Sciences
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to concepts and methods of spatial analysis related to environmental health problems and public health planning. Students will also employ basic concepts of mapping through the use of applicable Geographic Information Systems software.
ENVH 7237 Risk Assessment and Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to the qualitative and quantitative skills necessary to evaluate the probability of injury, disease, or death in the general population from exposure to environmental contaminants. Hazard identification, exposure assessment, dose-response evaluation, and risk characterization are highlighted. Risk communication includes developing practical skills in assessing health concerns and explaining potential health risks or risk management to the general public.
Prerequisite(s): A minimum grade of "C" in ENVH 7233.
ENVH 7238 Environment, Ethics and Equity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to theory, concepts and methods of ethics and equity related to one’s location. Topics to be addressed include environmental justice, public health ethics, impacts on equity and disparities. Students will also employ basic concepts of spatial analysis through the use of applicable Geographic Information Systems (GIS) software.
ENVH 7239 Public Health Laboratory
3 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
This course introduces students to the laboratory practices and skills necessary to sample, archive, transport, process and analyze environmental materials. Experiences include the design of laboratory experiments including the applications of contemporary laboratory microbiological, cell culture and molecular and instrumental tools used for testing environmental specimens. Experiences will also include silico analysis of laboratory test results, writing technical reports and presenting the outcomes of the research.
Prerequisite(s): A minimum grade of "C" in PUBH 6532 and BIOS 6541 and ENVH 7231 and ENVH 7232 or permission of instructor.
ENVH 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.
ENVH 8335 Global Water Quality and Health: Principles and Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The global water crisis is the most serious threat to human health. Poor water quality, lack of sanitation and inadequate access to clean water resources are one of the major causes of global health disparities. Current issues such as changing climate, decaying infrastructure and reemerging waterborne diseases are also contributors for disease transmission within vulnerable populations. This course analyzes the key drivers that affect global water quality and human health. Real world case scenarios will be examined to develop sustainable and appropriate solutions that consider environmental, individual, cultural, and economic factors.
ENVS 8435 Toxicology and Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course primarily deals with the sources, exposure, fate, transport, and effects (lethal and sub-lethal) of environmental and occupational stressors on humans and other living organisms of public health significance. Emphasis is placed on the effects of pollutants/contaminants from air, water, soil, and/or food on humans; and historically relevant incidents of environmental contaminants and impact on health. This course also introduces students to the concept of risk assessment, communication, and management of hazardous materials typically encountered in the environment and associated toxicological and public health implications. Importantly, this course also gives students the opportunity to explore intervention strategies against various chemical exposure scenarios and define schemes to prevent future contamination issues related to toxic substances.
Prerequisite(s): A minimum grade of "C" in PUBH 6532.

ENVS 9133 Vector-Borne and Zoonotic Diseases: Biology, Epidemiology and Control
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to important vector-borne and zoonotic diseases, including endemic and emerging zoonoses of historic and contemporary importance in the U.S. A and from a global perspective. It provides an overview of the epidemiology of major vector-borne diseases, the biology of their vectors and animal reservoir and their interaction with pathogens. It discusses the dynamics and principles of pathogen transmission, examines current approaches to vector and disease surveillance, and summarizes the public health challenges associated with control and prevention of these diseases and proper use of pesticides and other environmentally safe methods.
Prerequisite(s): A minimum grade of "C" in PUBH 6541 and PUBH 8133.

ENVS 2202 Environmental Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an interdisciplinary course integrating principles from biology, chemistry, ecology, geology, and non-science disciplines as related to the interactions of humans and their environment. Issues of local, regional, and global concern will be used to help students explain scientific concepts and analyze practical solutions to complex environmental problems. Emphasis is placed on the study of ecosystems, human population growth, energy, pollution, and other environmental issues and important environmental regulations.

EPID Epidemiology

EPID 7090 Selected Topics in Epidemiology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Allows the student the opportunity to receive specialized and/or focused instruction in an epidemiology topic not generally offered by the department.

EPID 7131 Epidemiology of Chronic Disease
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce the student to the ever-expanding area of chronic disease epidemiology. Students will be introduced to the current status of chronic disease and control programs, methods used in chronic disease surveillance, intervention methods, and modifiable risk factors. Some of the major chronic diseases such as cancer, cardiovascular disease, chronic lung disease, diabetes and arthritis will be discussed in detail.
Prerequisite(s): A minimum grade of "B" in PUBH 6533.

EPID 7133 Epidemiologic Research Methods I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on epidemiologic methods - primarily methods used in observational studies using existing data, cohort studies, case-control studies and randomized controlled trials. With respect to cohort studies, topics covered include cohort identification, ascertaining of exposure status, follow-up of cohort members, measuring outcomes, sources of bias and interpretational issues. Case-control topics include issues around defining cases and controls, control of confounding, and sources of bias/systematic error. Topics around randomized trials include randomization procedures, defining and assembling treatment/intervention arms, selecting study subjects and approaches to data collection. Other topics covered in this course include surveillance and ecologic studies. Pros and cons of all study designs will be discussed, in part through readings of published papers. Fundamentals of data analysis will also be addressed, but a detailed discussion of that material will be covered in EPID 7134.
Prerequisite(s): A minimum grade of "B" in BIOS 6541 or PUBH 6541.

EPID 7134 Epidemiologic Research Methods II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides instruction and hands-on experience in the analysis and interpretation of data from epidemiologic studies. Topics to be covered include epidemiology research questions that can be addressed by case-control and cohort studies, the rationale underlying the major techniques used to analyze data from case-control and cohort studies, the conditions under which these methods are appropriate and their relative advantages and disadvantages. Attention will be given to how interactions, confounders and nonlinear relationships among variables can be addressed along with interpretation of statistical software output from epidemiologic studies employing these designs and analytical methods.
Prerequisite(s): A minimum grade of "B" in EPID 7133.

EPID 7135 Epidemiology of Infectious Disease
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide students with an overview of the principles and practices of infectious diseases epidemiology with focus on how the presence and control of communicable diseases effects public health locally, nationally and internationally. Topics to be covered include: 1) general principles of infectious diseases epidemiology, including outbreak investigation, surveillance, analysis of infectious diseases data, and laboratory testing of specimens; 2) major modes of infectious disease transmission, including airborne, food and water, zoonotic, insect vector, blood, and sexual transmission; 3) different control strategies for infectious diseases, including infection control, antimicrobial management, immunization, risk factor modification, and screening; 4) the practical application of epidemiologic tools for the understanding and control of infectious diseases.
Prerequisite(s): A minimum grade of "B" in PUBH 6533 and PUBH 6541 and BIOS 6541.

EPID 7230 Social Epidemiology and Health Equity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on understanding the social determinants of health. The course will provide an analysis of major social variables that affect population health: poverty, social class, gender, race, family, community, work, behavioral risks, and coping resources. Readings and discussion center on understanding the theories, measurement and empirical evidence related to specific social conditions and experiences such as socioeconomic position, discrimination, social networks and support, work conditions, ecological level neighborhood and community social conditions, and social and economic policies. Biological and psychological mechanisms by which social conditions influence health will be discussed. Methods are introduced to operationalize each construct for the purposes of empirical application in epidemiologic research.
Prerequisite(s): A minimum grade of "B" in PUBH 6533.

EPID 7133 Epidemiologic Research Methods I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on epidemiologic methods - primarily methods used in observational studies using existing data, cohort studies, case-control studies and randomized controlled trials. With respect to cohort studies, topics covered include cohort identification, ascertaining of exposure status, follow-up of cohort members, measuring outcomes, sources of bias and interpretational issues. Case-control topics include issues around defining cases and controls, control of confounding, and sources of bias/systematic error. Topics around randomized trials include randomization procedures, defining and assembling treatment/intervention arms, selecting study subjects and approaches to data collection. Other topics covered in this course include surveillance and ecologic studies. Pros and cons of all study designs will be discussed, in part through readings of published papers. Fundamentals of data analysis will also be addressed, but a detailed discussion of that material will be covered in EPID 7134.
Prerequisite(s): A minimum grade of "B" in BIOS 6541 or PUBH 6541.

EPID 7134 Epidemiologic Research Methods II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides instruction and hands-on experience in the analysis and interpretation of data from epidemiologic studies. Topics to be covered include epidemiology research questions that can be addressed by case-control and cohort studies, the rationale underlying the major techniques used to analyze data from case-control and cohort studies, the conditions under which these methods are appropriate and their relative advantages and disadvantages. Attention will be given to how interactions, confounders and nonlinear relationships among variables can be addressed along with interpretation of statistical software output from epidemiologic studies employing these designs and analytical methods.
Prerequisite(s): A minimum grade of "B" in EPID 7133.

EPID 7135 Epidemiology of Infectious Disease
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide students with an overview of the principles and practices of infectious diseases epidemiology with focus on how the presence and control of communicable diseases effects public health locally, nationally and internationally. Topics to be covered include: 1) general principles of infectious diseases epidemiology, including outbreak investigation, surveillance, analysis of infectious diseases data, and laboratory testing of specimens; 2) major modes of infectious disease transmission, including airborne, food and water, zoonotic, insect vector, blood, and sexual transmission; 3) different control strategies for infectious diseases, including infection control, antimicrobial management, immunization, risk factor modification, and screening; 4) the practical application of epidemiologic tools for the understanding and control of infectious diseases.
Prerequisite(s): A minimum grade of "B" in PUBH 6533 and PUBH 6541 and BIOS 6541.

EPID 7230 Social Epidemiology and Health Equity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on understanding the social determinants of health. The course will provide an analysis of major social variables that affect population health: poverty, social class, gender, race, family, community, work, behavioral risks, and coping resources. Readings and discussion center on understanding the theories, measurement and empirical evidence related to specific social conditions and experiences such as socioeconomic position, discrimination, social networks and support, work conditions, ecological level neighborhood and community social conditions, and social and economic policies. Biological and psychological mechanisms by which social conditions influence health will be discussed. Methods are introduced to operationalize each construct for the purposes of empirical application in epidemiologic research.
Prerequisite(s): A minimum grade of "B" in PUBH 6533.
EPID 7231 R for Epidemiologists
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is an introductory course in R tailored to the needs of epidemiologists and epidemiological research. The course will include data management, mathematical and statistical computation and analytical statistical tools that epidemiologists can use in their research and practice.

EPID 7233 Public Health Surveillance Public Health Surveillance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide students with a strong foundation in public health surveillance of both health conditions and risk factors. The course will teach the theory and practice of surveillance supported by many examples of surveillance systems from the developed and developing world. The class will build on and reinforce basic epidemiologic concepts. Students will be given the opportunity to design and evaluate a surveillance system.
Prerequisite(s): A minimum grade of "B" in PUBH 6533.

EPID 7431 Stata for Epidemiologists
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course emphasizes data management and software applications using the Stata software package. Student will learn how to use Stata codes for the basics of data-management, data-reporting, graphics and use of do-files. Students will also learn basic Stata commands useful in epidemiological research including, but not limited to, descriptive statistics to estimate the incidence of a binary response and to characterize the demographic information supplied by study participants; statistical tests to identify univariate predictors associated with the binary response; graph the incidence of a binary response as a function of a predictor; and table of standardized means and proportions. Students will also be introduced to Stata codes for regression models. Particular focus is placed on applications pertaining to public health and health services research.

EPID 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.

EPID 8130 Field Methods in Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course addresses practical aspects of management and implementation of research studies and will focus on the conduct of research consistent with the scientific method. Topics include planning study activities, questionnaire design and implementation, and operations research.

EPID 8230 Observational Study Design and Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will focus on the design and conduct of observational research designs including cohort, case-control and cross-sectional approaches. This course will provide instruction related to issues specific to observational research approaches. Students will develop and present detailed study plans for each research approach.

EPID 9131 Epidemiology of Infectious Diseases of Direct Interpersonal Transmission
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers advanced topics in epidemiology of infectious diseases of direct interpersonal transmission, except sexual and bloodborne transmission. These include infectious diseases that are transmitted via airborne transmission, droplet transmission, or transmission via fomite or touching, etc. Important themes may include emergency preparedness and response (including outbreaks and pandemics), surveillance, as well as interventions that prevent and control transmissions. Computational, mathematical and statistical tools relevant to the practice of infectious disease epidemiology will be introduced.

EPID 9132 Epidemiology of Infectious Diseases Transmitted via Bodily Fluids
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers advanced topics in epidemiology of infectious diseases transmitted via bodily fluids, primarily sexually transmitted infections and bloodborne infections. Important themes may include outbreak preparedness and response, surveillance, and interventions that prevent and control transmissions. Computational, mathematical and statistical tools relevant to the practice of infectious disease epidemiology will be introduced.

EPID 9231 Chronic Disease Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore factors that determine the frequency and impact of chronic diseases from the global, national, and local perspective using public data available through the Center of Disease Control and Prevention and other sources.

EPID 9232 Cardiovascular Disease Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to enhance understanding about the determinants of cardiovascular diseases in populations and how to intervene most effectively to reduce morbidity and mortality due to stroke and heart disease. Emphasis is placed on the social determinants, behavioral risk factors, nutritional and dietary influences, and policy intervention of cardiovascular diseases. In addition, the course provides students with hands on experience to characterize the frequency and impact of chronic diseases and their risk factors from global, national and local perspective.

EPID 9233 Cancer Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course uses a combination of lecture, student discussion and independent research to review the fundamentals of cancer epidemiology including classic descriptive cancer EPI, basic cancer biology, etiology of common and uncommon human cancers, major and minor risk factors for cancer, screening techniques for early detection, cancer biomarkers, and current research in cancer epidemiology. Epidemiologic surveillance techniques including cancer registries and databases, international studies and intervention trials will also be covered. Study designs and epidemiologic methodology used in cancer research will be discussed throughout the course.

EPID 9431 Mental Health Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore factors that determine the frequency and distribution of mental health problems in populations. Strategies for mental health intervention will also be discussed.
EPY ED Psyc GOML

EPY 7080 Psychology of Learning & Learners
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of major behavioral, cognitive, and sociohistorical approaches to learning with consideration of learning across the life span. Sources for individual differences in learning are discussed.

ESED Element - Secondary Educa

ESED 4090 Special Topics
9 Credit Hours. 0-9 Lecture Hours. 0 Lab Hours.
Promotes specialized training appropriate to the needs of pre-service teachers. Attention will be given to a range of specific problems as they relate to the elementary, middle, or secondary schools and teaching field. Prerequisite(s): Approval of advisor, instructor, and department chair.

ESED 4700 Beginning of P-12 School Year Experience
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides teacher candidates an opportunity to experience the beginning of school year at their P-12 school placement site. Teacher candidates will participate in pre-planning activities and the first weeks of the school year. Teacher candidates will assist the classroom teacher with beginning of the year tasks such as setting up the classroom, establishing classroom routines, developing curriculum plans and student learning outcomes, attending professional meetings, etc. This experience begins the first day of pre-planning for the assigned school district placement and extends until the first day of Georgia Southern Fall Semester.

ESED 4799 EdTPA Internship Support Sem
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
edTPA Internship Support Seminar is a hybrid course for candidates who must retake edTPA. Candidates will meet with the edTPA Review Team to review portfolio results and discuss the best plan for the candidate to retake the edTPA. Based on the edTPA Review Team's recommendations a specific action plan will be developed, and this will determine if the candidate will enroll for 1, 2, or 3 credit hours in order to complete the retake process. Prerequisite(s): Satisfactory completion of ECED 5799 or MGED 5799 or ESED 5799 or SPED 5799 or SCED 5799.

ESED 4800 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
The student, under the direction of the instructor, will identify and study a topic applicable to a teaching field and level of certification. Prerequisite(s): Approval of advisor, instructor, and department chair.

ESED 5233 Applied Linguistics: ESOL
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of the major theories of first and second language acquisition and their implications for instruction. Cross Listing(s): ESED 5233G.

ESED 5233G Applied Linguistics: ESOL
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of the major theories of first and second language acquisition and their implications for instruction. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ESED 5233.

ESED 5234 Cultural Issues: ESOL
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The principles of culture and its link to second language learning, as well as, problems of teaching in a multicultural classroom. Cross Listing(s): ESED 5234G.

ESED 5234G Cultural Issues: ESOL
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The principles of culture and its link to second language learning, as well as, problems of teaching in a multicultural classroom. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): ESED 5234.

ESED 5235 Methods for ESOL
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to current second language acquisition theory and its application to curriculum development and instructional strategies. Participants in this course will design curriculum and learning activities that facilitate the use of English as a Second Language in listening, speaking, reading, and writing. In addition, participants will learn how to develop strategies for integrating school, neighborhood, and home resources to further the education of ESOL students. Prerequisite(s): A minimum grade of "C" in ESED 5233 or ESED 5234; and prior or concurrent enrollment with a minimum grade of "C" in ELEM 3732 or MGED 3731 or KINS 4430 or KINS 4441; and admission to Teacher Education Program or hold a valid teaching certification. Cross Listing(s): ESED 5235G.

ESED 5235G Methods for ESOL
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to current second language acquisition theory and its application to curriculum development and instructional strategies. Participants in this course will design curriculum and learning activities that facilitate the use of English as a Second Language in listening, speaking, reading, and writing. In addition, participants will learn how to develop strategies for integrating school, neighborhood, and home resources to further the education ESOL students. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Prerequisite(s): A minimum grade of "C" in ESED 5233 or ESED 5233G, ESED 5234 or ESED 5234G; and admission to Teacher Education Program or hold a valid teaching certification. Cross Listing(s): ESED 5235.

ESED 5455 Study Abroad in Teacher Education
3 Credit Hours. 3 Lecture Hours. 1-18 Lab Hours.
This course will prepare teacher candidates for travel and study abroad by engaging them in the study of the culture, cultural transmission to the young, the education system, and the role of the teacher in the designated country in which the study abroad field experience will occur. Candidates will travel to the country to engage in either supervised research or teaching activities to learn more about the instructional theories, philosophies, and practices that support the educational processes for children and adolescents who are comparable to K-12 students in the United States. A field experience is required. Cross Listing(s): ESED 5455G.

ESED 5455G Study Abroad in Teacher Education
3 Credit Hours. 3 Lecture Hours. 1-12 Lab Hours.
This course will prepare teacher candidates for travel and study abroad by engaging them in the study of the culture, cultural transmission to the young, the education system, and the role of the teacher in the designated country in which the study abroad field experience will occur. Candidates will travel to the country to engage in either supervised research or teaching activities to learn more about the instructional theories, philosophies, and practices that support the educational processes for children and adolescents who are comparable to K-12 students in the United States. A field experience is required.
ESED 5799 Student Teaching in P-12 Education
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Student Teaching is a period of guided teaching during which the candidate, under the direction of a clinical supervisor, takes increasing responsibility for leading the school experiences of a given group of learners over a period of consecutive weeks and engages more or less directly in many of the activities which constitute the wide range of a teacher's assigned responsibilities.

Cross Listing(s): ESED 5799G.

ESED 5799G Student Teaching in P-12 Education
9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Student Teaching is a period of guided teaching during which the candidate, under the direction of a clinical supervisor, takes increasing responsibility for leading the school experiences of a given group of learners over a period of consecutive weeks and engages more or less directly in many of the activities which constitute the wide range of a teacher's assigned responsibilities.

Cross Listing(s): ESED 5799.

ESED 6798 Supervised Practicum
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised teaching experience in a middle grade or secondary classroom. Emphasis is placed on instructional planning, classroom management, and student evaluations.

Prerequisite(s): A minimum grade of "C" in MGED 6131 or SCED 6131.

ESED 6799 Supervised Internship
9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A fifteen-week supervised teaching experience in the specific teaching field and grade levels for which one is being certified. Candidates seeking initial certification in middle grades or in one of the secondary or P-12 teaching fields will complete the supervised internship for initial certification. Emphasis is placed on instructional planning, methodology, classroom management, and assessment of student learning.

ESED 7090 Special Topics
9 Credit Hours. 0-9 Lecture Hours. 0 Lab Hours.
Promotes specialized training appropriate to the needs of inservice teachers. Attention will be given to a range of specific problems in the elementary, middle, or secondary classrooms.

ESED 7131 Enhancing Student Performance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course engages candidates in using data about students to inform their instructional decision-making and enhance student learning. Through an in-depth analysis of the formative assessment process, candidates learn how to design, implement, and evaluate a standards-based formative assessment system that engages learners in their own growth, monitors learner progress, and guides decision making.

ESED 7132 Framework for Teaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of teaching and learning strategies associated with effective teaching practices. Emphasis is placed upon the relationships that exit between student development, instructional practices, educational environments, continuous reflection and assessment, learning communities, and dispositions of the profession.

ESED 7133 Trends, Issues, and Research in Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to help practitioners develop critical frameworks for designing and evaluating educational practices and programs within the context of current trends and issues in education. Emphasis is placed on specific research findings and their application to practice, in addition to the development of analytical and communicative skills needed to improve teaching and learning. Candidates will formulate their own professional goals that will culminate with the presentation of a professional portfolio at the end of the program.

ESED 8130 Research on Current Trends and Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides candidates the opportunity for in-depth exploration and reflection of current trends, issues and research of effective teaching and learning. Emphasis is placed on the topics of reform/renewal and the moral dimensions of teaching and learning. Candidates will identify researchable topics, examine and synthesize quantitative and qualitative research related to such topics and write a first draft of a literature review.

Prerequisite(s): Admission into the Ed. S. Program.

ESED 8131 Teacher Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an action-oriented experience that explores the multiple aspects of the teacher as a leader. Teachers will discover their own leadership potential as they delve into the characteristics of leadership, adult development, the school culture, interpersonal and technical skills, and tasks and functions of leadership. Examination and application of processes, systems, strategies, and leadership to achieve results in classroom, building, and larger educational arenas. A goal is to develop a working knowledge of characteristics of successful organizational systems, core values, and educational concepts that ensure continual improvement of teaching and leadership methods.

Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in ESED 8130.

ESED 8532 Curriculum and Instruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide the experienced teacher and graduate candidate with an opportunity to examine and explore current trends and issues in curriculum and instruction and the impact of these trends and issues on student learning outcomes. A focus is on the critical evaluation of traditional and non-traditional curriculums, the influence of professional standards on curriculum across content areas, and the development of effective instructional practices to enhance academic achievement for all students. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

Prerequisite(s): Prior or concurrent enrollment in ESED 8130 with a minimum grade of "C".

ESED 8537 Trends: Math/Science/Computer Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Current trends and issues in teaching mathematics, science, and computing technology in the schools. Emphasis is placed on research findings, recommendations of professional organizations and effective practices that connect the teaching of mathematics and science, supported by computing technology. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

ESED 8538 Applications: Math/Science Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Addresses the integration of mathematics and science in the classroom and serves to correlate knowledge from science and mathematics courses with practical applications in local industries. Topics focus on applications of mathematics in science contexts, while emphasizing the relevance of mathematics and science to every day life. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

ESED 8539 Computer Technology in Math/Science Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Applications of computing technologies such as graphics calculators, computers and the Internet in the classroom. Emphasis is placed on integrating these technologies into the teaching of school mathematics and science. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.
ESED 8839 Seminar and Field Study
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
Students will initiate, complete and present an acceptable field-based research study, developed and approved in EDUR 8434. This course will focus on collecting, organizing and analyzing data, as well as composing a formal research paper based on the research study. The course culminates with an oral presentation of the study. Seminars will be held that focus on current trends, issues, and research in one's teaching field and certification level. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field. "Students are limited to register for this course twice during the program of study".
Prerequisite(s): A minimum grade of "C" in EDUR 8131 and EDUR 8434 and ESED 8130 and ESED 8131 and ESED 8132 and ITEC 8231.

ESED 8890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
The candidate, under the direction of the instructor, will identify and study a topic applicable to one's teaching field.

ESED 9132 Critical Analysis of Schools and Educational Practices
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Ed.D. Doctoral candidates will engage in critical examination of a variety of current schooling issues, reform efforts, and educational practices and analyze the implications for research and practice in teaching and learning. From this examination and analysis candidates will develop strategies for planning, implementing, and sustaining school change related to a specific schooling issue or practice. A field component is included.
Prerequisite(s): Minimum grade of "B" in ESED 9131 and ESED 9233, and minimum grade of "C" in EDUR 9131; Ed.D. admission.

ESED 9231 The Teacher Educator
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for the doctoral candidate who aspires to be a teacher educator at a college or university. A main focus is the role of the teacher educator and expectations for teaching, scholarship, and service. Candidates will apply knowledge and skill from the course in developing a syllabus and course materials for a teacher preparation course and they will develop a professional portfolio.
Prerequisite(s): Minimum grade of "B" in ESED 9131 and ESED 9233; EDD admission.

ESED 9232 Supervision of Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to prepare students who have prior teaching experience to use principles of supervision to help improve classroom performance and to create better learning communities. Participants will examine supervisory theories, research, and practice to develop knowledge, skills, and supervisory styles.
Prerequisite(s): Minimum grade of "B" in ESED 9131 and ESED 9233; EDD admission.

ESED 9631 Advanced Seminar in Teaching and Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This seminar explores enduring and contemporary topics in the field of education through analytical and critical lenses. Such lenses enable candidates to unravel the philosophical, ethical, and political assumptions that undergird educational practices and facilitate reflection and action (praxis) on the part of candidates. Prerequisite(s): Minimum grade of "B" in ESED 9131 and ESED 9233.

ESED 9799 Internship in Teacher Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The internship is designed to provide an opportunity for individuals to supervise teaching experiences in assigned face-to-face classrooms. Supervision of student teachers and/or methods students may be included. Emphasis is placed on pedagogy for adult learners, modeling of best practices, and systematic student evaluation.
Prerequisite(s): Minimum grade of "B" in ESED 9131 and ESED 9233, and minimum grade of "C" in ESED 9232; EDD admission.
Cross Listing(s): ESED 9232.

ESL English as a Second Lang

ESL 0090A Reading and Writing I
4 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
A high beginning level reading and writing class for non-native speakers of English.

ESL 0090B Listening and Speaking I
4 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
A high beginning level class designed to help non-native speakers of English develop communication skills through a variety of listening and speaking activities.

ESL 0090C Grammar I
4 Credit Hours. 5 Lecture Hours. 0 Lab Hours.
A basic structure class for high beginning non-native speakers of English.

ESL 0090D Computer I
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
A class designed to help high beginning non-native speakers of English learn how to use the computer as a way of improving their language skills.

ESL 0090E U. S. Culture I
3 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
An introduction to the customs, behaviors, and attitudes most prevalent in US society, including experiential learning through field trips.

ESL 0091A Reading and Writing II
4 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
A low intermediate reading and writing class for non-native speakers of English.

ESL 0091B Listening and Speaking II
4 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
A low intermediate level class designed to help non-native speakers of English develop communication skills through a variety of listening and speaking activities.

ESL 0091C Grammar II
4 Credit Hours. 5 Lecture Hours. 0 Lab Hours.
A low intermediate structure class for non-native speakers of English.

ESL 0091D Computer II
3 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
A low intermediate level class designed to help non-native speakers of English learn how to use the computer as a way of improving their language skills.

ESL 0091E U. S. Culture II
3 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
A low intermediate course on the customs, behaviors, and attitudes most prevalent in US society, including experiential learning through field trips.

ESL 0092A Reading and Writing III
4 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
A high intermediate level reading and writing class for non-native speakers of English.

ESL 0092B Listening and Speaking III
4 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
A high intermediate level class designed to help non-native speakers of English develop communication skills through a variety of listening and speaking activities.
ESL 0092C Grammar III  
4 Credit Hours. 5 Lecture Hours. 0 Lab Hours.  
A high intermediate structure class for non-native speakers of English.

ESL 0092D Computer III  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
A high intermediate class designed to help non-native speakers of English learn how to use the computer as a way of improving their language skills.

ESL 0092E U. S. Culture III  
3 Credit Hours. 4 Lecture Hours. 0 Lab Hours.  
An in-depth course on the customs, behaviors, and attitudes most prevalent in US society, including experiential learning through field trips.

ESL 0094 English for Academics I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed to provide students whose native language is not English with a foundation in reading and writing in English in an academic environment. It emphasizes understanding and producing Western rhetoric through vocabulary development, critical reading, and the writing of several papers, including summary, argument, and writing with sources.  
Prerequisite(s): Placement dependent upon score on International Standardized Testing and/or TOEFL.  

ESL 0095 English for Academic Purposes II  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course is designed to provide students whose native language is not English with a foundation in listening to and speaking in an English in an academic environment. It emphasizes improving oral communication skills through vocabulary development, listening to different types of academic communications from lecture to group discussions, note-taking in English, participating in whole class and small group discussions of academic research, and giving formal research-supported presentations.  
Prerequisite(s): Prerequisite(s): Successful completion of Georgia Southern’s English Language Program.

ESPY School Psychology

ESPY 7130 Professional School Psychology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study will be made of the development of school psychology and its present status and trends. The professional responsibilities of the school psychologist will be explored in the context of social, legal and ethical issues that affect practice.  
Prerequisite(s): Admission to School Psychology program or permission of instructor.

ESPY 7131 Behavioral Interventions  
3 Credit Hours. 3 Lecture Hours. 4 Lab Hours.  
Prepares school psychologists, counselors and classroom consultants to manage children with moderate to severe conduct problems so that they can profit from classroom instruction. Includes symptoms, diagnosis, treatment and management of children with conduct disorders that hamper learning.  
Prerequisite(s): Admission to School Psychology program or permission of instructor.

ESPY 7132 Classroom-based Performance and Psychometrics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed to develop a basic understanding of comprehensive psychoeducational assessment procedures for children with learning or behavioral problems. The focus is basic multi-factor assessment design and psychometrics. Training in multi-factored assessment skills, particularly as they relate to classroom performance, observation, interviewing skills, oral language tests, and achievement tests. Prerequisite(s): Admission to the School Psychology program.

ESPY 7133 Implications of Child Psychopathology in Schools  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed to provide graduate students with knowledge of childhood psychopathology and its implications in educational settings. Students will become aware of various mental health disorders in childhood and learn about a range of behaviors that differ from accepted social standards within our cultural institutions. Discussion will focus on the diagnostic criteria of various childhood mental health disorders and implications of childhood psychopathology for schools.

ESPY 7230 Developmental Diagnosis in Early Childhood  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course prepares school psychologists, counselors, social workers, special education personnel, and classroom teachers and consultants to develop awareness of theoretical foundations, research and practice relevant to the development of children birth through twenty-one. Developmental diagnosis in early childhood is the focus, incorporating physical, cognitive, language, social-emotional, and adaptive development areas. Also included is discussion of symptoms, diagnosis, early intervention and treatment, IDEA disability categories and eligibility, and management of children at-risk.

ESPY 8130 Curriculum-based Assessment and Response-to-Intervention  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed to provide knowledge and skills in Curriculum Based Assessment (CBA), specific Curriculum Based Measures (CBM), problem-solving assessment, and response to intervention (RTI), as it relates to academic achievement. Specifically, the course will enable candidates to engage in early identification, determining the magnitude of deficits when they are present, develop academic goals and intervention plans, and monitor student progress toward academic goals.  
Prerequisite(s): Minimum grade of “B” in ESPY 7132; admission to the School Psychology program.

ESPY 8131 Individual Intellectual Assessment  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed for students majoring in School Psychology. It provides intensive experience in the administration, scoring, and score-based interpretation of individual psychological tests for educational purposes.  
Prerequisite(s): Minimum grade of “B” in ESPY 7132; admission to the School Psychology program.

ESPY 8132 Addressing Diversity in School-based Conceptualization  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course buildings on knowledge and skills in intellectual assessment that school psychology students gained in ESPY 8131. It provides experience in integrating all assessment data, interpreting test data, conceptualizing, and report writing. The focus of the course is to provide graduate students with a foundation of knowledge, awareness, and skills in multicultural issues related to school-based conceptualization. The course will cover theories, research, and practices associated with school-based conceptualization utilizing multicultural competence with emphases on within-group differences and the intersections of race, ethnicity, gender, religion, sexuality, social class, and disability/exceptionality.  
Prerequisite(s): Minimum grade of “B” in ESPY 8131; admission to the School Psychology program.

ESPY 8133 Personality and Behavioral Assessment in the Schools  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides school psychology students with extensive experience in administering, scoring, and interpreting personality and behavioral assessment measures. School psychology students will also learn to conduct a clinical interview and integrate information from various assessment sources to write an integrated report.  
Prerequisite(s): Minimum grade of “B” in ESPY 8132.
ESPY 8135 Crisis Intervention and Prevention
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course investigates exemplary crisis intervention and prevention programs that promote the mental health and physical well-being of ALL individuals (schools and communities). This course also examines the history and development of crisis intervention. A focus will be developing skills and knowledge required to effectively intervene and assist children, adults, and families (including teachers and administrators in schools) during periods of crisis. The course will highlight the importance of prevention in decreasing the number and severity of crisis situations. Criteria for determining empirically validated programs are discussed.
Prerequisite(s): Minimum grade of “B” in COUN 7332 or PSYC 7333.
ESPY 8136 School, Home, and Community Partnering
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for students majoring in School Psychology. Graduate candidates develop skills in partnering with parents/guardians and community agencies/resources to improve the academic, behavioral, and social-emotional functioning of the Pre-K through 12 student.
ESPY 8230 Consulting in Educational Settings
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Prerequisite(s): Admission to Ed.S. in School Psychology program or permission of instructor.
ESPY 8631 Seminar in School Psychology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides a review of professional competency issues, legal/ethical issues, practice guidelines and practice applications for students entering the School Psychology Internship. Prerequisite: Admission to Ed.S. in School Psychology program or permission of instructor.
ESPY 8737 Practicum in School Psychology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Experience with school children having learning problems will be provided. Complete child studies will be made and students will develop competence in working with children, teachers, educational specialists and parents under supervision.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of “B” in ESPY 8133 or permission of instructor and proof of professional liability insurance.
ESPY 8738 School Psychology Internship I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Supervised field experience to provide the comprehensive range of experiences in the professional role of school psychologists. Experiences will be individually planned to include assessment, direct interventions, indirect interventions and evaluation/research.
Prerequisite(s): ESPY 8737, admission to EDS in School Psychology, and proof of professional liability insurance.
ESPY 8739 School Psychology Internship II
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Supervised field experience to provide the comprehensive range of experiences in the professional role of school psychologists. Experiences will be individually planned to include assessment, direct interventions, indirect interventions and evaluation/research.
Prerequisite(s): ESPY 8738, admission to EDS in School Psychology, and proof of professional liability insurance.
ESPY 8839 Action Research in School Psychology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students will apply their knowledge of research skills by preparing and completing a research project related to a practical problem in school psychology or student services. Ethical and legal guidelines as appropriate for the project are to be followed. Format decisions will be made in consultation with appropriate faculty member. Students are limited to register for this course twice during the program of study. Prerequisite(s): A minimum grade of “C” in EDUR 8434.
ESPY 8890 Directed Individual Study
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course permits specialization beyond regular course content through in-depth study of individually selected topics of interest and importance in school psychology or student services. The study will be directed by the instructor.
Prerequisite(s): Permission of advisor.

ETHC Ethics

ETHC 2000 Interdiscip Ethics & Values
2-3 Credit Hours. 2-3 Lecture Hours. 0 Lab Hours.
An interdisciplinary examination of the relationship between ethical theory and moral practice in specific areas of our society. Involves several modules taught by different professors. The first Philosophical Framework Module will provide an explanation and analysis of the principal ethical theories of the Western world and subsequent modules will focus on moral issues and case studies in specified areas.
Prerequisite(s): Completion of ENGL 1101.

EURO European Union

EURO 2000 European Union
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An interdisciplinary course (history, culture, political science, and economics) that treats the creation and functioning of the European Union in the context of Modern European history and the significance of the EU experiment fro the rest of the world.
Prerequisite(s): Completion of ENGL 1101 and HIST 1111 or HIST 1112.
EURO 3234 Introduction to the European Union
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the history, institutions, policies, and cultures of the European Union and its member states.
Cross Listing(s): INTS 3234, POLS 3234.
EURO 3990 Topics In European Union Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics on issues in European Union studies or in European Union relations with the outside world. May be repeated for credits as topics vary.
Prerequisite(s): EURO 2000.
EURO 4090 Selected Topics in the International Studies
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Selected Topics in International Studies.
Cross Listing(s): INTS 4090.
EURO 4130 European Law and Legal Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the legal institutions that constitute the European Union, and the legal processes of those institutions. The course begins with a brief overview of the European Union, including the historical antecedents that preceded the present day entity of the EU.
Prerequisite(s): A minimum grade of “C” in POLS 1101.
EURO 4160 Federalism and Multilevel Governance in the EU
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of multilevel governance in the European Union and the United States, comparing American federalism to the EU's less centralized, more confederal system. The origins and development of each system are examined, as are the complex relationships between the different levels of government in each.

EURO 4230 Doing Business in the European Union and United States
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is intended for non-business majors. For this reason, an introduction to economics is included. The course compares the general legal rules and cultural environment of running a business in the European Union and the United States. Topics include government regulations, labor relations, cultural values, consumer behavior, mergers, and marketing.
Prerequisite(s): A minimum grade of "C" in EURO 3234.

EURO 4260 European Monetary Union
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the history and evolution of the European Economic and Monetary Union and its impact on the United States and global economy.

EURO 4330 Science and Technology Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of this course is to introduce the Science and Technology Policy of the European Union (EU). This is an introductory course about the history, goals, and issues of the EU related to science, industry, and technology.
Prerequisite(s): A minimum grade of "C" in EURO 3234.

EURO 4430 EU Environmental Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of critical issues in EU environmental policy, including key environmental problems, the challenges of making and implementing environmental policy in the EU's multilevel governance system, and future prospects for EU environmental regulation.

EURO 4500 Seminar in Euro Union Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The capstone seminar for the European Union Certificate program. Topics vary.

EURO 4530 European Social Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of social policy in Europe and of current social policy arrangements in Europe and the EU.

EURO 4630 EU Communications and Media
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A comparison of communications and media in the EU and in the United States. The course examines media law, policies, and practices in voice telephony, the Internet, and social media.

EURO 4730 EU Foreign Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the foreign policy of the EU. Examines how EU foreign policy is made, the intersection of national and EU foreign policies, and EU policies regarding key issues in countries and areas of the world.

EURO 4760 US-EU Relations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of relations between the United States and the European Union, including US-EU cooperation on global issues and the future of Transatlantic relations in a changing world.

EURO 4830 EU Studies Capstone Course
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A capstone course for students in the EU Studies Certificate Program. The course explores various topics in a way that allows students to synthesize their knowledge of the EU.

FACS 4090 Selected Topics in Family and Consumer Sciences
3 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
Scheduled on an infrequent basis to explore new research and emerging knowledge in Family and Consumer Sciences and related fields. This course will carry a subtitle.

FILM Film

FILM 2200 Introduction to Cinema
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to Cinema Studies through critical appreciation of cinema form. Areas of study include a survey of production, distribution, film reception, ideology, film theory and representation with an emphasis on critical film analysis.

FILM 3030 Selected Topics in Cinema
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Courses will cover a variety of special topics in film studies, such as specific film genres, auteurs, critical approaches, historical film movements, and representation. May be repeated for additional credit with new topics.
Prerequisite(s): FILM 2200 or Permission from Instructor.
Cross Listing(s): ENGL 3030.

FILM 3100 Intro to PR
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the history, theories, and principles of public relations, and the role and practice of public relations in various organizational contexts.
Prerequisite(s): COMM 2332.

FILM 3331 History of Cinema
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of aesthetic, economic, social, technological and industry development of cinema from 1896 to the present day with an emphasis on film movements and film analysis.
Prerequisite(s): FILM 2200 or Permission from Instructor.
Cross Listing(s): ENGL 3331.

FILM 3332 Documentary Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of Documentary studies that examines film form, reception, historical developments, ethics, key figures and representation.
Prerequisite(s): FILM 2200 or Permission from Instructor.
Cross Listing(s): ENGL 3332.

FILM 3333 Cinema Genres
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analysis of cinema form, genre conventions, film theory, culture and the film industry through a survey of film genres. May be repeated for additional credit with new topics.
Prerequisite(s): FILM 2200.
Cross Listing(s): ENGL 3333.

FILM 5010G Topics In Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Subject announced when course offered. For example, film genres, auteurs, critical approaches, and individual historical periods. May be repeated for additional credits when topics change.

FILM 5025G Pop Culture Theory & Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of various forms of popular cultural expression, such as film, television, popular literature, magazines, and music. Critical methodologies present may include semiotics, genre criticism, ethnography, feminism, and cultural studies.
Prerequisite(s):

include hedging, diversification, risk transfer and insurance are examined. An in-depth examination of film theory and criticism concepts introduced in Intro to Cinema Studies with an emphasis on analysis of selected film texts.

Prerequisite(s): A minimum grade of "C" in FILM 2200 and ENGL 2100 or PHIL 2010.

Cross Listing(s): ENGL 5035.

FINC 5035G Film Theory and Criticism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the major schools of film theory and criticism and their application to selected film texts.

FINC 5040 Women in Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Representations of women in film, may include issues such as feminist film theory and criticism, presentation of female characters in major film.

Cross Listing(s): ENGL 5040.

FINC 5040G Women And Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

FINC 5510G Film And Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Relationship between film and literature with special emphasis on the adaptation of literature into film.

FINC Finance

FINC 3130 Financial Tools and Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamental concepts and analytical methods in finance. Emphasis on spreadsheet applications, mathematics of finance, and statistical analysis.

Prerequisite(s): A minimum grade of "C" in ACCT 2101.

FINC 3131 Principles of Corporate Finance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of fundamental concepts, theories, tools of analysis and problems of managerial finance in business.

Prerequisite(s): A minimum grade of "C" in ACCT 2101 or ACCT 2030.

FINC 3132 Intermediate Financial Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of financial risk and return, capital budgeting, valuation, capital structure, working capital management and current topics in financial management.

Prerequisite(s): A minimum grade of "C" in FINC 3131.

FINC 3133 International Finance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the financial markets and institutions which make international trade and capital flows possible. Its emphasis is on understanding exchange rates and hedging the risks inherent in cross-border transactions.

Prerequisite(s): A minimum grade of "C" in FINC 3131.

FINC 3134 Enterprise Risk Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the identification, evaluation, financing and control of both financial and business risk and the techniques that are used to manage cash inflows and outflows in such a way as to maximize the value of the firm. Integrated risk management of the entire business enterprise is emphasized throughout the course. Risk management techniques to include hedging, diversification, risk transfer and insurance are examined.

Prerequisite(s): A minimum grade of "C" in FINC 3131.
FINC 4234 Personal Insurance Planning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of alternative methods of managing the primary pure risk exposures of individuals: life, health and property-casually risks. The course emphasizes the use of insurance as the primary tool for managing hazard risks facing households.
Prerequisite(s): A minimum grade of "C" in FINC 3131.

FINC 4331 Bank Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an introduction to the commercial bank industry, its organization, structure, and regulation. The lending and investment functions of banking are examined along with liability and capital management issues including de novo banking and merger/acquisition. Its purpose is to offer an overview of commercial banks and their delivery role in the financial services industry.
Prerequisite(s): A minimum grade of "C" in FINC 3131.

FINC 4332 Bank Management II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will prepare students for decision-making under uncertainty. Bank management decisions are based on current financial positions and target measures of success. Decisions are influenced by anticipation of variations in market conditions, including competitive forces, governmental regulation, monetary policy and macro-economic variables.
Prerequisite(s): A minimum grade of "B" in FINC 4331.

FINC 4333 Commercial Bank Lending
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to bank lending, focusing on key concepts and tools in credit analysis "statement logic and cash flow cycles" and applying them in commercial loan underwriting and consumer lending. Attention will also be given to core loan administration practices and its role in managing portfolio quality risks.
Prerequisite(s): A minimum grade of "C" in FINC 3131.

FINC 4431 Principles of Real Estate
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers a real estate transaction in enough depth to guide the student through a transaction with minimal outside help (attorney, etc.). It also helps the student identify those economic factors that will add value to the property through time. In addition, the student will be introduced to several areas of real estate as a possible profession. Prerequisite(s): Junior Standing.

FINC 4433 Real Estate Appraisal
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of the valuation of real estate and of ownership rights in real estate. Concentration is primarily on residential real estate. Prerequisite(s): Junior standing.

FINC 4435 Real Estate Finance and Investments
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analysis of real estate markets, investment decisions and the form and function of financing alternatives. The student should acquire a basic understanding of investment cash flow analysis and the calculations and measurements required for the quantitative real estate investment, valuation and income-property analysis.
Prerequisite(s): A minimum grade of "C" in FINC 3131.

FINC 4532 Life, Health and Retirement Planning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analysis of personal and business life and health insurance needs, characteristics of plans appropriate to meet needs, and unique legal and tax aspects in insurance planning. This includes a study of basic concepts and managerial concerns underlying the group insurance mechanism and the characteristics of various qualified retirement planning vehicles. Consideration is also given to functional aspects of life insurer operations such as ratemaking, reserving, underwriting and financial statement analysis.
Prerequisite(s): A minimum grade of "C" in FINC 3131.
FINC 7231 Financial Problems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of financial risk and return, capital budgeting, valuation, capital structure, working capital management and current topics in financial management.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

FINC 7232 Global Finance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the financial markets and institutions that make international trade and capital flows possible. The course provides a framework within which the key financial decisions of the multinational firm can be analyzed.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

FINC 7233 Investment Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a survey of domestic financial markets. Topics covered include interest rates, stocks, bond, derivative securities, retirement issues, and mutual funds.
Prerequisite(s): A minimum grade of "C" in FINC 7231.

FINC 7334 Corporate Financial Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an intensive review of modern financial theory as it applies to corporate finance, to include capital structure, dividend policy, mergers and acquisitions, taxation, cash flow, financial distress, and financial risk management. The course will introduce students to both the classical theories and the current trends in corporate finance.

FMAD Fash Merchand/Apparel Des

FMAD 1234 Apparel I
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
A study of selection, fit and care of wearing apparel with the primary focus on custom garments. Experiences include traditional and contemporary methods of apparel construction.

FMAD 2130 Understanding Aesthetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth investigation of and a review of contemporary trends and issues of aesthetics and how aesthetics applies to the roles of the fashion/apparel industry professional.

FMAD 2230 Social and Psychological Aspects of Clothing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The cultural, social, psychological, and economic aspects of clothing which affect the selection and usage of clothing by the consumer.

FMAD 3030 Selected Topics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Scheduled on an infrequent basis to explore special areas in Fashion and Apparel and will carry subtitle.

FMAD 3231 Fashion Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey course of the fashion industry. Fashion terminology, influential designers of the nineteenth and twentieth centuries, influences on fashion, leading fashion centers, auxiliary fashion enterprises, career opportunities and current trends in merchandising are discussed.
Prerequisite(s): FMAD 1234, FMAD 2230, LSTD 2106.

FMAD 3232 Principles of Merchandising
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the processes required to bring consumer goods to the marketplace. The retail buyer's role is explored in the selection process at the wholesale market, resource development, assessment of quality of goods and classification merchandising.
Prerequisite(s): FMAD 3231.

FMAD 3233 Visual Merchandising
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles and applications of the visual presentation of merchandise including display, design and materials appropriate to a store's image.
Prerequisite(s): FMAD 3232.

FMAD 3234 Textiles
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasizes the fiber characteristics, fabric properties, and manufacturing processes that affect the selection, use, and care of textile goods.
Prerequisite(s): FMAD 3231.

FMAD 3235 History of Costume
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Chronological survey of the development and characteristics of historic costume from the ancient Egyptian culture to the present.

FMAD 3236 Apparel II
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Investigates the art principles as they relate to apparel selection and the importance of quality and price in wardrobe selection. The student gains experience in advanced construction skills necessary to manipulate current fashion fabrics into a garment.
Prerequisite(s): A minimum grade of "C" in FMAD 1234.

FMAD 3237 Apparel Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth investigation of the development, production, and comparison of wearing apparel. Focus on the structural, functional and decorative aspects of apparel. Emphasis on sourcing of companies and materials, costing of product line, and comparing design and manufacturing techniques that affect price, quality, and size of apparel.
Prerequisite(s): FMAD 1234.

FMAD 3238 Costume Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Techniques in fashion illustration and technical drawing for application in the fashion industry.

FMAD 3239 Fashion Illustration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Techniques in fashion illustration and technical drawing for application in the fashion industry.

FMAD 3330 Global Apparel and Textile Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analysis of social responsibility, economics, cultural values, and trade policy on the global production, distribution, and consumption of apparel and textile products. Pre requisite(s): A minimum grade of "C" in FMAD 3231.

FMAD 4231 Apparel Design Analysis I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of principles involved in designing apparel using flat pattern techniques.
Prerequisite(s): FMAD 3236.

FMAD 4232 Apparel Design Analysis II
3 Credit Hours. 0.3 Lecture Hours. 0 Lab Hours.
Application of principles involved in designing apparel using draping techniques.
Prerequisite(s): FMAD 3236.

FMAD 4234 Fashion Presentation and Promotion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles and practice of merchandise presentation and promotion at the wholesale and retail levels. Experience in planning, executing, and evaluating fashion promotions.
Prerequisite(s): FMAD 3232 or Permission of Instructor.

FMAD 4235 Computer-Aided Design
3 Credit Hours. 0.3 Lecture Hours. 0 Lab Hours.
Investigation and application of computer technology in textile design, apparel design and apparel design and apparel manufacturing.
Prerequisite(s): FMAD 1234 and either CISM 1110, CISM 1120, CISM 1130.
FMAD 4236 Fashion Study Tour
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Supervised field study which includes an integrative study of the fashion industry. Visits include historic costume collections, wholesale showrooms, auxiliary fashion enterprises and noted retail stores. Seminars on campus and at pre-arranged appointments during tour dates. While planned specifically for Fashion Merchandising and Apparel Design majors, other interested persons who qualify for Admission may participate.
Prerequisite(s): FMAD 3231 or Permission of Instructor.

FMAD 4630 Professional Seminar in Fashion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
To prepare Fashion Merchandising and Apparel Design students for professional practice in their major emphasis area. This course focuses on professional development, portfolio development, fashion industry-based knowledge and skills assessment. Strategies for acquiring an internship and/or employment are also explored.
Prerequisite(s): A minimum grade of "C" in all of the following: FMAD 3231, FMAD 3234, FMAD 3235 and FMAD 3237.

FMAD 4790 Internship in FMAD
12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Supervised work-study program in fashion and apparel industry selected by the student and preapproved by the student's advisor. Students will work full-time for the entire semester while enrolled in the internship program. Students must agree to abide by regulations governing all employees of the sponsor.
Prerequisite(s): 2.0 GPA and approval of instructor.

FMAD 4899 Directed Individual Study
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to investigate an area of interest under the direction of a faculty mentor.
Prerequisite(s): Permission of Instructor.

FORL Foreign Language

FORL 1090 Selected Topics in Foreign Languages
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Elementary level foreign language topic.

FORL 2090 Intermediate Foreign Language
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Study of a foreign language at the Intermediate level. Continued building upon proficiency skills (speaking, writing, listening, and reading) and cultural understanding. Focus on development of the ability to create with the language, to resolve simple situations, to ask and answer questions, and to begin to describe in detail and to narrate.

FORL 3030 Selected Topics in Foreign Languages
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Study of a topic in Foreign Languages literature, culture, society, thought or language not included in the regular offering. Concentrated study of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in FORL 2090 Intermediate II.

FORL 3431 Foreign Languages Methods: P-8
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course includes the study of the historical, theoretical, and practical dimensions of materials and methodology in foreign language education. Through lectures, discussions and class activities, students will become familiar with the theory and practice of teaching foreign languages at the P-8 level. These activities include the reading and discussion of text materials; development of unit plans, lesson plans, and assessment instruments, evaluation of materials and in-class demonstrations of teaching techniques.
Prerequisite(s): Successful completion of the Pre-Professional Education Black and admission to Teacher Education Program.

FORL 3432 Foreign Languages Methods: 8-12
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course includes the study of the historical, theoretical, and practical dimensions of materials and methodology in foreign language education. Through lectures, discussions and class activities, students will become familiar with the theory and practice of teaching foreign languages at the 9-12 level. These activities include the reading and discussion of text materials; development of unit plans, lesson plans, and assessment instruments, evaluation of materials and in-class demonstrations of teaching techniques.
Prerequisite(s): Successful completion of the Pre-Professional Education Block and admission to Teacher Education Program.

FORL 3750 Internship I - Pre-Student Teaching
3 Credit Hours. 0 Lecture Hours. 1-15 Lab Hours.
Opportunity to observe and participate in classroom activities in a supervised P-12 public school setting.

FORL 4030 Selected Topics in Foreign Languages
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Study of a topic in Foreign Languages literature, culture, society, thought or language not included in the regular offering. Continued development of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in FORL 2090 Intermediate II.

FORL 4393 Practicum in Foreign Language Education
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides field experience opportunities for students pursuing a bachelor's degree in Spanish, French, or German education to relate principles and theories to actual practice in diverse educational settings.

FORL 4750 Internship II - Student Teaching
12 Credit Hours. 0 Lecture Hours. 1-12 Lab Hours.
Supervised field-based teaching experiences providing the opportunity to use knowledge and skills in a P-12 public school setting.

FORL 4790 Internship in Foreign Languages
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Internship in non-English language. Prerequisite(s): Departmental approval.

FORL 4890 Directed Study in Foreign Languages
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Concentrated study of a topic in literature, culture, society, thought or language. May be repeated for credit provided a new topic is studied.
Prerequisite(s): Department approval.

FORL 5030G Selected Topics in Foreign Languages
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Selected topics in foreign languages.
Prerequisite(s): Department approval.

FORL 5500 Foreign Language Exit Exam
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This is a non-credit course that is required of BA-Modern Languages majors. Generally to be taken during the final semester of coursework in the language. Offered only in Fall and Spring. Permission of advisor or chair required.
Prerequisite(s): Departmental approval. Cross Listing(s): FORL 5500G.

FORL 5500G Foreign Language Exit Exam
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This is a non-credit course that is required of MA-Spanish and MAT-Spanish graduates. Generally to be taken during the final semester of coursework in the language. Offered only in Fall and Spring. Permission of advisor or chair required. Graduate students will be assigned extra work that undergraduates will not be required to do.
Prerequisite(s): Department approval. Cross Listing(s): FORL 5500.
FORL 6431 Foreign Language Methods P-8
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course includes the study of the historical, theoretical, and practical dimensions of materials and methodology in foreign language education. Through lectures, discussions and class activities, students will become familiar with the theory and practice of teaching foreign languages at the P-8 level. These activities include the reading and discussion of text materials; development of unit plans, lesson plans, and assessment instruments, evaluation of materials and in-class demonstrations of teaching techniques.

FORL 6432 Foreign Languages Methods 9-12
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course includes the study of the historical, theoretical, and practical dimensions of materials and methodology in foreign language education. Through lectures, discussions and class activities, students will become familiar with the theory and practice of teaching foreign languages at the 9-12 level. These activities include the reading and discussion of text materials; development of unit plans, lesson plans, and assessment instruments, evaluation of materials and in-class demonstrations of teaching techniques.

FORL 6433 Practicum in Foreign Languages
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides field experience opportunities for students pursuing the M.A.T., with content areas in a foreign language to relate principles and theories to actual practice in diverse educational settings.
Prerequisite(s): A minimum grade of "C" in FORL 6431 and FORL 6432.

FORL 6750 Teaching Internship
9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Supervised field-based teaching experience providing the opportunity to use knowledge and skills in a grades K-12 setting. For post-baccalaureate teacher certification.

FOUN Education Foundations

FOUN 5010G Educational Test & Measurement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A beginning course in measurement which covers statistical methods, research design, and research problems. Students are provided experiences in the design, administration and evaluation of teacher made tests.

FRCT Curriculum Theory

FRCT 7130 Curriculum Theory and Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A comprehensive overview of the field of curriculum designed to develop the theoretical knowledge competencies and strategies needed by teachers and other curriculum developers at all levels of education to participate in the curriculum change process.

FREC Early Childhood

FREC 7232 Children's Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed for the graduate student who has some knowledge of children's literature. Attempts to update the student's knowledge of children's literature in the classroom and media center.
Cross Listing(s): ECED 7232.

FREC 7233 Teaching Writing in the Elementary School
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Teaching Writing in the Elementary School course provides students the opportunity for in-depth examination of both the process and products of writing in grades P-5. Students will explore the current trends and issues related to the teaching of writing in the P-5 classroom including development of writing curriculum and writing assessments.

FREC 7535 Teaching Middle & Secondary Math
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of current content standards, methods and assessment strategies for teaching middle grades and secondary mathematics.

FREN French

FREN 1001 Elementary French I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to listening, speaking, reading, and writing in French with further study of the culture of French-speaking regions.

FREN 1002 Elementary French II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued listening, speaking, reading, and writing in French with further study of the culture of French-speaking regions.

FREN 1060 Accelerated Elementary French
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
An accelerated introduction to listening, speaking, reading, and writing in French and to the culture of French-speaking regions. Completes the elementary levels of French in one semester.

FREN 2001 Intermediate French I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Building upon communication skills (understanding, speaking, reading, and writing French) and cultural understanding, developed at the elementary level.
Prerequisite(s): A minimum grade of "C" in FREN 1002 or FREN 1060.

FREN 2002 Intermediate French II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued focus on communication skills and cultural understanding.
Prerequisite(s): A minimum grade of "C" in FREN 2001.

FREN 2010 Intermediate Conversation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of conversational techniques, integrating grammatical structures and appropriate vocabulary. Emphasis is given to practicing spoken French and to using audio programs to increase listening comprehension. Attention is also given to pronunciation and phonetics.
Prerequisite(s): FREN 2002.

FREN 2060 Accelerated Intermediate French
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
Accelerated intermediate French with continued work on listening, speaking, reading, and writing in French and the culture of French-speaking regions. Completes the intermediate levels of French in one semester.
Prerequisite(s): A minimum grade of "C" in FREN 1002 or FREN 1060.

FREN 3001 French Conversation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of conversational techniques, integrating grammatical structures and appropriate vocabulary. Emphasis is given to practicing spoken French and to using audio programs to increase listening comprehension. Attendance is also given to pronunciations and phonetics.
Prerequisite(s): FREN 2002.

FREN 3002 French Composition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A thorough review and expansion of the main grammatical concepts, rules and applications studied in FREN 1001, FREN 1002, FREN 2001, and FREN 2002 courses. A practical application of grammar study through translations (English to French), formal/informal writing, listening and speaking, and refinement of self-editing skills.
Prerequisite(s): FREN 2002.
FREN 3030 Selected Topics in French
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
This course involves the study of a topic in French literature, culture, society, thought or language not included in the regular course offerings. Students focus on the continued development of all five language competencies (listening, speaking, reading, writing, and culture). This course may be repeated for credit provided a new topic is studied. Conducted in French.
Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 3100 Fren Culture & Civilization I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of the culture and civilization of France. History, geography, politics, the arts and daily life in France from the middle ages to the French Revolution.
Prerequisite(s): Completion of FREN 2002.
FREN 3132 French Through Literature: The Short Story
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued development of all five language competencies through the study of selected short stories representative of the main periods and styles. Course work includes oral reading, writing, and grammar activities. Conducted in French.
Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 3136 French through Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued development of all five language competencies (listening, speaking, reading, writing, and culture) through an in-depth study of selected feature films. Course work includes oral comprehension, speaking, reading, writing, and grammar activities. Emphasis on everyday spoken French. Conducted in French.
Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 3150 French Culture and Civilization II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the historical, sociological, philosophical, literary, and artistic developments of France and neighboring French-speaking European countries up to modern times.
Prerequisite(s): FREN 2002.
FREN 3160 Francophone Cultures and Civilization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the historical, sociological, philosophical, literary, and artistic developments of the Francophone world.
Prerequisite(s): FREN 2002.
FREN 3195 Studies Abroad: Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued development of all five language competencies (listening, speaking, reading, writing, and culture) with strong emphasis on everyday functions essential to living in France. Conducted in French.
Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060, department approval.
FREN 3201 Approaches to Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The development of students' reading and writing skills along with knowledge of the major literary genres and literary thought. Texts are from traditional and contemporary sources (selections of prose, poetry, and theater).
Prerequisite(s): FREN 2002.
FREN 3250 Survey of French Literature (Middle Ages to Present)
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected major literary works, authors, and literary movements of France from the Middle Ages to present.
Prerequisite(s): A minimum grade of "C" in FREN 2002.
FREN 3260 Survey of Francophone Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected major literary works, authors, and literary movements of the Francophone world.
Prerequisite(s): A minimum grade of "C" in FREN 2002.
FREN 3300 French Phonetics and Phonology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of phonetic principles and their applications.
Prerequisite(s): FREN 2002.
FREN 3305 Studies Abroad: Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued development of all five language competencies (listening, speaking, reading, writing, and culture) through the study of a geographic region in France based on residential study in the region. Conducted in French.
Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 3400 Culture, Business, and Society in the French-Speaking World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of culture as it relates to business practices in the French speaking world. A variety of authentic media sources will be used. Emphasis will be put on listening comprehension and translation as well as on business correspondence.
Prerequisite(s): FREN 2002.
FREN 4001 Advanced French Conversation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced study of spoken and written French, with emphasis on oral and written communication strategies, including the interpersonal and presentational modes, for communication in Francophone contexts. Attention is given to the grammatical structure of language.
Prerequisite(s): FREN 2002.
FREN 4002 Advanced French Composition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced study of grammar, syntax, and vocabulary with refinement of writing skills through composition.
Prerequisite(s): FREN 2002.
FREN 4030 Selected Topics in French
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of a topic in French literature, culture, society, thought, or language not included in regular offerings. Conducted in French. Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 4130 Advanced Grammar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Intensive review of major grammatical structures. Extensive oral and written activities, including grammar exercises and compositions. Conducted in French.
Prerequisite(s): Minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 4135 Studies Abroad: Speaking II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in oral communications in French using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in FREN 2002 or FREN 2060.
FREN 4210 Business French
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
French used in business settings and commercial correspondence, along with procedures generally applicable to international commerce. Course taught in French.
Prerequisite(s): FREN 2002.
FRIT Instructional Technology

FRIT 7090 Selected Topics in Instructional Technology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Promotes specialized training in new and/or emerging instructional technologies/methodologies or topics appropriate to the needs of in-service personnel. Attention will be given to a range of specific needs as they reach special significance in local school systems.

FRIT 7090A Selected Topics in FRIT
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Promotes specialized training in new and/or emerging instructional technologies/methodologies or topics appropriate to the needs of in-service personnel. Attention will be given to a range of specific needs as they reach special significance in local school systems.

FRIT 7090B Selected Topics in FRIT
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Promotes specialized training in new and/or emerging instructional technologies/methodologies or topics appropriate to the needs of in-service personnel. Attention will be given to a range of specific needs as they reach special significance in local school systems.

FRIT 7090C Selected Topics in FRIT
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Promotes specialized training in new and/or emerging instructional technologies/methodologies or topics appropriate to the needs of in-service personnel. Attention will be given to a range of specific needs as they reach special significance in local school systems.

FRIT 7090D Selected Topics in FRIT
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Promotes specialized training in new and/or emerging instructional technologies/methodologies or topics appropriate to the needs of in-service personnel. Attention will be given to a range of specific needs as they reach special significance in local school systems.

FRIT 7231 Instructional Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to develop the knowledge, skills, and dispositions of instructional technology leaders necessary for them to understand and apply a systematic process of instructional design to create effective technology-based instruction for learners with diverse needs.

FRIT 7232 Visionary Leadership in Instructional Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to develop the knowledge, skills, and dispositions of instructional technology leaders to inspire and lead the development and implementation of a shared vision for the effective use of technology to promote excellence and support transformational change throughout educational organizations.

FRIT 7233 Selection and Development of Digital Tools and Resources
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selection and Development of Digital Tools and Resources provides competence in the selection, production, utilization, and evaluation of various formats of instructional technologies. Basic techniques are provided through direct experiences in the design and production of instructional technologies.

FRIT 7234 Information Fluency and Inquiry Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an in-depth exploration of digital learning models and relevant standards that focus on information fluency and inquiry learning. Emphasis is placed on the reflective use of technology to facilitate student learning through inquiry learning and the mastery of information fluency skills. Course assignments and activities focus on application of these concepts to the candidate’s field of initial certification through collaboration with other teachers, media specialists, and technology specialists.
FRIT 7235 Digital Learning Environments
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the effective utilization of digital technology in the instructional process and on systematic processes for using new technologies to enhance learning. Course content will focus on the knowledge, skills, and dispositions needed to create, support, and manage effective digital learning environments.
Prerequisite(s): Minimum grade of "C" in FRIT 7231.

FRIT 7236 Technology-Based Assessment and Data Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Technology-Based Assessment and Data Analysis prepares candidates to model and facilitate assessments throughout the curriculum and to analyze and interpret the data generated by those assessments. The use of digital tools and resources to measure, collect, analyze, interpret, and report those data is stressed.

FRIT 7237 Evaluation of Educational Needs and Programs
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Evaluation of Educational Needs and Programs covers the theory and practice of systematic investigation of instructional programs, projects, products, and processes. The course is designed to teach practitioners how to assess the need for and the effectiveness of educational endeavors such as quality improvement, enhancing organizational performance, or improving school curricula.
Prerequisite(s): Minimum grade of "C" in FRIT 7231.

FRIT 7330 The Internet in Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides learners with a focused look at issues surrounding the implementation and use of emerging applications of the internet in schools.

FRIT 7331 Leadership of the School Library Media Program
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the functions of the school library media center and the various roles of the school library media specialist. Topics include: program planning and development, budgeting, facility management, and public relations. Students will develop the skills necessary to strategically plan for innovation and continuous improvement of the school library media program.

FRIT 7332 The School Library Literacy Environment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the processes and procedures associated with developing, organizing, maintaining, and evaluating the school library media collection. Emphasis is placed on intellectual freedom, principles of selecting materials in all formats, and utilization of technology to access physical and virtual collections. This course will introduce students to instructional strategies designed to promote reading for learning, personal growth, and enjoyment.

FRIT 7333 Storytelling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to the history, art, and techniques of oral storytelling. Techniques include the selection, adaptation, learning, and presentation of stories for all ages. Students will encounter a wide variety of stories from many different cultures, learn to identify resources for finding stories, develop skills in telling stories with ease and enthusiasm, and learn to evaluate the qualities that make stories age-appropriate for various grade levels.

FRIT 7335 Web Design and Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the front-end aspects of web design: authoring, graphics production, and media development.
Cross Listing(s): ITEC 7335.

FRIT 7734 Practicum in School Library Media
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A culminating activity in the Instructional Technology program. Candidates are assigned specific experiences that implement content from the school library media certification program.
Prerequisite(s): Permission of advisor and completion of Transition Point #2.

FRIT 7739 Practicum in Instructional Technology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is designed as a capstone experience where students demonstrate the skills, knowledge, and dispositions necessary to serve in instructional technology roles in various educational settings including P-12 settings. An extensive field experience is required. Prerequisite(s): Permission of advisor and completion of Transition Point #2.

FRIT 7765 Clinical Practice in School Library Media
6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is a full-semester, culminating internship in Instructional Technology/School Library Media for non-certified candidates only. Candidates are assigned to a daily placement that implements content from the school library media certification program under the supervision of a school library media specialist.
Prerequisite(s): Advisor approval required.

FRIT 8435 Program Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Program Evaluation covers the theory and practice of systematic investigation of instructional programs, projects, products, and processes. The course is designed to teach practitioners how to assess the effectiveness of endeavors such as quality improvement, enhancing organizational performance, or improving school curricula.
Cross Listing(s): ITEC 8435.

FRIT 8532 Multimedia Tools and Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers issues in the design and development of interactive multimedia instructional lessons. Covers the tools required for the creation of interactive multimedia and is organized around individual student projects.

FRLT Educational Foundations

FRLT 7130 Learning Theories and Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the principles and theories of learning that serve as a basis for educational models, practice, and assessment. Special emphasis is given to recent empirical findings and to practical applications of theory to a variety of educational settings. This is a three credit hour class.
Cross Listing(s): EDUF 7130.

FRMS Middle & Secondary Ed

FRMS 7331 Early Adolescent Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of pedagogical theory and practices for integrating contemporary early adolescent/young adult literature into the middle and secondary school curriculum. Course content will focus on making text selections, workshop approaches, literary circles, and reader response theory.
Cross Listing(s): MSED 7331.

FRMS 7535 Teaching Middle Grades and Secondary Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of current content standards, methods and assessment strategies for teaching middle grades and secondary mathematics.
FYE First-Year Experience

FYE 1000 Conversations with Professors
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
75-minute program the day before classes begin, designed to promote a conversation between a faculty member and a group of students in his or her college about how to get off to a successful start during the first week of classes. It is an opportunity for faculty members to help new students understand their roles as student learners and to express faculty expectations for student engagement.

FYE 1220 First-Year Seminar
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Seminar designed to develop foundational information literacy skills and apply them to academic inquiry, academic planning, and campus engagement. Required during students’ first semester at the university (except for transfer students who enter with 30 hours or more); students may not withdraw.

FYE 1410 Global Citizens
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Graduates in all fields face many challenges in today’s world that require the ability to think and engage globally. Doing so requires recognizing that different cultural perspectives influence the understanding of world issues. In this seminar, students explain factors that contribute to their cultural perspective, apply multiple cultural perspectives to global issues, and then apply this knowledge through engagement with local communities or problems. Faculty from across the University design courses drawing on examples from their disciplines, and students are encouraged to selection sections offered by faculty in their fields or potential fields. In preparation for subsequent coursework as upper-class students, first-year students enroll in this course in their second semester.
Prerequisite(s): FYE 1220.

FYE 2090 Selected Topics in First-Year Experience
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Selected topics in First-Year Experience offered on an irregular basis. Individual sections carry a subtitle.
Prerequisite(s): FYE 1220.

FYE 2212 Teaching Internship in First-Year Experience
1 Credit Hour. 0 Lecture Hours. 1 Lab Hour.
Provides selected sophomore, junior and senior students an opportunity to develop leadership and mentoring skills through their involvement with FYE 1220: First-Year Seminar. Includes training in counseling, communication, problem solving, classroom management, and conflict resolution skills. Under the supervision of the First-Year Experience program and the faculty member teaching the FYE 1220 course, students in FYE 2212 lead classroom discussions and activities, assess student work, and serve as a resource for first-year students.

GCM Graphic Comm Management

GCM 1131 Graphic Communications Technology
3 Credit Hours. 0.2 Lecture Hours. 0.3 Lab Hours.
An introduction to careers, the printing processes and the steps involved in preparing images for production in graphic communications.

GCM 1321 Desktop Publishing
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This is a general course presenting the development, growth and influence of desktop publishing in today's society. The course presents the various hardware and software used in desktop publishing, as well as technologies that have evolved from desktop publishing. Students are introduced to typography and typographic principles, digital photography, scanning, image resolution, photo editing, imposition and their correct use in the creation of both everyday and formal communications. Students learn what makes an aesthetically pleasing document in both formal and informal settings.
Corequisite(s): GCM 1411.

GCM 1411 Desktop Publishing Laboratory
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
Through detailed instruction and problem solving activities, students use current desktop publishing hardware and software and apply various concepts learned in GCM 1321 (Desktop Publishing) including, drawing applications, page assembly, photo editing, digital photography, scanning, typography, aesthetics, image resolution and imposition.
Corequisite(s): GCM 1321.

GCM 1631 Introduction to Multimedia
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
The course will introduce students to multimedia through its history, its various uses, and its different components. Students will create multimedia products and solve problems related to the creation of their components. Students will plan a multimedia presentation, create the various components and assemble those components into an effective multimedia presentation using current digital technologies.

GCM 2332 Bindery and Finishing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to orient the student to the various bindery, finishing, and distribution processes and practices common to the printing industry. Plant visits to bindery, finishing, and distribution firms. Prerequisite(s): A minimum grade of “C” in GCM 1131.
Corequisite(s): GCM 2412.

GCM 2412 Bindery and Finishing Laboratory
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
Designed to engage students with the processes and real world problems of bindery, finishing, and distribution processes and practices common to the printing industry. Plant visits to bindery, finishing, and distribution firms.
Prerequisite(s): A minimum grade “C” in GCM 1131.
Corequisite(s): GCM 2332.

GCM 2432 Inks and Substrates
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the dynamic relationship between inks and the materials on which they are printed. Areas of concern include the manufacturing processes and characteristics of inks and papers, testing procedures used with inks and substrates.
Prerequisite(s): A minimum grade of “C” in GCM 1131.

GCM 2512 Desktop Publishing II Laboratory
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A laboratory experience that uses detailed instruction and problem solving activities, which students complete through the use of current desktop publishing hardware and software. This course supports the concepts learned in Desktop Publishing II (GCM 2532) through hands-on activities. Topics include digitizing originals, file format usage and creation, file preflight, image trapping, digital imposition, advanced image editing techniques and concepts and advanced desktop publishing techniques and concepts. Prerequisite(s): A minimum grade of “C” in GCM 1321 and GCM 1411. Corequisite(s): GCM 2532.
GCM 2532 Desktop Publishing II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course builds on the concepts learned in Desktop Publishing (GCM 1321) and expands on the relationship between desktop publishing and digital press. Students examine the techniques and technologies used to create the visual images we see all around us. The concepts taught move the student from beginning desktop publishing into the world of digital press. Topics include the press prep working environment, hardware and software considerations, font and file management, bitmap and vector graphics, digital image characteristics, digital imposition, and digital image trapping. Prerequisite(s): A minimum grade of "C" in GCM 1321, GCM 1411.
Corequisite(s): GCM 2512.

GCM 2721 Industrial Practicum
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed for direct observation and work experience with the local printing industry. The student is exposed to problems, practices, management structures, and work ethics. Prerequisite(s): A minimum grade of "C" in GCM 1131, GCM 1321.

GCM 3110 Instructional Assistance
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
A supervised experience in the instructional process (on the university level) through direct participation in a laboratory situation. Grading is evaluated on a satisfactory/unsatisfactory basis only. This course may be repeated for a total of three semester hours. Prerequisite(s): Departmental approval required.

GCM 3130 Customer Service for Graphic Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course designed to acquaint the students with duties and responsibilities associated with customer service for graphic communications management.

GCM 3231 Print Media Processes
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
An intermediate technical study of lithography, flexography, screen and specialty printing and digital outputs processes and the image preparation requirements for each. The course will provide experiences that demonstrates the similarities and differences of print media and discuss criteria for choosing one versus another. Students will gain a greater understanding of the mass production options available for graphic communication. Prerequisite(s): A minimum grade of "C" in GCM 1131, GCM 1321, GCM 1411.

GCM 3735 Graphic Communications Internship I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed for students to receive practical work experience with an approved graphic communications firms. A minimum of 400 contact hours with the host site is required. Prerequisite(s): A minimum grade of "C" in GCM 1131 and a minimum 7 hours from GCM 2432, GCM 2332, GCM 2412, GCM 2532, GCM 2512.

GCM 3745 Graphic Comm Internship I
4 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed for students to receive practical work experience with an approved graphic communications firms. A minimum of 480 contact hours with the host site is required. Graphic Communications Management Majors. Prerequisite(s): A minimum grade of "C" in GCM 2721. Cross Listing(s): GCM 3735.

GCM 4132 Screen and Specialty Printing
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course introduces the student to the methods, procedures and technologies used in the screen and specialty printing industry, including screen printing, pad printing, sublimation printing and embroidery. Projects and discussions involve the various production methods and material requirements. Experiences include planning, image preparation, image carrier preparation, single and multi-color printing, medium curing and drying, finishing and hands-on experiences with the various process. Prerequisite(s): A minimum grade of "C" in GCM 3231.

GCM 4232 Photo Preparation for Reproduction
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
A combination of traditional and digital photography techniques is used to enhance the quality of the original photograph. The focus of the class is on creating images which maximize resolution while reducing editing requirements. Students choose and use various lighting arrangements and output techniques to improve final image quality. Prerequisite(s): A minimum grade of "C" in GCM 1131 and MMJ 3333.

GCM 4736 Graphic Communications Internship II
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed for students to further their industry experience beyond GCM 3735. A minimum of 400 hours contact hours with the host site is required. Prerequisite(s): A minimum grade of "C" in GCM 3735 or GCM 3745.

GCM 4899 Independent Study
1-3 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
Independent study is available for the student to undertake individualized experimentation, research, or study related to the printing industry. The specific topic will be determined and approved by the faculty and the student prior to the semester in which the course is taken. Academic credit is assigned to the independent study commensurate with the magnitude of the study.

GCM 5090 Selected Topics in Graphic Communications
1-3 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
This course is scheduled on an infrequent basis to explore special areas in technology and will carry a subtitle. Credit is variable from 1 to 3 semester hours. This special topics course is in keeping with established policies for offering a structured course on an infrequent basis. It will allow faculty to offer a course on a trial basis for possible approval at a later date. Cross Listing(s): GCM 5090G.

GCM 5090G Selected Topics in Graphic Communications
1-3 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
This course is scheduled on an infrequent basis to explore special areas in technology and will carry a subtitle. Credit is variable from 1 to 3 semester hours. This special topics course is in keeping with established policies for offering a structured course on an infrequent basis. It will allow faculty to offer a course on a trial basis for possible approval at a later date. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete. Cross Listing(s): GCM 5090.

GCM 5234 Color Reproduction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An exploration of professional color reproduction concepts and procedures related to the graphic communications and information technology industries. Topics include color theory, copy evaluation, color separation methods, color reproduction variables, color separation hardware and software, and color management systems. Prerequisite(s): A minimum grade of "C" in GCM 3745. Corequisite(s): GCM 5314. Cross Listing(s): GCM 5234G.
GCM 5234G Color Reproduction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An exploration of professional color reproduction concepts and procedures related to the graphic communications and information technology industries. Topics include color theory, copy evaluation, color separation methods, color reproduction variables, color separation hardware and software, and color management systems. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 3745 (requisited for Graphic Communications Management majors only, IT second discipline students and GCM minor students should consult with the assigned GCM program advisor).
Corequisite(s): GCM 5314G.
Cross Listing(s): GCM 5234.
GCM 5314 Color Reproduction Laboratory
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
This is a hands on laboratory course. The laboratory activities include the following: test for abnormal color vision, color measurement and evaluation, color standards, color proofing, color scanning, color reproduction methods, color management systems, color reproduction techniques using Photoshop and other software.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Corequisite(s): GCM 5234.
Cross Listing(s): GCM 5314G.
GCM 5314G Color Reproduction Laboratory
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
This is a hands on laboratory course. The laboratory activities include the following: test for abnormal color vision, color measurement and evaluation, color standards, color proofing, color scanning, color reproduction methods, color management systems, color reproduction techniques using Photoshop and other software. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Corequisite(s): GCM 5234G.
Cross Listing(s): GCM 5314.
GCM 5331 Flexography
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Introduction to the flexographic printing industry. Discussions will include the design, techniques, processes, and manufacture of flexographic printed products. Activities will include setup and operation of a flexographic press.
Prerequisite(s): A minimum grade of "C" in GCM 3231.
Cross Listing(s): GCM 5331G.
GCM 5331G Flexography
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Introduction to the flexographic printing industry. Discussions will include the design, techniques, processes, and manufacture of flexographic printed products. Activities will include setup and operation of a flexographic press. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 3231.
Cross Listing(s): GCM 5331.
GCM 5332 Multimedia Presentations
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Multimedia Presentations is the study of digital imaging applications for presentations. The course covers the creation of digital components for multimedia presentations, including sound, graphics, animation, and video technique, and their use in multimedia presentations for video, CD ROM, and the Internet.
Prerequisite(s): A minimum grade of "C" in GCM 1631.
Cross Listing(s): GCM 5332G.
GCM 5332G Multimedia Presentations
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Multimedia Presentations is the study of digital imaging applications for presentations. The course covers the creation of digital components for multimedia presentations, including sound, graphics, animation, and video technique, and their use in multimedia presentations for video, CD ROM, and the Internet. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 1631.
Cross Listing(s): GCM 5332G.
GCM 5333G Imaging Systems
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Imaging Systems is an in-depth course of how to effectively use, organize, and link imaging workstations, peripherals, systems, and files for information imaging. Current trends and issues of the industry are also covered.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Cross Listing(s): GCM 5334G.
GCM 5334 Imaging Systems
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Imaging Systems is an in-depth course of how to effectively use, organize, and link imaging workstations, peripherals, systems, and files for information imaging. Current trends and issues of the industry are also covered. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Cross Listing(s): GCM 5334.
GCM 5335G Graphic Communications Management Topics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course topics focus specifically on managerial decisions as they uniquely apply to graphic communications, such as: facilities planning and production flow, trade customs, contracts, and quality control and testing.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Cross Listing(s): GCM 5335G.
GCM 5335 Graphic Communications Management Topics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course topics focus specifically on managerial decisions as they uniquely apply to graphic communications, such as: facilities planning and production flow, trade customs, contracts, and quality control and testing. Graduate students will be given an extra assignment determined by the instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Cross Listing(s): GCM 5335.
GCM 5434 Lithographic Reproduction
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Designed to introduce the student to image assembly for presswork. Topics include imposition layouts, image assembly, platemaking, proofing systems, press operation and safety.
Prerequisite(s): A minimum grade of "C" in GCM 3231.
Cross Listing(s): GCM 5434G.
GCM 5434G Lithographic Reproduction
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Designed to introduce the student to image assembly for presswork. Topics include imposition layouts, image assembly, platemaking, proofing systems, press operation and safety. Graduate students will do a research project related to course content and present their finding to the class.
Prerequisite(s): A minimum grade of "C" in GCM 3231.
Cross Listing(s): GCM 5434.
GCM 5534 Digital Output Applications
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Covers the utilization of electronic imaging technologies for output
applications for information imaging. Specific topics include internet
development and management, and print-on-demand development and
management.
Prerequisite(s): A minimum grade of "C" in GCM 3231.
Cross Listing(s): GCM 5534G.
GCM 5534G Digital Output Applications
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Covers the utilization of electronic imaging technologies for output
applications for information imaging. Specific topics include internet
development and management, and print-on-demand development and
management. Graduate students will be given an extra assignment
determined by the instructor that undergraduates are not required to
complete.
Prerequisite(s): A minimum grade of "C" in GCM 3231.
Cross Listing(s): GCM 5534.
GCM 5535 Estimating for Print Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Acquaints the student with various types of estimating practices used
for print production. The student will learn how to measure cost centers,
calculate materials used and conceptualize the production process.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Cross Listing(s): GCM 5535G.
GCM 5535G Estimating for Print Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Acquaints the student with various types of estimating practices used
for print production. The student will learn how to measure cost centers,
calculate materials used and conceptualize the production process.
Graduate students will be given an extra assignment determined by the
instructor that undergraduates are not required to complete.
Prerequisite(s): A minimum grade of "C" in GCM 3745.
Cross Listing(s): GCM 5535.

GEOG Geography

GEOG 1100 World Regional Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of various regions of the world-natural, cultural, political, and
economic with emphasis on fundamental geographic information.
GEOG 1101 Introduction to Human Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of global patterns of resources, population, culture, and
economic systems. Emphasis is placed upon the factors contributing to
these patterns and the distinctions between the technologically advanced
and less advanced regions of the world.
GEOG 1110 Climate and the Landscape Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A series of laboratories and exercises designed to provide hands-on
applications of general theories regarding earth processes discussed in
GEOG 1111, Climate and the Landscape.
GEOG 1111 Physical Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The earth's surface in its areal differentiation. Focuses on the various
elements of physical geography that act as a foundation to the discipline,
including location and interaction of physical surficial phenomena.
GEOG 1130 World Regional Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of geographic regions of the world emphasizing physical
landscapes, resources, economies, culture and politics. Selected problems
or situations of contemporary interest will be incorporated.
GEOG 3020 Introduction to Geology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to physical geology. Study of common earth materials,
dynamic processes of change, volcanology, seismology, plate tectonics,
and the structure and evolution of the earth's crust and inner regions.
Prerequisite(s): Completion of GEOG 1111.
GEOG 3330 Weather and Climate
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Elements and controls of weather and climate and the distribution and
characteristics of climate regions.
Prerequisite(s): GEOG 1111.
GEOG 3440 Introduction to GIS and Cartography
4 Credit Hours. 0.2 Lecture Hours. 0.4 Lab Hours.
An introduction to the basic concepts, theories, techniques, and
applications of Geographic Information Systems (GIS) and cartography.
Students will learn and apply GIS and cartographic concepts to gain
extensive hands-on experience in thematic mapping and manipulation of
go-referenced spatial information using GIS software.
GEOG 4120 Introduction to Research
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The process of research utilizing the scientific method will be studied.
Research methods in human and physical geography are discussed and
critiqued. Methodologies including literature searches, topic selection and
refinement, and research problem solving will be discussed. A proposal for
a research project will be selected or assigned, a proposal written, and an
oral presentation of the proposed research will be made. A minimum grade
of "B" is required to continue in the research sequence. Prerequisite(s):
Permission of instructor required.
GEOG 4131 Geography of the American South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Systematic regional treatment of the South including the physical, cultural
and economic aspects of its various regions.
GEOG 4232 Geography of Latin America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the physical, cultural and economic geography of Latin America,
including Mexico.
Cross Listing(s): LAST 4232.
GEOG 4233 Geography of Asia
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the physical, cultural, political and economic geography of the
countries of Asia. Selected problems or situations of contemporary interest
will be incorporated.
GEOG 4330 Geography of Africa South of the Sahara
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the physical, cultural, political and economic geography of
Africa south of the Sahara Desert. Selected problems or situations of
contemporary interest will be incorporated.
Cross Listing(s): AAST 4330.
GEOG 4430 Geography of Europe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of the physical, cultural, political and economic geography of
Europe. Situations of contemporary interest will be included.
GEOG 4542 Intermediate GIS
4 Credit Hours. 0.2 Lecture Hours. 0.4 Lab Hours.
An introduction to advanced data models and spatial data analysis
functions of Geographic Information Systems (GIS) software, with an
emphasis on the conversion among various GIS data formats and
go-database construction and management. Prerequisite(s): GEOG 3440.
GEOG 4790 Internship in Geography
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The internship allows students to work in a professional setting related to their chosen concentration in the field. Undergraduate students can earn between one and six credits for internships approved by their academic advisor and the Department's Internship Director. Students must maintain contact with the Internship Director through the course of the internship work, and must submit a written report and a work product at the end of the project. Internship credits can be used for elective credit only and may not substitute for specific degree requirements. Prerequisite(s): Permission of the Geology and Geography Internship Director is required.

GEOG 4830 Senior Thesis Research I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students will complete a literature review and evaluation and conduct independent research as outlined in their research proposal formulated during Introduction to Research (GEOG 4120). Research is conducted under the direction of a faculty advisor and will lead to the completion of the senior thesis.
Prerequisite(s): A minimum grade of "B" in GEOG 4120 and a minimum GPA of 3.0.

GEOG 4831 Senior Thesis Research II
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The process of scientific communication will be investigated and practiced through completion of a senior thesis project. This project includes both a written thesis and research presentation. Students will format a thesis manuscript suitable for publication in a professional journal and design and deliver an oral presentation suitable for a professional conference.
Prerequisite(s): A minimum grade of "B" in GEOG 4830.

GEOG 5090 Selected Topics
1-9 Credit Hours. 0-9 Lecture Hours. 0-9 Lab Hours.
Offered with or without a lab on an experimental basis.
Cross Listing(s): GEOG 5090G.

GEOG 5090G Selected Topics
1-9 Credit Hours. 0-9 Lecture Hours. 0-9 Lab Hours.
Offered with or without a lab on an experimental basis. Graduate students will complete an individual term project or special report.
Cross Listing(s): GEOG 5090.

GEOG 5091 Applied GIS
4 Credit Hours. 0 Lecture Hours. 8 Lab Hours.
Applications of advanced GIS design and modeling to a specific topical and/or geographic area. Topics and studies will be varied over time.
Prerequisite(s): GEOG 3440 and GEOG 4542 and GEOG 5540. Cross Listing(s): GEOG 5091G.

GEOG 5091G Applied GIS
4 Credit Hours. 0 Lecture Hours. 8 Lab Hours.
Applications of advanced GIS design and modeling to a specific topical and/or geographic area. Topics and studies will be varied over time. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5091.

GEOG 5130 Geography of North America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Systematic regional treatment of Canada and the United States including the physical, cultural, and economic aspects of various sub-regions. Special attention will be paid to comparative themes such as resource development, trade, and migration. Cross Listing(s): GEOG 5130G.

GEOG 5130G Geography of North America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Systematic regional treatment of Canada and the United States including the physical, cultural, and economic aspects of various sub-regions. Special attention will be paid to comparative themes such as resource development, trade, and migration. Graduate students will complete an individual term project or special report. Cross Listing(s): GEOG 5130.

GEOG 5230 Urban Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analysis of site, situation, base, principal functions, distribution, supporting areas and internal structure of urban settlements.
Prerequisite(s): GEOG 1101 or GEOG 1130.
Cross Listing(s): GEOG 5230G.

GEOG 5230G Urban Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analysis of site, situation, base, principal functions, distribution, supporting areas and internal structure of urban settlements. Graduate students will complete an individual term project or special report.
Prerequisite(s): GEOG 1101 or GEOG 1130.
Cross Listing(s): GEOG 5230.

GEOG 5231 Economic Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the distribution, production and utilization of the world's basic commodities.
Prerequisite(s): GEOG 1101 or GEOG 1130.
Cross Listing(s): GEOG 5231G.

GEOG 5231G Economic Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the distribution, production and utilization of the world's basic commodities. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5231.

GEOG 5330 Population Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores issues and themes related to the patterns, processes, and consequences of the spatial distribution of the world's population. The course is organized around the fundamental components of population change, fertility, mortality, and migration. Current events related to population change and distribution in multiple geographical contexts will constitute a primary focus of the course.
Prerequisite(s): GEOG 1101 or GEOG 1130. Cross Listing(s): GEOG 5330G.

GEOG 5330G Population Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores issues and themes related to the patterns, processes, and consequences of the spatial distribution of the world's population. The course is organized around the fundamental components of population change, fertility, mortality, and migration. Current events related to population change and distribution in multiple geographical contexts will constitute a primary focus of the course. Graduate students will be required to complete more detailed, sophisticated assignments and complete longer, more in depth term papers.
Prerequisite(s): GEOG 1101 or GEOG 1130. Cross Listing(s): GEOG 5330.

GEOG 5430 Political Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will cover the geography of political behavior from the local to the global scale by examining the relationship of geography and politics. Students will investigate the rapidly changing geopolitics of the era in which they live, with special emphasis on international relations, sovereignty, war, and terrorism. Additionally, the course will focus on redistricting, the Electoral College, and other geographic elements of our American democratic system.
Prerequisite(s): GEOG 1101 or GEOG 1130. Cross Listing(s): GEOG 5430G.
GEOG 5430G Political Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will cover the geography of political behavior from the local to the global scale by examining the relationship of geography and politics. Students will investigate the rapidly changing geopolitics of the era in which they live, with special emphasis on international relations, sovereignty, war, and terrorism. Additionally, the course will focus on redistricting, the Electoral College, and other geographic elements of our American democratic system. Graduate students will learn how to undertake an independent, supervised research project in the field of political geography.
Prerequisite(s): GEOG 1101 or GEOG 1130. Cross Listing(s): GEOG 5430.

GEOG 5435 Nature and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will examine factors that affect humans’ perspectives on resources and analyze the availability, scarcity, and valuing of natural resources, in addition to conflicts over their use.
Cross Listing(s): GEOG 5435G.

GEOG 5435G Nature and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will examine factors that affect humans’ perspectives on resources and analyze the availability, scarcity, and valuing of natural resources, in addition to conflicts over their use. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5435.

GEOG 5441 Remote Sensing
4 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
This course is designed to introduce the principles and applications of remote sensing and imagery, including electromagnetic energy, the interaction between energy and earth’s surface, remotely sensed data, and the major sensor systems.
Cross Listing(s): GEOG 5441G.

GEOG 5441G Remote Sensing
4 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
This course is designed to introduce the principles and applications of remote sensing and imagery, including electromagnetic energy, the interaction between energy and earth’s surface, remotely sensed data, and the major sensor systems. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5441.

GEOG 5530 Cultural Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the world’s diverse cultural landscapes. Emphasis on the connections between social, political, religious and agricultural patterns and the impact of societies on the natural environment.
Prerequisite(s): GEOG 1130 or GEOG 1101.
Cross Listing(s): GEOG 5530G, GEOG 3530.

GEOG 5530G Cultural Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the world’s diverse cultural landscapes. Emphasis on the connections between social, political, religious and agricultural patterns and the impact of societies on the natural environment. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5530.

GEOG 5531 Environmental Impact and Remediation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the National Environmental Policy Act (NEPA), its Environmental Impact Assessment (EIA) process per the Council on Environmental Quality (CEQ), and review criteria regarding whether a Finding Of No Significant Impact (FONSI) or requirement for an Environmental Impact Statement (EIS) is issued. Students will see how the EIA process can be applied to the workflow of federal projects, from the research phase through planning, remediation, monitoring, evaluation, and improved regulatory enforcement/environmental policy.
Prerequisite(s): GEOG 1111. Cross Listing(s): GEOG 5531G.

GEOG 5531G Environmental Impact and Remediation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the National Environmental Policy Act (NEPA), its Environmental Impact Assessment (EIA) process per the Council on Environmental Quality (CEQ), and review criteria regarding whether a Finding Of No Significant Impact (FONSI) or requirement for an Environmental Impact Statement (EIS) is issued. Students will see how the EIA process can be applied to the workflow of federal projects, from the research phase through planning, remediation, monitoring, evaluation, and improved regulatory enforcement/environmental policy. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5531.

GEOG 5532 Tourism Geographies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A critical/cultural analysis of the influence of tourism on communities and landscapes, focusing on its economics, social, and environmental impacts through case studies.
Prerequisite(s): GEOG 1101 or GEOG 1130 or permission of instructor. Cross Listing(s): GEOG 5532G.

GEOG 5532G Tourism Geographies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A critical/cultural analysis of the influence of tourism on communities and landscapes, focusing on its economics, social, and environmental impacts through case studies. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5532.

GEOG 5535 Biogeography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to biogeography: the study of the distribution of plants and animals. Both historical taxonomic and ecosystems biogeography are covered. The analysis and explanation of spatial patterns of plant and animal distribution, while addressing change in species distribution and evolution in response to climate change and the process of continental drift that have taken place in the past and are taking place today, will be emphasized.
Prerequisite(s): GEOG 1111 or BIOL 1230 or BIOL 1331 or BIOL 1335 or GEOL 1430.

GEOG 5535G Biogeography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to biogeography: the study of the distribution of plants and animals. Both historical taxonomic and ecosystems biogeography are covered. The analysis and explanation of spatial patterns of plant and animal distribution, while addressing change in species distribution and evolution in response to climate change and the process of continental drift that have taken place in the past and are taking place today, will be emphasized. Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects).
Cross Listing(s): GEOG 5535.
GEOG 5540 Advanced GIS
4 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
This course covers the advanced spatial analysis and modeling functions of GIS and offers both fundamental theoretical background and extensive hands-on experience in spatial analysis and modeling. Major topics include network analysis, surface modeling, spatial patterns analysis, spatial data visualization, and basics of spatial statistics. 
Prerequisite(s): GEOG 3440 and GEOG 4542. 
Cross Listing(s): GEOG 5540G.

GEOG 5540G Advanced GIS
4 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
This course covers the advanced spatial analysis and modeling functions of GIS and offers both fundamental theoretical background and extensive hands-on experience in spatial analysis and modeling. Major topics include network analysis, surface modeling, spatial patterns analysis, spatial data visualization, and basics of spatial statistics. 
Graduate students can expect more comprehensive and rigorous course assessments (e.g. class discussion, exams, and/or term papers/projects). 
Cross Listing(s): GEOG 5540.

GEOG 5545 Ecohdrology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course will cover how water interacts to connect the biotic and abiotic components of ecosystems, with a focus on forests. Students will measure hydrologic processes to determine the water budget of an on-campus forest and associate these measurements to ecological processes upon which human society relies (watershed management and sustainable agriculture). This includes training on common and cutting-edge ecohydrological field equipment installation, operation, maintenance, and data analysis techniques. Additionally, students will compare their results to studies around the globe. 
Prerequisite(s): GEOG 1111. 
Cross Listing(s): GEOG 5545G.

GEOG 5545G Ecohdrology
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course will cover how water interacts to connect the biotic and abiotic components of ecosystems, with a focus on forests. Students will measure hydrologic processes to determine the water budget of an on-campus forest and associate these measurements to ecological processes upon which human society relies (watershed management and sustainable agriculture). This includes training on common and cutting-edge ecohydrological field equipment installation, operation, maintenance, and data analysis techniques. Additionally, students will compare their results to studies around the globe. Graduate students will write an ecohydrology research proposal in a format required by federal funding agencies. 
Cross Listing(s): GEOG 5545.

GEOG 5550G Topics in Regional Geography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the physical, cultural, historical, and economic geography of world region. May be repeated as topics vary.

GEOG 5590 Field Studies in Geography
3-8 Credit Hours. 3-8 Lecture Hours. 0 Lab Hours.
An intensive course on a specific region of the world conducted in that region combining lecture, observation and travel. Students usually will bear tuition, travel and living expenses during the course. May be repeated for credit in different regions. 
Cross Listing(s): GEOG 5590G.

GEOG 5590G Field Studies-Geography
6-8 Credit Hours. 6-8 Lecture Hours. 0 Lab Hours.
An intensive course on a specific region of the world conducted in that region combining lecture, observation and travel. Students usually will bear tuition, travel and living expenses during the course. May be repeated for credit in different regions. Graduate students will complete an individual term project or special report. 
Cross Listing(s): GEOG 5590.
GEOL 7830 Non-Thesis Capstone
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is reserved for students pursuing the MS in Applied Geology non-thesis option. Students will define, devise, and implement their own Capstone project, which includes writing, presenting, and defending of the project. Students will present their capstone project in a public presentation open to the university community in partial fulfillment of the Master of Science degree in Applied Geology.

GEOL 7999 Thesis
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course is the culmination of the Master’s Thesis as it entails the final stage of the writing, presenting, and defending of the thesis project. Students will present their thesis to their thesis committee in a public presentation open to the university community in partial fulfillment of the Master of Science degree in Applied Geology. The final written thesis must be accepted by the thesis committee in accordance with the timeline laid out by the College of Graduate Studies.

GEOL Geology

GEOL 1011K Introductory Geosciences I
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course covers Earth materials and processes.

GEOL 1121 Introduction to the Earth
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
An introductory study of the origin and structure of Earth materials and the processes which modify Earth’s interior and exterior. The laboratory component of this course offers hands-on exercises related to Earth materials, interpretation of topographic and geologic maps, principles of geologic time, and plate tectonic processes.

GEOL 1122 General Historical Geology
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Discusses the origin and geological history of Earth. Methods of interpretation, fossils, geologic time measurements, time scales, physical and organic development of Earth are taught.

Prerequisite(s): GEOL 1121 (may be taken concurrently with permission of instructor).

GEOL 1310 Environmental Geology Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A series of laboratory components that involve hands-on exercises with Earth materials and processes which modify the Earth’s interior and exterior.

Prerequisite(s): GEOL 1340 or a minimum grade of “C” in GEOL 1011K.

GEOL 1340 Environmental Geology
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
An introduction to using geologic principles and knowledge to address problems arising from the interaction between humans and the geologic environment. One major component of the course examines geologic hazards, including flooding, earthquakes, volcanic eruptions, and coastal erosion. The other component explores important geologic resources, including water, soils, mineral, and energy, and the way modern society depends on these resources. The laboratory portion of the course consists of hands-on data collection, analysis, and problem solving of geologic and environmental problems related to natural hazards and society’s use of Earth resources.

Cross Listing(s): GEOL 1310.

GEOL 1430 Dinosaurs, Extinctions and Disasters
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A review of the dynamic processes of extinction, evolution, and change in ancient animal assemblages. Particular attention will be paid to the unique terrestrial communities that were dominated by dinosaurs, mammoths, and other megafauna. We will focus on the effects of meteorite collisions, ice ages, and mass extinction events.

GEOL 1530 Principles of Oceanography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a survey course dealing with the physical, geological, and ecological features of oceans and coasts, as well as chemical composition of ocean water and oceanic circulation processes.

Cross Listing(s): GEOL 1530H.

GEOL 3220 Data Management for Geologists
3 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course introduces students to quantitative geological data. Students will be expected to produce professional-looking tables and graphs, and learn how to properly present geological information clearly in written and oral form.

Prerequisite(s): A minimum grade of "C" in GEOL 1011K or GEOL 1121.

GEOL 3520 Field Methods
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Instruction in the tools and techniques used in the collection of field data, compilation of geologic maps and crossed sections. Students will construct topographic and geologic maps and write geologic reports and abstracts. The course will consist of three main areas; data sources, data collection, and post-processing. Two weekend field trips are required.

Prerequisite(s): GEOL 1122 and MATH 1112 or MATH 1113.

GEOL 3541 Mineralogy
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
An introduction to morphological crystallography, physical properties and the optical characteristics of the common minerals. Examines the genesis, occurrence, and use of minerals. Laboratory work consists of study of common crystal forms, hand specimen identification and optical study via the petrographic microscope.

Prerequisite(s): CHEM 1211K and a minimum grade of "C" in GEOL 1121 and GEOL 1122.

GEOL 3542 Petrology and Petrography
4 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
An introduction to the origin, occurrence, and classification of common igneous and metamorphic rocks. Laboratory work consists of combined microscopic and megascopic study of rocks. A three day field trip across the southern Appalachians provides a field study component.

Prerequisite(s): GEOL 3541 and GEOL 1122.

GEOL 3741 Remote Sensing
4 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
Introduction to the concepts, theory, collection, analysis and applications of remotely sensed spatial information. Prerequisite(s): Permission of instructor required.

Cross Listing(s): GEOG 3741.

GEOL 3790 Teaching Internship in Geology
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Student interns in Introduction to the Earth (GEOL 1121), General Historical Geology (GEOL 1122), or Environmental Geology (GEOL 1340) will participate in teaching the course under the mentorship of a faculty member. Student interns will attend an introductory workshop immediately prior to the start of the semester, will intern in one of the above courses, and meet with the faculty mentor one hour each week. One credit hour is awarded per laboratory section in which the student interns.

Prerequisite(s): A minimum grade of "B" in GEOL 1121 or GEOL 1122 or GEOL 1340.

GEOL 4120 Introduction to Research
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The process of research will be studied from the scientific method through the process of writing a scientific proposal. Construction of a technical paper and the technical oral presentation will be examined and practiced. Usages of geologic terms will be explained and learned. A proposal for a research paper will be selected or assigned, a proposal written and an oral presentation of the proposal research will be made. A minimum grade of "B" is required to continue in the research sequence. Prerequisite(s): Permission of instructor required.
GEOL 4530 Tectonics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Processes, structures, and land forms associated with the deformation of the earth's crust are studied including the changes that take place on structures and landforms over time. Scales ranging from local, to regional, to global are incorporated.
Prerequisite(s): GEOL 1121 or GEOL 1011K.

GEOL 4610 Senior Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
The process of scientific communication will be investigated and practiced. A final paper on the student's senior research topic will be written and an oral presentation made in a formal "Technical Session" format. The student will learn to prepare visual aids to illustrate his/her paper and talk. The "Technical Session" will be organized and run by students.
Prerequisite(s): GEOL 4830.

GEOL 4790 Internship in Geology
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The internship allows students to work in a professional setting related to their chosen concentration in the field. Undergraduate students can earn contact with the Internship Director through the course of the internship work, and must submit a written report and a work product at the end of the project. Internship credits can be used for elective credit only and may not substitute for specific degree requirements. Prerequisite(s): Permission of Geology and Geography Internship Director is required.

GEOL 4830 Senior Thesis Research I
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students will complete a literature review and evaluation and conduct independent research as outlined in their research proposal formulated during Introduction to Research (GEOL 4120). Research is conducted under the direction of a faculty advisor and will lead to the completion of the senior thesis.
Prerequisite(s): A minimum grade of "B" in GEOL 4120 and minimum GPA of 3.0.

GEOL 4831 Senior Thesis Research II
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The process of scientific communication will be investigated and practiced through completion of a senior thesis project. This project includes both a written thesis and research presentation. Students will format a thesis manuscript suitable for publication in a professional journal, and design and deliver an oral presentation suitable for a professional conference.
Prerequisite(s): A minimum grade of "B" in GEOL 4830.

GEOL 5090 Selected Topics
1-9 Credit Hours. 0-9 Lecture Hours. 0-9 Lab Hours.
This course provides a means by which new courses can be offered for experimental purposes.
Prerequisite(s): Permission of instructor required.
Cross Listing(s): GEOL 5090G.

GEOL 5090G Selected Topics
1-9 Credit Hours. 0-9 Lecture Hours. 0-9 Lab Hours.
This course provides a means by which new courses can be offered for experimental purposes. Graduate students will complete an individual term project or special report.
Prerequisite(s): Completion of GEOG 3542 or permission of instructor required.
Cross Listing(s): GEOL 5090.

GEOL 5130 Geochemistry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the theory and applications of stable and radiogenic isotopic geochemistry as applied to low-temperature geological processes. Graduate students will complete an individual term project or special report.
Cross Listing(s): GEOL 5130.

GEOL 5131 Economic Mineralogy
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
An introduction to the origins of industrial and metallic mineral resources, and the exploration, discovery and use of such resources. Laboratory work includes identification and evaluation of mineral resources and visits to mines.
Prerequisite(s): GEOL 3541.
Cross Listing(s): GEOL 5131G.

GEOL 5132 Regional Field Geology
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
A field expedition involving geological investigation of a major geologic region of North America. Students will be expected to make geological observations through such techniques as mapping, measuring sections, collecting scientific samples, or other standard techniques, then to analyze and interpret their observations or measurements. A scientific journal or notebook will be used by each student to record data and observations. A final report will be required. Students usually will bear tuition, travel, and living expenses in the field.
Prerequisite(s): GEOL 1011K or GEOL 1121.
Cross Listing(s): GEOL 5132G.

GEOL 5132G Regional Field Geology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A field expedition involving geological investigation of a major geologic region of North America. Students will be expected to make geological observations through such techniques as mapping, measuring sections, collecting scientific samples, or other standard techniques, then to analyze and interpret their observations or measurements. A scientific journal or notebook will be used by each student to record data and observations. A final report will be required. Students usually will bear tuition, travel, and living expenses in the field. Graduate students will complete an individual term project or special report.
Prerequisite(s): Completion of GEOL 1121.
Cross Listing(s): GEOL 5132.

GEOL 51340 Vertebrate Paleontology
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
A study of the morphology, classification and geologic significance of vertebrate fossils. Prior completion of GEOL 5142 strongly recommended. Prerequisite(s): GEOL 1122 or permission of instructor.
Cross Listing(s): GEOL 5140G.

GEOL 51400 Vertebrate Paleontology
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
A study of the morphology, classification and geologic significance of vertebrate fossils. Graduate students will complete an individual term project or special report.
Prerequisite(s): Completion of GEOL 1122 or permission of instructor; GEOL 5141 strongly recommended.
Cross Listing(s): GEOL 5140.
GEOL 5141 Paleontology
4 Credit Hours. 0.4 Lecture Hours. 3 Lab Hours.
This course provides an overview of the major principles, applications, and methods of paleontology. Topics covered in the course include, but are not limited to: the formation of fossils, fossil identification and classification, evolution and extinction, biostratigraphy, biogeography, paleoecology, and functional morphology. Labs utilize a diverse collection of invertebrate fossils and paleontology software. 
Prerequisite(s): GEOL 1122. 
Cross Listing(s): GEOL 5141G.

GEOL 5141G Paleontology
4 Credit Hours. 0.3 Lecture Hours. 3 Lab Hours.
This course provides an overview of the major principles, applications, and methods of paleontology. Topics covered in this course include, but are not limited to: the formation of fossils, fossil identification and classification, evolution and extinction, biostratigraphy, biogeography, paleoecology, and functional morphology. Labs utilize a diverse collection of invertebrate fossils and paleontology software. Graduate students will complete a special report, not required of undergraduates. 
Prerequisite(s): Completion of GEOL 1122. 
Cross Listing(s): GEOL 5141.

GEOL 5142 Stratigraphy and Sedimentation
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
Introduction to the principles and application of stratigraphy and biostratigraphy, and principles of sedimentation. Emphasis is placed on concepts of time, time-rock, rock units, sedimentary facies, guide fossils and fossil range and description of rocks in time and space, their correlation and interpretation. Petrologic interpretation and basic laboratory techniques are also demonstrated. The origin and distribution of sedimentary rocks is examined from initial weathering through erosion and transportation, to environments and mechanisms of deposition. 
Prerequisite(s): GEOL 3541. 
Cross Listing(s): GEOL 5142G.

GEOL 5142G Stratigraphy and Sedimentation
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Introduction to the principles and application of stratigraphy and biostratigraphy, and principles of sedimentation. Emphasis is placed on concepts of time, time-rock, rock units, sedimentary facies, guide fossils and fossil range and description of rocks in time and space, their correlation and interpretation. Petrologic interpretation and basic laboratory techniques are also demonstrated. The origin and distribution of sedimentary rocks is examined from initial weathering through erosion and transportation, to environments and mechanisms of deposition. Graduate students will complete an individual term project or special report. 
Prerequisite(s): Completion of GEOL 3541. 
Cross Listing(s): GEOL 5142.

GEOL 5230G Earth Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A systematic study of the earth as a planet, including aspects of its atmosphere, oceans, lithosphere, soils and physiography. The laboratory will emphasize the location and utilization of local, as well as regional materials for earth science teaching and learning. Graduate students will complete an individual term project or special report. This course cannot be used for upper-level course credit in the Geology BA, Geology BS, or Geology Minor programs. 
Prerequisite(s): Permission of instructor required. 
Cross Listing(s): GEOL 5230G.

GEOL 5231G General Oceanography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an integrated approach to the study of oceans with special emphasis on geology, chemistry, and biology of ocean basins. Studies will include the ecological, physical, and geological features of ocean basins, as well as chemical composition of ocean water and oceanic circulation processes. This course cannot be used for upper-level course credit in the Geology BA, Geology BS, or Geology Minor programs. 
Prerequisite(s): GEOL 1121 or GEOL 5230. 
Cross Listing(s): GEOL 5231G.

GEOL 5340 Barrier Island Environmental Geology
4 Credit Hours. 2 Lecture Hours. 6 Lab Hours.
This course is an on site, direct observation study of the physical processes that create barrier islands and drive their geologic and environmental evolution. The course will cover principles of coastal geology and barrier island hydrogeology. Students will observe and document the diverse environments of a Georgia barrier island and the effects of coastal erosion and sea level rise on island environments and wildlife habitat. Students will also explore the anthropogenic impacts to these environments and resources, practice field science observation and documentation skills, and develop research and presentation skills through team research projects during an eight to ten day residence on St. Catherines Island. 
Prerequisite(s): Permission of Instructor. 
Cross Listing(s): GEOL 5340G.

GEOL 5340G Barrier Island Environmental Geology
4 Credit Hours. 2 Lecture Hours. 6 Lab Hours.
This course is an on site, direct observation study of the physical processes that create barrier islands and drive their geologic and environmental evolution. The course will cover principles of coastal geology and barrier island hydrogeology. Students will observe and document the diverse environments of a Georgia barrier island and the effects of coastal erosion and sea level rise on island environments and wildlife habitat. Students will also explore the anthropogenic impacts to these environments and resources, practice field science observation and documentation skills, and develop research and presentation skills through team research projects during an eight to ten day residence on St. Catherines Island. Graduate students can expect more comprehensive and rigorous assessments as well as additional work based on the graduate field of study. 
Prerequisite(s): Permission of instructor. 
Cross Listing(s): GEOL 5340.
GEOL 5431 Coastal Geology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Coastal Geology will comprise an introduction to a variety of coastal
environments and landforms as well as the physical and geological
processes that shape them. Coastal hazards and issues related to
the ecology and management of the coast will also be discussed. The
course will include two required weekend fieldtrips to coastal areas in
the southeastern United States. Prior completion of GEOL 5142 strongly
recommended.
Prerequisite(s): GEOL 1122 or permission of instructor. Cross Listing(s):
GEOL 5431G.

GEOL 5431G Coastal Geology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Coastal Geology will comprise an introduction to a variety of coastal
environments and landforms as well as the physical and geological
processes that shape them. Coastal hazards and issues related to
the ecology and management of the coast will also be discussed. The
course will include two required weekend fieldtrips to coastal areas in
the southeastern United States. Graduate students will complete an individual
term project or a special report.
Prerequisite(s): Completion of GEOL 1122 or permission of instructor;
GEOL 5142 strongly recommended.
Cross Listing(s): GEOL 5431.

GEOL 5440 Structural Geology
4 Credit Hours. 0.4 Lecture Hours. 0 Lab Hours.
A study of geologic structures resulting from rock formation and
deformation. Attention will be given to recognition and solution of structural
problems.
Prerequisite(s): GEOL 3542 and MATH 1112 or MATH 1113.
Cross Listing(s): GEOL 5440G.

GEOL 5440G Structural Geology
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
A study of geologic structures resulting from rock formation and
deformation. Attention will be given to recognition and solution of structural
problems. Graduate students will complete an individual term project or
special report.
Prerequisite(s): Completion of GEOL 3542 and MATH 1112 or MATH
1113.
Cross Listing(s): GEOL 5440.

GEOL 5500 Geomorphology
3 Credit Hours. 0.2 Lecture Hours. 0.3 Lab Hours.
A systematic study of landforms and the processes which create and
modify them.
Prerequisite(s): GEOL 1122 or GEOG 1111.
Cross Listing(s): GEOL 5530G.

GEOL 5530G Geomorphology
3 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
A systematic study of landforms and the processes which create and
modify them. Graduate students will complete an individual term project or
special report.
Prerequisite(s): Completion of GEOL 1122 or GEOG 1111.
Cross Listing(s): GEOL 5530.

GEOL 5541 Hydrogeology
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
A survey of hydrogeology that includes the occurrence, distribution,
movement and chemistry of subsurface waters. Emphasizes subsurface
hydrology (hydrogeology), but will also include related aspects of surface
systems. Major topics covered will include: 1) relationships between
precipitation, runoff, and infiltration; 2) porosity and permeability of various
earth materials; 3) subsurface movement of water through earth materials;
4) basic chemical characteristics of natural waters; and 5) current water
resource issues such as supply, quality, contamination, and remediation.
Prerequisite(s): GEOL 3542.
Cross Listing(s): GEOL 5541G.

GEOL 5541G Hydrogeology
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
A survey of hydrogeology that includes the occurrence, distribution,
movement and chemistry of subsurface waters. Emphasizes subsurface
hydrology (hydrogeology), but will also include related aspects of surface
systems. Major topics covered will include: 1) relationships between
precipitation, runoff, and infiltration; 2) porosity and permeability of various
earth materials; 3) subsurface movement of water through earth materials;
4) basic chemical characteristics of natural waters; and 5) current water
resource issues such as supply, quality, contamination, and remediation.
Graduate students will be given an extra assignment determined by the
instructor that undergraduates will not be required to do.
Prerequisite(s): Completion of GEOL 3542. Cross Listing(s): GEOL 5541.

GEOL 5542 Advanced Hydrogeology
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
In-depth study of hydrogeologic and geochemical principles with emphasis
on quantitative techniques. Various laboratory and field techniques will be
covered, including the use of numerical models and aquifer testing.
Prerequisite(s): GEOL 5541.
Cross Listing(s): GEOL 5542G.

GEOL 5542G Advanced Hydrogeology
4 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
In-depth study of hydrogeologic and geochemical principles with emphasis
on quantitative techniques. Various laboratory and field techniques will be
covered, including the use of numerical models and aquifer testing. Graduate
students will be given an extra assignment determined by the
instructor that undergraduates will not be required to do.
Prerequisite(s): Completion of GEOL 5541.
Cross Listing(s): GEOL 5542.

GEOL 5740 Sea Turtle Natural History
4 Credit Hours. 2 Lecture Hours. 6 Lab Hours.
A field-based course in which students work as sea turtle conservation
scientists by monitoring beaches and documenting and recording nesting
activity during an 8 to 10 day residence on St. Catherines Island, Georgia.
Students will prepare for field work with two days of lectures on the
GSU campus as well as a training session on GA DNR nest monitoring
protocols, prior to field work on St. Catherines Island. Students will keep
a daily field journal and prepare a paper on loggerhead sea turtles,
documenting nesting behavior, nesting habitat, hatching emergencies and
threats to hatchlings and adults using images acquired during their daily
monitoring activity.
Prerequisite(s): Permission of instructor.
Cross Listing(s): GEOL 5740G.

GEOL 5740G Sea Turtle Natural History
4 Credit Hours. 2 Lecture Hours. 6 Lab Hours.
A field-based course in which students work as sea turtle conservation
scientists by monitoring beaches and documenting and recording nesting
activity during an 8 to 10 day residence on St. Catherines Island, Georgia.
Students will prepare for field work with two days of lectures on the
GSU campus as well as a training session on GA DNR nest monitoring
protocols, prior to field work on St. Catherines Island. Students will keep
a daily field journal and prepare a paper on loggerhead sea turtles,
documenting nesting behavior, nesting habitat, hatching emergencies and
threats to hatchlings and adults using images acquired during their daily
monitoring activity. Graduate students can expect more comprehensive
and rigorous assessments as well as additional work based on the
graduate field of study. Graduate students will also complete a resource
notebook or term project.
Prerequisite(s): Permission of instructor.
Cross Listing(s): GEOL 5740.

GEOL 5890 Directed Study
1-4 Credit Hours. 0-3 Lecture Hours. 0-3 Lab Hours.
Well prepared geology majors may be permitted to carry on independent
study upon the recommendation of one of the geology/geography faculty.
Prerequisite(s): Permission of instructor required. Cross Listing(s): GEOL
5890G.
GEOL 5890G Directed Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Well prepared geology majors may be permitted to carry on independent study upon the recommendation of one of the geology/geography faculty. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): Permission of instructor required.
Cross Listing(s): GEOL 5890.

GEOL 6097 Special Topics Geol Res & Envi
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed presentation of a selected topic in geological sciences. May be repeated for credit a maximum of 6 credit hours, if topic is different.

GEOL 6100 Historical Geology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A review of the history of the Earth. Determining geologic time, the history of life as revealed in the fossil record, reconstructing a chronology of events from associated rock bodies. This course is a survey of historical geology but is designed primarily for students enrolled in graduate education programs, and credit may not be earned in both GEOL 3100 and GEOL 6100.

GEPH General Public Health

GEPH 6000 Biostatistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Enter, analysis, and application of public health statistics. Descriptive and inferential analysis through multivariate linear models are addressed. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.

GEPH 6100 Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of distribution and determinants of health and disease in defined populations. Emphasis on the skills necessary to research, produce, utilize, and critique epidemiological literature. This course is reserved for MPH Generalist students.

GEPH 6125 Environmental Health Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of the interface of environmental health issues, epidemiology, and risk assessment. This course will emphasize the nexus of population-based practice, environmental health, and the epidemiology of diseases. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.

GEPH 6130 Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Basic concepts of nutrition as major components to the enhancement of health for non-nutrition majors.

GEPH 6131 Introduction to International Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction of the application of public health and its relationship to other health disciplines in the field of international health.

GEPH 6132 Strategies for the Prevention of Chemical Dependency
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Educational strategies and techniques related to prevention of chemical dependence.

GEPH 6133 Women and Minority Health Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The exploration of public health issues concerning women and minorities.

GEPH 6134 Human Sexuality
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamentals of the history of sexual beliefs, values, behavior, and health issues in the U.S.

GEPH 6135 Healthy Weight Management and Body Composition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of research and applications for methods of improving body composition with a focus on optimal health and physical performance. Students will investigate effective strategies for long-term changes in body fatness and lean body mass. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.

GEPH 6150 Theory in Health Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Individual and environmental variables causing opposing viewpoints regarding health education needs and concerns. Practical application of various theories is stressed. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.

GEPH 7130 Applied Research Methods for Public Health Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Acquisition of skills necessary to develop, conduct, and critique various research methods applied to public health practice, including quantitative, qualitative, and mixed designs.

GEPH 7131 Applied Planning and Evaluation Methods for Public Health Promotion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys current methods for designing and evaluating educational strategies in health promotion programs. Students will learn to develop sensitive and ability-appropriate materials that recognize the ecological context of health behavior changes.

GEPH 7132 Public Health Preparedness
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines role of public health community in preparedness design, response, and evaluation for wide array of community emergencies at the national, state, and local levels.

GEPH 7133 Health/illness Continuum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores health and disease cross the life-span in terms of person, place, time, fundamental pathophysiological processes as they impact population-based health and disease, the epidemiologic triad, prevention, trends, and resources. Additional concepts such as global health, accidents, injuries, and sexually transmitted, hospital-acquired, and emerging infections are also explored.

GEPH 7134 Social Marketing for Health Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a broad introduction to communication theory, media and health literacy, and cultural competence.

GEPH 7280 Self-Directed Student Research
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students conduct studies relating to their professional interest and responsibilities under the directions of a graduate faculty advisor. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.
Prerequisite(s): Permission of instructor or department.

GEPH 7500 Public Health Planning and Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Acquire fundamentals needed to plan and evaluate public health programs including needs assessment, behavioral and educational diagnosis, administration diagnosis, objective writing and process, impact and outcome evaluation methods. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.
Prerequisite(s): A minimum grade of “B” in PUBH 6533, PUBH 6534, PUBH 6535, PUBH 6541, and GEPH 7130, or equivalents.
GEPH 7530 Capstone in PH Leadership
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Serves as culminating experience enabling students to synthesize and apply aggregate key program concepts to support workforce development as they prepare to serve as public health leaders within the community; methods utilized to promote professional development include case studies, assigned readings, and multiple interactions with community public health leaders.
Prerequisite(s): A minimum grade of "B" in PUBH 6533, PUBH 6534, PUBH 6535, PUBH 6541, and GEPH 7130, or equivalents.

GEPH 7600 Special Topics in Public Health
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
A study of selected issues in health. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.
Prerequisite(s): Permission of instructor.

GEPH 7675 Public Health Practicum
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The application of skills, concepts, and theories in a chosen public health setting. This course is reserved for MPH Generalist students who were admitted PRIOR to Fall 2018.
Prerequisite(s): Permission of instructor.

GERO Gerontology

GERO 5500 Survey of Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the emotional, physiological and social changes associated with the aging process and their effects on health.
Cross Listing(s): GERO 5500G.

GERO 5500G Survey Of Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the emotional, physiological and social changes associated with the aging process and their effects on health.

GERO 5510 Healthy Aging
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles of holistic aging: spiritual, social, emotional, intellectual, occupational, physical, and motivational needs of the elderly.

GERO 5510G Healthy Aging
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles of holistic aging: spiritual, social, emotional, intellectual, occupational, physical, and motivational needs of the elderly.

GERO 5520 Gerontology Practicum
1-3 Credit Hours. 0-6 Lecture Hours. 0-12 Lab Hours.
Practical experience tailored to the student's interest. Developed in collaboration with a faculty member and qualified site supervisor.
Cross Listing(s): GERO 5520G.

GERO 5520G Gerontology Practicum
1-3 Credit Hours. 0-6 Lecture Hours. 0-12 Lab Hours.
Practical experience tailored to the student's interest. Developed in collaboration with a faculty member and qualified site supervisor.

GNST Gender Studies

GNST 5000G Topics In Gender Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Special topics in Gender Studies. Will be Cross Listing(s): selected upper-level courses in the university curriculum when content of those courses addresses issues related to Gender Studies. May be repeated for credit with different topics.

GNST 5500G Topics In Women’S Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the basic themes of leadership through the lens of gender studies. The course will address alternative styles of leadership, globalization and women's roles, under representation, the gender gap, and the perseverance of women in traditionally male-dominated careers, professions, and public offices.

GNST 5600G Sociology Of Gender
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the social construction of gender and gender inequality in society.
Cross Listing(s): SOCI 5600G.

GNST 5700G Perspective In Feminist Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth look at Feminist Theory. This course may be taught from the perspective of a particular discipline.
Cross Listing(s): POLS 5700G.

GRMN German

GRMN 1001 Elementary German I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the German language and the culture of the German-speaking world. Beginning of a survey of basic German grammar and the development of the four language skills of listening, speaking, reading and writing German. Some aspects of everyday life in the German-speaking world will also be introduced.

GRMN 1002 Elementary German II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The second part of an introduction to the German language and the culture of the German-speaking world. Completion of the survey of basic German grammar and further development of the four language skills of listening, speaking, reading, and writing German. Aspects of everyday life in the German-speaking world will also be introduced.

GRMN 1060 Accelerated Elementary German
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
An accelerated introduction to listening, speaking, reading, and writing in German and to the culture of German-speaking regions. Completes the elementary levels of German in one semester.

GRMN 2001 Intermediate German I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Building upon communication skills (understanding, speaking, reading, and writing German) and cultural understanding, developed at the elementary level.
Prerequisite(s): A minimum grade of "C" in GRMN 1002.

GRMN 2002 Intermediate German II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued focus on communication skills and cultural understanding.
Prerequisite(s): A minimum grade of "C" in GRMN 2001.

GRMN 2060 Accelerated Intermediate German
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
Accelerated intermediate German with continued work on listening, speaking, reading, and writing in German and the culture of German-speaking regions. Completes the intermediate levels of German in one semester.
Prerequisite(s): A minimum grade of "C" in GRMN 1002 or GRMN 1060.

GRMN 3030 Selected Topics in German
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Study of topics in German literature, culture, society, thought, or language not included in the regular offerings. Continued development of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.
GRMN 3130 German Conversation and Phonetics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Vocabulary building and extensive practice of conversational skills in German through conversational settings. Contrastive analysis of the German and English sound systems and extensive oral practice.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 3132 German Grammar Review
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Intensive review with extensive practice of German grammar, including advanced aspects.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 3134 Writing in German
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Grammar review, basic instruction in stylistics, and extensive practice in writing both short compositions and longer items.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 3185 Studies Abroad: Speaking I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Studies Abroad: Speaking I.

GRMN 3231 Listening Skills in German
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presentation and discussion of select songs, radio plays, films and similar texts and formats. Can be repeated for credit with different content.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 3330 German Language and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of various aspects of the German-speaking countries, including geography, history, politics, business, and the arts.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 3385 Studies Abroad: Writing I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in written communications in German using materials that are appropriate for building on intermediate-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 3520 Study Abroad
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A term abroad of German study in conjunction with then university system of Georgia. Intensive instruction complemented by excursions.
Prerequisite(s): Completion of GRMN 1002.

GRMN 4030 Selected Topics in German
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of a topic in German literature, culture, society, thought or language not included in the regular offering. Continued development of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 4185 Studies Abroad: Speaking II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in oral communications in German using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 4230 Readings in German Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presentation and discussion of German texts from all periods. Can be repeated for credit with different content.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 4330 German Culture and Civilization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presentation and discussion of topics, issues, and events relevant to understanding the German-speaking countries. Can be repeated for credit with different content.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 4385 Studies Abroad: Writing II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in written communications in German using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in GRMN 2002 or GRMN 2060.

GRMN 4890 Directed Study in German
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent study under faculty supervision.
Prerequisite(s): Department approval.

GSU GSU

GSU 1000 CIR Placeholder Course
99 Credit Hours. 0-99 Lecture Hours. 0-99 Lab Hours.

GSU 1120 Strategies for Success
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
For students on Academic Intervention. This course emphasizes the development and application of skills needed for success in college that includes interpreting, organizing, and synthesizing academic information in texts and lectures; setting and achieving academic goals; understanding the purposes of higher education and the roles of the student; and effectively using university resources.

GSU 1210 University Orientation
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Designed to help first year students understand the purpose of a college education, learn about college resources and requirements, explore values and interests, learn to make decisions and realistic choices, explore career objectives and programs of study, and establish supportive relationships with faculty and staff. Required during the first semester for undergraduates new to the university (except transfer students with thirty or more hours); students may not withdraw.

GSU 1210A University Orientation
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.

GSU 1210O University Orientation
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.

GSU 1210R U Orientation/Contin Students
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.

GSU 1210W University Orientation
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.

GSU 1211 University Orientation II
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Encompasses an examination of model leaders, principles of leadership, and leaders in action. Provides opportunities to examine and develop skills essential to leadership effectiveness.
Prerequisite(s): GSU 1210.
**HADM 2131 Career Exploration**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide the student with the opportunity for in-depth career exploration. Within a decision making model, the student will explore self and the world of work and how the two interact. From this framework, students will identify steps needed to gain professional experience and polish the skills required to be successful in their chosen career path.

**HADM 2132 Professional Development Seminar**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Professional Development Seminar is a 3 credit-hour course designed for students interested in developing highly desired "essential skills". The seminar uses an Emotional Intelligence (EI) Framework to help students enhance professionalism and identify how emotions impact performance in the workplace.

**Prerequisites:** Junior standing or higher.

**GSU 2222 Preparing Students for University Service**
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course is open to students who have been through a selection process to obtain positions which require working effectively with peers and professional staff and are an integral part of the delivery of services by the Division of Student Affairs. The course teaches student paraprofessionals skills and knowledge to allow them to better serve other students, and introduces students to careers in higher education. The professional staff/instructor has the obligation to provide the essential theoretical and practical information necessary for students to effectively carry out their responsibilities.

**Prerequisite(s):** Permission of instructor.

**GWST Gender and Women's Stud**

**GWST 4000 Topics In Women'S Studies**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Will be

**Cross Listing(s):** selected upper-level courses in the university curriculum when content of those courses addresses issues related to Women's Studies. May be repeated for credit with different topics.

**HADM Health Administration**

**HADM 6100 U.S. Healthcare Systems**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the systems of health care delivery and financing in the United States, including public and private payers and insurers as well as public and private providers of health services.

**HADM 6150 Organization Theory / Organizational Behavior in Health Care**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the fields of organization theory and organizational behavior and their application to the management of health services organizations. Topics covered included organizational governance, design, and structure, organizational ethics, the role of managements as a professional within the health services organization, management interfaces with other health professionals, intra-organizational coordination and communication, the effective use of groups and teams, negotiation and conflict management, organizational power and politics, and initiation and management of organizational change.

**HADM 6200 Quantitative Analysis Methods for Healthcare Management I**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to quantitative analysis methods utilized for problem solving and decision making at the population/macro level.

**HADM 6250 Healthcare Economics**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the economics of health care at both the micro and macro levels utilizing a variety of conceptual and empirical models. Particular attention is given to the supply and demand of healthcare resources and the impact of those resources on a population in a market-driven, but government-regulated system. Healthcare production is studied with respect to distributional issues both in perfectly competitive and imperfect markets, and from both investor owned and not-for-profit perspectives.

**HADM 6300 Healthcare Financial Management I**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to financial and managerial accounting, health care finance and the current financial environment in which health care organizations function. The course considers and evaluates basic financial, accounting and reimbursement tools and how they are applied in the management decision-making process.

**HADM 6350 Legal and Ethical Environment of Healthcare**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines legal and ethical issues in health care and investigates the health care administrator as a decision-maker, leader, and moral agent within the health care system.

**HADM 6400 Fundamentals of Population Health Management**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to principles and methods of population health management focusing on managerial applications of epidemiology such as population health measurement needs assessment, and development/evaluation of health services-related interventions to improve population health status.

**Prerequisite(s):** HADM 6200.

**HADM 6425 Health Information Systems Management**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the disciplinary field that deals with the storage, retrieval, sharing, and optimal use of health-related information, data, and knowledge for problem solving and decision making in a variety of organizational settings.

**HADM 6450 Human Resources Management in Healthcare**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the organization, training, motivation, and direction of employees with an emphasis on maintaining productivity and morale at a high level. Topics include selection, compensation, financial incentives, work standards, and leadership.
HADM 6500 Quality Management Methods in Healthcare  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An overview of the theory, principles, and techniques of quality management within contemporary health services organizations. Quality assurance and quality/process improvement approaches to QM are considered. Qualitative and quantitative methods that support organizational QM are also discussed.

HADM 6550 Healthcare Marketing  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Application of fundamental marketing principles and practices in various health care settings such as hospitals, physician practices and managed care organizations. The course will focus integration of marketing strategies across various functional areas of the health services organization. Content will include the tools, concepts, analytical frameworks, and skills necessary to understand and analyze an organization’s competitive environment, create profitable customer relationships, use and apply marketing information to segment and target specific customers and markets, design marketing programs and make marketing decisions to create competitive advantage.

HADM 6600 MHA Professional Seminar I  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
A competency-based seminar focused on the professional development of the 1st year MHSA student. Topics will vary based on assessments of competency and/or professional development needs but may include the development/refinement of skills related to resume writing, interviewing, professional presentations, professional ethics, and academic / professional portfolio development.

HADM 7200 Quantitative Analysis Methods for Healthcare Management II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to quantitative analysis methods utilized for problem solving and decision making at the organizational/ micro level. Topics include economic analysis and decision making, operations analysis/ research methods, and time series analysis/forecasting.  
Prerequisite(s): HADM 6200.

HADM 7250 Health Politics and Policy  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An overview of the policymaking process that results in the formulation of health policy in the public sphere. Topics considered include principles of public policy analysis, policy evaluation methods, and political environmental assessment techniques. Various domains of current health policy interest are also discussed.  
Prerequisite(s): HADM 6250.

HADM 7300 Healthcare Financial Management II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An advanced and detailed view of how managers apply financial theory and principles, the course builds on principles learned in Health Care Financial Management I and uses a case method approach to allow students to develop competencies in financial management and analysis. Quantitative decision analysis techniques, costing methods, and financial policy analysis skills will be employed in the case method approach.  
Prerequisite(s): HADM 6300.

HADM 7500 Strategic Management of Healthcare Organizations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course addresses the strategic management and marketing functions within contemporary health services organizations. It focuses on the organizational strategic planning processes, including principles and methods of strategic assessment, strategy formulation, evaluation, implementation, and control, as well as the role and function of marketing strategy as part of the strategic implementation process.  
Prerequisite(s): Permission of instructor.

HADM 7550 MHA Capstone Project  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Comprehensive assessment of skill and knowledge-based program competencies based upon student completion, presentation, and defense of results from a faculty-approved and supervised applied project or research paper that is suitable for publication. Each student must also successfully complete a written and/or oral comprehensive examination to fulfill course requirements.  
Prerequisite(s): Permission of instructor.

HADM 7600 MHA Professional Seminar II  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
A competency-based seminar focused on the professional development of the 2nd year MHSA student. Topics will vary based on assessments of competency and/or professional development needs but may include the development/refinement of skills related to job and administrative fellowship search, leadership development, and career planning.  
Prerequisite(s): HADM 6600.

HADM 7700 MHA Internship / Residency  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Completion of a structured experiential learning program under the auspices of a site-based and program-approved protocol. Students pursuing this option are required to complete their assigned duties/ responsibilities in a satisfactory fashion and prepare a post-experience report for program faculty evaluation.  
Prerequisite(s): Permission of instructor.

HADM 7725 MHA Practicum  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides the student an individualized, guided experience in healthcare administration with appropriate agencies and selected preceptors. This experience is designed to assist the student in synthesizing the knowledge gained in the classroom and applying this knowledge across multiple disciplines within the healthcare delivery system.  
Prerequisite(s): Permission of instructor.

HIST History  
HIST 1111 World History I: Development of World Civilization  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of the major developments in world history from the beginnings of civilization to 1450, establishing the historical context for contemporary global society.

HIST 1112 World History II: Emergence of Modern Global Community  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Addresses the historical context of contemporary global society by tracing developments from the fifteenth century to the present.

HIST 2110 U.S. A Comprehensive Survey  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Surveys the United States from precolonial times to the present with special attention to Georgia. Satisfies the Georgia History and U.S. History requirements.

HIST 2111 History of the United States to 1877  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of U.S. History to the post-Civil War period. The course focuses on the geographical, intellectual, political, economic and cultural development of the American people, and places U.S. events in the context of world politics. (This course satisfies the State legislative requirement concerning United States history and Georgia history.)

HIST 2112 History of the United States since 1877  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of United States history from Reconstruction to the present.
HIST 2630 Historical Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the methodologies and techniques of historical research and writing. This course is required for history majors.

HIST 2950 Internship
1-3 Credit Hours. 1-3 Lecture Hours. 1-3 Lab Hours.
An individually designed course involving off-campus study and research or work in an appropriate public agency or private business. Assignments normally designed to require the full semester for completion. Joint supervision by the sponsoring organization and the academic instructor. Graded on Satisfactory/Unsatisfactory basis. Student must have at least nine hours of history courses with a history GPA of 2.5. Application and credit arrangements must be made through the department in advance, normally by mid-semester preceding the internship.

HIST 3020 The African Diaspora
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Historical overview of the spread of African peoples around the world and examination of diasporic issues in the modern era, such as the so-called African brain drain, historic diaspora tourism and development, as well as diasporic experiences of return.

HIST 3030 Selected Topics in History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics vary with individual professor. Honors course is designated for Honor Students.
Cross Listing(s): LAST 3030.

HIST 3050 Ethics and Values in History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected issues in ethics and values considered from a historical perspective. Topics may include ethics and values in western and/or non-western cultures, the relationship of the good of the citizen to that of the state, family relationships and values, environment and bio-ethics, world view and ethnocentrism.

HIST 3130 African American History to 1865
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
African American history from African beginnings to Reconstruction. This is a study of the thought and actions of African ancestry from their origins in precolonial Africa to the conclusion of the Civil War and its aftermath.
Cross Listing(s): AAST 3130.

HIST 3131 African American History since 1865
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
African American history from Reconstruction to the present.

HIST 3132 Young Republic, 1788-1848
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of U.S. history from the Ratification of the Constitution through the end of the war with Mexico. This course will cover major aspects of American politics, economy, and culture as the country expanded to the Pacific.

HIST 3133 United States Constitutional History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the United States Constitutional history from its origins to the present including an exploration of the adaptation of the federal system to changing social, economic, and political demands.

HIST 3134 American Economic History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Growth and development of economic institutions and economic life in the United States from the colonial period to the present, including developments in agriculture, industry, business organization, labor, transportation, finance, consumerism, religion, and social transformation.

HIST 3135 US Foreign Relations to World War I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the history of U.S. foreign relations from independence to the aftermath of World War I.

HIST 3136 US Foreign Relations since World War I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the history of U.S. foreign relations from World War I to the Present.

HIST 3139 History of Religion in the U.S.
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey and analysis of the major religious patterns in the United States with special attention given to belief systems, institutional forms, social composition, and historical development.
Cross Listing(s): RELS 3139.

HIST 3150 The History of Vietnam, 236 B.C. to Present
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students will be introduced to the history of Vietnam from its origins in 236 B.C. through the present. Included will be the impact of a thousand years of Chinese colonial rule until 1939 and then the country’s independent development and expansion versus its neighbors in Southeast Asia before the arrival of the French in the early 19th century. The course will then shift to Vietnam’s long struggle to regain its independence that only concluded in 1975. Students will develop advanced proficiency in history through readings and writing assignments as well as individual research projects.

HIST 3151 The American War in Vietnam
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines political, military, social, and cultural aspects of the American War in Vietnam from American and Vietnamese perspectives.

HIST 3158 War and Society: A Global Perspective
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the relationship between warfare and societies from a global perspective.

HIST 3200 Traditional China
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History of Chinese civilization from ancient times to the Qing Dynasty, with emphasis on its characteristic political, social, economic, and cultural developments.

HIST 3225 History of Ancient Near East
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the ancient Near East from prehistory to the rise of Islam. Topics may include ancient Israel, Sumer, Egypt, Assyria, Babylonia, Persia, Greece, Rome, and Byzantium.

HIST 3230 American Military History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Studies military strategy, tactics, technology, and main features of American conflicts from colonial times to this century.

HIST 3231 Introduction to Public History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the basic historiographic and anthropological approaches used in public history and a survey of the different disciplines such as archaeology, architecture, folklife, decorative arts, museum studies, and preservation which comprise public history.

HIST 3233 The Early Church
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
How did Christianity turn from an illegal, persecuted cult into the official religion of the Roman empire? The course will focus on the first five hundred years of the Christian church: its development, doctrine, and especially its relationship with the ancient civilizations of the Mediterranean world (Greece, Rome, and the Near East). Cross Listing(s): RELS 3233.
HIST 3234 The History of Islam in Southeast Asia
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
After a brief review of the founding, basic beliefs and practices of Islam, the students will be introduced to the history of Islam in Southeast Asia from its arrival through the present. Included will be how Islam “fit” into the region’s existing religiosity as well as its political-economic life. The arrival of Europeans by the 1500s introduced an important new factor into the region which had religious as well as political-economic dimensions, resulting in local resistance and religious as well as secular nationalism. After World War II, with the emergence of new and largely democratic states, the relationship of the state and Islam became a more complex issue and continues to play a significant role in the national lives of the region. Students will develop advanced proficiency in history through readings and writing assignments as well as individual research projects and essay examinations.

HIST 3236 History of Latinos/as in the United States
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A political, social, and cultural survey of Latinos/as in the United States from the eighteenth century to the present day.

HIST 3250 The Muslim World to Tamerlane
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the rise of Islam in the seventh century and of the various Muslim societies that arose prior to the fifteenth century from the Iberian Peninsula to South Asia.
Cross Listing(s): INTS 3250 and RELS 3250.

HIST 3251 The Muslim World Since Genghis Khan
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the global reach of Islam since the thirteenth century. The focus is on how Muslim societies have dealt with the precipitous decline in their well-being since their pinnacle of influence in the seventeenth century. Cross Listing(s): INTS 3251 and RELS 3251.

HIST 3320 History of Russian and Soviet Foreign Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of topics of Russian and Soviet foreign policy form the end of the tsarist period to the present. Analysis of the effect on the international system of the collapse of the Soviet Union and the place of Russia in the world today.

HIST 3330 History of Greece
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of ancient Greek history from the Minoan and Mycenaean civilizations to Alexander the Great.

HIST 3331 History of Rome
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of Roman history and society from the beginnings to the emperor Constantine.

HIST 3332 Late Antiquity
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the Mediterranean world from the later Roman Empire to the new civilizations of Europe, Byzantium, and Islam.

HIST 3333 The Middle Ages
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the development of European civilization and relations between Christendom and Islam from the decline of the Roman Empire to the Renaissance.

HIST 3334 Christian Europe 450-1750
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The major theme of this course is the development of various Christian traditions in Europe from the early middle ages to the Enlightenment. Topics include the spread of Christianity, formation of distinct Christian churches, and the many wars fought in the name of Christianity.
Cross Listing(s): RELS 3334.

HIST 3338 Contemporary Europe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the European experience since the end of World War II. Emphasizes the political, economic social, cultural, and intellectual change and continuity in the years 1945 to the present.

Cross Listing(s): INTS 3338.

HIST 3350 Maritime History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the relationship between humankind and the sea. Students will explore how maritime activities on both inland waterways and oceans, influenced ship design, exploration, navigation, trade, and cultural and biological diffusion. Chronology and geographic focus are dependent on the instructor’s expertise.

HIST 3352 Israel/Palestine in its Middle Eastern Context
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of key events, cultural developments, and political affairs in the area of Israel/Palestine in relation to broader issues impacting the region.

HIST 3354 Maritime Archaeology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This class examines the methods, theories, and practices used to study archaeological evidence related to maritime sites including shipwrecks, wharf structures, and other elements of the maritime cultural landscape. Although the course focuses on introducing the student to maritime archaeological data collection methods it does so in a way that is useful to historians.

HIST 3357 Modern Britain: 1485 to the Present
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This comprehensive survey of the political, economic and cultural history of the British Isles and British Empire covers the period from the end of the Wars of the Roses in 1485 to the present era of devolved sovereignty in Scotland and Wales and the partial independence of Ireland.

HIST 3362 Modern Germany
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of modern German history, outlining the origins of Prussia, Bismarck’s statecraft, the rise and fall of Hitler’s Third Reich, and post-World War II Germany.

HIST 3363 Modern European Thought
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of significant figures and developments in modern European intellectual history from the eighteenth century Enlightenment to Post-Structuralism.

HIST 3365 The Scientific Revolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of scientific change from Copernicus to Newton.

HIST 3367 The Holocaust
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will examine the origins, implementation, and legacy of the Holocaust: the attempt of the Nazis to eliminate Europe’s Jews and other ethnic groups labeled as undesirables by the National Socialist Movement in Germany.

HIST 3480 Europe in the 19th Century
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The social, political, and intellectual directions of European history from the Congress of Vienna to the end of the 19th century.
Prerequisite(s): A minimum grade of "C" in HIST 1111 or HIST 1112.

HIST 3490 Europe in the 20th Century
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Major developments in Europe since 1900.
Prerequisite(s): A minimum grade of "C" in HIST 1111 or HIST 1112.
HIST 3530 History of Africa to 1800  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Traces the development of significant social, economic and political institutions within precolonial Africa.  
**Cross Listing(s):** AAST 3530 and INTS 3530.

HIST 3531 History of Africa since 1800  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Traces significant developments in precolonial, colonial and post-colonial African history. These include trade and the origins of the colonial state as well as African encounters with colonialism.  
**Cross Listing(s):** AAST 3531 and INTS 3531.

HIST 3532 The Modern Middle East  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of the major developments in the Middle East since World War I.  
**Cross Listing(s):** INTS 3532.

HIST 3533 Modern East Central Europe  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of East Central Europe which will stress the political, social, economic, military and cultural development of the 19th and 20th century Poland, Hungary, and Czech Republic as well as the Balkan nations.  
**Cross Listing(s):** INTS 3533.

HIST 3534 Modern Southeast Asia  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Common themes of the region from 1600, including the impact of the West, the nationalist response, and the post-WW II rise of a modern community of nations.  
**Cross Listing(s):** INTS 3534.

HIST 3536 Russia to 1917  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of the history of Russia from its Kievan origins to the Revolution of 1917.  
**Cross Listing(s):** INTS 3536.

HIST 3537 Colonial Latin America  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of Latin America from the pre-Columbian era to its struggles for independence in the 1800s. The class examines indigenous cultures before European conquest, the effects of colonization, and the development of Spanish and Portuguese empires, with special focus on colonial institutions, cultures, and socioeconomic developments.  
**Cross Listing(s):** INTS 3537 and LAST 3537.

HIST 3538 Latin America since Independence  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of Latin America from independence in the 1800s to the present. The class examines the challenges of nation building; twentieth-century political, socioeconomic, and cultural developments; and key contemporary phenomena.  
**Cross Listing(s):** INTS 3538, LAST 3538.

HIST 3580 Environmental History  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A historical study of the interactions between people and their environments. Course may focus on local environments, the Southeast, the entire United States, or survey the environmental history of the world. May be repeated once as topics vary.  
**Cross Listing(s):** INTS 3580.

HIST 3630 History Seminar  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
In this course, History majors in the Honors program will select a historical topic, begin researching it, choose a faculty mentor, and write a thesis prospectus that includes a review of the historiographical literature and an annotated bibliography.  
**Prerequisite(s):** A minimum grade of "B" in HIST 2630.

HIST 3700 American Material Culture  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to the methods of material culture analysis and key groups of American artifacts. Topics covered may include furnishings, fashion, cemeteries, industrial design, and consumerism.  
**Cross Listing(s):** AAST 3700 and INTS 3700.

HIST 3710 Historical Archaeology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examination of archaeological artifacts, methods, and theories, emphasizing the use of archaeological evidence consistent with the disciplinary standards of history. Chronological and regional focus varies with instructor’s area of expertise.  
**Cross Listing(s):** ANTH 3136.

HIST 3740 Women & Gender in Amer Hist  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examination of the history of American women and of historical ideas about gender in America from the colonial times to the present.  
**Cross Listing(s):** INTS 3530, LAST 3530, AAST 3530.

HIST 3750 US History 1877-1917  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Presentation of the major subjects of the late 19th century, and early 20th centuries, including the emergence of a national economy, its theory and policies; partisan and reform politics; American society and social thought; and territorial aggrandizement.  
**Cross Listing(s):** INTS 3750.

HIST 3760 US History 1877-1945  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Analysis of the institutions and forces that molded life in the United States from 1917 to 1945.  
**Cross Listing(s):** INTS 3760.

HIST 3770 US History 1917-1945  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A historical study of the interactions between people and their environments. Course may focus on local environments, the Southeast, the entire United States, or survey the environmental history of the world. May be repeated once as topics vary, but no more than five hours can be counted toward the major in History.  
**Prerequisite(s):** Permission of instructor or department.

HIST 3992 Internship  
1-3 Credit Hours. 0-3 Lecture Hours. 0-9 Lab Hours.  
An individually designed course involving off-campus study and research or work in an appropriate public agency or private business. Assignments normally designed to require the full semester for completion. Joint supervision by the sponsoring organization and the academic instructor. Graded on a satisfactory/unsatisfactory (S/U) basis. Student must have at least nine hours of history courses with a history grade point average of 3.0. Only three hours of internship (either HIST 3991 or HIST 3992) may be counted for the major. Application and credit arrangements must be made through the department by mid-semester preceding the internship.  
**Cross Listing(s):** INTS 3992.

HIST 4030 Directed Study in History  
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.  
Independent study with topics varying by professor.

HIST 4110 Medieval Spain  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An examination of the political, social and economic development of the Iberian peninsula from Late Antiquity to the fall of Granada in 1492. The course pays special attention to the interaction of Muslim, Christian and Jewish communities over the course of these centuries.  
**Cross Listing(s):** INTS 4110, LAST 4110, AAST 4110.

HIST 4120 American Intellectual History  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An examination of the major American thinkers and ideas that have influenced the nation's history from the founding era to the present, with an emphasis on political thought.
HIST 4130 Georgia History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores important political, social, cultural, and economic developments that have shaped modern Georgia. Satisfies the Georgia Constitution and Georgia History requirements.

HIST 4131 Biography and History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analysis of biography as a genre in historical writing and scholarship using life stories of representative individuals in history.

HIST 4132 Recent America: U.S. Since 1945
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the history of the United States from World War II to the present, including social, political, and economic developments.

HIST 4133 US Foreign Relations: The Cold War
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the history of U.S. foreign relations from the aftermath of World War II to the collapses of the Soviet Union.

HIST 4134 The Civil Rights Movement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course explores the origins, ideologies, strategies and legacy of the modern civil rights movement in the North and the South with special focus on the impact of race, class and gender on civil rights from 1946-1968.

HIST 4135 The United States in the 1960s
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the cultural, social and political changes in the United States during the 1960s. Topics include the Civil Rights movement, the Vietnam War, the rise of feminism, the counterculture, and the conservative backlash.

HIST 4230 The Renaissance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the artistic, cultural, intellectual, political, economic and social aspects of life in Europe (with a special focus on Italy) from the fourteenth through the seventeenth centuries, paying particular attention to the revival of antiquity and its impact on intellectual and artistic trends.

HIST 4235 Tudor and Stuart Britain
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers the Tudor and Stuart monarchies from 1485-1714, investigating how monarchs reformed religion, patronized major artists, made constitutional changes, and created an economic and political empire spanning the globe. The course concludes with the end of the Stuart Dynasty, and with it, the end of native English, Welsh, and Scottish monarchs.

HIST 4331 Invasion of the Americas
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the encounters among diverse peoples, and the social, economic, and power relations that developed from these contacts. There are three primary aims of this course: 1. To introduce you to the concepts, assumptions, and methods of the historical discipline. 2. To bridge the histories of Europe and America. 3. To examine the exploration, exploitation, and colonization of North America from the perspectives of both early modern Europeans and Native Americans. We will be employing the hybrid discipline of ethnohistory to examine the Western enterprises of the Spanish, French, Dutch, and English, their impact upon the native cultures, as well as the impact of the native cultures upon them, and their success in transplanting European culture to the New World.

HIST 4332 Colonial America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on early American history from the pre-contact to the period just prior to the Revolution. It examines the growing prosperity of the colonial American colonies, the increasing diversity of their populations, and the tensions and crises that resulted from both of these developments. Topics will include the rise of slavery, the birth of consumer society, and the contest among European nations and their Indian allies over the future of North America.

HIST 4333 Women and Gender in Europe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores issues of gender, spirituality, and power within the context of African history.

HIST 4334 The Civil Rights Movement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the history of U.S. foreign relations from the aftermath of World War II to the collapses of the Soviet Union.

HIST 4335 Women and Gender in Europe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores issues of gender, spirituality, and power within the context of African history.

HIST 4336 Science and Religion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the interactions between science and religion from ancient times to the present.

HIST 4430 Revelation and Revolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the end of plantation slavery in the nineteenth century Atlantic World. The geographic concentration and topics covered will vary according to the focus of the instructor.

HIST 4431 Invasion of the Americas
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the encounters among diverse peoples, and the social, economic, and power relations that developed from these contacts. There are three primary aims of this course: 1. To introduce you to the concepts, assumptions, and methods of the historical discipline. 2. To bridge the histories of Europe and America. 3. HIST 4432 Colonial America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on early American history from the pre-contact to the period just prior to the Revolution. It examines the growing prosperity of the colonial American colonies, the increasing diversity of their populations, and the tensions and crises that resulted from both of these developments. Topics will include the rise of slavery, the birth of consumer society, and the contest among European nations and their Indian allies over the future of North America.

HIST 4433 Women and Gender in Europe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores issues of gender, spirituality, and power within the context of African history.

HIST 4434 The Civil Rights Movement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the history of U.S. foreign relations from the aftermath of World War II to the collapses of the Soviet Union.

HIST 4435 Women and Gender in Europe
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores issues of gender, spirituality, and power within the context of African history.

HIST 4436 Science and Religion
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the interactions between science and religion from ancient times to the present.

HIST 4530 Revelation and Revolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the end of plantation slavery in the nineteenth century Atlantic World. The geographic concentration and topics covered will vary according to the focus of the instructor.

HIST 4531 World War I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the origins, diplomacy, critical turning points, and conclusion of World War I with attention to its cultural and social experiences and meanings for both soldiers and civilians.

HIST 4532 Destruction of Slavery
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the end of plantation slavery in the nineteenth century Atlantic World. The geographic concentration and topics covered will vary according to the focus of the instructor.

HIST 4533 The History of Flight
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the development of aeronautics from the earliest ideas through the space age.

HIST 4635 Senior Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A senior seminar in which students will engage in extensive research in historical sources and literature relating to a specific problem or topic. Emphasis will be on the individual preparation of research papers. Topics will vary with professor.

HIST 4790 Internship in History
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed to give History majors applied history experiences in museums, historical societies, historical sites, or other venues approved by the History Department chair. May be taken only by History majors.

HIST 4812 Ind Study in Non-Western Hist
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasis will be on the individual preparation of research papers. Topics will vary with professor.

HIST 4832 Ind Study in European History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A minimum grade of "C" in HIST 2630.

HIST 4835 Ind Study in Non-Western Hist
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasis will be on the individual preparation of research papers. Topics will vary with professor.

HIST 4900 Internship in History
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed to give History majors applied history experiences in museums, historical societies, historical sites, or other venues approved by the History Department chair. May be taken only by History majors.

HIST 4932 Ind Study in European History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A minimum grade of "C" in HIST 2630.

HIST 4935 Ind Study in Non-Western Hist
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasis will be on the individual preparation of research papers. Topics will vary with professor.

HIST 4997 Independent Study
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Available only by special arrangement with the department, made in advance. Ask in the History Department for specific information.

HIST 4998 Independent Study
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Available only by special arrangement with the department, made in advance. Ask in the History Department for specific information.
HIST 4852 Ind Study in American History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Available only by special arrangement with the department, made in advance. Ask in the History Department for specific information.

HIST 4872 Ind Study in Public History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Available only by special arrangement with the department, made in advance. Ask in the History Department for specific information.

HIST 5030 Selected Topics in History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics will vary with individual professor.
Cross Listing(s): HIST 5030G.

HIST 5030G Selected Topics in History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics will vary with individual professor. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5030.

HIST 5130 American Indian History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the history of American Indians from pre-contact to the present, supplemented by case studies from a number of regions.
Cross Listing(s): HIST 5130G.

HIST 5130G American Indian History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the history of American Indians from pre-contact to the present, supplemented by case studies from a number of regions. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5130.

HIST 5133 Revolutionary America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An intensive study of themes in Revolutionary American history (from 1763 to approximately 1790), including the growing rift between Britain and its colonies, the roles of women and African-Americans, and the origins of American identity.
Cross Listing(s): HIST 5133G.

HIST 5133G Revolutionary America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An intensive study of themes in Revolutionary American history (from 1763 to approximately 1790), including the growing rift between Britain and its colonies, the roles of women and African-Americans, and the origins of American identity. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5133.

HIST 5134 Civil War and Reconstruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the sectional polarization of the 1850's, the impact of war on the southern and northern home fronts, and the trauma of reconstructing the Union.
Cross Listing(s): HIST 5134G.

HIST 5134G Civil War and Reconstruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the sectional polarization of the 1850's, the impact of war on the southern and northern home fronts, and the trauma of reconstructing the Union. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5134.

HIST 5137 The Antebellum South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the social, intellectual, cultural, economic, and political history of the American South to 1861. Cross Listing(s): HIST 5137G.

HIST 5137G The Antebellum South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the social, intellectual, cultural, economic, and political history of the American South to 1861. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5137.

HIST 5138 The New South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The social, intellectual, cultural, economic, and political history of the post-Civil War South with an emphasis on Georgia's role.
Cross Listing(s): HIST 5138G.

HIST 5138G The New South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The social, intellectual, cultural, economic, and political history of the post-Civil War South with an emphasis on Georgia's role. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5138.

HIST 5210 Advanced Topics in Public History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students will develop advanced proficiency in the professional practice of Public History through readings and experiential learning that will prepare them to present historical knowledge to a public audience. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Topics vary. May be repeated for credit.
Cross Listing(s): HIST 5210G.

HIST 5210G Advanced Topics in Public History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students will develop advanced proficiency in the professional practice of Public History through readings and experiential learning that will prepare them to present historical knowledge to a public audience. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Topics vary. May be repeated for credit. Cross Listing(s): HIST 5210.
HIST 5230 Advertising and Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the business and practice of selling consumer goods in the United States from the nineteenth century to the present with analysis of how advertising became an economic and cultural force, and a cornerstone of the consumer culture. Topics include the development of mass marketing, product brands, persuasive advertising, mail-order catalogs, department stores, as well as the relationship of consumerism to gender, ethnicity, race, social class, religion, and youth. Cross Listing(s): HIST 5230G.

HIST 5230G Advertising and Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys the business and practice of selling consumer goods in the United States from the nineteenth century to the present with analysis of how advertising became an economic and cultural force, and a cornerstone of the consumer culture. Topics include the development of mass marketing, product brands, persuasive advertising, mail-order catalogs, department stores, as well as the relationship of consumerism to gender, ethnicity, race, social class, religion, and youth. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5230.

HIST 5232 Working Class History in the United States
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the social, cultural and political history of the working class in the United States since industrialization. Cross Listing(s): HIST 5232G.

HIST 5232G Working Class History in the United States
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the social, cultural and political history of the working class in the United States since industrialization. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5232.

HIST 5233 The American City
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of American urban development from the colonial period to the present with particular attention paid to migration, architecture, technology, politics, transportation, and urban culture in the late nineteenth and twentieth centuries. Cross Listing(s): HIST 5233G, AAST 5233, AAST 5233G.

HIST 5233G The American City
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of American urban development from the colonial period to the present with particular attention paid to migration, architecture, technology, politics, transportation, and urban culture in the late nineteenth and twentieth centuries. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5233, AAST 5233, AAST 5233G.

HIST 5234 Piracy in the Americas, 1500-1750
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the history of piracy in the Americas during the Golden Age of Piracy, a period that ranges from European contact to the mid-1700s. It is an age marked by exploration, colonization, overseas trade, endemic religious conflicts, expansive empires, and refractory fiefdoms. Spain and Portugal began the exploration, overseas trade and conquest of this period, but their successes quickly led their northern neighbors, particularly the French, English, and Dutch, to cast their covetous eyes upon slow-moving, inbound treasure fleets of their southern neighbors; creating an elaborate game between predators and prey. The interactions that developed between predators and prey will be the primary subject of this course. Cross Listing(s): HIST 5234G.

HIST 5234G Piracy in the Americas, 1500-1750
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5234.

HIST 5236 Age of Revolutions in Europe and the Atlantic World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the great age of revolutions spanning c. 1650-1848 during which numerous political, intellectual, cultural, religious, and economic changes occurred which transformed European and the Atlantic World at the inception of the modern world. This course examines such revolutionary transformations, and/or what is meant by the historical concept of revolution, itself, by focusing on specific topics and themes. Topics may include absolutism, the Enlightenment, the Atlantic Revolutions (American, French, Haitian, Latin American), the Revolutions of 1848, and/or the extension of human rights through revolutionary debates over race, slavery, and gender. Cross Listing(s): HIST 5236G.

HIST 5236G Age of Revolutions in Europe and the Atlantic World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5236.

HIST 5240 Topics in Women and Gender in America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the history of women and gender in America. May be repeated once as topics vary. Cross Listing(s): HIST 5240G, WGST 5240, WGST 5240G.
HIST 5240G Topics in Women and Gender in America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the history of women and gender in America. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5240.

HIST 5241 Topics in Latin American History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed analysis of a specific problem, theme, or topic in Latin American history. May be repeated once as topics vary.
Cross Listing(s): HIST 5241G.

HIST 5241G Topics in Latin American History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed analysis of a specific problem, theme, or topic in Latin American history. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5241.

HIST 5242 Topics in African History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in the history of Africa, including political, economic, social, religious, and/or cultural trends as defined by the instructor. May be repeated once as topics vary.
Cross Listing(s): HIST 5242G.

HIST 5242G Topics in African History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in the history of Africa, including political, economic, social, religious, and/or cultural trends as defined by the instructor. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5242.

HIST 5243 Topics in Asian History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed analysis of a specific problem, theme, or topic in Asian history. May be repeated once as topics vary.
Cross Listing(s): HIST 5243G.

HIST 5243G Topics in Asian History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed analysis of a specific problem, theme, or topic in Asian history. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5243.

HIST 5244 Topics in Middle Eastern and Mediterranean History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed analysis of a specific problem, theme, or topic in Middle Eastern and Mediterranean history. May be repeated once as topics vary.
Cross Listing(s): HIST 5244G.

HIST 5244G Topics in Middle Eastern and Mediterranean History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed analysis of a specific problem, theme, or topic in Middle Eastern and Mediterranean history. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5244.

HIST 5245 Topics in Medieval History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in European history c. 325-1500. May be repeated once as topics vary.
Cross Listing(s): HIST 5245G.

HIST 5245G Topics in Medieval History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in European history c. 325-1500. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5245.

HIST 5246 Topics in European History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in European history. May be repeated once as topics vary.
Cross Listing(s): HIST 5246G.

HIST 5246G Topics in European History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in European history. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5246.

HIST 5247 Topics in European Intellectual and Cultural History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of particular topics in European intellectual and cultural history, emphasizing primary sources and varied historical interpretations. May be repeated once as topics vary. Cross Listing(s): HIST 5247G.

HIST 5247G Topics in European Intellectual and Cultural History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of particular topics in European intellectual and cultural history, emphasizing primary sources and varied historical interpretations. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5247.

HIST 5248 Topics in Law and History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed study or analysis of a particular theme, topic, and/or region in legal history. May be repeated once as topics vary.
Cross Listing(s): HIST 5248G.

HIST 5248G Topics in Law and History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Detailed study or analysis of a particular theme, topic, and/or region in legal history. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5248.

HIST 5249 Topics in American Thought and Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the history of American thought, values, and culture. May be repeated once as topics vary.
Cross Listing(s): HIST 5249G.
HIST 5249G Topics in American Thought and Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the history of American thought, values, and culture. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5249.

HIST 5251 Museum Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the history and development of museums and the professionalization of the field. It covers the structure and nature of curatorial, education, and administrative work in museums and theoretical and practical issues facing museums today. The course will provide an overview of current method and theory in material culture studies. Students will visit and evaluate museums and virtual exhibits and study major exhibit controversies and debates about the politics of historical memory and exhibition. Readings and discussions will provide a basis for a hands-on section of the course where student teams will create small case exhibits that transmit and display historical knowledge.
Cross Listing(s): HIST 5251G.

HIST 5251G Museum Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Cross Listing(s): HIST 5251.

HIST 5252 Folklife
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of the creation and persistence of tradition in societies and of the process of change as demonstrated in such aspects as narrative, music, song, celebration, festival, belief, and material culture. Emphasis on understanding the multi-ethnic nature of the traditions in American life. May be repeated once as topics vary.
Cross Listing(s): HIST 5252G.

HIST 5252G Folklife
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of the creation and persistence of tradition in societies and of the process of change as demonstrated in such aspects as narrative, music, song, celebration, festival, belief, and material culture. Emphasis on understanding the multi-ethnic nature of the traditions in American life. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5252.

HIST 5253 Archival Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the archivist as a professional and to the role of archives in society. Survey of the documentary materials and of the principles and practices involved in their acquisition, cataloging, care, and retrieval in public and private facilities also included. May be repeated once as topics vary.
Prerequisite(s): HIST 2630.
Cross Listing(s): HIST 5253G.

HIST 5253G Archival Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the archivist as a professional and to the role of archives in society. Survey of the documentary materials and of the principles and practices involved in their acquisition, cataloging, care, and retrieval in public and private facilities also included. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5253.

HIST 5254 Oral History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of how to prepare and conduct oral history interviews; how to transcribe, log, and index oral history recordings; and how to use oral history collections in writing research papers.
Prerequisite(s): HIST 2630.
Cross Listing(s): HIST 5254G.

HIST 5254G Oral History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of how to prepare and conduct oral history interviews; how to transcribe, log, and index oral history recordings; and how to use oral history collections in writing research papers. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5254.

HIST 5255 Topics in Architectural History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in architectural history, including various styles of architecture (Georgian, federal, neoclassical, eclectic, and modern), and vernacular architecture. Recording techniques, research strategies, theoretical approaches, landscape architecture, field trips, and visiting lecturers. May be repeated once as topics vary.
Cross Listing(s): HIST 5255G.

HIST 5255G Topics in Architectural History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in architectural history, including various styles of architecture (Georgian, federal, neoclassical, eclectic, and modern), and vernacular architecture. Recording techniques, research strategies, theoretical approaches, landscape architecture, field trips, and visiting lecturers. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5255.

HIST 5256 Historic Preservation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the field including values, principles, development of planning and organization for preservation; preservation law, economics, and politics. May be repeated once as topics vary.
Prerequisite(s): HIST 2630.
Cross Listing(s): HIST 5256G.
HIST 5256G Historic Preservation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the field including values, principles, development of planning and organization for preservation; preservation law, economics, and politics. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5256.

HIST 5257 Heritage Tourism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History of tourism, with emphasis on heritage and tourism, and of the function and impact of tourism on guest and host societies. Aspects of the modern tourist industry and its products, such as promotional and travel literature, accommodations and transport, and tourist arts also investigated. May be repeated once as topics vary.
Prerequisite(s): HIST 2630.
Cross Listing(s): HIST 5257G.

HIST 5257G Heritage Tourism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History of tourism, with emphasis on heritage and tourism, and of the function and impact of tourism on guest and host societies. Aspects of the modern tourist industry and its products, such as promotional and travel literature, accommodations and transport, and tourist arts also investigated. May be repeated once as topics vary.
Cross Listing(s): HIST 5257.

HIST 5258 Topics in African American History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in the history of African-American people emphasizing their cultural, social, economic, political, national and/or regional experiences. May be repeated once as topics vary.
Cross Listing(s): HIST 5258G.

HIST 5258G Topics in African American History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in the history of African-American people emphasizing their cultural, social, economic, political, national and/or regional experiences. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5258.

HIST 5259 Topics in British History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the history of Great Britain and Ireland. May be repeated once as topics vary.
Cross Listing(s): HIST 5259G.

HIST 5259G Topics in British History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in the history of Great Britain and Ireland. May be repeated once as topics vary. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5259.

HIST 5260 History in the Digital Age
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore the ways digital technologies can be applied to the historian’s craft. Topics include working with new media, online historical research methods, publications, public outreach, and education. Students will examine both theoretical issues and basic skills.
Cross Listing(s): HIST 5260G.

HIST 5260G History in the Digital Age
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore the ways digital technologies can be applied to the historian’s craft. Topics include working with new media, online historical research methods, publications, public outreach, and education. Students will examine both theoretical issues and basic skills. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5260.

HIST 5332 The Age of Reformations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the breakup of western European Christian unity in the sixteenth and seventeenth centuries, with a particular focus on the Continental (Lutheran, Calvinist, and Radical) denominations and the social, political, and economic consequences for all Europeans.
Cross Listing(s): HIST 5332G, RELS 5332, RELS 5332G.

HIST 5332G Age of Reformations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the breakup of western European Christian unity in the sixteenth and seventeenth centuries, with a particular focus on the Continental (Lutheran, Calvinist, and Radical) denominations and the social, political, and economic consequences for all Europeans. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5332, RELS 5332, RELS 5332G.

HIST 5335 World War II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Second World War from its origins to its consequences. The military campaigns are covered, but there is also emphasis on the personalities, the technology, the national policies, and the effect of the war on the home fronts. Cross Listing(s): HIST 5335G.

HIST 5335G World War II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Second World War from its origins to its consequences. The military campaigns are covered, but there is also emphasis on the personalities, the technology, the national policies, and the effect of the war on the home fronts. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5335.

HIST 5336 Revolutionary France
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Revolutionary Era in France has inspired poets, politicians, social critics, and clergy all over the world, and its impact, causes, and significance have been debated for more than two centuries throughout the globe. That event was the French Revolution. This Revolution arguably set the tone for much of nineteenth- and twentieth-century European History, and inspired subsequent revolutionary events throughout much of the globe. Finally, the French Revolution was instrumental to the creation of the national consciousness of France as we know it today. This course is designed as a survey addressing major events, key players, causes, and consequences of the French Revolution. This course is additionally designed to familiarize students with the diverse ways in which historians have continued to debate and interpret the unfolding and significance of Revolutionary France.
Cross Listing(s): HIST 5336G.
HIST 5336G Revolutionary France
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

Cross Listing(s): HIST 5336.

HIST 5339G Britain and the World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the diplomatic, economic, colonial, environmental or cultural relationships between the British Isles and the broader world since 1485.
Cross Listing(s): HIST 5339G.

HIST 5339G Britain and the World
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the diplomatic, economic, colonial, environmental or cultural relationships between the British Isles and the broader world since 1485. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5339.

HIST 5430 Modern France and French Society in Global Context
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course affords a topical overview of major events, themes, and issues concerning the History of Modern France and its place within major patterns of European and Global History. The cultural, political, gender, racial, and imperial dimensions of French History will be underscored. Topics include: origins and course rise and fall of the Old Regime French monarchy from Renaissance to Revolution, the French Revolution and revolutionary transformations in Modern France, France and its Empire from c. 1870 to Decolonization, French society from Napoleon to the present, or France and the French Empire in the era of the World Wars (1914-1945). Cross Listing(s): HIST 5430G.

HIST 5530G Modern France and French Society in Global Context
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course affords a topical overview of major events, themes, and issues concerning the History of Modern France and its place within major patterns of European and Global History. The cultural, political, gender, racial, and imperial dimensions of French History will be underscored. Topics include: origins and course rise and fall of the Old Regime French monarchy from Renaissance to Revolution, the French Revolution and revolutionary transformations in Modern France, France and its Empire from c. 1870 to Decolonization, French society from Napoleon to the present, or France and the French Empire in the era of the World Wars (1914-1945). Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor.
Cross Listing(s): HIST 5430.

HIST 5530 20th Century Russia
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the history of Russia in the 20th century. Cross Listing(s): HIST 5530G.
HIST 5534G Contemporary China
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
History of People's Republic of China from 1949 to the present, with emphasis on political, social, economic, and cultural transformations. Graduate students will be required to complete additional assignments beyond the scope of the undergraduate requirements that demonstrate a level of mastery of the subject matter appropriate to graduate level work, as determined by the instructor. Cross Listing(s): HIST 5534.

HIST 7630 The Historian's Craft
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This seminar introduces graduate students to professional aspects of teaching, writing, and pursuing research in history, including historiography, philosophy of history, preparing a curriculum vitae, and fundamentals of classroom teaching and tutoring.

HIST 7631 Readings in American History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A reading colloquium in which topics will vary with individual professor. May be repeated as topic/theme varies.

HIST 7633 Readings in European History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A reading colloquium in which topics will vary with individual professor. May be repeated as topic/theme varies.

HIST 7635 Readings in Non-Western History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A reading colloquium in which topics will vary with individual professor. May be repeated as topic/theme varies.

HIST 7638 Research Prospectus
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Planned and supervised research and writing with the goal of producing a research prospectus preliminary to either a Thesis, or a Non-Thesis Project in History, or a Non-Thesis Project in Public History.

HIST 7639 Studies in Georgia History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Engages a variety of selected topics in Georgia History.

HIST 7651 Graduate Seminar in Public History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore the latest research, theories, and best practices in the field of Public History through readings, discussions, and written assignments. Topics include but are not limited to: museums; oral history; film, new media, and historical knowledge; popular publishing; national parks; visual history; archives; historical preservation.

HIST 7781 Professional Internship in Public History
1-6 Credit Hours. 1-6 Lecture Hours. 0 Lab Hours.
This course is designed to give graduate students applied history experiences in museums, historical societies, historical sites, or other venues approved by the History Department Chair or Graduate Director. May be taken only by History graduate students or Certificate in Public History. The course requires a minimum of 150 hours at the approved site. Maximum of 3 credit hours may apply toward the M.A. degree for students pursuing the thesis option; maximum of 6 credit hours may apply toward the M.A. degree for students pursuing the non-thesis option. This course will not substitute for thesis credit or non-thesis project credit required for the M.A. degree.

HIST 7791 Graduate Internship in History
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Individually designed project involving off-campus study and research in an appropriate agency. Projects will be under the joint supervision of the sponsoring agency and a faculty supervisor, and must be approved by the History Department Chair or Graduate Director. May be taken only by History graduate students. The course requires a minimum of 150 hours at the approved site. Maximum of 3 credit hours may apply toward the M.A. degree for students pursuing the thesis option.

HIST 7831 Independent Study in History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics vary with professor. May be repeated only once as topic/theme varies (program of study allows only two HIST 7831/7831S courses).

HIST 7900 Non-Thesis Project in Public History
1-6 Credit Hours. 1-6 Lecture Hours. 0 Lab Hours.
Building upon the work completed in HIST 7781 Professional Internship in Public History, the student will plan and execute a major public project at or in conjunction with, their approved site. Students will also complete a 6,000 – 10,000 word technical report that must be approved by a three-person faculty committee and orally defended. While this course will normally be taken following the successful completion of HIST 7781, with the permission of the Department Chair it may be taken concurrently.

HIST 7905 Prof Internship in Pub History
1-6 Credit Hours. 0-12 Lecture Hours. 0-12 Lab Hours.
Individually designed project involving off-campus study and research in an appropriate agency. Projects designed to require at least two terms for completion, during which time the student will be under the joint supervision of the sponsoring agency and the faculty supervisor. Upon completion of the project, students will present the formal report to the master's internship committee. The report must be approved to satisfy the requirement for the master's degree. May be repeated for a maximum of nine credits with a maximum of six credits only counting toward the degree.

HIST 7990 Non-Thesis Project in Public History
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A 6,000 – 10,000 word technical report that must be approved by a three-person faculty committee and orally defended. While this course will normally be taken following the successful completion of HIST 7781, with the permission of the Department Chair it may be taken concurrently.

HIST 7995 Prof Internship in Pub History
1-6 Credit Hours. 0-12 Lecture Hours. 0-12 Lab Hours.
Individually designed project involving off-campus study and research in an appropriate agency. Projects designed to require at least two terms for completion, during which time the student will be under the joint supervision of the sponsoring agency and the faculty supervisor. Upon completion of the project, students will present the formal report to the master's internship committee. The report must be approved to satisfy the requirement for the master's degree. May be repeated for a maximum of nine credits with a maximum of six credits only counting toward the degree.

HITC Health Informatics

HITC 3000 Introduction to Health Informatics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introductory survey of the field of health informatics, including the origin and development of the discipline into a profession as well as current and future trends in practice. Student orientation to the terminology used in the field as well as some of its more common applications including data quality assessment, data standards, and the regulatory framework for data privacy and confidentiality (HIPAA) are presented. Prerequisite(s): RESP 2110.

HITC 4100 Analysis of Healthcare Data
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of the methods that are commonly employed in the analysis of healthcare data commonly extracted from healthcare information systems such as electronic health records. Prerequisite(s): A minimum grade of "C" in HSCC 2300 and completion of MATH 2200 or MATH 1401.

HITC 4700 Introduction to Project Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of knowledge areas and tools necessary for successful management and completion of Hi-related projects. Starting from project pre-initiation and selection process, this course also stresses the life cycle of health care information technology (HIT) projects and how to apply appropriate knowledge areas in various phrases of HIT project's life cycle for integrated project management. Prerequisite(s): A minimum grade of "C" in HSCA 4630.
HITC 4750 Principles of Knowledge Management and Decision Support
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the principles of knowledge management and its application to health informatics. The course will address standard knowledge management lifecycle, including acquisition, organization, processing, sharing, and operationalization within the healthcare enterprise as well common approaches to clinical decision support, diffusion of innovation, data warehousing, and data mining.
Prerequisite(s): A minimum grade of "C" in HSCA 4630.

HITC 4800 Special Topics in Health Informatics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to current and emerging topics of importance to the field of health informatics including, but not limited to, health information exchange, meaningful use of health data, electronic medical records and provider order entry systems, enterprise architecture and applications, data standards, interoperability, etc.

HITC 4900 Internship
1-6 Credit Hours. 0-18 Lecture Hours. 0-18 Lab Hours.
On-site experience under the direction of a site supervisor (an off-campus health informatics professional) and a faculty supervisor. A faculty supervisor will establish criteria for performance and evaluation prior to the semester the internship is undertaken. Students may use a maximum of 6 hours of internship credit to fulfill degree requirements.

HLPR Health Professions

HLPR 1100 Intr Hlth Care/Med Terminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to concepts necessary for effective, ethical performance in the health care delivery system. Terminology of medicine. Basic foundation course.
Prerequisite(s): MATH 1001 or MATH 1111.

HLPR 1200 Multidiscipl Skills/Hlth Prof
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Emphasis on basic patient care skills common to all health professions. Patient and health practitioner safety is emphasized in class and laboratory exercises.
Prerequisite(s): MATH 1001 or MATH 1111.
Corequisite(s): HLPT 1200L.

HLPR 1200L Multi Dicipl Skils/Hlth Pro Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
Corequisite(s): HLPR 1200.

HLPR 2000 Intro Research in Health Prof
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Introduction to methods of scientific research in the health professions. Steps of the research process, critique of research reports, completion of literature review.
Prerequisite(s): ENGL 1102 and MATH 1111 or MATH 1001 or MATH 1113 or MATH 1161 or MATH 2072 and MATH 2200 or MATH 1401.

HLPR 2010 Cult Illns Disg & Trtmnt
2-3 Credit Hours. 2-3 Lecture Hours. 0 Lab Hours.
Examines health practices around the world. Investigates how different cultural, social and ethnic groups explain the causes of illnesses, the types of treatments they seek and services available for diagnosis. Involves several modules taught by different professors.
Prerequisite(s): ENGL 1101.

HLPR 2400 Principles of Pharmacology
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Principles of pharmacology to include routes of drug administration, absorption, distribution, tissue accumulation, metabolism, and excretion. Additional topics include pharmacodynamics, drug interactions, toxicology, and changes across the life span.
Prerequisite(s): A minimum grade of "C" in BIOL 2082.

HLPR 3200 Interprofessional Teams in Healthcare Organizations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to theory and skills related to interprofessional practice in healthcare organizations.
Prerequisite(s): ENGL 1102.

HLTH Health

HLTH 1520 Healthful Living
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Introduces students to fundamental concepts associated with healthful living throughout the life span in modern society. Course content focuses upon the promotion of health and wellness within individuals, families and communities through an understanding of healthful living, development of healthy lifestyles and avoiding or overcoming harmful habits.

HLTH 2120 Safety Principles and First Aid Techniques
2 Credit Hours. 0.1 Lecture Hours. 0.3 Lab Hours.
Enables students to learn to function more effectively in personal, social and vocational roles by developing expertise that will enable them to reduce to a minimum the risk of accident involvement. Special emphasis is placed on the concepts of accident causation, counter measures and how to respond to a wide variety of injury and sudden illness emergencies. Students satisfying American Red Cross standards will receive certification in Community First Aid and Safety/Community CPR.

HLTH 2510 Medical Terminology
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Equips the student with the basic skills needed to read, understand and interpret medical terms common to health related issues and tasks.

HLTH 3133 Health Prom Prog Planning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with the theory and practical applications of planning, developing, implementing and evaluating health promotion programs in a variety of settings. The focus will be on a global approach to planning with emphasis on the worksite, hospital and the community as settings for health promotion programming.

HLTH 3135 Topics in Coordinated School Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will review and synthesize content on selected topics in school health such as mental health, intention and unintentional injury, personal health, chronic and communicable disease, and environmental health.
Prerequisite(s): A minimum grade of "C" in HLTH 1520.

HLTH 3332 Coordinated School Health Programs
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to study the basic principles and practices underlying the organization and administration of a coordinated school health program including the relationship to current child health status. Assessment and planning of developmentally appropriate health instruction, examination of health education curricula with content focus on the following health topics: nutrition, consumer health, environmental/community health, disease prevention, sexuality and substance use education will also be addressed.
Prerequisite: A minimum grade of "C" in HLTH 1520; and junior standing and formal acceptance into the Teacher Education Program or consent of instructor.

HLTH 3431 Methods and Materials for School Health Education
3 Credit Hours. 0.2 Lecture Hours. 0.3 Lab Hours.
Introduces the student to productive, creative, innovative and effective methods needed to implement comprehensive school health education. Students will become familiar with organizing and presenting health content, health materials, health curricula, community resources and using technology for K-12 with emphasis on middle and secondary school students. An integral component of the class will be the participation in peer teaching experiences in the school setting. Prerequisite(s): A minimum grade of "C" in HLTH 1520 and Sophomore status and above.
HLTH 3432 HPE Curriculum Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with the knowledge, skills, and resources to develop a philosophical position and curricular materials consistent with that position and with state and national guidelines. 
Prerequisite(s): Admission to Teacher Education Program in Health and Physical Education.

HLTH 3530 Health and Physical Education for the Early Childhood Teacher
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Develops the elementary classroom teacher’s ability to organize and implement a developmentally appropriate health and physical education program for students. Emphasis will be placed upon teaching strategies and methodologies.
Prerequisite(s): Admission to Teacher Education Program.

HLTH 6133 School Health Education Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce the student to productive, creative, innovative and effective methods needed to implement comprehensive school health education. Students will become familiar with organizing and presenting health content, health materials, health curricula, community resources and using technology for K-12 with emphasis on middle and secondary school students.
Prerequisite(s): Admission to MAT in Health and Physical Education Program.

HLTH 7099 Selected Topics in Health Science
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to conduct an in-depth study of selected topics in health science. Particular attention will be given to the critical evaluation and presentation of research.
Prerequisite(s): Permission of Instructor.

HLTH 7130 Issues and Trends in School Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will address the processes and issues associated with planning, implementing, evaluating, and organizing a coordinated school health program in accordance with national and state guidelines.

HLTH 7238 Women's Health Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

HLTH 7239 Health and Aging
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

HLTH 7430 Human Dev/Health Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

HLTH 7431 Health and Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

HLTH 7760 Practicum in Community Health Education
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
Permits the student to receive practical experience in a selected health related setting.
Prerequisite(s): Permission of Graduate Program Director.

HLTH 7899 Directed Individual Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.
Prerequisite(s): Permission of Instructor.

HLTH 8431 Health and Human Sexuality for Educators
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prepares current and future sexuality educators for implementing sexuality education programs in various settings, including schools, colleges, and universities and community programs.
Prerequisite(s): Undergraduate course in sexuality or Permission of instructor.

---

HNRM Hotel and Restaurant Mgt

HNRM 2333 Intro to Hotel & Restaur Indus
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the history of services management, the organizational forms and professional opportunities in the hospitality industry.

HNRM 3090 Selected Topics in Hotel and Restaurant Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides students with the opportunity to study contemporary and international topics and issues relevant to the hotel and restaurant management profession.

HNRM 3331 Hospitality Industry Management I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the history of services management, the organizational forms and professional opportunities in the hospitality industry.

HNRM 3336 Hotel Operations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on four major lodging management components: service management, operations management, developing leadership potential and employee productivity.
Prerequisite(s): A minimum grade of “C” in all of the following HNRM 3331 and ACCT 2030 or ACCT 2101 and ACCT 2102.

HNRM 3337 Promoting the Hospitality Industry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course applies marketing concepts to the promotion of hotel and restaurant operations.
Prerequisite(s): A minimum grade of “C” in HNRM 3331.

HNRM 3338 Hospitality Industry Management II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course applies the principles of management and human resources to hotel and restaurant operations.
Prerequisite(s): HNRM 3331.

HNRM 4334 Food and Beverage Operations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Emphasis is placed on strategic planning, the budgetary process, productivity, purchasing and the use of technological advances affecting profitability and customer satisfaction in a food service facility.
Prerequisite(s): A minimum grade of “C” in HNRM 3331 and HNRM 3337.

HNRM 4335 Restaurant Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on various aspects of restaurant management including guest service, employee supervision, food procurement, reservations and inventory control.
Prerequisite(s): A minimum grade of “C” in HNRM 3331.

HNRM 4336 Hospitality Issues and Perspectives
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of organizations, strategic planning and implementation, leadership and decision processes in the hospitality industry.
Prerequisite(s): A minimum grade of “C” in HNRM 3331 and HNRM 3336.

HNRM 4730 Internship in Hospitality Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Supervised work-study program in a hotel, restaurant or resort. Students are expected to be employed in a full-time, semester-long position with a business that is approved by HNRM Internship Director.
Prerequisite(s): Junior standing and at least one upper division course in the major. Good academic standing (minimum cumulative GPA is 2.0).

HNRM 4899 Directed Individual Study
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to investigate an area of interest under the direction of a faculty mentor.
HONS University Honors

HONS 1131 Inquiry in the Social Sciences
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to inquiry into questions and problems in the social sciences.

HONS 1132 Inquiry in the Humanities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to inquiry into questions and problems in the humanities.

HONS 1133 Inquiry in the Natural Sciences
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to inquiry into questions and problems in the natural sciences.

HONS 1134 Inquiry In Global Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to inquiry into questions and problems in Global Issues.

HONS 3090 Honors Enrichment Seminar
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
An in-depth exploration of a special topic in an honors seminar setting.

HONS 4610 Honors Research Seminar
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
A seminar course designed to prepare honors students to complete the honors thesis or capstone project.

HONS 4999 Honors Research
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent research under the guidance of a faculty mentor for students in the University Honors Program. Students may register for 1-3 credit hours.

HRVD Human Resources/Voc Dev

HRVD 7400 Hum Rsrce Dev Theory/Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of human resource development (HRD) in organizations. Focus on integration of individual development (training), career development, and organizational development. Topics include strategic planning models, needs assessment, program development prototypes, application of workplace learning theories, career development theories and methods, and application of organizational learning theories.

HSCA Health Sciences Adm

HSCA 3600 Financial Management for Health-Related Organizations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to concepts of organizational management in the health industry.

HSCA 4201 Health Care Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of the essential aspects of marketing as they apply to various sectors of the health services industry.

HSCA 4600 Prin Of Human Resources Manage
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of the most common methods and application involving the management of human (non-capital) resources within health related organizations. Topics include employee recruitment, selection, training, evaluation, and retention, with an emphasis on the most common practices associated with each.

HSCA 4610 Health Care Economics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Microeconomic approach to the market for health services and macroeconomic applications to health policy formulation and evaluation.

HSCA 4620 Prin Of Man/Health Srvs Admin
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to organizational theory and behavior with specific applications to managers in health services organizations and systems.

HSCA 4630 Health Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of commonly utilized health information systems and technologies including electronic health records, computerized provider order entry/electronic prescribing systems, clinical decision support, telehealth and telemedicine, consumer informatics, and administrative support applications. Other topics of coverage include privacy and security of health information, legal/regulatory environment, and issues regarding procurement, implementation and evaluation of health information systems.

HSCA 4650 Long Term Care Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Issues particular to care of residents and management in a long term care setting. Synthesis of topics studied elsewhere including accreditation standards, and human resource issues.

HSCA 4655 Principles of Health Insurance and Reimbursement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of theory and applications pertinent to health insurance offerings in the private and public sector and the primary methodologies employed by third parties to reimburse health care organizations for services rendered. Prerequisite(s): A minimum grade of "C" in HSCC 2500.

HSCA 4660 Survey of Health Outcomes
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of quality assurance methods and tools and how they apply in various health care settings, including current efforts to reduce medical errors and promote patient safety.

HSCA 4901 Health Sci Prac Long Term I
4 Credit Hours. 0-4 Lecture Hours. 0-4 Lab Hours.
Two semesters (8 hours) of on-site experience under tutelage of licensed nursing home administrator. Development of philosophy integrating clinical and administrative aspects of long term care.

HSCA 4902 Health Sci Prac Long Term II
4 Credit Hours. 0-4 Lecture Hours. 0-4 Lab Hours.
Two semesters (8 hours) of on-site experience under tutelage of licensed nursing home administrator. Development of philosophy integrating clinical and administrative aspects of long term care.

HSCC Health Sciences, Core

HSCC 2200 Health Communication
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces students to fundamental communication principles, focusing on developing the skills required to effectively present and convey professional and health-related information to diverse audiences. The course focuses on oral skills, written skills, organizational skills, and communication skills involving new technology and media.

HSCC 2300 Management of Health Information
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of commonly used computer applications in the health sciences, focusing on the effective use and communication of health care data and information.

HSCC 2500 Health Issues and Resources
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Formulation and facilitation of practical modes of collaboration and cooperation among health agencies, levels of program personnel, and provider organizations.

HSCC 3000 Special Topics in Health Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Special Topics in Health Science.
HSCC 3100 Research Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Conceptual frameworks, data sources, design, interpretation, and evaluation of research methods and current topics in health sciences research.
Prerequisite(s): ENGL 1102 and MATH 1401.

HSCC 3110 Legal Iss In Hlth Care Environ
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the law and legal processes as they relate to health care professionals and organizations. Includes an overview of the American legal system and a wide range of legal issues that apply to the health professions.

HSCC 3130 Health Policy Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Overview of health policy-making process of health care. Issues pertinent to policy deliberation, formation, implementation, evaluation and statutory and administrative law.

HSCC 3140 Epidemiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Distribution and determinants of health and disease in defined populations with applications to clinical, environmental, and infectious disease settings.

HSCC 3760 Environmental and Community Health Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Historical, contemporary, and prospective environmental factors that impact public health status.

HSCC 4005 Interprofessional Patient Advocacy Internship
3 Credit Hours. 1 Lecture Hour. 0-18 Lab Hours.
A service learning course which targets health and wellness. Students practice patient advocacy skills in community health care delivery settings.

HSCC 4020 Seminar in Professional Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exposes students to expected standards of professional behavior by providing strategies for oral and written communication including research, resumes, job search, interviewing skills, grant writing, ethics, credentialing, setting agenda, and chairing meetings.

HSCC 4950 Practicum
1-6 Credit Hours. 0-6 Lecture Hours. 0-18 Lab Hours.
On-site experience in the student’s area of interest.

HSCF Health Sci Fitness Mgmt

HSCF 2015 Introduction to Human Performance & Fitness Management
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Course provides basic overview of human performance and exercise science professions, including professional opportunities, activities, organizations, certifications, current issues, and legal concerns.

HSCF 3005 Applied Musculoskeletal Anatomy and Kinesiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Anatomical and kinesiological principles of the musculoskeletal system as related to human movement.
Prerequisite(s): A minimum grade of "C" in BIOL 2081.

HSCF 3200 Exercise Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Acute and chronic physiological and biochemical responses of the human body to exercise.
Prerequisite(s): A minimum grade of "C" in BIOL 2082.

HSCF 3205 Advanced Exercise Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continuation of HSCF 3200. Further exploration into the acute and chronic physiological and biochemical responses of the human body to exercise. This course will also cover the integration of physiological system and their response and adaption to exercise.
Prerequisite(s): A minimum grade of "C" in HSCF 3200.

HSCF 3500 Applied Kinesiology and Biomechanics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Concepts of anatomical and mechanical principles related to exercise and physical activity. Students will be introduced to qualitative and quantitative mechanical analysis of human movement.

HSCF 3710 Worksite Wellness and Safety
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the multiple skills needed to design, implement and evaluate health promotion and wellness programs in various settings.

HSCF 4010 Evaluation and Prescription in Exercise & Sport
4 Credit Hours. 3 Lecture Hours. 1 Lab Hour.
Measurement of human performance and laboratory techniques in physical activity and sport.
Prerequisite(s): A minimum grade of "C" in HSCF 3005 and HSCF 3200.

HSCF 4020 Health and Fitness Entrepreneurship
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Strategies to research, organize, proposal and develop business plans in worksite, hospital-based and privately-owned fitness centers.
Prerequisite(s): A minimum grade of "C" in ACCT 2101.

HSCF 4030 Health/Fitness Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Art and science managing health, wellness, and fitness centers.
Prerequisite(s): A minimum grade of "C" in ACCT 2101.

HSCF 4040 Personal Fitness Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The development of exercise training programs to meet needs of various populations. At the conclusion of the course, students will be prepared to take a nationally accredited personal trainer’s certification exam.
Prerequisite(s): A minimum grade of "C" in HSCF 3005 and HSCF 3200.
**HSCP Health Sci Public Health**

**HSCP 2000 Ethical Theories/Moral Issues in Health**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Theories and issues in the ethics of public health, health care, and health promotion. Contemporary issues, such as health bioethics, DNA manipulation, contraception, and end-of-life decisions.

**HSCP 2050 Introduction to the Disease Continuum**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A population-based overview of the disease continuum.

**HSCP 3710 Worksite Wellness And Safety**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the multiple skills needed to design, implement and evaluate health promotion and wellness programs in various settings.

**HSCP 3750 Population Health Sciences**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Major public health topics and their effects on modern society.

**HSCP 4000 Indep Study In Health Science**
1-3 Credit Hours. 0-3 Lecture Hours. 0-9 Lab Hours.
Independent student study in an area of interest in health.

**HSCP 4010 Health and Human Development**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Lifestyle and socio-political factors related to optimum health per age and grouping emphasized.

**HSPM Hlth Service Policy Mgmt**

**HSPM 6030 Healthcare Economics and Policy**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the market for medical services, with the view that the special nature of the market demands careful economic analysis. Topics include the demand for health and the derived demand for health/medical care and insurance, the supply of medical services, the roles of uncertainty and information, and the problems of pricing production and distribution of health and medical services. An introduction to federal and state legislative, administrative, and budget systems as they affect health services. The course focuses on the study of selected health policies, considering them in their historical perspective, present status, and future direction within their social economic and political contexts.

**HSPM 6136 Health Services, Management, Human Resources and Governance**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide a detailed understanding of the administrative and organization management of healthcare systems, including analysis of management problems, planning, evaluating, operations and policy analysis within the healthcare environment. Selected topics from the healthcare profession of management will also be covered.

**HSPM 7030 Healthcare Marketing and Strategic Planning**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course offers an introduction to strategic planning and management in health services organizations. Processes and formats employed in strategic planning and marketing are presented and applied in case studies and a final project. Elements of market assessment, environmental analysis and strategy development are presented and applied to course practices.

**HSPM 7090 Selected Topics in Health Services Policy Management**
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Allows the student the opportunity to receive specialized and/or focused instruction in a health services policy and management health topic not generally offered by the department.

**HSPM 7131 Health Organization Theory, Behavior and Management**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Integrating theory and concepts from organizational theory and behavior literature, this course provides applications to improve the management of health services organizations.

**HSPM 7133 Public Health Policy and Ethics**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prepares students to make critical decisions in regards to health care policy and biomedical ethics. Includes exploration of basic economic, political and social determinants of health policy. Substantive legal topics covered include the balance between individual rights and public health initiatives, confidentiality, medical malpractice and informed consent, medical directives and living wills, legal rights of access to health care and health care reform. Methods of implementing change through policy making and the legislative process will be presented.

**HSPM 7135 Public Health Policy Development and Evaluation**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to policy analysis and management by examining issues in the health sector. It fosters an appreciation of the complexity of policy problems and provides the basic tools used in public health policy design, implementation and evaluation.

Prerequisite(s): A minimum grade of “B” in HSPM 7133.

**HSPM 7137 Health Care Financing and Payment Systems**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an understanding of payment systems for hospitals, long-term care organizations, integrated delivery systems, ambulatory care and other health care providers. Specific health care financing topics include: third party payment reimbursement system for private and public insurers, capitation, legislated cost containment strategies (DRGs and PPSs), medical payment incentives, risk assessment and health reform initiatives.

**HSPM 7230 Health Leadership and Strategic Planning**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course deals with the application of leadership theory and strategic management and planning principles to a variety of “real world” management issues in health service organizations.

**HSPM 7232 Public Health Finance**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the structure and functioning of the finance components of the public health system. Public health organizations will be discussed within the context of the financial environment that includes financial management, managerial accounting, revenue cycle management, and funding and financial management of grants/contracts. The course also examines key financial tools and analyses for financially related decision making within the principles of strategic management applied to public health organizations amid a dynamic changing environment.

**HSPM 7233 Information Management and Decision Making in Health Services**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the fundamental concepts and applications of managing information as a health services corporate asset, emphasizing converting data into information for decision support.

**HSPM 7235 Healthcare Law Healthcare Law and Ethics**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of this course is to introduce students to legal issues in public health and healthcare. Basic legal principles underlying the legal system, governmental regulation, development of legal rules and how to interact effectively with the legal system as public health practitioner will be explored. This course has two main purposes: first, to examine the legal context of the relationship between the individual and the community; and second, to understand public health regulations in the context of a market-driven system.
HSPM 7236 Health Informatics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents the knowledge, infrastructure, functions, and tools of health informatics. It explores technology, planning and management and applications in public health and health care. The emphasis is on conceptual frameworks as well as a deeper level of engagement on system applications. It focuses on the application of health technology, with a particular emphasis on the private/public sector of health management. It is designed to familiarize students with core concepts and issues confronting managers in the health sector associated with planning, implementation and evaluation of information systems. The course provides an overview of the theory, processes and applications of information systems and how they relate to health policy and management. It also provides a basic understanding of data standards and requirements, and the critical concepts and practice in mapping and interpreting health information.

HSPM 7332 Population Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Delivering care to meet the needs of the population of the communities, a health organization service requires a strategic approach and an organizational culture that attends to those healthcare needs. This course is designed to familiarize students with the current applications of social and behavioral sciences. It is an overview of healthcare and public health management and administration, managerial decision making and the practical knowledge, tools, processes and strategies required to operate successfully with a population health focus by the healthcare organization.

HSPM 7333 Healthcare Governance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the macro-organizational concepts of managing complex health care organizations. Health care organizations are complex systems transforming inputs (professional, supplies, etc.) into outputs (health services) for customers (patients). To perform well, these systems require appropriate environmental assessments, strategy, governance, organizational structure, work processes, distribution of power, innovation and change. These requirements for effective organizational performance form the core content of the course.

HSPM 7334 Human Resources Healthcare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on functions and concepts required for managing human resources in organizations. It combines traditional human resource management (HRM) functions with concepts from organization behavior. Course content includes selection, training and development, compensation, performance appraisal, motivation, organizational development, union activity, and modes of conflict resolution.

HSPM 7335 Healthcare Operations Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines operational issues in health care management. Topics include systems analysis, continuous quality improvement and re-engineering, demand forecasting, facility location and design models, decision analysis techniques, linear programming, queuing and waiting models, inventory control models, and statistical quality control. The goal is to instill an understanding of the language, applications, and limitations of quantitative models with regard to decision making and problem solving in health care organizations.

HSPM 7336 Healthcare Supply Chain Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The healthcare supply chain is a vital core business component of the health organization with the mission of delivering the technological elements of the patient care process to the providers of care. From strategic sourcing and purchasing, acquisition, logistics, inventory management, to point of use applications, this course provides understanding, knowledge and evaluation models to operate and manage an organization’s enterprise resource planning and management system specifically with regard to the supply chain system and the management of that system as evaluated from strategic operations management and financial perspective.

HSPM 7337 Integrative Health Enterprise Analytics and Decision Making
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Given the integration of data, community needs and regulation and policy, this course incorporates the elements of healthcare, public health, health information technology and the health insurance sub-industries to develop a framework and analytic methods to improve efficiency, effectiveness and efficacy of the health industry as a whole. The course will establish an analytic framework, based on data from patients, populations, processes and profitability (4 P’s of Health Analytics) utilizing industry, healthcare enterprise and community health data with appropriate tools, methods and approaches to answer community health needs and status, operational, financial and healthcare delivery outcomes questions to support leadership decisions. The course will also include an integrated platform of appropriate analytical and predictive/estimation methods, tools and techniques for enhanced decision making at the strategic and operational levels of the health enterprise for enhanced health status and improved health outcomes of communities served.

HSPM 7338 Contemporary Issues in Healthcare
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines operational issues in health care management. Topics include systems analysis, continuous quality improvement and re-engineering, demand forecasting, facility location and design models, decision analysis techniques, linear programming, queuing and waiting models, inventory control models, and statistical quality control. The goal is to instill an understanding of the language, applications, and limitations of quantitative models with regard to decision making and problem solving in health care organizations.

HSPM 7710 Administrative Internship
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Field experience for graduate students which consist of a three part experience of 300 contact hours which will include the following: 1. Students are to complete rotation rounds of all administrative and clinical departments. 2. Students are to attend major management and governance meetings, and 3. Students are to be assigned special projects for completion at the end of the administrative internship. The student must present a written presentation to Master of Healthcare Administration (MHA) faculty for assessment.

HSPM 7890 Directed Individual Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.

HUMN Humanities

HUMN 2321 Humanities I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A historically-organized interdisciplinary approach to the fine and performing arts from antiquity to ca. 1600. Team taught large group lectures and small group discussions. Students are expected to enroll in both HUMN 2321 and HUMN 2322 to fulfill Area C requirement of the Core.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in ENGL 1101 or WRIT 1101.

HUMN 2322 Humanities II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A historically-organized interdisciplinary approach to the fine and performing arts from ca. 1600 to the present. Team taught large group lectures and small group discussions. Students are expected to enroll in both HUMN 2321 and HUMN 2322 to fulfill Area C requirement of the Core.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in ENGL 1101 or WRIT 1101.
HUMN 2433 Classicism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores classicism as both a philosophical approach and an aesthetic style in art, rhetoric, literature, architecture, and music.

HUMN 2434 Myth in Arts and Humanities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores selected myths and their treatments in art, rhetoric, literature, theater, and music.

HUMN 3431 Digital Humanities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a hands-on overview of the rapidly-expanding world of digital applications of the humanities. Ranging from visualizing data in maps and diagrams to interactive experiences like games, the digital humanist is not only a researcher but also a designer who helps make things public and the humanities social. This class not only introduces principles and theoretical approaches, but also offers opportunities to learn techniques and begin to build a portfolio of work for the Digital Humanities Minor.

HUMN 3731 Digital Humanities Internship
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The Digital Humanities Internship is intended to offer the student a chance to individually or with a larger group create a portfolio-quality digital humanities project for an organization outside of the university, building skills for a career involving the digital humanities. In tandem with a faculty mentor, students will plan a project and then over the course of a semester develop content and a platform for its digital delivery in relation to the needs of the organization with which they are working. This class may be taught as a tutorial with a single professor as mentor or as a seminar with other students.

HUMN 4631 Capstone Project for Digital Humanities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The capstone class is the final class in the Digital Humanities Minor and is intended to offer the student a chance to individually or with a larger group create a portfolio-quality digital humanities project. Students will plan a final project, research content and develop a platform for its digital delivery. At the end of the process, the project will go 'live' for both an academic audience and a larger public. This class may be taught as a seminar with a single professor as mentor or as a seminar with other students.

IDS Interdisciplinary Studies

IDS 2000 Diaspora Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the shifting relations between homelands and host nations from the perspective of those who have moved, whether voluntarily or not. It examines the historical and/or contemporary movements of peoples and the complex issues of identity and experience to which these processes give rise, emphasizing the lived experience of migrant communities as they negotiate forms of existence that preceded and exceed national boundaries. It may be taught from various disciplinary, comparative, and interdisciplinary perspectives, drawing from the social sciences, history, the arts, and humanities. In it, students can expect to explore the relationship between place and belonging, how the experiences of migration and dislocation challenge the modern assumption that the nation-state should be the limit of identification, while examining questions of the coherence of cultural and political boundaries.

IDS 2430 Design Appreciation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A general introduction to the principles and elements of design as they relate to the built environment. Overview of style as seen through interior furnishings and accessories. Discussion and analysis of design process, theory, and an overview of components and materials. Exploration of human factors, environmental considerations, and spatial relationships.

IDS 2433 Classicism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The capstone course in interdisciplinary studies provides students in the Bachelor of Interdisciplinary Studies program with a forum and with the tools needed to functionally blend the elements of the major, articulate the competencies they have developed and achieved, demonstrate the efficacy of their individualized degree program, and communicate that information to internal and external audiences.
Prerequisite(s): A minimum grade of "C" in ENGL 1102 and departmental approval.

INDS Interior Design

INDS 2430 Design Appreciation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the basic concepts, skills, and graphics used to represent interior design applications. Design projects will include technical drafting of construction drawings and measured and freehand perspectives as well as the fundamental execution of presentation skills in sketching, mixed media renderings, detail drawings, and model building.
Prerequisite(s): ART 1010, ART 1020, INDNS 2430.

INDS 2436 Interior Materials and Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the selection and application of materials and finishes in the design of the built environment. Introduction to building technology with an emphasis on developing an awareness of buildings and their systems. Research of resources and communication with various entities involved with the building/design process will be incorporated. Cost and quantity estimating as well as budgeting will be introduced.
Prerequisite(s): INDNS 2430.

INDS 2437 Interior Design CAD I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introductory computer-aided drafting and communication course. A basic overview of AutoCAD, file management, and the fundamental execution of drafting components. Introduction to the basic concepts of 3-D modeling.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in INDNS 2435 and either CISM 1120, CISM 1110, CISM 1130 or Permission of Instructor.

INDS 3238 Textiles for Interiors
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Investigates the production, specifications and regulations, and serviceability of textiles for residential and commercial interiors. Emphasis on soft floor coverings, upholstered furniture, window and wall coverings, and other current developments in the textile field.
Prerequisite(s): INDNS 2430.
INDS 3431 History of Interiors
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An integrated history of architectural styles, interiors, and their furnishings related to major global cultures as well as an emphasis on interior architecture, furniture styles, interior designers, industrial designers, architects, and accessories from the prehistoric period through of the contemporary movement.

INDS 3434 Lighting
3 Credit Hours. 0.3 Lecture Hours. 0 Lab Hours.
The principles of lighting design and the impact on interior space are explored through an analysis of environmental constraints, calculations, economics, design theory, technical and aesthetical components.
Prerequisite(s): A minimum grade of "C" in INDS 2430 and INDS 3435.

INDS 3435 Design Studio II
3 Credit Hours. 0.3 Lecture Hours. 0 Lab Hours.
The design planning process as it applies to the moderate scale residential interior environment. Intermediate projects utilizing design philosophy and concept development, space planning and design development to include interior architectural details, finishes, and furniture, as well as clients of diverse populations. Area of emphasis is residential incorporating universal design, kitchen planning and aging in place components.
Prerequisite(s): INDS 2435, INDS 2436, INDS 2437.

INDS 3436 Design Studio III
3 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
The design planning process as it applies to the medium scale interior space. Intermediate projects utilizing design philosophy and concept development, schematic design, and design development which include the application of furniture, finishes, and interior architectural components and details. Research and analysis of sustainable materials, environmental systems, building codes, and diverse populations. Studio collaboration and assessment of skills through peer and external evaluation. Areas of emphasis may include hospitality, multi-residential, healthcare, adaptive reuse, and commercial.
Prerequisite(s): INDS 2437, INDS 3435, INDS 3437, ART 1030.

INDS 3437 Interior Design CAD II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced computer-aided drafting with an emphasis on building information modeling (BIM). Application of current industry standard 3-dimensional modeling software, and the fundamental execution of graphic drawing communication and management.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in INDS 2437 and INDS 3435.

INDS 3438 Professional Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Basic business principles, professional responsibility and ethics, professional organizations, client relationships, and communication techniques will be explored. The development of internship and job placement strategies and required documents as well as the study of the professional practice of interior design.
Prerequisite(s): INDS 3435.

INDS 3530 Sustainability for the Built Environment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to theories of sustainability and its application to the interior built environment including sustainable interior building materials and systems. The impact of the built interior environment on global natural resources and environmental rating systems will be addressed.
Prerequisite(s): TCCT 1530 and INDS 2436 or Permission of Instructor.

INDS 4090 Selected Topics in Interior Design
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Scheduled on an infrequent basis to explore special areas in Interior Design and will carry a subtitle.

INDS 4427 Interior Design Portfolio
2 Credit Hours. 1 Lecture Hour. 2 Lab Hours.
A senior level course which allows the student to develop a professional interior design portfolio and promotional materials required for pursuing a career in the field. Students will also display their work through a senior exhibition.
Prerequisite(s): A minimum grade of "C" in INDS 3436 and prior or concurrent enrollment with a minimum grade of "C" in INDS 4446.

INDS 4430 Digital Presentation and Communication
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Application of advanced 3-dimensional modeling and digital rendering techniques through the use of current industry standard software. Study and research of appropriate professional presentation methods will be incorporated. Students' project presentation materials will be assessed and updated.
Prerequisite(s): INDS 2437, INDS 3436, INDS 3437.

INDS 4435 Design Studio IV
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
The design planning process as it applies to the more complex larger scale interior space. Intermediate projects utilizing design philosophy and concept development, space planning and design development to include furniture, finish and interior architectural materials, building codes, and diverse populations. Areas of emphasis may include work environments including systems, hospitality, retail, adaptive reuse, and other appropriate commercial environments.
Prerequisite(s): A minimum grade of "C" in INDS 3238, INDS 3434, INDS 3436, INDS 3437, TCM 3333; and prior or concurrent enrollment with a grade of "C" in INDS 3438.

INDS 4446 Design Studio V
4 Credit Hours. 0.2 Lecture Hours. 0.4 Lab Hours.
A capstone course for the interior design student that will provide an advanced integrative research and design experience. Projects are complex, specific design situations that will be based on current trends in design. Areas of emphasis may include multi housing, healthcare, or socially responsible design.
Prerequisite(s): A minimum grade of "C" in INDS 3436, INDS 4427, INDS 4435.

INDS 4790 Interior Design Internship
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised summer work-study program with selected organizations which perform professional services related to the field of interior design. The internship will serve as an educational bridge between the junior level and the senior level of design studies.
Prerequisite(s): A minimum grade of "C" in INDS 3436 and INDS 3438.

INDS 4899 Directed Individual Study
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to investigate an area of interest under the direction of a faculty mentor.
Prerequisite(s): Permission of Instructor.

INTS International Studies

INTS 2090 Selected Topics in International Studies
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Selected Topics in International Studies.

INTS 2130 Introduction to International Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course is designed to introduce students to a complex array of interdisciplinary perspectives that define the relationships and issues of the contemporary international system. Students are exposed to economic, social, political, geographical, technological, and cultural challenges facing the contemporary world.
INTS 2132 Politics of Ethnicity  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Analyzes the politics of ethnicity and ethnic conflict.

INTS 2630 Research Methods in International Studies  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to the types of qualitative research designs and research techniques inherent in the multidisciplinary concentrations of International Studies. Students will examine and have direct experience in data collection, analysis, and research reporting.  
Prerequisite(s): A minimum grade of "C" in INTS 2130.

INTS 3090 Selected Topics in International Studies  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Selected Topics in International Studies.

INTS 3130 Contemporary World Cultures  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Survey and analysis of contemporary world cultures, in which selected cultural features, such as religion, political institutions, and interpersonal communications are examined across applicable cultures.  
Prerequisite(s): INTS 2130.

INTS 3132 Asian Politics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course examines the diversities across and within South, Southeast, and East Asia. It analyzes the following key themes: nationalism, colonialism, regime change, economic development, civil society and social movements, political conflict, and ethno-religious pluralism.  
Cross Listing(s): POLS 3132.

INTS 3134 Middle East Politics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines political change and economic development in the Middle East in the last century, focusing on colonialism, radical Islam, oil politics, Arab nationalism, the Arab-Israeli conflict, and the U.S. role in the Middle East.  
Cross Listing(s): POLS 3194.

INTS 3230 Global Issues  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of selected global issues and problems facing all nations, states, and peoples  
Prerequisite(s): INTS 2130.

INTS 3232 Psychology of Gender  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines biological and environmental determinants of gender, as well as, the role of gender in cognitive functioning, personality, physical and mental health, interpersonal relationships, and work life.  
Prerequisite(s): PSYC 1101.  
Cross Listing(s): PSYC 3232.

INTS 3234 Introduction to the European Union  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course will introduce students to the history, institutions, policies, and cultures of the European Union and its member states.  
Cross Listing(s): EURO 3234, POLS 3234.

INTS 3236 International Relations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduces students to the basic concepts of international relations, including those of war and peace, power, foreign policy, international organization, markets, demography, ecology, and the impact of information technology. Students will be provided with the necessary concepts, theories, and methods used in the discipline including quantitative analysis in order to gain a better understanding of the nature and problems of international relations.  
Cross Listing(s): POLS 3236.

INTS 3239 Human Rights in International Relations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course will explore the vulnerability of various political minorities to human rights abuses at the global level and provide an assessment of the roles of states, international organizations, and non-governmental organizations in human rights issues.  
Prerequisite(s): POLS 1101 and POLS 2101.  
Cross Listing(s): POLS 3239.

INTS 3250 The Muslim World to Tamerlane  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of the rise of Islam in the seventh century and of the various Muslim societies that arose prior to the fifteenth century from the Iberian Peninsula to South Asia.  
Cross Listing(s): HIST 3250, RELS 3250.

INTS 3251 The Muslim World Since Genghis Khan  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of the global reach of the Islam since the thirteenth century. The focus is on how Muslim societies have dealt with the precipitous decline in their well-being since the pinnacle of influence in the seventeenth century.  
Cross Listing(s): HIST 3251, RELS 3251.

INTS 3330 International Public Relations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Provides an examination of the performance of public relations in international contexts. Consideration will be given to the political, economic, social, and historical contexts affecting public relations practices. Special emphasis will be placed on the interaction between government and public relations.  
Cross Listing(s): PRCA 3333.

INTS 3332 The Modern Middle East  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines political change and economic development in the Middle East in the last century, focusing on colonialism, radical Islam, oil politics, Arab nationalism, the Arab-Israeli conflict, and the U.S. role in the Middle East.  
Cross Listing(s): POLS 3194.

INTS 3334 Middle East Politics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines political change and economic development in the Middle East in the last century, focusing on colonialism, radical Islam, oil politics, Arab nationalism, the Arab-Israeli conflict, and the U.S. role in the Middle East.  
Cross Listing(s): POLS 3194.

INTS 3335 The Muslim World Since Genghis Khan  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of the global reach of the Islam since the thirteenth century. The focus is on how Muslim societies have dealt with the precipitous decline in their well-being since the pinnacle of influence in the seventeenth century.  
Cross Listing(s): HIST 3251, RELS 3251.

INTS 3336 International Public Relations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Provides an examination of the performance of public relations in international contexts. Consideration will be given to the political, economic, social, and historical contexts affecting public relations practices. Special emphasis will be placed on the interaction between government and public relations.  
Cross Listing(s): PRCA 3333.

INTS 3340 International Security Affairs  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Provides an examination of an array of international security concepts and dynamics including features and aspects of both state and individual security. The course addresses applicable actors, institutions, processes, theories and prominent international issues. Upon completion of the course, students will be able to identify and discuss an assortment of issues pertinent to state and individual security threats and policies.  
INTS 3431 Identity and Nationalism  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An examination of the theories behind nationalism and its influence on identity construction. Consideration will be given to the political, social, cultural, and historical contexts affecting the existence of the nation, and its role within the contemporary globalized world. The course also places an emphasis on the special relationship between the nation and the state.  
INTS 3532 The Modern Middle East  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of the major developments in the Middle East since World War I.  
Cross Listing(s): HIST 3532.

INTS 3533 Global Health  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides an interdisciplinary understanding of how socio-structural factors, global institutions, and political interests impact health outcomes and policies at various levels of analysis. Considering various theoretical perspectives, the class surveys various health-related subjects, including nutrition, health systems, infectious disease, health technologies, and human rights.
INTS 3534 Modern Southeast Asia
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Common themes of the region from 1600, including the impact of the West, the national response, and the post-WW II rise of a modern community of nations.
Cross Listing(s): HIST 3534.

INTS 3536 Global Food Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the histories, ideas and practices of ‘food security’, as well as the contemporary politics of the global food system. Topics include the relationship between food and war, agrarian modernization, agricultural trade, food as a human right, land grabbing, and food sovereignty.

INTS 3537 Colonial Latin America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A political, social, and economic survey of Latin America from its pre-Columbia era to its struggles for independence.
Cross Listing(s): HIST 3537, LAST 3537.

INTS 3538 Modern Latin America
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A political, social, and economic survey of Latin America from independence to the present.
Cross Listing(s): HIST 3538, LAST 3538.

INTS 3539 Cuba and the Caribbean
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will discuss the development of the Caribbean generally before addressing contemporary policy issues in a rapidly changing Cuba. Regionalism, economic integration, and international organizations will be discussed in this context as well.

INTS 3540 International Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Is there a role for leadership in international and transnational politics today? In this class, students will analyze this question by studying old and new texts on leadership and practicing leadership in an intensive field activity.

INTS 3551 Introduction to United Nations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students will be introduced to the concepts of international organizations and the part that they play today in international politics. Specifically, we will examine the United Nations, its structure and function, its failures and successes, and what the future holds for this organization.
Cross Listing(s): POLS 3551.

INTS 3571 Development and Sustainability
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Sustainable Development offers students a unique opportunity to merge theory, policy, and practice in a meaningful contemporary context that highlights interdisciplinary and holistic perspectives on the economic, social, and environmental dimensions of development. The course will address alternative and post-modern considerations for sustainability so as to provide the context for considering cases in the real world.

INTS 3572 Comparative Democratization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is intended as a broad, introductory survey of the political, social, cultural, economic, and international factors that foster the development and consolidation of democracy. The course will address the philosophical origins and normative aspects of democracy before examining the process of democratization through a historical and comparative perspective.

INTS 3573 Sustainable Ocean Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
INTS 4090 Sel Topics Intl Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected Topics in International Studies.
Cross Listing(s): EURO 4090.

INTS 4132 U.S. Foreign Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides basic information and understanding of the key elements and actions involved in the formulation and execution of U.S. foreign policy. Special attention is given to the impact of U.S. foreign policy on the international system.
Cross Listing(s): POLS 4132.

INTS 4133 U.S. Diplomacy: The Cold War
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the history of U.S. foreign relations from the aftermath of World War II to the collapse of the Soviet Union.
Cross Listing(s): HIST 4133.

INTS 4135 International Organizations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analytical study of the organization, powers, and problems of global and regional international agencies with particular emphasis upon the European Union.
Prerequisite(s): POLS 2101 or CRJU 1100.
Cross Listing(s): POLS 4135.

INTS 4136 Politics of Industrialized Nations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on examination of the cultural, social, and political factors that contribute to the structure, function, and problems of contemporary nation-states in the Global North.
Prerequisite(s): POLS 1101 or POLS 2101.
Cross Listing(s): POLS 4136.

INTS 4137 Politics of the Global South
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students examine the cultural, social, and political factors which have shaped the politics and policies of nation-states in the "Global South." Special emphasis will be given to states that are found in Latin America, Africa, and Asia.
Prerequisite(s): POLS 2101 or CRJU 1100.
Cross Listing(s): POLS 4137.

INTS 4138 International Terrorism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to explore the political, religious, economic, and social issues which pervade the global environment. Key issues to be addressed include different forms of terrorism, conflict resolution, and at the state level reunification issues. Emphasizes the critical, and perhaps, decisive and controlling impact which terrorist groups level on policy changes.
Cross Listing(s): POLS 4138.

INTS 4238 International Conflict
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the causes of international and civil war, including theories about alliances, power, bargaining, arms races, conventional and nuclear deterrence, nuclear weapon proliferation, and ethnicity.

INTS 4330 Rhetoric of International Relations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the discourse of international relations from a rhetorical perspective. Emphasizes the analysis and criticism of persuasive messages used in international relations from Aristotelian, Neo-Aristotelian, dramatistic and narrative rhetorical theoretical bases.
Cross Listing(s): COMS 4330.

INTS 4581 Model United Nations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prepares students for Georgia Southern's participation in the National Model United Nations Conference in New York City in the spring of each year. Students learn the structure, function and organization of the United Nations as well as in-depth knowledge of the particular country that they will be representing in New York. Emphasis is place on learning parliamentary procedure and diplomatic skills as part of the research conducted for becoming an advocate of the country being represented.
Prerequisite(s): INTS 3551 or POLS 3551. Cross Listing(s): POLS 4581.
INTS 4582 Model United Nations II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for students in the second year of their participation on Georgia Southern University's National Model United Nations (NMUN) delegation. In addition to studying a different country and region of the world which requires students to learn the history, culture, and foreign policies of their assigned country, NMUN students also research and write on topics in different United Nations committees. Second-year delegates also take on added responsibility to plan, coordinate, and execute three Georgia Southern-sponsored Model United Nations conferences. Emphasis is placed on learning the intricacies and nuances of parliamentary procedure as it applies to both the Middle School and High School conferences conducted by Georgia Southern University.
Prerequisite(s): POLS 4581 or INTS 4581.
Cross Listing(s): POLS 4582.

INTS 4630 Seminar in International Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced course focusing on major themes and issues in international relations.
Prerequisite(s): INTS 3130 or INTS 3230.

INTS 4790 Internships Abroad
3-12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides practical experience abroad. Students are selected by departmental process.

INTS 4890 Directed Independent Study
1-12 Credit Hours. 1-12 Lecture Hours. 0 Lab Hours.
Concentrated study of a topic or theme of an international nature and scope.
Prerequisite(s): Permission of instructor.

INTS 5195 Exchange Semester Abroad
1-18 Credit Hours. 1-18 Lecture Hours. 0 Lab Hours.
This course is designed to facilitate student participation in approved exchange semester abroad programs offered through Georgia Southern University. Registration in this course combined with a completed Course of Study Approval Form provides permission to submit official credit awarded by an approved host institution abroad as transfer credit to Georgia Southern University.
Cross Listing(s): INTS 5195S.

INTS 5531 Modern Japan
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Japan through the Tokugawa period to its nineteenth century emergence from isolation and its growth as a world power with emphasis on traditional culture, industrialization, and post-WWII society.
Cross Listing(s): INTS 5531G, INTS 5531S, HIST 5531, HIST 5531G.

INTS 5531G Modern Japan
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Japan through the Tokugawa period to its nineteenth century emergence from isolation and its growth as a world power with emphasis on traditional culture, industrialization, and post-WWII society. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): INTS 5531, HIST 5531, HIST 5531G.

INTS 5532 Modern China
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cultural change and continuities of China from 1600 to its response to the West, the rise of the Peoples' Republic, and the Post-Mao present.
Cross Listing(s): INTS 5532G, HIST 5532, HIST 5532G.

INTS 5532G Modern China
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cultural change and continuities of China from 1600 to its response to the West, the rise of the People's Republic, and the Post-Mao present.
Cross Listing(s): INTS 5532, HIST 5532, HIST 5532G.
IPSE Inclusive Post-Sec Ed

IPSE 1101 The Eagle Experience
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course is designed to provide the student with cognitive and affective integration into the Georgia Southern University community. It is required during the first semester in EAGLE Academy. This course will focus entirely on becoming engaged in Georgia Southern University, both academically and socially. Students will become familiar with the campus, resources available, and activities available to them. Students will begin preparations for their STAR Person Centered Plan. Students will also work on their basic reading, writing, math, and workplace skills. Prerequisite(s): Admission to EAGLE Academy.

IPSE 1102 Daily Living: Beginning Financial Literacy and a Healthy Lifestyle
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course is designed to provide the student with the financial skills necessary to independently manage their money while living a healthy lifestyle. It will also build on the lessons from IPSE 1101 to help students gain skills to live as independently as possible. Students will learn the basic components of a healthy diet/lifestyle. Students will review their STAR Person Centered Plan and the plan will be edited as necessary. Students will continue to work on their basic reading, writing, math, and workplace skills. Prerequisite(s): Completion of IPSE 1101.

IPSE 1201 Daily Living: Advanced Financial Planning and Work Readiness
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course is designed to provide the students with the financial skills necessary to independently manage their money with long-term goals in mind. The course will also provide the students with skills related to a full-time job in the community. It will also build on the lessons from IPSE 1102 to help students gain skills to live as independently as possible. Students will review their STAR Person Centered Plan and the plan will be edited as necessary. Students will continue to work on their basic reading, writing, math, and workplace skills. Prerequisite(s): Completion of IPSE 1102 or SPED 4090.

IPSE 1202 Career Planning and Transition to Independent Living
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course is designed to provide the students with the career skills necessary to obtain a job in a field of interest to them. This course will focus on analysis of the job market and effective use of employment search tools (e.g., resumes, cover letters, interviewing, networking, and management of career resources). Students will complete their required IPSE electronic portfolio. Students will review their STAR Person Centered Plan and the plan will be edited as necessary. Students will continue to work on their basic reading, writing, math, and workplace skills. Prerequisite(s): Completion of IPSE 1201 or SPED 4090.

IRSH Irish Studies

IRSH 1001 Irish Language, Gaeilge: I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A basic intensive course in Gaeilge (also known as Irish), intended for beginners with no previous knowledge of Ireland’s indigenous tongue, one of the oldest spoken languages in Europe. The course introduces the sound system and orthography of the standard language as used today, and it familiarizes participants with essential grammar, vocabulary, and idioms.

IRSH 2001 Irish Language, Gaeilge: II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An intermediate intensive course in Gaeilge (also known as Irish), intended for students who have successfully completed introductory-level instruction in Ireland’s indigenous language. Providing a thorough grounding in the grammar of standard modern Gaeilge, the course advances participants to basic competency in reading, writing, pronunciation, and the use of idioms.

IRSH 2130 Introduction to Irish Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course assesses the richness and diversity of the cultural traditions that have yielded modern Ireland: Gaelic, Cambro-Norse, Ulster-Scots, and more. It also interrogates cultural practices among the global Irish diaspora, especially in the American South. Participating students critically assess the cultural impact of Ireland’s indigenous language, mythology, sports, music, dance, architecture, and design.

IRSH 3090 Selected Topics in Irish Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fostering comparative global analysis, this course provides detailed and nuanced critical study of an area related to the geography, history, culture, politics, literature, arts, and/or civilization of Ireland and the Irish people, including their diaspora.

IRSH 3333 Irish Theatre
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course critically interrogates Ireland’s native and diasporic theatre, from the Restoration period through the present. It examines the national-theatre movement, especially the Abbey Theatre, and it assesses other Irish theatre companies, as well as Irish playwrights, directors, and actors.

IRSH 3430 Ireland in Film
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course critically interrogates the content, form, and impact of films about Ireland and the Irish diaspora. Participants also study the history of film-making in Ireland.

IRSH 3432 Northern Irish Identities, Conflict, and Peace-Making
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the genesis, expansion, and settlement of the Northern Irish conflict known as The Troubles (1960s – 1998). Critical study of the tension and violence yields insights into colonialism, the use of ethnicity and religion in national identity-formation, and the role of international diplomacy in conflict-resolution.

ISCI Science-Teach/Learn

ISCI 2001 Life/Earth Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an integrated science course covering major concepts in the areas of life and earth science. The course will emphasize the nature and skills of science as well as the understanding of major science concepts and principles in these fields. The use of an inquiry based approach throughout the course will enhance the application of these concepts to the teaching of elementary and middle grades students. Prerequisite(s): A minimum grade of “C” in ASTR 1010 and ASTR 1211, or ASTR 1020 and ASTR 1211, or BIOL 1130 and BIOL 1110, or CHEM 1145, or CHEM 1151, or GEOL 1121, or PHYS 1111, or PHYS 2211.

ISCI 2001L Life/Earth Sci Early Ch Ed Lab
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
Corequisite(s): ISCI 2001.
ISCI 2002 Physical Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an integrated science course covering major concepts in the areas of physical science. The course will emphasize the nature and skills of science as well as the understanding of major science concepts and principles in this field. The use of an inquiry based approach throughout the course will enhance the application of these concepts to the teaching of elementary and middle grades students.
Prerequisite(s): A minimum grade of "C" in ASTR 1010 and ASTR 1211, or ASTR 1020 and ASTR 1211, or BIOL 1130 and BIOL 1110, or CHEM 1145, or CHEM 1151, or GEOL 1121, or PHYS 1111, or PHYS 2211.

IT Information Technology

IT 1130 Introduction to Information Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to IT as an academic discipline and the structure of the Bachelor of Science in Information Technology degree. It also provides students with an introduction to the range of applications of Information Technology. Finally, it introduces students to some of the techniques that they will need for later courses.
Prerequisite(s): None.

IT 1230 Introduction to Web Technologies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course gives non-IT majors a thorough introduction to technologies used in the creation of websites. It focuses on the basic web concepts and introduces the tools and methods for sound web design. Throughout it stresses the best practices of design and development. The course also introduces students to the principles of good human computer interface design, including design for people with disabilities.
Prerequisite(s): MATH 1001 or MATH 1111.

IT 1330 Programming for Information Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to basic concepts and techniques of a contemporary programming language. Topics include language syntax, variables, decision structures, loop structures, functions, and IDE. Development of modular programs for event-driven applications.
Prerequisite(s): MATH 111.

IT 1430 Web Page Development Web Page Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A thorough introduction to the languages used to create web pages. Throughout it stresses the importance of good coding style. The course also introduces students to the principles of good human computer interface design, including design for people with disabilities. Finally, the course introduces students to an object-based language. Prerequisite(s): Familiarity with productivity tools.

IT 2130 Web Application Design and Development I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers design, programming, and implementation of web-based applications. Students will learn to create 3-tier (client-server-database) web applications using sessions, cookies, and databases to store information.
Prerequisite(s): A minimum grade of "C" in all of the following: IT 1130 and IT 1430 and STAT 2231 and MATH 2130 and prior or concurrent enrollment in MATH 1232 or MATH 1441.

IT 2131 Web Application Design and Development II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers modern web applications using client-side programming, server-side programming, third party APIs, and database technology.
Prerequisite(s): A minimum grade of "C" in IT 2130 or IT 3130.

IT 2230 Introduction to Application Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to mobile computing and mobile application software development. Topics include mobile computing devices, mobile operating systems, app programming languages and APIs, app development environments, app programming and development cycles.
Prerequisite(s): CSCI 1301 (Introduction to Programming Principles) or IT 1330.

IT 2333 IT Infrastructure
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course allows students to develop a thorough understanding of the IT infrastructure which includes computer hardware and networks that support various IT applications, and network security. This course allows students to develop this knowledge as well as some fundamental skills in server, network system administration and management, and to become aware of the importance of information assurance and security in the design, implementation and administration of an IT Infrastructure.
Prerequisite(s): A minimum grade of "C" in all of the following: IT 1130 and prior or concurrent enrollment in STAT 2231.

IT 2430 Data Programming I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides students with an introduction to the main concepts in programming including variables, expressions, statements, conditional execution, functions, iteration, strings, and files.
Prerequisite(s): A minimum grade of "C" in all of the following: IT 1130, IT 1430, MATH 2130 and STAT 2231.

IT 2431 Data Programming II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides students with an introduction to the main concepts in programming related to data. The course focuses on data storage and the use of regular expressions to search data. The course also includes an overview of object oriented concepts. Prerequisite(s): A minimum grade of "C" in IT 2430 and prior or concurrent enrollment in MATH 1232 or MATH 1441.

IT 2530 Operating Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles of the management of memory, processors, processes and deadlocks, synchronization of computing tasks, files, devices, and systems. Principles of network organization and network operating systems. Analysis and evaluation of comparative operating systems.
Prerequisite(s): CSCI 1150 (Fundamentals of the Internet and World Wide Web) or IT 2333.

IT 2531 Introduction to Cyber Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course teaches the fundamental concepts and principles of cyber security techniques. Topics include computer and network security, cyber stalking, social networks, fraud and abuse, web security, malware, computer viruses, encryption, techniques used by hackers and how to combat them, simulation and identification of different threat models, software vulnerabilities analysis, risk assessment and mitigation, prediction of potential attack vectors through data analysis and evaluation. Hands on activities will be performed with emphasis on personal cyber and information security.
Prerequisite(s): None.
IT 3132 Web Software Web Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of software development tools and frameworks used in the development and deployment of web and mobile based systems. Course content includes the implementation of client-side and server-side dynamic content.
Prerequisite(s): A minimum grade of "C" in IT 2333 or IT 2431.

IT 3133 E-Commerce
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles and practices of E-commerce, including transaction and electronic payment systems, and business, legal, and security issues as they relate to E-commerce.
Prerequisite(s): IT 3233.

IT 3134 Advanced Mobile Application Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course in Mobile App Development with more advanced techniques such as the development of gaming applications and applications for database access.

IT 3230 Data Visualization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the field of data visualization. The course covers basic design and evaluation principles to prepare and analyze large datasets, and standard visualization techniques for different types of data. The course prepares students to communicate clearly, efficiently, and in a visually compelling manner to a variety of audiences. 
Prerequisite(s): A minimum grade of "C" in IT 3233 and STAT 2231.

IT 3231 Data Communications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamentals of practical aspects of computer networks and data communications: standards, protocols, topologies, architectures, routing devices, wireless technologies, and monitoring and management.
Prerequisite(s): A minimum grade of "C" in IT 2530.

IT 3233 Database Design and Implementation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides students with the opportunity to develop in-depth knowledge of database design, implementation, and systems development. The course covers data modeling concepts, approaches and techniques, and stages in database development processes (conceptual and logical design, implementation and maintenance). The course also covers methods and approaches used in system analysis and design, including the system development life cycle. To reinforce the course concepts, students will carry out projects based on real world situations.
Prerequisite(s): A minimum grade of "C" in (CSCI 1236 OR IT 2430) AND MATH 2130.

IT 3234 Systems Acquisition, Design, and Implementation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a study of the acquisition, design, and implementation of information technology systems, including methods for investigating solutions, project planning and control, documentation, and specifications.
Prerequisite(s): A minimum grade of "C" in IT 3233.

IT 3432 Advanced Analytics Programming
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides students with the necessary tools and techniques to manipulate, process, clean and analyze data at an advanced level using Python. Specifically, students will use IPython, NumbPy, and pandas to load, clean, transform, visualize and analyze data.
Prerequisite(s): A minimum grade of "C" in IT 2431 and IT 3233.

IT 3530 Fundamentals of Information Systems Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Current standards and best practice in information assurance and security. Topics include the evaluation of security models, threat analysis, security risk assessment and risk mitigation, disaster recovery planning, cryptography and encryption algorithms, and security policy formation and implementation.
Prerequisite(s): CSCI 2120.

IT 4130 IT Issues and Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers case studies of IT development projects to assist the student in the recognition of the need of an IT development project. The student will study and critique the development, implementation and management of both successful and unsuccessful projects.
Prerequisite(s): Prior or concurrent enrollment and a minimum grade of "C" in IT 3234.

IT 4136 Knowledge Discovery and Data Mining
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course covers the process of automatically extracting valid, useful, and previously unknown information from data sources and using the information to make decisions. This course is designed to provide students with a solid understanding of the knowledge discovery process and the use of data mining concepts and tools as part of that process.
Prerequisite(s): A minimum grade of "C" in all of the following: (IT 3233) AND (STAT 2231 OR BUSA 3131).

IT 4137 Data Science and Big Data Analytics Capstone Project
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the process of analyzing big data sets to potentially gain actionable insights for an organization. This course provides students with a solid understanding of the life cycle approach to data analytics and the tools and techniques necessary to solve problems in big data and data analytics.
Prerequisite(s): A minimum grade of "C" in BUSA 3132 and IT 3230 and IT 3432 and IT 4136 and MGMT 3430 and STAT 2232.

IT 4234 Datacenter Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers datacenter infrastructure and management including technologies such as: virtualization, networking, server consolidation, green IT computing, and network storage configurations. Using virtualized platforms (hypervisors), various server, networking and infrastructure configurations are deployed, analyzed and managed. A number of server operating systems are deployed, administered and managed via remote locations. Best practices for security policies of cloud resources including permissions, privileges and server management are analyzed and performed.
Prerequisite(s): A minimum grade of "C" in CISM 3134 and IT 2333.

IT 4335 Network Architecture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the hardware required for interconnecting digital devices for the purpose of enabling data communication through a network. Bus architectures, ports, network cards, cabling, routers, switches. Ensuring network reliability. Optimizing network performance.
Prerequisite(s): A minimum grade of "C" in CISM 3134 and IT 2333.

IT 4336 Network Security
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Concepts of network security, including: countermeasures and safeguards to networks such as remote access controls, firewalls, intrusion detection systems, data encryption, and virtual private networks.
Prerequisite(s): IT 3530.
IT 4337 Ethical Hacking
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Concepts of hacker techniques and tools, including: cryptographic concepts, a technical overview of hacking, including port scanning, enumeration of computer systems, wireless vulnerabilities, web and database attacks, malware, and penetration testing. Social aspects of hacking, including social engineering. Incident response.
Prerequisite(s): IT 3530.

IT 4338 Client/Server Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Architectures and concepts of n-tier client/server models. Client/server interfaces and communications protocols: Open Database Connectivity (ODBC) and Java Database Connectivity (JDBC). Design and development of web-based applications involving front clients, middle-tier application servers, and backend databases.
Prerequisite(s): IT 3233.

IT 4339 Network Design and Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced topics on network and data administration. Topics include installation, configuration, access control, network security, web servers, and firewalls.
Prerequisite(s): IT 3231.

IT 4430 Graphics Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Creation of two and three-dimensional computer graphics and animations using both professional programming libraries and standard CGI tools. Survey of hardware and software used in the computer graphics industry, classic algorithms and data structures for raster graphics, representation and processing of three dimensional objects, and an introduction to procedural animation and image processing for special effects.
Prerequisite(s): IT 3234.

IT 4530 Senior Capstone Project I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with the opportunity to develop in-depth knowledge of IT project design and implementation. The course covers the main topics of IT project management including requirements specification, project integration, scope, time, cost, quality, human resources, communications, and risk management. In addition, techniques and methods used in IT project management will be covered. To reinforce the course concepts, students will complete projects related to their specialization. Prerequisite(s): Prior or concurrent enrollment and a minimum grade of “C” in IT 3234 and Senior standing.

IT 4531 Senior Capstone Project II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continuation of the major design/research project begun in IT 4530. Project implementation, documentation, and reporting in a symposium format are expected.
Prerequisite(s): IT 4530.

IT 4790 Internship in Information Technology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A campus-approved and coordinated IT-experience-based internship will be required of each student. The internship will include at least 280 hours of work. A written report by the student, along with an employer evaluation of the student's work will be required.
Prerequisite(s): Permission of the Instructor.

IT 4830 Special Problems in Information Technology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A customized course that is under the direction of a faculty sponsor. Special Problems is designed to offer students an opportunity to pursue studies at a level or on topics not covered in scheduled courses. The scope and nature of the material covered is determined in consultation with the faculty sponsor.
Prerequisite(s): Permission of Department Chair.

IT 4890 Directed Study in Information Technology
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed for independent study and research in selected areas of Information Technology under faculty supervision.
Prerequisite(s): Permission of Department Chair or Director.

IT 5090 Selected Topics in Information Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an opportunity for in-depth study of selected topics or emerging areas in information technology.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): IT 5090G.

IT 5090G Selected Topics in Information Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an opportunity for in-depth study of selected topics or emerging areas in information technology. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): Permission of Instructor.
Cross Listing(s): IT 5090.

IT 5135 Data Analytics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the basic issues involved in building and populating a data mart to support the planning, designing and building of business intelligence applications and data analytics. Core concepts related to business intelligence and analytics are covered.
Prerequisite(s): A minimum grade of “C” in all of the following: (IT 3233) AND (STAT 2231 OR BUSA 3131).
Cross Listing(s): IT 5135G.

IT 5135G Data Analytics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers the basic issues involved in building and populating a data mart to support the planning, designing and building of business intelligence applications and data analytics. Core concepts related to business intelligence and analytics are covered. For graduate students a significant research project will be assigned as a culminating experience.
Prerequisite(s): A minimum grade of “C” in IT 3233 or BUSA 3131 and CISM 3133.
Cross Listing(s): IT 5135.

IT 5233 Web and Mobile Security Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cybersecurity is a cornerstone of web-based solutions for mobile applications, networks, and e-commerce. IT professionals must learn to predict, prepare for, and defend against cyber attacks from a myriad of sources if they are to build and support the next generation of business solutions. In this course, you will learn the principles of designing, building, and testing secure web-based solutions. You will also learn how to identify and prevent common security vulnerabilities.
Prerequisite(s): A minimum grade of “C” in IT 2333 and (IT 2130).
Cross Listing(s): IT 5233G.

IT 5233G Web and Mobile Security Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cybersecurity is a cornerstone of web-based solutions for mobile applications, networks, and e-commerce. IT professionals must learn to predict, prepare for, and defend against cyber attacks from a myriad of sources if they are to build and support the next generation of business solutions. In this course, you will learn the principles of designing, building, and testing secure web-based solutions. You will also learn how to identify and prevent common security vulnerabilities. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverable representative of graduate level work, as determined by the instructor.
Prerequisite(s): Permission of instructor.
Cross Listing(s): IT 5233.
IT 5235 Advanced Web Interfaces
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction and application of human-computer interaction theories to web-based applications. It covers the evaluation of user interfaces using various techniques including heuristic evaluation and user testing.
Prerequisite(s): A minimum grade of "C" in all of the following: (IT 1330 or IT 2130 or IT 2430) and IT 3132.
Cross Listing(s): IT 5235G.

IT 5235G Advanced Web Interfaces
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction and application of human-computer interaction theories to web-based applications. It covers the evaluation of user interfaces using various techniques including heuristic evaluation and user testing. For graduate students a significant research project will be assigned as a culminating experience.
Prerequisite(s): A minimum grade of "C" in IT 2430 or IT 2130 or IT 3130 and IT 3132.
Cross Listing(s): IT 5235.

IT 5236 Mobile Web Infrastructure
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the infrastructure which forms the basis of commercial, web-enabled applications on mobile and small devices, as well as personal computers. The course will focus on designing mobile web applications that provide a high level of security, reliability, scalability and availability. Through this course, students will develop proficiencies in current web technologies employed by businesses.
Prerequisite(s): A minimum grade of "C" in IT 2131 or IT 2431.
Cross Listing(s): IT 5236G.

IT 5236G Interactive Web Design and Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the infrastructure which forms the basis of commercial, web-enabled applications on mobile and small devices, as well as personal computers. The course will focus on designing mobile web applications that provide a high level of security, reliability, scalability and availability. Through this course, students will develop proficiencies in current web technologies employed by businesses. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in IT 2431 or IT 2131 or IT 3131.
Cross Listing(s): IT 5236.

IT 5433 Information Storage and Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers modern storage infrastructure technology and management including: challenges and solutions for data storage and data management, intelligent storage systems, storage networking, backup recovery, and archive, business continuity and disaster recovery, security and virtualization, and managing and monitoring the storage infrastructure. Best practices for security policies of cloud resources including permissions, privileges and storage management are analyzed and performed.
Prerequisite(s): A minimum grade of "C" in CISM 3134 and IT 2333.
Cross Listing(s): IT 5433G.

IT 5433G Information Storage and Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers modern storage infrastructure technology and management including: challenges and solutions for data storage and data management, intelligent storage systems, storage networking, backup recovery, and archive, business continuity and disaster recovery, security and virtualization, and managing and monitoring the storage infrastructure. Best practices for security policies of cloud resources including permissions, privileges and storage management are analyzed and performed. For graduate students a significant research project will be assigned as a culminating experience.
Prerequisite(s): A minimum grade of "C" in CISM 3134 and IT 2333.
Cross Listing(s): IT 5433.

IT 5434 Network Security Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is intended to serve the needs of individuals interested in understanding the field of network security and how it relates to other areas of information technology. The course will take a broad look at network security and provide the knowledge necessary to prepare students for further study in specialized security areas or used as a capstone course to those interested in acquiring a general knowledge of the field.
Prerequisite(s): A minimum grade of "C" in IT 2333 and CISM 3134.
Cross Listing(s): IT 5434G.

IT 5434G Network Security Fundamentals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is intended to serve the needs of individuals interested in understanding the field of network security and how it relates to other areas of information technology. The course will take a broad look at network security and provide the knowledge necessary to prepare students for further study in specialized security areas or used as a capstone course to those interested in acquiring a general knowledge of the field. Graduate students will be required to complete individual advanced level research in an area beyond the scope of the undergraduate requirements that demonstrates a higher level of mastery in the subject matter with additional required deliverables representative of graduate level work, as determined by the instructor.
Prerequisite(s): Permission of instructor.
Cross Listing(s): IT 5434.

IT 6130 Theoretical Foundations for Network Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide a detailed review of fundamental relevant to the study of telecommunications, and data communications. Topics covered will include Shannon’s Theorem, elements of Graph theory, Queuing Theory, Probability, Number Systems, Matrices and more. Students will complete several exercises using MATLAB and Microsoft Excel to reinforce topics covered in lecture by solving network related problems. Discrete event simulations software (OPNET) will also be used to observe and analyze concepts and behaviors in communications networks.

IT 7090 Selected Topics in Information Technology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
This course provides the student with an opportunity for in-depth study of selected topics in information technology.
Prerequisite(s): Permission of Instructor.

IT 7130 IT Governance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents a holistic approach to integrating the information technology services with the organization. It focuses on strategy, design, implementation, operations and continual improvement of information technology. IT Governance addresses how an organization maintains flexibility through the use of Information Technology, assuring the IT organization aligns its strategies with those of the organization it supports. This course looks at multiple IT Governance structures and looks at the data that is collected in these structures.
IT 7131 Data Science Methods  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course introduces the concepts and techniques of Data Science and covers decision making support systems, business intelligence and analytics, data science positions and roles in business firms. Topics include data extraction from homogeneous and heterogeneous data sources, data processing and file types, data manipulation, conversion, and integration. Students will use software for statistical analysis and interpretation, predictive analytics, machine learning, and the fundamentals of big data technologies. Students will examine and critique current research in the field.

IT 7133 Digital Security and Forensics Investigation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course explores the logical weapons and tools utilized in computer network exploitation, attacks and defenses. It also covers the digital forensics process, tools and methods for the detection and recovery of information on hardware or hidden within other formats. Topics also include cryptographic analysis, password recovery, the bypassing of specific target operating systems, and obtaining data from a digital device that has been destroyed on various platforms. This course also includes research components that require students to conduct research on a specific topic. Research deliverables include a term paper and presentation.

IT 7134 IT Project Management  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an overview of theoretical and practical concepts in management of IT projects; explores unique and particular challenges resulting from rapid technological change and dynamic environments; difficulty of managing changes in organizations resulting from introducing or revising information technology, emphasizing the change management role of the IT project leader.

IT 7135 Seminar in IT  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is a survey of information technology research and current topics.

ITEC 4740 Database Administration  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A minimum grade of "C" in ITEC 2130.  
This course is designed to provide the learner with an introduction to the administration and management using popular systems.

ITEC 3132 Introduction to Instructional Design  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to Instructional Design prepares students to design and develop professional learning experiences and materials using different approaches for a broad range of business, industry, and educational settings. This course will introduce students to models of instructional design and technology integration.  
Prerequisite(s): A minimum grade of "C" in ITEC 2130.

ITEC 3230 Instructional Technology for Special Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed for students enrolled in one of the P-12 teaching fields. It is an introduction to the effective uses of instructional technology for Special Education majors. A systematic approach to selecting, producing, and utilizing various instructional technologies will be covered with an emphasis on the instructional uses of the computer. The course will correlate with the Special Education pre-service experience.  
Prerequisite(s): A minimum grade of "C" in ITEC 2130.

ITEC 3430 Instructional Technology for P-12 Teaching Fields  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed to provide the learner with an introduction to the management of e-learning development projects and the evaluation of e-learning experiences.  
Prerequisite(s): A minimum grade of "C" in ITEC 2130, ITEC 3131, and ITEC 3132.

ITEC 4134 E-Learning Project Management and Evaluation  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed to provide the learner with an introduction to the management of e-learning development projects and the evaluation of e-learning experiences.
ITEC 5233 Foundations of Technology-Enabled Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces education majors to the effective uses of instructional technology in supporting student centered technology-enabled learning. A systematic approach to selecting, producing, and utilizing various instructional technologies will be covered with an emphasis on online teaching and learning for P-12 environments.
Cross Listing(s): ITEC 5233G.

ITEC 5233G Foundations of Technology-Enabled Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces education majors to the effective uses of instructional technology in supporting student centered technology-enabled learning. A systematic approach to selecting, producing, and utilizing various instructional technologies will be covered with an emphasis on online teaching and learning for P-12 environments.
Cross Listing(s): ITEC 5233.

ITEC 7090 Selected Topics in Instructional Technology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Promotes specialized training in new and/or emerging instructional technologies/methodologies or topics appropriate to the needs of in-service personnel. Attention will be given to a range of specific needs as they reach special significance in local school systems.

ITEC 7330 The Internet in Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides learners with a focused look at issues surrounding the implementation and use of emerging applications of the internet in schools.

ITEC 7430 Instructional Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to systems theory as applied to the design of instructor. Examines principles of systems theory in the context of the design, development, selection and utilization of curriculum, instruction and instructional materials.

ITEC 7530 Instructional Technology Foundations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Instructional technology for Educators is an introduction to the use of the computer in the instructional process. The course focuses on the uses of the computer as a medium of instruction. Meets the Special Georgia Technology Requirement for Teacher Certification.

ITEC 7538 Instructional Technology for School Leaders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course is designed to enhance the skills of school administrators in the area of technology leadership. Included is an overview of the current and emerging trends of technology in schools, technology planning, technology professional development, and technology standards.

ITEC 7539 Technology for Higher Education Leaders
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to develop the necessary knowledge, skills, and dispositions of higher education leaders for the appropriate selection and application of technology tools and resources.

ITEC 8130 Advanced Media Management and Supervision
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the management of school library programs with an emphasis on the collaborative role of the school librarian as an educational leader and school library center administrator.

ITEC 8133 Current Trends and Issues in Instructional Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the history and types of research presently conducted in the field of Instructional Technology. Emphasis is placed on current trends and issues, as well as evaluating research in the field of instructional technology as it relates to the student’s field of initial certification.

ITEC 8134 Theories and Models of Instructional Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will examine how systematic instructional design processes are applied to develop instruction congruent with specific learning theories, instructional theories, and philosophical orientations in the context of their field of initial certification. The primary focus of the course is technology-based learning materials.
Prerequisite(s): A minimum grade of "C" in ITEC 7430.

ITEC 8135 Pedagogy of Online Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide advanced candidates in Instructional Technology the opportunity to develop an online-learning course. Candidates will research current best practices of online learning pedagogy and explore emerging technologies to integrate into the development of the online-learning course. The course is offered in a 100% online format.

ITEC 8136 Field Experience in Online Teaching and Learning
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students will explore existing literature on best practices in online teaching and learning based on their specific contexts, whether K-12, higher education, business, etc. This course incorporates instructional design theory and online pedagogical knowledge putting students’ learning into action and practice in an authentic online environment. The primary focus of the course is the students’ application of best practices in (an) authentic field-based experience(s).
Prerequisite(s): A minimum grade of "C" in ITEC 8135.

ITEC 8231 Transforming Learning with Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical examination of the role of technology and instructional design in the teaching/learning process. Review of quantitative and qualitative research relevant to student’s area of interest and the impact of technology on student learning. Examination of the use of electronic portfolios to demonstrate student learning.

ITEC 8435 Program Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Program Evaluation covers the theory and practice of systematic investigation of instructional programs, projects products, and processes. The course is designed to teach practitioners how to assess the effectiveness of endeavors such as quality improvement, enhancing organizational performance, or improving school curricula.
Cross Listing(s): FRIT 8435.

ITEC 8532 Multimedia Tools and Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers issues in the design and development of interactive multimedia instructional lessons. Covers the tools required for the creation of interactive multimedia and is organized around individual student projects.

ITEC 8630 Advanced Seminar in Instructional Technology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced study of theory and research related to technology mediated instruction, including technology integration for meaningful learning, systemic change with technology, legal and ethical issues, and online pedagogy. Prerequisite(s): Admission to EDD program.

ITEC 8636 Technology, Leadership, and Change
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides advanced students in Instructional Technology with opportunities to review research and current trends related to the integration of technology into teaching and learning. Application of concepts and ideas is achieved through design, development and delivery of a project to close a technology gap in an educational setting.
ITEC 8838 Field-Based Research in School Library Media
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will initiate, complete and present an acceptable field-based research study in school library media, using a design developed and approved in EDUR 8434. This course will focus on collecting, organizing and analyzing data, as well as composing a formal research paper based on the research study. The course culminates with an oral presentation of the study completed using appropriate technologies. Students are limited to register for this course twice during the program of study.
Prerequisite(s): A minimum grade of "C" in EDUR 8131, EDUR 8434, ITEC 8133, ITEC 8134, ITEC 8135, and ITEC 8636.

ITEC 8889 Field-Based Research in Instructional Technology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students will initiate, complete and present an acceptable field-based research study in instructional technology, using a design developed and approved in EDUR 8434. This study must be related to the student's field of initial certification. This course will focus on collecting, organizing and analyzing data, as well as composing a formal research paper based on the research study. The course culminates with an oral presentation of the study completed using appropriate technologies. Students are limited to register for this course twice during the program of study.
Prerequisite(s): A minimum grade of "C" in EDUR 8131, EDUR 8434, ITEC 8133, ITEC 8134, ITEC 8135, and ITEC 8636.

ITEC 8890 Directed Individual Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The student will propose and carry out an applied or theoretical project in instructional technology. Prerequisite(s): Permission of advisor.

JAPN Japanese

JAPN 1001 Elementary Japanese I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to listening, speaking, reading, and writing in Japanese and to the culture of Japanese-speaking regions.

JAPN 1002 Elementary Japanese II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued listening, speaking, reading, and writing in Japanese with further study of culture of Japanese-speaking regions.

JAPN 1060 Accelerated Elementary Japanese
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
An accelerated introduction to listening, speaking, reading, and writing in Japanese and to the culture of Japanese-speaking regions. Completes the elementary levels of Japanese in one semester.

JAPN 2001 Intermediate Japanese I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Building upon communication skills (understanding, speaking, reading, and writing Japanese) and cultural understanding, developed at the elementary level.
Prerequisite(s): A minimum grade of "C" in JAPN 1002.

JAPN 2002 Intermediate Japanese II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued focus on communication skills and cultural understanding.
Prerequisite(s): A minimum grade of "C" in JAPN 2001.

JAPN 2060 Accelerated Intermediate Japanese
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.
Accelerated intermediate Japanese with continued work on listening, speaking, reading, and writing in Japanese and the culture of Japanese-speaking regions. Completes the intermediate levels of Japanese in one semester.
Prerequisite(s): A minimum grade of "C" in JAPN 1002 or JAPN 1060.

JAPN 3090 Selected Topics in Japanese
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Study of a topic in Japanese literature, culture, society, thought, or language not included in the regular offering. Continued development of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 3130 Japanese Conversation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Continued development of all five competencies: listening, speaking, reading, writing, and culture, with special emphasis on conversational skill.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 3131 Reading Japanese
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the Japanese language with an emphasis on reading skills.

JAPN 3185 Studies Abroad: Speaking I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in oral communications in Japanese using materials that are appropriate for building on intermediate-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 3230 Japanese Literature I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major authors and movements in Japanese literature from the Meiji period to the present, including women in literature and the relations to cultural trends and other arts, such as painting and film.

JAPN 3330 Japanese Culture I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the Japanese language with a special emphasis on its culture. Development of all five language skills: listening, speaking, reading, writing, and culture.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 3331 Japanese Culture II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the Japanese culture, values, society, customs, and the language for American students.
Prerequisite(s): A minimum grade of "C" in ENGL 1102.

JAPN 3385 Study Abroad: Writing I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in written communications in Japanese using materials that are appropriate for building on intermediate-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 3530 Business Japanese
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the language and practice of business conventions in Japan. Development of all five language skills: listening, speaking, reading, writing, and culture.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 3531 Japanese Literature II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of a topic in Japanese literature, culture, society, thought, or language not included in the regular offering. Continued development of all five language competencies (listening, speaking, reading, writing, and culture). May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.

JAPN 4185 Studies Abroad: Speaking II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a course in oral communications in Japanese using materials that are appropriate for building on advanced-level skills and which are related thematically to the country/culture visited.
Prerequisite(s): A minimum grade of "C" in JAPN 2002 or JAPN 2060.
A course designed to introduce folk dances from a variety of nationalities. Basic dance steps such as the waltz, two-step, and cha-cha will be included.

**KINS 1110 Aerobics**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic aerobic skills and knowledge.

**KINS 1111 Aerobic Cross Training**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to challenge the experienced student’s basic aerobic exercise techniques and knowledge. Intermediate skills and knowledge will be introduced. It is recommended that students be able to participate in a minimum of 20 minutes of continuous aerobic activity prior to enrolling in the course.

**KINS 1112 Badminton**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic badminton skills and knowledge.

**KINS 1113 Basketball**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the basic basketball skills and knowledge.

**KINS 1114 Body Conditioning**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the student to the proper techniques and safety concerns in body conditioning.

**KINS 1115 Bowling**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the basic bowling skills and knowledge. An additional fee is required.

**KINS 1116 Canoeing**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
This course is designed to introduce the safe and skilled use of a canoe and canoe camping.

**KINS 1117 Dance: Ballet**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce beginning ballet techniques. Basic bar work and various combinations will be included.

**KINS 1118 Dance: Clogging**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic clogging steps and dance routines.

**KINS 1119 Dance: Country Western**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce popular country-western couple dances such as the Texas Two-Step, Sway, etc. Basic dance steps such as the waltz, two-step, and cha-cha will be included.

**KINS 1120 Dance: Folk**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce folk dances from a variety of nationalities/countries of the world.

**KINS 1211 Dance: Line**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce a variety of popular line dances which are performed without a partner. The dances are primarily country-western in nature and involve basic steps.

**KINS 1212 Dance: Modern**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the elements of dance, proper warm up techniques, basic modern dance movement and creative application of dance principles.

**KINS 1213 Dance: Social**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the basic steps and variations for eight selected ballroom dances.

**KINS 1214 Dance: Square**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to include basic square dance movements and beginning square dance routines.

**KINS 1215 Dance: Tap**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the eight elements of dance, proper warm-up techniques, basic tap steps, and an application of skills learned.

**KINS 1216 Equestrian**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce fundamental skills and basic knowledge necessary for riding a horse safely. An additional fee is required.

**KINS 1217 Fencing**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the basic fundamentals and skills of foil fencing.

**KINS 1218 Fitness Walking**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce students to walking as a fitness activity while implementing a walking program.

**KINS 1219 Football: Flag**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce flag football skills, rules, and strategies.

**KINS 1301 Golf**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce golf skills, fundamentals and knowledge. An additional fee is required.

**KINS 1311 Jogging**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the basic fundamentals of jogging and cardiovascular training.

**KINS 1312 Outdoor Education Activities**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce knowledge and skills that will enhance participation in outdoor activities.

**KINS 1313 PA for People with Disabilities I**
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed for the student with a disabling condition who cannot satisfy the physical activity requirement provided through the other activity course listings. This course provides individualized programs with a variety of training modalities modified for the individual student. An introduction to a variety of physical activity concepts, skills, and techniques (Level I) will also be presented.
KINS 1314 PA for People with Disabilities II
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed for the student with a disabling condition who cannot satisfy the physical activity requirement provided through the other activity course listings. This course provides an individualized program with a variety of training modalities modified for the individual student. A variety of physical activity concepts, skills, techniques (Level II) will also be presented.

KINS 1315 PA for People with Disabilities III
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed for the student with a disabling condition who cannot satisfy the physical activity requirement provided through the other activity course listings. This course provides an individualized program with a variety of training modalities modified for the individual student. A variety of physical activity concepts, skills, and techniques (Level III) will also be presented.

KINS 1316 PA for People with Disabilities IV
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed for the student with a disabling condition who cannot satisfy the physical activity requirement provided through the other activity course listings. This course provides an individualized program with a variety of training modalities modified for the individual student. A variety of physical concepts, skills, and techniques (Level IV) will also be presented.

KINS 1317 Racquetball
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the basic racquetball skills and knowledge.

KINS 1318 Scuba
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the fundamental skills and knowledge necessary for entry level certification and to meet the standards set forth by the Recreational Scuba Training Council (RSTC). An additional fee is required.

KINS 1319 Self Defense
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic self-defense techniques and principles.
Cross Listing(s): KINS 1319S.

KINS 1410 Soccer
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic soccer skills and knowledge.

KINS 1411 Softball
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic softball skills and knowledge.

KINS 1412 Swimming
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic skills and knowledge for swimming effectively and safely.

KINS 1413 Swimming: Aquatic Aerobics
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce students of various ages and fitness levels to participate in a vigorous, aerobic activity while reducing the change of injury. Activities which promote cardiovascular endurance, muscular strength and endurance, and flexibility are emphasized and modified to be done in an aquatic setting.

KINS 1414 Swimming: Fitness
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce the student to the type and quality of exercise needed to maintain a high degree of fitness through a vigorous exercise program in the swimming pool.

KINS 1415 Tennis
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic tennis skills and knowledge.

KINS 1416 Tumbling
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic tumbling skills and knowledge.

KINS 1417 Volleyball
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic volleyball skills and knowledge.

KINS 1418 Weight Training
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic weight training skills and knowledge.

KINS 1419 Water Safety: Survival Swimming
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.

KINS 1510 Mountaineering
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce mountaineering skills, fundamentals and knowledge.

KINS 1511 Ultimate Frisbee
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic ultimate Frisbee skills and knowledge.

KINS 1512 Yoga and Pilates
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
This course will introduce the student to the fundamental concepts of Yoga and Pilates, encourage the appreciation of leisure activities, and promote a healthy lifestyle.

KINS 1513 Swing/Shag
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic Swing/Shag Dance skills and knowledge.

KINS 1514 Spinning
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basic aerobic skills and knowledge pertinent to understanding and participating in spinning.

KINS 1515 Fitness for Life
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
A course designed to introduce basics of weight management through exercise and nutritional education.

KINS 1516 Beginning Archery
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
To introduce the student to the fundamental concepts/technique of archery, and to encourage the appreciation of leisure activities in promoting a healthy lifestyle.

KINS 1517 Rock Climbing
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
Students will learn the skills needed to rock climb indoors. Students will learn knot tying, proper handling of a rope, how to put on a climbing harness, proper belaying techniques, spotting, and basic climbing techniques and terms.

KINS 1525 Concepts of Health and Physical Activity
2 Credit Hours. 1 Lecture Hour. 2 Lab Hours.
This course combines health-related content knowledge with weekly participation in fitness or sport based physical activity. The health-related topics may include; behavioral change, personal safety, components of fitness, nutrition and weight management, prevention of chronic disease, mental health and stress management, substance use and abuse, and sexual health. The combined course content promotes a healthy lifestyle while teaching lifelong physical activities.
KINS 2110 Aerobics: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experience student's basic aerobic exercise techniques and knowledge. Intermediate skills and knowledge will be introduced. It is recommended that students be able to participate in a minimum of 20 minutes of continuous aerobic activity prior to enrolling in the course.

KINS 2112 Badminton: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic skills and knowledge. Intermediate strategies are introduced.

KINS 2113 Basketball: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic basketball skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2115 Bowling: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic bowling skills and knowledge. Intermediate skills and strategies will be introduced. It is recommended that students average 130 or higher prior to enrolling in this course. An additional fee is required.

KINS 2117 Dance: Ballet Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's fundamental understanding of ballet techniques and introduce the students to basic choreography of a short self-created dance.

KINS 2213 Dance: Social Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to emphasize leading and following techniques and more advanced patterns/variations of the waltz, cha-cha, Texas two-step and swing (shag).

KINS 2216 Equestrian: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
This course is open to any student at Georgia Southern University with horsemanship or riding experience. There are no prerequisites for this course; however we do observe CHA national standards for horse and rider safety. Based upon these guidelines, a weight limit for riders of up to approximately 250 pounds will be observed.

KINS 2217 Fencing: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic fencing skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2219 Football: Flag Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic flag football skills and knowledge. Intermediate football skills and strategies will be introduced.

KINS 2310 Golf: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic golf skills and knowledge. Intermediate skills and strategies will be introduced. It is recommended that students shoot between 85-115 for 18 holes prior to enrolling in this course. An additional fee is required.

KINS 2319 Self Defense: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine an experienced student's basic self-defense skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2321 Clinical Skills in Athletic Training I  
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.  
This course provides the student with a supervised clinical experience in athletic training. Clinical assignment, clinical skill competencies and clinical proficiency evaluation are included in this course. Content of this course includes; lower extremity taping, bracing and pad fabrication, skills in emergency and non-emergency life threatening injury and illness care.  
Prerequisite(s): Athletic Training major status.

KINS 2410 Soccer: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experienced student's basic soccer skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2411 Softball: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experienced student's basic softball skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2412 Swimming: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experienced student's basic swimming skills and knowledge. Intermediate skills and knowledge will be introduced.

KINS 2415 Tennis: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experienced student's basic tennis skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2417 Volleyball: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experienced student's basic volleyball skills and knowledge. Intermediate skills and strategies will be introduced.

KINS 2418 Weight Training: Intermediate  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
A course designed to refine the experienced student's basic weight training techniques and knowledge. Intermediate techniques and programs will be introduced.

KINS 2419 Swimming: Water Polo  
1 Credit Hour. 0 Lecture Hours. 1 Lab Hour.  
Designed to introduce the student to water polo basic skills and knowledge.

KINS 2420 Lifeguard Training  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Prepares students to meet the requirements of the American Red Cross and qualify for certification as a lifeguard.

KINS 2421 Water Safety Instruction  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Prepares the student to meet the requirements of the American Red Cross and qualify for certification as a water safety instructor.
KINS 2511 Human Anatomy and Physiology I Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
The laboratory component of the first course in a two semester sequence in which human anatomy and physiology are studied using a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. The laboratory course is intended to provide students with hands on experiences that will enhance and reinforce the content of KINS 2531. The experiences will be structured to encourage critical thinking, understanding of scientific methodology and the application of scientific principles.

KINS 2512 Human Anatomy and Physiology II Laboratory
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.
The laboratory component of the second course in a two semester sequence in which human anatomy and physiology are studied using a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. The laboratory course is intended to provide students with hands on experiences that will enhance and reinforce the content of KINS 2532. The experiences will be structured to encourage critical thinking, understanding of scientific methodology, and the application of scientific principles.

KINS 2531 Human Anatomy and Physiology I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A two semester sequence in which human anatomy and physiology are studied using a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. Course content includes: basic anatomical and directional terminology; fundamental concepts and principles of chemistry and cell biology; histology; the integumentary, skeletal, muscular, and somatic nervous systems and special senses.
Cross Listing(s): KINS 2531H.

KINS 2532 Human Anatomy and Physiology II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A two semester sequence in which human anatomy and physiology are studied using a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. This course is a continuation of KINS 2531 and includes the endocrine system, autonomic nervous system, cardiovascular system, the lymphatic system and immunity, the respiratory system, the digestive system and metabolism, the urinary system, fluid/electrolyte and acid/base balance and the reproductive systems.
Prerequisite(s): A minimum grade of "C" in KINS 2531.

KINS 2533 Pathophysiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces abnormal physiological health transitions across the lifespan incorporating evidence-based interaction in professional practice. Disorders affecting cells, organs, and systems involved in the regulation of structure and function within the human organism are examined. How diseases affect the structures, functions, and systems of the human organism are explored. The influence of genetics, ethnicity, environment, and age are incorporated.
Prerequisite(s): A minimum grade of "C" in KINS 2512 and KINS 2532.

KINS 2535 Introduction to Exercise Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A career-based introduction to the field of Exercise Science and the Exercise Science major at Georgia Southern University. Students will explore resources that can enhance their academic and career goals. Students will also meet medical, health promotion and fitness professionals, as well as representatives from graduate schools, that can help them learn more career requirements and opportunities in these fields.

KINS 3125 Technology in Sport
2 Credit Hours. 1 Lecture Hour. 2 Lab Hours.
This course is designed to introduce coaching behavior students to existing technologies in sport and how those technologies can enhance sport performance.

KINS 3130 Research Methods in Kinesiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to fundamental principles underlying research methods in kinesiology. Included will be basic procedures for conducting experimental, descriptive, historical, qualitative research, computer applications, basic measurement concepts, statistical methods, critical thinking and scholarly writing.

KINS 3131 Biophysical Foundations of Human Movement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Surveys biological systems and physical principles as applied to human movement and the relationship of these systems and principles to the development of the study of human movement.
Prerequisite(s): A minimum grade of "C" in KINS 2511 and KINS 2512 and KINS 2531 and KINS 2532.

KINS 3132 Foundations of Exercise and Sport Psychology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to how individuals behave in physical activity settings. Psychological antecedents and consequences of primary and secondary involvement in exercise and sport will be explored.
Prerequisite(s): PSYC 1101.

KINS 3230 Motor Control, Coordination, and Skill
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the nature of motor skill performance, motor skill learning, and the factors influencing motor skill acquisition.
Prerequisite(s): PSYC 1101 and a minimum grade of "C" in KINS 3131 or KINS 3541 and Permission of Instructor.

KINS 3321 Clinical Applications in Athletic Training I
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
This course provides the student with a supervised clinical experience in athletic training. Clinical assignment, clinical skill competencies and clinical proficiency evaluation are included in this course. Content of this course includes; therapeutic modality laboratory experience.
Prerequisite(s): A minimum grade of "C" in KINS 2322 and Athletic Training major status.

KINS 3322 Clinical Applications in Athletic Training II
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
This course provides the student with a supervised clinical experience in athletic training. Clinical assignment, clinical skill competencies and clinical proficiency evaluation are included in this course. Content of this course includes; abdominal injury and illness evaluation.
Prerequisite(s): A minimum grade of "C" in KINS 3321 and Athletic Training major status.
KINS 3330 Prevention of Injury and Illness in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the profession of athletic training. The student will be acquainted with the domains of athletic training. Emphasis will be based on basic emergency management as well as injury prevention including strength and conditioning, nutrition and supplements, environmental considerations and protective equipment. 
Prerequisite(s): A minimum grade of "C" in HLTH 2120 and KINS 2511 and KINS 2512 and KINS 2531 and KINS 2532.

KINS 3331 Pathology and Care of Athletic Injury and Illness
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will emphasize the recognition of common athletic injuries and illness. Emphasis will be placed on pathology as well as mechanism, signs and symptoms, evaluation findings and basic management and/or referral of injuries and illness. 
Prerequisite(s): A minimum grade of "C" in KINS 3330.

KINS 3426 Coaching Baseball and Softball
2 Credit Hours. 0.2 Lecture Hours. 0 Lab Hours.
Provides the prospective coach with the knowledge and understanding of basic skills, fundamentals, techniques, team organization, team strategy and conditioning in baseball and softball.

KINS 3427 Coaching Basketball
2 Credit Hours. 0.2 Lecture Hours. 0 Lab Hours.
Provides the prospective coach with the knowledge and understanding of basic skills, fundamentals, techniques, team organization, team strategy and conditioning in basketball.

KINS 3428 Coaching Football
2 Credit Hours. 1 Lecture Hour. 3 Lab Hours.
Provides the prospective coach with the knowledge and understanding of basic skills, fundamentals, techniques, team organization, team strategy, and conditioning in football.

KINS 3429 Coaching Olympic Sports
2 Credit Hours. 1 Lecture Hour. 3 Lab Hours.
Provides the prospective coach with the knowledge and understanding of basic skills, fundamentals, techniques, team organization, team strategy, and conditioning in three of the following sports: golf, soccer, tennis, track and field, volleyball and other Olympic sports.

KINS 3430 Principles of Coaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to the sport science principles of coaching. Topics include philosophy, psychology, pedagogy, physiology, management, first aid and injury prevention. Successful completion of the course leads to certification by the National Federation Interscholastic Coaches Education Program.

KINS 3431 Psychology of Coaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the prospective coach with the science and practice of various sport psychology principles as applied to coaching and athletic performance.

KINS 3432 Elementary Physical Education I
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Provides the introduction to a developmentally appropriate approach to teaching the elementary physical education content (gymnastics, games, and dance). Focus in on gymnastic and dance-like activities to build a movement foundation that encourages learners to resolve movement problems in unique ways. Balance, tumbling, movement exploration, whole and part body expression, and simple rhythms are the core to these learning activities. Students will be required to design and implement a variety of movement challenges for elementary learners. 
Prerequisite(s): Admission into the Teacher Education Program in Health and Physical Education.

KINS 3433 Elementary Physical Education II
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Along with KINS 3432, it is designed to focus on a developmentally appropriate approach to teaching the foundations of movement to children. Focus is on dance and game-like activities to build a movement foundation that encourages learners to resolve movement problems and manipulate objects in unique ways. Movement exploration, whole and part body expression, rhythms, game creation, game variations, game strategies and game/cooperative skills are the core to these learning activities. Also emphasizes the inclusion of fitness concepts in the elementary curriculum. Students will be required to design and implement a variety of movement challenges for elementary learners.
Prerequisite(s): Admission into the Teacher Education Program in Health and Physical Education and a minimum grade of 'C' or higher in KINS 3432.

KINS 3435 Motor Learning and Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Motor Learning and Development explains how motor development affects motor learning and provides a framework for establishing programs that facilitate skill acquisition for all learners. The course examines the development of movement skill in humans from infancy to older adulthood and how differing motor, cognitive, and social abilities affect when, why, and how an individual learns motor skills. By providing a thorough understanding of the factors that drive the development of motor skills throughout the life span, Motor Learning and Development assists future and current movement educators in teaching movement skills to learners at any age and skill level.
Prerequisite(s): Admissions into Teacher Education Program in Health and Physical Education.

KINS 3436 Performance and Technique in Physical Activity I
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
Enhances the knowledge, skill and understanding of activities and games pertinent to middle and high school physical education. Identifies appropriate teaching sequences, assessment strategies, and developmentally appropriate modifications to enhance student learning. Reviews and analyzes "traditional" game and sports activities and concerns in regard to maximizing learning. Skill, strategy and conceptual transfer, across activities and games, will be identified to enhance learner skillfulness and adaptability. Content focus will be on traditional and non-traditional games and activities involving individual and group skills to diversify movement efficiency. Students will be required to design and implement a variety of movement challenges for middle and high school learners. Strategies for integrating fitness concepts into these activities will be addressed. 
Prerequisite(s): Admission into the Teacher Education Program in Health and Physical Education.

KINS 3437 Performance and Technique in Physical Activity II
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
Enhances the knowledge, skill, and understanding of dance, cooperative and adventure activities pertinent to middle and high school physical education. Identifies appropriate teaching sequences, assessment strategies and developmentally appropriate modifications to enhance student learning. Reviews and analyses strategies for incorporating these activities into the middle and high school curriculum. Skill, strategy and conceptual transfer, across activities will be identified to enhance learner skillfulness and adaptability. Content focus will be on activities which develop social dance, teamwork, communication and outdoor/adventure skills and to diversify movement efficiency. Students will be required to design and implement a variety of movement challenges for middle and high school learners. Strategies for integrating fitness concepts into these activities will be addressed. This course will involve two weekend adventure experiences. 
Prerequisite(s): A minimum grade of "C" in KINS 3436 and admission into the Teacher Education Program in Health and Physical Education.
KINS 3438 Principles of Personal Training
3 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The objective of the class is to develop an understanding of the physiological mechanisms and basic skills necessary to evaluate healthy populations and prescribe exercise. Additionally, this class is set up as a means to prepare students to sit for the national personal trainer certification (NSCA-CPT).
Prerequisite(s): A minimum grade of "C" in KINS 3541.

KINS 3541 Structural Kinesiology
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
This course surveys biological systems and physical principles as applied to human movement and the relationship of these systems and principles to the development of the study of human movement.
Prerequisite(s): A minimum grade of "C" in KINS 2511 and KINS 2512 and KINS 2531 and KINS 2532.

KINS 3542 Physiological Aspects of Exercise
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Provides an in-depth perspective of physiological and biochemical responses of the human body when subjected to exercise.
Prerequisite(s): A minimum grade of "C" in KINS 3131 or KINS 3541.

KINS 3543 Biomechanical Analysis of Movement
4 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
Focuses on the study of human motion through an examination of forces acting on the body and the effects produced by these forces.
Prerequisite(s): A minimum grade of "C" in KINS 3131 or KINS 3541 and PHYS 1111K.

KINS 4099 Selected Topics in Kinesiology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an in-depth study of selected topics in kinesiology.
Prerequisite(s): Permission of Instructor.

KINS 4130 Administrative Principles in Kinesiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the study of the processes of planning, organizing, directing and controlling the functioning of movement based professions (exercise science, athletic training).
Prerequisite(s): Senior status and school approval.

KINS 4131 Population Health Care Strategies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Overview of the levels of prevention, epidemiological principles and their impact on health promotion and disease prevention. A major focus is primary prevention relative to exercise/activity. Emphasis is placed on the clinical application of activity for improving health.
Prerequisite(s): Junior or Senior status or Permission of Instructor.

KINS 4231 Fitness Evaluation and Exercise Prescription
3 Credit Hours. 0.2 Lecture Hours. 0.3 Lab Hours.
Provides the student with an in-depth study of fitness appraisal and exercise prescription and the development, interpretation, implementation and management of fitness programs.
Prerequisite(s): A minimum grade of "C" in HLTH 1520 and KINS 3541 or KINS 3131; and prior or concurrent enrollment with a minimum grade of "C" in KINS 3542 or Permission of Instructor.

KINS 4330 Evaluation of Lower Extremity Injuries
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presents principles and techniques in the clinical evaluation of athletic injuries and illnesses involving the lower extremities, thoracic/lumbar spine and gait analysis.
Prerequisite(s): A minimum grade of "C" in KINS 3331.

KINS 4331 Evaluation of Upper Extremity Injuries
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presents principles and techniques in the clinical evaluation of athletic injuries and illnesses involving the upper extremities, head, face and cervical spine.
Prerequisite(s): A minimum grade of "C" in KINS 4330.
Corequisite(s): KINS 4333.

KINS 4332 Therapeutic Modalities in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to the physiological effects associated with therapeutic modalities used in the treatment and rehabilitation of athletic injuries.
Prerequisite(s): A minimum grade of "C" in PHYS 1112 and KINS 2511 and KINS 2512.

KINS 4333 Therapeutic Exercise and Rehabilitation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Imparts knowledge pertaining to the physiological effects, indications, contraindications, and applications of therapeutic exercise in the rehabilitation of athletic injuries and illnesses.
Prerequisite(s): A minimum grade of "C" in KINS 2511 and KINS 2512.
Corequisite(s): KINS 4331.

KINS 4334 General Medical and Pharmacological Issues in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course acquaints the student with general medical and pharmacological issues in the athletic population.
Prerequisite(s): A minimum grade of "C" in CHEM 1146 or CHEM 1146H and KINS 3331.

KINS 4420 Sport Conditioning Laboratory
2 Credit Hours. 0.2 Lecture Hours. 0 Lab Hours.
Prepares students to undertake responsibilities in the areas of coaching, fitness programming and related areas.

KINS 4421 Principles of Officiating
2 Credit Hours. 1 Lecture Hour. 3 Lab Hours.
Provides the prospective coach with the knowledge and understanding of principles and basic techniques of officiating selective sports.

KINS 4432 Adapted Physical Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is an introductory course designed to provide students with the knowledge and basic skills required to meet the professional and legal mandates pertaining to physical education for individuals with disabilities.
Prerequisite(s): KINS 4430 and Admission into the Teacher Education Program
Corequisite(s): KINS 4441.

KINS 4440 Instructional Design in Health and Physical Education for Elementary Students
4 Credit Hours. 2 Lecture Hours. 4 Lab Hours.
Develops skills and knowledge related to teaching physical education to young or beginning learners. Specifically the course will be oriented toward developing an understanding of the characteristics and needs of children, appropriate curriculum content in elementary school physical education and effective teaching skills for elementary school physical education. To the extent possible, the majority of the course will be conducted in elementary schools, providing continuous opportunities to observe, plan for, teach and evaluate teaching physical education lessons on a regular basis.
KINS 4441 Instructional Design in Health and Physical Education for Middle and High School Students
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Develops instructional skills in planning, teaching and evaluating psychomotor, cognitive and affective learning in large group settings. The emphasis will be on intermediate level learning about current health issues and health related fitness at the high school level, and game/sport, dance, and fitness activities at the middle and high school levels. Specifically the course will be oriented toward developing an understanding of the characteristics of youths in both middle school and high school, appropriate curriculum content in middle school physical education, appropriate curriculum content in high school health education, and effective teaching skills for middle school physical education and high school health education.
Prerequisite(s): Completion of KINS 4430.

KINS 4618 Senior Seminar in Athletic Training
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course provides senior level athletic training students with a colloquium in which to discuss current athletic training issues and topics. Emphasis will be placed on professional responsibility, as well as ethical practice, and rules and regulations that govern the practice of athletic training. Course also includes: employment opportunities, professional development and continuing education.

KINS 4637 Senior Seminar in Health and Physical Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is intended to provide senior level health and physical education majors with a colloquium in which to discuss current health education issues and topics. Emphasis will be placed on professional responsibilities, as well as ethical practice, and rules and regulations that govern the practice of the profession. This course is taken simultaneously with the student teaching experience.
Prerequisite(s): Admission into the Teacher Education Program.

KINS 4721 Clinical Practicum in Athletic Training I
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides the student with a supervised clinical experience in athletic training. Clinical assignment, clinical skill competencies and clinical proficiency evaluation are included in this course. Content of this course includes: advanced techniques in manual muscle testing, goniometric measurements and orthotic fabrication.
Prerequisite(s): A minimum grade of "C" in KINS 3322 and Athletic Training major status.

KINS 4722 Clinical Practicum in Athletic Training II
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides the student with a supervised clinical experience in athletic training. Clinical assignment, clinical skill competencies and clinical proficiency evaluation are included in this course. Content of this course includes: research methods, professional presentations and athletic training administration.
Prerequisite(s): A minimum grade of "C" in KINS 4721 and Athletic Training major status.

KINS 4730 Coaching Practicum
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with supervised coaching experience in a sport.
Prerequisite(s): Beginning coaching course in sport or Permission of Instructor.

KINS 4735 Practicum in Exercise Science
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Offers the student the opportunity to participate in appropriate laboratory techniques and practices within the biophysical and behavioral domains of exercise science.
Prerequisite(s): Permission of Exercise Science Program Coordinator.

KINS 4799 Internship in Exercise Science
12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the senior level Exercise Science major student with a practical experience in an appropriate exercise setting.

KINS 4899 Directed Individual Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to investigate an area of interest under the direction of a faculty mentor.
Prerequisite(s): Permission of Instructor.

KINS 4999 Senior Thesis
6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with a capstone experience focusing on designing and conducting an original research project or assisting a faculty mentor in ongoing research.
Prerequisite(s): 3.0 GPA and Permission of Exercise Science Program Coordinator.

KINS 6130 Research Design in Kinesiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to develop skill in designing, evaluating and producing research, with a focus on critical thinking and problem solving.
Prerequisite(s): Undergraduate course in research methods or Permission of Instructor.

KINS 6131 Data Analysis in Kinesiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an advanced understanding of data analysis in kinesiology. The goal of the course is for the student to obtain advanced knowledge and skills to analyze and understand research data within the field of human movement.

KINS 6132 Research Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduces the student to fundamental principles underlying research methods in sport coaching. Included will be basic procedures for conducting experimental, descriptive, historical, qualitative research, computer applications, basic measurement concepts, statistical methods, critical thinking and scholarly writing.

KINS 6133 Programming for Optimal Performance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide scientifically supported information covering sport training theory, periodization, and sport training methods that can be used by coaches, athletes, and strength and conditioning professionals.

KINS 6134 Elementary Physical Education Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course develops instructional methods in planning, teaching & evaluating psychomotor, cognitive & affective learning in elementary physical education. The emphasis will be on student learning in health related fitness, movement concepts, and skill themes at the elementary physical education level. Specifically, the course will be oriented toward developing appropriate curriculum content & effective teaching skills for elementary physical education.
Prerequisite(s): Admission to MAT in Health and Physical Education program.

KINS 6234 Adapted Physical Education Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to develop advanced knowledge and skills of an adapted physical educator. Course activities will focus on advanced knowledge of ethics, professional leadership, and assessment of students with disabilities in the K-12 setting. Course objectives focus the specialized knowledge described by the National Consortium for Physical Education and Recreation for Individuals with Disabilities (NCPERID) in the Adapted Physical Education National Standards.
Prerequisite(s): A minimum grade of "C" in HLTH 6133 and KINS 6134 and admission to MAT in Health and Physical Education program.
KINS 6325 Teaching Adapted and Elementary Skills and Concepts
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course is designed to enhance the knowledge, skills, and concepts of health and physical education pertinent to adapted physical education and elementary physical education. The course identifies appropriate teaching sequences, assessment strategies, and developmentally appropriate modifications to enhance student learning in adapted and elementary physical education. Skill, strategy, and conceptual transfer, across activities will be identified to enhance learner skillfulness and adaptability. Content focus will be on activities involving individual and group skills to diversify movement efficiency for adapted physical education and elementary physical education. Strategies for integrating classroom concepts and fitness concepts into these activities will be addressed.
Prerequisite(s): A minimum grade of "C" in HLTH 6133 and KINS 6134 and admission to MAT in Health and Physical Education program.

KINS 6326 Teaching Health and Secondary Physical Education Skills and Concepts
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course is designed to enhance the knowledge, skills, and concepts of health and physical education pertinent to health and secondary physical education. The course identifies appropriate teaching sequences, assessment strategies, and developmentally appropriate modifications to enhance student learning in health and secondary physical education. Skill, strategy, and conceptual transfer, across activities will be identified to enhance learner skillfulness and adaptability. Content focus will be on activities involving individual and group skills to diversify movement efficiency for health and secondary physical education. Strategies for integrating classroom concepts and fitness concepts into these activities will be addressed.
Prerequisite(s): A minimum grade of "C" in HLTH 6133 and KINS 6134 and admission to MAT in Health and Physical Education program.

KINS 6334 Secondary Physical Education Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course develops instructional methods in planning, teaching & evaluating psychomotor, cognitive & affective learning in secondary physical education. The emphasis will be student learning in health related fitness and game/sport at the secondary physical education levels. Specifically, the course will be oriented toward developing appropriate curriculum content & effective teaching skills for secondary physical education.
Prerequisite(s): A minimum grade of "C" in HLTH 6133 and KINS 6134 and admission to MAT in Health and Physical Education program.

KINS 7099 Selected Topics in Kinesiology
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity for in-depth study of selected topics in kinesiology.
Prerequisite(s): Permission of Instructor.

KINS 7110 Multicultural Issues in Physical Education
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course focuses on the critical analysis of multicultural issues and other ecological variables in physical activity settings including equity, accessibility, social responsibility, and cultural influences.

KINS 7131 Ethical Issues in Sport and Exercise Psychology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide students with an overview of ethical issues and implications within sport, exercise, and performance psychology contexts. In addition to satisfying the ethics requirement for certification with the Association for Applied Sport Psychology, this course is designed to expose students to knowledge about ethics and ethical decision-making. In addition to gaining knowledge in this area, it is intended for students to have the opportunity to become more aware of their own value system as a sport and exercise psychology professional and gain an understanding as to how ethics and values influence their own professional practice in teaching, research, and applied areas within the field.
Prerequisite(s): A minimum grade of "C" in KINS 7530.
KINS 7239 Clinical Exercise Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prepares the student to supervise and direct exercise for the management and rehabilitation of clinical cardiovascular, pulmonary, renal, and metabolic disease.
Prerequisite(s): A minimum grade of "C" in KINS 7238.

KINS 7310 Introduction to Clinical Instruction
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course introduces the newly certified athletic trainer to the clinical instructor role in an athletic training clinical setting. Content includes; learning and instruction styles, educational competencies, legal and ethical behaviors, instructional skills of mentoring, supervision, administration, evaluation and assessment of the undergraduate athletic training student in the clinical setting.

KINS 7330 Clinical Teaching Skills in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exposes the student to knowledge and skills of teaching clinical education programs in athletic training. Students will be exposed to the teaching theories and schema as they relate to clinical education in athletic training.
Prerequisite(s): Permission of instructor.

KINS 7333 Advanced Evaluation Skills in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the advancement of entry level knowledge and skills related to the evaluation of musculoskeletal related injury. Students will be exposed to both theoretical framework and psychomotor aspects of evaluation skills.
Prerequisite(s): Permission of instructor.

KINS 7334 Advanced Rehabilitation Skills in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the advancement of entry level knowledge and skills related to the rehabilitation of musculoskeletal related injury. Students will be exposed to both theoretical framework and psychomotor aspects of rehabilitation skills.
Prerequisite(s): Permission of instructor.

KINS 7335 Medical Aspects in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to enhance the student’s knowledge of pathophysiology, clinical presentation, and diagnostic tests of common general medical conditions observed in physically active individuals. Content of the course will cover the following categories/systems: cardiovascular, hematological, pulmonary, ENT, renal, gastrointestinal, hepatology and immunology.

KINS 7336 Current Issues in Athletic Training
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course that focuses on current issues and/or special topics of interest to athletic training clinicians.
Prerequisite(s): Permission of instructor.

KINS 7337 Macronutrient Metabolism in Sports Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course considers macronutrient metabolism in sports nutrition at an advanced level with respect to the metabolism, function, and requirements of macronutrients for physical activity.
Prerequisite(s): A minimum grade of "C" in KINS 7238.

KINS 7338 Micronutrient Metabolism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course considers micronutrient metabolism in sports nutrition at an advanced level with respect to the metabolism, function, and requirements of micronutrients for physical activity.
Prerequisite(s): A minimum grade of "C" in KINS 7337 and acceptance into the Georgia Southern University Dietetic internship.

KINS 7339 Energy Balance for Weight Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course analyzes the importance of energy balance in weight management as well as investigates genetic, metabolic, environmental factors that contribute to overweight and obesity. Physiological and psychological consequences of overweight and obesity as well as the roles of diet, behavior, and exercise in its prevention and treatment will be discussed. Special emphasis will be placed on the application of weight management theory to the development, presentation, and analysis of weight loss and weight maintenance protocols.
Prerequisite(s): A minimum grade of "C" in KINS 7238 and acceptance into the Georgia Southern University Dietetic internship.

KINS 7430 Administrative Issues in Coaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to study philosophy, principles and procedures in administering an athletic team or program.

KINS 7431 Applied Sport Physiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the study of exercise physiology principles applied to developing training and conditioning programs for enhancing health-related fitness and performance.
Prerequisite(s): Undergraduate course in exercise physiology or permission of instructor.

KINS 7432 Applied Sport Biomechanics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an in-depth study of the internal and external forces acting on the human body and the effects produced by these forces.
Prerequisite(s): Undergraduate courses in biomechanics, physics, and functional anatomy or permission of instructor.

KINS 7433 Prevention, Recognition and Care of Athletic Injuries
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the study of advanced knowledge in the concepts, practices, and procedures in the prevention, recognition and care of athletic injury and illness.
Prerequisite(s): Undergraduate courses in anatomy, physiology, and exercise physiology or permission of instructor.

KINS 7434 Current Issues in Coaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an overview of the skills, techniques and knowledge involved in becoming a coach, focusing on current issues affecting the coaching profession.

KINS 7435 Physical Educ Meas/Eval
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

KINS 7436 Phys Activ Prog Sr Adults
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

KINS 7437 Analysis of Teaching Physical Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines practices of effective teaching techniques and their relationship to learning. Provides the student with an understanding of opportunities to practice effective teaching strategies and skills.

KINS 7438 Motor Behavior
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Presents the major theoretical frameworks for acquisition of motor skill. Emphasis is given to the understanding of concepts of motor development, motor control, motor learning and the implications for pedagogy.
Prerequisite(s): Undergraduate course in motor behavior of permission of instructor.

KINS 7439 History/Philosophy of PE
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
KINS 7530 Psychology of Sport and Exercise Performance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines the psychological factors that may lead to peak performances in exercise and sport. Students will be introduced to the physical, mental, and emotional variables related to the readiness states of this ideal performance condition. Research and interventions associated with the common qualities of peak performance will be discussed.
Prerequisite(s): Undergraduate course in sport psychology or permission of instructor.

KINS 7531 Team Dynamics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an understanding of the influence of teams/groups within exercise and sport upon the individual performer, as well as, the influence of individuals upon teams/groups. Based upon the science/practice model, thus theory, research and application within team/group dynamics. The assignments are structured to give students experience with working in teams/groups.
Prerequisite(s): Undergraduate course in sport psychology or permission of instructor.

KINS 7533 Sport and Exercise Psychology Interventions
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an introduction to the application of exercise and sport psychology intervention strategies to enhance performance. Students will participate in various individual-focused performance enhancement training procedures and produce a personalized performance enhancement manual.
Prerequisite(s): A minimum grade of "C" in KINS 7530 or permission of instructor.

KINS 7534 Current Issues in Sport and Exercise Psychology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides student with an in-depth examination of special areas, current topics, and relevant issues in the field of sport and exercise psychology.

KINS 7535 Fitness and Wellness Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of this course is to provide the teacher with current theories and knowledge regarding fitness and wellness education in P-12 Physical Education. The course will additionally provide the teacher opportunities to design and evaluate fitness and wellness education programs.

KINS 7536 Assessment and Technology in Physical Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of this course is to develop skills and knowledge necessary to effectively assess student learning in P-12 Physical Education. The course will additionally provide an overview of the various types of technology that can be utilized in teaching and assessing physical education. The course includes personal computer use in creating materials to enhance instruction and aid in assessment. Also included are other technologies, such as personal digital assistants (PDA), digital cameras/camcorders, various physical education software and Internet options.

KINS 7537 Evaluation and Rehabilitation of the Lumbar Spine
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides the student an opportunity for advanced study of lumbar pathology, assessment, and rehabilitation. Students will be exposed to both theoretical framework as well as psychomotor aspects of assessment and rehabilitation of the lumbar spine.

KINS 7539 Health and Exercise Psychology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The purpose of KINS 7539 is to learn exercise behavior change strategies and provide knowledge and skills necessary to improve health and physical activity adherence for both individuals and groups. This course offers an applied inquiry into individual behaviors and lifestyles that affect physical and mental health from a health promotion, exercise science, and psychological perspective.
Prerequisite(s): A minimum grade of "C" in KINS 7530.

KINS 7590 Action Research in Physical Education
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
The purpose of this course is to develop the skills and knowledge necessary to effectively conduct research in P-12 Physical Education to assess effective teaching skills.

KINS 7630 Seminar in Kinesiology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an in-depth literature review and discussion of contemporary topics in kinesiology.
Prerequisite(s): A minimum grade of "C" in KINS 6130 or KINS 6131.

KINS 7637 Health and Physical Education Seminar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is intended to provide MAT health and physical education majors with a colloquium in which to discuss job search strategies, trends and current issues in the profession, certification issues in education, student teaching responsibilities, and advocacy strategies for promoting the profession. This course is taken simultaneously with the student teaching experience.
Prerequisite(s): A minimum grade of "C" in KINS 6234, KINS 6325, KINS 6326, and KINS 6334 and admission to MAT in Health and Physical Education program.
Corequisite(s): ESED 5799G.

KINS 7730 Practicum in Coaching
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with coaching experiences in planning, teaching skills, conducting practice sessions, organizing game situations and analysis, scouting and structuring off-season programming.
Prerequisite(s): Permission of instructor.

KINS 7731 Clinical Practicum for Teaching Athletic Training Skills
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to practice knowledge and skills of teaching clinical skills in athletic training. Students will be placed in clinical environments and will assist in the teaching of clinical athletic training skills.
Prerequisite(s): A minimum grade of "C" in KINS 7330 or Permission of instructor.

KINS 7732 Clinical Practicum for Evaluating Athletic Training Skills
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Allows the student to practice knowledge and skills of evaluating clinical skills in athletic training. Students will be placed in clinical environments and will assist with the supervision and evaluation of the application of athletic training skills.
Prerequisite(s): A minimum grade of "C" in KINS 7333 or KINS 7731 or permission of instructor.

KINS 7733 Practicum in Sport and Exercise Psychology
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides the student with the opportunity to practice knowledge and skills of sport and exercise psychology intervention. Students will be involved in supervised, applied environments that allow them to work with a team or individual.
Prerequisite(s): A minimum grade of "C" in KINS 7531 and KINS 7533 or permission of instructor.

KINS 7799 Internship in Kinesiology
6-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with an opportunity to receive practical experiences in a selected movement related setting.
Prerequisite(s): Permission of graduate program director.

KINS 7898 Project in Athletic Training
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course will allow the student to understand the research process and expand the student's knowledge within athletic training. The student will work alongside a faculty member with shared research interests.
Prerequisite(s): A minimum grade of "C" in KINS 6130 and KINS 6131.
KINS 7899 Directed Individual Study  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Provides the student with an opportunity to investigate an area of interest under the direction of a faculty mentor.  
Prerequisite(s): Permission of instructor.

KINS 7999 Thesis  
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Provides the student with an opportunity to complete an independent research project. A written and oral defense of the project is required.  
Prerequisite(s): Permission of graduate program director.

KINS 8430 Supervision of Instruction in Physical Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Assists the professional educator with acquiring the knowledge and skills essential to improving instruction and instructional programs in physical education. Supervision of novice and experienced physical education teachers will be discussed.

KINS 8431 Curriculum Issues and Trends in Physical Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Identifies theoretical frameworks of curriculum development in relationship to current issues and trends.

KINS 8432 Advanced Teaching Techniques in Health and Physical Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Purpose of this course is to develop and apply skills and knowledge to effectively implement various instructional models in health and physical education.

KINS 8433 Advanced Methods in Secondary Physical Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Purpose of this course is to develop skills and knowledge necessary to effectively design, evaluate, and analyze secondary Physical Education. The course will additionally provide an overview of the various types of supervision skills one needs to evaluate secondary Physical Education.

KINS 8434 Advanced Methods in Elementary Physical Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Purpose of this course is to develop skills and knowledge necessary to effectively design, evaluate, and analyze elementary Physical Education. The course will additionally provide an overview of the various types of supervision skills one needs to evaluate elementary Physical Education.

LAST Latin American Studies

LAST 3090 Selected Topics in Latin America  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Provides the student with an opportunity to investigate an area relating to the geography, history, culture and/or civilization of Latin America.

LAST 3133 Latin American Politics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An examination of the major domestic and international factors in comparative Latin American political systems. Special attention and detail is given to the challenges of development and democratization.  
Cross Listing(s): POLS 3133.

LAST 3537 Colonial Latin America  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A political, social, and economic survey of Latin America from its pre-Columbia era to its struggles for independence.  
Cross Listing(s): HIST 3537, INTS 3537.

LAST 3538 Modern Latin America  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A political, social, and economic survey of Latin America from independence to the present.  
Cross Listing(s): HIST 3538, INTS 3538.

LAST 4135 Mesoamerican Archeology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An examination of the prehistoric cultures of Central America beginning with the Paleoindians and culminating with the Aztec and Maya. Materials covered include the art, iconography, architecture, religion, economy, social and political organization of the Olmec, Mixtec, Aztec, Toltec, Totenac, Maya, and Huastec Civilizations.  
Prerequisite(s): A minimum grade of "C" in ANTH 1102.  
Cross Listing(s): ANTH 4135.

LAST 4232 Geography of Latin America  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of the physical, cultural and economic geography of Latin America, including Mexico.  
Cross Listing(s): GEOG 4232.

LAST 4890 Seminar in Latin American Studies  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The Seminar in Latin American Studies, which must be taken as the final 3 hour course in the 15 hour block required for the minor in Latin American Studies, is designed to permit interdisciplinary engagement and individualized specialization so that the student can intensify his or her studies of Latin American topics disciplines other than the major.  
Prerequisite(s): Department approval.

LATN Latin

LATN 1001 Elementary Latin I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to the Latin language: pronunciation, fundamentals of grammar, reading, and translation.

LATN 1002 Elementary Latin II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Continued study of Latin grammar and syntax begun in Latin 1001, with further reading and translation.

LATN 1060 Accelerated Elementary Latin  
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.  
An accelerated introduction to the Latin language: pronunciation, fundamentals of grammar, reading, and translation.

LATN 2001 Intermediate Latin I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Beginning series of reading in Roman authors with emphasis on prose. Elements of grammar will also be reviewed. Discussion of Roman history and culture.  
Prerequisite(s): A minimum grade of "C" in LATN 1002.

LATN 2002 Intermediate Latin II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Continued reading of Roman authors with emphasis on poetry.  
Prerequisite(s): Minimum grade of "C" in LATN 2001.

LATN 2060 Accelerated Intermediate Latin  
6 Credit Hours. 6 Lecture Hours. 0 Lab Hours.  
Accelerated intermediate Latin with continued work on pronunciation, fundamentals of grammar, reading, and translation.  
Prerequisite(s): A minimum grade of "C" in LATN 1002 or LATN 1060.

LATN 3000 Readings In Latin I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Readings from the 2000 years of Latinity from Plautus to the recent encyclical.  
Prerequisite(s): Completion of LATN 2002.

LATN 3010 Readings In Latin II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Readings in Latin poetry and may include Horace, Catullus, Ovid, Propertius, and Tibullus.  
Prerequisite(s): Completion of LATN 3000.

LATN 3000 Readings In Latin I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Readings from the 2000 years of Latinity from Plautus to the recent encyclical.  
Prerequisite(s): Completion of LATN 2002.

LATN 3010 Readings In Latin II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Readings in Latin poetry and may include Horace, Catullus, Ovid, Propertius, and Tibullus.  
Prerequisite(s): Completion of LATN 3000.
LEAD 3020 Ovid
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Readings from the Metamorphoses with emphasis on familiar mythology and other selected works.
Prerequisite(s): Completion of LATN 2001.

LATN 3030 Selected Topics in Latin
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Study of a topic in Latin literature, culture, society, thought or language not included in the regular offering. May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in LATN 2002 or LATN 2060.

LATN 3131 Latin Authors
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Concentrated study of the works of one or more Latin authors. Themes in the literature will be studied with emphasis placed on the cultural and historical significance of the written work and its author. May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in LATN 2002 or LATN 2060.

LATN 3330 Roman Women
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Study of the role of women in the ancient Roman world. Emphasis on their influence within the political, economic, social, religious, and intellectual life of Rome. Examination of the Roman world through the eyes of ancient Roman women from different historical periods and social status.
Prerequisite(s): A minimum grade of "C" in LATN 2002 or LATN 2060.

LATN 3960 Latin Language/Culture In Rome
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Composition outside of class and travel to cultural sites.
Prerequisite(s): Completion of LATN 2001.

LATN 4010 Vergil
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Readings from the Aeneid with emphasis on Books II, IV, VI, and VIII, and other selected works.
Prerequisite(s): Completion of LATN 4010.

LATN 4890 Directed Study in Latin
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Concentrated study of a topic in Latin literature, culture, society, thought or language. May be repeated for credit provided a new topic is studied.
Prerequisite(s): A minimum grade of "C" in LATN 2002 or LATN 2060.

LEAD Leadership

LEAD 1000 Self-Leadership
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
Character is shaped by personal core values. Effective leaders understand their values and live and lead from those values. In this course, you will explore and develop your core values as you begin your leadership journey. Then, you will learn to rely on your core values to guide your decision-making as you develop your personal leadership style and your skills as a leader.

LEAD 1001 Intro To Leadership Studies
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
A concept based approach to the interdisciplinary field of leadership studies.

LEAD 2000 Collaborative Leadership
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
From a foundation of group dynamics, students will explore team roles, active followership, conflict resolution, and communication. The focal concept for the course will be team building and team leadership.

LEAD 2031 Principles of Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Principles of Leadership course will prepare students for leadership roles in the community and in their professions. The course will provide students with the knowledge, skills, and foundation in Leadership necessary to be effective in a variety of settings. Students will develop an understanding of the components that make leadership successful. Students will gain both the theoretical and practical skills necessary for success in both their personal and professional lives. It is intended for students who are interested in gaining a foundation in leadership studies and extended coursework in applied aspects of Leadership.
Prerequisite(s): A minimum grade of "C" in ENGL 1101 or WRIT 1101.

LEAD 2100 Rethinking Community Leadership
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
Students will learn to use a critical lens to familiarize themselves with social issues and concepts that influence their ability to facilitate, embrace, engage, and lead within community. Discussions will encompass the complex and often messy concept of community while identifying convictions that influence leadership and structure through an exploration of the larger concept of community engagement. Consideration of historical context and its influences on the lived experience of community will provide students the opportunity to wrestle with the complexity of social issues and how to effectively exercise leadership in the midst of such issues.

LEAD 3000 Community Leadership
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
Building on the foundations established in their studies of self and collaborative leadership, students will expand their understanding of leadership into the context leading change. Topics considered will include the role of reflection in leadership, the importance of understanding organizational culture in affecting change, and effective models & methods for leading and sustaining change.

LEAD 3500 Leadership in the Workplace
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
Students will become aware of and develop their emotional intelligence skill sets. Each participant will receive a personalized curriculum of activities to guide the practice and development of emotional intelligence. Topics considered will include self-perception, self-expression, development of empathy and social responsibility, decision making, and stress management. All students must participate in an internship experience at the time of the seminar and registration for the course is contingent on instructor approval.

LEAD 3900 ResEd Leadership Development
0 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
Students will learn about the three primary leadership skill areas for serving as an effective Community Leader: peer helping skills (active listening, mediation, conflict management), multicultural competence and building inclusive communities.

LEAD 4131 The Practice of Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines modern theoretical frameworks of leadership and helps students to develop practical competencies for use in navigating leadership opportunities and challenges. The cornerstone of the course will be a semester-long experiential project group in which students will combine their leadership learning and disciplinary expertise to address a leadership challenge in the local community with a focus on increasing their capacity to exercise leadership.
Prerequisite(s): A minimum grade of "C" in LEAD 2031.
LEAD 7100 Practical Research in Leadership Settings
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the concepts and methods of applied research necessary for professionals in leadership settings. Topics will include survey development, interviews, focus groups, experiments, ethnography, and content analysis. Students will construct a research question, review literature, analyze data, and present the results of their analysis. Cross Listing(s): COMM 7100.

LEAD 7150 Leadership in the Public Arena: From Ideas to Action
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examination of the leadership necessary to move from ideas to action on public issues. Course explores the unique role of the public sector in society and will compare leadership issues in public sector and private sector organizations.

LEAD 7300 Selected Topics in Leadership Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Reading, research, practice, and discussion devoted to selected topics in Leadership Studies. Topics may include leadership in literature, creativity and leadership, communication skills and strategic leadership, and leadership in team-based organizations. May be repeated for credit as topics change.

LEAD 7400 Contemporary Issues in Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course moves beyond the study of basic leadership styles and presents students with new and innovative theories to address challenging national and global issues. The class will analyze contemporary topics, discuss supporting and counter arguments, and identify solutions to critical and controversial topics.

LEAD 7700 Professional Communication and Leadership Internship
3 Credit Hours. 1-12 Lecture Hours. 1-12 Lab Hours.
Completion of a structured experiential learning program under the auspices of a site-based and program-approved protocol. Graded on an S or U basis.

LEAD 7800 Independent Study in Professional Communication and Leadership
3 Credit Hours. 1-12 Lecture Hours. 1-12 Lab Hours.
An in-depth, closely supervised, instructor-approved study in student’s area of concentration. Student must have skills in independent research and study.

LEAD 7900 Comprehensive Project in Professional Communication and Leadership
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Individually designed project or thesis involving applied research and/or off-campus study in an appropriate setting. Oral presentation of the project is required. The report must be approved to satisfy the requirement for the master’s degree. This option is recommended for those seeking to go on to doctoral work. Graded on an S or U basis. Completion of 24 hours of graduate course work required before enrollment.

LESP Learning Support

LESP 3090 Selected Topics in Learn Suppt
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.

LING Linguistics

LING 2090 Selected Topics in Writing and Linguistics
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Introduces students to one or more topics preliminary to study of more specialized areas of Writing and Linguistics. Cross Listing(s): WRIT 2090.

LING 2230 Introduction to Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A general introduction to the nature and structure of language and its role in society.

LING 2430 Essential Grammar for Successful Writing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Offers study and analysis of grammar, punctuation, and rules of writing used in both academics and the professions. Challenges students to understand the evolving and situational nature of language, and how its grammatical structures vary and change. Cross Listing(s): WRIT 2430.

LING 3030 Selected Topics in Linguistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Offers varied courses in specialized areas of the field of linguistics. Prerequisite(s): A minimum grade of "C" in ENGL 1102.

LING 3031 Phonology: Introduction to Sound Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth introduction to sounds and sound structures within formal grammar. Relation of basic units of sound structure to major components of linguistics including syntax, morphology, and semantics. Reading and discussion of trends in phonological theory and hands-on development of practical skills including IPA transcription, field techniques, and digital speech analysis. Prerequisite(s): A minimum grade of "C" in ENGL 1102.

LING 3032 Syntax: Introduction to Structures of Sentences
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A broad introduction to syntactic theory within historical and contemporary approaches to language and linguistic representation. Exploration of data from English and other languages as a systematic structure drawing on syntactic theories. Students learn to construct and evaluate hypotheses about how sentence structure work and build syntax models. Prerequisite(s): A minimum grade of "C" in ENGL 1102.

LING 3337 Language, Power, Politics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth investigation of the role of language in national and international power structures. Comparative evaluation of language in social organization of politics, economic policy and law as aggregated by race, culture, ethnicity, class, group ideology and gender. Emphasis on social policy management and minority/linguistic rights. Prerequisite(s): A minimum grade of "C" in ENGL 1102.

LING 3338 Language and Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A critical examination of language as a problem-solving device and tool for understanding argument and legal contestation. Delineation of individual rights, institutional authority and legal jurisdiction with emphasis on language and legal power. Analysis of the sociology of language and law within the concepts of human rights and socio-political entitlements. Prerequisite(s): A minimum grade of "C" in ENGL 1102. Cross Listing(s): POLS 3338.

LING 3430 Linguistics and Grammar for Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course aims to introduce the pedagogy of English grammar, and is grounded in real pedagogical examples. Through lecture, workshops, and projects about writing, students will develop strategies for teaching grammar and usage in order to effectively teach basic grammatical, mechanical, and usage concepts. Prerequisite(s): A minimum grade of "C" in ENGL 1102.

LING 3520 Revision, Grammar and Culture
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores theories of grammar and the recursive nature of writing; offers strategies for revision; surveys the social forces underlying the standardization of writing, including academic writing, and the processes of language change. Prerequisite(s): A minimum grade of "C" in ENGL 1101 and ENGL 1102.
LING 3533 Introduction to Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A general introduction to the nature and structure of language and its role in society.

LING 3534 Psychology of Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction focusing on the psychological mechanisms underlying the acquisition and use of language from cognitive and social psychological perspectives.
Prerequisite(s): A minimum grade of "C" in PSYC 1101 or LING 3533 or LING 3630.
Cross Listing(s): PSYC 3534.

LING 3630 Language and Linguistic Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Critical overview, examination and evaluation of influential theories in linguistics and their insight on language. Application of basic principles of linguistic theorizing to issues of language structure and understanding.
Prerequisite(s): A minimum grade of "C" in ENGL 1102.

LING 4230 Second Language Writing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to current pedagogical and research issues in second language (L2) writing development and instruction.
Prerequisite(s): A minimum grade of "C" in LING 3630.

LING 4231 Corpus Linguistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces the use of corpora and corpus tools for different types of linguistic analysis in the study of language and writing.
Prerequisite(s): A minimum grade of "C" in LING 3630.

LING 4333 Semantics: Introduction to Linguistic Meaning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on language analysis applied to practical problems of communication in contemporary society. Offers systematic examination of how meaning is encoded in words and sentences and how it is shaped by context.
Prerequisite(s): A minimum grade of "C" in ENGL 1102.
Cross Listing(s): COMS 4333.

LING 4430 Computer-Assisted Language Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course offers an introduction of computer-assisted language learning (CALL), and provides students with hands-on experience in pedagogical applications of computers, including using and evaluating software and internet resources.
Prerequisite(s): A minimum grade of "C" in LING 3630.

LING 4432 Language Assessment
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course identifies traditions and foundations of instruments and explores their dimensions in the assessment of English language learners and ESL/EFL students. It examines formal and informal assessment tools and practices that are used to support the learning of English language learners in various settings.
Prerequisite(s): A minimum grade of "C" in LING 3630.

LING 4790 Internship in Writing and Linguistics
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Open to juniors and above. Offered by special arrangement. Off-campus study, work and/or research, jointly supervised by sponsoring institution and staff member. Repeatable up to a maximum of six credit hours. Six hours credit requires twenty-five hours a week at sponsoring institution, 3 hours credit requires fifteen hours.
Prerequisite(s): A minimum grade of "C" in WRIT 3130 or WRIT 3220 or WRIT 3531 or LING 3620; 2.5 grade point average; supervisory staff member; recommendation of the department head.
Cross Listing(s): WRIT 4790.

LING 5030 Topics in Linguistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Seminar in topics of theoretical and applied linguistics. May be repeated for additional credit when topics change.
Prerequisite(s): A minimum grade of "C" in ENGL 1102.
Cross Listing(s): LING 5030G.

LING 5030G Topics in Linguistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Seminar in topics of theoretical and applied linguistics. May be repeated for additional credit when topics change.
Cross Listing(s): LING 5030.

LING 5130 Modern English Grammar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the system of rules of word formation and sentence construction that we unconsciously employ in our daily use of the English language.
Undergraduate
Prerequisite(s): A minimum grade of "C" in ENGL 1102.
Cross Listing(s): LING 5130G, WRIT 5130, WRIT 5130G.

LING 5130G Modern English Grammar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the system of rules of word formation and sentence construction that we unconsciously employ in our daily use of the English language.
Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): LING 5130, WRIT 5130, WRIT 5130G.

LING 5330G History of English Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the English language from linguistic, social, and historical perspectives. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Undergraduate Cross Listing(s): WRIT 5340, WRIT 5340G.

LING 5340 History of English Language
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the English language from linguistic, social, and historical perspectives.
Prerequisite(s): A minimum grade of "C" in ENGL 1102.
Cross Listing(s): LING 5330G, WRIT 5330, WRIT 5330G.

LING 5440 Early English Literature, Beginning-1485
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
English literature from its beginnings through 1485. Course includes study of medieval phonology, morphology, and syntax. Writers include the Beowulf poet and other Old English authors, early Middle English lyrics, and the major figures of the fourteenth century (the Pearl poet, Chaucer, Langland, Gower). In alternate years, course will be devoted to Chaucer and his context.
Prerequisite(s): ENGL 2100.
Cross Listing(s): LING 5440G.

LING 5440G Early English Lit, Beg-1485
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
English literature from its beginnings through 1485. Course includes study of medieval phonology, morphology, and syntax. Writers include the Beowulf poet and other Old English authors, early Middle English lyrics, and the major figures of the fourteenth century (the Pearl poet, Chaucer, Langland, Gower). In alternate years, course will be devoted to Chaucer and his context.
Cross Listing(s): ENGL 5440G.

LING 5465G Chaucer
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Chaucer's two masterpieces, The Canterbury Tales and Troilus and Criseyde, and minor poetry. Includes in-depth study of Chaucer's culture, context, and language.
LING 5530 Sociolinguistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The principles and methods used to study language as a sociocultural phenomenon. These are examined both from the linguistic viewpoint and the social scientific viewpoint.
Prerequisite(s): ANTH 1102 or SOCI 1101.
Cross Listing(s): LING 5530G, WRIT 5530, WRIT 5530G.

LING 5530G Sociolinguistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The principles and methods used to study language as a sociocultural phenomenon. These are examined both from the linguistic viewpoint and the social scientific viewpoint. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Cross Listing(s): LING 5530, WRIT 5530, WRIT 5530G.

LING 6131 Applied Phonology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to professional work with linguistic sounds in applied areas of language study such as Teaching English to Speakers of Other Languages (TESOL) and speech pathology.

LING 6133 Applied English Grammar
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of English grammar geared towards teachers of English to speakers of other languages and applied linguistics.

LING 6231 Language, Nation, and Globalization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to national and global language issues and linguistic globalization with special emphasis on the role of English for students in applied areas of language study including Teaching English to Speakers of Other Languages (TESOL).

LING 6233 Teaching English Internationally
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A course to prepare students to teach English in other countries.

LOGT 3231 Principles of Transportation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to the principles of transportation with emphasis on transportation modal and intermodal operations (rail, highway, air, water, and pipeline transportation) and transportation management. Consideration is given to the economic, social, political and international aspects of the transportation industry. The role of logistics information technology in modern global transportation systems is introduced via topics including electronic data interchange, global positioning systems, and intelligent transportation systems.
Prerequisite(s): A minimum grade of “C” in BUSA 3131.

LOGT 3232 Logistics and Supply Chain Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to and study of the fundamentals of logistics and supply chain management. Course coverage includes the flow of raw materials, work-in-process, and finished goods through the supply chain. Particular emphasis is given to the design of channels of distribution, management of inventory, evaluation of transportation alternatives, information flow, facility location, outsourcing and third-party relationships, and the rapidly expanding field of logistics information technology.
Prerequisite(s): A minimum grade of “C” in BUSA 3131 or STAT 2231.

LOGT 4030 Special Topics in Logistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that allows students to pursue further study in a specific logistics topic at the frontier of an area of research or a contemporary topic related to current real-world events.
Prerequisite(s): A minimum grade of “C” in LOGT 3231 and LOGT 3232.

LOGT 4033 Special Topics in Logistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to and study of the fundamentals of logistics and supply chain management. Course coverage includes the flow of raw materials, work-in-process, and finished goods through the supply chain. Particular emphasis is given to the design of channels of distribution, management of inventory, evaluation of transportation alternatives, information flow, facility location, outsourcing and third-party relationships, and the rapidly expanding field of logistics information technology.
Prerequisite(s): A minimum grade of “C” in BUSA 3131 or STAT 2231.

LOGT 4231 Logistics and Intermodal Transportation Operations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the design and management of supply chain operations in selected logistics settings. Particular emphasis is placed upon the areas of traffic management, carrier operations, carrier selection and contract negotiation, and warehousing. Each area is analyzed in terms of organizational differences, operational processes, variations in information needs, and performance control mechanisms.
Prerequisite(s): LOGT 3232.

LOGT 4232 International Logistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the many differences between domestic and international supply chain management activities and functions. Considerable emphasis is placed upon the importance of ocean shipping and air transportation and their impact on international trade and global trade patterns. Other topics covered include INCOTERMS (international commercial terms), the use of EDI (electronic data interchange) in international transactions, the management of ocean carriers, the import/export process, the role of international agents and forwarders, and international sourcing decisions.
Prerequisite(s): LOGT 3231.

LOGT 4233 Logistics Executive in Residence
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A capstone, integrative, case course in logistics and transportation strategy. Students participate in an Executive in Residence program that provides interaction with top-level logistics and transportation executives.
Prerequisite(s): A minimum grade of “C” in LOGT 4231 or LOGT 4232.

LOGT 4234 Analytical Tools in Logistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an examination of the principle analytical tools and methods used in logistics and transportation, including the application of analytical tools to strategic, tactical, and operational supply chain problems. Students will be required to demonstrate the ability to understand the fundamentals of the field and to stretch this understanding to comprehend the intricate processes needed by logistical and transportation managers.
Prerequisite(s): A minimum grade of “C” in LOGT 3231 and LOGT 3232.
Corequisite(s): LOGT 4231.

LOGT 4263 Seminar in Intermodal Distribution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course requires knowledge of a wide range of logistics terms and concepts. Students are required to read extensively from the current literature in the field and to demonstrate proficiency in sourcing intermodal information via electronic media. A major research project is an integral part of the course, involving the analysis of organizations and/or topics directly related to intermodal distribution.
Prerequisite(s): A minimum grade of “C” in all of the following: LOGT 3231 and LOGT 3232 and LOGT 4231 or LOGT 4232.

LOGT 4790 Internship in Logistics
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised work-study program in selected logistics and intermodal transportation companies. Students will be permitted to undertake internships only after review of academic qualifications and with firms per-approval by the faculty.
Prerequisite(s): LOGT 3231 or LOGT 3232.

LOGT 4830 Special Problems in Logistics
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A senior level course that allows LOGT majors to pursue an intensive study of a specific topic or emerging area of transportation and logistics to be developed by the instructor.
Prerequisite(s): LOGT 3231 and LOGT 3232.
LOGT 4890 Directed Study in Logistics and Intermodal Transportation
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Independent study and research in selected areas of Logistics and Intermodal Transportation under supervision of a member of the LOGT faculty.

LOGT 7432 Logistics Fundamentals and Strategy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Develops an understanding of logistics systems. The class will apply a managerial focus approach to integrating the numerous logistical activities in the supply chain including materials management, physical distribution, third party logistics, transportation, and other topics. The class will stress practical applications through a case approach and a logistics simulation.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

LOGT 9999 Dissertation
1-18 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A directed research project to develop the student's dissertation. This course will also serve as dissertation hours upon completion of the first three (3) hours. An additional 15 hours of LOGT 9999 is required at a minimum for the student to produce an acceptable dissertation.

LSCM Logistics Supply Chain Mg

LSCM 9030 Special Topics in Supply Chain Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores important Supply Chain Management topics or methodologies not covered to any significant extent in other courses. The topic(s) to be covered will be announced each time the course is offered.

LSCM 9131 Logistics Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Key topics and concepts of business logistics are surveyed through readings, discussions, critiques and presentations of established academic articles in logistics and supply chain management.

LSCM 9331 Analysis of Secondary Data for Supply Chain Management Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will introduce students to the process of utilizing secondary data sources in Supply Chain Management research. Topics include: primary differences between utilizing primary and secondary data sources for Supply Chain Management research; conceptualization of research models, including proxy variable formation; identification of potential data sources; manipulation of large datasets and a variety of methodological approaches commonly utilized with secondary data.

LSCM 9630 Supply Chain Management Theories
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to provide a survey of key supply chain related theories. Particular emphasis will be placed on understanding the scholarly foundations and perspectives of supply chain management theory and its application in supply chain research. Among the theories covered are Transaction Cost Economics, Resource Based View, Contingency Theory, Agency Theory, Social Exchange Theory, Social Network Theory, and Systems Theory.

LSCM 9631 Research Processes and Philosophies in Supply Chain Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Foundational and emerging supply management research topics will be reviewed, presented, discussed and critiqued. Scope will span the evolution of supply management and its role in the firm, and then moves into critical topics such as buyer-supplier relationships, sourcing strategies, and emerging topics.

LSCM 9632 Operations Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Current and emerging operations management research topics will be reviewed, presented, discussed and critiqued. In the process, students will be exposed to a number of seminal articles selected based on evidence of a novel approach to either domain knowledge and/or research methods. This course will help develop skill sets in conducting independent research, critiquing articles, developing new research ideas and implementing a research study ready to be submitted to a journal.

LSCM 9633 Research Trends in Logistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Trending and emerging topics in business logistics research are surveyed through readings, discussions, critiques and presentations of academic articles in logistics and supply chain management.

LSCM 9634 Supply Chain Management Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores conceptual frameworks and inter-organizational challenges studied in extant supply chain management literature. Frameworks covered will include those of the Global Supply Chain Forum, the Demand and Supply Integration Framework, the Supply Chain Operating Reference Model, the Value Chain. Representative Inter-organizational issues including collaboration, coordination, integration, risk, disruptions flexibility and resilience, technology adoption, sustainability, channel management, and the bull-whip effect.

LSCM 9635 Supply Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Foundational and emerging supply management research topics will be reviewed, presented, discussed and critiqued. Scope will span the evolution of supply management and its role in the firm, and then moves into critical topics such as buyer-supplier relationships, sourcing strategies, and emerging topics.

LSTD Legal Studies

LSTD 2106 Legal Environment of Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to give students a working knowledge of important legal concepts that affect the rights and responsibilities of American business persons and organizations. The course covers legal topics such as Constitutional law, torts, contracts, agency, and employment law matters. Students will develop an understanding and appreciation for the interrelationship between ethics, law, and business decision-making, as well as an understanding of the foundation of the legal system as it relates to business, including knowledge of the various court systems, phases of litigation, and alternative dispute resolution processes.
Prerequisite(s): A minimum grade of "C" in ENGL 1101 or WRIT 1101.

LSTD 3130 International Trade Regulation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents fundamentals of international trade operations, providing students with the experience of regulatory compliance while conducting the business of exporting.
LSTD 3230 Building Construction Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the legal concepts, statutes and regulations governing the building and construction industry, including the legal framework of contract law, construction financing, property rights zoning, lien, bonding, liability, competitive bidding, dispute resolution theories and relevant/current development of government regulation of the building construction industry.

LSTD 3630 White Collar Crime
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fraud-fighting professionals must understand the laws governing a fraud investigation as it moves through the U.S. legal system. This course examines the US criminal justice system along with its response to the escalating incidence of white-collar crime.
Prerequisite(s): Junior Status.

LSTD 4334 Employment Law and Legislative Compliance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the current issues in the work environment related to the job selection process, equal employment opportunity, and the rights of workers in the market.
Prerequisite(s): A minimum grade of "C" in MGMT 3130.
Cross Listing(s): MGMT 4334.

LSTD 4633 Forensic Interviews and Interrogations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the distinctions between interviews and interrogations and how each can be used in resolving criminal or civil allegations. Other topics to be explored include the verbal and nonverbal cues indicating truth or deception, preparation of interview memoranda, and obtaining and preparing legally-admissible admission statements.
Prerequisite(s): Completion of a minimum of 45 semester hours.

LSTD 4830 Special Problems in Legal Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that is under the direction of a faculty sponsor. The course is designed to offer students an opportunity to pursue studies at a level or on topics not covered in scheduled courses. The scope and nature of the material covered is determined in consultation with faculty sponsor.

LSTD 4890 Directed Study in Legal Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed for independent study and research in selected areas of legal studies under faculty supervision.

LSTD 6130 Legal Environment of Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Business operates in a domestic and global environment shaped by social and economic forces, made to operate on managers through government regulation and incentives. This course presents an introduction to those factors in the environment of business that shape and affirm American capitalism.

LSTD 7130 Legal and Ethical Issues in Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the legal and ethical rules which govern the managerial decision making process, particularly focusing on constitutional "Commerce Clause" interpretation, contract and agency principles, administrative agency regulations, and evolving ethical issues which influence the application of the law. The course is set in domestic law, but includes operational legal aspects of the international market place.
Prerequisite(s): A minimum grade of "C" in LSTD 2106 or LSTD 6130, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

LSTD 7230 Law and Ethics for Accountants
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to legal and ethical issues involving the Uniform Commercial Code and administrative agency regulations. Emphasis is on recognition of these issues to enhance professionalism for business administration.
Prerequisite(s): A minimum grade of "C" in LSTD 2106 or LSTD 6130, and admitted to the Masters of Accounting program, or permission of the School of Accountancy director.

LWSO 2000 Intro to Law and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Exposure to and readings in social and governmental issues focused on their interaction with the American legal system.
Prerequisite(s): A minimum grade of "C" in ANTH 1102, CRJU 1100, SOCI 1101, POLS 1150, or POLS 2100.

LWSO 3990 Special Topics in Law and Society
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics and issues not available in other courses. May be repeated as topic vary.

LWSO 4620 Internship
1-6 Credit Hours. 0-18 Lecture Hours. 0-18 Lab Hours.
Open to juniors or seniors. Field experience in a law firm or law-related agencies. Joint supervision by program coordinator and law firm or law-agency official.

MAED Math Education

MAED 7910L Topics in Elem Math Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

MATH Mathematics

MATH 0997 Support for Quantitative Reasoning
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This Learning Support course provides corequisite support in mathematics for students enrolled in MATH 1001 – Quantitative Reasoning. Topics will parallel topics being studied in MATH 1001 and the course will provide support for the essential quantitative skills needed to be successful in MATH 1001. Taken with MATH 1001, topics to be covered will include logic, basic probability, data analysis and modeling from data.
Corequisite(s): MATH 1001.

MATH 0998 Support for Mathematical Modeling
2 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
This Learning Support course provides corequisite support in mathematics for students enrolled in MATH 1101 – Introduction to Mathematical Modeling. Topics will parallel topics being studied in MATH 1101 and the course will provide support for essential quantitative skills needed to be successful in MATH 1101. Taken with MATH 1101, this course is an introduction to mathematical modeling using graphical, numerical, symbolic, and verbal techniques to describe and explore real-world data and phenomena. Emphasis is on the use of elementary functions to investigate and analyze applied problems and questions, supported by the use of appropriate technology, and on effective communication of quantitative concepts and results.
Corequisite(s): MATH 1101.
MATH 0999 Support for College Algebra
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This Learning Support course provides corequisite support in mathematics for students enrolled in MATH 1111 – College Algebra. Topics will parallel topics being studied in MATH 1111 and the course will provide support for the essential quantitative skills needed to be successful in MATH 1111.
Taken with MATH 1111, this course provides an in-depth study of the properties of algebraic, exponential and logarithmic functions as needed for calculus. Emphasis is on using algebraic and graphical techniques for solving problems involving, linear, quadratic, piece-wise defined, rational, polynomial, exponential and logarithmic functions.
Corequisite(s): MATH 1111.

MATH 1001 Quantitative Reasoning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Catalog Description: Emphasis on processing information via models by conducting assumption validity, applicability and suitability checks, executing appropriate calculations to do forecasts and arrive at logical decisions. Will rely on examples to illustrate use of mathematics in real world situations. This course is an alternative in Area A of the Core Curriculum and is not intended to supply sufficient algebraic background for students who intend to take precalculus or the calculus sequence for mathematics and science majors.
Prerequisite(s): A minimum grade of "C" in MATH 0999 or MATH 0977.

MATH 1001M Quant Skill & Reasoning by WC
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

MATH 1101 Introduction to Mathematical Modeling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Mathematical modeling using graphical, numerical, symbolic, and verbal techniques to describe and explore real-world data and phenomena. The investigation and analysis of applied problems and questions, and effective communication of quantitative concepts and results. Topics include linear, quadratic, polynomial, exponential and logarithmic models of real-world phenomena. Credit cannot be earned toward graduation for MATH 1111 if credit is earned for MATH 1101.
Prerequisite(s): Two years of high school algebra or equivalent.

MATH 1111 College Algebra
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an in-depth study of the properties of algebraic, exponential and logarithmic functions as needed for calculus. Emphasis is on using algebraic and graphical techniques for solving problems involving linear, quadratic, piece-wise defined, rational, polynomial, exponential, and logarithmic functions. Credit cannot be earned toward graduation for MATH 1111 if credit is earned for MATH 1101.
Prerequisite(s): Two years of high school algebra or equivalent.

MATH 1112 College Trigonometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an in-depth study of the properties of trigonometric functions and their inverses. Topics include circular functions, special angles, solutions of triangles, trigonometric identities and equations, graphs of trigonometric functions, inverse trigonometric functions and their graphs, Law of Sines, Law of Cosines, and vectors. Credit may not be received for both MATH 1112 and MATH 1113.
Prerequisite(s): A minimum grade of "C" in MATH 1111.

MATH 1113 Pre-Calculus Mathematics
3.4 Credit Hours. 3.4 Lecture Hours. 0 Lab Hours.
This course is an intensive study of the basic functions needed for the study of calculus. Topics include algebraic, functional, and graphical techniques for solving problems with algebraic, exponential, logarithmic, and trigonometric functions and their inverses. Credit cannot be earned toward graduation for MATH 1112 if credit is earned for MATH 1113.
Prerequisite(s): MATH 1111 with a minimum grade of "C".

MATH 1113M Pre-Calculus Math by WC
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Designed to prepare students for calculus, physics, and related technical subjects. Topics include an intensive study of algebraic, trigonometric, logarithmic, and exponential functions accompanied by analytical geometry.

MATH 1232 Survey of Calculus
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers the fundamental elements of differential and integral calculus of algebraic, logarithmic and exponential functions. Topics include a brief review of algebraic principles, limits, derivatives and integrals. Appropriate technology will be incorporated throughout the course.
Prerequisite(s): A minimum grade of "C" in MATH 1101 or MATH 1111 or MATH 1113 or MATH 1112.

MATH 1401 Intro to Statistics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course is a course in basic statistics. Topics include descriptive statistics, probability, distributions, hypothesis testing, inferences, correlation, and regression.
Prerequisite(s): STAT 2231 and a minimum grade of "C" in MATH 1101 or MATH 1111.

MATH 1441 Calculus I
4 Credit Hours. 0.4 Lecture Hours. 0.1 Lab Hours.
Functions and limits; the derivative and its applications, antidifferentiation; the definite integral and applications; exponential and logarithmic functions. Prerequisite(s): Completion of ENGL 1101 and a minimum grade of "C" in MATH 1112 or MATH 1113.

MATH 1501 Calculus I
4 Credit Hours. 0.4 Lecture Hours. 0.1 Lab Hours.
Topics to include functions, limits, continuity, the derivative, antiderivative, the definite integral, and applications. Prerequisite(s): MATH 1112 or MATH 1113.

MATH 2008 Foundations of Numbers and Operations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an Area F introductory course for early childhood education majors. This course will emphasize the understanding and use of the major concepts of numbers and operations. As a general theme, strategies of problem solving will be used and discussed in the context of various topics. This course is also part of the program of study for middle grade majors.
Prerequisite(s): A minimum grade of "C" in MATH 1111 or MATH 1101.

MATH 2100 Problem Solving for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will learn, integrate and apply a variety of problem solving strategies to a range of mathematical problems from algebra, pre-calculus, and calculus. Students will learn, integrate and apply appropriate technology as a tool in the problem solving process. Designed for early childhood and middle grade majors.
Prerequisite(s): A minimum grade of "C" in MATH 1112 and MATH 3032.

MATH 2130 Discrete Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Covers important discrete mathematical objects such as sets, relations and functions, graphs and trees. An introduction to mathematical logic and reasoning, and the concept of an algorithm and its complexity will be covered.
Prerequisite(s): Prior or concurrent enrollment in MATH 1232, or a minimum grade of "C" in MATH 1111 or MATH 1112 or MATH 1113 or MATH 1441 or MATH 2242.

MATH 2160 Linear Algebra
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Linear systems and matrices; vector spaces, linear independence, rank of a matrix; linear transformations; determinants; introduction to eigenvalues and eigenvectors; diagonalization; applications.
Prerequisite(s): A minimum grade of "C" in MATH 2242.
MATH 2242 Calculus II
4 Credit Hours. 4 Lecture Hours. 1 Lab Hour.
Techniques and applications of integration; transcendental functions; indeterminate forms; improper integrals; parametric equations and polar coordinates; sequences and series; Taylor’s theorem.
Prerequisite(s): a minimum grade of "C" in either MATH 1441 or MATH 1501.

MATH 2243 Calculus III
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Vectors, curves, and surfaces; partial differentiation; multiple integrals; curve integrals and surface integrals; the theorem of Green and Stokes; the Divergence Theorem; introduction to differential equations.
Prerequisite(s): A minimum grade of "C" in MATH 2242.

MATH 2332 Mathematical Structures
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics include mathematical logic, methods of proofs, induction, set theory, relations, and functions. The course is primarily intended for mathematics and mathematics education majors as a first course in studying proof techniques and foundations of mathematics.
Prerequisite(s): A minimum grade of "C" in MATH 2242.

MATH 2430 Computing Techniques
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamentals of numerical methods and development of programming techniques with implementation in the computer solution of problems in engineering.
Prerequisite(s): CSCI 1301 or ENGR 1731 or MATH 2242 or PHYS 2211K.
Corequisite(s): MATH 3230.

MATH 3032 Foundations of Data Analysis and Geometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of basic probability, statistics and geometry, including two and three dimensional shapes and triangle congruenced similarity. For Early Childhood and Middle Grade majors only.
Prerequisite(s): A minimum grade of "C" in MATH 2008.

MATH 3230 Ordinary Differential Equations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of differential equations involving functions of one variable. Topics include: linear and non-linear differential equations, initial value problems, existence and uniqueness theorems, systems of differential equations, stability, computational methods and Laplace transform methods.
Prerequisite(s): A minimum grade of "C" in MATH 2242.

MATH 3337 Probability
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to probability, random variables and discrete and continuous probability distributions for students in mathematics, engineering and the sciences including the social sciences and management science.
Prerequisite(s): A minimum grade of "C" in MATH 2242 or MATH 2242H.

MATH 3360 Modern Geometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An axiomatic approach to the fundamental ideas of Euclidean geometry, including congruence, similarities, circles, elementary transformations and constructions. An examination of non-Euclidean geometries.
Prerequisite(s): MATH 2332.

MATH 3932 Math Reasoning/Representations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A laboratory approach to the study of mathematics. Topics include methods of reasoning and proof; algebraic structures; conceptual consideration of functions; regression; recursion; proportional reasoning; analytic and transformational geometry; and rational, integer, and real number arithmetic.
Prerequisite(s): MATH 1441.

MATH 4000 Putnam Semina
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
a variety of mathematical problems, considered with the aim of developing problem solving techniques.
Prerequisite(s): MATH 2243.

MATH 4200 Actuarial Science Seminar
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
A study of topics related to a career in actuarial science.
Prerequisite(s): MATH 3337 and STAT 5390.

MATH 4400 Operations Research Seminar
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
A study of topics related to a career in operations research.
Prerequisite(s): MATH 5330.

MATH 4630 Game Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce students to the foundations of game theory and its applications. Students will use reasoning skills to deal with concepts of games, networks, economic development, and warfare.
Prerequisite(s): A minimum grade of "C" in MATH 2160 and MATH 2130 or MATH 2332.

MATH 4825 Honors Research
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Independent research under the guidance of a faculty member in the Department of Mathematical Sciences for mathematics majors in the University Honors Program. Students must complete four credit hours over two semesters to complete the honors requirements.
Prerequisite(s): Requires Junior status in Mathematics Program and good standing in the University Honors Program.

MATH 4890 Directed Study in Mathematics
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Directed study under faculty supervision. Well prepared math majors may be permitted to enroll in an independent study upon the recommendation of a Mathematics faculty member.
Prerequisite(s): Permission of instructor and Department Chair required.

MATH 4920 Undergraduate Seminar
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
A specialized study of various topics in mathematics with the intention to engage students in independent reading, writing and presentation of these topics under the supervision of mathematics faculty.
Prerequisite(s): A minimum grade of "C" in MATH 2332 and MATH 2243.

MATH 4929 Honors Thesis
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Written and oral presentation of results of research conducted in MATH 4825H (Honors Research). Honors thesis must follow the guidelines adopted by the University Honors Program. This course is required for mathematics majors in the University Honors Program.
Prerequisite(s): Junior level or above and good standing in the University Honors Program.

MATH 4930 Senior Research Project
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Main objective of this course is to engage senior undergraduate students in mathematical, statistical or computer science research and writing. Students will select advisors to work with on their projects. At least one oral presentation on the progress of their research during the semester is required. Also, a final written report on the project as well as a final oral presentation is required.
Prerequisite(s): Students must have at least 15 credit hours of upper level mathematics, statistics and/or computer science.

MATH 4961 Internship in Mathematics
3 Credit Hours. 0-1 Lecture Hours. 0-1 Lab Hours.
Experience in a variety of mathematical applications suited to the educational and professional aspirations of the student, under the direction of faculty and appropriate off-campus supervisory personnel. Open to transient students only with the permission of the department chair.
MATH 4962 Internship in Mathematics
3 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Experience in a variety of mathematical applications suited to the educational and professional aspirations of the student, under the direction of faculty and appropriate off-campus supervisory personnel. Open to transient students only with the permission of the department chair.

MATH 4963 Internship in Mathematics
3 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Experience in a variety of mathematical applications suited to the educational and professional aspirations of the student, under the direction of faculty and appropriate off-campus supervisory personnel. Open to transient students only with the permission of the department chair.

MATH 5090 Selected Topics in Mathematics
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
Specialized study in a selected area of Mathematics. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): Permission of instructor required.
Cross Listing(s): MATH 5090G.

MATH 5090G Selected Topics in Mathematics
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Specialized study in a selected area of Mathematics. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): Permission of instructor required.
Cross Listing(s): MATH 5090.

MATH 5130 Statistics and Probability for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of topics in statistics, such as sampling and data analysis, and probability, such as counting methods, odds, and expected value. For Early Childhood and Middle Grade majors only.
Prerequisite(s): A minimum grade of "C" in MATH 3032.
Cross Listing(s): MATH 5130G.

MATH 5130G Statistics and Probability for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of topics in statistics, such as sampling and data analysis, and probability, such as counting methods, odds, and expected value. For Early Childhood and Middle Grade majors only.
Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 3032.
Cross Listing(s): MATH 5130.

MATH 5135G Algebraic Connections for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of the study of geometry from MATH 3032. Focus will be on two and three dimensional geometry. Motion geometry and tessellations will also be covered. For Early Childhood and Middle Grade majors only.
Prerequisite(s): A minimum grade of "C" in MATH 3032.
Cross Listing(s): MATH 5135G.

MATH 5135G Algebraic Connections for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of the study of geometry from MATH 3032. Focus will be on two and three dimensional geometry. Motion geometry and tessellations will also be covered. For Early Childhood and Middle Grade majors only.
Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 3032.
Cross Listing(s): MATH 5135.

MATH 5136G History of Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the historical development of mathematics. The emphasis will be on mathematical concepts, problem solving, and pedagogy from a historical perspective.
Prerequisite(s): A minimum grade of "C" in MATH 2242.
Cross Listing(s): MATH 5136G.

MATH 5136G History of Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the historical development of mathematics. The emphasis will be on mathematical concepts, problem solving, and pedagogy from a historical perspective. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in MATH 2242.
Cross Listing(s): MATH 5136.

MATH 5137G Geometry for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of the study of geometry from MATH 3032. Focus will be on two and three dimensional geometry. Motion geometry and tessellations will also be covered. For Early Childhood and Middle Grade majors only.
Prerequisite(s): A minimum grade of "C" in MATH 3032.
Cross Listing(s): MATH 5137G.

MATH 5137G Geometry for K-8 Teachers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of the study of geometry from MATH 3032. Focus will be on two and three dimensional geometry. Motion geometry and tessellations will also be covered. For Early Childhood and Middle Grade majors only.
Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 3032.
Cross Listing(s): MATH 5137.

MATH 5230 Advanced Geometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics from Euclidean and Non-Euclidean Geometry. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in MATH 3130 or one year of teaching high school mathematics.
Cross Listing(s): MATH 5230G.

MATH 5230G Advanced Geometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics from Euclidean and Non-Euclidean Geometry. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in MATH 3130 or one year of teaching high school mathematics.
Cross Listing(s): MATH 5230.

MATH 5234 Number Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the principal ideas of elementary number theory: Divisibility, congruencies, linear Diophantine Equations, Fermat's Theorem, Euler's Theorem, Pythagorean triples and the distribution of primes. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in MATH 2332.
Cross Listing(s): MATH 5234G.
MATH 5234G Number Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the principal ideas of elementary number theory: Divisibility, congruencies, linear Diophantine Equations, Fermat’s Theorem, Euler’s Theorem, Pythagorean triples and the distribution of primes. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Prerequisite(s): A minimum grade of "C" in MATH 2332. Cross Listing(s): MATH 5234.

MATH 5236 Patterns of Problem Solving
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of patterns involved in solving problems. Particular attention is paid to Polya's heuristics and his characterization of the problem solving process. The student will also solve many problems. The application of these techniques by mathematics teachers will be stressed. Prerequisite(s): A minimum grade of "C" in MATH 1441 or permission of instructor. Cross Listing(s): MATH 5236G.

MATH 5236G Patterns of Problem Solving
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of the study of geometry from MATH 3032. Focus will be on two and three dimensional geometry. Moton geometry and tessellations will also be covered. For Early Childhood and Middle Grade majors only. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Prerequisite(s): A minimum grade of "C" in MATH 1441, or permission of instructor. Cross Listing(s): MATH 5236.

MATH 5251 Combinatorics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Counting principles such as permutations, combinations, derangements, pigeonhole, and inclusion/exclusion; partitions; generating functions: recurrence relations; applications from graph theory and applied algebra. Prerequisite(s): MATH 2332. Cross Listing(s): MATH 5251G.

MATH 5251G Combinatorics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Counting principles such as permutations, combinations, derangements, pigeonhole, and inclusion/exclusion; partitions; generating functions: recurrence relations; applications from graph theory and applied algebra. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Prerequisite(s): A minimum grade of "C" in MATH 2332. Cross Listing(s): MATH 5251.

MATH 5330 Operations Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to basic deterministic and probabilistic operations research models of decision problems. Mathematical methods of optimization for these models will be analyzed both analytically and numerically. Prerequisite(s): A minimum grade of "C" in MATH 3337. Cross Listing(s): MATH 5330G.

MATH 5330G Operations Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to basic deterministic and probabilistic operations research models of decision problems. Mathematical methods of optimization for these models will be analyzed both analytically and numerically. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Prerequisite(s): A minimum grade of "C" in MATH 2160 and MATH 3337. Cross Listing(s): MATH 5330.

MATH 5331 Analysis I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides a transition from calculus to real analysis. Emphasis will be placed on understanding and constructing mathematical proofs. Rigorous development of fundamental concepts in analysis, including topics such as relations, functions, limits of functions, cardinality, topology of the reals, completeness axiom, compact sets, sequences, subsequences, continuity and differentiability. Prerequisite(s): A minimum grade of "C" in MATH 2243 and a minimum grade of "C" in MATH 2332. Cross Listing(s): MATH 5331G.

MATH 5331G Analysis I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of Analysis I, including topics such as Riemann integration, infinite series, sequences and series of functions, metric spaces, and normed spaces. Prerequisite(s): A minimum grade of "C" in MATH 5331. Cross Listing(s): MATH 5331.

MATH 5332 Analysis II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of Analysis I, including topics such as Riemann integration, infinite series, sequences and series of functions, metric spaces, and normed spaces. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Prerequisite(s): A minimum grade of "C" in MATH 5331 or MATH 5331G. Cross Listing(s): MATH 5332.

MATH 5333 Modern Algebra I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to the fundamental algebraic structures: groups, rings and fields. Topics covered include: binary operations, groups (permutation groups, subgroups, cyclic groups, group homomorphisms, factor groups), rings (integral domains, ring homomorphisms) and fields. The historical and mathematical connections to the secondary mathematics curriculum will be incorporated as appropriate. Prerequisite(s): A minimum grade of "C" in MATH 2332. Cross Listing(s): MATH 5333G.

MATH 5333G Modern Algebra I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to the fundamental algebraic structures: groups, rings and fields. Topics covered include: binary operations, groups (permutation groups, subgroups, cyclic groups, group homomorphisms, factor groups), rings (integral domains, ring homomorphisms) and fields. The historical and mathematical connections to the secondary mathematics curriculum will be incorporated as appropriate. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. Prerequisite(s): A minimum grade of "C" in MATH 2332. Cross Listing(s): MATH 5333.
MATH 5334 Modern Algebra II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A continuation of the study of the fundamental algebraic structures. Topics to be covered include: isomorphism of groups, rings, fields, a deeper study of quotient structures and the isomorphism theorems, field of quotients, factorization of polynomials over a field, arithmetic properties of rings of polynomials over fields, extension fields, algebraic extensions, geometric constructions and the classic problems.
Prerequisite(s): A minimum grade of "C" in MATH 5333.
Cross Listing(s): MATH 5334G.

MATH 5335 Intermediate Linear Algebra
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
General vector spaces and bases, linear operators, least squares problems, eigenvalue problems, and applications of these concepts.
Prerequisite(s): A minimum grade of "C" in MATH 2160 and MATH 2332.
Cross Listing(s): MATH 5335G.

MATH 5336 Applied Numerical Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to scientific computation. Solutions of linear and nonlinear equations, polynomial interpolation, numerical differentiation and integration, data fitting, and other numerical methods.
Prerequisite(s): A minimum grade of "C" in MATH 2160 and prior knowledge of a programming language.
Cross Listing(s): MATH 5336G.

MATH 5337 Difference Equations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to the theory and applications of difference equations. Topics include the difference calculus, first order linear difference equations, results and solutions of linear equations, applications, equations with variable coefficients and nonlinear equations that can be linearized.
Prerequisite(s): A minimum grade of "C" in MATH 2242 or MATH 2160.
Cross Listing(s): MATH 5337G.

MATH 5338 Methods of Applied Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Methods of applied mathematics concentrating on techniques for the analysis of differential and integral equations. Topics include: Integral equations, differential operators, Fredholm alternative, distribution theory and Green's function methods.
Prerequisite(s): A minimum grade of "C" in MATH 3230.
Cross Listing(s): MATH 5338G.

MATH 5339 Partial Differential Equations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of differential equations involving functions of more than one variable. Topics include: Laplace, heat and wave equations, boundary value problems, methods of separation of variables and eigenfunction expansions, Fourier series, Green's functions, maximum principle and computational methods.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and MATH 3230.
Cross Listing(s): MATH 5339G.

MATH 5339G Partial Differential Equations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study of differential equations involving functions of more than one variable. Topics include: Laplace, heat and wave equations, boundary value problems, methods of separation of variables and eigenfunction expansions, Fourier series, Green's functions, maximum principle and computational methods. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and MATH 3230.
Cross Listing(s): MATH 5339G.
MATH 5412 Secondary School Curriculum and Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Material and methods of teaching secondary school mathematics including field experience.
Prerequisite(s): A minimum grade of "C" in MATH 3932.
Cross Listing(s): MATH 5412G.

MATH 5412G Sec School Curr and Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Material and methods of teaching secondary school mathematics including field experience.

MATH 5430 Introduction to Mathematical Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to applications of mathematics to various biological, ecological, physiological, and medical problems, which will be analyzed both analytically and numerically.
Prerequisite(s): A minimum grade of "C" in MATH 3230.
Cross Listing(s): MATH 5430G.

MATH 5430G Introduction to Mathematical Biology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to applications of mathematics to various biological, ecological, physiological, and medical problems, which will be analyzed both analytically and numerically. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 3230.
Cross Listing(s): MATH 5430.

MATH 5431 Graph Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Graphs and digraphs, trees, connectivity, matchings, paths, cycles, bipartite graphs, Euler's formula, planar graphs, and graph coloring.
Prerequisite(s): A minimum grade of "C" in MATH 2332.
Cross Listing(s): MATH 5431G.

MATH 5431G Graph Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Graphs and digraphs, trees, connectivity, matchings, paths, cycles, bipartite graphs, Euler's formula, planar graphs, and graph coloring. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisites: minimum grade of "C" in MATH 2332.

MATH 5433 Differential Geometry of Curves and Surfaces
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Differential geometry uses tools from calculus and linear algebra to study the geometric properties of smooth curves and surfaces in Euclidean spaces. Topics include: arc length surface area, geodesics, curvature, first and second fundamental forms, Gauss-Bonnet formula.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and MATH 2160.
Cross Listing(s): MATH 5433G.

MATH 5433G Differential Geometry of Curves and Surfaces
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Differential geometry uses tools from calculus and linear algebra to study the geometric properties of smooth curves and surfaces in Euclidean spaces. Topics include: arc length surface area, geodesics, curvature, first and second fundamental forms, Gauss-Bonnet formula. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and MATH 2160.

MATH 5434 Functions of a Complex Variable
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in complex variables including functions, limits, derivatives, integrals, the Cauchy-Riemann conditions, series representation of functions, Cauchy Integral formula, and elementary conformal mappings.
Prerequisite(s): A minimum grade of "C" in MATH 2332.
Cross Listing(s): MATH 5434G.

MATH 5434G Functions of a Complex Variable
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics in complex variables including functions, limits, derivatives, integrals, the Cauchy-Riemann conditions, series representation of functions, Cauchy Integral formula, and elementary conformal mappings. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite: A minimum grade of "C" in MATH 2332.
Cross Listing(s): MATH 5434.

MATH 5435 Introduction to Topology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to metric spaces, topological spaces, connectedness and compactness of topological spaces, and continuous functions on topological spaces.
Prerequisite(s): A minimum grade of "C" in MATH 2332.
Cross Listing(s): MATH 5435G.

MATH 5435G Introduction to Topology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction to metric spaces, topological spaces, connectedness and compactness of topological spaces, and continuous functions on topological spaces. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2332.
Cross Listing(s): MATH 5435.

MATH 5436 Introduction to Fractals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in MATH 5331.
Cross Listing(s): MATH 5436G.

MATH 5436G Introduction to Fractals
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fractals as nonlinear systems involving feedback and iteration. Classical fractals, limits and self-similarity. Fractal dimensions. Encoding of fractals. Decoding of fractals. Iterated function systems. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 5331 or MATH 5331G.
Cross Listing(s): MATH 5436.

MATH 5437 Mathematics and Computation of Curves and Surfaces
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics include: recursion, smoothness, surfaces over Euclidean spaces. This course is a study of the mathematical and computational techniques used for the computer generation of curves and surfaces. The primary representations for the curves and surfaces are univariate and multivariate polynomials and splines in the Bernstein/Bezier and B-spline bases. These curves and surfaces are used for data fitting (interpolation and smoothing) and approximation. Topics include: recursion, smoothness, surfaces over grids, surfaces over triangulations, simplex and box splines, variational curves and surfaces, transformations and projections.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and MATH 2160.
Cross Listing(s): MATH 5437G.
MATH 5437G Mathematics and Computation of Curves and Surfaces
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a study of the mathematical and computational techniques used for the computer generation of curves and surfaces. The primary representations for the curves and surfaces are univariate and multivariate polynomials and splines in the Bernstein/Bezier and B-spline bases. These curves and surfaces are used for data fitting (interpolation and smoothing) and approximation. Topics include: recursion, smoothness, surfaces over grids, surfaces over triangulations, simplex and box splines, variational curves and surfaces, transformations and projections. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2243 and MATH 2160. Cross Listing(s): MATH 5437.

MATH 5480 Optimization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Operations research topics including nonlinear programming, network analysis, Markov chains, game theory, and inventory theory.
Prerequisite(s): MATH 2160. Cross Listing(s): MATH 5480G.

MATH 5480G Optimization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Operations research topics including nonlinear programming, network analysis, Markov chains, game theory, and inventory theory. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2160. Cross Listing(s): MATH 5480.

MATH 5530 Mathematics for Scientists and Engineers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of mathematical topics useful in the study of areas of applied sciences such as physics, engineering and computer science. Topics include: linear algebra and matrices, ordinary differential equations, partial differential equations, Fourier series, vector calculus, complex variables, numerical methods, probability and graph theory. For non-math majors only.
Prerequisite(s): A minimum grade of "C" in MATH 2242. Cross Listing(s): MATH 5530G.

MATH 5530G Mathematics for Scientists and Engineers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of mathematical topics useful in the study of areas of applied sciences such as physics, engineering and computer science. Topics include: linear algebra and matrices, ordinary differential equations, partial differential equations, Fourier series, vector calculus, complex variables, numerical methods, probability and graph theory. For non-math majors only. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2242. Cross Listing(s): MATH 5530.

MATH 5539 Mathematical Models
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to a variety of mathematical tools used for solving real world problems, with the focus on identifying the problem, constructing an appropriate model, and finding the best available method to solve it. Graduate students will complete assignments beyond the scope of the undergraduate requirements. These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor.
Prerequisite(s): A minimum grade of "C" in MATH 2160 and MATH 3230. Cross Listing(s): MATH 5539.

MATH 6230 Fundamental Ideas of Calculus
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A review of the principal ideas of calculus, with emphases on concepts. Intended for Mathematics Education majors.
Prerequisite(s): A minimum grade of "C" in MATH 1441; permission of instructor.

MATH 6900 Special Topics in Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in mathematics.

MATH 6910 Topics in Analysis
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Specialized study in a selected area of Applied Mathematics.
Prerequisite(s): Permission of instructor.

MATH 7130 Mathematical Optimization Theory
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course covers fundamentals of mathematical optimization theory. Topics include: elements of convex analysis, first and second order necessary and sufficient optimality conditions for unconstrained and constrained optimization problems, Lagrange multiplier theory, Lagrange duality theory, and an overview of important optimization techniques for convex, conic, semidefinite and complementarity problems.
Prerequisite(s): A minimum grade of "C" in MATH 5331.

MATH 7132 Methods of Optimization
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The first part of the course provides a brief introduction to the foundations of optimization, including optimality conditions. The second part concentrates on selected methods for unconstrained and constrained optimization problems. These include but are not limited to: line search methods, gradient methods, Newton-type methods, trust region methods, non-gradient methods, penalty and barrier methods, interior-point methods, methods of feasible directions and dual methods. Selected methods will be implemented on the computer. Prior completion of MATH 5330 is recommended.
Prerequisite(s): A minimum grade of "C" in MATH 5331.

MATH 7135 Quant Meth Decision Making
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Intermediate level linear models concentrating on multiple regression, linear programming techniques, queuing theory, and simulation.
MATH 7231 Advanced Numerical Analysis I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An in-depth study of computer arithmetic, the solution of non-linear equations, the solution of systems of linear equations, eigenvalue problems and interpolation. Algorithms and methods are developed and then implemented on a computer.  
Prerequisite(s): A minimum grade of "C" in MATH 5336 or MATH 5336G.  

MATH 7232 Advanced Numerical Analysis II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An in-depth study of orthogonal polynomials, numerical integration, and numerical solutions of ordinary and partial differential equations. Development and computer implementation of algorithms and methods.  
Prerequisite(s): A minimum grade of "C" in MATH 7231.  

MATH 7234 Advanced Linear Algebra  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The study of linear maps on finite dimensional vector spaces. Topics include: diagonalization (direct sums, invariant subspaces and Cayley-Hamilton theorem for linear operators), inner product spaces (self-adjoint, orthogonal operators, orthogonal projections and the spectral theorem, bilinear and quadratic forms), canonical forms (Jordan and rational forms, minimal polynomials), special matrices (non-negative matrices), and the exponential of a linear operator.  
Prerequisite(s): A minimum grade of "C" in MATH 5335.  

MATH 7235 Analytic Number Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of topics from the classical analytic theory of numbers. Topics will be chosen from arithmetic functions, the distribution of primes, congruences, the Riemann-zeta functions, the prime number theorem, Eisenstein series, quadratic residues, Dirichlet series, Euler products, the Dedekind eta function, the Jacobi theta functions, integer partitions, and modular forms.  
Prerequisite(s): A minimum grade of "C" in MATH 5234 and MATH 5434.  

MATH 7236 Advanced Ordinary Differential Equations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The theory of ordinary differential equations and dynamical systems. Topics include: Sturm-Liouville boundary value problems, eigenfunction expansions, Lyapunov stability, limit cycles, Poincare Bendixon theorem, Floquet's theory and Invariance theorems.  
Prerequisite(s): A minimum grade of "C" in MATH 3230.  

MATH 7237 Mathematical Control Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
State-space techniques from modern control system theory. Topics include realization theory for MIMO systems, state-space techniques for feedback control, closed loop observer design, and state-space techniques in optimal control.  
Prerequisite(s): A minimum grade of "C" in MATH 3230 and MATH 5336G.  

MATH 7238 Functional Analysis  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The study of normed linear spaces and linear operators. Topics include: Hilbert spaces (projection theorem, Riesz representation, Parseval relation), Banach spaces (convexity, duality, bounded and compact operators, theorems of Hahn-Banach, Banach-Steinhaus, open mapping, closed graph, Fredholm alternative); Stone-Weierstrass and Banach fixed point theorems.  
Prerequisite(s): A minimum grade of "C" in MATH 5332 and MATH 5335.  

MATH 7331 Real Analysis  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Theory of Lebesgue measure and integration, monotone convergence, the dominated convergence theorem, Fubini's Theorem, Radon-Nikodym theorem, Riesz representation theorem, Lp and lp spaces, functions of finite variation, Stieltjes integral, absolute continuity.  
Prerequisite(s): A minimum grade of "C" in MATH 5331.  

MATH 7332 Advanced Partial Differential Equations  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Prerequisite(s): A minimum grade of "C" in MATH 5339 or MATH 5339G.  

MATH 7333 Complex Analysis  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An in-depth study of functions of one complex variable. Topics include: properties of holomorphic, harmonic, meromorphic and entire functions (open mapping, maximum modulus, mean value, Poisson's, Rouche's, Liouville's, Picard's and Mittag-Leffler's theorems), residue theory (residue theorem, argument principle and applications), conformal mappings (Mobius and Christoffel-Schwarz canonical transformations, Riemann mapping theorem), analytic continuation (monodromy theorem, Schwarz reflection principle, Riemann surfaces and multi-valued functions).  
Prerequisite(s): A minimum grade of "C" in MATH 5331 and MATH 5434.  

MATH 7334 Approximation Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The study of the approximation of functions in normed linear spaces. The course emphasizes the theory of interpolation and approximation by polynomials, rational functions and spline functions. Main topics include: best approximation, order of approximation, interpolation, existence and uniqueness of best approximants, theorems by Weierstrass, Haar, Chebyshev, Bernstein, Markov, Korovkin, Schoenberg, and applications.  
Prerequisite(s): A minimum grade of "C" in MATH 5331 and MATH 5335.  

MATH 7430 Abstract Algebra I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course provides a comprehensive study of group theory. The course begins with basic concepts of group theory (binary structures, subgroups, homomorphisms) and continues with the study of normal subgroups, quotient groups and the isomorphism theorems. Further topics to be studied include group actions, Sylow's theorems and the structure of finitely generated abelian groups.  
Prerequisite(s): A minimum grade of "C" in MATH 5333 or MATH 5333G.  

MATH 7431 Abstract Algebra II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
The study of the topology of geometric objects from the algebraic viewpoint, in particular using homotopy and homology groups. Main topics: Topological manifolds, homotopy, fundamental group, free groups, covering spaces, and homology.  
Prerequisite(s): A minimum grade of "C" in MATH 5435.
MATH 7530 Problem Solving
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of patterns involved in solving problems. Particular attention is paid to Poly's heuristics and his characterization of the problem-solving process. The application of these techniques by mathematics teachers will be stressed.

MATH 7610 Graduate Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Under supervision of one or more faculty members, each student will choose topics related to his or her concentration, or topics of interest to the class, read and research on them, then make presentations in front of the class or a larger audience. Students will also attend presentations of internal and external speakers on mathematical sciences.

Prerequisite(s): A minimum grade of "C" in MATH 5332 or MATH 5335 or STAT 5531 or MATH 7231.

MATH 7890 Directed Study in Mathematics
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Directed study under faculty supervision.

Prerequisite(s): Permission of instructor and Department Chair required.

MATH 7985 Research
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Graduate students will conduct a program of independent research under the direction of a thesis advisor or an advisory committee on a topic in Mathematical Sciences. Results of the research will be presented as a thesis in partial fulfillment of the requirement of the Master of Science degree.

MATH 7900 Special Topics in Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Selected topics in mathematics.

MATH 7999 Thesis
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Results of independent research conducted under the direction of a thesis advisor will be presented as a thesis in partial fulfillment of the Master of Science degree. The thesis will be defended before an advisory committee.

MATH 8540 Fundamentals of Probability
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of fundamental ideas of probability with emphasis on topics, examples, and applications for secondary mathematics teachers.

MATH 8570 Transformation Geometry
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Algebraic operations on the complex numbers and their corresponding geometric interpretations; a characterization of isometries of the complex plane as translations, rotations, reflections and glide reflections; a study of isometries as groups; similarities; some classic theorems.

MATH 8580 Calculus First Three Dimension
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of the basic notions of differential and integral calculus for functions in dimensions one, two, and three, presented for students with previous courses in calculus with emphasis on concepts, applications, problem solving and historical development.

MEDT Medical Tech

MEDT 2000 Directed Study
1-3 Credit Hours. 0-18 Lecture Hours. 0-18 Lab Hours.
Selected medical technology topics. Credit varies by topic and workload. Offered on demand.

MEDT 3001L Intor to Medical Lab Meth Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

MEDT 3000 Urinalysis and Body Fluids
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Open only to medical technology majors. Qualitative and quantitative study of the physical and microscopic constituents of urine and other body fluids. Includes practice of manual and automated procedures and their relationship to diagnosing disease.

Corequisite(s): MEDT 3100L.

MEDT 3100L Urinalysis/Body Fluids Lab
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.

Corequisite(s): MEDT 3100.

MEDT 3110 Urinalysis and Body Fluids
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Qualitative and quantitative study of the physical and microscopic constituents of urine and other body fluids.

MEDT 3200 Clinical Bacteriology
5 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
The relationship of bacteria, mycobacteria, spirochaetes, and mycoplasmas to human disease with an emphasis on the isolation and identification of pathogenic bacteria. Open only to medical technology majors.

Corequisite(s): MEDT 3200L.

MEDT 3200L Clinical Bacteriology Lab
0 Credit Hours. 0 Lecture Hours. 4 Lab Hours.

Corequisite(s): MEDT 3200.

MEDT 3210 Clinical Bacteriology
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.

MEDT 3300 Clin Hematology & Hemostasis
5 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Study of pathology and physiology of the formed elements of blood with an emphasis on clinical correlation. Study of the principles of hemostasis and blood coagulation including interpretation of results. Manual and automated laboratory procedures are performed based on principles of hematology and hemoostasis.

Corequisite(s): MEDT 3300L.

MEDT 3300L Clin Hematology Lab
0 Credit Hours. 0 Lecture Hours. 4 Lab Hours.

Corequisite(s): MEDT 3300.

MEDT 3310 Clin. Hematology & Hemostasis
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Study of pathology and physiology of the formed elements of blood with an emphasis on clinical correlation. Study of the principles of hemostasis and blood coagulation including interpretation of results.

MEDT 3400 Clinical Immunohematology
5 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Basic immunohematologic principles and their application to the preparation and administration of whole blood and blood components including the selection and processing of donors, cross matching procedures, and antibody identification. Open only to medical technology majors.

Corequisite(s): MEDT 3400L.

MEDT 3400L Clinical Immunohematology Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

Corequisite(s): MEDT 3400.

MEDT 3410 Clinical Immunohematology
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Basic immunohematologic principles and their application to the preparation and administration of whole blood and blood components. Includes the selection and processing of donors, cross matching procedures, and antibody identification.
MEDT 3500 Clinical Chemistry
5 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Open only to medical technology majors. Focus on physiological principles and concepts, methodologies and clinical significance of biochemicals and elements found in the blood and other body fluids. Manual and automated laboratory procedures are performed with an emphasis on quality control and quality assurance. Clinical chemistry case studies are presented to aid in clinical correlation and problem solving.
Corequisite(s): MEDT 3500L.

MEDT 3500L Clinical Chemistry Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

MEDT 3510 Clinical Chemistry
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Focus on physiological principals and concepts, methodologies and clinical significance of biochemicals and elements found in body fluids and other body fluids. Clinical chemistry case studies are presented to aid in clinical correlation and problem solving.

MEDT 3600 Clinical Lab Meth & Molec Dgn
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A basic introduction to the clinical laboratory focusing on topics in laboratory safety, microscopy, phlebotomy, general laboratory equipment, quality assurance, laboratory mathematics, and principles and methodologies of clinical laboratory instrumentation. This course will also familiarize students with the basics of molecular diagnostic technology and the types of test available.
Corequisite(s): MEDT 3600L.

MEDT 3600L Clinical Lab Methodologies Lab
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
Corequisite(s): MEDT 3600.

MEDT 3610 Clinical Lab Meth & Molec Dgn
2 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Principles and operation of clinical laboratory instrumentation. This course will also familiarize students with the basics of molecular diagnostics technology and the types of test available.

MEDT 3700 Clinical Immunology
3 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Principles and procedures used in the isolation, identification, and quantification of diagnostically significant antigens and antibodies. Includes laboratory component.
Corequisite(s): MEDT 3700L.

MEDT 3700L Clinical Immunoserology Lab
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
Corequisite(s): MEDT 3700.

MEDT 3710 Clinical Immunology
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Principles and procedures used in the isolation, identification and quantitation of diagnostically significant antigens and antibodies.

MEDT 3800 Clinical Microbiology
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Pathogenesis, life cycles, and laboratory identification of human parasites. Open only to medical technology majors.
Corequisite(s): MEDT 3800L.

MEDT 3800L Clinical Microbiology Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
Corequisite(s): MEDT 3800.

MEDT 3810 Clinical Microbiology
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Only open to medical technology majors. Pathogenesis and laboratory identification of human parasites and clinically significant fungi and viruses.

MEDT 3810L Clinical Microbiology Lab
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MEDT 4115 Clinical Practicum
1-9 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Structured clinical laboratory experiences. Rotations will include clinical microbiology, clinical chemistry, immunohematology, hematology, coagulation, immunology/serology, urinalysis, phlebotomy, and molecular diagnostic testing.
Prerequisite(s): A minimum grade of "C" in MEDT 3100 and MEDT 3200 and MEDT 3300 and MEDT 3400 and MEDT 3500 and MEDT 3600 and MEDT 3700 and MEDT 3800.

MEDT 4600 Clinical Path and Crit Dec Mak
5 Credit Hours. 5 Lecture Hours. 0 Lab Hours.
Advanced level topics in clinical laboratory science, emphasizing analysis and presentation of multi-disciplinary case studies.
Prerequisite(s): A minimum grade of "C" in MEDT 4115.

MEDT 4810 Special Topics Practicum
1 Credit Hour. 0 Lecture Hours. 1 Lab Hour.
Structured experiences in alternate clinical sites. Settings may include doctors, reference, and clinic laboratories.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in all of the following: MEDT 3100 and MEDT 3200 and MEDT 3300 and MEDT 3400 and MEDT 3600 and MEDT 3700 and MEDT 3800.

MEDT 4900 Laboratory Mgmt and Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Fundamental concepts of laboratory management, operation, finance, managerial leadership, personnel administration, and educational principles for laboratory scientists.
Prerequisite(s): A minimum grade of "C" in MEDT 4115.

MENG Mechanical Engineering

MENG 1310 Manufacturing Processes Lab
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
This course covers hands on introduction to various manufacturing, machining and fabrication processes including welding, thread cutting, and machining using lathe and mill.
Prerequisite(s): Mechanical or Manufacturing Engineering major or permission of department.

MENG 2110 Mechanical Engineering Case Studies in Design & Analysis
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
The course includes fundamental techniques for creating, analyzing, synthesizing, and implementing design solutions to open-ended problems through team and individual efforts utilizing flexibility, adaptability, and creativity.
Prerequisite(s): A minimum grade of "C" in ENGR 1133.

MENG 2139 Numerical Methods in Engineering
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Mathematical modeling and numerical solution of engineering related problems with emphasis on solution of linear and nonlinear equations, matrices, vectors, statistical data analysis, curve fitting, ordinary and partial differential equations. Prerequisite(s): Completion of MATH 2242 with a minimum grade of "C" and completion of ENGR 1121 or ENGR 1731 or concurrent enrollment in MFGE 2534.

MENG 3130 Mechanism Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers detailed concepts, functions and knowledge of the components of mechanisms, machine components and design tools. Analytical, mathematical and computer techniques for kinematic and dynamic analysis of mechanisms and machine components are introduced. A comprehensive project covers the mechanism synthesis and design experience using analytical and computer simulation tools.
Prerequisite(s): A minimum grade of "C" in ENGR 2232 or permission of instructor.
MENG 3135 Machine Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in ENGR 3233 and MENG 2110 or permission of the department.

MENG 3233 Heat Transfer
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will be an introduction to basic energy transport by conduction, convection, and radiation with applications to heat exchanger, extended surfaces, etc.
Prerequisite(s): MATH 2243 and MATH 3230 and a minimum grade of "C" in ENGR 3431 and ENGR 3235 or permission of instructor.

MENG 3331 Materials Science
3 Credit Hours. 0.2 Lecture Hours. 0.3 Lab Hours.
The study of engineering materials such as metals, alloys, polymers, ceramics, and composites. Atomic structure and arrangement; control of the microstructure and mechanical properties, solidification, cooling curves and phase diagrams, mecanical testing, and strengthening mechanisms. Laboratory includes problem solving sessions and experiments on materials related to stresses, toughness, solidification, and metallography. Prerequisite(s): A minimum grade of "C" in CHEM 1146 or CHEM 1147 and ENGR 3233.

MENG 3333 Materials Processing
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
The course covers the study of traditional and modern processing techniques. The course will cover applications and use of different materials and their processing, metal-casting processes end equipment, forming and shaping processes and equipment, joining processes and equipment, molding, extrusion and fabrication of polymers, and composites processing and techniques. Laboratory includes problem solving sessions, experiments, and hands-on processing of materials. Prerequisite(s): A minimum grade of "C" in MENG 3331 and MENG 1310 or permission of the department.

MENG 3521 Mechatronics Studio Laboratory
2 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
This course is an introduction to the theory and practice of engineering measurements, instrumentation, data acquisition, statistical analysis of data, controls and mechatronic systems and their applications integrated with computing. Topics include measurement fundamentals, applications of computing in measurement and mechatronic systems, sensors, analog signal processing, data acquisition and analysis, digital circuits, microcontroller programming and interfacing, actuators, and mechatronic system design. Prerequisite(s): A minimum grade of "C" in ENGR 2131 and MENG 2139 and ENGR 3233.

MENG 3531 Introduction to Mechatronics
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course is an introduction to the theory and practice of engineering measurements, instrumentation, data acquisition, statistical analysis of data, controls and mechatronic systems and their applications integrated with computing. Topics include measurement fundamentals, applications of computing in measurement and mechatronic systems, sensors, analog signal processing, data acquisition and analysis, digital circuits, microcontroller programming and interfacing, actuators, and mechatronic system design. Prerequisite(s): A minimum grade of "C" in ENGR 2131 and MENG 2139 and ENGR 3233.

MENG 4210 Energy Science Laboratory
1 Credit Hour. 0 Lecture Hours. 0.2 Lab Hours.
The course includes laboratory activities in support of instruction in Thermodynamics and heat transfer. Prerequisite(s): A minimum grade of "C" in ENGR 3235 and ENGR 3431 and MENG 3233 and MENG 3531 or MENG 3521 or permission of instructor.

MENG 4430 Engineering Quality Control and Project Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will introduce students to basic tools of engineering economy such as: interest rates, cash flow analysis, cost benefit analysis, depreciation analysis that are used in comparing and evaluating multiple engineering projects on the basis of quantitative monetary parameters. Students will additionally be introduced to basic quality control techniques such as quality control charts and Six Sigma techniques for assuring product quality. Prerequisite(s): A minimum grade of "C" in MENG 2110, MENG 3135, and MENG 3333.

MENG 4612 Mechanical Engineering Senior Seminar
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Students are introduced to topics essential for improving performance on the Fundamentals of Engineering Exam. Topics such as engineering economy, ethics, and global citizenship are reinforced, while topics such as electrical devices, mechanics, energy science, and numerical methods are reviewed. Prerequisite(s): MATH 2243 and a minimum grade of "C" in ENGR 2131, ENGR 2232, ENGR 3233, ENGR 3235, MENG 2139, MENG 3233, and MENG 3331.

MENG 4811 Mechanical Engineering Research
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
MENG 4811 is meant to be a research course that is an introduction to engineering research topics, experiment design, ethics, laboratory safety, data analysis, statistics, technical writing and presentation. Prerequisite(s): MATH 2243 and a minimum grade of "C" in ENGR 2112 and MENG 2139 and prior or concurrent enrollment in MENG 3521, MENG 3531.

MENG 4822 Research Project in Mechanical Engineering
2 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
MENG 4822 is the supervised research project element of the MechE special topic sequence (including MENG 4811 MechE Research Seminar), which progresses from experiment/project design, implementation, and culminates in a final research report, presentation and/or honors thesis. Prerequisite(s): A minimum grade of "C" in MENG 3135 and MENG 3233 and MENG 3333 and MENG 3531 or MENG 3521 and previous or concurrent enrollment in MENG 4811 or permission of instructor.

MENG 4899 Directed Study in Mechanical Engineering
3 Credit Hours. 0.3 Lecture Hours. 0.3 Lab Hours.
An individualized study involving research and applications pertaining to Mechanical Engineering. Prerequisite(s): Senior standing, prior identification of a problem or study area, and permission of instructor.

MENG 5090 Selected Topics in Mechanical Engineering
1-9 Credit Hours. 1-9 Lecture Hours. 0-6 Lab Hours.
This course provides for study of Mechanical Engineering course topics not generally offered by the program. Prerequisite(s): Senior standing or Permission of instructor. Cross Listing(s): MENG 5090G.

MENG 5090G Selected Topics in Mechanical Engineering
1-3 Credit Hours. 1-3 Lecture Hours. 1-6 Lab Hours.
This course provides for study of Mechanical Engineering course topics not generally offered by the program. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete. Prerequisite(s): Graduate standing or permission of department. Cross Listing(s): MENG 5090.
MENG 5134 Vehicle Dynamics 3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course covers fundamental concepts related to mathematical models and designs of automotive vehicle as multiple degree of freedom system. It also covers its dynamic performance under acceleration, braking, steering, rollover considering road loads, suspension system and tire characteristics. Emphasis is given to the stability of the vehicle under these dynamic conditions. Graduate students are expected to carry out research activities and submit research paper as their projects.
Prerequisite(s): A minimum grade of "C" in MENG 2139 and MENG 3130 or permission of the department. Cross Listing(s): MENG 5134G.

MENG 5134G Vehicle Dynamics 3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course covers fundamental concepts related to mathematical models and designs of automotive vehicle as multiple degree of freedom system. It also covers its dynamic performance under acceleration, braking, steering, rollover considering road loads, suspension system and tire characteristics. Emphasis is given to the stability of the vehicle under these dynamic conditions. Graduate students are expected to carry out research activities and submit research paper as their projects. Graduate students will be required to complete a case study or other individualized advanced research activity that undergraduate students will not be required to complete.
Prerequisite(s): Mechanism Design or permission of the department. Cross Listing(s): MENG 5134.

MENG 5135 Vibration and Preventive Maintenance 3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Free and Forced Vibration of one and multi-degree of freedom systems will be covered. Applications of vibration analysis for preventive maintenance of mechanical systems will be introduced. Laboratories include basic vibration analysis and its applications.
Prerequisite(s): Completion of MATH 3230 and a minimum grade of "C" in MENG 3130, MENG 3531 or MENG 3521 or permission of the department. Cross Listing(s): MENG 5135G.

MENG 5135G Vibration and Preventive Maintenance 3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
Free and Forced Vibration of one and multi-degree of freedom systems will be covered. Applications of vibration analysis for preventive maintenance of mechanical systems will be introduced. Laboratories include basic vibration analysis and its applications. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): Completion of MENG 3531 and MENG 3130 and MATH 3230 or permission of department.
Cross Listing(s): MENG 5135.

MENG 5136 Introduction to Finite Element Analysis 3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
This course will introduce students to the fundamentals of Finite Element Analysis. The students will develop a working knowledge of a commercial FEA software package and will model and analyze mechanical and thermal engineering systems using that software. The students will additionally develop an ability and competence in interpretation and analysis of FEA results.
Prerequisite(s): A minimum grade of "C" in ENGR 2112, ENGR 3235, MENG 2139, MENG 3135, MENG 3233 or permission of the department. Cross Listing(s): MENG 5136G.

MENG 5136G Introduction to Finite Element Analysis 3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
This course will introduce students to the fundamentals of Finite Element Analysis. The students will develop a working knowledge of a commercial FEA software package and will model and analyze mechanical and thermal engineering systems using that software. The students will additionally develop an ability and competence in interpretation and analysis of FEA results. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete.
Prerequisite(s): A minimum grade of "C" in MENG 2139 and MENG 3135 and MENG 3233 and ENGR 2112 and ENGR 3235 or permission of department.
Cross Listing(s): MENG 5136.

MENG 5137 Mechanical System Design 3 Credit Hours. 0 Lecture Hours. 0.6 Lab Hours.
This is a senior design course requiring that students call upon all of their academic preparations in developing the solution of mechanical system problems. Prerequisite(s): A minimum grade of "C" in ENGR 2112 and ENGR 3235, MENG 3130, MENG 3135, MENG 3233, MENG 3333, (MENG 3531 or MENG 3521).

MENG 5137G Mechanical System Design 3 Credit Hours. 0-3 Lecture Hours. 0-6 Lab Hours.
This is a senior design course requiring that students call upon all of their academic preparations in developing the solution of mechanical system problems. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): A minimum grade of "C" in MENG 3130 and MENG 3135 and MENG 3233 and MENG 3333 and MENG 3531 and ENGR 2112 and ENGR 3235.
Cross Listing(s): MENG 5137, MENG 5137H.

MENG 5138 Composite Materials: Manufacturing, Analysis, and Design 3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course introduces basics of fiber reinforced, and laminated composites, anisotropic theory, stress analysis, design and testing of composite materials. Topics include an overview of structure and processing of composite materials, classification of anisotropy, anisotropic constitutive models, classical laminate theory, failure theories, and test methods. The knowledge will be applied to a design of simple composite structural elements.
Prerequisite(s): A minimum grade of "C" in (MENG 3135 or MFGE 3131) and (MENG 3333 or MFGE 2531), or permission of the department.
Cross Listing(s): MENG 5138G.

MENG 5138G Composite Materials: Manufacturing, Analysis, and Design 3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course introduces basics of fiber reinforced, and laminated composites, anisotropic theory, stress analysis, design and testing of composite materials. Topics include an overview of structure and processing of composite materials, classification of anisotropy, anisotropic constitutive models, classical laminate theory, failure theories, and test methods. The knowledge will be applied to a design of simple composite structural elements. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete.
Prerequisite(s): A minimum grade of "C" in MENG 3135 or MFGE 3131 and MENG 3333 or MFGE 3531 or permission of department for graduate students.
Cross Listing(s): MENG 5138.
MENG 5139 Renewable Energy  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
The design, operation, and environmental and socio-economic impact of renewable energy systems will be presented with an engineering emphasis. Additionally, cycle evaluation and analysis of the renewable energy systems, the efficiency and power output of renewable energy systems, their benefits and costs will be determined. Graduate students will be required to complete an additional design project that involves a class presentation with a more advanced technical analysis.  
Prerequisite(s): A minimum grade of "C" in MENG 3233 and ENGR 3431 and ENGR 3235 or permission of instructor. Cross Listing(s): MENG 5139G, TMAE 5139, TMAE 5139G.  

MENG 5139G Renewable Energy  
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.  
The design, operation, and environmental and socio-economic impact of renewable energy systems will be presented with an engineering emphasis. Additionally, cycle evaluation and analysis of the renewable energy systems, the efficiency and power output of renewable energy systems, their benefits and costs will be determined. Graduate students will be required to complete an additional design project that involves a class presentation with a more advanced technical analysis.  
Prerequisite(s): A minimum grade of "C" in MENG 3233 and ENGR 3431 and ENGR 3235 or permission of department. Cross Listing(s): MENG 5139, TMAE 5139, TMAE 5139G.  

MENG 5231G Tribology and Reliability  
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.  
The course is an introduction to basic tribology concepts in mechanical engineering; it also includes the analysis engineering cases, and the fundamentals of reliability as they relate to mechanical engineering. Graduate students will be required to complete a case study or other individualized advanced research activity that undergraduate students will not be required to complete. Prerequisite(s): A minimum grade of "C" in ENGR 3235 and MENG 3135 and MENG 3333 or permission of department.  

MENG 5233 Wind Energy  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course provides an in-depth introduction to modern wind turbine technology and the development of the wind power industry. Students will learn general characteristics of the wind resource and the atmospheric boundary layer. They will also learn how to analyze wind data, estimate wind resources and use statistical techniques to estimate wind turbine energy production. Aerodynamic characteristics of various turbine (HAWT and VAWT) models design, blade design, airfoil design, blade number effect and optimization techniques will be discussed theoretically and computationally for various applications. This course provides the general principles of wind turbine loads, mechanics, rotor dynamics, and methods for modeling turbine structural response. Electrical aspects of wind turbines, turbine control, turbine materials and components will also be studied, as well as, turbine design and testing, wind turbine siting, system design and integration.  
Prerequisite(s): Completion of MATH 2243 and a minimum grade of "C" in ENGR 2112, ENGR 2231, ENGR 3233, ENGR 3235, MENG 3135 and (MENG 3531 or MENG 3521).  
Cross Listing(s): MENG 5233G.  

MENG 5233G Wind Energy  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course provides an in-depth introduction to modern wind turbine technology and the development of the wind power industry. Students will learn general characteristics of the wind resource and the atmospheric boundary layer. They will also learn how to analyze wind data, estimate wind resources and use statistical techniques to estimate wind turbine energy production. Aerodynamic characteristics of various turbine (HAWT and VAWT) models design, blade design, airfoil design, blade number effect and optimization techniques will be discussed theoretically and computationally for various applications. This course provides the general principles of wind turbine loads, mechanics, rotor dynamics, and methods for modeling turbine structural response. Electrical aspects of wind turbines, turbine control, turbine materials and components will also be studied, as well as, turbine design and testing, wind turbine siting, system design, and integration. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): A minimum grade of "C" in MENG 3233 or permission of department.  
Cross Listing(s): MENG 5233.  

MENG 5234 Heating, Ventilating, and Air Conditioning  
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.  
This is an introductory course in Heating, Ventilating, and Air Conditioning (HVAC) systems. In this course HVAC processes are analyzed and load calculations are performed in accordance with American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) practices.  
Prerequisite(s): A minimum grade of "C" in ENGR 3431, ENGR 3235, MENG 3333 or permission of the department.  
Cross Listing(s): MENG 5234G.  

MENG 5234G Heating, Ventilating, and Air Conditioning  
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.  
This is an introductory course in Heating, Ventilating, and Air Conditioning (HVAC) systems. In this course HVAC processes are analyzed and load calculations are performed in accordance with American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) practices. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete.  
Prerequisite(s): A minimum grade of "C" in ENGR 3431, ENGR 3235, MENG 3333 or permission of department.  
Cross Listing(s): MENG 5234.  

MENG 5237 Applied Combustion  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course is an introduction to the fundamentals of combustion processes, thermochemistry, chemical kinetics, simple chemical reactors, premixed and nonpremixed combustion, turbulent combustion and its practical applications, biofuel combustion, fuel surrogates, and pollutant emissions. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): A minimum grade of "C" in MENG 3233 or permission of department.  
Cross Listing(s): MENG 5237.  

MENG 5237G Applied Combustion  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course is an introduction to the fundamentals of combustion processes, thermochemistry, chemical kinetics, simple chemical reactors, premixed and nonpremixed combustion, turbulent combustion and its practical applications, biofuel combustion, fuel surrogates, and pollutant emissions. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): A minimum grade of "C" in MENG 3233 or permission of department.  
Cross Listing(s): MENG 5237G.
MENG 5238 Engine Development and Performance
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
The design, development, operation, and environmental impact of internal combustion engines will be presented in this course with an engineering emphasis. Additionally, cycle evaluation and analysis of the energy systems, the efficiency and power generation, their benefits and costs will be determined.
Prerequisite(s): A minimum grade of "C" in ENGR 3235, ENGR 3431, MENG 3233 and (MENG 3531 or MENG 3521).
Cross Listing(s): MENG 5238G

MENG 5239G Biofuels Development and Testing
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
The development of biofuels for engine operation and their environmental impact will be presented in this course with an engineering emphasis. Additionally, life cycle evaluation, analysis of the energy systems and their efficiency with biofuels, together with benefits and costs will be determined.
Prerequisite(s): MENG 3233 and a minimum grade of "C" in ENGR 3431 or permission of department.
Cross Listing(s): MENG 5239G

MENG 5331 Automation and Computer Integrated Manufacturing Systems
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
This course will cover the fundamental concepts in manufacturing, automation, and various topics in production and control systems. These include numerical control, industrial robots, computer integrated manufacturing systems, flexible manufacturing system, and process monitoring and control.
Prerequisite(s): A minimum grade of "C" in ENGR 1133 and ENGR 1121, ENGR 1731 or MFGE 2534 and (MENG 3333 or MFGE 2533) or permission of the department.
Cross Listing(s): MENG 5331G
MENG 5431G Compressible Flow
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course introduces the basic equations and concepts of compressible flow. The generalized equations and solutions are developed and solved for: one-dimensional moving and normal shocks, oblique shocks, expansion fans, compressible flow with friction, and compressible flow with heat transfer. Software will be utilized to solve compressible flow problems. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): MENG 3233 or permission of department.
Cross Listing(s): MENG 5431.

MENG 5432 Applied Computational Fluid Dynamics
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course introduces the numerical techniques applied to the solution of fluid flow and heat transfer problems. The Finite Difference and Finite Volume methods are used to discretize and numerically solve the governing equations of heat transfer and fluid mechanics. Commercial computational fluid dynamics software is utilized for the analysis of heat transfer and fluid mechanics problems.
Prerequisite(s): A minimum grade of "C" in MENG 3233.
Cross Listing(s): MENG 5432G.

MENG 5432G Applied Computational Fluid Dynamics
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course introduces the numerical techniques applied to the solution of fluid flow and heat transfer problems. The Finite Difference and Finite Volume methods are used to discretize and numerically solve the governing equations of heat transfer and fluid mechanics. A commercial computational fluid dynamics software is utilized for the analysis of heat transfer and fluid mechanics problems. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): MENG 3233 or permission of department.
Cross Listing(s): MENG 5432.

MENG 5433 Analysis of Energy Systems
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
The course will introduce students to the design and analysis of energy systems. The students will use the concepts of thermodynamics, fluid mechanics and heat transfer to analyze various energy systems. The course will also offer an introduction to compressible flow, associated with the energy systems. The students will develop a working knowledge of a commercial CFD software package and model and analyze the energy systems using the software.
Prerequisite(s): MATH 2243, MATH 3230, MATH, and a minimum grade of C in ENGR 2231, ENGR 3431, ENGR 3235, and MENG 3233. Cross Listing(s): MENG 5433G.

MENG 5433G Analysis of Energy Systems
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
The course will introduce students to the design and analysis of energy systems. The students will use the concepts of thermodynamics, fluid mechanics and heat transfer to analyze various energy systems. The course will also offer an introduction to compressible flow, associated with the energy systems. The students will develop a working knowledge of a commercial CFD software package and model and analyze the energy systems using the software. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete.
Prerequisite(s): ENGR 2231, MATH 2243, MATH 3230, ENGR 3431, ENGR 3235, and MENG 3233.
Cross Listing(s): MENG 5433.

MENG 5434 Heat Transfer Principles and Applications
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course will cover intermediate concepts related to conduction, convection and radiation heat transfer. Analytical solution methods for steady and transient conduction in one and two dimensions are developed and utilized. The continuity, momentum, and energy equations are derived and used in fundamental heat transfer applications. Radiation exchange between surfaces with and without participating media is presented and analyzed.
Prerequisite(s): A grade of "C" or better in MENG 3233 or permission of department. Cross Listing(s): MENG 5434G.

MENG 5434G Heat Transfer Principles and Applications
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will cover intermediate concepts related to conduction, convection and radiation heat transfer. Analytical solution methods for steady and transient conduction in one and two dimensions are developed and utilized. The continuity, momentum, and energy equations are derived and used in fundamental heat transfer applications. Radiation exchange between surfaces with and without participating media is presented and analyzed.
Prerequisite(s): MATH 5530 or permission of instructor.

MENG 5536 Mechanical Controls
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
An understanding of the elements of classical control theory will be developed. Students will be introduced to the concept of feedback and its properties; the concept of stability and stability margins; and the different tools that can be used to analyze these properties. Students will also develop a working knowledge of the basics of linear control techniques.
Prerequisite(s): A minimum grade of "C" in MENG 2139 and MENG 3130 and (MENG 3531 or MENG 3521) or permission of instructor.
Cross Listing(s): MENG 5536G.

MENG 5536G Mechanical Controls
3 Credit Hours. 0.2 Lecture Hours. 0.2 Lab Hours.
An understanding of the elements of classical control theory will be developed. Students will be introduced to the concept of feedback and its properties; the concept of stability and stability margins; and the different tools that can be used to analyze these properties. Students will also develop a working knowledge of the basics of linear control techniques. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete.
Prerequisite(s): MENG 2139 and MENG 3130 and MENG 3531 or permission of department.
Cross Listing(s): MENG 5536.

MENG 5890G Selected Topics in Mechanical Engineering
1-3 Credit Hours. 1-3 Lecture Hours. 1-2 Lab Hours.
This course is scheduled on an infrequent basis to explore special areas in applied engineering. Graduate students will be required to complete a case study or research project not required of undergraduate students.
Prerequisite(s): Permission of department.

MENG 5891 Special Problems in Mechanical Engineering
1-6 Credit Hours. 0 Lecture Hours. 2-12 Lab Hours.
Individual and specialized study in the areas of mechanical engineering not otherwise covered in the students' curriculum.
Prerequisite(s): Senior standing and identification of a problem or study area and permission of instructor.
Cross Listing(s): MENG 5891G.
MENG 5891G Special Problems in Mechanical Engineering  
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.  
Individual and specialized study in the areas of mechanical engineering not otherwise covered in the students' curriculum. Graduate students will be required to complete a case study or other individualized advanced activity that undergraduate students will not be required to complete.  
Prerequisite(s): Graduate standing and identification of a problem or study area and permission of department.  
Cross Listing(s): MENG 5891.  

MENG 7136 Mechatronics I  
3 Credit Hours. 0,2 Lecture Hours. 0,3 Lab Hours.  
This course is designed to build a working familiarity with the electronics and techniques needed in the design and control of electro-mechanical systems. The topics in this course include integrated use of mechanical, electrical, and computer systems for control of machines and devices, system modeling, sensors and actuators, basic electronics design, signal processing, grounding, and interfacing techniques.  
Prerequisite(s): TMAE 5131 or TMAE 5132 or permission of department.  
Cross Listing(s): TMAE 7136.  

MENG 7137 Principles of Modeling and Simulation  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course provides an introduction to modeling and simulation techniques across diverse areas of engineering study for solutions of coupled physics, mechanics, chemistry, and even biological systems. The primary focus of the course will be on thermomechanical coupling, fluid and structure interaction, and electrical and thermal coupling analysis.  
Prerequisite(s): MENG 5136 or permission of instructor.  

MENG 7138 Mechatronics II  
3 Credit Hours. 0,2 Lecture Hours. 0,3 Lab Hours.  
This course is designed to provide further fundamental information to understand the fusion of mechanical engineering, electrical engineering, and computer data acquisition/programming and their relationship to the field of Mechatronics. This course emphasizes the interfacing of microcomputers with sensors and actuators, hybrid (analog/digital) design, digital logic and analog circuitry, micro-computer architecture, assembly language programming, signal conditioning, filters, analog-to-digital and digital-to-analog conversion, and the interface of data acquisition systems with the control process.  
Prerequisite(s): A minimum grade of "C" in MENG 7136 or permission of department. Cross Listing(s): TMAE 7137.  

MENG 7239 Intermediate Fluid Mechanics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
In this course, the basic equations for multidimensional flow fields with ideal fluids and compressible fluids are derived. Advanced topics in fluid mechanics, including potential flow, boundary layer flow, compressible flow, and open channel flow are presented. Analytical techniques for solving problems are presented.  
Prerequisite(s): MATH 5530 or permission of department.  

MENG 7431 Mechanics of Deformable Solids  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to the fundamental mechanics of linear elasticity and elasto-plasticity, formulation and solution of simple static boundary value problems. Topics covered include constitutive equations for isotropic media, field equations for elastic solids, plane strain/plane stress and some classic analytical solutions, stress functions and potential methods.  
Prerequisite(s): MENG 3331 and MATH 5530 or permission of department.  

MENG 7432 Fracture Mechanics  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to linear elastic and elastic-plastic fracture, their fundamental concepts and applications. Topics include microstructural effects on fracture, toughening mechanisms, crack growth resistance, interface fracture mechanics, fatigue damage, fatigue crack growth models and mechanisms.  
Prerequisite(s): MATH 5530 and a minimum grade of "C" in ENGR 3233 or permission of department.  

MENG 7530 Research in Mechanical Engineering  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of modern research methods and their application to the preparation of the thesis and technical reports. Cross Listing(s): TMAE 7530.  

MENG 7890 Selected Topics in Mechanical Engineering  
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.  
This course is scheduled on an infrequent basis to explore special areas of applied engineering.  
Prerequisite(s): MENG 7136 or permission of instructor.  
Cross Listing(s): TMAE 7890.  

MENG 7891 Special Problems in Mechanical Engineering  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Individual and specialized study in the areas of applied engineering not otherwise covered in the program. Students must submit a proposal of the special problem for approval by the faculty member of record. Credit will be assigned commensurate with the magnitude of the study.  
Prerequisite(s): MENG 7891.  

MENG 7895 Independent Study  
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Independent study is available for students to undertake individualized experimentation, research, study related to applied engineering, or a capstone project. The specific topic will be approved by a faculty member in the program, and credit will be assigned commensurate with the magnitude of the study.  
Prerequisite(s): TMAE 7895.  

MENG 7999 Thesis  
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
This course focuses on the preparation and completion of the thesis.  
Prerequisite(s): TMAE 7999.  

METR Meterology  

METR 3100 Introduction to Meteorology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Introduction to the description of the state of atmosphere and the physical laws that describe atmospheric phenomena.  

MFGE Manufacturing Engineering  

MFGE 2142 Fundamentals of Engineering Mechanics  
4 Credit Hours. 0,3 Lecture Hours. 0,2 Lab Hours.  
This course provides an introductory survey of engineering statics, mechanics of materials, and dynamics as they apply to manufacturing engineering.  
Prerequisite(s): A minimum grade of "C" in MATH 2242 and PHYS 2211K.  

MFGE 2239 Engineering Modeling and Mathematical Analysis  
3 Credit Hours. 0,3 Lecture Hours. 0,2 Lab Hours.  
An introduction to probability and distribution functions as they relate to component/system reliability and degradation, an applied overview of ordinary differential equations, and graphical/mathematical analysis, with an emphasis on manufacturing engineering applications such as design, process, reliability, uncertainty and risk assessment.  
Prerequisite(s): A minimum grade of "C" in STAT 2231.  
Corequisite(s): MENG 2139.
MFGE 2421 Introduction to Additive Manufacturing Studio
2 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
Students will develop a working ability to use parametric solid modeling software. In addition to creating solid models, students will develop a basic proficiency in structures and thermal analysis software. They will also gain insight into rapid prototyping principles through the measurement and printing in an applied project-based setting. Students will gain exposure to additive manufacturing and Digital Design to Manufacturing concepts. Students will learn to perform basic finite element analysis of solid models.
Prerequisite(s): A minimum grade of "C" in ENGR 1133 and MFGE 2142.
MFGE 2531 Materials Science Studio for Manufacturing Engineering
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course covers a broad range of engineering materials with an emphasis on application, use, and manufacturing processes. Students will develop an understanding of relationships between material properties, microstructure, and manufacturing processes. Topics include atomic structure and arrangement, control of the microstructure and mechanical properties, solidification, phase diagrams, mechanical testing, strengthening mechanisms, thermosets, and thermoplastics, introduction to composites, and selection of materials based upon manufacturing applications. Laboratory activities include studies of mechanical and/or metallurgical tests related to strengths, hardness, toughness, solidification, and metallography of materials with an emphasis on manufacturing processes and techniques.
Prerequisite(s): A minimum grade of "C" in CHEM 1212K or CHEM 1310.
MFGE 2533 Manufacturing Processing 2 Studio
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course covers the theory and hands-on experiences with various forming processes such as casting, forging, extrusion, rolling, and drawing. Students will gain insight into the theory of manufacturing processes and will develop competency through lab based hands-on practice and the processing constraints related to the design of products and systems.
Prerequisite(s): A minimum grade of "C" in MFGE 2531.
MFGE 2534 Applied Computing in Manufacturing Engineering
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
This course provides a survey introduction to programming logic and flowcharting, applications of the principles and techniques of computer numerically controlled machine tools (CNC). G and M code programming of Industrial machines, tooling systems, and an introduction to Computer Aided Manufacturing (CAM) systems will be covered. Manual hands-on programming as well as interfacing with professional machining software such as MasterCAM or HSM Works will be incorporated. IT interfacing of components and systems will be introduced, as well as basic control devices such as PLCs.
Prerequisite(s): A minimum grade of "C" in ENGR 1133 and MFGE 2130.
MFGE 3131 Design for Manufacturability, Assembly, Sustainability
3 Credit Hours. 0,3 Lecture Hours. 0,2 Lab Hours.
A study and application of the principles that result in the integration of machine design, product design, and process planning into one common activity with considerations given to assembly tolerances, fit, and clearance as well as whole-life lifecycle usability, recyclability, and sustainability. The goal is to design a product that is easily and economically manufactured. Also included is a study of coordinate measurement machines (CMM), machine design, metrology, and design principles that contribute to enhanced sustainability.
Prerequisite(s): A minimum grade of "C" in MFGE 2142 and MFGE 2421 and MFGE 2533.
MFGE 3132 Quality and Statistical Process Control for Engineers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course focuses on the definition of Quality. Introduces students to proactive concepts of quality such as Six Sigma, QFD, FMEA, POKAYOKE, Ishikawa analysis and reactive methods used to ensure quality production through the measurement and maintenance of desired product characteristics in manufacturing processes such as control charts and sampling.
Prerequisite(s): A minimum grade of "C" in MFGE 2239.
MFGE 3337 Hydraulics and Electro-mechanical Systems
3 Credit Hours. 0,2 Lecture Hours. 0,2 Lab Hours.
Exploration of the basic principles of fluidic (hydraulic and pneumatic) systems and electrical devices as they relate to manufacturing assembly processes and lines, and industrial robotics.
Prerequisite(s): A minimum grade of "C" in ENGR 2131 and MFGE 3421 and MFGE 3541.
MFGE 3421 Industrial Controls and Networking Studio
2 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
This studio laboratory will cover the theory and practice of engineering measurements, measuring devices, and their application to controlled activities in an applied environment. The experimental activities will include the application of traditional measuring devices, development of data acquisition packages, and inner-connectivity and networking of sensors and programmable logic control (PLC) devices with an emphasis on robotics, automation, and manufacturing applications. Prerequisite(s): A minimum grade of "C" MFGE 2534 and prior or concurrent enrollment in ENGR 2131.
MFGE 3423 Facilities Design
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The goal of this course is to impart an understanding of the basic principles of facilities location, layout, and material handling systems so as to design an efficient manufacturing/service facility. This will be enhanced through hands-on practice in designing facilities. Facilities design issues that will be stressed upon will include modeling, design, and analysis techniques. It will try to provide a balance of exposure to available methodologies in facilities location, layout, and material handling with a practical emphasis, not just quantitative evaluation.
Prerequisite(s): A minimum grade of "C" in MFGE 2533.
MFGE 3531 Advanced Materials Processing
3 Credit Hours. 0,3 Lecture Hours. 0,2 Lab Hours.
Students will develop both a theoretical and hands-on appreciation for techniques working with plastics, ceramics, composites, nanomaterials, etc.
Prerequisite(s): A minimum grade of "C" in ENGR 1133 and MFGE 2142.
MFGE 3541 Energy Science Studio
4 Credit Hours. 0,3 Lecture Hours. 0,2 Lab Hours.
A survey of fluid mechanics, thermodynamics, and heat transfer with an emphasis placed upon manufacturing engineering. Fundamentals of fluid statics and fluid dynamics for incompressible fluids, fluid properties, static and dynamic forces, Bernoulli's equation, pipe flow and loss measurement. Thermodynamic properties, state postulate, work interactions, steady-state and transient energy and mass conservation, entropy and the second law. First and Second Law analysis of thermodynamic systems. Gas cycles and vapor cycles. An introduction to basic energy transport by conduction, convection, and radiation with applications to heat exchanger, extended surfaces etc. The laboratory will provide both problem solving and hands on experimentation experiences that support the concepts covered in the lecture.
Prerequisite(s): A minimum grade of "C" in PHYS 2211K and MATH 2242.
MFGE 4090 Special Topics in Manufacturing Engineering
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
This course provides for study of Manufacturing Engineering course topics not generally offered by the program or offered on an introductory or trial basis.
Prerequisite(s): Permission of instructor and department chair.
MFGE 4091 Manufacturing Engineering Co-Op
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
The student obtains practical work experience in the manufacturing engineering profession with a manufacturing company. May be repeated for credit when participating with the same industry employer. Requires prior department chair approval for course credit. Prerequisite(s): Sophomore standing.
MFGE 4135 Lean MFG Principals and Engineering Project Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The planning, evaluation, deployment, and integration of lean manufacturing theory and methods. Emphasis on manufacturing processes/equipment and systems, e.g. planning/control, product design, supply chain, and human resource management, JIT, KANBAN, theory of constraints and quick response manufacturing. The course will also include principles of engineering economy that facilitate in the selection of appropriate engineering projects to maximize ROI.
Prerequisite(s): A minimum grade of "C" in MFGE 3132.

MFGE 4321 Manufacturing Engineering Capstone I
2 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
A capstone project based course that draws on all major curricular themes within the manufacturing engineering program. This course focuses on concurrent product design and deployment. Key areas include designing with constraints; brainstorming, problem solving, and creativity methods. Students will use design analysis tools, solid modeling, finite element analysis and supply chain management. Student will consider cell needs and limitations to design and develop a product and/or process for mass production in Manufacturing Engineering Capstone II (MFGE 4322).
Prerequisite(s): A minimum grade of "C" in MFGE 3541 and MFGE 3132 and MFGE 3131 and MFGE 3337.

MFGE 4322 Manufacturing Engineering Capstone II
2 Credit Hours. 0 Lecture Hours. 4 Lab Hours.
A capstone project based course that draws on all major curricular themes within the manufacturing engineering program. This laboratory based course focuses on implementation and a production run of the product and/or process developed in MFGE 4321. The students will build and test the manufacturing cell to produce a discrete family of parts identified in MFGE 4321. The design of part transfer, tooling, sensing, production control and integrated inspection systems will be emphasized.
Prerequisite(s): A minimum grade of "C" in MFGE 4321 and MFGE 4135 and MFGE 4533.

MFGE 4533 Industrial Robotics and Automation
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course will cover topics of the theory of the dynamic and kinematic models of industrial robot, robotic manufacturing operations such as welding and assembly and industrial robots working in unison or in concert in a manufacturing process. The laboratory activities include programming industrial robots to perform pick and place operations, to manipulate components, tools, and instruments through complex trajectories, programming PLCs to coordinate multiple manufacturing operations and programming computers to integrate the communications and information sharing between manufacturing and management systems.
Prerequisite(s): A minimum grade of "C" in MFGE 2142 and MFGE 3337 and MFGE 3421.

MFGE 4614 Senior Seminar: Professional Skills and Leadership
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
Through readings, case studies, small group activities, discussions and guest speakers, students will explore and integrate professional skills relevant to their future careers. An emphasis will be placed upon engineering ethics, professional responsibilities, environmental impact of engineering processes, and technical leadership. A curricular overview that prepares students to take the Society of Manufacturing Engineers' Certification exam or similar.
Prerequisite(s): A minimum grade of "C" in MFGE 3531 and MFGE 3132 and MFGE 3421 and MFGE 3541 and MFGE 2421 and MFGE 3131.

MFGE 4981 Special Problems in Manufacturing Engineering
1-3 Credit Hours. 1-3 Lecture Hours. 0-2 Lab Hours.
Individual and specialized study in the areas of mechanical engineering that are not otherwise covered in the curriculum. Research project based or practicum experience.
Prerequisite(s): Permission of instructor and department chair.

MFGE 5131 Lean and Six Sigma 1
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This introductory course will emphasize communication using Six Sigma principles. It will help relate six sigma principles to the overall manufacturing mission and objectives. The Five step DMAIC model for organizational and process improvement will be emphasized. A wide range of process improvement techniques with the DMAIC model will be employed.
Prerequisite(s): A minimum grade of "C" in MFGE 3132.
Cross Listing(s): MFGE 5131G.

MFGE 5131G Lean and Six Sigma Green Belt-1
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This introductory course will emphasize communication using Six Sigma principles. It will help relate six sigma principles to the overall business mission and objectives. The Five step DMAIC model for organizational and process improvement will be emphasized. A wide range of process improvement techniques with the DMAIC model will be employed. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): A minimum grade of "C" in MFGE 3132 or permission of the instructor for graduate students.
Cross Listing(s): MFGE 5131.

MFGE 5132 Lean and Six Sigma 2
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Graphic and numerical tools to implement DMAIC procedure will be introduced. This includes introduction to Normal distribution, process capability analysis, measurement systems analysis, correlation and regression analysis, statistical process control, value stream mapping as well as the use of six sigma in service based industries.
Prerequisite(s): A minimum grade of "C" in MFGE 5131.
Cross Listing(s): MFGE 5132G.

MFGE 5132G Lean and Six Sigma Green Belt-2
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Graphic and numerical tools to implement DMAIC procedure will be introduced. This includes introduction to Normal distribution, process capability analysis, measurement systems analysis, correlation and regression analysis, statistical process control, value stream mapping as well as the use of six sigma in service based industries. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): A minimum grade of "C" in MFGE 5131 or MFGE 5131G.
Cross Listing(s): MFGE 5132.

MFGE 5238 Facilities Maintenance
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
An advanced topic course in the area of scheduled and preventative maintenance of automated manufacturing systems.
Prerequisite(s): A minimum grade of "C" in MFGE 3337 and MFGE 3423 and MFGE 4533.
Cross Listing(s): MFGE 5238G.

MFGE 5238G Facilities Maintenance
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
An advanced topic course in the area of scheduled and preventative maintenance of automated manufacturing systems. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): A minimum grade of "C" in MFGE 3337 and MFGE 3423 and MFGE 4533 or permission of instructor for graduate students.
Cross Listing(s): MFGE 5238.
MFGE 5331 Advanced Robotics for Manufacturing
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course provides an introduction to fundamental concepts in robotics. Students study robot manipulator kinematics, dynamics, and control. The theory of spatial kinematics and dynamics of robot manipulators is studied in depth. Advanced control strategies such as force control and compliance control are also investigated. Topics are augmented using computer graphics tools and laboratory experiments with robot manipulators with emphasis on application to manufacturing.
Prerequisite(s): MFGE 4533. Cross Listing(s): MFGE 5331G.

MFGE 5331G Advanced Robotics for Manufacturing
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course provides an introduction to fundamental concepts in the use of spatial robotic manipulators with emphasis on industrial robotics. Students study robot manipulator kinematics, dynamics, and control. The theory of spatial kinematics and dynamics of robot manipulators is studied in depth. Advanced control strategies such as force control and compliance control are also investigated. Topics are augmented using computer graphics tools and laboratory experiments with robot manipulators with emphasis on application to manufacturing. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): MFGE 4533. Cross Listing(s): MFGE 5331.

MFGE 5332 Manufacturing Floor Control
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course will review relevant concepts and techniques to control the flow of materials and information as well as the motion of automated devices on the manufacturing floor. This includes relevant concepts on automation, machine motion control, warehousing, MRP and WIP control in production systems among others.
Prerequisite(s): MFGE 3421 and MFGE 4533. Cross Listing(s): MFGE 5332G.

MFGE 5332G Manufacturing Floor Control
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course will review relevant concepts and techniques to control the flow of materials and information as well as the motion of automated devices on the manufacturing floor. This includes relevant concepts on automation, machine motion control, warehousing, MRP and WIP control in production systems among others. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): MFGE 3421 and MFGE 4533. Cross Listing(s): MFGE 5332.

MFGE 5333 Additive Manufacturing Studio
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
A comprehensive overview of additive manufacturing, spanning from fundamentals to applications and technology trends. Students will learn the principles of additive manufacturing of polymers, metals, and ceramics and how process capabilities (rate, cost, quality) are determined by the material characteristics, process parameters, and machine designs. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.
Prerequisite(s): A minimum grade of "C" in all of the following: MFGE 2421 and MFGE 3131 or ENGR 2112 and MENG 3135 and MENG 3333 or permission of instructor for graduate students.
Cross Listing(s): MFGE 5333.

MFGE 5334 Additive Manufacturing of Lightweight Structures
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
This course concentrates on the design, optimization, manufacturing, and performance testing of lightweight structures fabricated by additive manufacturing technologies. The general guidelines of functional design and topology optimization will be introduced. Additive manufacturing methodologies will be instructed and accommodated to the design fabrication. Students will be grouped in teams to complete an assigned project of evaluating the mechanical and material performance of self-designed lightweight structures.
Prerequisite(s): MFGE 5333. Cross Listing(s): MFGE 5334G.

MFGE 5531 Advanced CNC Machining and Programming
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.
Advanced Computer Numerical Control (CNC) course includes a range of advanced manufacturing technology such as CNC set-up and programming, use of CAD/CAM software for tool planning, multi-axis machining, CNC Coordinate Measuring Machines (CMM), and concepts of Computer-Integrated Manufacturing (CIM). This course will include CNC lathe, milling, and extend to 5-axis milling machine demonstration and utilization with lab experience. The course activities and design give emphasis to the development of skills and knowledge competence prescribed by industry performance standards.
Prerequisite(s): MFGE 2534. Cross Listing(s): MFGE 5531G.
MFGE 5532 Introduction to MEMS  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course is designed to study fabrication techniques and operating principles of micro-electro-mechanical devices and systems and their applications. Microfabrication techniques and other emerging fabrication processes for MEMS are studied along with their process physics. Principles of operations of various MEMS devices such as mechanical, optical, thermal, magnetic, chemical/biological sensors/actuators are studied. Topics include: bulk/surface micromachining, microsensors and microactuators mechanisms.  
Prerequisite(s): MFGE 3531.  
Cross Listing(s): MFGE 5532G.  

MFGE 5532G Introduction to MEMS  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course is designed to study fabrication techniques and operating principles of micro-electro-mechanical devices and systems and their applications. Microfabrication techniques and other emerging fabrication processes for MEMS are studied along with their process physics. Principles of operations of various MEMS devices such as mechanical, optical, thermal, magnetic, chemical/biological sensors/actuators are studied. Topics include: bulk/surface micromachining, microsensors and microactuators mechanisms. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): MFGE 3531. Cross Listing(s): MFGE 5532.  

MFGE 5534 Packaging  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course will introduce functions of packaging and its fundamental characteristics; materials, processes, and technology used in package development; applications of various materials and systems used to package manufactured products. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): A minimum grade of "C" in MENG 5138 and MFGE 3531. Cross Listing(s): MFGE 5534G.  

MFGE 5534G Packaging  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course will introduce functions of packaging and its fundamental characteristics; materials, processes, and technology used in package development; applications of various materials and systems used to package manufactured products. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): A minimum grade of "C" in MENG 5138 and MFGE 3531 or permission of the instructor for graduate students.  

MFGE 5535 NanoManufacturing  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course provides a survey introduction of nanoscience and technologies of micro-fabrication and nano-manufacturing.  
Prerequisite(s): A minimum grade of "C" in MFGE 3531 and MENG 5138. Cross Listing(s): MFGE 5535G.  

MFGE 5535G NanoManufacturing  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
This course provides a survey introduction of nano-science and technologies of micro-fabrication and nano-manufacturing. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): A minimum grade of "C" in MFGE 3531 and MENG 5138 or permission of the instructor for graduate students. Cross Listing(s): MFGE 5535.  

MFGE 5536 Characterization of Advanced Manufacturing Materials  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course will introduce the basic characterization principles of advanced manufacturing materials and the common characterization techniques available. The course covers microstructure, defects, crystal structure, crystallography, texture development and phase analysis. Applications and limitations of microscopic-based techniques and their ancillary equipment namely, Optical Microscopy, Scanning Electron Microscopy, and Scanning Probe Microscopy are described. The principles of other important characterization equipment such as x-ray diffraction are described.  
Prerequisite(s): MFGE 3132.  
Cross Listing(s): MFGE 5536G.  

MFGE 5536G Characterization of Advanced Manufacturing Materials  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course will introduce the basic characterization principles of advanced manufacturing materials and the common characterization techniques available. The course covers microstructure, defects, crystal structure, crystallography, texture development and phase analysis. Applications and limitations of microscopic-based techniques and their ancillary equipment namely, Optical Microscopy, Scanning Electron Microscopy, and Scanning Probe Microscopy are described. The principles of other important characterization equipment such as x-ray diffraction are described. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): MFGE 3132. Cross Listing(s): MFGE 5536.  

MFGE 5537 Design for Environment and Green Manufacturing  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course will provide the student with systematic approaches for designing and developing environmentally responsible products. In particular, design trade-offs will be explored, including those arising in materials life cycle and design, manufacturing processes and end-of-life scenarios. Life cycle assessment is introduced as a quantifying approach for assessment.  
Prerequisite(s): MFGE 3131 and MFGE 3132. Cross Listing(s): MFGE 5537G.  

MFGE 5537G Design for Environment and Green Manufacturing  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course will provide the student with systematic approaches for designing and developing environmentally responsible products. In particular, design trade-offs will be explored, including those arising in materials life cycle and design, manufacturing processes and end-of-life scenarios. Life cycle assessment is introduced as a quantifying approach for assessment. Graduate students will be expected to independently research an additional topic, write a summary report, and present their findings to the class.  
Prerequisite(s): MFGE 3131 and MFGE 3132.  

MFGE 7331 Manufacturing System Design and Analysis  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
This course is about contemporary design and analysis methodologies used to organize systems for the economic manufacture of products. Students will be exposed to the techniques used to design and analyze manufacturing systems for the economic manufacture of products. Students also will learn to design manufacturing systems (both human and automated) to satisfy different types of product demand.  
Prerequisite(s): MFGE 5532.
MGED 7332 Advanced Additive Manufacturing  
3 Credit Hours. 0.3 Lecture Hours. 0.2 Lab Hours.  
Advanced Additive Manufacturing course builds upon knowledge of the state-of-art additive manufacturing (AM) technologies and surveys the novel techniques applied for AM or 3D printing. Innovative AM research outcomes and presentation will be collected from the journal publications and conference proceedings, and then lectured to students along with discussions. Case studies of AM application to the manufacturing process will be talked. Student will work in collaboration with classmates to summarize a specified utilization of AM to improve manufacturing efficiency and economy, and to propose a potential application of the existing or novel AM technologies. Prerequisite(s): MGED 5334.

MGED 7991 Advanced Manufacturing Engineering Practicum  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
In this course the student is fully engaged on-site at a manufacturing location of a partnering organization. Advanced Manufacturing Engineering work scope assignment(s) for the company is discussed/agreed to ahead of time in cooperation with the partnering organization and requires prior approval from the department to begin the course. Reporting of progress throughout the semester by the student occurs for course including mid-term report, a term paper report due at end of the semester, and a presentation to company stakeholders. Prerequisite(s): Graduate standing in AME Program.

MGED Middle Grades Education

MGED 3131 Nature and Curriculum Needs of the Middle Grades Learner  
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.  
Examines the curriculum, instruction and organization of middle grades schools. Provides a substantial knowledge base in the nature and needs of early adolescents, as well as, in middle school curriculum and instruction. The course also includes a field component. Prerequisite(s): Admission to Teacher Education.

MGED 3232 Methods of Teaching Science in the Middle Grades  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
Provides an overview of the basic program of science instruction in the middle grades. Research in science education, teaching techniques and methods applicable for this age level, and organization of lessons are studied. Emphasis will be placed on science concepts and principles, an application of concepts to real life situations, science and technology and the development and implementation of hands-on activities. Includes a field based component which requires planning and teaching a science unit in a middle school classroom. Prerequisite(s): A minimum grade of "C" in MGED 3131, MSED 5333, SPED 3332, and admission to Teacher Education Program. Corequisite(s): MGED 3731, MGED 3732.

MGED 3332 Methods of Teaching Language Arts in the Middle Grades  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
Designed to study current trends for integrating language arts across the curriculum in the middle school setting. Emphasis is placed on the natural connections between writing, reading and oral expression. Instructional strategies that link writing, reading, literature and language across the curriculum will be explored. Appropriate language arts curriculum, including content and pedagogy, for early adolescents will be addressed. Students will plan and teach a language arts unit in a middle school classroom. Prerequisite(s): A minimum grade of "C" in all of the following: MGED 3131, MSED 5333 and SPED 3332 and Admission to Teacher Education Program. Corequisite(s): MGED 3731, MGED 3732.

MGED 3432 Methods of Teaching Social Studies in the Middle Grades  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
A study of the role of social studies in the education of early adolescents, with emphasis on understanding the historical and philosophical foundations of social studies, curriculum organization, planning and evaluation of instruction, social studies techniques and materials appropriate for early adolescent learners and current trends in social studies. Students will plan and teach a social studies unit in a middle school classroom. Prerequisite(s): A minimum grade of "C" in all the following: MGED 3131, MSED 5333 and SPED 3332; and Admission to Teacher Education Program. Corequisite(s): MGED 3731, MGED 3732.

MGED 3532 Methods of Teaching Mathematics in the Middle Grades  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.  
A study of teaching methods and materials, curriculum content, assessment strategies, and trends in middle grade mathematics. A field based component which requires planning and teaching a mathematics unit in a middle grade classroom is required. Prerequisite(s): A minimum grade of "C" in MGED 3131, MSED 5333, SPED 3332, and admission to Teacher Education Program. Corequisite(s): MGED 3731, MGED 3732.

MGED 3731 Middle School Practicum I  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
This practicum involves structured observations, as well as planning and teaching an instructional unit in a middle grades classroom from one selected content area: language arts, social studies, math, and science. Emphasis is placed on classroom management, instructional strategies for diverse populations of students, the integration of technology, classroom environment, and assessment of student learning. Prerequisite(s): A minimum grade of "C" in all of the following: MGED 3131, MSED 5333 and SPED 3332; and Admission to Teacher Education Program.

MGED 3732 Middle School Practicum II  
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
This practicum involves structured observations, as well as planning and teaching instructional strategies for diverse populations of students, the integration of technology, and assessment of student learning. Prerequisite(s): A minimum grade of "C" in all of the following: MGED 3131, MSED 5333 and SPED 3332; and Admission to Teacher Education Program. Corequisite(s): MGED 3731, MGED 3732, MGED 3432, MGED 3532.

MGED 4632 Seminar in Middle Grades Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is designed as a culminating activity for middle grades students to apply educational theory and research to their classroom practice. Emphasis is placed on analysis of student learning and teaching effectiveness through development of a portfolio that documents and reflects on planning, assessment and instruction in the middle grades classroom. Prerequisite(s): A minimum grade of "C" in MGED 3232 or MGED 3332 or MGED 3432 or MGED 3532.

Corequisite(s): MGED 5799.

MGED 5799 Student Teaching in Middle Grades Education  
9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
A period of guided teaching during which the candidate, under the direction of a clinical supervisor, takes increasing responsibility for leading the school experiences of a given group of learners over a period of consecutive weeks and engages more or less directly in many of the activities which constitute the wide range of a teacher's assigned responsibilities. Prerequisite(s): Completion of the teaching field and professional education courses and admission to the Student Teaching Program. Cross Listing(s): MGED 5799G.
MGED 5799G Student Teaching in Middle Grades Education 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A period of guided teaching during which the candidate, under the direction of a clinical supervisor, takes increasing responsibility for leading the school experiences of a given group of learners over a period of consecutive weeks and engages more or less directly in many of the activities which constitute the wide range of a teacher’s assigned responsibilities.  
Prerequisite(s): Completion of the teaching field and professional education courses and admission to the Student Teaching Program.  
Corequisite(s): MGED 5799.
Cross Listing(s): MGED 5799.

MGED 6738 Supervised Practicum in the Middle Grades 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised teaching experience in grades 4-8. Candidates will plan and teach in one’s specific teaching field(s) and grade levels for which they are being certified. Emphasis is placed on instructional planning, effective instruction, classroom management, and student evaluation.  
Prerequisite(s): A minimum grade of "C" in MGED 6120. Corequisite(s): MGED 6131.

MGED 6739 M.A.T. Internship I: Middle Grades 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This supervised practicum course is designed for M.A.T. candidates who are employed full time in an approved teaching position. It provides a supervised teaching experience in an appropriate grade level and school setting for the candidate’s teaching field. Candidates will plan and teach in the specific teaching field(s) and grade levels for which one is being certified. Emphasis is placed on instructional planning, classroom management, and student evaluation.  
Prerequisite(s): MGED 6131. Candidates must hold a valid non-renewable teaching certificate and be currently employed in grades 4-8 and teaching in the teaching field(s) for which one is being certified.

MGED 6750 Graduate Internship 3 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

MGED 6799 Supervised Internship: Middle Grades 1-12 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A fifteen-week supervised teaching experience in the specific teaching field(s) and grade levels for which one is being certified. Candidates seeking initial certification in middle grades will complete the internship in order to be eligible for initial certification.  
Prerequisite(s): A minimum grade of "C" in MGED 6131; candidates must hold a valid non-renewable teaching certificate and be currently employed in grades 4-8 and teaching in the teaching field(s) for which one is being certified.

MGED 8132 Effective Middle Schools 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of student development concepts, school structures and practices, and important teaching and learning strategies associated with effective middle level schools. Emphasis is placed upon the relationships that exist between student development, school organization and practice and strategies for supporting effective learning and interaction among diverse learners. The course includes field-based action research, participation in learning teams, and development of significant portfolio evidence of successful interaction with the course content and other learning team members. Some components will typically be network based.  
Prerequisite(s): MAT Middle Grades candidates must have completed MGED 6131 with a minimum grade of "C".

MGMS Valdosta State Franchise

MGMS 5180 Mathematics for Middle School Teachers 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MGMS 7000 Professional Development Seminar 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The self-assessment of individual student understanding and application of master teacher outcomes. Provides the basis for an individual program of study based on individual needs.

MGMS 7100 Research Methodology in Education 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides a study of methods used to conduct educational and educationally-related research and includes critical analysis of selected research articles and research design. Emphasized is the ability to use research and research methods to improve practices in educational and educationally-related settings.

MGMS 7240 Instructional Leadership, Curr 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

MGMS 7401 Chem, Erth Sci, Astr Mid Grade 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An integrated math and science course with special emphasis on an understanding of chemical processes related to earth science and astronomy, including a study of physical chemistry, earth processes, and the chemical evolution of the universe.

MGMS 7650 Teaching Practicum 3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.  
Teaching Practicum.

MGNT Management

MGNT 3130 Principles of Management 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an overview of the management function, with emphasis on managerial planning, organizing, leading, and controlling.  
Prerequisite(s): Sophomore standing.  
Cross Listing(s): MGNT 3130.

MGNT 3134 Behavior in Organizations 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course that examines the determinants and consequences of human behavior in formal organizations. Specific focus is on the individual, interpersonal, and group processes which underlie Organizational Behavior.  
Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 3234 Entrepreneurship 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study in the processes of innovation, opportunity recognition, and the business modeling processes involved in a variety of entrepreneurial contexts.  
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in MGNT 3130.

MGNT 3235 Leadership in Organizations 3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Leadership and management are distinctly-different phenomena; to do either well requires distinctly-different skills. This course builds a bridge between the literature of leadership and its practical application. Though non-exhaustive, we explore leadership from four, broad perspectives: effective leader behaviors, the role of power and influence, the impact of situational moderators, and essential skill sets.  
Prerequisite(s): MGNT 3130.  
Cross Listing(s): MGNT 3235H.
MGNT 3334 Human Resource Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey course of the fundamentals of human resource management in organizations. The basics of Human Resource Management, systems, policies, and practices relative to functional areas such as workforce planning, employment, compensation and benefits, employee and labor relations, occupational health, safety and security will be covered. COBA students must earn a "C" or better in this class. Students with declared majors in other fields must have completed a minimum of 60 semester hours.
Prerequisite(s): Prior or concurrent enrollment in and a minimum grade of "C" in MGNT 3130.

MGNT 3430 Operations Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of the principles of management to the planning, control, design, operation, and updating of operational systems both in the manufacturing and service sectors.
Prerequisite(s): Prior or concurrent enrollment in and a minimum grade of "C" in BUSA 3131 or STAT 2231 and at least 55 hours earned.

MGNT 3437 Service Operations Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will become familiar with the various Operations Management decisions required in managing a service business. Analytical models which support these decisions will be presented and discussed. Students will also become familiar with application of these principles and models through analysis of actual firms and service firm cases.
Prerequisite(s): A minimum grade of "C" in BUSA 3131 or BUSA 3234.

MGNT 4030 Special Topics in Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that allows students to pursue further study in a specific management topic at the frontier of an area of research or a contemporary topic related to current real-world events.
Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 4230 International Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an appreciation for and an understanding of the operations of multinational companies and includes an examination of the structure, policies, management practices, and strategies employed by selected international companies. The course also includes a study in-depth of a semester long project with a topic of cultural focus. A semester long project with a cultural focus is required. Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 4234 Small Business Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an introduction to the unique attributes of small businesses.
Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 4235 Applied Small Business Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An applied course that focuses upon the innovation and management within small businesses. Students work in project management teams within the context of existing businesses, applying innovative problem solving to management issues.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in MGNT 3130 and MGNT 4234.

MGNT 4236 New Venture Planning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a project-based course in which students, working in small groups, research and develop a business plan for a new venture. With tutorial guidance, students will select an entrepreneurial idea and develop it into a comprehensive and fully detailed, written business plan. All aspects of the business must be thoroughly researched and the written plan must include three years’ financial projections. In the final week of the course, students will make a formal presentation of their plan and be interviewed by an enterprise panel with the aim of obtaining funding for the venture. The enterprise panel may include a bank manager, a business angel and/ or a venture capitalist.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in MGNT 3130 and MGNT 3234.

MGNT 4332 Compensation and Benefits
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the history and the functions of labor organizations with reference to such areas as trade unions and public policy; the structure, government, and objectives of trade unions; the collective bargaining process; and the labor market.
Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 4333 Human Resource Information Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of how human resource information systems are applied in organizations to support organizational strategy, improve efficiency and flexibility, increase productivity and performance, and ensure compliance with employment law. The focus will be on merging computer technology with a strategic human resource management perspective.
Prerequisite(s): A minimum grade of "C" in MGNT 3334.

MGNT 4334 Employment Law and Legislative Compliance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of the current issues in the work environment related to the job selection process, equal employment opportunity, and the rights of workers on the market.
Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 4335 Labor Relations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the history and the functions of labor organizations with reference to such areas as trade unions and public policy; the structure, government, and objectives of trade unions; the collective bargaining process; and the labor market.
Prerequisite(s): A minimum grade of "C" in MGNT 3130.

MGNT 4338 Staffing, Training, and Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of human resources planning, recruiting, and selection followed by a detailed investigation of training programs, evaluation of training, and personnel development.
Prerequisite(s): A minimum grade of "C" in MGNT 3130 and MGNT 3334.

MGNT 4431 Purchasing and Negotiation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The nature of today’s business environment places great importance on organizational sourcing. This course helps students to better comprehend the various supply management decisions required to effectively contribute to organizational strategies. The course will introduce key areas of purchasing (supply management) and develop skills in negotiation. Upon successful completion of the course, students will be able to apply conceptual and analytical approaches to better influence and direct decisions where supply meets demand.
Prerequisite(s): A minimum grade of "C" in BUSA 3131.
MGNT 4435 Six Sigma and Continuous Improvement
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introduction to understanding process excellence and continuous improvement with a focus on Six Sigma. Course content will cover how to identify, document, analyze, and improve process mapping and value stream mapping will be discussed. The Six Sigma process will be leveraged to provide students the tools necessary to identify root causes, develop innovative solutions and maintain control of any process improvements. The content of this course aligns with the coverage of the ASQ Six Sigma Green Belt Certification exam, as such, successful completion of this course should also lead to successful outcome on the ASQ Six Sigma Green Belt Certification exam.
Prerequisite(s): Prior or concurrent enrollment and a minimum grade of "C" in BUSA 3131 or STAT 2231 and junior status.

MGNT 4436 Supply Chain Analytics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to advance analytical skills for effective supply chain decision-making involving big data. Use of sophisticated analytical techniques to design and manage efficient and effective operations and processes will be covered. Formulation and interpretation of models supported by both spreadsheet based and advanced process modeling software will be emphasized.
Prerequisite(s): A minimum grade of "C" in MGNT 3430.

MGNT 4438 Global Operations in Supply Networks
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The growing tendency of firms to focus on their core competences, and the resulting vertical disintegration of activities, has required a more holistic and global view of operations functions. Firms have increasingly extended their operations beyond firm and home country boundaries, forming webs of interdependent interactions across the world. This course will cover and integrate concepts and topics related to the role of operations management in the design and management of global supply chains.
Prerequisite(s): A minimum grade of "C" in MGNT 3430.

MGNT 4790 Internship in Management
3-6 Credit Hours. 3-6 Lecture Hours. 0 Lab Hours.
A supervised work-study program in selected business firms throughout the southeast. Any student enrolled in the internship program will be required to work for one full semester.
Prerequisite(s): Junior standing and at least one upper division course in the major. Good academic standing (minimum cumulative GPA is 2.0). Or by permission of the Department Chair.

MGNT 4830 Special Problems in Management
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
A customized course that is under the direction of a faculty sponsor. This course is designed to offer students an opportunity to pursue studies at a level or on topics not covered in scheduled courses. The scope and nature of the material covered is determined in consultation with the faculty sponsor.
Prerequisite(s): A minimum grade of "C" in MGNT 3130 and permission of instructor.

MGNT 4890 Directed Study in Management
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed for independent study and research in selected areas of management under faculty supervision.

MGNT 6330 Business Statistics using Spreadsheet Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Coverage of statistical techniques and concepts commonly applied by managers. Topics covered include descriptive and graphical analysis, probability, sampling, statistical inference, and regression analysis. Spreadsheet and database analysis will be included in the coverage. Provides the foundation for understanding the concepts and applications that will be studied in MGNT 7331.

MGNT 6331 Foundations of Management and Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an integrated course encompassing the principles of management, organizational behavior, and human resources management and marketing. This course will show students how to place management activities within the context of a global operating environment, with consideration given to ethical, legal, and corporate social responsibility issues; plan for the future of the organization using proven planning strategies; and structure an organization effectively, given its environment and strategy. This course also provides a firm foundation for an understanding of the challenges that face the marketing environment, ethics and other current developments in marketing.

MGNT 7330 Leadership and Motivation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of leadership and motivation. This course provides an overview of existing theories and models of leadership and motivation. Using readings, cases, discussion, and guest speakers, the course explains the importance of leadership, motivation, power, and influence in organizational life. Special emphasis is placed on leadership for change.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7331 Managerial Decision Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course will provide a conceptual paradigm for decision makers to construct models and analyze decisions in today's business environment. Quantitative methods will be used to construct models with emphasis placed on representing real world problems and gaining insight and understanding of the decision making process. Specific models developed may include, but are not limited to, statistical fundamentals and probability for decision making, linear programming applications, multiple regression and forecasting models, and statistical quality control. The course will be spreadsheet based.

MGNT 7332 Management for Non-profit Organizations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the unique aspects of managing nonprofit organizations. Their role in society is considered. Special emphasis is placed on HRM functions of the nonprofit, as well as analysis of planning, organizing, directing, and controlling. Boundary spanning activities with governments and private sector will be studied.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7333 Social Issues in Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Overview of the impact of social issues on managerial decision making. Examines the role of the businessperson in modern society. Considers business and society responsibility, pollution, employment discrimination, affirmative action, sexual harassment, consumerism, business and professional ethics, and the social responsibilities of multinational corporations.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7334 Global Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides the student with an understanding of the global manager's role in the global organization. Provides graduate level skills in the management functions of global planning, international organizing, leading expatriates, and diverse cultures, and controlling the global organization.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.
MGNT 7335 Entrepreneurship
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the business formation process that focuses on the creativity, risk-taking, and planning associated with new ventures. Provides information on the entrepreneurial process starting with idea generation, idea development, feasibility analysis, resource identification, and concludes with the development of a coherent business plan.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7336 Readings in Total Quality Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Managerial issues that are important in understanding and implementing an organization-wide "Total Quality Management" process, to include organizational-level strategic quality decisions plus tactical-type decisions related to the total quality management of the organization.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7337 Managing Organizational Change and Development
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an overview of the field of organization development (OD) and the management of change in today's organizations.

MGNT 7338 The Human Resource Process
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides a comprehensive in-depth study of the field of Human Resource Management and the interplay with other business functions and the environment.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7339 Applied Regression Analysis and Forecasting for Business
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course teaches the student how to diagnose practical problems in various business disciplines, decide upon the appropriate model formulation for a given situation, and interpret the statistical results in a managerial context. The course focuses on fitting regression and time series models to real business problems. Students will use Excel and SPSS. When possible, students will analyze real data sets.
Prerequisite(s): A minimum grade of "B" in BUSA 3131 or a minimum grade of "C" in MGNT 6330.

MGNT 7430 Management of Operations for Competitive Advantage
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides an understanding of the production/operations function within and organization. It will focus on the types of decisions to be made at various organizational levels and, where appropriate, on particular models and quantitative techniques that can be useful in making those decisions. Emphasis will be placed on how those decisions are interrelated and on their strategic implications for the firm. Finally, it will consider how the operations function fits in with the other functional areas of the firm.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.

MGNT 7431 Project Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the principles and processes of project management using a systematic approach to problem solving. The project management body of knowledge areas (PMBoK) is covered, along with project management life cycle in addition to traditional project management (e.g., efficiency of the project, operational performance, planning, meeting time and budget goals). This course will give special emphasis to the management of implementation projects relevant to the students' majors, e.g., Enterprise Resource Planning (ERP) for Information Systems students or Total Quality Management (TQM) for Management students. Students are also taught on how to use computer software to facilitate project management, and obtaining project management certification is emphasized.
Cross Listing(s): CISM 7431.

MGNT 9030 Special Topics in Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Addresses important Management topics not covered to any significant extent in other courses. The topic(s) to be covered will be announced each time the course is offered.

MGSE Middle Grades/Secondary

MGSE 2150 Adolescent Growth/Development
3 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
Developmental processes from birth through adulthood, with an emphasis on adolescence. Field experience included.

MGSE 3080 Student & Program Evaluation
3 Credit Hours. 3 Lecture Hours. 2 Lab Hours.
Standardized tests, evaluation methods, and best practices utilizing existing content and pedagogical software, internet resources, and technical writing. Directed field experiences and field based research.

MGSE 3100 Middle School Theory/Practice
3 Credit Hours. 3 Lecture Hours. 6 Lab Hours.
History and purpose of middle school; characteristics of middle school learner, role of middle school teacher and appropriate programs and methods including directed field experiences.

MHSA Health Services Admin

MHSA 5650 Seminar in Long Term Care Administration
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Issues particular to care of residents and management in a long-term care setting. Synthesis of topics studied elsewhere including accreditation standards, human resource issues. On-site visit.

MHSA 5650G Seminar In Long Term Care Adm
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Issues particular to care of residents and management in a long-term care setting. Synthesis of topics studied elsewhere including accreditation standards, human resource issues. On-site visit.

MHSA 5800 Comparative Health Care System
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in depth survey of the structure, function, and comparative performance of a variety of health care delivery and financing systems in the U.S. and other nations of the world.

MHSA 7300 Reimburse & Insur Princ For Hco
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide students a greater understanding of reimbursement and insurance, concepts and techniques that guide health care providers. The tools and models available to health care managers that assist them in their financial decision support and decision making processes as well as retrospectively evaluating and reviewing decisions that have been made are further explored.

MKTG Marketing

MKTG 3131 Principles of Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A basic survey of the field of marketing with emphasis upon the problems of policy determination and marketing management. Consideration is given to the international and ethical aspects of marketing decisions.
Prerequisite(s): Sophomore standing.

MKTG 3132 Principles of Advertising
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Stimulation of market demand through advertising media, including budgeting, research, developing the advertising appeal, selecting the media, placing copy and measuring results, as well as legal, ethical, economic, social, and global aspects of advertising.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.
MKTG 3133 Professional Selling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of methods of selling. Topics covered include analysis of prospects, knowledge of merchandise and its uses, preparation of sales presentations, methods of handling objections and closing sales, with emphasis on relationship selling. Videotaped role playing required.
Prerequisite(s): Prior or concurrent enrollment in and a minimum grade of "C" in MKTG 3131.

MKTG 3134 Business Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of business to business marketing as a subset of the overall discipline of marketing.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 3135 Principles of Retailing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines all aspects of retail store operations including store development, merchandising, human resources, promotion, and security.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 3136 Introduction to E-Commerce
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course presents the strategic themes and issues associated with the field of e-commerce and highlights the technology, capital, public policy, and media infrastructures needed to provide the context in which business strategy operates.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 4030 Special Topics in Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A customized course that allows students to pursue further study in a specific marketing topic at the frontier of an area of research or a contemporary topic related to current real-world events. Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 4131 Marketing Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An activity of information gathering, analysis and interpretation for input into management decision making. Application of current practices and techniques in the marketing research industry. Requires the use of statistical software.
Prerequisite(s): A minimum grade of "C" in MKTG 3131 and BUSA 3131.

MKTG 4132 Retail Store Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A comprehensive problems analysis course that involves both qualitative and quantitative aspects of retail operations. Merchandise budgets, pricing, operations control, and environmental issues are among the topics examined in the course.
Prerequisite(s): A minimum grade of "C" in MKTG 3131 and MKTG 3135.

MKTG 4133 Sales Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Management of sales force activities. Emphasis on organization, territory design, leadership skills, motivation, and cost analysis.
Prerequisite(s): A minimum grade of "C" in MKTG 3131 and MKTG 3133.

MKTG 4134 Services Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An analysis of the marketing aspects of the largest and most rapidly growing sector of the global economy. The principles and concepts of marketing are applied within the context of both consumer services and business services, in both domestic and international settings. Emphasis is placed upon the unique problems and opportunities associated with the marketing of services and the design and implementation of marketing strategies for service organizations.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 4135 Consumer Behavior
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Application of the behavioral science approach to analysis of consumer behavior. Individual, social, sociocultural and psychological factors are studied.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 4136 International Marketing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An examination of the mechanics of international marketing with particular focus on the influence of culture on the development of marketing strategy. Coverage of marketing topics is comprehensive with a particular focus on current events and their relationship to trade. Discussion of ethics and global responsibility are infused throughout the course.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 4137 Marketing Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An integrative course designed to demonstrate the complexity and multi-dimensional nature of marketing decisions. Marketing policies and strategy form the marketing manager's viewpoint.
Prerequisite(s): A minimum grade of "C" in MKTG 3131 and Senior standing.

MKTG 4232 Advanced Selling
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An advanced course that integrates and extends concepts encountered in other selling and sales-related courses. Particular emphasis is placed on negotiating skills and customer relationship management (CRM), as well as general sales-related topics including sales automation and time/territory management. Students will be required to spend time in the field with professional salespeople and to prepare and deliver several effective sales presentations.
Prerequisite(s): A minimum grade of "C" in MKTG 3131 and MKTG 3133.

MKTG 4790 Internship in Marketing
3-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
A supervised work-study program in selected business firms throughout the Southeast and nationally. Students will be permitted to undertake internships only after review of academic qualifications and with firms pre-approved by the Marketing faculty.

MKTG 4830 Special Problems in Marketing
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
An intensive study of some phase of emerging phase of marketing to be developed by the instructor.
Prerequisite(s): A minimum grade of "C" in MKTG 3131.

MKTG 4890 Directed Study in Marketing
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
Independent study and research in selected areas of Marketing under supervision of a member of the Marketing faculty.

MKTG 5830 Marketing Independent Study
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cross Listing(s): MKTG 5830G.

MKTG 5830G Marketing Independent Study
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Cross Listing(s): MKTG 5830.

MKTG 7431 Strategic Marketing Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A strategy planning approach to marketing management from conception and application perspectives. Focus is on the strategic decision-making process supported by self-analysis and external analysis. Legal, ethical, and international aspects are also considered.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in MGNT 7331.
MMFP Multimedia Film & Prod

MMFP 2331 Multi-Camera Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This introductory course focuses on principles and essential tools of visual studio production through the use of camera, lighting, editing and storyboarding. Students are expected to participate in laboratory activities and will produce a limited number of short form productions.
Prerequisite(s): A minimum grade of "C" in COMM 2332.
Corequisite(s): MMFP 2335, MMFP 2336.

MMFP 2335 Introduction to Media Writing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides foundational principles and techniques in a variety of applications of multimedia writing, ranging from ads to scripts..
Prerequisite(s): A minimum grade of "C" in COMM 2332. Corequisite(s): MMFP 2336.

MMFP 2336 Audio Production and Sound Design
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A skills-based course that introduces students to recording techniques, audio editing and sound design for multimedia outlets including radio, television, film and internet. This course focuses on the role of audio in media storytelling.
Prerequisite(s): A minimum grade of "C" in COMM 2332.
Corequisite(s): MMFP 2335.

MMFP 3030 Selected Multimedia Topics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course offers various topics in specialized areas of multimedia study.
Prerequisite(s): A minimum grade of "C" in MMFP 2331 and MMFP 2335 and MMFP 2336 or Permission of Instructor and Departmental approval.

MMFP 3132 Multimedia Film and Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a required course in which multimedia majors utilize and refine knowledge attained in MMFP 2331, MMFP 2335, and MMFP 2336. Students work collaboratively with classmates in meeting deadlines and producing professional quality materials that are suitable for distribution via campus broadcast or Web outlets.
Prerequisite(s): A minimum grade of "C" in MMFP 2331 And MMFP 2335 And MMFP 2336.

MMFP 3234 Directing For Screen
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will learn the techniques for working with actors for screen performance with particular focus on film acting. Auditioning, screen tests, and casting will also be discussed. Students will direct individual scenes for video.
Prerequisite(s): A minimum grade of "C" in MMFP 3331.

MMFP 3331 Media Production II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is a production course that further advances storytelling, including all steps of the production process: planning, management, time line, shot scripting, location lighting, sound, and aesthetic enhancement. Students will work individually and collaboratively in the creation of short and longer form productions.
Prerequisite(s): A minimum grade of "C" in MMFP 2331 and MMFP 2336 or MMJ 3231.

MMFP 3334 Directing For Screen
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will work individually and collaboratively in the creation of short and longer form productions.
Prerequisite(s): A minimum grade of "C" in MMFP 2331.

MMFP 3431 Broadcast Performance
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Broadcast Performance provides techniques to become a more effective oral and visual communicator. Course content includes techniques in analyzing and improving voice, pronunciation, inflection and articulation. Students will also learn announcing techniques required in a variety of applications, such as news reporting, commercial delivery, and narration.
Prerequisite(s): A minimum grade of "C" in COMM 1110 and MMFP 2336 or MMJ 3231.

MMFP 3436 Advanced Audio Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced Audio Production introduces students to advanced recording and audio editing techniques. Students will plan, develop and produce a wide range of audio production types in long-form areas such as news, documentary, or uses of music and special effects to support drama and/ or visual sound track activities. Final projects are expected to be of the quality necessary for public airing and submission to competitions.
Prerequisite(s): A minimum grade of "C" in MMFP 2331 and MMFP 2335 and MMFP 2336.

MMFP 3531 Screenwriting for Film and Television
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores advanced techniques and styles of lighting and cinematography. Classes explore the language and aesthetics of visual storytelling and ways in which movement, lenses, exposure, lighting setups, camera settings and post production techniques affect the digital image. Over the course of the semester, students will shoot footage with the goal of producing a professional portfolio of work.
Prerequisite(s): A minimum grade of "C" in MMFP 2331 and MMFP 3331.
MMFP 4331 Sports Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Sports Production provides the techniques to produce/direct video productions of live sporting events along with the skills needed to operate the equipment associated with such productions. Course content includes techniques for producing/directing, operations of cameras, audio mixing, graphic replay, and switching equipment for a variety of live sports video coverage.
Prerequisite(s): A minimum grade of "C" in MMFP 2335 and MMFP 3331.

MMFP 4335 Documentary Writing and Production
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the aesthetic and technical fundamentals of documentary writing and production. Students will engage in theoretical and ethical issues of documentary, and gain practical experience by researching, writing, planning and producing an original documentary project.
Prerequisite(s): A minimum grade of "C" in MMFP 2335 and MMFP 3331.

MMFP 4331 Senior Project I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is the first course in an advanced, two-semester sequence in which each student works as part of a team in the creation of a radio documentary, corporate training or narrative film, or TV pilot or documentary. This course focuses on production conceptualization, scripting and storyboarding, production management, set and costume design and a creation of a production timeline. In addition, students will submit a portfolio and production reel of their previous work and pass a comprehensive exam that documents their grasp of knowledge and skills they have learned during their program of study. Prerequisite(s): A minimum grade of "C" in MMFP 3331.

MMFP 4332 Senior Project II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This is the second course in an advanced, two-semester sequence in which each student works as part of a team in the completion of an audio documentary, corporate training or narrative film, or TV pilot or documentary. Students will audio record and edit and/or video shoot and edit, create a business and marketing plan, develop a promotional website and premier the work at a public screening.
Prerequisite(s): A minimum grade of "C" in MMFP 4331 and FILM 2200.

MMF 4791 Multimedia Film or Production Internship
3.6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This optional internship is open only to MMFP majors who have earned 2.75 total institution GPA. Faculty will place student applicants in an approved electronic media facility. This course requires a minimum of 300 clock hours of approved and supervised site activity during the semester.
Prerequisite(s): Department approval.

MMF 4792 Multimedia Film or Production Internship
3.6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This optional internship is open only to MMFP majors who have earned 2.75 total institution GPA. Faculty will place student applicants in an approved electronic media facility. This course requires 500 to 600 clock hours of approved and supervised site activity during the semester.
Prerequisite(s): Department approval.

MMFP 4891 Directed Multimedia Study
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Students conduct in-depth research and produce a multimedia project, such as a term paper, audio or video production or web content. The course design must be approved by the instructor and the department chair before course registration.
Prerequisite(s): Department approval.

**MMJ Multimedia Journalism**

MMJ 2331 Introduction to Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an introductory study of the role of journalism with fundamental instruction and practice in writing across multiple platforms.
Prerequisite(s): A minimum grade of "C" in ENGL 1101 or WRIT 1101.

MMJ 3030 Selected Topics in Multimedia Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course covers other various topics in specialty areas of multimedia journalism.
Prerequisite(s): Department approval.

MMJ 3100 News Reporting and Writing I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides theory, instruction, and practice in a variety of news gathering and writing using print and online forms and independent assignments.
Prerequisite(s): A minimum grade of "C" in MMJ 2331.

MMJ 3200 News Reporting and Writing II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Provides theory, instruction, and practice in a variety of news gathering and writing using broadcast and radio forms and independent assignments. Pre-Requisite(s): A minimum grade of C in MMJ 2331.

MMJ 3332 Feature Writing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students survey the gathering and writing of various forms of feature stories and in-depth news feature stories for newspapers and magazines, emphasizing research, investigation, and interview techniques.
Prerequisite(s): A minimum grade of "C" in MMJ 2331.

MMJ 3333 Photojournalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides theory, instruction, and practice in a variety of news gathering and writing using print and digital media, with special emphasis on gathering and editing pictorial material for print and online platforms.
Prerequisite(s): A minimum grade of "C" in MMJ 2331.

MMJ 3334 Audio Production for Journalists
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Audio Production for Journalists is a skills-based course that introduces students to basic field and studio recording techniques, audio editing, and sound design for multimedia journalism outlets including radio, television, and the internet. Students are required to write news scripts that will be used in production assignments. This course focuses on the role of audio in journalistic storytelling.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 3335 Copy Editing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 3460 Travel and Tourism Writing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to travel writing, the rhetoric of tourism, and the forms of writing relevant to contemporary tourism.
Prerequisite(s): A minimum grade of "C" in MMJ 2331.
MMJ 3631 Fundamentals of Multimedia Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course orients students to multimedia communication and discusses how multimedia communication is changing journalism. It offers students theory, instruction and practice in the foundational tools of digital storytelling.
Prerequisite(s): A minimum grade of "C" in MMJ 3100.

MMJ 3711 Multimedia Journalism Practicum
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
This course provides limited supervised experience through appropriate on-campus media outlets where students are required to produce several publishable news stories regarding a variety of topics.

MMJ 4190 Multimedia Journalism Applications
3 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
This lab-based course provides students hands-on experience producing video and audio news content for distribution through university-based media outlets and/or the Internet, as well as writing and editing stories for an online forum.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 4332 Sports Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the theory, instruction and practice of sports journalism across multimedia platforms. Course topics include game coverage, sports-related features, sports columns and sports analysis.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 4333 Opinion Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In this course, students analyze the principles and roles of the various forms of opinion in journalism. This course offers practice in multi-platform opinion research and writing.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 4334 Magazine Writing and Editing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides instruction in magazine writing with an emphasis on writing magazine articles of varying lengths and instruction in editing, layout and design.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 4336 Digital Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the theory, instruction and practice of news delivery over the Internet. Students will practice real time reporting and writing on the Internet utilizing multimedia elements. This is not a traditional journalism course offered online, but a course which teaches students to publish news on an Internet-based news outlet.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200 and MMJ 3631.

MMJ 4337 STEM Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the theory, instruction and practice of multimedia journalistic coverage of science, technology, engineering and mathematics (STEM). Journalism related to health and the environment will also be covered.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200.

MMJ 4339 Public Affairs Reporting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This capstone course will focus on the theory, instruction and practice of in-depth public affairs reporting, which is designed to serve the audience needs for quality information on matters of public affairs. Students produce multiplatform pieces on an issue of public importance.
Prerequisite(s): Minimum grade of C in MMJ 3100, MMJ 3200, and MMJ 3631, and MMJ 3334 or MMJ 3335.

MMJ 4721 Multimedia Journalism Practicum
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course augments the training first provided in MMJ 3711 - Multimedia Journalism Practicum by offering additional and enhanced opportunities to develop primary journalistic skills through work on/off-campus media outlets. Prerequisite(s): MMJ 3711, departmental approval required.

MMJ 4791 Multimedia Journalism Internship
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides multimedia journalism majors with supervised practical experience on a full-time basis at an approved media site. All students are required to earn a C in MMJ 3331 before applying for an internship. A maximum of three hours of internship credit may be applied to the MMJ degree program.
Prerequisite(s): A minimum grade of "C" in MMJ 3100 and MMJ 3200 or departmental approval required and 2.75 GPA.

MMJ 4831 Directed Study in Multimedia Journalism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students conduct in-depth studies of issues associated with multimedia journalism. Prerequisite(s): Departmental approval required.

MSCI Military Science

MSCI 1111 Introduction to Military Science
1 Credit Hour. 0 Lecture Hours. 4 Lab Hours.
Instruction provides the basics of the U.S. Army and its role in National Defense. Includes the following subjects: the role of the U.S. Army in national defense, organization and branches of the U.S. Army, and its role, customs and traditions of the service, military writing, implementing a personal physical fitness program, role of the ARNG and USAR, and roles of the commissioned and non-commissioned officer.
Corequisite(s): MSCI 1510.

MSCI 1122 Basic Military Leadership
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Continues the development of critical military skills, leadership, and management techniques. Provides basic leadership techniques and principles, professional ethics and senior subordinate relationships. Skills development includes instruction in basic marksmanship techniques including safety procedures and firing Army small arms weaponry. One weekend field trip is required.

MSCI 1510 Mountaineering
1 Credit Hour. 0 Lecture Hours. 4 Lab Hours.
A course designed to introduce mountaineering skills, fundamentals and knowledge.
Cross Listing(s): KINS 1510.

MSCI 2121 Basic Military Skills
2 Credit Hours. 0-2 Lecture Hours. 0-2 Lab Hours.
Instruction and practical exercises covering basic skills necessary as a future leader in the U.S. Army. Includes the following subjects: land navigation and map reading, basic first aid, survival and communications.

MSCI 2122 Basic Military Tactics
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Introduces students to the fundamentals of Army leadership and management techniques. Focus is placed on the mission, organization, and composition of small unit teams, principles of offensive operations stressing firepower, movement, communications techniques and introduction to troop leading procedures.
MSCI 2731 Basic Military Skills Practicum (Basic Camp)
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The Basic Camp Course is offered for those students who have not yet met the Basic Course requirements and desire to enroll in the Advanced Course program. This course is currently conducted at Fort Knox, Kentucky, during the summer. Students may earn three credit hours for attending this course through registration at the Registrar's Office upon completion of the course and coordination through the Military Science Department. Students attending this camp are paid and given a travel allowance from their home to camp and back.

MSCI 3131 Advanced Tactics and Applied Leadership I
3 Credit Hours. 0-3 Lecture Hours. 0-2 Lab Hours.
Instruction on the principles of leadership and the leader's role in directing small units in a variety of tactical scenarios. Emphasis is placed on developing and executing orders, troop leading procedures and squad tactical reaction procedures. Land navigation and communication subjects are also included in the course.

MSCI 3132 Advanced Tactics and Applied Leadership II
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Continued instruction on the principles of leadership and the leader's role in directing small units in a tactical environment. Emphasis is placed on offensive and defensive tactics, patrolling techniques, and conducting after action reviews. Instruction on management and leadership techniques emphasizes Green Tab Leadership and leadership assessment.

MSCI 3230 Readings in Military History
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The Pre-Commissioning Military History course covers military history from early colonial warfare in the eighteenth century to the global war on terrorism in the twenty-first century. The purpose of this course is to lead Reserve Officer Training Corps (ROTC) Cadets to understanding the role military officers have played in the development of our country. Completion of this block of instruction is a prerequisite for commissioning as a Lieutenant in the United States Army. A grade of "C" or better is required to commission.

MSCI 3731 Advanced Military Skills Practicum (Advanced Camp)
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The ROTC Advanced Camp is the most important training event for an Army ROTC. The 32-day training event incorporates a wide range of subjects designed to develop and evaluate leadership ability. The challenges are rigorous and demanding, both mentally and physically. Advanced Camp tests intelligence, common sense, ingenuity and stamina. These challenges provide a new perspective on an individual's ability to perform exacting tasks and to make difficult decisions in demanding situations. This course is mandatory for all students wishing to seek a commission in the U.S. Army but registration is not required. Students may earn three credit hours for attending this course through registration at the Registrar's office upon completion of the course and coordination through the Military Science Department.
Prerequisite(s): A minimum grade of "C" in MSCI 3131 and MSCI 3132.

MSCI 3732 Advanced Military Nursing Skills Practicum (Advanced Camp Clinical)
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The study and practical application of nursing skills and leadership ability during a three week (120 clinical hour) encampment experience. Encampment and training is conducted at the Army Medical Department Facility of the students choice in a nursing area of interest to the student. Instructor to student ratio is one to one. Instruction and evaluation is done by a BSN prepared registered nurse.

MSCI 3733 Cultural Understanding and Leadership Program (CULP)
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The Cultural Understanding and Leadership Program (CULP) Course provides an opportunity for Cadets to develop leadership attributes and core leader competencies through understanding of different cultures. Cadets will study the unique culture of an assigned region, recognize the different approaches to problem solving that are culturally based, and perform leadership roles and functions within a team during deployment to a region (the course will be offered at a US Army facility in the region of study).

MSCI 3734 Ranger Challenge
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Designed to be both mentally and physically demanding, Cadets must demonstrate effective leadership, sound knowledge, and a high level of stamina and agility. Cadets will be tested in land navigation, weapons assembly and disassembly, basic rifle marksmanship, grenade assault course, one-rope bridge, obstacle course, road march, and Army Physical Fitness Test. The extensive training is conducted both in and out of the classroom and culminates in team competitions, with the potential to move on to state, regional, and international levels. Some training sessions and competitions will require travel.

MSCI 4131 Military Leadership and Management Seminar
3 Credit Hours. 0-2 Lecture Hours. 0-2 Lab Hours.
Instruction covers U.S. Army Command and Staff functions. Military and professional knowledge topics include writing in the Army style, oral communications, conducting briefings, preparing to conduct training and evaluating training. Topics in Military Justice System will be introduced to include the Law of Land Warfare and Code of Conduct.
Cross Listing(s): MSCI 4131S.

MSCI 4132 Transition to Lieutenant
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Instruction prepares MS IV cadets in their transition from Cadet/student to commissioned officer. Instruction covers leadership ethics and case studies, personnel, logistics, intelligence systems, and additional basic knowledge an individual needs to become a professional officer. Covers Army Officer personal affairs, education, evaluation systems, counseling techniques and Officer-NCO relations.

MSCI 4890 Military Science Independent Study
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.
This course is designed to complement the military education and leadership development of cadets through independent studies in such topics as mission analysis, war gaming, military decision making process, course of action development, revolutions in military affairs, application of technology in the military, troop leading procedures, and other similar topics. This course will help students remain proficient in the military skills they will need upon their commissioning and for future officer training.

MSED Middle Grades & Second Ed

MSED 5333 Literature and Writing for the Middle and Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An intensive study of instructional strategies appropriate for integrating literature and writing instruction. Special attention will be given to identifying and accommodating reading and writing needs of diverse adolescent learners, as well as evaluating the effectiveness of instruction. Students will learn to develop cross-curricular instruction, diagnose reading problems, provide individualization feedback, as well as employ appropriate intervention and assessment methods.
Cross Listing(s): MSED 5333G. Corequisite(s): MGED 3131.
MSED 5333G Literature and Writing for the Middle and Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An intensive study of instructional strategies appropriate for integrating literature and writing instruction. Special attention will be given to identifying and accommodating reading and writing needs of diverse adolescent learners, as well as evaluating the effectiveness of instruction. Students will learn to develop cross-curricular instruction, diagnose reading problems, provide individualization feedback, as well as employ appropriate intervention and assessment methods. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): MSED 5333.

MSED 6120 Introduction to the Middle and Secondary School
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the curriculum, instruction, and organization of middle and secondary schools. It provides substantial knowledge of the nature and needs of adolescent learners as well as curriculum planning and instruction. Corequisite(s): MSED 6122 and MSED 6123.

MSED 6122 Curriculum and Instruction
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines instructional design for middle and secondary schools. It examines classroom practice and provides substantial knowledge of unit and lesson design.
Corequisite(s): MSED 6120 and MSED 6123.

MSED 6123 Middle and Secondary School Practicum
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A supervised introductory teaching experience in grades 4-12. Candidates will observe, assist, plan, and teach in the specific teaching field and grade level for which they are being certified. Emphasis is placed on observation and participation in various aspects of classroom life and the unique needs of adolescent learners. In addition, candidates will plan with the classroom teacher and teach introductory lessons in content area. Corequisite(s): MSED 6120 and MSED 6122.

MSED 6131 Curriculum and Instruction II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to assist teacher candidates in understanding curriculum design, instructional planning and teaching practices in the middle and secondary school and in reflecting on best practices in middle and secondary instruction. Emphasis is placed on planning, presentation, and assessment skills, as well as developing strategies for working with the diverse student populations present in schools. Candidates will design an instructional unit that demonstrates effective instructional strategies, appropriate content, multiple assessments of student learning, and a range of learning resources, including technology.
Cross Listing(s): SCED 6131.

MSED 6237 Science Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to assist students in understanding the purpose of science in the middle and secondary school curricula and becoming familiar with the trends in science instruction. Skills are developed in using classroom laboratory and field trip experiences in planning and evaluating science instruction. Major emphasis is placed on planning and presentation skills and on developing strategies to facilitate working with the diverse student populations present in the public schools.
Prerequisite(s): A minimum grade of "C" in MSED 6120.

MSED 6337 Language Arts Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of methods and materials appropriate in teaching composition, literature, and oral expression in the middle and secondary school language arts/English program. Emphasis will be placed on the writing process, teaching grammar through writing, and literature for grades 4-12. Prerequisite(s): A minimum grade of "C" in MSED 6120; admission to Teacher Education Program.

MSED 6437 Social Science Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the social sciences in the middle and secondary schools. Emphasis is placed on instructional planning for diverse classrooms; assessment of student learning; the use of multiple resources, including technology; and an application of the NCSS standards in the middle and secondary social science curriculum.
Prerequisite(s): A minimum grade of "C" in MSED 6120; admission to Teacher Education Program.

MSED 6537 Mathematics Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of teaching methods and materials, curriculum content, assessment and trends in middle and secondary school mathematics. Emphasis is placed on instructional planning for diverse classrooms; assessment of student learning; the use of multiple resources, including technology; and an application of the NCSS standards in the middle and secondary mathematics curriculum. Prerequisite(s): A minimum grade of "C" in MSED 6120; admission to Teacher Education Program.

MSED 6637 Business Education Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of teaching methods and materials, curriculum content, and trends in teaching Business Education in the middle and secondary schools. The course also includes a study of vocational education programs. Emphasis is placed on instructional planning for diverse classrooms; assessment of student learning; the use of multiple resources, including technology; and an application of the national business education standards.
Prerequisite(s): A minimum grade of "C" in MSED 6120; admission to Teacher Education Program.

MSED 6737 Family and Consumer Sciences Methods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course assists students in understanding the purpose of family and consumer sciences programs in the secondary school curriculum and in becoming familiar with the trends in family and consumer sciences instruction. Students will develop skills in planning and evaluating family and consumer sciences instruction using the classroom as a laboratory. Major emphasis is placed on planning and presentation skills and on developing strategies to facilitate learning of diverse student populations in the public schools. Prerequisite(s): Admission to Teacher Education Program.

MSED 7130 Middle and Secondary School Colloquium
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
In the M.A.T. colloquium course, students will analyze issues related to diverse school populations, classroom and behavior management, technology integration, school governance and teacher leadership, professional performance assessments, educational law, and ethics and professionalism in teaching. Prerequisite(s): Admission to student teaching or supervised teaching.
Corequisite(s): SCED 5799G, MGED 5799G, or ESED 6799.

MSED 7132 Assessment of Student Learning
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will emphasize a study of formal and informal assessments in order to maximize student learning. Emphasis is placed on strategies for collecting, analyzing, and using student performance data to modify instruction and increase student learning for all students.
Prerequisite(s): A minimum grade of "C" in MGED 6131 or SCED 6131.
MSED 7231 Hands-On Science for the Middle and Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to introduce and promote the use of curricula, resources, and activities, which emphasize the use of hands-on/inquiry science appropriate for middle and secondary schools. The course focuses on: the development of hand-on and interdisciplinary science curricula; research relative to the use of inquiry-based science; classroom implementation of science programs; and the development of process and inquiry skills. Emphasis will be placed on addressing local needs and resources in the area of science instruction. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field: biology, broad fields science, chemistry, physics, or middle grades science.

MSED 7232 Teaching the Great Ideas in Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to enhance students’ understanding of the “Great Scientific Premises” that undergird and integrate the science disciplines. Emphasis is placed on hands-on interaction with scientific principles and materials that will enhance the capacity of teachers to support their students’ construction of scientific understanding. The course uses the ideas and experiences of both classical and/or contemporary scientists to engage teachers in a reflective opportunity to gain an appreciation of the rich extent of the history and nature of the scientific enterprise and to prepare them to help their students “make sense” of the science they are expected to learn. It is also designed in a way to engage teachers with the National Science Standards as they explore the science that is necessary to be a scientifically literate citizen of the United States. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field: biology, broad fields science, chemistry, physics, or middle grades science.

MSED 7331 Early Adolescent Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of pedagogical theory and practices for integrating contemporary early adolescent/young adult literature into the middle and secondary school curriculum. Course content will focus on making text selections, workshop approaches, literary circles, and reader response theory. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.
Cross Listing(s): FRMS 7331.

MSED 7333 Writing Instruction for the Middle and Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examines current research in the teaching of writing. Emphasis will be placed on a study of instructional strategies for prewriting, composing, revising, and editing. The course also examines models for integrating writing across subject areas in the middle and secondary schools. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

MSED 7431 Teaching Geography in the Middle and Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to assist social studies teachers implement the National Geographic Standards. These standards identify what every public school student should learn. The course will emphasize the benchmarks that have been adopted in order to assist teachers and curriculum specialists develop guidelines for their own classrooms and school systems.

MSED 7432 Teaching Social Studies in the Middle and Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of the place of social education in middle and secondary schools. In a seminar setting, students will analyze problems challenging middle and secondary school social studies educators including the knowledge base of social science education, teaching for active and responsible citizenship, making curricular choices, selecting appropriate instructional techniques, and assessing current trends in middle and secondary school social studies education. Candidates must tailor the course assignments and experiences to their specific grade levels and certification/content field: economics, geography, history, political science, or middle grades social studies.

MSED 7433 Teaching Business Education in the Secondary Schools
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will examine current trends, issues, and research related to teaching Business Education in the secondary schools. Emphasis is placed on state and national business education standards, instructional strategies, assessments, and resources that have an impact on student learning. Candidates will examine, analyze, and reflect on current problems challenging business education teachers in the secondary schools.

MSED 7535 Teaching Middle Grades and Secondary Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth study of current content standards, methods and assessment strategies for teaching middle grades and secondary mathematics. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

MSED 7635 MAT Seminar in Middle Grades and Secondary Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a seminar for the MAT in Middle Grades Education and Secondary Education programs. Emphasis is placed on a study of the historical and contemporary research, instruction, and recommended practices for effective middle and secondary schools. Current trends and issues in middle grades and secondary education will be examined. A classroom action research project is included. Prerequisite(s): A minimum grade of “C” in MGED 6131 or SCED 6131, and a methods course with a minimum grade of “C”.
Corequisite(s): Enrolled in MGED 5799G, or SCED 5799G, or MGED 6799, or SCED 6799.

MSED 7639 MED Seminar in Middle Grades and Secondary Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is a seminar for the MED in Middle Grades Education and Secondary Education programs. Emphasis is placed on a study of the historical and contemporary research, instruction, and recommended practices for effective middle and secondary schools. Current trends and issues in middle grades and secondary education will be examined. A classroom action research project is included. Prerequisite(s): A minimum grade of “C” in EDUR 7130 and MSED 8333 or MSED 8331, and an advanced pedagogy course in one’s certified concentration area with a minimum grade of “C”; MED in Middle Grades candidates must have completed MGED 8131 and MGED 8132 with a minimum grade of “C”; no courses are concurrent.

MSED 8231 Trends in Middle and Secondary Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Designed to provide an in-depth study of current issues, reforms, and trends in middle grades and secondary science. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field: biology, broad fields science, chemistry, physics, or middle grades science.
MSED 8331 Trends in the Content Areas
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides opportunities to explore a selected political, cultural and/or technological trend as it relates to teaching in the content areas. The specific focus of the course will vary, but the structure and learning goals will remain constant. Students will explore the theoretical foundations of the selected trends as well as pedagogical practices aligned with the trends in their specific certification/content field and grade levels. Candidates must tailor the course assignments and experiences to their specific grade levels and certification/content field.

MSED 8333 Readings and Research in the Content Areas
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides opportunities for students to analyze current research in their certification/content field and grade levels in relation to classroom practice. More specifically students will explore current trends and issues in teaching and learning in the disciplines through intensive reading of scholarly and practitioner journals. Students will select one issue, review current literature that addresses this issue and write a review that summarizes findings from this research and implications for their classroom practice. Issues addressed in the course may include topics such as teaching English Language Learners in content area classrooms, using Web 2.0 technologies effectively and role of discussion in learning content.

MSED 8434 Trends in Middle and Secondary Social Studies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of current trends and issues in social studies curriculum and instruction. An emphasis is placed on an analysis of problems challenging social studies teachers in the middle and secondary schools. Candidates must tailor the course assignments and experiences to their specific grade levels and certification/content field: economics, geography, history, political science, or middle grades social studies.

MSED 8530 Foundations of Teaching Grades 4-12 Mathematics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An in-depth analysis of the content and pedagogy of middle grades and secondary mathematics. Emphasis will be placed on a study of the research in middle grades and secondary mathematics curriculum and instruction as well as the historical development of current mathematics content requirements. Candidates must tailor their course assignments and experiences to their specific grade levels and certification/content field.

MUSA Applied Music

MUSA 1100 Applied Music
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in all of the following: MUSC 2334 and MUSC 2512 and MUSC 2514.

MUSA 1200 Applied Music
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 2100 Applied Music
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.

MUSA 2101 Recital
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 2129 Applied Music - Composition
2 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
Prerequisite(s): A minimum grade of "C" in MUSC 1311 and MUSC 1332 and MUSC 1514.

MUSA 2200 Applied Music
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 3100 Applied Music
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.

MUSA 3101 Junior Recital
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 3129 Intermediate Composition
2 Credit Hours. 1 Lecture Hour. 0 Lab Hours.

MUSA 3200 Applied Music
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 4111 Senior Recital
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.

MUSA 4129 Advanced Composition
2 Credit Hours. 1 Lecture Hour. 0 Lab Hours.

MUSA 4200 Applied Music
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.

MUSA 4300 Applied Music
2 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 5110 Coaching for Singers
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
The purpose of this course is to provide career-track singers with an opportunity to work with an expert on such matters as interpretation, diction, and artistic communication.

Cross Listing(s): MUSA 5110G.

MUSA 5110G Coaching for Singers
1 Credit Hour. 0 Lecture Hours. 0 Lab Hours.
The purpose of this course is to provide career-track singers with an opportunity to work with an expert on such matters as interpretation, diction, and artistic communication. Graduate students will have additional requirements as assigned by instructor.

Cross Listing(s): MUSA 5110.

MUSA 7191 Recital
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

MUSA 7192 Composition
1-3 Credit Hours. 0.5-1.5 Lecture Hours. 0 Lab Hours.

MUSA 7199 Applied Conducting
1-3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
N/A.

MUSC Music

MUSC 1100 Music Appreciation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to the development of listening skills, the fundamental elements of music, a historical survey of major periods and styles in Western music, and music in selected non-Western cultures.

MUSC 1311 Introduction to Composition
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Introduction to the development of listening skills, the fundamental elements of music, a historical survey of major periods and styles in Western music, and music in selected non-Western cultures.

MUSC 1315 Guitar Class Non-Major
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Basic elements of guitar performance for non-music majors.

MUSC 1316 Voice Class Non-Major
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Basic elements of vocal performance for non-music majors.

MUSC 1331 Music Theory I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Development of a command of the fundamental elements in music notation and structure, paralleling the work in MUSC 1513. Emphasizes notation, scales, tonality, intervals, harmony, cadences, nonharmonic tones, texture, and melodic organization.
MUSC 1332 Music Theory II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Continuation of the manipulation of elements in music notation and  
structure, paralleling the work in MUSC 1514. Emphasizes voice-leading  
in two and four voices, harmonic progression and rhythm, the dominant  
seventh chord, leading- tone seventh chords, and non-dominant seventh  
chords.  
Prerequisite(s): A minimum grade of "C" in MUSC 1331.  

MUSC 1333 Music Fundamentals I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Basic music theory with emphasis on note reading, understanding scales  
and rhythms, simple chord formations and their applications, basic  
relationships between melody and harmony and reading melodies at sight.  

MUSC 1334 Music Fundamentals II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Further study in melodic and harmonic relationships with emphasis on  
chord symbols, and chord progressions through the study and analysis of  
musical compositions.  
Prerequisite(s): MUSC 1333.  

MUSC 1511 Group Piano I  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
The study of keyboard theory and development of functional piano skills  
at the elementary level with emphasis on harmonization, sight-reading  
transposition, improvisation, and scales and chords.  

MUSC 1512 Group Piano II  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Continuation of skills begun in MUSC 1511 Prerequisite(s): A minimum  
grade of "C" in MUSC 1511.  

MUSC 1513 Aural Skills I  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Development in aural perception and sight-singing skills to parallel the  
work in MUSC 1331. Emphasizes melodic and harmonic dictation and  
sight-singing.  

MUSC 1514 Aural Skills II  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Development in aural perception and sight-singing skills to parallel the  
work in MUSC 1332. Emphasizes melodic and harmonic dictation and  
sight-singing. Prerequisite(s): A minimum grade of "C" in MUSC 1513.  

MUSC 1515 Technology in Music  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Introduction to the uses of technology in music, including acoustics,  
hardware/software, digital keyboards and MIDI sequence recording and  
editing. Supervised lab work with digital synthesizers and computers.  

MUSC 2280 Group Piano Non-Music Majors  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Keyboard literature and techniques at the beginning and elementary  
levels. May be repeated for credit.  

MUSC 2311 Jazz Improvisation I  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
Theory and techniques of jazz improvisation with emphasis on functional  
harmony, melodic form, and development of style.  
Prerequisite(s): A minimum grade of "C" in MUSC 1332 and MUSC 1514.  

MUSC 2312 Jazz Improvisation II  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
Theory and techniques of jazz improvisation with emphasis on functional  
harmony, melodic form, and development of style.  
Prerequisite(s): A minimum grade of "C" in MUSC 2311.  

MUSC 2320 Woodwind Methods  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Principles of woodwind instrument performance and pedagogy.  

MUSC 2333 Music Theory III  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of traditional, chromatic, and twentieth century forms and melodic/  
harmonic practices. Exercises in composition are included. Prerequisite(s):  
A minimum grade of "C" in MUSC 1332.  

MUSC 2334 Music Theory IV  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of traditional, chromatic, and twentieth century forms and melodic/  
harmonic practices. Exercises in composition are included. Prerequisite(s):  
A minimum grade of "C" in MUSC 2333.  

MUSC 2411 Diction for Singers I  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Focuses on the study of the International Phonetic Alphabet and its  
application to the Italian, English, and Latin languages within the standard  
vocal literature.  

MUSC 2412 Diction for Singers II  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Focuses on the study of the International Phonetic Alphabet and its  
application to the German, French, and Spanish languages within the  
standard vocal literature.  

MUSC 2431 Piano Pedagogy I  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An introduction to the teaching of piano at the elementary level through  
an examination of beginning methods and materials, teaching techniques,  
and studio management.  

MUSC 2511 Group Piano III  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Continuation of skills developed in MUSC 1512 at the intermediate level,  
with additional work in score reading and accompanying.  
Prerequisite(s): A minimum grade of "C" in MUSC 1512.  

MUSC 2512 Group Piano IV  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Continuation of skills developed in Group Piano III. Final Exam serves as  
the Piano Exit Exam.  
Prerequisite(s): A minimum grade of "C" in MUSC 2511.  

MUSC 2513 Aural Skills III  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Development of aural perception and sight-singing. Emphasis on melodic  
and harmonic dictation and error detection. Supervised lab sessions for  
ear training practice. Prerequisite(s): A minimum grade of "C" in MUSC  
1514.  

MUSC 2514 Aural Skills IV  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
Development of aural perception and sight-singing. Emphasis on melodic  
and harmonic dictation and error detection. Supervised lab sessions of  
ear training practice. Prerequisite(s): A minimum grade of "C" in MUSC  
2513.  

MUSC 2560 Wind Ensemble  
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.  
Repertoire selection from standard wind ensemble literature. Public  
performances required.  

MUSC 2621 Introduction to Music Education  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
History and philosophy of music education, basic teaching methods,  
lesson planning skills, and familiarity with professional resources and the  
Georgia Performance Standards.  
Prerequisite(s): A minimum grade of "C" in MUSC 1512 and MUSC 1332.  

MUSC 3031 Selected Topics in Music  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Topics vary with individual professor.  

MUSC 3111 Method and Pedagogy, Violin/Viola I  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course emphasizes string techniques in terms of methodology with an  
organized method of teaching approaches.
MUSC 3112 Method and Pedagogy, Violin/Viola II
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course emphasizes string techniques in terms of methodology with an organized method of teaching approaches which will include practical training and repertoire application.

MUSC 3120 Form and Analysis
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Principles of form in music, including imitative techniques and forms, and techniques of harmonic analysis. Open only to music majors.
Prerequisite(s): A minimum grade of "C" in MUSC 2334.

MUSC 3131 History of Music I
3 Credit Hours. 3 Lecture Hours. 1 Lab Hour.
A chronological survey of music from antiquity to the end of the Baroque period, emphasizing issues of style, performance practice, musical aesthetics, and cultural context.
Prerequisite(s): HIST 1112.

MUSC 3132 History of Music II
3 Credit Hours. 3 Lecture Hours. 1 Lab Hour.
A chronological survey of music from the classic period to the present, emphasizing issues of style, performance practice, musical aesthetics, and cultural context.
Prerequisite(s): HIST 1112.

MUSC 3211 Instrumental Methods I
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
Designed for the choral music education student, this course provides an overview of theoretical and practical knowledge of the woodwind and string families. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the Music Education program.

MUSC 3212 Instrumental Methods II
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
Designed for the choral music education student, this course provides an overview of theoretical and practical knowledge of the brass and percussion families. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the music education program.

MUSC 3213 Percussion Methods
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
This course emphasizes acquisition of theoretical and practical knowledge of percussion instruments. It includes instructional application through playing and the study of methods and materials. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the music education program.

MUSC 3215 String Methods
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
This course emphasizes acquisition of theoretical and practical knowledge of string instruments. It includes instructional application through playing and the study of methods and materials. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the music education program.

MUSC 3216 Voice Class
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
This course is designed to teach the elements of healthy voice production to instrumental majors in the music education program. It includes study of breathing for singing, elements of balanced tone production, an introduction to the International Phonetic Alphabet, and instructional application through singing and study of methods and materials. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the music education program.

MUSC 3217 Woodwind Methods
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
This course emphasizes acquisition of theoretical and practical knowledge of woodwind instruments. It includes instructional application through playing and the study of methods and materials. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the music education program.

MUSC 3218 Brass Methods
1 Credit Hour. 2 Lecture Hours. 0 Lab Hours.
This course emphasizes acquisition of theoretical and practical knowledge of brass instruments. It includes instructional application through playing and the study of methods and materials. This course is intended for Music majors and students must be admitted to the Music Education program before enrolling in the course.
Prerequisite(s): Admission to the music education program.

MUSC 3232 Elementary Methods and Materials in Music
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Designed for the music specialist in the elementary school, with an emphasis on materials and methodology used in preschool through grade eight. Opportunities will be provided for observing, planning, and teaching in the elementary school classroom. Restricted to music majors.
Prerequisite(s): Admission to the Teacher Education Program.

MUSC 3300 Music Teaching Lower Schools I
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Analysis and evaluation of pedagogical approaches and materials for teaching general and vocal music in the lower school (K-12). Includes teaching practice. Open only to music majors.

MUSC 3301 Music Teach Middle/High School
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Analysis and evaluation of pedagogical approaches and materials for teaching general music in the middle and high schools. Includes history of music education, design of curriculum and lesson planning, and teaching practices. Open only to music majors.

MUSC 3311 Jazz Improvisation III
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Theory and techniques of Jazz improvisation with emphasis on functional harmony, melodic form, and development of style.
Prerequisite(s): A minimum grade of "C" in MUSC 2312.

MUSC 3312 Jazz Improvisation IV
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Theory and techniques of jazz improvisation with emphasis on functional harmony, melodic form, and development of style. Prerequisite(s): A minimum grade of "C" in MUSC 3311.

MUSC 3320 Music Teaching Lower School II
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Continuation of MUSC 3310 with emphasis on the Orff, Kodaly, and DBME strategies in teaching elementary music. Includes teaching practice.
Prerequisite(s): A minimum grade of "C" in MUSC 3300.

MUSC 3330 Band Methods
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
Organization and development of school band ensembles and problems of teaching instrumental music. Includes a laboratory experience which stimulates ensemble rehearsals.

MUSC 3334 Survey of Latin American Music
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of Latin American Music covers traditional, popular, and classical music from the region as well as the historic and social contexts of their evolution.

MUSC 3335 History of Rock & Roll
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a survey of the history of rock-and-roll music and its impact on and reflection of the broader culture.
MUSC 3340 Secondary Choral Methods  
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.  
Development of skills organizing, teaching, and conducting choral music in secondary schools. Includes a laboratory experience which provides an opportunity for students to conduct ensemble rehearsals.

MUSC 3411 Brass Pedagogy  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course is a survey of teaching techniques (studio teaching of instruments).  
Prerequisite(s): Admission to the music performance program.

MUSC 3412 Percussion Pedagogy  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course is a survey of teaching techniques (studio teaching of instruments).  
Prerequisite(s): Admission to the music performance program.

MUSC 3413 String Pedagogy  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course is a survey of teaching techniques (studio teaching of instruments).  
Prerequisite(s): Admission to the music performance program.

MUSC 3414 Woodwind Pedagogy  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course is a survey of teaching techniques (studio teaching of instruments).  
Prerequisite(s): Admission to the music performance program.

MUSC 3420 Piano Literature I  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
The study of solo piano music from the late Baroque Period through the compositions of Beethoven, with special attention given to representative genres and composers.

MUSC 3421 Piano Literature II  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
The study of solo piano music from the late Baroque Period through the compositions of Beethoven, with special attention given to representative genres and composers.

MUSC 3422 Vocal Literature I  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Study of the historical development of the Italian, French, and Spanish song literature, focusing on selected works of representative composers in each stylistic period.  
Prerequisite(s): A minimum grade of "C" in MUSC 2411 and MUSC 2412.

MUSC 3423 Vocal Literature II  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Study of the historical development of the German and English song literature, focusing on selected works of representative composers in each stylistic period.  
Prerequisite(s): A minimum grade of "C" in MUSC 2411 and MUSC 2412.

MUSC 3432 Piano Pedagogy II  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is an introduction to the teaching of piano at the pre-school, adult and intermediate levels.  
Prerequisite(s): A minimum grade of "C" in MUSC 2431.

MUSC 3435 Imagine: The Music of the Beatles  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
An examination of the music of the Beatles in the context of the popular culture of the 1950s and 1960s. While attention will be given to the history and development of the Beatles as a group, the course will focus primarily on the songs themselves.

MUSC 3470 Music Management  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Theory and practice in music programming management, including audience analysis and development, publicity, promotions, and marketing tools developed.

MUSC 3510 Savannah Winds  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Concert band consisting of rehearsals and performances of a wide variety of repertoire. Open to all qualified students.

MUSC 3530 Vocal Chamber Ensemble  
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.  
Repetoire selected from the Renaissance to contemporary vocal chamber literature. Membership open to all students by audition.  
Corequisite(s): MUSC 3540.

MUSC 3540 University Chorale  
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.  
Repetoire selected from standard choral concert literature.

MUSC 3560 Wind Ensemble  
1 Credit Hour. 0 Lecture Hours. 3 Lab Hours.  
Advanced concert band consisting of rehearsals and performances of a wide variety of repertoire. Open to all qualified students.

MUSC 3610 Orchestration  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Theory and practice in orchestration, literature and performance practice for school instrumental ensembles.  
Prerequisite(s): A minimum grade of "C" in MUSC 2411.

MUSC 3620 Marching Band Techniques  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course examines the development of marching band over time. Students are introduced to basic concepts in marching techniques, marching band administration, drill writing, and drumline. Students gain competence in drill writing software, developing a policy and procedures handbook, and administering color guard and majorette techniques.

MUSC 3630 Choral Repertoire  
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.  
Literature and related performance practice for school choral ensembles. Includes a laboratory experience which provide opportunities for students to teach the literature and apply performance-practice concepts in ensemble rehearsals.

MUSC 3640 Band Repertoire  
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.  
Literature and performance practice for school instrumental ensembles. Includes a laboratory situation to simulate an ensemble setting.

MUSC 4200 Marching Band Techniques  
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.  
Organization and development of a school marching band, including drill writing, scoring and rehearsal techniques. Must have passed Rising Junior Exam.

MUSC 4411 Basic Conducting  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour.  
A practical course directed toward the cultivation and development of the skills required for students who plan to conduct music ensembles.  
Prerequisite(s): A minimum grade of "C" in MUSC 1331.
MUSC 4421 Voice Pedagogy  
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour.  
The development of the teaching of singing through the study of its history and the investigation and application of research in vocal production and pedagogy. Supervised teaching of applied lessons and a survey of teaching materials.  
Prerequisite(s): A minimum grade of "C" in MUSC 2512 and MUSC 2514.  

MUSC 4431 Choral Conducting and Literature  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours. 
Designed to provide students with in-depth knowledge of choral conducting techniques and literature. Students will study appropriate conducting gestures specific to choral ensembles while acquiring knowledge of the great monuments of choral literature.  
Prerequisite(s): A minimum grade of "C" in MUSC 4411. 

MUSC 4432 Instrumental Conducting and Literature  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours. 
Development of conducting skills through the study of literature appropriate for all levels of instrumental ensembles.  
Prerequisite(s): A minimum grade of "C" in MUSC 4411.  

MUSC 4522 Secondary Methods and Materials in Music  
3 Credit Hours. 3 Lecture Hours. 1 Lab Hour. 
Designed to provide the music education candidate with rehearsal and teaching skills necessary to function in the secondary music classroom. Through in class instruction and thirty hours of structured field experience, students will learn rehearsal and teaching techniques, management and administration strategies, and develop specific skills related to effective secondary music teaching. Prerequisite(s): A minimum grade of "C" in MUSC 4432 or MUSC 4431; admission to the Teacher Education Program.  

MUSC 4534 Recording Studio Techniques  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours. 
This course focuses on the technical and creative investigation of current multi-track recording and mixing techniques. Technical aspects of essential signal processing techniques are covered and their aesthetic implications are actively explored. Students examine these topics through the creation of music in a recording studio using a variety of tools including hardware and software processors and multi-tracking software.  
Prerequisite(s): A minimum grade of "C" in MUSC 1515.  

MUSC 4535 Digital Audio Workstations  
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours. 
The course covers essential techniques and concepts for the fluent use of Digital Audio Workstations. Students will examine multiple aspects of Digital Audio Workstations including: audio recording, audio editing, signal routing, audio mixing, MIDI, and synthesis techniques using virtual instruments. Technical concepts related to digital audio will also be covered. At the core of the course is an emphasis upon the application of technical knowledge through the creation of musical works.  
Prerequisite(s): A minimum grade of "C" in MUSC 1515. 

MUSC 4611 Seminar in Music Education  
1 Credit Hour. 1 Lecture Hour. 1 Lab Hour. 
Designed to provide the music education candidate with skills for administering school music programs, as well as rehearsal, teaching, and assessment skills. As part of this course, students will complete a field experience in preparation for student teaching.  
Prerequisite(s): A minimum grade of "C" in MUSC 4532 and enrollment in Teacher Education Preparation program. 

MUSC 4630 edTPA Music Internship Support Seminar  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours. 
edTPA Internship Support Seminar is a hybrid course for candidates who must retake edTPA. This course consists of a six-week internship consisting of on-campus class sessions on identified dates and a daily field experience (7:45 a.m. - 12 noon). The course will occur during the first six weeks of the semester. Learning in this seminar supports successful completion of the internship and state-mandated edTPA evaluation of teaching practice. Candidates reflect on their own practice in relation to planning, instruction, and assessment. Candidates must be approved to take this course.  
Prerequisite(s): MUSC 4799. 

MUSC 4632 Student Teaching Seminar  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours. 
Designed to support music student teachers who are preparing materials to submit to edTPA.  
Corequisite(s): MUSC 4799. 

MUSC 4750 Internship II-Student Teaching  
12 Credit Hours. 0 Lecture Hours. 1-12 Lab Hours. 

MUSC 4799 Student Teaching in P-12 Music Education  
9 Credit Hours. 0 Lecture Hours. 0 Lab Hours. 
Student Teaching in P-12 Music Education is a period of guided music teaching during which the candidate, under the direction of a clinical supervisor, takes increasing responsibility for leading the school music experiences of a given group of learners over a period of consecutive weeks. The candidate engages more or less directly in many of the activities which constitute the wide range of a music teacher's assigned responsibilities.  
Prerequisite(s): Completion of all degree courses. 

MUSC 4800 Advanced Choral Conducting  
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour. 
Advanced techniques in choral conducting. Includes a laboratory experience which provide opportunities for students to conduct ensemble rehearsals.  
Prerequisite(s): A minimum grade of "C" in MUSC 3120 and MUSC 3610. 

MUSC 4810 Adv Instrumental Conducting  
2 Credit Hours. 2 Lecture Hours. 1 Lab Hour. 
Open only to music majors. Advanced techniques in instrumental conducting. Includes a laboratory experience that provides opportunities for students to conduct ensemble rehearsals and possibly one public performance.  
Prerequisite(s): A minimum grade of "C" in MUSC 3120 or MUSC 3610.  
Corequisite(s): MUSC 3560. 

MUSC 4850 Senior Project  
2 Credit Hours. 0 Lecture Hours. 4 Lab Hours. 
Written research document submitted for faculty review to address senior recital program. May include: composer biography, program notes, translations (if applicable), formal analysis, genre parameters or other material, as approved by the department. 

MUSC 4891 Special Problems in Music  
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours. 
Topics vary with individual professor.  

MUSC 4910 Internship  
1-5 Credit Hours. 0 Lecture Hours. 0 Lab Hours. 
Supervised individually designed course project involving off-campus study, work, and/or research. Projects are under the joint supervision of the sponsoring institution and the faculty supervisor. 

MUSC 5030 Selected Topics Music Literature  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours. 
Specialized study of a specifically announced area in music literature. Cross Listing(s): MUSC 5030G.
MUSC 5030G Selected Topics Music Literature
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Specialized study of a specifically announced area in music literature. Graduate students must complete an extra project for the course.
Cross Listing(s): MUSC 5030.

MUSC 5031 Selected Topics in Music
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics vary with individual professor.
Cross Listing(s): MUSC 5031G.

MUSC 5031G Selected Topics in Music
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Topics vary with individual professor. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): MUSC 5031.

MUSC 5231 Music in the Classic Period
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory from the Classic period.
Prerequisite(s): A minimum grade of "C" in MUSC 3132. Cross Listing(s): MUSC 5231G.

MUSC 5231G Music in the Classic Period
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory from the Classic period. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): MUSC 5231.

MUSC 5232 Music in the Romantic Period
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory from the Romantic period. Cross Listing(s): MUSC 5232G.

MUSC 5232G Music in the Romantic Period
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory from the Romantic period. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): MUSC 5232.

MUSC 5233 Music in the Contemporary Period
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends aesthetic and stylistic developments, significant figures, and selected repertory from the Contemporary period. Cross Listing(s): MUSC 5233G.

MUSC 5233G Music in the Contemporary Period
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory from the Contemporary period. Cross Listing(s): MUSC 5233.

MUSC 5234 History of Opera
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory in opera history. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): MUSC 5234G.

MUSC 5234G History of Opera
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of major historical trends, aesthetic and stylistic developments, significant figures, and selected repertory in opera history. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do. Cross Listing(s): MUSC 5234.
MUSC 5430 Advanced Choral Arranging  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Practical experience in arranging for various vocal combinations, score analysis, score reading, and manuscript preparation for publishers.  
Prerequisite(s): A minimum grade of "C" in MUSC 2334.  
Cross Listing(s): MUSC 5430G.

MUSC 5430G Advanced Choral Arranging  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Practical experience in arranging for various vocal combinations, score analysis, score reading, and manuscript preparation for publishers. Graduate students must complete an extra project for the course.  
Cross Listing(s): MUSC 5430.

MUSC 5431 Advanced Instrumental Arranging  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of issues and techniques in composing arrangements for various types of instrumental ensembles with practical experience.  
Prerequisite(s): A minimum grade of "C" in MUSC 2334.  
Cross Listing(s): MUSC 5431G.

MUSC 5431G Advanced Instrumental Arranging  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of issues and techniques in composing arrangements for various types of instrumental ensembles with practical experience.  
Cross Listing(s): MUSC 5431.

MUSC 5432 Advanced Jazz Arranging  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of issues and techniques in composing arrangements for various types of jazz ensembles with practical experience.  
Cross Listing(s): MUSC 5432G.

MUSC 5432G Advanced Jazz Arranging  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Study of issues and techniques in composing arrangements for various types of jazz ensembles with practical experience.  
Cross Listing(s): MUSC 5432.

MUSC 5539 Selected Topics in Music Technology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Specialized study of a specifically-announced area in music technology.  
Cross Listing(s): MUSC 5539G.

MUSC 5539G Selected Topics in Music Technology  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Specialized study of a specifically-announced area in music technology. Graduate students must complete an extra project for this course.  
Cross Listing(s): MUSC 5539.

MUSC 5630 Music, Technology and Contemporary Culture  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Cross Listing(s): MUSC 5630G.

MUSC 5630G Music, Technology and Contemporary Culture  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examines the development of sound technology, the impact of music technology on listeners, performers, and composers, the diversification and globalization of musical styles, and the changing sociological roles of music in contemporary culture from both historical and ethnographic points of view. Students will also explore specific topics of their own interest in a seminar setting. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.  
Cross Listing(s): MUSC 5630.

MUSC 6111 Method and Pedagogy, Violin/Viola I  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course emphasizes string techniques in terms of methodology with an organized method of teaching approaches.

MUSC 6112 Method and Pedagogy, Violin/Viola II  
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.  
This course emphasizes string techniques in terms of methodology with an organized method of teaching approaches which will include practical training and repertoire application.

MUSC 6131 Music Reference Tools and Resources  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A survey of basic and advanced reference sources and tools relating to music, both printed and on-line; methods for locating, evaluating, and citing manuscript and printed musical sources, including critical editions; resources for finding music-related materials on the Internet; and tools for dealing with music reference materials in foreign languages.

MUSC 6689 Topics in Music  
1-3 Credit Hours. 1-3 Lecture Hours. 0 Lab Hours.  
A study of topics from selected areas of instrumental music, vocal music, piano music, or music education.  
MUSC 6750 Graduate Internship  
4 Credit Hours. 0 Lecture Hours. 4 Lab Hours.  
MUSC 7039 Selected Topics in Music Pedagogy  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Specialized study of a specifically-announced area in music pedagogy.  
MUSC 7092 Selected Topics in Music  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Topics vary with individual professor.  
MUSC 7211 History and Philosophy of Music Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
A study of historical and philosophical currents which have shaped current music education practices.  
MUSC 7232 Research in Music Learning  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
This course is a presentation of quantitative and qualitative research methods, with emphasis on connecting research to music learning and performance contexts. Students will develop skills in design, data interpretation, and application to practice.  
MUSC 7239 Selected Topics in Music Education  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Specialized study of a specifically-announced area in music education.  
MUSC 7330 Chamber Music Analysis and Literature  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Examination, discussion, and analysis of selected chamber music literature from the Baroque to the present.  
MUSC 7331 Advanced Analytical Techniques  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Techniques for analyzing form and other stylistic elements of music, emphasizing larger and more complex works; overview of major analytical methodologies; issues in interpreting published analytical research; combining analytical and historical research.  
MUSC 7339 Selected Topics in Music Theory  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Specialized study of a specifically-announced area in music theory.  
MUSC 7432 Choral Literature  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Designed to provide students with in-depth knowledge of choral literature. Students will study the major genres from the Pre-Renaissance to the present with emphasis on the mass, motet, requiem, and oratorio.  
MUSC 7436 Wind Ensemble Literature Before 1950  
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.  
Survey of the historical development of wind band literature and ensembles up to 1950 with respect to composers, composition, performers, instrumentation, and events.
MUSC 7437 Wind Ensemble Literature After 1950
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Survey of the historical development of wind band literature and ensembles after 1950 with respect to composers, composition, performers, instrumentation, and events.

MUSC 7530 Digital Audio Montage
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Explores digital audio theory and practice, sound recording techniques, sound and music representation, sound transformation, and compositional methods of morphological montage through the creation and performance of musical works in the electronic medium.

MUSC 7533 Sound Design and Processing
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Examines sound design and processing through the use of the Supercollider programming language for musical digital signal processing. Students will explore the fundamentals of object-oriented computer programming and musical digital signal processing through the creation and performance of musical works in the electronic medium and the creation of their own audio synthesis and transformation software.

MUSC 7534 Interactive Media
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Examines the use of interactivity in multimedia. Students will learn high-level programming concepts, algorithmic design, and digital signal processing principles using Cycling '74 Max software.

MUSC 7535 Advanced MIDI Sequencing
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course explores the core concepts of acoustics and psychoacoustics, the MIDI protocol, music composition and performance using MIDI, hardware-based sound synthesis, hardware-based effects, and audio sampling through the creation and performance of musical works in the electronic medium.

MUSC 7630 Seminar in Advanced Conducting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Refinement of conducting and rehearsal techniques including issues related to preparation, gesture, blend and balance, intonation and diction, error detection, pedagogy, and rehearsal strategies. Includes supervised rehearsal and performance practicum. May be repeated for credit toward the degree.

MUSC 7633 Advanced Score Reading Techniques
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Score study techniques and discussion of issues in preparation for conducting across all areas of band, choral, orchestral, and mixed ensembles.

MUSC 7634 Music and the Brain
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course investigates aspects of music performance, perception, understanding and skill development through a cognitive lens. Course materials will be drawn from recent neurological and behavioral research, as well as from popular press.

MUSC 7639 Selected Topics in Conducting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Specialized study of a specifically-announced area in music conducting.

MUSC 7891 Special Problems in Music
1-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Topics vary with individual professor.

MUSC 7931 Music Education Final Project
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Planned Project, written or practical, directed by the student’s project advisor.

MUSC 7932 Music Technology Final Project
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Planned project directed by the student’s project advisor.

#### NSCI 1001 Introduction To Naval Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduce midshipmen to NROTC Program mission, organization, regulations and broad warfare components of the naval service. Included is an overview of officer and enlisted rank and rating structure, training and education, promotion and advancement and retirement policies. This course also covers naval courtesy and customs, as well as a study of the organization of the naval service. Students are familiarized with the major challenges facing today's naval officers, especially, in the areas of leadership and human resources management.

#### NSCI 1002 Seapower And Maritime Affairs
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A survey of American Naval and Maritime history from the American Revolution to the present with emphasis on major developments. Attention will be focused on Mahan's geopolitical theory; economic and maritime forces; U.S. military and maritime strategy; and a comparative analysis of American and foreign maritime strategies.

#### NSCI 1003 Sailing
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.
A foundation course that provides students with fundamental knowledge and skills to be a competent crew member. The course covers the basic theory of sailing, nomenclature, seamanship, boat equipment and safety, and application inland waters navigation rules for sailing craft. Upon completion of this course, students will be Skipper "B" qualified. Practical skills to be mastered consist of rigging and sailing from a pier; sail to weather; sail two figure eight courses with two tacks and two jibes; man overboard maneuver; a capsise; return to dock and secure.

#### NSCI 2001 Naval Ships Systems I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An detailed study of ship characteristics and types, including ship design, hydrodynamics forces, interior communications, ship control and damage control. Basic concepts or the theory and design of steam, gas turbine and nuclear propulsion, shipboard safety and firefighting are also covered.

#### NSCI 2002 Leadership & Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction of management functions as they apply to routine daily military activities. The concepts of planning, organizing, staffing, directing, controlling and coordination are introduced and examined using lecture, seminar and case study methods. The course includes discussions on responsibility and accountability, power and influence, managerial theories, decision making, personnel appraisal, organizational structure and communications. Emphasis is placed on management of personnel and physical resources.

#### NSCI 2101 Naval Ships Systems I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A detailed study of ship characteristics and types, including ship design, hydrodynamics forces, stability, compartmentalization, propulsion, electrical and auxiliary systems, interior communications, ship control and damage control. Basic concepts on the theory and design of steam, gas turbine and nuclear propulsion, shipboard safety and firefighting are also covered.

#### NSCI 2102 Leadership & Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An introduction of management functions as they apply to routine daily military activities. The concepts of planning, organizing, staffing, directing, controlling, and coordination are introduced and examined using lecture, seminar and case study methods. The course includes discussions on responsibility and personnel appraisal, organizational structure and communications. Emphasis is placed on management of personnel and physical resources.
A historical survey of the development of amphibious doctrine and the conduct of amphibious operations. Emphasis is placed on the evolution of amphibious warfare in the 20th century, especially during World War II. Present day, potential amphibious operations and their limitations, including the rapid deployment concept, will be discussed.

**NSCI 3002 Amphibious Warfare**
5 Credit Hours. 5 Lecture Hours. 0 Lab Hours.

A historical survey of the development of amphibious doctrine and the conduct of amphibious operations. Emphasis is placed on the evolution of amphibious warfare in the 20th century, especially during World War II. Present day, potential amphibious operations and their limitations, including the rapid deployment concept, will be discussed.

**NSCI 3003 Navigation I**
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.

An in-depth study of piloting and celestial navigation theory, principles, and procedures, as well as the rules of the nautical road, ship employment and relative motion analysis. Students learn piloting navigation: the use of charts, visual and electronic aids, and the theory and operation of compasses. Celestial navigation is covered in depth. Students develop practical skills in piloting, celestial navigation, and relative motion analysis. Other topics include tides, currents, effects of wind and weather, use of navigational instruments, ship employment, types and characteristics of electronic navigation systems, naval command and control, and afloat naval communications.

**NSCI 3004 Navigation II**
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.

An in-depth study of piloting and celestial navigational theory, principles, and procedures, as well as the rules of the nautical road, ship employment and relative motion analysis. Students learn piloting navigation: the use of charts, visual and electronic aids, and the theory and operation of compasses. Celestial navigation is covered in depth. Students develop practical skills in piloting, celestial navigation, and relative motion analysis. Other topics include tides, currents, effects of wind and weather, use of navigational instruments, ship employment, types and characteristics of electronic navigation systems, naval command and control, and afloat naval communications.

**NSCI 3101 Evolution Of Warfare**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course traces the historical development of warfare from the dawn of recorded history to the present, focusing on the impact of major military theorists, strategist, tacticians, and technological developments. Students acquire a basic sense of strategy, development and understanding of military alternatives, and become aware of the impact of historical precedent on military thought and actions.

**Corequisite(s):** NSCI 3001L.

**NSCI 3001L Navigation I Lab**
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

**Corequisite(s):** NSCI 3001.

**NSCI 3002 Amphibious Warfare**
5 Credit Hours. 5 Lecture Hours. 0 Lab Hours.

A historical survey of the development of amphibious doctrine and the conduct of amphibious operations. Emphasis is placed on the evolution of amphibious warfare in the 20th century, especially during World War II. Present day, potential amphibious operations and their limitations, including the rapid deployment concept, will be discussed.

**NSCI 3003 Navigation I**
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.

An in-depth study of piloting and celestial navigation theory, principles, and procedures, as well as the rules of the nautical road, ship employment and relative motion analysis. Students learn piloting navigation: the use of charts, visual and electronic aids, and the theory and operation of compasses. Celestial navigation is covered in depth. Students develop practical skills in piloting, celestial navigation, and relative motion analysis. Other topics include tides, currents, effects of wind and weather, use of navigational instruments, ship employment, types and characteristics of electronic navigation systems, naval command and control, and afloat naval communications.

**NSCI 3004 Navigation II**
3 Credit Hours. 2 Lecture Hours. 1 Lab Hour.

An in-depth study of piloting and celestial navigational theory, principles, and procedures, as well as the rules of the nautical road, ship employment and relative motion analysis. Students learn piloting navigation: the use of charts, visual and electronic aids, and the theory and operation of compasses. Celestial navigation is covered in depth. Students develop practical skills in piloting, celestial navigation, and relative motion analysis. Other topics include tides, currents, effects of wind and weather, use of navigational instruments, ship employment, types and characteristics of electronic navigation systems, naval command and control, and afloat naval communications.

**NSCI 4001 Naval Ships Systems II**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

This course outlines the theory and employment of naval RADAR, SONAR, and weapons systems. Students explore the processes of detection, evaluation, threat analysis, weapon selection, delivery, guidance and naval ordnance. Fire control systems, major weapons types, and military platforms are discussed. The concept of command-control-communications and intelligence is explored as a means of weapons systems integration as are space and electronic warfare.

**NSCI 4004 Leadership & Ethics**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of military leadership and management which investigates techniques and concepts of task accomplishment in the absence of authority and bureaucracy. The focus of discussion is on those normally present in civilian enterprise such aspects of leadership and management not as operation in the presence of hostility and morale management.

**NSCI 4050 Naval Drill**
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.

Introduces the student to basic military formations, movements, commands, courtesies and honors, and provides practice in unit leadership and management. Physical conditioning and training are provided to ensure students meet Navy/Marine Corps physical fitness standards. NSCI 4050 is required each semester for all NROTC students.

**NSCI 4102 Amphibious Warfare**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A historical survey of the development of amphibious doctrine and the conduct of amphibious operations. Emphasis is placed on the evolution of amphibious warfare in the 20th century, especially during World War II. Present day, potential amphibious operations and their limitations, including the rapid deployment force concept, will be discussed.

**NSCI 4104 Leadership & Ethics**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

A study of military leadership and management which investigates techniques and concepts of task accomplishment in the absence of a normative business environment. The course includes an examination of military law, ethical leadership, personal responsibility, authority and bureaucracy. The focus of discussion is on those aspects of leadership and management not normally present in civilian enterprise such as operation in the presence of hostility and morale management.

**NTFS Nutrition and Food Science**

**NTFS 2514 Professional Practice Strategies**
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.

Presents an overview of the career opportunities in nutrition, food science and dietetics. Focuses on the development of personal and professional skills required for success in the profession.

**NTFS 2530 Nutrition and Health**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

The basic principles of nutrition and their application to health and wellness. The interrelationship between personal nutrition and health maintenance throughout the life cycle is included.

**NTFS 2534 Introductory Food Science**
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.

Develops basic understanding of the principles of food preparation. Applies principles to food preparation for individuals, families and commercial food services.

**NTFS 3534 Human Nutrition**
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.

The fundamental principles of human nutrition and their application to food selection are discussed. Emphasis is placed upon the recommended dietary allowances and other dietary guidelines which promote health maintenance and disease prevention.

**Prerequisite(s):** A minimum grade of "C" in CHEM 1212K or Permission of instructor.
NTFS 3535 Life Cycle Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Investigates the role of nutrition and dietary factors on the growth, development and maintenance of health in individuals from birth through aging.
Prerequisite(s): A minimum grade of "C" in NTFS 2530 or NTFS 3534 or permission of instructor.

NTFS 3536 Meal Management
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
Principles of nutrition and food science are integrated with the management process in menu planning and quality meal service.
Prerequisite(s): Prior or concurrent enrollment with a minimum grade of "C" in NTFS 2534 and NTFS 3534 and ServSafe Manager Certification.

NTFS 3537 Advanced Food Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Considers the chemical, physical, and biological properties of food ingredients. Emphasis is placed on investigating the relationship between preparation methods, proportions of ingredients and final product quality.
Prerequisite(s): A minimum grade of "C" in NTFS 2534 and NTFS 3534 and CHEM 3342 and BIOL 2240 and ServSafe Manager Certification.

NTFS 3538 Quantity Food Systems Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a general knowledge base of quantity food systems administration with a focus on leadership and managerial roles in financial, human resource, and procurement responsibilities. Knowledge and skills are developed in this course to prepare students for administrative positions in quantity food production and service and to prepare them for the application of quantity food production and service principles in a quantity food service facility.
Prerequisite(s): A minimum grade of "C" in NTFS 3536 and ACCT 2030.

NTFS 3630 Sports Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a basic understanding of the importance of nutrition in physical activity and sport performance. Topics will include energy metabolism during exercise, fluid intake and performance, common nutritional deficiencies for athletes/exercisers, and the role of nutritional supplements and ergogenic aids in physical activity.
Prerequisite(s): A minimum grade of "C" in NTFS 2530 or NTFS 3534.

NTFS 3631 Sustainable Foods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores factors that influence the local 'food system', including farming methods, food production and industrialization, distribution, economics, and politics. Also included in this course is a critical review of the current sustainable food issues of hunger and nutrition, food justice and sovereignty, fair trade, labor issue, farm-to-school/university, community supported agriculture, organic foods, GMO and cloned foods, and food and water safety in the food supply chain. Students participate in a service learning project with the local community garden, the local farmers market, and/or several local farmers to understand the real world application of sustainable foods.

NTFS 3730 Quantity Food Practicum
3 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Food science theories and principles are applied in an institutional food service facility. Food service production and techniques are developed in this course as are skills in the application of sanitation regulations.
Prerequisite(s): A minimum grade of "C" in NTFS 3537 or NTFS 3538 and ServSafe Manager Certification.

NTFS 4195 International Studies Abroad in Health and Kinesiology
3-9 Credit Hours. 3-9 Lecture Hours. 0 Lab Hours.
This course offers students the opportunity to examine health, nutrition and food science, or kinesiology practices in a foreign country through travel abroad. Classroom instruction will be combined with on-site experiences to provide a realistic learning experience.
Prerequisite(s): Junior or Senior status.

NTFS 4533 Applied Nutrition Therapy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Investigates the application of nutrition principles in the treatment of chronic diseases in humans. Course content focuses on nutrition screening, assessment, and management of metabolic and endocrine disorders including obesity, metabolic syndrome, and diabetes; cardiovascular ailments including hypertension, hyperlipidemia, and atherosclerosis; hematologic conditions including anemia, and other diseases including cancer and stroke. Evidence-based nutrition research is utilized to discern the facts and fallacies associated with current topics comprising complementary and alternative medicine, supplements, and fad diets. Disease-specific information highlighting dietary strategies and nutrition intervention to promote optimal health and wellness are an integral component of the course. Prerequisite(s): NTFS 3535 or permission of instructor.

NTFS 4534 Medical Nutrition Therapy I
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Investigates the role and benefits of nutritional support and therapy in the metabolic and pathophysiological changes associated with disease in humans. Teaches the application and documentation of the nutritional care process to the needs of patients. Emphasis is placed upon energy in-balance, drug nutrient interactions, metabolic disorders, and gastrointestinal, hepato-biliary, endocrine, and cardiovascular diseases. Students will demonstrate the skills needed to apply the principles of medical nutrition therapy to clinical situations through laboratory experiences.
Prerequisite(s): A minimum grade of "C" in all of the following: NTFS 3535 and NTFS 3536 and KINS 2533 and prior or concurrent enrollment in NTFS 4536.

NTFS 4535 Community Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores the role of nutritionists in the delivery of nutrition services through community agencies and health and wellness programs. Planning, implementation, monitoring and evaluation of community-based programs are emphasized. The role of government and the impact of the legislative process on the provision of services is examined.
Prerequisite(s): A minimum grade of "C" in NTFS 2530 or NTFS 3534.

NTFS 4536 Metabolic Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Considers the principles of nutrition science with special emphasis on integration of macro and micronutrient.
Prerequisite(s): A minimum grade of "C" in CHEM 3530 and KINS 2532 and KINS 2531 and KINS 2511 and KINS 2512 and NTFS 3534 or permission of instructor.

NTFS 4537 Experimental Food Science
3 Credit Hours. 0.1 Lecture Hours. 0.4 Lab Hours.
Considers the principles of nutrition science with special emphasis on integration of macro and micronutrient.
Prerequisite(s): A minimum grade of "C" in all of the following: NTFS 3537 and STAT 2231 or NTFS 3538 and NTFS 3536 and KINS 2533 and prior or concurrent enrollment in NTFS 4536.

NTFS 4538 Metabolic Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Considers the principles of nutrition science with special emphasis on integration of macro and micronutrient.
Prerequisite(s): A minimum grade of "C" in all of the following: NTFS 3537 and STAT 2231 or NTFS 3538 and NTFS 3536 and KINS 2533 and prior or concurrent enrollment in NTFS 4536.

NTFS 4539 Applied Nutrition Therapy II
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
Investigates the application of nutrition principles in the treatment of chronic diseases in humans. Course content focuses on nutrition screening, assessment, and management of metabolic and endocrine disorders including obesity, metabolic syndrome, and diabetes; cardiovascular ailments including hypertension, hyperlipidemia, and atherosclerosis; hematologic conditions including anemia, and other diseases including cancer and stroke. Evidence-based nutrition research is utilized to discern the facts and fallacies associated with current topics comprising complementary and alternative medicine, supplements, and fad diets. Disease-specific information highlighting dietary strategies and nutrition intervention to promote optimal health and wellness are an integral component of the course. Prerequisite(s): NTFS 3535 or permission of instructor.
NTFS 4538 Medical Nutrition Therapy II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Investigates the role and benefits of nutritional support and therapy in the metabolic and pathophysiological changes associated with disease in humans. Teaches the application and documentation of the nutritional care process to the needs of patients. Emphasis is placed upon sepsis, burns, trauma, cancer, immune and neurological disorders, hypertension, anemia, pulmonary, bone, and renal diseases, soft tissue disorders and diseases as well as adaptive feeding techniques and specialized equipment, parenteral and enteral nutrition, and complementary/alternative nutrition and herbal therapies. Students will demonstrate the skills needed to apply the principles of medical nutrition therapy to clinical situations through laboratory experiences.
Prerequisite(s): A minimum grade of "C" in NTFS 4534 or permission of instructor.

NTFS 4539 Issues and Trends in Food Science
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A study of current trends and issues in the field of food science and technology. Issues related to product development, marketing and regulations and standards will be addressed.
Prerequisite(s): A minimum grade of "C" in NTFS 3537 or permission of instructor.

NTFS 4610 Nutrition and Food Science Senior Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Provides nutrition and food science seniors in the Community Nutrition and Food Science/Food Systems Administration emphases with a colloquium in which to prepare and deliver presentations in trends and issues in the field of nutrition and food science in a seminar forum. The course also includes preparation in the process of gaining employment. Resume writing, portfolio compilation and review, and interviewing skills will be discussed.
Prerequisite(s): A minimum grade of "C" in NTFS 2514 and Senior status.

NTFS 4611 Dietetics Senior Seminar
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Provides nutrition and food science seniors in the dietetics emphasis with a colloquium in which to prepare and deliver presentations in trends and issues in the field of dietetics. The course also includes the process of preparing applications for dietetics internships. Resume writing, portfolio compilation, and interviewing skills will be discussed.
Prerequisite(s): A minimum grade of "C" in NTFS 2514 and Senior status and Admission to the Dietetics Emphasis in the B.S. Nutrition/Food Science program.

NTFS 4630 Cultural Foods
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the relationship between food and nutrition, history, geography, culture and traditions, religion, communication, and acculturation. This course includes the study of cultural parameters and current issues that have shaped and continue to influence foodways - food availability, farming and food production practices, economics, politics, globalization, and sustainability. Students will also examine their own heritage and family dynamics to better understand their personal food, nutrition, and health beliefs and practices.

NTFS 4899 Directed Individual Study
1-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Provides the student with the opportunity to investigate an area of interest under the direction of a faculty mentor. Permission of instructor.

NTFS 6110 Culinary Skills
1 Credit Hour. 0 Lecture Hours. 2 Lab Hours.
This course provides students with an understanding and application of the concepts of the basic principles of cooking, baking, and kitchen operations. In conjunction with the Georgia Southern Dietetic Internship, this course provides the knowledge and skills for direct application in supervised practice experiences and other food and nutrition settings.
Prerequisite(s): Acceptance in the Georgia Southern Dietetic Internship or permission of the instructor.

NTFS 7334 Applied Medical Nutrition Therapy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an advanced focus on medical nutrition therapy to help students successfully apply the Nutrition Care Process to individuals from all life stages and disease states. In conjunction with the Georgia Southern Dietetic Internship, this course provides the knowledge for direct application and experience in the clinical nutrition setting.
Prerequisite(s): Acceptance in the Georgia Southern Dietetic Internship.

NTFS 7335 Public Health & Community Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a focused and critical review of concepts applicable to public health and community nutrition - nutritional epidemiology; community needs assessment; public policy; federal, state, and local nutrition programs; program planning and management; nutrition requirements and services for infants, children, adolescents, adults and elderly; and food security & food supply in the U.S. Further, the role of nutrition education in improving public health and its application in developing nutrition intervention programs will be discussed. This course includes an emphasis on the role of the Registered Dietitian Nutritionist in health promotion and disease prevention in the public arena.

NTFS 7336 School Nutrition Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a focused, critical review and analysis of concepts applicable to school nutrition administration - legislation and regulations; organizational leadership and management; human and financial resource management; menu planning; sustainability; facility design; procurement; food production; program planning, implementation, and evaluation; marketing; and nutrition education. This course includes a special emphasis on the role of the Registered Dietitian in school nutrition administration. In conjunction with the Georgia Southern Dietetic Internship, this course provides the knowledge and skills for the direct application and experience in the school nutrition setting.
Prerequisite(s): Acceptance into the Georgia Southern University Dietetic Internship.

NTFS 7338 Micronutrient Metabolism
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course considers micronutrient metabolism in sports nutrition at an advanced level with respect to the metabolism, function, and requirements of micronutrients for physical activity.
Prerequisite(s): A minimum grade of "C" in KINS 7337 and acceptance into the Georgia Southern University Dietetic Internship.

NTFS 7339 Energy Balance for Weight Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course analyzes the importance of energy balance in weight management as well as investigates genetic, metabolic, environmental factors that contribute to overweight and obesity. Physiological and psychological consequences of overweight and obesity as well as the roles of diet, behavior, and exercise in its prevention and treatment will be discussed. Special emphasis will be placed on the application of weight management theory to the development, presentation, and analysis of weight loss and weight maintenance protocols.
Prerequisite(s): A minimum grade of "C" in KINS 7238 and acceptance into the Georgia Southern University Dietetic Internship.

NTFS 7430 Health Behavior in Nutrition
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a focused and critical review of concepts applicable to working with clients in nutrition education and nutrition counseling settings to promote behavior change. This course includes a special emphasis on theories of health behavior change and on promoting health behavior change through motivational interviewing.
NUCM Nuclear Medicine Course

NUCM 3001 Nuclear Medicine I
6 Credit Hours. 5 Lecture Hours. 2 Lab Hours.
Introduction to the theory, principals and procedures of nuclear medicine. Basic principles involved in imaging, diagnoses, and therapies are emphasized.

NUCM 3001L Nuclear Medicine I Lab
0 Credit Hours. 0 Lecture Hours. 2 Lab Hours.
Corequisite(s): NUCM 3001.

NUCM 3002 Nuclear Medicine II
6 Credit Hours. 5 Lecture Hours. 0 Lab Hours.
Principles of radionuclide production and radiation detection. Topics include preparation and use of radiopharmaceuticals, decay modes, half-life, radiation interactions, radiation equipment and instrumentation applied to nuclear medicine imaging.
Prerequisite(s): A minimum grade of "C" in NUCM 3001.
Corequisite(s): RDSC 3002.

NUCM 3003 Nuclear Medicine III
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced Nuclear Medicine Imaging. Topics include the principles of Positron Emission Tomography, radiopharmaceutical production and instrumentation of PET.
Prerequisite(s): A minimum grade of "C" in NUCM 3002.

NUCM 3100 Introduction to Nuclear Medicine Clinical Education
1 Credit Hour. 1 Lecture Hour. 0-18 Lab Hours.
Overview of the clinical setting, administrative structures, legal/compliance requirements, and required documentation.
Prerequisite(s): A minimum grade of "C" in NUCM 3001.
Corequisite(s): NUCM 3002.

NUCM 4101 Nuclear Medicine Clinical Education I
5 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Supervised clinical practice in performing nuclear medicine procedures.
Prerequisite(s): A minimum grade of "C" in NUCM 3100 and DDTS 3001.

NUCM 4102 Nuclear Medicine Clinical Education II
6 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Supervised clinical practice in performing nuclear medicine procedures.
Prerequisite(s): A minimum grade of "C" in NUCM 4101.

NUCM 4103 Nuclear Medicine Clinical Education III
9 Credit Hours. 0 Lecture Hours. 0-18 Lab Hours.
Supervised clinical practice in performing nuclear medicine and CP procedures.
Prerequisite(s): A minimum grade of "C" in NUCM 4102.

NUCM 4200 Nuclear Medicine Synthesis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
A discussion of general and advanced theoretical concepts of Nuclear Medicine.
Prerequisite(s): A minimum grade of "C" NUCM 3003 and NUCM 4102.

NURS Nursing

NURS 1200L Multi Dis Skls/ Hlth Prof Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

NURS 3101 Skills and Essentials of Nursing Practice
6 Credit Hours. 3 Lecture Hours. 9 Lab Hours.
Building on a sound foundation derived from the liberal arts, sciences and nursing, this integrated theory/practicum course explores evidence based fundamental concepts and skills related to the provision of safe and competent nursing care for culturally diverse populations. The practicum component provides students the opportunity to integrate theory with clinical practice, using the nursing process with adult patients, to develop clinical reasoning via simulated and experiential learning opportunities in a variety of clinical settings. The course framework incorporates the Quality and Safety Education for Nursing (QSEN), the Essentials of Baccalaureate Nursing Education for Professional Practice, and the current American Nurses’ Association Nursing: Scope and Standards of Practice (2015).
Prerequisite(s): Accepted in Nursing Program.

NURS 3102 Health Assessment
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course focuses on the application of interviewing and physical exam techniques for the health assessment of the adult population. The didactic and experiential components allow students the opportunity to learn and practice interviewing/communication skills and physical exam techniques to assess a clients’ wellbeing, health and illness, and safety from a health promotion focus. Emphasis is on the acquisition and application of learning normal assessment findings, as well as recognizing and differentiating abnormal findings when caring for clients.
Prerequisite(s): Accepted in Nursing Program.

NURS 3103 Professional Nursing Practice
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course is for the beginning nursing student. Major concepts, providing a foundation for professional nursing practice, which are used throughout the curriculum, are introduced and explored. Emphasis is on the acquisition of basic nursing concepts for the performance of safe and appropriate therapeutic and caring nursing practice for a culturally diverse population. The course framework for professional nursing practice and professional role activities is developed from the current American Nurses’ Association: Nursing: Scope and Standards of Practice and the Quality and Safety Education for Nursing (QSEN).
Prerequisite(s): Accepted in Nursing Program.

NURS 3104 Pharmacology I
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The course provides the student with an introduction to the basic principles of pharmacology and other therapeutic modalities appropriate to culturally diverse populations across the lifespan. Ethical, legal, and teaching responsibilities regarding medication management are delineated. Emphasis is placed on roles and responsibilities of the nurse in collaboration with the multidisciplinary team to facilitate health promotion and safe administration of pharmaceuticals. An introduction to the pharmacokinetic and pharmacodynamics of drug classifications and select medications are addressed.
Prerequisite(s): Accepted in Nursing Program.

NURS 3105 Pharmacology II
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The course builds from Pharmacology I, providing students with the assessment and management of medications for a diverse population of adults with chronic and acute illness. Ethical, legal, and teaching responsibilities regarding medication management are delineated. Emphasis is placed on roles and responsibilities of the nurse in collaboration with the multidisciplinary team to facilitate health promotion and safe administration of pharmaceuticals. Correlating diseases and disorders to common medication treatment plans is initiated at this level.
Prerequisite(s): A minimum grade of "C" in NURS 3101, NURS 3102, NURS 3103, NURS 3104.
NURS 3107 Adult Health Nursing I
7 Credit Hours. 4 Lecture Hours. 9 Lab Hours.
This course builds on a previously acquired foundation derived from the liberal arts, sciences and nursing to apply the nursing process to the holistic care of culturally diverse adult patients and families who are experiencing simple to chronic alterations in health. Clinical experiences provide students with the opportunity to develop critical thinking skills and implement appropriate evidence based therapeutic nursing interventions towards the goal of restoring, promoting and maintaining the health of patients in a variety of geographical settings. 
Prerequisite(s): A minimum grade of "C" in NURS 3101, NURS 3102, NURS 3103, NURS 3104.

NURS 3108 Mental Health Nursing
6 Credit Hours. 3 Lecture Hours. 9 Lab Hours.
This course promotes mental health as a dynamic construct occurring on a continuum. Students strengthen their knowledge of and appreciation for the interaction of the mind, body, and spirit in psychiatric/mental health nursing as well as other nursing specialties. The roles of the professional nurse in risk reduction for mental health disorders, health promotion, and recovery are examined in both didactic and clinical settings. Utilizing a health promotion framework and the American Nurses' Association's Scope and Standards of Practice, students incorporate theories and frameworks from the liberal arts, sciences, and nursing to apply the nursing process in providing mental health nursing care to individuals, families, groups, and the community. Students learn the role of the baccalaureate nurse on interdisciplinary teams in mental healthcare. Emphasis is on developing therapeutic communication skills and collaborative relationships that support individuals to achieve or return to optimal wellness and function. 
Prerequisite(s): A minimum grade of "C" in NURS 3101, NURS 3102, NURS 3103, NURS 3104.

NURS 3150L Prof Role Trans:Comm Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3300L Health Assess Promo Well Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3304L Professional Nursing Prac-Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3306L Transitional Concepts Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3310L Nurs Health Promo Lifespan Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3320L Health Assess Well Indiv Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3321L Heal Assm of the Well Ind Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3330L Leadership in Nursing Care
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Leadership role of the professional nurse in the management of health care.
NURS 3334L Skills & Esntls of Nurs Pr Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3340L Family Health Promotion Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3344L Skills/Essen Of Nurs Prac Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3345L Adult Health I Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
NURS 3346L Adult Health I Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 3350L Health Prom Women & Child Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Corequisite(s): NURS 3360L.

NURS 3352 Pharmacology/Pathophys I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Pharmacology and pathophysiology with emphasis on implications for nursing practice using the concepts of inflammation and immunity, fluid and electrolytes and perception and coordination. 
Prerequisite(s): A minimum grade of "C" in BIOL 2081 and BIOL 2082.

NURS 3354 Pharmacology/Pathophys II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Pharmacology and pathophysiology with emphasis on implications for nursing practice using the concepts of oxygenation and metabolism. 
Prerequisite(s): A minimum grade of "C" in BIOL 2081 and BIOL 2082 and BIOL 2275.

NURS 3360L Health Main & Rehab Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
Corequisite(s): NURS 3350L.

NURS 3375 Adult Health II
5 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Nursing care of the adult with alterations in oxygenation and metabolism in a variety of clinical settings. 
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in NURS 3354.

NURS 3425L Children'S Health Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 3450L Health Care of Families Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 3535L Mental Health Lab
0 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
Corequisite lab with NURS 3535.

NURS 3536L Mental Health Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 4004L Health Assessment Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 4005L Pop Focus Com Nsg/Gl Soc Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 4106 Pharmacology III
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The final course of this trilogy continues with emphasis on roles and responsibilities of the nurse in collaboration with the multidisciplinary team to facilitate health promotion and safe administration of pharmaceuticals for a diverse population of adults and children. Ethical, legal, and teaching responsibilities regarding medication management are delineated and expand to the concepts of care in the community settings. The students are expected to address medication reconciliation and crisis situations that may arise. 
Prerequisite(s): A minimum grade of "C" in NURS 3105, NURS 3107, NURS 3108.

NURS 4109 Women's and Children's Nursing
6 Credit Hours. 4 Lecture Hours. 6 Lab Hours.
This course concentrates on health promotion, disease prevention, and health risk reduction of children and women from diverse populations. A family centered focus is used to guide the student’s understanding of the childbearing family from conception through labor and delivery and care of the neonate, as well as children and their families. Care and health restoration of the woman and family with an at-risk pregnancy is also addressed. The role of the nurse as practitioner, educator, collaborator in acute care and various community settings is underscored. The framework for professional practice and professional role activities is developed from the current American Nurses Association's Nursing: Scope and Standards of Practice. 
Prerequisite(s): A minimum grade of "C" in NURS 3105 and NURS 3107 and NURS 3108.
NURS 4110 Community Health Nursing
5 Credit Hours. 3 Lecture Hours. 6 Lab Hours.
This course provides the student with a foundation of community nursing roles and essential skills for entry level public health nursing with a focus on population health and wellness. Knowledge and value of human diversity are held as essential concepts as students apply the nursing process with individuals, families, aggregates, and communities. Theories and concepts from public health and nursing science are applied to risk reduction, disease prevention, and health promotion. The impact of political systems and regulatory agencies on health disparities are examined at the global, national, regional and local levels.
Prerequisite(s): A minimum grade of "C" in NURS 3105 and NURS 3107 and NURS 3108.

NURS 4111 Community Health Nursing
7 Credit Hours. 4 Lecture Hours. 9 Lab Hours.
This course builds on a previously acquired foundation derived from the liberal arts, sciences and nursing to apply the nursing process to the holistic care of culturally diverse adult patients and families who are experiencing complex alterations in health. Clinical experiences provide students with the opportunity to develop critical thinking skills and implement appropriate evidence based therapeutic nursing interventions towards the goal of restoring, promoting and maintaining the health of patients in a variety of geographical settings.
Prerequisite(s): A minimum grade of "C" in NURS 4106 and NURS 4109 and NURS 4110.

NURS 4112 Leadership & Management Capstone
6 Credit Hours. 3 Lecture Hours. 9 Lab Hours.
The focus of this course is to prepare students to assume a leadership role in the management of nursing care in multidisciplinary healthcare environments. The principles of critical thinking and evidence based nursing practice are utilized in the care of groups of clients and families with Health/Illness variations within a culturally diverse and complex healthcare delivery system. Course content includes management and leadership theories and skills, change strategies, healthcare technology, and role transition strategies to assist the new professional nurse. The framework for professional practice and professional role activities is developed from the American Nurses Association Nursing: Scope and Standards of Practice.
Prerequisite(s): A minimum grade of "C" in NURS 4106 and NURS 4109 and NURS 4110.

NURS 4113 Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The focus of this course is on the research process and enhancement of critical thinking skills. Students learn to critique, analyze, and apply research findings to health promotion of persons, families, groups, and communities. The relationship of nursing research to nursing theory and practice is explored.
Prerequisite(s): Accepted in Nursing Program.

NURS 4114 Critical Analysis
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course facilitates the application, analysis, and synthesis of essential nursing knowledge and skills for use in professional practice. The framework for professional practice and professional role activities is developed from the current ANA, Nursing Scope and Standards of Practice and the AACN, Essentials of Baccalaureate Nursing Education.
Prerequisite(s): A minimum grade of "C" in NURS 4106 and NURS 4109 and NURS 4110.

NURS 4115 Nursing and Service Learning in Costa Rica
3 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
This course is a 4 week course with 10 days study in Costa Rica. The course consists of lecture, supervised field/clinical observations, service learning, course-related excursions, and cultural and historical activities. The course integrates transcultural health and service learning to provide students with a deeper and more meaningful experience. Students receive foot-care training and education to provide care to vulnerable population to improve quality of health outcomes. Students engage in experiential cultural learning to gain understanding of the interdependent nature of the contemporary world, to develop an appreciation for different cultures, and to help students sharpen their skills as critical thinkers and effective communicators. The outcome of the course is to enrich students' personal growth, self-awareness, and appreciation for cultural differences. The course is open to pre-nursing, nursing, health related, and other majors.

NURS 4116 Honors Project I
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Independent exploration of nursing problems and practice issues under the guidance of a faculty mentor.

NURS 4117 Honors Project II
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Implementation and evaluation of the project with a selected population under the guidance of a faculty member.

NURS 4118 Honors Project III
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
Presentation of the honor's project to a selected group.

NURS 4119 Independent Study-Undergraduate
6 Credit Hours. 0-6 Lecture Hours. 0-18 Lab Hours.
The student, in consultation with the professor, selects a topic and submits a proposal for supervised independent study.

NURS 4120 Special Topics-Undergraduate
6 Credit Hours. 0-6 Lecture Hours. 0-18 Lab Hours.
The professor offers a course in a selected topic for qualifying students.

NURS 4121 Strategies for Success in Professional Nursing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This elective course provides an opportunity for students to develop strategies for success in nursing. Learning style, study and testing techniques to enhance academic and professional performance are explored.
Prerequisite(s): Permission of instructor.

NURS 4122 Foundations of Healthcare Informatics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Introduction to information technologies and systems that support healthcare delivery. Emphasis will be placed on utilizing health information technology to support decision-making, improve communication, and manage knowledge.
Prerequisite(s): Permission of instructor.

NURS 4123 Legal and Ethical Issues in Nursing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Focuses on the legal and ethical rights, responsibilities, and obligations of the practicing nurse in a changing health environment.
Prerequisite(s): Permission of instructor.

NURS 4124 Gerontology in the 21st Century
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explore Normal aging, theories of aging, and the effect society has on the increasing geriatric population.
Prerequisite(s): Permission of instructor.

NURS 4125 Vulnerable Populations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an overview of vulnerable populations and the role of the nurse in the health care of the populations.
Prerequisite(s): Permission of Instructor.
NURS 4126 International Nursing Issues and Trends
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores the influence of culture, economics, politics, and technology on global health.
Prerequisite(s): Permission of Instructor.

NURS 4127 Introduction to Forensic Nursing and the Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides an introduction to the principles of forensic nursing and the legal issues related to nursing practice.
Prerequisite(s): Permission of Instructor.

NURS 4128 Complementary and Integrative Health Approaches
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
An overview of complementary and integrative health approaches used in holistic health practices and healing to include: natural products, mind, body, spirit practices, and energy therapies will be presented. Safety considerations and evidenced-based practice guidelines will be discussed. Integration of complementary therapies into nursing care of those with chronic diseases as well as a method of health promotion and disease prevention will be explored. The framework for professional practice and professional role activities is developed from the current American Nurses Association Nursing: Scope and Standards of Practice.
Prerequisite(s): Permission of instructor.

NURS 4129 Multiculturalism in Health Care
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores multicultural factors within a healthcare context.
Prerequisite(s): Permission of instructor.

NURS 4130 Home Health Nursing
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Therapeutic nursing interventions of clients in the home setting.
Prerequisite(s): Permission of instructor.

NURS 4131 Population Health Care Strategies
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Overview of the levels of prevention, epidemiological principles and their impact on health promotion and disease prevention. A major focus is primary prevention relative to exercise/activity. Emphasis is placed on the clinical application of activity for improving health.
Prerequisite(s): Junior/Senior level or permission of instructor.

NURS 4132 Critical Care
3 Credit Hours. 1 Lecture Hour. 6 Lab Hours.
Nursing care of the adult client in critical care settings with life threatening alterations in health. Emphasis is placed on the role of the professional nurse in the restorations and maintenance of health with clients and their families experiencing critical illness.
Prerequisite(s): Permission of instructor.

NURS 4133 Nursing Perspectives: Then, Now, and the Future
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Analyzes the influences of significant historical nursing figures through present day as it influences the future of nursing.
Prerequisite(s): Permission of instructor.

NURS 4135 Women and Leadership in Nursing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Explores historical and contemporary perspectives and attitudes of women as nurses and leaders.
Prerequisite(s): Permission of instructor.

NURS 4136 Nursing Practice in the Military
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Examine the social, political, environmental, and global impact of military warfare on nursing practice in context of nursing leadership, practices and traditions.
Prerequisite: Permission of instructor.

NURS 4137 Pediatric Nursing Externship
3 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
Nursing care in the complex pediatric client in the acute care setting.
Prerequisite(s): Permission of instructor.

NURS 4138 Maternal/Infant Nursing Externship
3 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
Nursing care of the complex obstetric and neonatal client in the acute care setting.
Prerequisite(s): Permission of the instructor.

NURS 4139 Medical-Surgical Oncology Nursing Externship
3 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
Nursing care of the complex oncological client in the acute care setting.
Prerequisite(s): Permission of the instructor.

NURS 4140 Medical-Surgical Neuroscience Nursing Externship
3 Credit Hours. 1 Lecture Hour. 6 Lab Hours.
Nursing care of the complex neurological client in the acute care setting.
Prerequisite(s): Permission of the instructor.

NURS 4141 Medical-Surgical Complex Medical Nursing Externship
3 Credit Hours. 0 Lecture Hours. 9 Lab Hours.
Nursing care of the client with co-morbid conditions in the acute care setting.
Prerequisite(s): Permission of instructor.

NURS 4142 Health Promotion Through the Life Span
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The professional nurse’s role in population-focused healthcare for individuals, families, and communities through the lifespan.
Prerequisite(s): Permission of instructor.

NURS 4143 Medical Terminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for undergraduate level students interested in expanding their knowledge of medical terminology and related pathophysiology. This is a fully on-line course. Emphasis is placed on etymology, definition, pronunciation and correct utilization of medical terms, enabling the student to develop a vocabulary essential to understanding and communicating within the various health areas in which allied health professionals serve. An audio-visual approach to anatomy, physiology, pathology, diagnostics, and treatment regimens offers content information and language comprehension skills applicable to other dimensions.
Prerequisite(s): Permission of instructor.

NURS 4201 Skills and Essentials of Nursing Practice
5 Credit Hours. 3 Lecture Hours. 6 Lab Hours.
Building on a sound foundation derived from the liberal arts, sciences and nursing, this integrated theory/practicum course explores evidence based fundamental concepts and skills related to the provision of safe and competent nursing care for culturally diverse populations. The practicum component provides students the opportunity to integrate theory with clinical practice, using the nursing process with adult patients, to develop clinical reasoning via simulated and experiential learning opportunities in a variety of clinical settings. The course framework incorporates the Quality and Safety Education for Nursing (QSEN), the Essentials of Baccalaureate Nursing Education for Professional Practice, and the current American Nurses Association Nursing: Scope and Standards of Practice (2015).

NURS 4202 Health Assessment
4 Credit Hours. 3 Lecture Hours. 3 Lab Hours.
This course focuses on the application of interviewing and physical exam techniques for the health assessment of the adult population. The didactic and experiential components allow students the opportunity to learn and practice interviewing/communication skills and physical exam techniques to assess a clients’ wellbeing, health and illness, and safety from a health promotion focus. Emphasis is on the acquisition and application of learning normal assessment findings, as well as recognizing and differentiating abnormal findings when caring for clients. The framework for professional practice and professional role activities is developed from the current American Nurses Association Nursing: Scope and Standards of Practice.
NURS 4203 Professional Nursing Practice
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is for the beginning nursing student. Major concepts, providing a foundation for professional nursing practice which are used throughout the curriculum, are introduced and explored. Emphasis is on the acquisition of basic nursing concepts for the performance of safe and appropriate therapeutic and caring nursing practice for a culturally diverse population. The course framework for professional nursing practice and professional role activities is developed from the current American Nurses Association: Nursing: Scope and Standards of Practice and the Quality and Safety Education for Nursing (QSEN). The curriculum framework meets the Commission on Collegiate Nursing Accreditation: Essentials of Baccalaureate Nursing Education.

NURS 4204 Comprehensive Pharmacology
5 Credit Hours. 5 Lecture Hours. 0 Lab Hours.
The course provides the student with a foundation of the basic principles of pharmacology and other therapeutic modalities appropriate to culturally diverse populations across the lifespan. Ethical, legal, and teaching responsibilities regarding medication management are delineated. Emphasis is placed on roles and responsibilities of the nurse in collaboration with the multidisciplinary team to facility health promotion and safe administration of pharmaceuticals. An introduction to the pharmacokinetic and pharmacodynamics of drug classifications providing students with the assessment and management of medications for a diverse population of adults with chronic and acute illness. Correlating diseases and disorders to common medication treatment plans is emphasized.

NURS 4207 Adult Health Nursing I
7 Credit Hours. 4 Lecture Hours. 9 Lab Hours.
This course builds on a previously acquired foundation derived from the liberal arts, sciences and nursing to apply the nursing process to the holistic care of culturally diverse adult patients and families who are experiencing simple to chronic alterations in health. Clinical experiences provide students with the opportunity to develop critical thinking skills and implement appropriate evidence based therapeutic nursing interventions towards the goal of restoring, promoting and maintaining the health of patients in a variety of geographical settings.
Prerequisite(s): A minimum grade of "C" in NURS 4201 and NURS 4202 and NURS 4203.

NURS 4208 Mental Health Nursing
6 Credit Hours. 3 Lecture Hours. 9 Lab Hours.
This course promotes mental health as a dynamic construct occurring on a continuum. Students strengthen their knowledge of and appreciation for the interaction of the mind, body, and spirit in psychiatric/mental health nursing as well as all other nursing specialties. The roles of the professional nurse in risk reduction for mental health disorders, health promotion, and recovery are examined in both didactic and clinical settings. Utilizing a health promotion framework and the American Nurses’ Association's Scope and Standards of Practice, students incorporate theories and frameworks from the liberal arts, sciences, and nursing to apply the nursing process in providing mental health nursing care to individuals, families, groups, and the community. Students learn the role of the baccalaureate nurse on interdisciplinary teams in mental healthcare. Emphasis is on developing therapeutic communication skills and collaborative relationships that support individuals to achieve or return to optimal wellness and function.
Prerequisite(s): A minimum grade of "C" NURS 4201 and NURS 4202 and NURS 4203 and NURS 4204.

NURS 4209 Women’s & Children’s Nursing
6 Credit Hours. 4 Lecture Hours. 6 Lab Hours.
This course concentrates on health promotion, disease prevention, and health risk reduction of children and women from diverse populations. A family centered focus is used to guide the student’s understanding of the childbearing family from preconception through labor and delivery and care of the neonate, as well as children and their families. Care and health restoration of the woman and family with an at-risk pregnancy is also addressed. The role of the nurse as practitioner, educator, collaborator in acute care and various community settings is underscored. The framework for professional practice and professional role activities is developed from the current American Nurses’ Association Nursing: Scope and Standards of Practice.

NURS 4210 Community Health Nursing
5 Credit Hours. 3 Lecture Hours. 6 Lab Hours.
This course provides the student with a foundation of community nursing roles and essential skills for entry to level public health nursing with a focus on population health and wellness. Knowledge and value of human diversity are held as essential concepts as students apply the nursing process with individuals, families, aggregates, and communities. Theories and concepts from public health and nursing science are applied to risk reduction, disease prevention, and health promotion. The impact of political systems and regulatory agencies on health disparities are examined at the global, national, regional and local levels.
Prerequisite(s): A minimum grade of "C" NURS 4201 and NURS 4202 and NURS 4203 and NURS 4204 and NURS 4207 and NURS 4208 and NURS 4209.

NURS 4211 Adult Health Nursing II
7 Credit Hours. 4 Lecture Hours. 9 Lab Hours.
This course builds on a previously acquired foundation derived from the liberal arts, sciences and nursing to apply the nursing process to the holistic care of culturally diverse adult patients and families who are experiencing complex alterations in health. Clinical experiences provide students with the opportunity to develop critical thinking skills and implement appropriate evidence based therapeutic nursing interventions towards the goal of restoring, promoting and maintaining the health of patients in a variety of geographical settings.
Prerequisite(s): A minimum grade of "C" in NURS 4201 and NURS 4202 and NURS 4203 and NURS 4204 and NURS 4207.

NURS 4212 Leadership and Management Capstone
7 Credit Hours. 3 Lecture Hours. 9 Lab Hours.
The focus of this course is to prepare students to assume a leadership role in the management of nursing care in multidisciplinary healthcare environments. The principles of critical thinking and evidence based nursing practice are utilized in the care of groups of clients and families with Health/Illness variations within a culturally diverse and complex healthcare delivery system. Course content includes management and leadership theories and skills, change strategies, healthcare technology, and role transition strategies to assist the new professional nurse. The framework for professional practice and professional role activities is developed from the American Nurses’ Association, Nursing: Scope and standards of practice, (3rd ed.).
Prerequisite(s): A minimum grade of "C" in NURS 4201 and NURS 4202 and NURS 4203 and NURS 4204 and NURS 4207 and NURS 4208 and NURS 4209 and NURS 4211.

NURS 4214 Critical Analysis
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course facilitates the application, analysis, and synthesis of essential nursing knowledge and skills for use in professional practice. The framework for professional practice and professional role activities is developed from the current ANA, Nursing Scope and Standards of Practice and the AACN, Essentials of Baccalaureate Nursing Education.
Prerequisite(s): A minimum grade of "C" in NURS 4201 and NURS 4202 and NURS 4203 and NURS 4204 and NURS 4207 and NURS 4208 and NURS 4209 and NURS 4211.
NURS 4215L Home Health Nursing Lab
0 Credit Hours. 0 Lecture Hours. 1 Lab Hour.
NURS 4217L Critical Care Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.
NURS 4218L Perioperative Nursing Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 4224L Med-Surg Onc Nurs Extern Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 4225L Med-Surg Onc Nurs Extern Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 4226L Med-Surg Comp Nurs Extern Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
NURS 4301 Conceptual Basis of Nursing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides an introduction to the conceptual basis of professional nursing. The concepts of person, nursing, health, environment, health promotion, human caring, communication, ethical principles, critical thinking, empowerment, research, cultural sensitivity, and healthcare technology are explored and applied to specific case situations. The student is exposed to the historical aspects of nursing and healthcare, with emphasis on the rural environment, as well as evidenced-based nursing practice, patient safety and quality, healthcare policy, and financial implications in the current healthcare arena. Healthcare delivery systems, barriers to healthcare, and legal aspects of nursing are discussed. The ANA Scope and Standards of Practice are introduced in this course with specific emphasis on caring and ethics.
Prerequisite(s): Admission to the RN-BSN program or Permission of the Program Director.
NURS 4302 Health Assessment
3 Credit Hours. 2 Lecture Hours. 3 Lab Hours.
Focuses on refinement of the application of interviewing and physical exam techniques for the health assessment of the adult population. The didactic and experiential components allow students the opportunity to learn and practice interviewing/communication skills and physical exam techniques to assess a clients' wellbeing, health, illness, and safety with a health promotion focus. Emphasis is on the acquisition and application of learning normal assessment findings, as well as recognizing and differentiating abnormal findings when caring for clients. The framework for professional practice and professional role activities is developed from the ANA Association Nursing: Scope and Standards of Practice.
Prerequisite(s): Admission to the RN-BSN Program.
NURS 4303 Complementary Therapeutic Modalities
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course introduces culturally specific therapeutic modalities that are complementary to western health care. These therapeutic modalities are examined relative to their combination with scientific therapies and professional and lay healers. Ethical, legal, and teaching responsibilities are elaborated. Emphasis is placed on the roles and responsibilities of the nurse in collaboration with the client and the multi-disciplinary team to facilitate health promotion.
Prerequisite(s): Admission to the RN-BSN program or Permission of the Program Director.
NURS 4310 Community Health Nursing
5 Credit Hours. 3 Lecture Hours. 6 Lab Hours.
This course provides the student with a foundation of community nursing roles and essential skills for entry to level public health nursing with a focus on population health and wellness. Knowledge and value of human diversity are held as essential concepts as students apply the nursing process with individuals, families, aggregates, and communities. Theories and concepts from public health and nursing science are applied to risk reduction, disease prevention, and health promotion. The impact of political systems and regulatory agencies on health disparities are examined at the global, national, regional and local levels. 60 hours of clinical is included.
Prerequisite(s): Admission to the RN-BSN program.
NURS 4311 Complex Nursing Concepts
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides an opportunity for thorough analysis of complex concepts relative to nursing such as person, environment, health, holistic nursing, caring, rationality, spirituality, and power. Multiple theoretical models are analyzed: Health Promotion, Caring, Transcultural Nursing and others. Case study analysis and other modes, including field work, are used to apply models to life events such as birth, death and changes in health status. Attention is given to the availability and use of community resources for individuals and families experiencing dynamic change and complex health events. Additionally, considerable attention is given to the impact of social, economic, cultural, legal, and ethical variables on the experience of profound life events.
Prerequisite(s): Admission to the RN-BSN program.
NURS 4312 Nursing Leadership and Management
5 Credit Hours. 3 Lecture Hours. 6 Lab Hours.
The focus of this course is to prepare students to assume a leadership role in the management of nursing care in multidisciplinary healthcare environments. The principles of critical thinking and evidence based nursing practice are utilized in the care of groups of clients and families with Health/Ilness variations within a culturally diverse and complex healthcare delivery system. Course content includes management and leadership theories and skills, change strategies, healthcare technology, and role transition strategies to assist the new professional nurse. The framework for professional practice and professional role activities is developed from the American Nurses’ Association, Nursing: Scope and standards of practice, (3rd ed.). 60 hours of clinical is included.
Prerequisite(s): Admission to the RN-BSN program.
NURS 4313 Nursing Research
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The focus of this course is on the research process and enhancement of critical thinking skills. Students learn to critique, analyze, and apply research findings to health promotion of persons, families, groups, and communities. The relationship of nursing research to nursing theory and practice is explored.
Prerequisite(s): Admission to the RN-BSN program.
NURS 4314 Critical Analysis of Nursing Concepts
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course facilitates the synthesis and application of evidence based care using policy, politics, and ethical principles to guide discussion and critical discourse. Students will engage in seminar discussion, critical discourse, case analysis, and ethical applications.
Prerequisite(s): A minimum grade of "C" in: NURS 4301 and NURS 4302 and NURS 4303 and NURS 4310 and NURS 4311 and NURS 4312 and NURS 4313.
NURS 4341 Population Focused Nursing
5 Credit Hours. 4 Lecture Hours. 3 Lab Hours.
This course is designed to aid the public health nurse in developing and/or revitalize skills essential in population-based practice in conjunction with clinical/preventive skills already obtained in the workforce. Emphasis will be on conducting community assessments, planning and implementing appropriate interventions based upon assessment findings, presenting health data to groups, facilitating the development of community coalitions, and collaboration with community partners for effective change in health policy.
Prerequisite(s): Permission of instructor.

NURS 4345L Adult Health II Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.

NURS 4346L Adult Health II Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.

NURS 4355L Women & Children's Health Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.
Therapeutic nursing interventions to promote health and prevent illness of women and children in a variety of clinical settings.

NURS 4356L Women & Children's Health Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.

NURS 4420 Nursing and Health Restoration
9 Credit Hours. 5 Lecture Hours. 0 Lab Hours.
Health restoration of clients experiencing acute health problems.
Corequisite(s): NURS 4420L.

NURS 4420L Nurs & Health Restoration Lab
0 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Corequisite(s): NURS 4420.

NURS 4425 Children's Health
5 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Health promotion, maintenance and restoration as the foundation for nursing care of children in a variety of settings.
Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in NURS 3352 or NURS 3354.

NURS 4430L Health Restor Mental Health Lab
0 Credit Hours. 0 Lecture Hours. 3 Lab Hours.

NURS 4435L Mental Health Restoration Lab
0 Credit Hours. 0 Lecture Hours. 4 Lab Hours.

NURS 4440L Population Focused Nurs Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.

NURS 4441L Population Focused Nurs Lab
0 Credit Hours. 0 Lecture Hours. 6 Lab Hours.

NURS 4450L Prof Nursing Practicum Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.

NURS 4451L Profession Nurs Lead & Mangmt
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.

NURS 4470L Nurs & Pop Focused Pract Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.

NURS 4480L Prof Nurs Practicum Lab
0 Credit Hours. 0 Lecture Hours. 9 Lab Hours.

NURS 5131 Scientific and Medical Terminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for undergraduate level students interested in expanding their knowledge of medical terminology and related pathophysiology. This is a fully on-line course. Emphasis is placed on etymology, definition, pronunciation and correct utilization of medical terms, enabling the student to develop a vocabulary essential to understanding and communicating within the various health areas in which allied health professionals serve. An audio-visual approach to anatomy, physiology, pathology, diagnostics, and treatment regimens offers content information and language comprehension skills applicable to other dimensions.
Cross Listing(s): NURS 5131G.

NURS 5311 Cultural Immersion in International Health Care
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
The course introduces history, health systems, economics, values, social etiquette, and daily life. Interpersonal, family and health care patterns in a foreign country are emphasized in preparation for cross-cultural health study.
Corequisite(s): NURS 5332.
Cross Listing(s): NURS 5311G.

NURS 5311G Cultural Immersion in International Health Care
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
The course introduces history, health systems, economics, values, social etiquette, daily life. Interpersonal, family and health care patterns in a foreign country are emphasized in preparation for cross-cultural health study. Students taking course for graduate credit will complete additional assignments. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Corequisite(s): NURS 5332.
Cross Listing(s): NURS 5311.

NURS 5332 Introduction to International Nursing Research
3 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course examines international nursing research methods and design with a focus on global health, specifically related to health disparities in underserved populations in local, national, and international areas.
Corequisite(s): NURS 5311.
Cross Listing(s): NURS 5332G.

NURS 5332G Applied International Nursing Research
3 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course examines international nursing research methods and design with a focus on global health, specifically related to health disparities in underserved populations in local, national, and international areas on research ethics and a research career. Students taking course for graduate credit will complete additional assignments. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Corequisite(s): NURS 5311.
Cross Listing(s): NURS 5332.

NURS 5793G International Research Application I
5-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides an analysis and evaluation of the international research process and product development. Cultural immersion with a focus on health disparities, leadership in research, and exploration of the health care system in the host country. Students taking course for graduate credit will complete additional assignments. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in NURS 5311 and NURS 5332.
Corequisite(s): NURS 5794.
Cross Listing(s): NURS 5793.
NURS 5794G International Research Application II
4-6 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
This course provides an analysis and evaluation of the international research process and product development. Cultural immersion with a focus on health disparities, leadership in research, and exploration of the health care system in the host country. Students taking course for graduate credit will complete additional assignments. Graduate students will be given an extra assignment determined by the instructor that undergraduates will not be required to do.
Prerequisite(s): A minimum grade of "C" in NURS 5311 and NURS 5332.
Corequisite(s): NURS 5793.
Cross Listing(s): NURS 5794.
NURS 6101 Chronic Care Management I
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Exploration and Evaluation of Chronic Care Conditions across the lifespan with a specific focus on those affecting clients of managed care eligibility. Local, Regional, State and National evaluation of prevalent Chronic Care Conditions, their demographic, cultural and economic dispositions. Identify target population of interest and develop at least 3 collaborative resources for potential care management implementation.
NURS 6102 Family Health Promotion for APRN
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Family theoretical frameworks are used to explore the influence of psychological, cultural, and social aspects of rural/urban life on health. Health care problems and issues of concern to advanced practice nursing providing care to rural and urban families will be compared and contrasted. Techniques for screening at risk families to facilitate early case finding and strategies for health maintenance and health promotion are included.
NURS 6103 Chronic Care and Pharmacology Management II
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
Build network partnership throughout healthcare service networks to develop chronic care management programs related to focus population. Develop chronic care management resources, documentation strategies and outreach resources to meet the needs of the population and meet the CMS criteria for Chronic Care Management reimbursement services. Clinical time will be applied and can encompass networking, program development and outcome evaluations for collaborative partners. Students will identify at least one funding resource potential to support gaps in service and care coordination for a specific population.
Prerequisite(s): Minimum grade of "B" in NURS 6106 and NURS 6107.
NURS 6104 Health Care Organization and Policy for APRN
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The relationship of economics to policy development and to health outcomes are examined from regional, state, national and global perspectives. Students will explore the American governmental superstructure of the health care system, relevant laws and regulations, and its influence on practice. Fundamental principles of micro and macroeconomics are related to health care delivery systems. Quantitative decision making models are examined, compared and contrasted with intangible aspects of decision making and policy development. Ethical inquiry addresses access to health care and utilization and dispersion of scarce resources. Prerequisite(s): Minimum grade of "B" in: NURS 6101 and NURS 6102.
NURS 6105 Differential Diagnoses, Pathology and Scientific Medical Terminology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed for students interested in expanding their knowledge of medical terminology and related pathophysiology. This is a fully online course. There are no on campus meetings or synchronous online meetings. Emphasis is placed on etymology. Students will be required to expand their knowledge beyond the undergraduate requirements of basic medical terminology and related pathophysiology, as determined by the course instructor. Prerequisite(s): Minimum grade of "B" in: NURS 6101 and NURS 6102.
NURS 6106 Chronic Care Management and Advanced Health Assessment Capstone
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Complete Chronic Care Management Guide for focus population. Collaborate with network partners to support implementation of Chronic Care Management Program. Clinical time will be applied and will encompass research utilization, designing a funding application and/or support program related to focus area/s for future program implementation and completion of resources to support long term Chronic Care Management Services. Prerequisite(s): Minimum grade of "B" in: NURS 6103 and NURS 6105.
NURS 6107 Epidemiology and Transcultural Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course provides introduction to the principles of epidemiology and transcultural healthcare competence as applied to patient populations served by advanced practice nurses (APN). Emphasis is placed on preparing APNs to utilize the principles of epidemiology to assist vulnerable populations in achieving a higher level of wellness within their cultural and environmental contexts.
NURS 6201 Advanced Pathophysiology and Pedagogies for Teaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines concepts of advanced pathophysiology useful for nurse educators. The development, analysis, and evaluation of pedagogical approaches to teaching pathophysiology are analyzed. Students will be prepared to teach pathophysiology in the context of generalist nursing education.
NURS 6202 Advanced Pharmacology and Pedagogies for Teaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines concepts of advanced pharmacology useful for nurse educators. The development, analysis, and evaluation of pedagogical approaches to teaching pharmacology are analyzed. Students will be prepared to teach pharmacology in the context of generalist nursing education.
NURS 6203 Advanced Physical Assessment and Pedagogies for Teaching
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines concepts of advanced health assessment concepts useful for nurse educators. The development, analysis, and evaluation of pedagogical approaches to teaching health assessment are analyzed. Students will be prepared to teach health assessment in the context of generalist nursing education.
NURS 6204 Theoretical Perspectives of Teaching and Learning in Nursing Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the theoretical underpinnings that provide the foundation for teaching and learning in nursing education. A broad view of theoretical perspectives in developmental psychology and education as applied to the needs of learners are covered. The role of the nurse educator is explored to meet the teaching needs of diverse learners in diverse learning environments designers and strategies to assess learning experiences from the standpoint of learner and instructor are investigated. Course includes exploring the nurse educator role as a leader in the academic community and cultivation of teaching, scholarship and service activities.
NURS 6205 Curriculum Design and Evaluation in Nursing Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the processes of curriculum design and program development and in nursing education. The elements of the philosophical and contextual foundation of a curriculum, the application of professional standards and implementation and evaluation of both a curriculum and an educational program are explored.
NURS 6206 Teaching Strategies and Methods in Nursing Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores a broad array of creative classroom and clinical learner-centered teaching strategies, particularly those that promote critical thinking and facilitate active student learning. Frameworks, tools, and experiences to select, evaluate, and use teaching strategies appropriate to a variety of learning environments in nursing education are explored. An assessment of learning experiences from the standpoints of self, learner and instructor as well as appropriate assessment strategies to address teaching and learning issues and situations are addressed. Course content will include a focus on the use of technology in classroom and clinical nursing education. Prerequisite(s): Minimum grade of "B" in NURS 6204.

NURS 6207 Clinical Specialty Practicum I
2 Credit Hours. 0 Lecture Hours. 90 Lab Hours.
This course emphasizes the implementation of effective, innovative learner-centered pedagogies in the learner’s specialty area. Teaching strategies and methods focusing on high quality and safe nursing practices will be applied in field experiences under the direct supervision of experienced nurse educators. Prerequisite(s): Minimum grade of "B" in NURS 6204.

NURS 6208 Assessment, Measurement and Evaluation in Nursing Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the examination of a range of assessment methods, techniques, devices, and strategies and ways to determine appropriate assessments for measuring student learning and curricular goals in both theoretical and clinical applications. Prerequisite(s): Minimum grade of "B" in: NURS 6206, NURS 6207.

NURS 6209 Clinical Specialty Practicum II
2 Credit Hours. 0 Lecture Hours. 90 Lab Hours.
This course is a continuation of implementing effective learner-centered pedagogies in the learner’s specialty area, with the addition of appropriately measuring and evaluating student learning. Teaching strategies and evaluation activities focusing on high quality and safe nursing practices will be applied in field experiences under the direct supervision of experienced nurse educators. Prerequisite(s): Minimum grade of "B" in: NURS 6206, NURS 6207.

NURS 6210 Nursing Education Capstone
3 Credit Hours. 0 Lecture Hours. 135 Lab Hours.
This capstone educational experience course provides an opportunity to integrate the role of the nursing educator in a real-world context. Student-centered educational activities will be developed that incorporate pedagogy, instructional design, curriculum development, and assessment of learner outcomes within a nursing course under the guidance of an experienced nurse educator. 135 contact hours. Prerequisite(s): Minimum grade of "B" in NURS 6204 and NURS 6205 and NURS 6206 and NURS 6207 and NURS 6208 and NURS 6209.

NURS 7234 Primary Care Clinical 3: Adult Health
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
This course requires the application of theoretical concepts relative to the provision of health care to the adult and older client within the scope of practice of the nurse practitioner. Group discussions will provide the opportunity for student learning synthesis while incorporating transcultural strategies for the client, family and community. A total of 180 hours of clinical experience in a rural/urban ambulatory primary care setting providing care to the adult and older population is required. Prerequisite(s): NURS 5230G and NURS 5210G and NURS 6134 and NURS 6135. Corequisite(s): NURS 7243.

NURS 7243 Primary Care 3: Adult Health
4 Credit Hours. 4 Lecture Hours. 0 Lab Hours.
This course explores the role of the family nurse practitioner in the provision of primary health care to the adult client in rural/urban ambulatory care settings. Emphasis is placed on health maintenance/promotion and the management of adult health within a transcultural context of family/community. Corequisite(s): NURS 7234.

NURS 7432 Comm Epi Health Prom APN
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
NURS 7731 CNS Capstone: Community Health
3 Credit Hours. 1 Lecture Hour. 2 Lab Hours.
CHCNS capstone course provides 180 hours of experience in a setting that supports synthesis and applications of theory and evidenced-based practice knowledge gained in required courses. Emphasis is placed on the development and evaluation of systems which provide care to a community within a transcultural and health promotion framework. Group discussions will provide an opportunity for capstone learning synthesis of the community health CNS role. All courses must be completed with the exception of an elected thesis. Prerequisite(s): All course work except for thesis.

NURS 7750 RCHNS Practicum
5 Credit Hours. 1 Lecture Hour. 16 Lab Hours.
NURS 8231 Theoretical Perspectives of Teaching and Learning in Nursing Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the theoretical underpinnings that provide the foundation for teaching and learning in nursing education. A broad base of theoretical perspectives in developmental psychology and education as applied to the needs of learners are covered. A variety of strategies to meet the teaching needs of diverse learners in diverse learning environments are explored and evaluated. Professional standards to inform the practice of instructional designers and strategies to assess learning experiences from the standpoint of learner and instructor are investigated.

NURS 8232 Instructional Design and Assessment in Nursing Education
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the processes of instructional design, curriculum development and assessment of learner outcomes in nursing education. The elements of the philosophical and contextual foundation of a curriculum, the application of professional standards and implementation and evaluation of both a curriculum and an educational program are explored. Course content focuses on the examination of a range of assessment methods, techniques, devices, and strategies and ways to determine appropriate assessments for measuring student learning and curricular goals.

NURS 8233 Learner-Centered Teaching: Creative Classroom and Clinical Education in Nursing
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores a broad array of creative classroom and clinical learner-centered teaching strategies, particularly those that promote critical thinking and facilitate active student learning. Frameworks, tools, and experiences to select, evaluate, and use teaching strategies appropriate to a variety of learning environments in nursing education are explored. An assessment of learning experiences from the standpoints of self, learner and instructor as well as appropriate assessment strategies to address teaching and learning issues and situations are addressed. Course content will include a focus on the use of technology in classroom and clinical nursing education.
NURS 8234 Nursing Education Cognate Capstone
3 Credit Hours. 1 Lecture Hour. 0 Lab Hours.
This capstone educational experience course provides an opportunity to integrate the role of the nursing educator in a real-world context. Student learner-centered educational activities will be developed that incorporate pedagogy, instructional design, curriculum development, and assessment of learner outcomes within a nursing course under the guidance of an experienced nurse educator. 180 contact hours.
Prerequisite(s): A minimum grade of "B" in NURS 8231 and NURS 8232 and NURS 8233.

NURS 8331 An Interprofessional Collaboration Approach for Patients with Multiple Chronic Conditions 1
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is designed to introduce students to collaborative practice among various disciplines of study in order to care for vulnerable persons with multiple chronic conditions.

NURS 8332 An Interprofessional Collaboration Approach for Patients with Multiple Chronic Conditions 2
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will provide students an opportunity to collaborate together in interprofessional teams to utilize professional competencies to provide appropriate care to persons with multiple chronic conditions in theoretical situations.
Prerequisite(s): A minimum grade of "B" in NURS 8331.

NURS 8333 Interprofessional Collaboration for Patients with Multiple Chronic Conditions with Practicum 1
3 Credit Hours. 2 Lecture Hours. 2 Lab Hours.
This course will provide students the opportunity to work using interprofessional teams in the clinical setting to address the health status of vulnerable persons with multiple chronic conditions.
Prerequisite(s): A minimum grade of "B" in NURS 8332.

NURS 8334 Interprofessional Collaboration for Patients with Multiple Chronic Conditions with Practicum 2
3 Credit Hours. 1 Lecture Hour. 4 Lab Hours.
This course will allow students to use the theoretical concepts learned from previous courses to care for persons with multiple chronic conditions in authentic situations seen in the clinical environment.

NURS 9101 Theoretical Basis for Clinical Scholarship
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course explores the scientific underpinnings and theories from nursing and related disciplines in the application to clinical practice. The student is prepared for the implementation and integration of evidence-based practice. The framework for professional practice and professional role activities is developed from the current American Nurses' Association Nursing: Scope and Standards of Practice. Prerequisite(s): Admission to the BSN-DNP.

NURS 9102 Research Design and Dissemination
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course is designed to enhance your ability to understand and critique nursing research applicable to advanced nursing practice. This course is intended to prepare individual students to participate as a member of a clinical research team. Current professional and practice standards/guidelines provide the foundation for this course. The framework for professional practice and professional role activities is developed from the American Nurses' Association Nursing: Scope and Standards of Practice. Prerequisite(s): Admission to the BSN-DNP Program.

NURS 9103 Psychodynamics of Health
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
Holistic and humanistic family theoretical frameworks are used to explore evidence based nursing practice in the recognition, assessment, management and/or referral of individuals experiencing emotional, psychobiopharmacokinetic, developmental and psychiatric disorders. Health care problems and issues of concern to advanced practice nursing providing care to rural and urban families will be compared and contrasted.
NURS 9110 Health Policy Concerns in Delivery Systems
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The relationship of economics to policy development and to health outcomes are examined from regional, state, national, and global perspectives. Students will explore the American governmental superstructure of the healthcare system, relevant laws and regulations, and its influence on practice. Fundamental principles of micro and macroeconomics are related to healthcare delivery systems. Quantitative decision-making models are examined, compared, and contrasted with intangible aspects of decision-making and policy development. Ethical inquiry addresses access to healthcare and utilization and dispersion of scarce resources.

NURS 9111 Biomedical Ethics
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course is designed to present ethical principles preparing the Advanced Practice Registered Nurse (APRN) to guide patients, families, and communities through the complex maze of ethical dilemmas. Students will use evidence-based nursing and interprofessional literature to analyze ethical dilemmas that arise in practice. Through the philosophical study of morality as applied to biomedical ethics in current health care systems, APRNs will be able to help people arrive at culturally sensitive and individually appropriate solutions that focus on protecting vulnerable individuals and restoring health.

NURS 9112 Role Transition for DNP Prepared APRN's
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The course explores the theoretical and scientific underpinnings that provide the foundation for the advanced practice nurse (APN) role. A variety of advanced practice role-related topics will be covered that highlight leadership, scholarship, advocacy, evidence based practice, and professional development.

NURS 9113 Biometrics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course provides foundation for the application of statistical analysis to investigate underlying relationships in health care data relevant to advanced practice nursing. Students will gain an understanding of when and why to use biostatistical techniques as well as how to apply them with confidence and interpret their output, using statistical computer software. Prerequisite(s): Introductory statistics course & Admission to the BSN-DNP. Corequisite(s): NURS 9114 and NURS 9115.

NURS 9114 Outcomes Management
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
The course examines comprehensive outcomes management initiatives to improve health care. Theoretical models, analytic methods, and evaluation strategies will be explored and critiqued as they relate to outcomes management. Connections between nursing-sensitive outcomes, outcomes management strategies, and patient population characteristics in healthcare systems will be emphasized.

NURS 9115 Scholarly Writing at the Graduate Level
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course examines the processes of translating and integrating scholarship into practice as well as the dissemination of evidence-based findings to diverse audiences through scholarly writing. Emphasis will be placed on advanced information searches, analytical reasoning and writing strategies relevant to the practice of advanced professional nursing, scholarly writing in the form of a manuscript using peer-reviewed journal guidelines, the generation of complex scholarly writing such as the dissertation, and appropriate citation format according to the American Psychological Association.

NURS 9116 Population Focused Collaborative Initiative
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course prepares the APN to investigate a vulnerable population in collaboration with health care partner. The student will develop the ability to assume a consultant role in procuring fiscal resources to improve health care outcomes diverse populations. Prerequisite(s): Minimum grade of "B" in: NURS 9113 and NURS 9114 and NURS 9115. Corequisite(s): NURS 9110.

NURS 9117 Leadership and Management in Practice Transformation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Students will engage in leadership activities to support the advanced practice registered nurse and affect policy, management, and health outcomes for patients and populations.

NURS 9118 Independent Study - Graduate
6 Credit Hours. 0-6 Lecture Hours. 0-36 Lab Hours.
NURS 9119 Special Topics - Graduate
6 Credit Hours. 0-6 Lecture Hours. 0-36 Lab Hours.
The professor offers a course in a selected topic for qualifying students.

NURS 9120 PC II - Pediatrics
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course explores the role of the family nurse practitioner in the provision of primary health care to the pediatric client in ambulatory care settings. Emphasis is placed on health maintenance/promotion and the management of pediatric health within a transcultural, rural/urban, family and community context. Prerequisite(s): Minimum grade of "B" in: BSN-DNP Core courses. Corequisite(s): NURS 9720.

NURS 9121 PC I - Women's Health
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course explores the role of the nurse practitioner in the provision of primary health care to women in rural/urban ambulatory care settings who present for gynecological and prenatal care. Emphasis is placed on health maintenance/promotion and the management of women's health concerns within the transcultural context of family/community. Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses. Corequisite(s): NURS 9721.

NURS 9122 PC III - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course explores the role of the Family Nurse Practitioner in the provision of primary health care to the adult and gerontological client in a rural/urban ambulatory care setting. Emphasis is placed on health maintenance/promotion and the management of adult health within the trans-cultural context of family/community. Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.

NURS 9130 AC I - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course includes advanced nursing practice assessment, diagnosis and management of foundational concepts and episodic health deviations occurring across the continuum of acute care settings throughout the adult and geriatric lifespan. Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses. Corequisite(s): NURS 9730.

NURS 9131 AC II - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
The course includes advanced nursing practice assessment, diagnosis and management of advanced concepts including critical health deviations and terminal illness occurring in various acute care settings throughout the adult and geriatric lifespan. Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses. Corequisite(s): NURS 9731.
NURS 9132 AC III - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Course content covers assessment, diagnosis and management of emergent and critical health deviations that require complex monitoring and high intensity advanced practice nursing interventions for adult and geriatric patients. Interprofessional collaboration to ensure quality and safe patient care with transition to other care settings is emphasized.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9732.

NURS 9140 PC I - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced nursing assessment, diagnosis, and management of diseases/disorders common to the adult-geriatric population.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9740.

NURS 9141 PC II - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced nursing assessment, diagnosis, and management of syndromes common to the adult-geriatric population.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9741.

NURS 9142 PC III - Adult and Gerontology
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Advanced nursing assessment, diagnosis, and management of adult-gerontological patients in a variety of care systems including rehabilitation, long-term care, and transitional care.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9742.

NURS 9150 Psychiatric Mental Health I
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the role of the psychiatric mental health nurse practitioner in the provision of specialty health care to individuals, with psychiatric/mental health conditions in rural/urban care settings. Emphasis is placed on assessment, diagnosis and treatment and the management of mental health, as well as health maintenance/promotion within the lifespan within a transcultural context across settings.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9750.

NURS 9151 Psychiatric Mental Health II
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the role of the psychiatric mental health nurse practitioner in the provision of primary/specialty health care to children and families with psychiatric/mental health conditions in rural/urban care settings across a variety of populations. Emphasis is placed on assessment, diagnosis and treatment and the management of mental health, as well as health maintenance/promotion with children and families within a transcultural context of family/community.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9751.

NURS 9152 Psychiatric Mental Health III
2 Credit Hours. 2 Lecture Hours. 0 Lab Hours.
This course explores the role of the psychiatric mental health nurse practitioner in the provision of specialty health care to individuals and families with substance use disorders. Advanced nursing care across the treatment spectrum is addressed, including prevention, acute care, and recovery/long term care. Emphasis is placed on assessment, diagnosis and treatment and the management of mental health, as well as health maintenance/promotion within a transcultural context in groups, families and community.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9752.

NURS 9153 Vulnerable Populations
1 Credit Hour. 1 Lecture Hour. 0 Lab Hours.
This course explores the role of the psychiatric mental health nurse practitioner in the provision of specialty health care to vulnerable populations with psychiatric/mental health conditions in rural/urban care settings such as prisons, shelters, emergency departments and various community agencies. Emphasis is placed on prevention, system assessment, program development, and population management utilizing translational research in context of the community as well as advocacy and policy development as it relates to mental health. Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.

NURS 9708 Advanced Health Assessment Clinical
1 Credit Hour. 0 Lecture Hours. 6 Lab Hours.
Group discussions provide the opportunity for learning synthesis. 90 clinical hours are required in settings which provide experience for health, developmental and diagnostic assessments; and histories and physical examinations of adults, pregnant women, children, and newborns. On-campus seminar and laboratory practice and off-campus experiences in ambulatory settings with laboratory facilities serving diverse populations are required.
Prerequisite(s): Minimum grade of "B" in: NURS 9104 and NURS 9105.
Corequisite(s): NURS 9108.

NURS 9713 Capstone Practice and Professional Issues
2 Credit Hours. 1 Lecture Hour. 6 Lab Hours.
The Capstone Professional Issues course is the culmination of advanced assessment, practice and management of diverse populations across the lifespan. This course will also focus on the multiple regulatory, practice, ethical and legal dimensions of APRN practice. The APRN student will complete 90 hours of clinical experience in a variety of rural/urban health care settings based on the student’s current APRN clinical track.
Prerequisite(s): BSN-DNP Core, Advanced Practice, and Specialty Courses. Corequisite(s): NURS 9110.

NURS 9720 PC II - Pediatric Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
This course requires the application of theoretical concepts relative to the provision of health care to the pediatric client within the scope of practice of the family nurse practitioner. Students will complete 180 precepted clinical hours in a pediatric primary care setting.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9120.

NURS 9721 PC I - Women's Health Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
This course requires the application of theoretical concepts relative to the provision of primary health care to the female client within the scope of practice of nurse practitioner. Group discussions will provide the opportunity for student learning synthesis while incorporating transcultural strategies for the client, family, and community. A total 180 hours of clinical experience in a primary care obstetrical/gynecological setting providing care to women experiencing reproductive or lifestyle concerns and pregnancy or gynecological conditions is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9121.

NURS 9722 PC II - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
This course requires the application of theoretical concepts relative to the provision of healthcare to the adult/gerontological client within the scope of practice of the Family Nurse Practitioner. Group discussion will provide the opportunity for students learning synthesis while incorporating translational care strategies for the client, family, and community. A total of 180 hours of clinical experience in a rural or urban ambulatory primary care setting providing care to the adult population is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9122.
NURS 9730 AC I - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Clinical application of theories and concepts are practiced in the acute care setting that aligns with the course material presented in NURS 9130.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9130.

NURS 9731 AC II - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Clinical application of theories and concepts are practiced in the acute care setting that aligns with the course material presented in NURS 9131. Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9131.

NURS 9732 AC III - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Clinical application of theories and concepts are practiced in the acute care setting that aligns with the course material presented in NURS 9132.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9132.

NURS 9740 PC I - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Application of theoretical concepts relative to the provision of health care to the adult-gerontological patient within the scope of practice of the adult-gerontology primary care nurse practitioner. A total of 180 hours of clinical experience in an ambulatory primary care setting providing care to the adult-gerontology population is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9140.

NURS 9741 PC II - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Application of theoretical concepts relative to the provision of health care to the adult-gerontological patient within the scope of practice of the adult-gerontology primary care nurse practitioner. A total of 180 hours of clinical experience in an ambulatory primary care setting providing care to the adult-gerontology population is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9141.

NURS 9742 PC III - Adult and Gerontology Clinical
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Application of theoretical concepts relative to the provision of health care to the adult-gerontological primary care patient within the scope of practice of the adult-gerontology primary care nurse practitioner. A total of 180 hours of clinical experience in sites other than the primary care setting should be sought by the nurse practitioner student.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9142.

NURS 9750 Psychiatric Mental Health Clinical I
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Application of advanced practice nursing models with clients that have complex psychiatric illnesses or are at high risk with focus on care of the individual. Collaborative process in therapy, consultation, and planned change with use of assessment, diagnostics, individual therapy modalities, and the utilization of pharmacotherapeutics. The nursing process and therapeutic alliance for medication compliance will be emphasized. A total of 180 hours of clinical experience in a mental health setting is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9150.

NURS 9751 Psychiatric Mental Health Clinical II
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Application of advanced practice nursing models with clients that require mental health promotion, have complex psychiatric problems or are at high risk with focus on care of families and children with mental health concerns. Collaborative process in therapy, consultation, and planned change with use of child and/or family therapy modalities and the utilization of pharmacotherapeutics. A total of 180 hours of clinical experience in a mental health setting is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9151.

NURS 9752 Psychiatric Mental Health Clinical III
2 Credit Hours. 0 Lecture Hours. 12 Lab Hours.
Application of advanced practice nursing models with clients with substance use and related disorders. Collaborative process in therapy, consultation, and planned change with use of assessment, diagnostics, individual and group therapy modalities, and the utilization of pharmacotherapeutics. A total of 180 hours of clinical experience in a mental health setting incorporating substance abuse services is required.
Prerequisite(s): Minimum grade of "B" in BSN-DNP Core courses.
Corequisite(s): NURS 9152.

NURS 9917 Clinical Project I
3 Credit Hours. 0 Lecture Hours. 18 Lab Hours.
The DNP final project is a three step process. Student work independently with the guidance of a Project Committee and agency sponsor. Step one is problem identification, step two is project implementation, and step three is evaluation and dissemination. In Clinical Project I, the DNP student will design an evidenced-based project aimed at improving a health care outcome in their area of interest and expertise. The focus is on problem identification, completion of a needs assessment, and an appropriate literature review. Prerequisite(s): Completion of Graduate and Specialty Core with a "B" or better.

NURS 9918 Clinical Project II
3 Credit Hours. 0 Lecture Hours. 18 Lab Hours.
This is step two of the DNP final project. In Clinical Project 2, the DNP student will implement the project designed in Clinical Project 1. The focus is on implementation and data collection. Prerequisite(s): Minimum grade of "B" in NURS 9917.

NURS 9919 Clinical Project III
3 Credit Hours. 0 Lecture Hours. 18 Lab Hours.
This is step three of the DNP final project. In Clinical Project 3, the student will evaluate and disseminate project results. Findings will be disseminated in a professional format. Prerequisite(s): Minimum grade of "B" in NURS 9918.

OCEA Oceanography

OCEA 3100 Introduction to Oceanography
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
Basic principles of oceanography. The distribution of water over the earth, nature and relief of the ocean floors, tides and currents, chemical properties of sea water and constituents, and application of oceanographic research.

ONTL OnlineTeaching & Learning

ONTL 6206 Effective Online Instructional Practices
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course will explore the theories, models, approaches, technologies, and methods of online teaching. Participants will develop and create an online course for use in their own area of expertise. Best pedagogical practices for teaching online will be examined. Other topics will include the characteristics, and needs of online learners, motivating student-student interaction, and managing online interaction. Students will complete an online field experience in a virtual school environment.
PBAD Public Administration

PBAD 2231 Introduction to Public Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides a comprehensive overview of the history of public administration, its development as a field, and a survey of the critical theories and normative issues within public administration and the implication for practice.

PBAD 3331 Applied Public Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the historical and theoretical development of public sector management. The course also introduces performance management tools of contemporary public managers, including strategic planning, goal setting, project management, and performance management systems.

PBAD 3333 The Policy Process and Democracy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores the frameworks, theories, and models used to explain how issues are conceptualized and brought to government and then subsequently designed, selected, and implemented. This includes an investigation into politics, focusing on how actors and issue networks interact and exercise power within the policy process.

PBAD 3334 Introduction to Public and Nonprofit Financial Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course provides students with the basics of financial management applicable to public and nonprofit organizations.

PBAD 3431 Public Budgeting
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course serves as an introduction to public sector budgeting providing students with practical knowledge about how the public sector budget process works, an overview of the technical aspects of public budgeting and various theories of budgeting.

PBAD 3631 Introduction to Nonprofit Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course serves as an overview of the nonprofit sector and to introduce a range of common practices and concerns related to managing in this sector including leadership, board governance, fundraising and philanthropy.

PBAD 3632 Social Entrepreneurship, Enterprise, and Innovation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys the theories for the emerging disciplines of social entrepreneurship, enterprise, and innovation. The course explores how individuals and organizations use private sector approaches to solving complex social problems.

PBAD 3633 International Non-governmental Organizations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the rapidly growing world of international nongovernmental organizations (INGOs). The course explores how these organizations are becoming a part of the global society through policy and program development, humanitarian relief, advocacy, and other human service provisions. Students will be able to increase their knowledge and understanding of INGOs - what they do, the complex issues they face, and how they differ from domestic nonprofits.

PBAD 3731 Public Policy
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys the topic of public policy including the historical foundations and theories of the field. Emphasis is placed on the the significance of public policy in addressing pressing social issues and the social, economic, political, and cultural contexts of public policy.

PBAD 3732 Policy Analysis
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on the evidence-based methods used to create, implement, and study substantive public policy problems. This includes an investigation into the process of policy analysis, as well as the tools frequently employed at each step. The intent is to improve the quality of policy-making by critically examining the design and relevance of policies, their implementation and execution, and their impact on households, communities, and the society at large.

PBAD 3733 Contemporary Policy Issues
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This class explores a number of core substantive policy areas that represent a substantial part of contemporary U.S. policy-making. It offers a comprehensive overview of each topic area that and then probes more deeply into each topic. This includes an overview of the major policies and programs within each area, how they came into effect, and current or likely reforms in terms of effectiveness, efficiency, equity, ethics, or political feasibility.

PBAD 4231 Administrative Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course serves as an introduction to administrative law providing students with practical knowledge about administrative law procedures, how administrative law fits into the constitutional and legal framework, and the role of administrative law in policy. This course is designed to introduce students to decision-making based on a public agency's operating rules.

PBAD 4232 Public Service Values, Ethics, and Conflict Resolution
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course investigates specific ethical concerns of the public sector, including its underlying values and norms. An emphasis is placed on the relationship between democracy and administrative decision-making, a focus on accountability, and the role of ethical actors in the resolution of public value conflicts.

PBAD 4233 Human Capital Management for Administrators
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course focuses on human resources management in a public sector context. Particular emphasis is placed on the past developments of and future challenges in the field. Topics such as employee recruitment, selection, and compensation, as well as more contemporary issues such as diversity management are addressed.

PBAD 4234 IT and E-government for Public Managers
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines organizational societal value structures and the ways in which technology creates rapid change and new alternatives in values. The impact of e-government initiatives and social media on the way governments interact with the public is explored.

PBAD 4235 Research Methods and Evaluation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course familiarizes students with the basic approaches to social research as applied in public and service settings. Emphasis is placed on techniques for organizing and presenting data for policy and management decision-making.

PBAD 4331 Leadership & Managerial Innovation
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course introduces students to the literature on the successful leadership of people and groups in public service organizations. In order to lead well, managers need expertise in multiple areas, including personality, motivation, group behavior, power, leadership, decision-making, and change management. This course also examines the meaning and significance of managerial innovation.
PBAD 4332 Resource Development and Management for Nonprofits
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course explores resource development for nonprofit organizations. The course examines tools and strategies for fundraising principles and approaches for funding. It also investigates grantwriting principles and mission accomplishment.

PBAD 4333 Strategic Management for Nonprofits
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course surveys the managerial, strategic, and governance issues facing nonprofit leadership. The course explains how strategic planning techniques like environmental scans, stakeholder analysis, and strategy formulation and implementation assist in responding to internal and external demands for increased nonprofit performance and mission accomplishment.

PBAD 4334 Policy and Markets
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This class explores the rationales and explanations for government intervention in correcting social problems including political, moral and ethical, and market or economic rationales. Special emphasis is placed on collective action, market failures, and externalities as the predominant justification for public policy.

PBAD 4431 Special Topics in Public Administration
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course is an elective that covers special topics in public administration.

PBAD 4791 Field Internship in Public Administration
3-9 Credit Hours. 0 Lecture Hours. 0 Lab Hours.
The internship in public administration is designed to provide students with meaningful experiences in public service organizations. Students are approved to intern in a public or nonprofit organization, serving in positions that allow them to gain exposure to the management of these organizations. No more than three credit hours can be counted towards completion of the Minor in Public Administration. Prerequisite(s): A minimum grade of "C" and prior or concurrent enrollment in PBAD 2231.

PBAD 7030 Selected Topics in Public and Nonprofit Management
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines specific topics in public and nonprofit management not addressed by other courses. May be repeated once as topics change.

PBAD 7130 Ethics for Public Service Organizations
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
This course examines the experiences, approaches, and strategies for confronting and solving the complex problems facing public and nonprofit organizations. An emphasis is placed on accountability and responsibility of public servants, the methods of moral reasoning and their connection to behavior, specific ethical concerns of public organizations, and ethical decision-making.

PBAD 7133 Administrative Law
3 Credit Hours. 3 Lecture Hours. 0 Lab Hours.
